Please be advised the following question has been submitted by the vendor community.

Question 1: Can you please confirm that the intended towing bitt's maximum rating is approximately 21 short tons?

Answer 1: No, the state cannot confirm this rating as the information is not presently available. It is the contractor's responsibility as experts in the field to towing vessels to ensure the safe towing of the vessel to Ketchikan to include validating all ratings for towing connection points.

However, as stated in Attachment F, Towing References, the towing force is 191Kn, which equals 21 short tons. It is critical to note that the rating of the towing bollard may be different than this figure.
