

# Climate Action Leadership Team

## Working Group on Mitigation

Agenda: February 28, 2018

9:00am      **Welcome and Updates**

- Short term action items – review of memo based on team member recommendations
- Update from DEC on GHG Emission – North Slope emissions data point

9:30am      **Renewable Energy and Energy Efficiency**

- Meeting renewable energy and energy efficiency goals - policy
  - Develop list of options, including review of HB 106
  - Options for and impact of Renewable Portfolio Standard (RPS) and Energy Efficiency Resource Standard (EERS)
  - Actions - development of work session to involve stakeholders, or produce white paper
- Meeting renewable energy and energy efficiency goals – financing
  - Options for renewables investment, including development of a Green Bank
  - Action - development of work session on funding and/or produce a white paper
- Role of University, or other major stakeholders with contributing emissions or outreach/education role
  - Mission related to climate change, carbon neutral campuses

10:15am      **Utility, Transportation and Extractive Industry Emissions**

- North Slope Emissions – power production (based on DEC report)
  - Alternatives to current power production or what are options to reduce emissions?
- Carbon Pricing – national and/or domestic
  - Options for price and dividend, or carbon tax; impact analysis
- Community emission tracking (based on DEC report) – Anchorage, Juneau, Fairbanks, Homer have established inventories
  - How do we increase the number of communities tracking emissions and/or what data is missing?
- Utilities – Railbelt Independent System Operator
  - Does this lead to increased use of renewables, increased efficiency, or emission reduction?

**Oil, Gas and Coal Production**

- As a producer of oil, gas, and coal, and recognizing their downstream carbon emissions, how should the state of Alaska approach future development?

11:30am      Adjourn
