

# Tenakee Springs Ferry Terminal Improvements Project

## #68145 / 0991006

The Alaska Department of Transportation and Public Facilities (DOT&PF) proposes to make improvements to the Tenakee Springs Ferry Terminal.

### The proposed project would:

#### Remove

- And replace the existing 12' by 240' approach dock decking and install several additional steel pipe pile supports.
- Existing City storage and fuel building and pile-supported dock and timber fender piles.
- Existing steel gangway float, platform and associated steel pipe piles, three 3-pile berthing and mooring dolphins.

#### Install

- 50' by 70' pile supported ferry staging dock.
- 50' by 60' pile supported dock with new fuel building and associated dock mounted fender system.
- 11' by 90' steel transfer bridge and pile supported abutment.
- Steel bridge support float with adjustable intermediate ramp and apron, and two 4-pile float restraint dolphins.
- Four 4-pile berthing dolphins.
- Ferry Access skiff float and associated steel pipe pile restraints.

The project would also re-establish the existing electrical system and the fueling system.

### Construction is projected for spring 2019

Development of this proposed project would follow a process required by the National Environmental Policy Act (NEPA). Based on project location and scope of work, the environmental document would be a categorical exclusion (CE). Possible affected resources include waters of the U.S., eagles, endangered species, marine mammals, and cultural or historic properties.

Comments on the proposal from interested persons will assist us in preparing the project design and environmental documentation.
