RE: **Project Name:** Valdez Armory Emergency Backup Generator
 Project Number: 02D8020026
 Project Location: Valdez, Alaska

Addendum # Two (2)

This addendum forms a part of the contract documents and modifies the original drawings and/or specifications for the subject work. In case of conflicts between this addendum and previously issued documents, this addendum shall take precedence.

The following additions are required:

1. There are several errors in the ITB paperwork that need to be deleted.
 - In the General Conditions Part 1.02.C.5 it reads: "Generator set to include an onboard automatic battery charger, engine block heater, and load bank." **The load bank requirement is to be deleted.**
 - In the General Conditions Part 1.02.C.15 it reads: " Provide and install 400-amp, 120/240-volt, three phase automatic and manual transfer switch." **This should be changed to 120/208 Volt.**
 - There will be a minimum of 4 bollards to protect the generator. They will be minimum 4' below grade and 4' above grade and minimum 6" in diameter. They shall be Hazard Yellow in color.
 - On the performance bond page there is a contract number in the Contact Name block. This is a computer error and is to be deleted.
 - On the Payment Bond page there is a project number in the address block. This is a computer error and is to be deleted.
 - In the Notice to Bidders in the project number block the correct project number should be changed to **02D8020026**

Bidders are required to acknowledge receipt of this addenda on the proposal/bid form. If you do not acknowledge receipt of this addendum your bid will be considered non-responsive.

Please contact me if you have any questions.

Sincerely

Jay Friesen
