

STATE OF ALASKA

Department of Administration

Division of Motor Vehicles

Driver License and Identification Card Issuance and Mobile Solution

RFI 02-109-23

Amendment Two

March 13, 2023

Questions submitted by interested parties and answers from the state:

Question 1: I have a clarification question that I wanted to ask in regards to the request for information on a Mobile Solution. I'm not exactly clear the context. We can refer to Mobile Solution in two different ways (1) Mobile ID – digital license that is an extension of the physical credential that supports online authentication. (2) Mobile Capture Solution – a solution similar to what the examiner uses within an office but mobile for travel purposes like a tablet or mobile briefcase. Can you provide some direction on what AK is looking for in this category?

Answer: DMV is interested in information on both options. DMV may explore Mobile Driver License/ID Card accessibility on a mobile device if DMV gets the legal authority to do so. Additionally, Alaska DMV is interested in information on Mobile Cameras that could be used when traveling to remote areas to utilize for issuing credentials.
