.07 Under the conceptual framework approach, *members* should identify *threats* to compliance with the rules and evaluate the significance of those threats. *Members* should evaluate identified *threats* both individually and in the aggregate because *threats* can have a cumulative effect on a *member's* compliance with the rules. *Members* should perform three main steps in applying the conceptual framework approach:

- a. *Identify threats.* The relationships or circumstances that a *member* encounters in various engagements and work assignments will often create different *threats* to complying with the rules. When a *member* encounters a relationship or circumstance that is not specifically addressed by a rule or an *interpretation*, under this approach, the *member* should determine whether the relationship or circumstance creates one or more *threats*, such as those identified in paragraphs .10–.16 that follow. The existence of a *threat* does not mean that the *member* is in violation of the rules; however, the *member* should evaluate the significance of the *threat*.
- b. *Evaluate the significance of a threat.* In evaluating the significance of an identified *threat*, the *member* should determine whether a *threat* is at an *acceptable level*. A *threat* is at an *acceptable level* when a reasonable and informed third party who is aware of the relevant information would be expected to conclude that the *threat* would not compromise the *member's* compliance with the rules. *Members* should consider both qualitative and quantitative factors when evaluating the significance of a *threat*, including the extent to which existing *safeguards* already reduce the *threat* to an *acceptable level*. If the *member* evaluates the *threat* and concludes that a reasonable and informed third party who is aware of the relevant information would be expected to conclude that the *threat* does not compromise a *member's* compliance with the rules, the *threat* is at an *acceptable level*, and the *member* is not required to evaluate the *threat* any further under this conceptual framework approach.
- c. *Identify and apply safeguards.* If, in evaluating the significance of an identified *threat*, the *member* concludes that the *threat* is not at an *acceptable level*, the *member* should apply *safeguards* to eliminate the *threat* or reduce it to an *acceptable level*. The *member* should apply judgment in determining the nature of the *safeguards* to be applied because the effectiveness of *safeguards* will vary, depending on the circumstances. When identifying appropriate *safeguards* to apply, one *safeguard* may eliminate or reduce

multiple *threats*. In some cases, the *member* should apply multiple *safeguards* to eliminate or reduce one *threat* to an *acceptable level*. In other cases, an identified *threat* may be so significant that no *safeguards* will eliminate the *threat* or reduce it to an *acceptable level*, or the *member* will be unable to implement effective *safeguards*. Under such circumstances, providing the specific *professional services* would compromise the *member's* compliance with the rules, and the *member* should determine whether to decline or discontinue the *professional services* or resign from the engagement.

Threats

.08 Many *threats* fall into one or more of the following seven broad categories: adverse interest, advocacy, familiarity, management participation, self-interest, self-review, and undue influence.

.09 Examples of *threats* associated with a specific relationship or circumstance are identified in the *interpretations* of the code. Paragraphs .10–.16 of this section define and provide examples, which are not all inclusive, of each of these *threat* categories.

.10 Adverse interest threat. The *threat* that a *member* will not act with objectivity because the *member's* interests are opposed to the *client's* interests. Examples of adverse interest *threats* include the following:

- a. The *client* has expressed an intention to commence litigation against the *member*.
- b. A *client* or officer, director, or significant shareholder of the *client* participates in litigation against the *firm*.
- c. A subrogee asserts a claim against the *firm* for recovery of insurance payments made to the *client*.
- d. A class action lawsuit is filed against the *client* and its officers and directors and the *firm* and its professional accountants.

.11 Advocacy threat. The *threat* that a *member* will promote a *client's* interests or position to the point that his or her objectivity or *independence* is compromised. Examples of advocacy *threats* include the following:

- a. A *member* provides forensic accounting services to a *client* in litigation or a dispute with third parties.
- b. A *firm* acts as an investment adviser for an officer, a director, or a 10 percent shareholder of a *client*.
- c. A *firm* underwrites or promotes a *client's* shares.
- d. A *firm* acts as a registered agent for a *client*.
- e. A *member* endorses a *client's* services or products.

.12 Familiarity threat. The *threat* that, due to a long or close relationship with a *client*, a *member* will become too sympathetic to the *client's* interests or too accepting of the *client's* work or product. Examples of familiarity *threats* include the following:

- a. A *member's* immediate family or close relative is employed by the *client*.
- b. A *member's* close friend is employed by the *client*.
- c. A former *partner* or professional employee joins the *client* in a key position and has knowledge of the *firm's* policies and practices for the *professional services* engagement.

- d. Senior personnel have a long association with a *client*.
- e. A *member* has a significant close business relationship with an officer, a director, or a 10 percent shareholder of a *client*.

Nonauthoritative questions and answers regarding long association of senior personnel of the engagement team is available in the FAQ at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

.13 Management participation threat. The *threat* that a *member* will take on the role of *client* management or otherwise assume management responsibilities, such may occur during an engagement to provide nonattest services.

.14 Self-interest threat. The *threat* that a *member* could benefit, financially or otherwise, from an interest in, or relationship with, a *client* or persons associated with the *client*. Examples of self-interest *threats* include the following:

- a. The *member* has a *financial interest* in a *client*, and the outcome of a *professional services* engagement may affect the fair value of that *financial interest*.
- b. The *member's* spouse enters into employment negotiations with the *client*.
- c. A *firm* enters into a contingent fee arrangement for a tax refund claim that is not a predetermined fee.
- d. Excessive reliance exists on revenue from a single *client*.

.15 Self-review threat. The *threat* that a *member* will not appropriately evaluate the results of a previous judgment made or service performed or supervised by the *member* or an individual in the *member's firm* and that the *member* will rely on that service in forming a judgment as part of another service. Examples of self-review *threats* include the following:

- a. The *member* relies on the work product of the *member's firm*.
- b. The *member* performs bookkeeping services for a *client*.
- c. A *partner* in the *member's office* was associated with the *client* as an employee, an officer, a director, or a contractor.

.16 Undue influence threat. The *threat* that a *member* will subordinate his or her judgment to an individual associated with a *client* or any relevant third party due to that individual's reputation or expertise, aggressive or dominant personality, or attempts to coerce or exercise excessive influence over the *member*. Examples of undue influence *threats* include the following:

- a. The *firm* is threatened with dismissal from a *client* engagement.
- b. The *client* indicates that it will not award additional engagements to the *firm* if the *firm* continues to disagree with the *client* on an accounting or tax matter.
- c. An individual associated with a *client* or any relevant third party threatens to withdraw or terminate a *professional service* unless the *member* reaches certain judgments or conclusions.

Safeguards

.17 Safeguards may partially or completely eliminate a *threat* or diminish the potential influence of a *threat*. The nature and extent of the *safeguards*

applied will depend on many factors. To be effective, *safeguards* should eliminate the *threat* or reduce it to an *acceptable level*.

.18 *Safeguards* that may eliminate a *threat* or reduce it to an *acceptable level* fall into three broad categories:

- a. *Safeguards* created by the profession, legislation, or regulation.
- b. *Safeguards* implemented by the *client*. It is not possible to rely solely on *safeguards* implemented by the *client* to eliminate or reduce significant *threats* to an *acceptable level*.
- c. *Safeguards* implemented by the *firm*, including policies and procedures to implement professional and regulatory requirements.

.19 The effectiveness of a *safeguard* depends on many factors, including those listed here:

- a. The facts and circumstances specific to a particular situation
- b. The proper identification of *threats*
- c. Whether the *safeguard* is suitably designed to meet its objectives
- d. The party(ies) who will be subject to the *safeguard*
- e. How the *safeguard* is applied
- f. The consistency with which the *safeguard* is applied
- g. Who applies the *safeguard*
- h. How the *safeguard* interacts with a *safeguard* from another category
- i. Whether the *client* is a *public interest entity*

.20 Examples of *safeguards* within each category are presented in the following paragraphs. Because these are only examples and are not intended to be all inclusive, it is possible that *threats* may be sufficiently mitigated through the application of other *safeguards* not specifically identified herein.

.21 The following are examples of *safeguards* created by the profession, legislation, or regulation:

- a. Education and training requirements on *independence* and ethics rules
- b. Continuing education requirements on *independence* and ethics
- c. Professional standards and the threat of discipline
- d. External review of a *firm's* quality control system
- e. Legislation establishing prohibitions and requirements for a *firm* or a *firm's* professional employees
- f. Competency and experience requirements for professional licensure
- g. Professional resources, such as hotlines, for consultation on ethical issues

.22 Examples of *safeguards* implemented by the *client* that would operate in combination with other *safeguards* are as follows:

- a. The *client* has personnel with suitable skill, knowledge, or experience who make managerial decisions about the delivery of *professional services* and makes use of third-party resources for consultation as needed.
- b. The tone at the top emphasizes the *client's* commitment to fair financial reporting and compliance with the applicable laws, rules, regulations, and corporate governance policies.

- c. Policies and procedures are in place to achieve fair financial reporting and compliance with the applicable laws, rules, regulations, and corporate governance policies.
 - d. Policies and procedures are in place to address ethical conduct.
 - e. A governance structure, such as an active audit committee, is in place to ensure appropriate decision making, oversight, and communications regarding a *firm's* services.
 - f. Policies are in place that bar the entity from hiring a *firm* to provide services that do not serve the public interest or that would cause the *firm's independence* or objectivity to be considered *impaired*.
- .23** The following are examples of *safeguards* implemented by the *firm*:
- a. *Firm* leadership that stresses the importance of complying with the rules and the expectation that engagement teams will act in the public interest.
 - b. Policies and procedures that are designed to implement and monitor engagement quality control.
 - c. Documented policies regarding the identification of *threats* to compliance with the rules, the evaluation of the significance of those *threats*, and the identification and application of *safeguards* that can eliminate identified *threats* or reduce them to an *acceptable level*.
 - d. Internal policies and procedures that are designed to monitor compliance with the *firm's* policies and procedures.
 - e. Policies and procedures that are designed to identify interests or relationships between the *firm* or its *partners* and professional staff and the *firm's clients*.
 - f. The use of different *partners*, *partner equivalents*, and engagement teams from different offices or that report to different supervisors.
 - g. Training on, and timely communication of, a *firm's* policies and procedures and any changes to them for all *partners* and professional staff.
 - h. Policies and procedures that are designed to monitor the *firm's*, *partner's*, or *partner equivalent's* reliance on revenue from a single *client* and that, if necessary, trigger action to address excessive reliance.
 - i. Designation of someone from senior management as the person responsible for overseeing the adequate functioning of the *firm's* quality control system.
 - j. A means for informing *partners* and professional staff of *attest clients* and related entities from which they must be independent.
 - k. A disciplinary mechanism that is designed to promote compliance with policies and procedures.
 - l. Policies and procedures that are designed to empower staff to communicate to senior members of the *firm* any engagement issues that concern them without fear of retribution.
 - m. Policies and procedures relating to *independence* and ethics communications with audit committees or others charged with *client* governance.

