## Proposal 331

Mr. Chairman and members of the Board,

The PWS/CR AC respectfully request that you adopt proposal 331 as a place holder. We further request the board to adopt substitute language directing the ADF&G to create a viable management plan for Area E Tanner Crab before the December 2014 Fin Fish meeting. A

harvest strategy would be included in this management plan with a threshold level of abundance to be developed with current biomass estimates.

Points to consider: Season January 15<sup>th</sup> to March 31<sup>s</sup>, exclusive registration, vessel length limit. Pot limits (40 or under). Registration deadline of 15 days before season.
