Neither Mr. Meany nor his designated representative can substantially change or alter a contract resulting from this RFQ.

SCOPE OF WORK

The Department of Natural Resources (DNR), Division of Forestry & Fire Protection, Fairbanks-Delta Area Office is soliciting bids from qualified vendors for the development of a fuel break located approximately .5 miles south of the community of Anderson, Alaska. Successful contract performance will require the contractor to provide all the essential equipment/operators and, lodging/transportation to and from the site. The intent of this project is to create a 100-foot-wide linear fuel break by "roller chopping" the entire site resulting in crushing/chopping all brush, shrubs and small trees. All vendor submissions for the Anderson Fuel Break shall be subject to the requirements listed herein.

PROJECT LOCATION

The line itself is located at the end of the dike south of the Anderson campground and runs East- West, from the river to the railroad tracks. Access to the line is via four-wheeler trail at the end of the Anderson Shooting Range. The line itself is 100 feet wide and is approximately 1.75 miles long. See attached map for project location. The line runs east - west and is only the southernmost line.

SITE DESCRIPTION

The unit slated for treatment is generally flat and follows a road and is approximately 1.75 miles long. The specific project site will be marked on the ground and is primarily composed of smaller <6" diameter black spruce/mixed hardwood tree species averaging less than 40 feet in height, all of which are on the ground already. The goal is to provide a fuel break where suitable conditions exist, for a break of 100 feet wide. The ground will need to be driven over with a roller chopper that is pulled by a D8 dozer or similar capability, which will break up the downed trees into smaller pieces.

SERVICE REQUIREMENTS

The contractor will provide all labor, operator(s), equipment, fuels, maintenance, transportation of equipment to and from the site, opening access points set up, and any food and lodging required to complete the services identified in the scope of work. Mobilization and demobilization costs must be included in the prices offered for this RFQ. Bids must cover all costs necessary to complete the services identified and fulfill the contractual responsibilities as stated in this RFQ.

SERVICE REQUIREMENTS (continued)

REQUIRED EQUIPMENT

Drum "Roller chopper": 14,5 foot wide. 46,000lbs. (fully loaded with glycol). It is important to operate with a fully loaded roller to achieve the best possible performance.

Dozer (set up for pulling roller chopper): D8 at 86,000 lbs. or larger and a blade width of 15 feet. This will ensure enough power to pull roller chopper in addition to being able to push the trees down before the roller chopper rolls over.

The equipment specifications will ensure vegetation is crushed, chopped, or otherwise breaks all shrub and tree stems greater than one-inch diameter without unduly exposing mineral soil or uprooting the plants. Additionally, the use of a dozer-drawn roller drum/roller chopper (with protruding cutting blades) will be used to break up the vegetation into approximately two-to-four-foot piece sizes.

The work must be conducted when the ground is frozen and air temperatures are below freezing. Access is winter only and the frozen ground also helps prevent uprooting and reduces damage to the soil surface by the heavy equipment. Cold temperatures increase the likelihood that smaller diameter stems will break.

The 100-foot-wide linear fuel break Units and boundaries will be identified to the equipment operator by the DNR Project Manager prior to or during treatment. Boundaries are to be adhered to unless altered by the DNR Project Manager. The layout is a compromise between habitat requisites and efficient use of the equipment. At the end of the project debris from the dozer work must be removed from the roads and trails shown in Fuel Break maps, that cross or adjoin the treatment units so public access is not impeded. The contractor will also leave suitable snags or individual large trees with potential to become snags. Individual leave trees will be marked with flagging so they can be avoided. Contractor shall submit a project schedule with bid.

INSPECTION AND MODIFICATION — REIMBURSEMENT FOR UNACCEPTABLE DELIVERABLES

The contractor is responsible for the completion of all work set out in the contract. All work is subject to inspection, evaluation, and approval by the DNR Project Manager who is responsible for coordinating this project. The State may employ all reasonable means to ensure that the work is progressing and being performed in compliance with the contract. The State may instruct the contractor to make corrections or modifications if needed to accomplish the contract's intent. The contractor will not unreasonably withhold such changes. Substantial failure of the contractor to perform the contract may cause the State to terminate the contract. In this event, the State may require the contractor to reimburse monies paid (based on the identified portion of unacceptable work received) and may seek associated damages.