- n. Discussion of *independence* and ethics issues with the audit committee or others responsible for the *client's* governance.
- o. Disclosures to the audit committee or others responsible for the *client's* governance regarding the nature of the services that are or will be provided and the extent of the fees charged or to be charged.
- p. The involvement of another professional accountant who (a) reviews the work that is done for a *client* or (b) otherwise advises the engagement team. This individual could be someone from outside the *firm* or someone from within the *firm* who is not otherwise associated with the engagement.
- q. Consultation on engagement issues with an interested third party, such as a committee of independent directors, a professional regulatory body, or another professional accountant.
- r. Rotation of senior personnel who are part of the engagement team.
- s. Policies and procedures that are designed to ensure that members of the engagement team do not make or assume responsibility for management decisions for the *client*.
- t. The involvement of another *firm* to perform part of the engagement.
- u. Having another *firm* to reperform a nonattest service to the extent necessary for it to take responsibility for that service.
- v. The removal of an individual from an *attest engagement team* when that individual's *financial interests* or relationships pose a *threat to independence* or objectivity.
- w. A consultation function that is staffed with experts in accounting, auditing, *independence*, ethics, and reporting matters who can help engagement teams
 - i. assess issues when guidance is unclear or when the issues are highly technical or require a great deal of judgment; and
 - ii. resist undue pressure from a *client* when the engagement team disagrees with the *client* about such issues.
- x. *Client* acceptance and continuation policies that are designed to prevent association with *clients* that pose a *threat* that is not at an *acceptable level* to the *member's* compliance with the rules.
- y. Policies that preclude audit *partners* or *partner equivalents* from being directly compensated for selling nonattest services to the *attest client*.
- z. Policies and procedures addressing ethical conduct and compliance with laws and regulations. [No prior reference: new content]

Effective Date

.24 Effective December 15, 2015. Early implementation is allowed provided the member has implemented the revised code.

A nonauthoritative Conceptual Framework Toolkit for Members in Public Practice is available at https://us.aicpa.org/content/dam/aicpa/interest_areas/professionalethics/resources/downloadabledocuments/toolkits/andaids/conceptualframeworktoolkitformembersinpublicpractice.docm.

1.000.020 Ethical Conflicts

.01 An ethical conflict arises when a *member* encounters one or both of the following:

- a. Obstacles to following an appropriate course of action due to internal or external pressures
- b. Conflicts in applying relevant professional standards or legal standards

.02 Once an ethical conflict is encountered, a *member* may be required to take steps to best achieve compliance with the rules and law. In weighing alternative courses of action, the *member* should consider factors such as the following:

- a. Relevant facts and circumstances, including applicable rules, laws, or regulations
- b. Ethical issues involved
- c. Established internal procedures

.03 The *member* should also be prepared to justify any departures that the *member* believes were appropriate in applying the relevant rules and law. If the *member* was unable to resolve the conflict in a way that permitted compliance with the applicable rules and law, the *member* may have to address the consequences of any violations.

.04 Before pursuing a course of action, the *member* should consider consulting with appropriate persons within the *firm* or the organization that employs the *member*.

.05 If a *member* decides not to consult with appropriate persons within the *firm* or the organization that employs the *member* and the conflict remains unresolved after pursuing the selected course of action, the *member* should consider either consulting with other individuals for help in reaching a resolution or obtaining advice from an appropriate professional body or legal counsel. The *member* also should consider documenting the substance of the issue, the parties with whom the issue was discussed, details of any discussions held, and any decisions made concerning the issue.

.06 If the ethical conflict remains unresolved, the *member* will in all likelihood be in violation of one or more rules if he or she remains associated with the matter creating the conflict. Accordingly, the *member* should consider his or her continuing relationship with the engagement team, specific assignment, *client*, *firm*, or employer. [No prior reference: new content.]

.07 Refer to the "Responding to Noncompliance With Laws and Regulations" interpretation [1.180.010] of the "Integrity and Objectivity Rule" [1.100.001] for additional guidance.

Effective Date

.08 Effective December 15, 2014.

[See Revision History Table.]

1.100 Integrity and Objectivity

1.100.001 Integrity and Objectivity Rule

.01 In the performance of any *professional service*, a *member* shall maintain objectivity and integrity, shall be free of conflicts of interest, and shall not

knowingly misrepresent facts or subordinate his or her judgment to others. [Prior reference: paragraph .01 of ET section 102]

Interpretations Under the Integrity and Objectivity Rule

1.100.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Integrity and Objectivity Rule" [1.100.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Integrity and Objectivity Rule" [1.100.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015 and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.110 Conflicts of Interest

1.110.010 Conflicts of Interest for Members in Public Practice

.01 A *member* or his or her *firm* may be faced with a conflict of interest when performing a *professional service*. In determining whether a *professional service*, relationship or matter would result in a conflict of interest, a *member* should use professional judgment, taking into account whether a reasonable and informed third party who is aware of the relevant information would conclude that a conflict of interest exists.

.02 A conflict of interest creates adverse interest and self-interest *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001]. For example, *threats* may be created when

- a. the *member* or the *member's firm* provides a *professional service* related to a particular matter involving two or more *clients* whose interests with respect to that matter are in conflict, or
- b. the interests of the *member* or the *member's firm* with respect to a particular matter and the interests of the *client* for whom the *member* or the *member's firm* provides a *professional service* related to that matter are in conflict.

.03 Certain professional engagements, such as audits, reviews and other attest services require *independence*. *Independence* impairments under the "Independence Rule" [1.200.001], its *interpretations*, and rulings cannot be eliminated by the *safeguards* provided in this interpretation or by disclosure and consent.

.04 The following are examples of situations in which conflicts of interest may arise:

- a. Providing corporate finance services to a *client* seeking to acquire an audit *client* of the *firm*, when the *firm* has obtained confidential information during the course of the audit that may be relevant to the transaction
- b. Advising two *clients* at the same time who are competing to acquire the same company when the advice might be relevant to the parties' competitive positions
- c. Providing services to both a vendor and a purchaser who are *clients* of the *firm* in relation to the same transaction
- d. Preparing valuations of assets for two *clients* who are in an adversarial position with respect to the same assets
- e. Representing two *clients* at the same time regarding the same matter who are in a legal dispute with each other, such as during divorce proceedings or the dissolution of a partnership
- f. Providing a report for a licensor on royalties due under a license agreement while at the same time advising the licensee of the correctness of the amounts payable under the same license agreement
- g. Advising a *client* to invest in a business in which, for example, the *immediate family* member of the *member* has a *financial interest* in the business
- h. Providing strategic advice to a *client* on its competitive position while having a joint venture or similar interest with a competitor of the *client*
- i. Advising a *client* on the acquisition of a business which the *firm* is also interested in acquiring
- j. Advising a *client* on the purchase of a product or service while having a royalty or commission agreement with one of the potential vendors of that product or service
- k. Providing forensic investigation services to a *client* for the purpose of evaluating or supporting contemplated litigation against another *client* of the *firm*
- l. Providing tax or personal financial planning services for several members of a family whom the *member* knows to have opposing interests
- m. Referring a personal financial planning or tax *client* to an insurance broker or other service provider, which refers *clients* to the *member* under an exclusive arrangement
- n. A *client* asks the *member* to provide tax or personal financial planning services to its executives, and the services could result in the *member* recommending to the executives actions that may be adverse to the company. [Prior reference: paragraphs .198–.199 of ET section 191]
- o. A *member* serves as a director or an officer of a local United Way or similar organization that operates as a federated fund-raising organization from which local charities receive funds. Some of those charities are *clients* of the *member's firm*. [Prior reference: paragraphs .186–.187 of ET section 191]

- p. A *member* who is an officer, a director, or a shareholder of an entity has *significant influence* over the entity, and that entity has a loan to or from a *client* of the *firm*. [Prior reference: paragraphs .220–.221 of ET section 191]

Identification of a Conflict of Interest

.05 Before accepting a new *client* relationship, engagement, or business relationship, a *member* should take reasonable steps to identify circumstances that might create a conflict of interest including identification of

- a. the nature of the relevant interests and relationships between the parties involved and
- b. the nature of the service and its implication for relevant parties.

.06 The nature of the relevant interests and relationships and the services may change during the course of the engagement. This is particularly true when a *member* is asked to conduct an engagement for a *client* in a situation that may become adversarial with respect to another *client* or the *member* or *member's firm*, even though the parties who engage the *member* may not initially be involved in a dispute. A *member* should remain alert to such changes for the purpose of identifying circumstances that might create a conflict of interest.

.07 For the purpose of identifying interests and relationships that might create a conflict of interest, having an effective conflict identification process assists a *member* in identifying actual or potential conflicts of interest that may create significant *threats* to compliance with the "Integrity and Objectivity Rule" [1.100.001] prior to determining whether to accept an engagement and throughout an engagement. This includes matters identified by external parties, for example *clients* or potential *clients*. The earlier an actual or potential conflict of interest is identified, the greater the likelihood of a *member* being able to apply *safeguards* to eliminate or reduce significant *threats* to an *acceptable level*. The process to identify actual or potential conflicts of interest will depend on such factors as

- a. the nature of the *professional services* provided,
- b. the size of the *firm*,
- c. the size and nature of the *client* base, and
- d. the structure of the *firm*, for example the number and geographic location of offices.

.08 If the *firm* is a member of a *network*, the *member* is not required to take specific steps to identify conflicts of interest of other *network firms*; however, if the *member* knows or has reason to believe that such conflicts of interest may exist or might arise due to interests and relationships of a *network firm*, the *member* should evaluate the significance of the *threat* created by such conflicts of interest as described below.

Evaluation of a Conflict of Interest

.09 When an actual conflict of interest has been identified, the *member* should evaluate the significance of the *threat* created by the conflict of interest to determine if the *threat* is at an *acceptable level*. Members should consider both qualitative and quantitative factors when evaluating the significance of the *threat*, including the extent to which existing *safeguards* already reduce the *threat* to an *acceptable level*. In evaluating the significance of an identified *threat*, *members* should consider both of the following:

- a. The significance of relevant interests or relationships.

- b. The significance of the *threats* created by performing the *professional service* or services. In general, the more direct the connection between the *professional service* and the matter on which the parties' interests are in conflict, the more significant the *threat* to compliance with the rule will be.

.10 If the *member* concludes that the *threat* is not at an *acceptable level*, the *member* should apply *safeguards* to eliminate the *threat* or reduce it to an *acceptable level*. Examples of *safeguards* include the following:

- a. Implementing mechanisms to prevent unauthorized disclosure of confidential information when performing *professional services* related to a particular matter for two or more *clients* whose interests with respect to that matter are in conflict. This could include
 - i. using separate engagement teams who are provided with clear policies and procedures on maintaining confidentiality;
 - ii. creating separate areas of practice for specialty functions within the *firm*, which may act as a barrier to the passing of *confidential client information* from one practice area to another within a *firm*;
 - iii. establishing policies and procedures to limit access to *client* files, the use of confidentiality agreements signed by employees and *partners* of the *firm* and the physical and electronic separation of confidential information.
- b. Regularly reviewing the application of *safeguards* by a senior individual not involved with the *client* engagement or engagements.
- c. Having a member of the *firm* who is not involved in providing the service or otherwise affected by the conflict, review the work performed to assess whether the key judgments and conclusions are appropriate.
- d. Consulting with third parties, such as a professional body, legal counsel, or another professional accountant.

.11 In cases where an identified *threat* may be so significant that no *safeguards* will eliminate the *threat* or reduce it to an *acceptable level*, or the *member* is unable to implement effective *safeguards*, the *member* should (a) decline to perform or discontinue the *professional services* that would result in the conflict of interest; or (b) terminate the relevant relationships or dispose of the relevant interests to eliminate the *threat* or reduce it to an *acceptable level*.

Disclosure of a Conflict of Interest and Consent

.12 When a conflict of interest exists, the *member* should disclose the nature of the conflict of interest to *clients* and other appropriate parties affected by the conflict and obtain their consent to perform the *professional services*. The *member* should disclose the conflict of interest and obtain consent even if the *member* concludes that *threats* are at an *acceptable level*.

