Re: Amendment 3  
ITB 23-VSW-EMM-010  
Emmonak Water Intake Project  
ITB Due Date: March 17, 2023 @ 2:00 PM AST

**The following are vendor questions and the department's response:**

1. Vendor: Vendor: In the scope of work on page 3 of 3 of the invitation to bid, it states that the 2020 materials were purchased that encompass the owner provided materials. In that statement it says "excavator" but the list of materials appears to identify a compaction attachment for an excavator. Please clarify if an excavator is owner furnished for use or just the attachment.

Department: The term "excavator" was a typo. There is no owner furnished excavator. The only equipment purchased was the compactor attachment.

2. Vendor: I think it is important to not all of these permits are expired.
  - ADEC void 2 years after – void 12/20/2021
  - USACE – appears to be needing to be reissues as its after 3/22/2022 when all the NWP was expected to be changed
  - ADFG Fish Habitat expired 12/30/2020

Not terribly surprised of course, but as supplied this project is not permitted. I would recommend some acknowledgement of this and some statement saying you guys will have active permits in place for construction or something.

Department: The department is in the process of renewing the USACE and ADFG Fish Habitat permits. The ADEC permit was extended to 12/20/2023. These permits will be in place before any construction will begin.
