

## STATE OF ALASKA DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

## **BUY AMERICAN CERTIFICATE**

Federal-Aid Airport Contracts

## **Project Name and Number** By submitting a bid under this solicitation, except for those items listed by the offeror below or on a separate and clearly identified attachment, the offeror certifies that steel and each manufactured product is produced in the United States (as defined in Subsection 60-09, Buy American Steel and Manufactured Products for Construction Contracts) and that components of unknown origin are considered to have been produced or manufactured outside the United States. Attach manufacturer's mill test reports with the Buy American Certification signed by the manufacturer. Articles, materials, and supplies excepted from this provision are listed on the reverse of this form. PRODUCT1 **COUNTRY OF ORIGIN** Contractor Signature of Contractor's Representative Date

Form 25D-61 (10/01) Page 1 of 3

Enter "NONE" on the first line if there are no exceptions.

## List of supplies and materials that the U.S. Government has determined are not produced in the United States in sufficient and reasonably available quantities and of sufficient quality. (Jan 1991)

Acetylene, black

Agar, bulk

Anise

Antimony, as metal or oxide

Asbestos, amosite, chrysolite, and Crocidolite

Bananas Bauxite

Beef, corned, canned

Beef extract

Bephenium Hydroxynapthoate

Bismuth

Books, trade, text, technical, or scientific; newspapers; pamphlets; magazines; periodicals; printed briefs and films; not printed in the United States and for which domestic editions are not available.

Brazil nuts, unroasted

Cadmium, ores and flue dust

Calcium cyanamide

Capers

Cashew nuts

Castor beans and castor oil

Chalk, English Chestnuts

Chicle

Chrome ore or chromite

Cinchona bark

Cobalt, in cathodes, rondelles, or other primary ore and metal forms.

Cocoa beans

Coconut and coconut meat, unsweetened, in shredded, desiccated or similarly prepared form.

Coffee, raw or green bean Colchicine alkaloid, raw

Copra

Cork, wood or bark and waste Cover glass, microscope slide

Cryolite, natural Dammar gum

Diamonds, industrial, stones and abrasives

Emetine, bulk Ergot, crude Erthrityl tetranitrate Fair linen, altar

Fibers of the following types: abaca, abace, agave, coir, flax, jute,

jute burlaps, palmyra and sisal.

Goat and kidskins

Graphite, natural, crystalline, crucible grade

Handsewing needles

Hemp yarn

Hogbristles for brushes

Hvoscine, bulk Ipecac, root Iodine, crude Kaurigum

Leather, sheepskin, hair type

Lavender oil

Manganese

Menthol, natural bulk

Mica

Microprocessor chips (brought onto a construction site as separate units for incorporation into building systems during construction or repair and alteration of real property.)

Nickel, primary, in ingots, pigs, shots, cathodes, or similar forms; nickel oxide and nickel salts.

Nitroguanidine (also known as picrite)

Nux vomica, crude

Oiticica oil

Olive oil Olives (green), pitted or unpitted, or stuffed, in bulk.

Opium, crude

Oranges, mandarin, canned

Petroleum, crude oil, unfinished oils, and finished products (see

definitions at the end)

Pine needle oil

Platinum and related group metals, refined as sponge, powder,

ingots, or cast bars. Pyrethrum flowers Quartz crystals Ouebrancho

Ouinidine Quinine Rabbit fur felt

Radium salts, source and special nuclear materials

Rubber, crude and latex

Rutile

Santonin, crude

Secretin Shellac

Silk, raw and unmanufactured

Spare and replacement parts for equipment of foreign manufacture, and for which domestic parts are not available.

Spices and herbs, in bulk

Sugars, raw

Swords and scabbards Talc, block, steatite

**Tantalum** 

Tapioca flour and cassava

Tartar, crude; tartaric acid and cream of tartar in bulk.

Tea in bulk

Thread, metallic (gold)

Thyme oil

Tin in bars, blocks, and pigs Triprolidine hydrochloride

Tungsten Vanilla beans Venom, cobra Wax, canauba

Woods; logs, veneer, and lumber of the following species: Alaskan yellow cedar, angelique, balsa, ekki greenhart,

lignum vitae, mahogany, and teak.

Yarn, 50 Denier rayon

List of Supplies/Materials that the U.S. Government Has Determined Are Not Produced In the United States In Sufficient and Reasonably Available Quantities And of Sufficient Quality (Jan 1991) (CONTINUED)

Petroleum terms are used as follows:

"Crude oil" means crude petroleum, as it is produced at the wellhead, and liquids (under atmospheric conditions) that have been recovered from mixtures of hydrocarbons that existed in a vaporous phase in a reservoir and that are not natural gas products.

"Finished products" means any one or more of the following petroleum oils, or a mixture or combination of these oils, to be used without further processing except blending by mechanical means:

- (A) "Asphalt" a solid or semi-solid cementitious material that (1) gradually liquefies when heated, (2) has bitumens as its predominating constituents, and (3) is obtained in refining crude oil.
- (B) "Fuel oil" a liquid or liquefiable petroleum product burned for lighting or for the generation of heat or power and derived directly or indirectly from crude oil, such as kerosene, range oil, distillate fuel oils, gas oil, diesel fuel, topped crude oil, or residues.
- (C) "Gasoline" a refined petroleum distillate that, by its consumption, is suitable for use as a carburant in internal combustion engines.
- (D) "Jet fuel" a refined petroleum distillate used to fuel jet propulsion engines.
- (E) "Liquefied gases" hydrocarbon gases recovered from natural gas or produced from petroleum refining and kept under pressure to maintain a liquid state at ambient temperatures.
- (F) "Lubricating oil" a refined petroleum distillate or specially treated petroleum residue used to lessen friction between surfaces.
- (G) "Naphtha" a refined petroleum distillate falling within a distillation range overlapping the higher gasoline and the lower kerosenes.
- (H) "Natural gas products" liquids (under atmospheric conditions) including natural gasoline, that -
  - (1) are recovered by a process of absorption, adsorption, compression, refrigeration, cycling, or a combination of these processes, from mixtures of hydrocarbons that existed in a vaporous phase in a reservoir, and
  - (2) when recovered and without processing in a refinery, definitions of products contained in subdivision (B), (C), and (G) above.
- (I) "Residual fuel oil" a topped crude oil or viscous residuum that, as obtained in refining or after blending with other fuel oil, meets or is the equivalent of MILSPEC Mil-F-859 for Navy Special Fuel Oil and any more viscous fuel oil, such as No. 5 or Bunker C.

"Unfinished oils" means one or more of the petroleum oils listed under "Finished products" above, or a mixture or combination of these oils, that are to be further processed other than by blending by mechanical means.