.13 Disclosure and consent may take different forms. The following are examples:

- a. General disclosure to *clients* of circumstances in which the *member*, in keeping with common commercial practice, does not provide services exclusively for any one *client* (for example, in a particular service in a particular market sector) in order for the *client* to provide general consent accordingly. Such disclosure might be

made in a *member's* standard terms and conditions for the engagement.

- b. Specific disclosure to affected *clients* of the circumstances of the particular conflict including an explanation of the situation and any planned safeguards, sufficient to enable the *client* to make an informed decision with respect to the matter and to provide specific consent.

.14 The *member* should determine whether the nature and significance of the conflict of interest is such that specific disclosure and specific consent are necessary, as opposed to general disclosure and general consent. For this purpose, the *member* should exercise professional judgment in evaluating the circumstances that create a conflict of interest, including the parties that might be affected, the nature of the issues that might arise and the potential for the particular matter to develop in an unexpected manner.

.15 When a *member* has requested specific consent from a *client* and that consent has been refused by the *client*, the *member* should (a) decline to perform or discontinue *professional services* that would result in the conflict of interest; or (b) terminate the relevant relationships or dispose of the relevant interests to eliminate the *threat* or reduce it to an *acceptable level*, such that consent can be obtained, after applying any additional *safeguards*, if necessary.

.16 The *member* is encouraged to document the nature of the circumstances giving rise to the conflict of interest, the *safeguards* applied to eliminate or reduce the *threats* to an *acceptable level*, and the consent obtained.

.17 When addressing conflicts of interest, including making disclosures and seeking guidance of third parties, a *member* should remain alert to the requirements of the "Confidential Client Information Rule" [1.700.001] and the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [1.400.070] of the "Acts Discreditable Rule" [1.400.001]. In addition, federal, state, or local statutes, or regulations concerning confidentiality of *client* information may be more restrictive than the requirements contained in the Code of Professional Conduct.

.18 When practicing before the IRS or other taxing authorities, *members* should ensure compliance with any requirements that are more restrictive. For example, Treasury Department Circular No. 230, *Regulations Governing Practice before the Internal Revenue Service*, provides more restrictive requirements concerning written consent by the *client* when a conflict of interest exists.

[See Revision History Table.]

A nonauthoritative question and answer regarding independent contractors retained by the firm who are simultaneously employed or associated with an attest client is available in the FAQ at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.110.020 Director Positions

.01 When a *member* serves as a director of an entity, such as a bank, the *member's* fiduciary responsibilities to the entity may create *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001] and the "Confidential Client Information Rule" [1.700.001]. For example, an adverse interest *threat* to the *member's* objectivity may exist if the *member's clients* are customers of the entity or likely to engage in significant transactions with the

entity. A *member's* general knowledge and experience may be very helpful to an entity in formulating policies and making business decisions. Nevertheless, if the *member's clients* are likely to engage in significant transactions with the entity, it would be more appropriate for the *member* to serve as a consultant to the board. Under such an arrangement, the *member* could limit activities to those that do not *threaten* the *member's* compliance with these rules. If, however, the *member* serves as a board member, the *member* should evaluate the significance of any *threats* and apply *safeguards*, when necessary, to eliminate or reduce the *threats* to an *acceptable level*.

.02 Refer to the "Disclosing Client Information in Director Positions" interpretation [1.700.080] of the "Confidential Client Information Rule" [1.700.001] for additional guidance. [Prior reference: paragraphs .170–.171 of ET section 191]

Effective Date

.03 This revised interpretation is effective December 15, 2014.

1.120 Gifts and Entertainment

1.120.010 Offering or Accepting Gifts or Entertainment

.01 For purposes of this interpretation, a client includes the *client*, an individual in a *key position* with the *client*, or an individual owning 10 percent or more of the *client's* outstanding equity securities or other ownership interests.

.02 When a *member* offers to a client or accepts gifts or entertainment from a client, self-interest, familiarity, or undue influence *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001] may exist.

.03 *Threats* to compliance with the "Integrity and Objectivity Rule" [1.100.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* and the *member* would be presumed to lack integrity in violation of the "Integrity and Objectivity Rule" in the following circumstances:

- a. The *member* offers to a client or accepts gifts or entertainment from a client that violate the member's or client's policies or applicable laws, rules, and regulations; and
- b. The *member* knows of the violation or demonstrates recklessness in not knowing.

.04 A *member* should evaluate the significance of any *threats* to determine if they are at an *acceptable level*. *Threats* are at an *acceptable level* when gifts or entertainment are reasonable in the circumstances. The *member* should exercise judgment in determining whether gifts or entertainment would be considered reasonable in the circumstances. The following are examples of relevant facts and circumstances:

- a. The nature of the gift or entertainment
- b. The occasion giving rise to the gift or entertainment
- c. The cost or value of the gift or entertainment
- d. The nature, frequency, and value of other gifts and entertainment offered or accepted
- e. Whether the entertainment was associated with the active conduct of business directly before, during, or after the entertainment

- f. Whether other clients also participated in the entertainment
- g. The individuals from the client and *member's firm* who participated in the entertainment

.05 *Threats* to compliance with the "Integrity and Objectivity Rule" [1.100.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* through the application of safeguards if a *member* offers to a client or accepts gifts or entertainment from a client that is not reasonable in the circumstances. The *member* would be presumed to lack objectivity in violation of the "Integrity and Objectivity Rule" under these circumstances.

.06 Refer to the "Offering or Accepting Gifts or Entertainment" interpretation [1.285.010] of the "Independence Rule" [1.200.001] for additional guidance. [Prior reference: paragraphs .226–.227 of ET section 191]

A nonauthoritative basis-for-conclusions document summarizing considerations that were deemed significant in the development of this interpretation is available at https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/gifts_basis_document.pdf.

A nonauthoritative question and answer regarding campaign contributions is available at the following address. The subject is member contributions made to the campaign of an individual who holds a key position with or has a financial interest in an attest client. <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.130 Preparing and Reporting Information

1.130.010 *Knowing Misrepresentations in the Preparation of Financial Statements or Records*

.01 *Threats* to compliance with the "Integrity and Objectivity Rule" [1.100.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* and the *member* would be considered to have knowingly misrepresented facts in violation of the "Integrity and Objectivity Rule," if the *member*

- a. makes, or permits or directs another to make, materially false and misleading entries in an entity's *financial statements* or records;
- b. fails to correct an entity's *financial statements* or records that are materially false and misleading when the *member* has the authority to record the entries; or
- c. signs, or permits or directs another to sign, a document containing materially false and misleading information. [Prior reference: paragraph .02 of ET section 102]

1.130.020 *Subordination of Judgment*

.01 The "Integrity and Objectivity Rule" [1.100.001] prohibits a *member* from knowingly misrepresenting facts or subordinating his or her judgment when performing *professional services* for a *client*, for an employer, or on a volunteer basis. This interpretation addresses differences of opinion between a

member and his or her supervisor or any other person within the *member's* organization.

.02 Self-interest, familiarity, and undue influence *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001] may exist when a *member* and his or her supervisor or any other person within the *member's* organization have a difference of opinion relating to the application of accounting principles; auditing standards; or other relevant professional standards, including standards applicable to tax and consulting services or applicable laws or regulations.

.03 A *member* should evaluate the significance of any *threats* to determine if they are at an *acceptable level*. *Threats* are at an *acceptable level* if the *member* concludes that the position taken does not result in a material misrepresentation of fact or a violation of applicable laws or regulations. If *threats* are not at an *acceptable level*, the *member* should apply the *safeguards* in paragraphs .06–.08 to eliminate or reduce the *threat(s)* to an *acceptable level* so that the *member* does not subordinate his or her judgment.

.04 In evaluating the significance of any identified *threats*, the *member* should determine, after appropriate research or consultation, whether the result of the position taken by the supervisor or other person

- a. fails to comply with professional standards, when applicable;
- b. creates a material misrepresentation of fact; or
- c. may violate applicable laws or regulations.

.05 If the *member* concludes that *threats* are at an *acceptable level* the *member* should discuss his or her conclusions with the person taking the position. No further action would be needed under this interpretation.

.06 If the *member* concludes that the position results in a material misrepresentation of fact or a violation of applicable laws or regulations, then *threats* would not be at an *acceptable level*. In such circumstances, the *member* should discuss his or her concerns with the supervisor.

.07 If the difference of opinion is not resolved after discussing the concerns with the supervisor, the *member* should discuss his or her concerns with the appropriate higher level(s) of management within the *member's* organization (for example, the supervisor's immediate superior, senior management, and those charged with governance).

.08 If after discussing the concerns with the supervisor and appropriate higher level(s) of management within the *member's* organization, the *member* concludes that appropriate action was not taken, then the *member* should consider, in no specific order, the following *safeguards* to ensure that *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001] are eliminated or reduced to an *acceptable level*:

- a. Determine whether the organization's internal policies and procedures have any additional requirements for reporting differences of opinion.
- b. Determine whether he or she is responsible for communicating to third parties, such as regulatory authorities or the organization's (former organization's) external accountant. In considering such communications, the *member* should be cognizant of his or her obligations under the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [1.400.070] of the "Acts Discreditable Rule" [1.400.001].

- c. Consult with his or her legal counsel regarding his or her responsibilities.
- d. Document his or her understanding of the facts, the accounting principles, auditing standards, or other relevant professional standards involved or applicable laws or regulations and the conversations and parties with whom these matters were discussed.

.09 If the *member* concludes that no *safeguards* can eliminate or reduce the *threats* to an *acceptable level* or if the *member* concludes that appropriate action was not taken, then he or she should consider the continuing relationship with the *member's* organization and take appropriate steps to eliminate his or her exposure to subordination of judgment.

.10 Nothing in this interpretation precludes a *member* from resigning from the organization at any time. However, resignation may not relieve the *member* of responsibilities in the situation, including any responsibility to disclose concerns to third parties, such as regulatory authorities or the employer's (former employer's) external accountant.

.11 A *member* should use professional judgment and apply similar *safeguards*, as appropriate, to other situations involving a difference of opinion as described in this interpretation so that the *member* does not subordinate his or her judgment. [Prior reference: paragraph .05 of ET section 102]

1.140 Client Advocacy

1.140.010 Client Advocacy

.01 An advocacy *threat* to compliance with the "Integrity and Objectivity Rule" [1.100.001] may exist when a *member* or the *member's firm* is engaged to perform nonattest services, such as tax and consulting services, that involve acting as an advocate for the *client* or to support a *client's* position on accounting or financial reporting issues either within the *firm* or outside the *firm* with standard setters, regulators, or others.

.02 The code governs these types of *professional services*, and the *member* shall perform such services in compliance with the "General Standards Rule" [1.300.001], the "Compliance With Standards Rule" [1.310.001], the "Accounting Principles Rule" [1.320.001], and any *interpretations* thereof. The *member* shall also comply with the "Integrity and Objectivity Rule" [1.100.001] that requires maintaining objectivity and integrity and prohibits subordinating one's judgment to others.

.03 Some *professional services* involving *client* advocacy may stretch the bounds of performance standards, go beyond sound and reasonable professional practice, or compromise credibility, thereby creating *threats* to the *member's* compliance with the rules and damaging the reputation of the *member* and the *member's firm*. If such circumstances exist, the *member* and *member's firm* should determine whether it is appropriate to perform the *professional services*.

.04 When performing *professional services* requiring *independence*, a *member* shall also comply with the "Independence Rule" [1.200.001]. [Prior reference: paragraph .07 of ET section 102]

1.150 Use of a Third-Party Service Provider

1.150.040 Use of a Third-Party Service Provider

.01 When a *member* uses a *third-party service provider* to assist the *member* in providing *professional services*, *threats* to compliance with the "Integrity and Objectivity Rule" [1.100.001] may exist.

