

ADDITIONAL REGULATION NOTICE INFORMATION  
(AS 44.62.190(d))<sup>1</sup>

1. Adopting agency: Alaska Department of Environmental Conservation
2. General subject of regulation: Noncrude Oil Tank Vessels and Barges
3. Citation of regulation (may be grouped): 18 AAC 75
4. Department of Law file number, if any: 2018200612

5. Reason for the proposed action:

( ) Compliance with federal law or action (identify): \_\_\_\_\_  
( ) Compliance with new or changed state statute  
( ) Compliance with federal or state court decision (identify): \_\_\_\_\_  
(X) Development of program standards  
( ) Other (identify): \_\_\_\_\_

6. Appropriation/Allocation: Spill Prevention and Response, Prevention Preparedness & Response

7. Estimated annual cost to comply with the proposed action to:

A private person: No identifiable additional costs to comply. Noncrude Tank Vessels and Oil Barges (NC TV/B) with a storage capacity of less than 500 barrels (21,000 gallons), a group of small operators primarily consisting of privately owned tank vessels that carry small quantities of fuel to remote lodges, would be provided with the option of a streamlined plan. The proposed streamlined plan option still requires specific equipment and training. In general, the development and requirements of a streamlined plan are not as extensive as the current Oil Discharge Prevention and Contingency Plan option. NC TV/Bs with a storage capacity of less than 500 barrels may experience an incremental compliance cost savings on the development of contingency plans. This cost savings is estimated to be \$1,000-\$2,000 per plan. The actual savings will vary across NC TV/B plans. Current NC TV/B plan holders will not be required to apply for a streamlined plan, so there would be no additional cost associated with the new streamlined plan option.

Another state agency: No identifiable additional costs to comply.

A municipality: No identifiable additional costs to comply.

8. Cost of implementation to the state agency and available funding (in thousands of dollars):
