Re: Amendment 1  
RFP 22-VSW-SNP-034  
Saint Paul Wastewater Lift Station Design and Construction Administration Services  
RFP Due Date: March 11, 2022 @ 2:00 PM AST

**The following are vendor questions and the department's response:**

1. Vendor: Head pressures do not appear to be sufficient for our grinder pumps. Do you think they would consider our DLKFU with the K impeller and rag eliminator groove? We can fine tune the impeller diameter and HP after they have a firm TDH for both stations. Do you think they would be interested in our EP1 package lift stations for these two stations? This would eliminate all the outsourcing of all the different components.

Department: The department is unable to answer material specification questions as a contractor has not been selected for this RFP design. The specifics listed above are all elements that the Department expects to be settled during the design resulting from this RFP. This amendment is sent to interested offerors who may further review these questions at their discretion.
