

**STATE OF ALASKA RFQ NUMBER 220000046
AMENDMENT NUMBER 3**

THIS IS A MANDATORY RETURN AMENDMENT

Department of Military and Veterans Affairs
Division of Administrative Services
P.O. Box 5308
JBER, Alaska 99505

THIS IS NOT AN ORDER

DATE AMENDMENT ISSUED: July 21st, 2022

RFQ TITLE: Tsunami Warning System - Hydaburg

RFQ CLOSING DATE AND TIME: Thursday July 28th, 2022 at 2:00pm Alaska Time.

The following changes/additions are required:

1. This amendment serves to extend the deadline for receipt of bids until July 28th, 2022 at 2:00pm Alaska Time. Late bids will be rejected.
2. This amendment serves to answer questions concerning RFQ 220000046, Tsunami Warning System – Hydaburg.

Question 1: The question has always been, right from day one, is, who manufactures the system of this that meets the specifications involved?

Answer 1: The vendor will need to provide the requested items and services based on the specifications referenced in this RFQ solicitation as well as any associated amendment. There are multiple manufacturers for these systems, such as Federal Signal, Sentry Siren, HÖRMANN Warnsysteme and American Signal Corp, but any potential bidder is not required to use these manufacturers. It is up to any potential bidder to do their due diligence in terms of research and products offered in their bid package and are ensuring that what they are offering when submitting their bid conforms to the specifications in this solicitation, along with any associated amendment(s).

Question 2: Can you provide a memo or addendum that would list everyone that was in this pre-bid and their contact information?

Answer 2: Yes. Please send an email to MvaDasProcurement@alaska.gov with the specific request and ensure your subject field references this RFQ number.

Question 3: Is there anyway we can get some site pictures as reference to where it goes or something?

Answer 3: A photo has yet to be provided. Our contact in Hydaburg is working on getting a photo of the location. Another amendment will be issued once the photos are provided.

Question 4: Are we putting a new service here for this, or is there existing power at the firehall we can tap into?

Answer 4: This is going to be a new siren system, there are no existing sirens in Hydaburg. We are also looking at putting a pole outside of the firehall with the new siren on it and not attaching the siren directly to the building. Yes, it does have power there at the Firehall, and can also be used with the utility pole used to install the tsunami siren on.

STATE OF ALASKA RFQ NUMBER 220000046
AMENDMENT NUMBER 3

Question 5: Do we know what the subgrade is? Is there potential for bedrock?

Answer 5: There has been machinery that has dug into the ground there before and bedrock had not been encountered in that area. Should have no problem installing the utility pole.

Question 6: If contaminated soils are found while installing the pole, who will be responsible for the clean-up?

Answer 6: The State of Alaska DEC in Ketchikan and the property is owned by the city of Hydaburg. There are no known contaminants in the property's history.

Question 7: What is the substrate material where the pole will be located?

Answer 7: The property in question was once a swamp area in the bushes and there is a small layer of solid gravel materials used to cover the area.

Question 8: Can you provide the location of the pole?

Answer 8: The location will be at the Firehall.

This is a Mandatory Return Amendment. The return of this amendment is mandatory with your bid in order to be considered responsive.