.02 *Clients* might not have an expectation that a *member* would use a *third-party service provider* to assist the *member* in providing the *professional services*. Therefore, before disclosing *confidential client information* to a *third-party service provider*, the *member* should inform the *client*, preferably in writing, that the *member* may use a *third-party service provider*. If the *client* objects to the *member's* use of a *third-party service provider*, the *member* either should not use the *third-party service provider* to perform the *professional services* or should decline to perform the engagement.

.03 A *member* is not required to inform the *client* when he or she uses a *third-party service provider* to provide administrative support services to the *member* (for example, record storage, software application hosting, or authorized e-file tax transmittal services).

.04 Refer to the "Use of a Third-Party Service Provider" interpretation [1.300.040] of the "General Standards Rule" [1.300.001] and the "Disclosing Information to a Third-Party Service Provider" interpretation [1.700.040] of the "Confidential Client Information Rule" [1.700.001] for additional guidance. [Prior reference: paragraphs .224–.225 of ET section 191]

A nonauthoritative basis for conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsoutsourcing.pdf>.

In addition, nonauthoritative sample client disclosure language a member could use to fulfill the requirement discussed in this interpretation is also available at https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/sample_disclosure_notification.pdf.

1.180 Responding to Noncompliance With Laws and Regulations

1.180.010 Responding to Noncompliance With Laws and Regulations

Introduction

.01 When a *member* encounters or is made aware of noncompliance or suspected noncompliance with laws and regulations in the course of providing a *professional service* to a *client*, *threats* to compliance with the "Integrity and Objectivity Rule" [1.100.001] may exist. The purpose of this interpretation is to set out the *member's* responsibilities when encountering such noncompliance or suspected noncompliance and guide the *member* in evaluating the implications of the matter and the possible courses of action when responding to it. The *member's* responsibilities in this interpretation are owed to a person or

entity that engages the *member* or *member's firm* to perform professional services (engaging entity). Therefore, when the engaging entity and subject entity are different, the term client refers to the engaging entity.

.02 Noncompliance with laws and regulations (noncompliance) comprises acts of omission or commission, intentional or unintentional, that are contrary to the prevailing laws or regulations and are committed by a client or by *those charged with governance*, by management, or by other individuals working for or under the direction of a client.

.03 When responding to noncompliance or suspected noncompliance in the course of providing a *professional service* to a client, the *member* should consider the *member's* obligations under the "Confidential Client Information Rule" [1.700.001]. For example, a *member* should not disclose the noncompliance or suspected noncompliance to a third party without the client's consent unless expressly permitted under the "Confidential Client Information Rule," such as when reporting the noncompliance or suspected noncompliance to a regulatory authority in order to comply with applicable laws and regulations or the "Compliance With Standards Rule" [1.310.001], as discussed in paragraphs .04 and .05d, respectively.

.04 Some regulators, such as the SEC or state boards of accountancy, may have regulatory provisions governing how a *member* should address noncompliance or suspected noncompliance which may differ from or go beyond this interpretation. In some circumstances, state and federal civil and criminal laws may also impose additional requirements. When encountering noncompliance or suspected noncompliance, a *member* has a responsibility to obtain an understanding of those legal or regulatory provisions and comply with them, including any requirement to report the matter to an appropriate authority and any prohibition on alerting the client prior to making any disclosure.

.05 A distinguishing mark of the accounting profession is its acceptance of the responsibility to act in the public interest. When responding to noncompliance or suspected noncompliance, the objectives of a *member* are as follows:

- a. To comply with the "Integrity and Objectivity Rule" [1.100.001]
- b. To alert management or, when appropriate, *those charged with governance* of the client, to enable them to
 - i. rectify, remediate, or mitigate the consequences of the identified or suspected noncompliance or
 - ii. deter the commission of the noncompliance when it has not yet occurred
- c. To determine whether withdrawal from the engagement and the professional relationship is necessary, when permitted by law and regulation
- d. To take such further action as appropriate in the public interest
- e. To comply with applicable laws, regulations, and the "Compliance With Standards Rule" [1.310.001]

Applicability

.06 This interpretation does not apply to the following:

- a. Personal misconduct unrelated to the business activities of the client
- b. Noncompliance by parties other than
 - i. the client,

- ii. *those charged with governance*,
- iii. management, or
- iv. other individuals working for or under the direction of the client.

This includes, for example, circumstances in which a *member* has been engaged by a client to perform a due diligence assignment on a third-party entity (that is, subject entity) and the identified or suspected noncompliance has been committed by that third party.

- c. A litigation or investigation engagement as defined in AICPA Statement on Standards for Forensic Services No. 1
- d. An engagement where the primary purpose is to identify, reach a conclusion regarding, or otherwise respond to a known or potential noncompliance with laws and regulations (NOCLAR)
- e. An engagement pursuant to which the protections set forth in IRC Section 7525 or any comparable state or local statutes apply
- f. An engagement where compliance with this interpretation would cause a violation of law or regulation

A *member* may nevertheless find the guidance in this interpretation helpful in considering how to respond in these situations.

Scope

.07 This interpretation sets out the approach to be taken by a *member* who encounters or is made aware of noncompliance or suspected noncompliance with the following:

- a. Laws and regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the client's *financial statements*
- b. Other laws and regulations that do not have a direct effect on the determination of the amounts and disclosures in the client's *financial statements*, but compliance with which may be fundamental to the operating aspects of the client's business, to its ability to continue its business, or to avoid material penalties

.08 Examples of laws and regulations which this interpretation addresses may include those that deal with the following:

- a. Fraud, corruption, and bribery
- b. Money laundering
- c. Securities markets and trading
- d. Banking and other financial products and services
- e. Data protection
- f. Tax and pension liabilities and payments
- g. Environmental protection
- h. Public health and safety

.09 Noncompliance may result in fines, litigation, or other consequences for the client that may have a material effect on its *financial statements*. Importantly, such noncompliance may have wider public interest implications in terms of potentially substantial harm to investors, creditors, employees, or the general public. For the purposes of this interpretation, an act that causes substantial harm is one that results in serious adverse consequences to any of these parties in financial or nonfinancial terms.

.10 A *member* who encounters or is made aware of matters that are clearly inconsequential is not required to comply with this interpretation with respect to such matters.

Responsibilities of the Client's Management and Those Charged With Governance

.11 The client's management is responsible, with the oversight of *those charged with governance*, to ensure that the client's business activities are conducted in accordance with laws and regulations. It is also the responsibility of management and *those charged with governance* to identify and address any noncompliance by the client, by an individual charged with governance of the entity, by a member of management, or by other individuals working for or under the direction of the client.

Responsibilities of Members in Public Practice

.12 When a *member* becomes aware of a matter to which this interpretation applies, the *member* should take timely steps to comply with this interpretation, taking into account the *member's* understanding of the nature of the matter and the potential harm to the interests of the entity, investors, creditors, employees, or the general public.

Members Providing Financial Statement Audit or Review Services

Obtaining an Understanding of the Matter

.13 If a *member* engaged to perform financial statement audit or review services becomes aware of credible information concerning an instance of noncompliance or suspected noncompliance, whether in the course of performing the engagement or through information provided by other parties, the *member* should obtain an understanding of the matter, including the nature of the act and the circumstances in which it has occurred or is likely to occur.

.14 A *member* is expected to apply knowledge, professional judgment, and expertise but is not expected to have a level of knowledge of laws and regulations greater than that required to undertake the engagement. Whether an act constitutes noncompliance is ultimately a matter to be determined by a court or other appropriate adjudicative body.

.15 If the *member* identifies or suspects that noncompliance has occurred or is likely to occur, the *member* should discuss the matter with the appropriate level of management and, when appropriate, *those charged with governance*.

.16 Such discussion may serve to clarify the *member's* understanding of the facts and circumstances relevant to the matter and its potential consequences.

.17 The appropriate level of management with whom to discuss the matter is a question of professional judgment. Relevant factors to consider may include these:

- a. The nature and circumstances of the matter
- b. The individuals actually or potentially involved
- c. The likelihood of collusion
- d. The potential consequences of the matter
- e. Whether that level of management is able to investigate the matter and take appropriate action

.18 The appropriate level of management is generally at least one level above the person or persons involved or potentially involved in the matter. If a *member* believes that management is involved in the noncompliance or suspected noncompliance, the *member* should discuss the matter with *those charged with governance*. The *member* may also consider discussing the matter with internal auditors, when applicable. In the context of a group audit engagement, the appropriate level may be management at an entity that controls the client.

Addressing the Matter

.19 In discussing the noncompliance or suspected noncompliance with management and, when appropriate, *those charged with governance*, the *member* should advise them to take appropriate and timely actions, if they have not already done so, which may include the following:

- a. Rectifying, remediating, or mitigating the consequences of the noncompliance
- b. Deterring the commission of the noncompliance if it has not yet occurred
- c. Disclosing the matter to an appropriate authority where required by law or regulation or when otherwise considered necessary

.20 The *member* should consider whether the client's management and, if applicable, *those charged with governance* understand their legal or regulatory responsibilities with respect to the noncompliance or suspected noncompliance. If not, the *member* may want to suggest appropriate sources of information or recommend that they obtain legal advice.

.21 The *member* should comply with the following:

- a. Applicable laws and regulations, including legal or regulatory provisions governing the reporting of noncompliance or suspected noncompliance to an appropriate authority. In this regard, some laws and regulations may stipulate a period within which reports are to be made.
- b. Applicable requirements under professional standards, including those relating to
 - i. identifying and responding to noncompliance, including fraud;
 - ii. communicating with *those charged with governance*;
 - iii. considering the implications of the noncompliance or suspected noncompliance on the audit, review, or compilation report for the current or prior engagements; and
 - iv. communicating a former client's noncompliance to the successor auditor to the extent required under professional standards.

Communication With Respect to Group Audit Engagements

.22 A *member* may, for purposes of a group audit engagement, be requested by the group engagement team to perform work on financial or other information related to a component of the group.

If the *member* becomes aware of noncompliance or suspected noncompliance, the *member* should, in addition to responding to the matter in accordance with the provisions of this section, communicate the noncompliance or suspected noncompliance to the group audit engagement partner in accordance with AU-C section 600, *Special Considerations — Audits of Group Financial Statements*

(Including the Work of Component Auditors), unless prohibited from doing so by law or regulation.

.23 If the group audit engagement *partner* becomes aware of noncompliance or suspected noncompliance in the course of a group audit engagement, including as a result of being informed of such a matter in accordance with paragraph .22, the group audit engagement *partner* should, in addition to responding to the matter in the context of the group audit engagement in accordance with the provisions of this section, consider whether the matter may be relevant to one or more components whose financial or other information is subject to procedures performed for purposes of the group audit engagement.

In these circumstances, the group audit engagement *partner* should take steps to have the noncompliance or suspected noncompliance communicated to those performing work at components where the matter may be relevant, unless prohibited from doing so by law or regulation.

Determining Whether Withdrawal From the Engagement Is Necessary

.24 The *member* should evaluate the appropriateness of the response of management and, if applicable, *those charged with governance*.

