

Fairbanks Cushman Street Bridge

Project No. 0663012 / Z622070000

The Alaska Department of Transportation & Public Facilities (ADOT&PF), in cooperation with the Alaska Division of the Federal Highway Administration (FHWA), is proposing to upgrade Cushman Street between 1st Avenue and Terminal Street in Fairbanks, Alaska .

Project Purpose

The purpose of the proposed project is to improve safety for motorized and non-motorized users.

Project Need

This high-use pedestrian, tourist, and bicycle corridor is in need for improved accommodations for non-motorized users. In addition, the existing bridge railing needs to be upgraded to meet current crash standards.

Project Improvements

- Bridge upgrades
- Widen sidewalks
- ADA ramps
- Repave and restripe the road
- New signage
- Street lighting upgrades

Project Milestones

- We are currently working on the preliminary engineering and environmental studies.
- Winter 2017/2018—Approval of the Environmental Document
- Spring 2019—Final Design Plans, Specifications, and Estimate
- Summer 2019— Construction
