

This is an image that shows Homer on the left, the Homer Spit and Halibut Cove is generally where the white dot with "46514" is on the right.

4

This is an overview of Halibut Cove. The docks in question are barely visible about 20% of way across from the left on the bottom of the Narrows entering Halibut Cove from the left.

This is a closer Google Maps satellite view. On the upper-right is the Saltry restaurant and their dock. On the left the white squares are the cabins and the two floating docks can be seen.

This is a photo of the smaller dock, which is closer to Homer (on the left in the photo above). It only has the 2 floats.

Here is a photo of the longer dock. It has 5 floats.