.25 Relevant factors to consider when evaluating the appropriateness of the response of management and, where applicable, *those charged with governance* may include whether

- a. the response is timely.
- b. the noncompliance or suspected noncompliance has been adequately investigated.
- c. action has been, or is being, taken to rectify, remediate, or mitigate the consequences of any noncompliance.
- d. action has been or is being taken to deter the commission of any noncompliance if it has not yet occurred.
- e. appropriate steps have been, or are being, taken to reduce the risk of recurrence; for example, additional controls or training.
- f. the noncompliance or suspected noncompliance has been disclosed to an appropriate authority when appropriate and, if so, whether the disclosure appears adequate.

.26 In light of the response of management and, if applicable, *those charged with governance*, the *member* should determine whether withdrawing from the engagement and the professional relationship is necessary, where permitted by law and regulation.

.27 The determination of whether withdrawing from the engagement and the professional relationship is necessary may depend on various factors, including these:

- a. The legal and regulatory framework
- b. The urgency of the matter
- c. The pervasiveness of the matter throughout the client
- d. Whether the *member* continues to have confidence in the integrity of management and, if applicable, *those charged with governance*
- e. Whether the noncompliance or suspected noncompliance is likely to reoccur
- f. Whether there is credible evidence of actual or potential substantial harm to the interests of the entity, investors, creditors, employees, or the general public

.28 Examples of circumstances that may cause a *member* no longer to have confidence in the integrity of management and, where applicable, *those charged with governance* include situations such as the following:

- a. The *member* suspects or has evidence of management's involvement or intended involvement in any noncompliance.
- b. The *member* is aware that management has knowledge of such noncompliance and, contrary to legal or regulatory requirements, has not reported, or authorized the reporting of, the matter to an appropriate authority within a reasonable period.

.29 As consideration of the matter may involve complex analysis and judgments, a *member* may want to consider consulting internally or externally, including obtaining legal or other advice to understand the *member's* options and the implications of taking any particular course of action.

Documentation

.30 In relation to an identified or suspected act of noncompliance that falls within the scope of this section, the *member* should, in addition to complying with the documentation requirements under applicable professional standards, document the following:

- a. The matter
- b. The results of discussion with management and, where applicable, *those charged with governance* and other parties
- c. How management and, where applicable, *those charged with governance*, have responded to the matter
- d. The judgments made and the courses of action the *member* took

Members Providing Services Other Than a Financial Statement Audit or Review Service

Obtaining an Understanding of the Matter and Addressing the Matter

.31 If a *member* engaged to perform professional services other than a financial statement audit or review service becomes aware of credible information concerning an instance of noncompliance or suspected noncompliance, whether in the course of performing the engagement or through information provided by other parties, the *member* should seek to obtain an understanding of the matter, including the nature of the act and the circumstances in which it has occurred or is likely to occur.

.32 A *member* is expected to apply knowledge, professional judgment, and expertise but is not expected to have a level of knowledge of laws and regulations greater than that required to undertake the engagement. Whether an act constitutes noncompliance is ultimately a matter to be determined by a court or other appropriate adjudicative body.

.33 If the *member* identifies or suspects that noncompliance has occurred or is likely to occur the *member* should discuss the matter with the appropriate level of management and, if the *member* has access to them and when appropriate, *those charged with governance*.

.34 Such discussion may serve to clarify the *member's* understanding of the facts and circumstances relevant to the matter and its potential consequences.

.35 The appropriate level of management with whom to discuss the matter is a question of professional judgment. Relevant factors to consider may include the following:

- a. The nature and circumstances of the matter
- b. The individuals actually or potentially involved
- c. The likelihood of collusion
- d. The potential consequences of the matter
- e. Whether that level of management is able to investigate the matter and take appropriate action

Communicating the Matter to the Client's Financial Statement Audit or Review Services Provider

.36 *Members performing a service, other than a financial statement audit or review service, for a financial statement audit or review client.* If the member is performing a service other than a *financial statement* audit or review service for a *financial statement* audit or review client of the *firm* or a component of a *financial statement* audit or review client of the *firm*, the *member* should communicate the noncompliance or suspected noncompliance within the *firm*. The communication should be made in accordance with the *firm's* protocols or procedures or, in the absence of such protocols and procedures, directly to the *financial statement* audit or review engagement partner.

.37 If the *member* is performing a service for a *financial statement* audit or review client of a *network firm* or a component of a *financial statement* audit or review client of a *network firm*, the *member* should consider whether to communicate the noncompliance or suspected noncompliance to the *network firm*. If the communication is made, it should be made in accordance with the *network's* protocols or procedures or, in the absence of such protocols and procedures, directly to the *financial statement* audit or review engagement partner.

.38 In all cases, the communication is to enable the *financial statement* audit or review engagement partner to be informed about the noncompliance or suspected noncompliance and to determine whether it should be addressed in accordance with the provisions of this interpretation and, if so, how.

.39 *Members providing services to a client that is not a financial statement audit or review client.* If the *member* is performing services for a client that is not a *financial statement* audit or review client of the *firm*, except as required by law or regulation, the *member* is not permitted to communicate the noncompliance or suspected noncompliance to the *firm* that is the client's external auditor, if one exists. See the "Confidential Client Information Rule" [1.700.001].

Determining Whether Withdrawal From the Engagement Is Necessary

.40 The *member* should determine whether withdrawal from the engagement and the professional relationship is necessary, where permitted by law and regulation.

.41 Whether withdrawal from the engagement is necessary may depend on various factors, including the *member's* understanding of the following:

- a. The legal and regulatory framework
- b. The appropriateness and timeliness of the response of management and, where applicable, *those charged with governance*
- c. The urgency of the matter
- d. Whether the *member* continues to have confidence in the integrity of management and, if applicable, *those charged with governance*
- e. The likelihood of actual or potential substantial harm to the interests of the entity, investors, creditors, employees, or the general public
- f. The pervasiveness of the matter throughout the client

- g. Whether the noncompliance or suspected noncompliance is likely to reoccur

.42 Examples of circumstances that may cause the *member* no longer to have confidence in the integrity of management and, where applicable, *those charged with governance* include such situations as the following:

- a. The *member* suspects or has evidence of management's involvement or intended involvement in any noncompliance.
- b. The *member* is aware that management has knowledge of such noncompliance and, contrary to legal or regulatory requirements, has not reported, or authorized the reporting of, the matter to an appropriate authority within a reasonable period.

.43 As consideration of the matter may involve complex analysis and judgments, a *member* may want to consider consulting internally or externally, including obtaining legal or other advice to understand the *member's* options and the implications of taking any particular course of action.

Documentation

.44 In relation to an identified or suspected act of noncompliance that falls within the scope of this section, the *member* is encouraged to document the following, in addition to complying with the documentation requirements under applicable professional standards:

- a. The matter
- b. The results of discussion with management and, where applicable, *those charged with governance* and other parties
- c. How management and, where applicable, *those charged with governance* have responded to the matter
- d. The judgments made and the courses of action the *member* took

Effective Date

.45 This interpretation is effective June 30, 2023. Early implementation is allowed.

[See Revision History Table.]

1.200 Independence

1.200.001 Independence Rule

.01 A *member* in public practice shall be independent in the performance of *professional services* as required by standards promulgated by bodies designated by *Council*. [Prior reference: paragraph .01 of ET section 101]

Interpretations Under the Independence Rule

1.200.005 Application of the Conceptual Framework for Independence and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Independence Rule" [1.200.001] that addresses a particular relationship or circumstance, a

member should apply the "Conceptual Framework for Independence" interpretation [1.210.010].

.02 A *member* would be considered in violation of the "Independence Rule" [1.200.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*. [Prior reference: "Other Considerations" section of paragraph .02 of ET section 101]

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraph .03 is effective December 15, 2014.

1.210 Conceptual Framework Approach

1.210.010 Conceptual Framework for Independence

Introduction

.01 It is impossible to enumerate all relationships or circumstances in which the appearance of *independence* might be questioned. Thus, in the absence of an *independence interpretation* that addresses a particular relationship or circumstance, a *member* should evaluate whether that relationship or circumstance would lead a reasonable and informed third party who is aware of the relevant information to conclude that there is a *threat* to either the *member's* or *firm's independence*, or both, that is not at an *acceptable level*. When making that evaluation, a *member* should apply the conceptual framework approach as outlined in this interpretation to analyze *independence* matters. A *member* may also wish to consider the conceptual framework approach described in this interpretation to gain a better understanding of the conclusions reached in other *interpretations* in ET section 1.200, "Independence." [Prior reference: "Other Considerations" section of paragraph .02 of ET section 101]

.02 The code specifies that in some circumstances no *safeguards* can reduce an *independence threat* to an *acceptable level*. For example, the code specifies that a *covered member* may not own even an immaterial *direct financial interest* in an *attest client* because there is no *safeguard* to reduce the self-interest *threat* to an *acceptable level*. A *member* may not use the conceptual framework to overcome this prohibition or any other prohibition or requirement in an *independence interpretation*.

Definitions Used in Applying the Conceptual Framework for Independence

.03 Acceptable level. A level at which a reasonable and informed third party who is aware of the relevant information would be expected to conclude that a *member's independence* is not *impaired*.

.04 Impair(ed). In connection with *independence*, to effectively extinguish *independence*. When a *member's independence is impaired*, the *member* is not independent.

.05 Safeguards. Actions or other measures that may eliminate a *threat* or reduce a *threat* to an *acceptable level*.

.06 Threats. Relationships or circumstances that could *impair independence*.

Conceptual Framework Approach

.07 The conceptual framework approach entails identifying *threats* and evaluating the *threat* that the *member* would not be independent or would be perceived by a reasonable and informed third party who is aware of the relevant information as not being independent. The *member* must eliminate or reduce that *threat* to an *acceptable level* to conclude that the *member* is independent. *Threats* are at an *acceptable level* either because of the types of *threats* and their potential effect or because *safeguards* have eliminated or reduced the *threat*, so that a reasonable and informed third party who is aware of the relevant information would perceive that the *member's* professional judgment is not compromised.

.08 Refer to paragraph .07 of the "Conceptual Framework for Members in Public Practice" [1.000.010.07] for a detailed description of the conceptual framework approach. [Prior reference: ET section 100-1]

Documentation

.09 When the *member* applies *safeguards* to eliminate or reduce significant *threats* to an *acceptable level*, as described in paragraph .07c of the "Conceptual Framework for Members in Public Practice" [1.000.010.07], the *member* should document the identified *threats* and *safeguards* applied. Failure to prepare the required documentation would be considered a violation of the "Compliance With Standards Rule" [1.310.001] rather than the "Independence Rule" [1.200.001] if the *member* can demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*. [Prior reference: "Other Considerations" section of paragraph .02 of ET section 101]

Threats

.10 Many different relationships or circumstances (or combinations of relationships or circumstances) can create *threats* to compliance with the "Independence Rule" [1.200.001]. It is impossible to identify every relationship or circumstance that creates a *threat*. Many *threats* fall into one or more of the following seven broad categories: adverse interest, advocacy, familiarity, management participation, self-interest, self-review, and undue influence.

.11 Examples of *threats* associated with a specific relationship or circumstance are identified in the *interpretations* of the code. Paragraphs .12–.18 in this section define and provide examples, which are not all inclusive, of each of these *threat* categories. In certain circumstances, the code specifies that because of the type of *threat* and its potential effect, either no *safeguards* can eliminate or reduce the *threat* to an *acceptable level*, or a *member* would need to apply specific *safeguards* to eliminate or reduce an *independence threat* to an *acceptable level*. When *independence interpretations* in the code address one of these examples, a specific reference to the *independence interpretation* is provided in brackets after that example. If an example does not contain a specific reference to an *independence interpretation*, a *member* should use this "Conceptual

Framework for Independence" interpretation to evaluate whether a *threat* is significant.

