

# STATE OF ALASKA

Department of Labor & Workforce Development  
Division of Employment and Training Services

## AVTEC Generator Supply and Installation

IFQ # 722AVC1000

Amendment # 3

May 3, 2022

**This amendment is being issued to answer questions submitted by potential bidders.**

### Questions submitted by potential offerors and answers from the state:

**Question 1:** Can conventional steel or stainless mechanical piping be installed in place of the “Listed Flue” shown on M-100? Conventional piping - sized appropriately - is typically better suited for this application.

**Answer:** Please just submit your bid as you normally would. This question can be discussed with AVTEC after the start of the project.

**Question 2:** Is the contractor expected to apply for and maintain the Fire Marshall Permit for the automated fuel forwarding system?

**Answer:** After contacting the Fire Marshall, they have confirmed that there is no such thing as an automated fuel forwarding system permit. The contractor should be working with a permit, and it is the contractor's responsibility to submit the plans to the Fire Marshall's office and obtain a permit for work. It's a standard building permit however and has nothing to do with fuel forwarding.