CONTRACT CHANGES — UNANTICIPATED AMENDMENTS

During this contract, the contractor may be required to perform additional work. That work will be within the general scope of the initial contract. When additional work is required, the DNR Project Manager in charge will provide the contractor a written description of the additional work and request the contractor to submit a firm time schedule for accomplishing the additional work and a firm price for the additional work. Cost and pricing data must be provided to justify the cost of such amendments per AS 36.30.400. The contractor will not commence additional work until the State has secured any required approvals necessary for the amendment and issued a written contract amendment.

TERMINATION FOR DEFAULT

If the DNR Project Manager determines that the contractor has refused to perform the work or has failed to perform the work with such diligence as to ensure its timely and accurate completion, the State may, by providing written notice to the contractor, terminate the contractor's right to proceed with part or all the remaining work.

PAYMENT OF WORK

Complete payment will be made upon completion of the project to the satisfaction of the DNR Project Manager and upon receipt of the contractor's original, accurate, and complete invoice.

Project Budget and Unit Pricing

The approximate budget for this project is between \$20,000.00 and \$40,000.00. Award is contingent on availability of funding based on bids received. Bids shall include all costs necessary to complete the services and fulfill the contractual responsibilities as stated in this RFQ. Bids priced more than \$82,578.00 will be considered non-responsive.

Contract Period and Deadline for Completion of Services:

Contractor shall have a pre-project meeting before beginning services. The DNR Project Manager will coordinate a date/time with the contractor to have the pre-project meeting. Work at the job site must be completed during subfreezing temperatures while the soil is frozen. Work must cease if air temperatures rise above freezing unless continued operation is approved by the DNR Project Manager. If thaw results in inoperable ground conditions, such that the contractor does not complete the total project, the contractor will be paid for only the completed acreage at the contract rate.

The State anticipates awarding a contract early February 2024. Deadline for completion of services is April 30, 2024. Equipment must be removed from the job site prior to ground thaw, in no case later than April 30, 2024. If environmental conditions preclude completion of services by April 30, 2024, the contractor with concurrence from the DNR Project Manager, may continue performing services during the following winter (2022-2023). If extension of the contract is necessary post winter 2023-2024, the DNR Project Manager will decide when conditions are suitable for resuming operation.

Offerors shall carefully review this RFQ for defects and questionable or objectionable material. Offerors' comments concerning defects and questionable or objectionable material in the RFQ must be made in writing and received by the purchasing authority before the date and time set for receipt of quotes. This will allow time for an amendment to be issued if one is required. It will also help prevent the opening of a defective quote, upon which an award cannot be made, and the resultant exposure of offerors' prices. Offerors' original comments should be sent to the purchasing authority listed on the front of this RFQ.

2. QUOTATION FORMS

Offerors shall use this and attached forms in submitting quotes. A photocopied quote may be submitted.

3. SUBMISSION

Quotations shall be signed where applicable and received at the designated Purchasing Office no later than as indicated.

4. QUOTE REJECTION

The State reserves the right to reject any or all quotes, combinations of items, or lot(s), and to waive defects or minor informalities.

5. EXTENSION OF PRICES

In case of error in the extension of prices in the quote, the unit prices will govern; in a lot bid, the lot prices will govern. Negligence by the vendor in preparing the quotation confers no right for the withdrawal of the quotation after it has been opened.

9. PAYMENT DISCOUNT

Discounts for prompt payment will not be considered in evaluating the price you quote. However, the State shall be entitled to take advantage of any payment discount(s) offered by the vendor provided payment is made within the discount period. Payment discount periods will be computed from the date of receipt of the commodities or services and/or a correct invoice, whichever is later.
