The department is revising answers to the following specific questions in amendment 2:

1. Question: Does SOA have a caseload expectation? We project a standard 25 cases per case coordinator position.

Answer: The caseload expectation is 45 clients at any given time.

3. Question: Can assessment services be facilitated via Skype Telehealth capacity for a portion of the assessments? We anticipate an average of 2 assessments per week.

Answer: Yes, this is an option.
