Re: Amendment 3
SOQ 21-VSW-NUP-001
Sanitation Design Services, Nunapitchuk, Alaska
SOQ Due Date: October 13, 2020 @ 3:00 PM AST

The following are questions from interested parties and the department's response:

1. Vendor: Why were the minimum licensure years for the P.E. license reduced to 5 years from 10 years? This sudden change appears to benefit the contractor that posed the question on this matter.

Department: In accordance with Alaska Statute 36.30.060 "Specifications must promote overall economy for the purposes intended and encourage competition in satisfying the state's needs, and may not be unduly restrictive." In this sentence "specification" refers to licensing requirements.

This is a non-mandatory return amendment.
