TO ALL PROSPECTIVE BIDDERS AND OTHERS INTERESTED IN PROJECT NO.
SFHWY00054; Preventive Maintenance Luminaire Replacement

NOTICE TO BIDDERS- 1

February 4, 2019

This transmittal consists of One (1) page including this cover sheet. **If it is unreadable or clarification is needed, contact the Southcoast Regional Contracts Office immediately.**

The Bid Documents are clarified as follows:

1. Q: Please review the project cost estimate for accuracy.

A: The cost estimate is within the estimated range for the project.

2. Q: Please clarify the expected level of traffic control required for this work, per location. If different for hours of operation for each location. Assuming Egan Drive would have a higher level of control, but would you expect lane closures versus shoulder work?

A: There are a few locations that will require more traffic control, such as work at or near an intersections. If work can be done as shoulder work that is acceptable and the appropriate signage and personnel would then be used for shoulder work. If a part of a lane has to be taken to do the work then a full work zone will need to be set up and proper signs and personnel must be used. The winning bidder must submit a traffic control plan for each work zone. Work should be scheduled for off peak hours. Peak hours would be M-F 6:30 AM to 8:30 AM and 4:00 PM to 6:00 PM. Reference the MUTCD for required traffic control.

This Notice to Bidders does not require acknowledgement.
