Body of Notice:

UNOCAL KENAI FERTILIZER COMPANY, LLC CO-GENERATION PROJECT AIR QUALITY CONSTRUCTION PERMIT

The Alaska Department of Environmental Conservation (ADEC) proposes to issue Air Quality Control Construction Permit No. 9923-AC004 to UNOCAL's Kenai Fertilizer Plant's Co-Generation Project. ADEC issues this preliminary decision under the authority of AS 46.14 and 18 AAC 50.

ACMP: The project's activities are also being reviewed for consistency under the Alaska Coastal Management Program (ACMP), 6 AAC 50 and AS 44.19. Comments regarding inconsistency with an affected coastal district's enforceable policy or a state standard set out in 6 AAC 80.040-6 AAC 10.150 must identify the enforceable policy or standard and explain how the project is inconsistent.

Applicant: UNOCAL Kenai Fertilizer Plant, LLC, P.O. Box 575, Kenai, Alaska 99611.

Location: The plant is located in Nikiski, Alaska, on the west side of the Kenai Peninsula along Cook Inlet, Mile 21 Spur Highway, Nikiski, AK; Section 21, Township 7 North, Range 12 West, Seward Meridian.

Activity: The applicant proposes to install one 39 MW GE Frame 6B Turbine, one 650 HP Detroit Diesel startup engine, and one 370 mmBTU/hr Heat Recovery Steam Generator for a Co-Generation (Co-Gen) Project. The project, as described in their application, will not require permits or approvals from other resource agencies.

Emissions: To avoid project classification as a major modification at the Kenai Plant, the applicant has proposed to decommission seven Fairbanks-Morse internal combustion engines and limit operation of the existing waste heat and package boilers to limit net emission increases from the project to less than 40 tons per year (tpy) of SO₂ and less than 15 tpy of PM₁₀. There will be a net emission decrease of NO_x, CO, and VOCs due to the project.

Department Preliminary Review: Based on review of UNOCAL's Construction Permit Application, ADEC is issuing a preliminary permit decision to issue Construction Permit No. 9923-AC004 and authorize the project.

The owner-requested limit requires a Construction Permit under 18 AAC 50.305(a)(4) to avoid project classification under the Prevention of Significant Deterioration (PSD) provisions of the Air Quality Control Regulations 18 AAC 50.

Based on pre-construction review by ADEC, the permitted air contaminant emissions resulting from the project will comply with State Emission Standards applicable to this project.

Alaska Coastal Zone Management Program (ACMP): The facility is located within the Kenai Peninsula Borough Coastal District. ADEC is reviewing the proposal as a project subject to consistency review under the Alaska Coastal Management Program (ACMP), under 6 AAC 50. Day one of the review is scheduled for July 28, 1999.

Additional Information: The public notice period will be 34 days. Copies of UNOCAL's application, ADEC's preliminary Construction Permit decision, and

Preliminary Technical Analysis Report will be available for public review at the following offices by July 28, 1999: ADEC Juneau Office, 410 Willoughby Avenue, 2nd floor, Juneau, AK 99801-1795; ADEC Anchorage Office, 555 Cordova Street, Anchorage, AK 99501-2617; and ADEC Kenai Office, 43335 Kalifornsky Beach Road, Suite 11, Soldotna, AK 99669. The preliminary decision may be downloaded from the ADEC website: <http://www.state.ak.us/dec/dawq/aqm/calendar.htm>

Preliminary Design Public Meeting to discuss the National Highway System (NHS) Intersections Improvements Project
Location: Tudor Road/Old Seward Highway; Tudor Road/Bragaw Street, and Northern Lights Blvd./Minnesota Drive, Central Region

The Alaska Department of Transportation & Public Facilities (ADOT&PF) will hold an informational public meeting to discuss the National Highway System (NHS) intersection Improvements Project. The NHS project involves improvements to three intersections: Tudor Road/Old Seward Highway; Tudor Road/Bragaw Street, and Northern Lights Blvd./Minnesota Drive. Pursuant to 18 AAC 50.720, the proposed project's draft air quality conformity document will also be available for review and comment. It will be located at ADOT&PF Main Conference Room, 4111 Aviation Ave (next to Lake Hood) on Tuesday, August 17, 1999 from 4:00 p.m. to 6:00 p.m.

The purpose of the proposed project is to reduce traffic congestion at the three project intersections. The project consists of minor widening and shifting of traffic lanes in order to separate and regulate conflicting traffic movements at the following intersections:

Tudor Road/Old Seward Highway: Channelize and widen to provide dual left-turns onto the Old Seward Highway from Tudor Road for both westbound and eastbound lanes in order to reduce left-turn congestion.

Tudor Road/Bragaw Street: Channelize and widen to provide dedicated dual left-turn lanes for the North and southbound legs of the intersection in order to eliminate the need for two distinct signal phases for North and South Bragaw Street.

Northern Lights Blvd./Minnesota Drive: Channelize and widen to provide a southbound right-turn lane from Minnesota to westbound Northern Lights Blvd. In order to reduce southbound congestion.

The proposed project is located within the Municipality of Anchorage non-attainment area for carbon monoxide. The project is identified in the updated Anchorage Metropolitan Area Transportation Study, which conforms to the State Implementation Plan on air quality. An overall decrease in carbon monoxide emissions is expected, with no violations of the National Ambient Air Quality Standards under the existing condition or future build options. The determination is based on a qualitative analysis performed for each project area. A copy of this determination can be examined at the ADOT&PF address noted above.

Persons wishing to submit written statements for the public record may deliver them to the Public Hearing that will follow an "open house" format where individuals can stop by at their convenience and talk to project personnel at the following address: Jerry O. Ruehle, Alaska Department of Transportation & Public Facilities, Preliminary Design Section, P.O. 196900, Anchorage, Alaska 99519-6900.

Comments must be received by 4:00 p.m. on September 2, 1999 to become part of the official record.

For additional information on the meeting, contact Scott Thomas, P.E., Design Engineer, ADOT&PF at (907) 269-0541. Individuals with a hearing impairment can contact the Department at our Telephone Device for the Deaf, number (907) 269-0473.