.12 Adverse interest threat. The *threat* that a *member* will not act with objectivity because the *member's* interests are in opposition to the interests of an *attest client*. An example is either the *attest client* or the *member* commencing litigation against the other or expressing the intent to commence litigation. [1.290.010]

.13 Advocacy threat. The *threat* that a *member* will promote an *attest client's* interests or position to the point that his or her *independence* is compromised. Examples of advocacy *threats* include the following:

- a. A *member* promotes the *attest client's* securities as part of an initial public offering. [1.295.130]
- b. A *member* provides expert witness services to an *attest client*. [1.295.140]
- c. A *member* represents an *attest client* in U.S. tax court or other public forum. [1.295.160]

.14 Familiarity threat. The *threat* that, because of a long or close relationship with an *attest client*, a *member* will become too sympathetic to the *attest client's* interests or too accepting of the *attest client's* work or product. Examples of familiarity *threats* include the following:

- a. A *member* of the *attest engagement team* has an *immediate family member* or *close relative* in a *key position* at the *attest client*, such as the *attest client's* CEO. [1.270.020 and 1.270.100]
- b. A *partner* or *partner equivalent* of the *firm* has been a *member* of the *attest engagement team* for a prolonged period.
- c. A *member* of the *firm* has recently been a *director* or an *officer* of the *attest client*. [1.277.010]
- d. A *member* of the *attest engagement team* has a *close friend* who is in a *key position* at the *attest client*.

.15 Management participation threat. The *threat* that a *member* will take on the role of *attest client* management or otherwise assume management responsibilities for an *attest client*. Examples of management participation *threats* include the following:

- a. A *member* serves as an *officer* or a *director* of the *attest client*. [1.275.005]
- b. A *member* accepts responsibility for designing, implementing, or maintaining internal controls for the *attest client*. [1.295.030]
- c. A *member* hires, supervises, or terminates the *attest client's* employees. [1.295.135]

.16 Self-interest threat. The *threat* that a *member* could benefit, financially or otherwise, from an interest in, or relationship with, an *attest client* or persons associated with the *attest client*. Examples of self-interest *threats* include the following:

- a. A *member* has a *direct financial interest* or *material indirect financial interest* in the *attest client*. [1.240.010]
- b. A *member* has a *loan* from the *attest client*, an *officer* or a *director* of the *attest client* with the ability to affect decision-making, or any individual with a *beneficial ownership interest* (known through reasonable inquiry) that gives the individual *significant influence* over the *attest client*. [1.260.010]

- c. A *member* or his or her *firm* relies excessively on revenue from a single *attest client*.
- d. A *member* or *member's firm* has a material joint venture or other material joint business arrangement with the *attest client*. [1.265]

[See Revision History Table.]

.17 Self-review threat. The *threat* that a *member* will not appropriately evaluate the results of a previous judgment made, or service performed or supervised by the *member* or an individual in the *member's firm* and that the *member* will rely on that service in forming a judgment as part of an *attest engagement*. Certain self-review *threats*, such as preparing *source documents* used to generate the *attest client's financial statements* [1.295.120], pose such a significant self-review *threat* that no *safeguards* can eliminate or reduce the *threats* to an *acceptable level*.

.18 Undue influence threat. The *threat* that a *member* will subordinate his or her judgment to that of an individual associated with an *attest client* or any relevant third party due to that individual's reputation or expertise, aggressive or dominant personality, or attempts to coerce or exercise excessive influence over the *member*. Examples of undue influence *threats* include the following:

- a. Management threatens to replace the *member* or *member's firm* over a disagreement on the application of an accounting principle.
- b. Management pressures the *member* to reduce necessary audit procedures in order to reduce audit fees.
- c. The *member* receives a gift from the *attest client*, its management, or its significant shareholders. [1.285.010]

Safeguards

.19 Safeguards may partially or completely eliminate a *threat* or diminish the potential influence of a *threat*. The nature and extent of the *safeguards* applied will depend on many factors, including the size of the *firm* and whether the *attest client* is a *public interest entity*. To be effective, *safeguards* should eliminate the *threat* or reduce it to an *acceptable level*.

.20 The following are three broad categories of *safeguards*:

- a. *Safeguards* created by the profession, legislation, or regulation.
- b. *Safeguards* implemented by the *attest client*. It is not possible to rely solely on *safeguards* implemented by the *attest client* to eliminate or reduce significant *threats* to an *acceptable level*.
- c. *Safeguards* implemented by the *firm*, including policies and procedures to implement professional and regulatory requirements.

.21 The effectiveness of a *safeguard* depends on many factors, including those listed here:

- a. The facts and circumstances specific to a particular situation
- b. The proper identification of *threats*
- c. Whether the *safeguard* is suitably designed to meet its objectives
- d. The party(ies) that will be subject to the *safeguard*
- e. How the *safeguard* is applied
- f. The consistency with which the *safeguard* is applied
- g. Who applies the *safeguard*

- h. How the *safeguard* interacts with a *safeguard* from another category
- i. Whether the *attest client* is a *public interest entity*

.22 Examples of various *safeguards* within each category are presented in paragraphs .21–.23 of the "Conceptual Framework for Members in Public Practice" [1.000.010]. The examples presented in these paragraphs are not intended to be all inclusive. In addition, *threats* may be sufficiently mitigated through the application of other *safeguards* not specifically identified in these paragraphs. [Prior reference: ET section 100-1]

Effective Date

.23 The addition of *partner equivalents* to paragraph .14b is effective for engagements covering periods beginning on or after December 15, 2014.

1.220 Accounting Firms

A nonauthoritative question and answer regarding letter of intent to purchase practice is available in the Ethics FAQ at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.220.010 Network and Network Firms

General

.01 To enhance their capabilities to provide *professional services*, *firms* frequently join larger groups, which typically are membership associations that are separate legal entities and otherwise unrelated to their members. The associations facilitate their members' use of association services and resources. They do not themselves typically engage in *public practice* or provide *professional services* to their members' *clients* or other third parties.

.02 *Firms* and other entities in the association cooperate with the *firms* and other entities that are members of the association to enhance their capabilities to provide *professional services*. For example, a *firm* may become a member of an association in order to refer work to, or receive referrals from, other association members. That characteristic alone would not be sufficient for the association to constitute a *network* or for the *firm* to be considered a *network firm*.

.03 However, an association would be considered a *network* if, in addition to cooperation among member *firms* and other entities to enhance their capabilities to provide *professional services*, member *firms* and other entities share one or more additional characteristics described in paragraphs .07–.18 of this

section. If an association is considered a *network* and an entity is considered a *network firm* the classification should be applied consistently by all members of the association. When determining if one or more additional characteristics exist, *members* should give due consideration to what a reasonable and informed third party who is aware of the relevant information would be expected to conclude.

.04 A *network firm* is required to comply with the "Independence Rule" [1.200.001] with respect to the *financial statement* audit and review *clients* of the other *network firms* if the use of the audit or review report for the *client* is not restricted, as defined by professional standards. For all other *attest clients*, the *covered member* should consider any *threats* that the *covered member* knows or has reason to believe may be created by another *network firm's* interests and relationships. If those *threats* are not at an *acceptable level*, the *covered member* should apply *safeguards* to eliminate the *threats* or reduce them to an *acceptable level*. If *safeguards* cannot be applied to eliminate or reduce the *threats* to an *acceptable level*, *independence* will be *impaired*. Entities within the *network* that meet the definition of a *network firm* are subject to the "Independence Rule."

.05 The determination that a *firm* or other entity or an association of *firms* or other entities meets the definition of a *network firm* and *network* is solely for purposes of this interpretation and may not be used or relied upon in any other context. In particular, determining whether a *firm* or other entity is a *network firm* or whether an association of *firms* or other entities is a *network* for purposes of defining legal responsibilities from one *firm* to the other or to third parties is beyond the scope of this interpretation.

Characteristics of a Network

.06 When an association is formed for the purpose of cooperating to enhance the *firms'* capabilities to provide *professional services*, and one of the characteristics described in paragraphs .07–.18 of this section also applies, the association is considered to be a *network*.

.07 *Sharing a common brand name*. This characteristic exists when the association's members or entities *controlled* by the association's members share the use of a common brand name or share common initials as part of the *firm* name.

.08 A *firm* that does not use a common brand name as part of its *firm* name but makes reference in its stationery or promotional materials to being a member of an association of *firms* should carefully consider how it describes that membership and take steps to avoid the perception that it belongs to a *network*. The *firm* may wish to avoid such perception by clearly describing the nature of its membership in the association (for example, by stating on its stationery or promotional material that it is "an independently owned and operated member firm of XYZ Association").

.09 *Sharing common control*. This characteristic exists when entities within the association are under common *control* with other firms in the association through ownership, management, or other means (for example, by contract). However, compliance with association requirements as a condition of membership does not indicate that members are under common *control*; rather, it reflects the type of cooperation that is expected when an entity joins the association.

.10 *Sharing profits or costs*. This characteristic exists when entities within the association share profits or costs. Following are examples of profit and cost sharing that would not create a *network*:

- a. Sharing immaterial costs
- b. Sharing costs related to operating the association
- c. Sharing costs related to the development of audit methodologies, manuals, and training courses
- d. Arrangements between a *firm* and an otherwise unrelated entity to jointly provide a service or develop a product

.11 *Sharing a common business strategy.* This characteristic exists when entities within the association share a common business strategy. Sharing a common business strategy involves ongoing collaboration among the *firms* whereby the *firms* are responsible for implementing the association's strategy and held accountable for performance pursuant to that strategy. An entity's ability to pursue an alternative strategy may be limited by the common business strategy because, as a member, it must act in accordance with the common business strategy and, therefore, in the best interest of the association.

.12 An entity is not considered to be a *network firm* merely because it cooperates with another entity solely to market *professional services* or responds jointly to a request for a proposal for the provision of a *professional service*.

.13 *Sharing significant professional resources.* This characteristic exists when entities within the association share a significant part of professional resources. *Members* should consider both qualitative and quantitative factors in determining whether the shared professional resources are significant.

.14 Examples of professional resources include the following:

- a. Common systems that enable *firms* to exchange information, such as *client* data, billing, and time records
- b. *Partners* and staff
- c. Technical departments to consult on technical or industry-specific issues, transactions, or events for assurance engagements
- d. Audit methodology or audit manuals
- e. Training courses and facilities

.15 When shared professional resources involve the exchange of *client* information or personnel, such as when staff are drawn from a shared pool or a common technical department is created within the association to provide participating *firms* with technical advice that the *firms* are required to follow, a reasonable and informed third party who is aware of the relevant information would be expected to conclude that the shared professional resources are significant.

.16 When the entities within the association do not share a significant amount of human resources (for example, a *firm* occasionally uses personnel of another member *firm* to assist with an engagement, such as observing a *client's* physical inventory count) or significant *client* information (for example, *client* data, billing, and time records) and have the ability to make independent decisions regarding technical matters, audit methodology, training, and the like, the entities are not considered to be sharing a significant part of professional resources.

.17 When the shared professional resources are limited to a common audit methodology, audit manuals, training courses, or facilities and do not include a significant amount of human resources or *clients* or markets, the shared professional resources are not considered significant.

.18 *Sharing common quality control policies and procedures.* This characteristic exists when entities within the association are required to follow common quality control policies and procedures that the association monitors.

Monitoring is the ongoing consideration and evaluation of the *firms'* systems of quality control, which enables the association to obtain reasonable assurance that the *firms'* systems of quality control are designed appropriately and operating effectively.

