Caravan Hot Section Replacement

2023-1200-0116

Amendment # 4

January 12, 2023

This amendment is being issued to clarify the contract term.

Important Note to Offerors: You must sign and return this page of the amendment document with your proposal. Failure to do so may result in the rejection of your proposal. Only the ITB terms and conditions referenced in this amendment are being changed. All other terms and conditions of the ITB remain the same.

Change 1: Remove Sec 2.01 Contract Term and replace with the following:

The length of the contract will be from the date of award, approximately February 13, 2023, for approximately six months until completion. This term is reflective of a total period of the contract and does not imply the Contractor to be on-site for that duration. The Contractor will determine the length of time necessary for each aircraft. Example, if the Contractor determines the work can be completed on the aircraft in two weeks, the Contractor will only have to be working on-site for the actual timeline to complete the necessary work of that hot section's removal and replacement. The Contractor would then need to return when the second hot section is needed on the calendar and be on-site as shown above. Current data is showing N1323Y will require replacement in March and N70715 in May.
