**Body of Notice:**

PUBLIC NOTICE  
STATE OF ALASKA  
DEPARTMENT OF ENVIRONMENTAL CONSERVATION  
ARCO ALASKA, INC., ALPINE DEVELOPMENT PROJECT  
AIR QUALITY CONSTRUCTION PERMIT

The Alaska Department of Environmental Conservation (ADEC) has received an Air Quality Construction Permit application under 18 AAC 50.310 for the ARCO Alaska, Inc.'s, Alpine Development Project. ADEC proposes to issue Air Quality Control Construction Permit No. 9973-AC017 to ARCO Alaska, Inc., for project scope changes at Alpine. ADEC issues this preliminary decision under the authority of AS 46.14, 18 AAC 50.

ACMP: Project activities are being reviewed for consistency under the Alaska Coastal Management Program (ACMP), 6 AAC 50 and AS 44.19. Comments regarding inconsistency with an affected coastal district's enforceable policy or a State standard set out in 6 AAC 80.040-6AAC 80.150 must identify the enforceable policy or standard and explain how the project is inconsistent. Your comments, addressed directly to ADEC, are required to preserve your rights to file a petition under AS 46.40.100(b)(1).

Applicant: ARCO Alaska, Inc. (ARCO), P.O. Box 100360, Anchorage AK 99510-0360

Location: The Alpine Development Project is located in the Colville River Delta on the North Slope of Alaska, approximately 8 miles north of Nuiqsut; Northing 7805.5 km, Easting 578.0 km, Zone 5.

Activity: ARCO has proposed minor project scope changes at the Alpine Development Project, originally permitted under AQC permit 9873-AC033. The Alpine Development Project consists of drilling, construction, and operation of a new oil and gas production facility. ARCO proposes to install a Doyon 19 Drill Rig, three turbines, four heaters, two emergency standby diesel-fired generators, two waste incinerators, and two flare systems. ARCO proposes to add three emergency diesel-fired generators and eight small heaters as permanent sources at the facility. ARCO also proposes project changes that trigger additional Clean Air Act standards for onshore natural gas processing plants. This permit action imposes owner-requested conditions to limit the emission of hazardous air pollutants from the Alpine facility. This permit action also revises equipment lists and operational restrictions for project construction equipment and construction reserve pool equipment.

Emissions: The potential to emit regulated air contaminants from the Alpine Development Production Facility as revised is: 2157 tons per year (TPY) of oxides of nitrogen (NOX), 149 TPY sulfur dioxide (SO<sub>2</sub>), 318 TPY carbon monoxide (CO), 42 TPY particulate matter emissions (PM<sub>10</sub>), and 26 TPY volatile organic compounds (VOC).

Department Actions: The proposed facility is a major source (greater than 250 TPY) of NOX and CO emissions, and was therefore subject to pre-construction review under the Prevention of Significant Deterioration (PSD) regulations. The February 1, 1999, permit action assessed impacts of NOX, SO<sub>2</sub>, CO, and PM<sub>10</sub> under pre-construction review procedures. This permit action assessed the effect of the requested project changes.

ARCO updated existing ambient air quality and meteorological data representative of the vicinity of the project; conducted an ambient air quality impact analysis to determine whether the project changes may cause or contribute to a violation of applicable NAAQS or PSD increments; assessed Best Available Control Technology (BACT); and assessed project and associated activity impacts to air quality-related values including visibility, soils, water, and vegetation.

This permit action addresses only ARCO's project scope changes. The Department is Soliciting Public comments associated only with the proposed changes. To ease review, copies of the preliminary permit have the added or changed items marked for easy identification.

Department Preliminary Review: Based on PSD review of ARCO's Construction Permit Application, ADEC has prepared a preliminary permit decision to issue Construction Permit No. 9973-AC017. The permitted air contaminant emissions resulting from the facility:

1. Will not cause or contribute to a violation of any State Ambient Air Quality Standard or increment set out in 18 AAC 50.010 and 18 AAC 50.020(b);
2. Will be controlled by Best Available Control Technology (BACT); and
3. Will not adversely affect the air quality-related values of noise, odor, visibility, vegetation, and soils of the state.

Additional Information: Copies of ARCO's application, ARCO's Coastal Project Questionnaire, ADEC's preliminary Construction Permit decision, and preliminary Technical Analysis Report will be available for public review at the following offices by December 2, 1999:

ADEC AQM--410 Willoughby Avenue, Suite 105, Juneau, AK 99801-1795  
ADEC AQM--555 Cordova Street, Anchorage, AK 99501

Copies of the permit documents will also be available for public review at the Trapper School Community Library by December 7, 1999.

For copies of documents relevant to the preliminary Air Quality Control decision, please call Brian Renninger at (907) 465-5303 or (800) 770-8818. The Public Notice, Preliminary Permit, and Technical Analysis Report are also posted at the ADEC website, <http://www.state.ak.us/local/akpages/ENV.CONSERV/dawq/aqm/calendar.htm>

Opportunity for Public Participation: Notice is given that any person may present written statements relevant to the proposed Construction Permit and project consistency for the Alpine Project.

Your comments are welcome. Please direct inquiries and written comments relevant to the preliminary Air Quality Construction Permit decision to ADEC's representative, Jim Baumgartner, at 410 Willoughby Avenue, Suite 105, Juneau, AK 99801-1795; (907) 465-5108; by facsimile, (907) 465-5129; or electronic mail at [jbaumgar@envircon.state.ak.us](mailto:jbaumgar@envircon.state.ak.us). Written comments will be included in the record if received before 4:30 PM, January 4, 2000. Individuals with disabilities who may need auxiliary aids or services, or special modifications to participate in this public process, should contact Joel Casto at (907) 465-5010 (TTY).

The Department will hold a public hearing on the permit application if it determines that good cause exists.