.19 Refer to paragraph .03d of the "Application of the AICPA Code" [0.200.020] for additional guidance. [Prior reference: paragraph .19 of ET section 101]

Nonauthoritative implementation guidance can be found at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-division-network-firm-implementation-guidance.pdf>.

Nonauthoritative frequently asked questions (FAQ) and case studies can be found at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/networkfirmfaqandcasestudies.pdf>

1.220.020 Alternative Practice Structures

.01 *Members* practicing public accounting in nontraditional practice structures (alternative practice structures [APS]) should apply this interpretation to determine whether they are in compliance with the "Independence Rule" [1.200.001].

.02 All such structures must be organized in a form that complies with applicable laws, rules, and regulations, the "Form of Organization and Name Rule" [1.800.001] and the related "Alternative Practice Structures" interpretation [1.810.050] of the "Form of Organization and Name Rule."

.03 For example, in an APS, a substantial piece of the nonattest portion of a *member's* practice may be conducted under public or private ownership, and the attest portion of the practice may be conducted through a separate *firm* that the *member* owns and *controls*.

Terminology

.04 The following terms are defined solely for the purpose of applying this interpretation:

- a. APS is a form of organization in which a *firm* that provides attest services is closely aligned with another public or private organization that performs other *professional services*.
- b. A covered member includes both employed and leased individuals who meet the definition of a *covered member*.
- c. The term direct superiors includes those persons so closely associated with a *partner* or *manager* who is a covered member that such persons can directly control the *partner's* or *manager's* activities. For this purpose, a person who can directly control is the immediate superior of the *partner* or *manager* who has the power to direct the activities of that person so as to be able to directly or indirectly (for example, through another entity over which the direct superior can exercise significant influence) derive a benefit from that person's activities. An example is the person who has day-to-day responsibility for the activities of the *partner* or *manager* and is in a position to recommend promotions and compensation levels. This group of persons is so closely aligned through

direct reporting relationships that their interests seem to be inseparable.

- d. Indirect superiors are not connected with *partners* and *managers* who are covered members through direct reporting relationships; rather, they are one or more levels above direct superiors of covered members (that is, there always is a level in between). Generally, this starts with persons in an organization structure to whom direct superiors report and go up the line from there. Indirect superiors also include the *immediate family* of indirect superiors.
- e. Other public company entities include the public company and all entities consolidated in the public company *financial statements* that are not subject to the "Independence Rule" [1.200.001] and its *interpretations* in their entirety.
- f. Significant influence is having the ability to exercise significant influence over the financial, operating, or accounting policies of the entity by, for example
 - i. being connected with the entity as a promoter, an underwriter, a voting trustee, a general partner, or a director;
 - ii. being in a policy-making position, such as chief executive officer, chief operating officer, chief financial officer, or chief accounting officer; or
 - iii. meeting the criteria in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 323-10-15 to determine the ability of an investor to exercise such influence with respect to an entity.

APS Model

.05 The APS described in paragraphs .06–.07 in this section and the related chart provides an example of a structure in use at the time that this interpretation was developed. Many of the references in this interpretation are to the example, but *members* should apply the concepts in spirit and substance to variations of the example structure as they develop.

.06 The example APS in this interpretation is one in which an existing CPA practice (Oldfirm) is sold by its owners to another (possibly public) entity (PublicCo). PublicCo has subsidiaries or divisions, such as a bank, an insurance company, or a broker-dealer. It also has one or more professional service subsidiaries (PSS) or divisions that offer nonattest services (for example, tax, personal financial planning, and management consulting) to *clients*. The owners and employees of Oldfirm become employees of one of PublicCo's subsidiaries or divisions and may provide those nonattest services. In addition, the owners of Oldfirm form a new CPA *firm* (Newfirm) to provide attest services. CPAs, including the former owners of Oldfirm, own a majority of Newfirm (with regard to voting and financial interests). Attest services are performed by Newfirm and supervised by its owners. The arrangement between Newfirm and PublicCo (or one of its subsidiaries or divisions) includes the lease of employees, office space, and equipment; the performance of back-office functions, such as billing and collections; and advertising. Newfirm pays a negotiated amount for these services.

.07 The chief executive of the local office of the PSS where the *partners* of Newfirm are employed would be a direct superior. The chief executive of the PSS itself would be an indirect superior, and there may be indirect superiors in between, such as a regional chief executive of all PSS offices within a geographic area.

Interpretation

.08 The "Independence Rule" [1.200.001] and *interpretations* normally extend only to those persons and entities included in the definition of *covered members*. However, in an APS environment, the self-interest, management participation, self-review, advocacy, or undue influence *threats* to a covered member's compliance with the "Independence Rule" may not be at an *acceptable level* unless certain *safeguards* are implemented by other individuals or entities.

.09 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level*, could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired* when the following individuals or entities fail to apply the "Independence Rule" and *interpretations* with respect to *attest clients* of Newfirm:

- a. Covered members of Newfirm
- b. Direct superiors of any *partner* or *manager* who is a covered member of Newfirm and entities within the APS over which such individuals can exercise *significant influence*

.10 In addition, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level*, could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired* in the following circumstances:

- a. Indirect superiors and other public company entities have a material relationship with an *attest client* of Newfirm that is prohibited by the "Overview of Financial Interests" interpretation [1.240.010], the "Trustee or Executor" interpretation [1.245.010], the "Loans" interpretation [1.260.010], or the "Joint Closely Held Investments" interpretation [1.265.020] of the "Independence Rule" (for example, investments, *loans*, and so on). In making the test for materiality for financial relationships of an indirect superior, all the financial relationships with an *attest client* held by that person should be aggregated and, to determine materiality, assessed in relation to the person's net worth. In making the materiality test for financial relationships of other public company

entities, all the financial relationships with an *attest client* held by such entities should be aggregated and, to determine materiality, assessed in relation to the consolidated *financial statements* of PublicCo.

- b. Any other public company entity over which an indirect superior has direct responsibility has a financial relationship with an *attest client* during the *period of the professional engagement* that is material in relation to the other public company entity's *financial statements*.
- c. Financial relationships of indirect superiors or other public company entities allow such persons or entities to exercise significant influence over the *attest client* during the *period of the professional engagement*. In making the test for significant influence, financial relationships of all indirect superiors and other public company entities should be aggregated.
- d. Other public company entities or any of their employees are connected with an *attest client* of Newfirm as a promoter, an underwriter, a voting trustee, a director, or an officer during the *period of the professional engagement* or during the period covered by the *financial statements*.

.11 Indirect superiors and other public company entities may provide services to an *attest client* of Newfirm that would *impair independence* if performed by Newfirm, except as noted in paragraph .10d.

.12 When Newfirm and its *partners* and professional employees perform *attest engagements* for PublicCo or any of its subsidiaries or divisions, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* through the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.13 If an *attest client* of Newfirm holds an investment in PublicCo that is material to the *attest client* or that allows the *attest client* to exercise significant influence over PublicCo during the *period of the professional engagement*, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* through the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.14 When making referrals of services between Newfirm and any of the entities within PublicCo, a *member* should consider the provisions of the "Conflicts of Interest" interpretation [1.110.010] of the "Integrity and Objectivity Rule" [1.100.001] and the "Alternative Practice Structures" interpretation [1.810.050] of the "Form of Organization and Name Rule" [1.800.001]. [Prior reference: paragraph .16 of ET section 101]

1.220.030 Use of a Nonindependent CPA Firm on an Engagement

.01 If *partners* or professional employees from another *firm* that was not independent of an *attest client* participate on the *attest engagement team*, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* through the application of *safeguards*. Accordingly, the *firm's independence* would be *impaired*.

.02 However, the *firm* may use the work of such individuals in a manner similar to internal auditors, provided that the *firm* complies with AU-C

section 610, *Using the Work of Internal Auditors* (AICPA, *Professional Standards*). [Prior reference: paragraphs .142–.143 of ET section 191]

1.220.040 Firm Mergers and Acquisitions

.01 When (1) a *member's firm* merges with or acquires another firm or entity or all or part of the business thereof (acquired firm) or (2) a *member's firm*, or all or part of the business thereof, is merged with or acquired by another *firm* (acquiring firm), *threats* to compliance with the "Independence Rule" [1.200.001] may exist as a result of employment or association with, or the provision of nonattest services to, an *attest client* of the acquired or acquiring firm.

.02 When determining which *firm* is the acquirer, *members* should consider the guidance contained in paragraphs 11–15 of FASB ASC 805-10-55, among other sources.

Employment or Association With an Attest Client

.03 If a *partner* or professional employee was formerly employed by or associated with an entity as a director, officer, employee, promoter, underwriter, voting trustee, trustee of any pension or profit-sharing trust of the entity, or in any capacity equivalent to that of a member of management and that entity becomes an *attest client* through a merger or acquisition, then *threats* will be at an *acceptable level* and *independence* will not be *impaired* provided all of the following *safeguards* are met:

- a. The *partner* or professional employee terminates the relationship with the *attest client* (for example, resigns as a director) prior to the closing date of the merger or acquisition.
- b. The *partner* or professional employee does not participate on the *attest engagement team* and is not an *individual in a position to influence the attest engagement* for the *attest client* when the *attest engagement* covers any period that includes his or her former employment or association with that *attest client*.
- c. The applicable disassociation *safeguards* in paragraph .04 of the "Former Employment or Association With an Attest Client" interpretation [1.277.010] are implemented prior to the closing date of the merger or acquisition.
- d. As soon as practicable under the circumstances but before issuing the attest report, a responsible individual within the *firm* assesses the prior relationship of the *partner* or professional employee with the *attest client*, as well as the position he or she holds at the *firm*, to determine if *threats* are created that are not at an *acceptable level*. If the responsible individual determines that *threats* are not at an *acceptable level*, he or she should be satisfied that *safeguards* are applied to eliminate or reduce the *threats* to an *acceptable level*. *Threats* will not be at an *acceptable level* if
 - i. the *partner* or professional employee will have interaction with members of the *attest engagement team* regarding the *attest client* or
 - ii. the *attest engagement team* is placed in a position of evaluating the *partner* or professional employee's representations and work while he or she was employed or associated with the *attest client*.

In such situations, an individual within the *firm* with the appropriate stature, expertise, and objectivity should review the

subsequent *attest engagement* prior to issuing the attest report to determine whether the *attest engagement team* maintained integrity; objectivity; and, as appropriate, professional skepticism.

- e. As soon as practicable under the circumstances but before issuing the attest report, the nature of the relationship and any *safeguards* that were applied are discussed with *those charged with governance*. Documentation of the substance of the discussion with *those charged with governance* is encouraged.

Nonattest Services

.04 Nonattest services provided to an entity that becomes an *attest client* through a merger or an acquisition may create self-review, management participation, and advocacy *threats* to the *member's* compliance with the "Independence Rule" [1.200.001]. Specifically, *threats* may exist if, during the *period of the professional engagement* or the period covered by the *financial statements*, nonattest services that would otherwise *impair independence* (prohibited nonattest services) under the interpretations of the "Nonattest Services" subtopic [1.295] are performed by

- a. the acquiring firm, with respect to an *attest client* of the acquired firm or
- b. the acquired firm, with respect to an *attest client* of the acquiring firm.

Prohibited Nonattest Services Provided by Acquiring Firm

.05 If the acquiring firm provided prohibited nonattest services to an *attest client* of the acquired firm during the period covered by the *financial statements*, *threats* to compliance with the "Independence Rule" [1.200.001] will not be at an *acceptable level* and cannot be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, the acquiring firm's *independence* will be *impaired* with respect to the *attest client*.

Prohibited Nonattest Services Provided by Acquired Firm

.06 If the acquired firm provided prohibited nonattest services to an *attest client* of the acquiring firm prior to the financial statement period covered by the acquiring firm's next attest report, the acquiring firm's *independence* would not be *impaired*.

.07 If the acquired firm provided prohibited nonattest services to an *attest client* of the acquiring firm during the *period of the professional engagement* (except as provided for in paragraph .06) or the period covered by the *financial statements*, the acquiring firm's *independence* would be *impaired* unless all of the following conditions are satisfied:

- a. The acquired firm terminates the prohibited nonattest services (or modifies the service offerings such that they would not *impair independence*) prior to the closing date of the merger or acquisition.
- b. Any individual who participated in the engagement to provide the prohibited nonattest services is neither on the *attest engagement team* nor an *individual in a position to influence the attest engagement*.
- c. An evaluation of the *threats* is performed and *threats* are determined to be at an *acceptable level* or reduced to an *acceptable level* by the application of *safeguards*. The evaluation should be

conducted on the basis of the attribution of the results of the nonattest services to the acquiring firm. That is, if the nonattest services

- i. can be attributed to the acquiring firm because the acquiring firm will assume responsibility for the results of the nonattest services, then the evaluation should assess all prohibited nonattest services that the acquired firm performed for the *attest client* during the financial statement period to be covered by the acquiring firm's next attest report; or
- ii. cannot be attributed to the acquiring firm, then the evaluation should assess all prohibited nonattest services that the acquired firm performed for the *attest client* during the period in which the merger or acquisition was pending (that is, from the commencement of negotiations through the closing date of the merger or acquisition).

.08 In evaluating the significance of any *threats*, consideration should also be given to the following:

- a. Whether the nonattest service is attributed to the acquiring firm and whether the work performed or its results will be subject to attest procedures.
- b. The significance of the results of the nonattest service to the *attest client's financial statements*.
- c. The extent to which the *attest client* and its management were involved in overseeing the nonattest services performed (including making any significant judgments and decisions with respect to the nonattest services) and whether the *attest client* and its management possessed the suitable skill, knowledge and/or experience to oversee such services.
- d. Whether the nonattest services involved the assumption of a management responsibility.

.09 If the *member* concludes that the *threats to independence* are not at an *acceptable level*, the *member* should apply *safeguards* to reduce *threats* to an *acceptable level*.

.10 Examples of *safeguards* include the following:

- a. An individual not associated with the nonattest engagement reviews the nonattest services work performed.
- b. Another *firm* performs an *attest engagement* on the subject matter of the nonattest service.
- c. Another *firm* re-performs the nonattest service to the extent necessary for it to take responsibility for that service.

If no *safeguards* exist that will eliminate or reduce the *threats* to an *acceptable level*, *independence* will be *impaired*.

Communications With Those Charged With Governance

.11 As soon as practicable under the circumstances but before issuing the attest report, the nature of the prohibited nonattest services performed by the acquired firm that are subject to evaluation in paragraph .07c and any *safeguards* applied should be discussed with *those charged with governance*.

Documentation of the substance of the discussion with *those charged with governance* is encouraged.

Other Interests in and Relationships With an Attest Client

.12 This interpretation addresses only *threats to independence* that may arise as a result of a merger or an acquisition relating to employment or association with, or the provision of nonattest services to, an *attest client*. However other interests in, and relationships with, an *attest client* may also result in *threats to compliance* with the "Independence Rule" [1.200.001] or other rules during a merger or acquisition. Accordingly, *members* should take whatever pre-merger actions are necessary to be satisfied that the *firm* is in compliance with all relevant rules prior to the closing date of the merger or acquisition.

Confidentiality Considerations

.13 Refer to the "Disclosing Client Information in Connection With a Review of the Member's Practice" interpretation [1.700.050] of the "Confidential Client Information Rule" [1.700.001] for additional guidance.

Effective Date

.14 This interpretation is effective for mergers or acquisitions with closing dates on or after January 31, 2016. Early implementation is allowed.

1.224 Affiliates, Including State and Local Government Affiliates

1.224.010 Client Affiliates

.01 *Financial interests* in, and other relationships with, *affiliates* of a *financial statement attest client* may create *threats to a member's compliance* with the "Independence Rule" [1.200.001].

.02 When a *client* is a *financial statement attest client*, *members* should apply the "Independence Rule" [1.200.001] and related *interpretations* applicable to the *financial statement attest client* to their *affiliates*, except in the following situations:

- a. During the *period of the professional engagement*, a *covered member* may have a *loan* to or from an
 - i. officer or director of an *affiliate* of a *financial statement attest client*, unless the officer or director has the ability to affect the decision-making at the *financial statement attest client*.
 - ii. individual with a *beneficial ownership interest* (known through reasonable inquiry) in an *affiliate* of a *financial statement attest client*, unless the ownership interest gives the individual *significant influence* over the *financial statement attest client*.
- b. A *member* or the *member's firm* may provide prohibited nonattest services to entities described under items c–l of the definition of *affiliate* during the *period of the professional engagement* or during the period covered by the *financial statements*, provided that it is reasonable to conclude that the services do not create a self-review *threat* with respect to the *financial statement attest client* because the results of the nonattest services will not be subject to *financial statement attest procedures*. For any other *threats* that are created by the provision of the nonattest services that are not

at an *acceptable level* (in particular, those relating to management participation), the *member* should apply *safeguards* to eliminate or reduce the *threats* to an *acceptable level*.

- c. A *firm* will only have to apply the "Subsequent Employment or Association With an Attest Client" interpretation [1.279.020] of the "Independence Rule" if the former employee, by virtue of his or her employment at an entity described under items c–l of the definition of *affiliate*, is in a *key position* with respect to the *financial statement attest client*. *Individuals in a position to influence the attest engagement* and on the *attest engagement team* who are considering employment with an *affiliate* of a *financial statement attest client* will still need to report consideration of employment to an appropriate person in the *firm* and remove themselves from the *financial statement attest engagement*, even if the position with the *affiliate* is not a *key position*.
- d. A *covered member's immediate family members* and *close relatives* may be employed in a *key position* at an entity described under items c–l of the definition of *affiliate* during the *period of the professional engagement* or during the period covered by the *financial statements*, provided they are not in a *key position* with respect to the *financial statement attest client*.
- e. A *covered member* who is an individual on the *attest engagement team*, an individual in a position to influence the *attest engagement*, or the *firm* may have a lease that does not meet the requirements of the "Leases" interpretation [1.260.040] under the "Independence Rule" with an entity described under items c–l of the definition of *affiliate* during the period of the professional engagement. The *covered member* should use the "Conceptual Framework for Independence" to evaluate whether any *threats* created by the lease are at an *acceptable level*. If the *covered member* concludes that *threats* are not at an *acceptable level*, the *covered member* should apply *safeguards* to eliminate the *threats* or reduce them to an *acceptable level*.
- f. A *member* or *member's firm* may enter into a staff augmentation arrangement with entities described under items (c)–(l) of the definition of *affiliate* during the *period of the professional engagement* or during the period covered by the *financial statements*. The *member* should use the "Conceptual Framework for Independence" to evaluate whether any *threats* created by the staff augmentation arrangement are at an *acceptable level*. If the *member* concludes that *threats* are not at an *acceptable level*, the *member* should apply *safeguards* to eliminate the *threats* or reduce them to an *acceptable level*. If *safeguards* are not available or cannot be applied to eliminate or reduce the *threats* to an *acceptable level*, the *member* should not enter into the staff augmentation arrangement.

.03 A *member* must expend best efforts to obtain the information necessary to identify the *affiliates* of a *financial statement attest client*. If, after expending best efforts, a *member* is unable to obtain the information to determine which entities are *affiliates* of a *financial statement attest client*, *threats* would be at an *acceptable level* and *independence* would not be *impaired* if the *member* (a) discusses the matter, including the potential impact on *independence*, with those *charged with governance*; (b) documents the results of that discussion and the efforts taken to obtain the information; and (c) obtains written assurance from

the *financial statement attest client* that it is unable to provide the *member* with the information necessary to identify the *affiliates* of the *financial statement attest client*.

.04 This interpretation does not apply with respect to a *financial statement attest client* that is covered by the "State and Local Government Client Affiliates" interpretation [1.224.020] of the "Independence Rule" [1.200.001]. [Prior reference: paragraph .20 of ET section 101]

Acquisition or Other Transaction Involving a Financial Statement Attest Client or Its Affiliates That Results in the Creation of a New Affiliate

.05 An entity may become a new *affiliate* of an existing *financial statement attest client* because of an acquisition or other transaction. A *threat to independence* and, therefore, to the ability of a *member* or *member's firm* to continue a *financial statement attest engagement* might be created by previous or current interests or relationships between the *member* or *member's firm* and the new *affiliate*. Paragraphs .06–.13 provide guidance on how independence is affected when such interests in or relationships with a new affiliate exist.

An Existing Financial Statement Attest Client Is Acquired and the Member or Member's Firm Will Not Continue Providing Financial Statement Attest Services to Such Client After the Current Attest Report Is Issued and the Report Does Not Cover Periods After the Effective Date of the Acquisition

.06 When a *member* or *member's firm* has an interest in or relationship with an acquirer that may *impair independence* as a result of the requirements of this interpretation, *independence* with respect to the *financial statement attest client* will not be considered *impaired* if all the following conditions are met:

- a. The acquisition occurs during the *period of the professional engagement*.
- b. The *financial statement attest engagement* covers only periods prior to the effective date of the acquisition.
- c. The *member* or *member's firm* will not continue to provide *financial statement attest services* to the existing *financial statement attest client* for periods after the effective date of the acquisition.

An Existing Financial Statement Attest Client or Its Affiliate Is Involved in an Acquisition or Other Transaction and the Member or Member's Firm Expects to Continue Providing Financial Statement Attest Services to Such Client

.07 When an acquisition or other transaction creates a new *affiliate* of a *financial statement attest client* during the *period of the professional engagement* and the *member* or *member's firm* expects to continue providing *financial statement attest services* to the *financial statement attest client* after the effective date of the acquisition or other transaction, the following conditions should be met:

- a. The *member* or *member's firm* should identify and evaluate previous and current interests in and relationships with the new *affiliate*, including actions taken to address the *threat to independence*, that might affect *independence* and therefore the *member's* or *member's firm's* ability to continue the *financial statement attest engagement* after the effective date of the acquisition or other transaction.

- b. Except as provided for in paragraph .08, the *member* or *member's firm* should take steps to end any interests in or relationships with the new *affiliate* that would *impair independence* by the effective date of the acquisition or other transaction.

.08 As an exception to paragraph .07b, if the interest in or relationship with the new *affiliate* cannot reasonably be ended by the effective date of the acquisition or other transaction (for example, the new *affiliate* is not able to transition a nonattest service in an orderly manner to another service provider by that date), the *member* or *member's firm* should do the following:

- a. Evaluate the *threat to independence* that is created by the interest or relationship. Factors that are relevant in evaluating the significance of a *threat* when there are interests and relationships with a new *affiliate* that cannot reasonably be ended could include these:
 - i. The nature and significance of the interest or relationship
 - ii. The nature and significance of the *affiliate* relationship (for example, whether the *affiliate* is a subsidiary, parent, or sister entity)
 - iii. The length of time until the interest or relationship can reasonably be ended
- b. Discuss with *those charged with governance* the evaluation of the significance of *threat* and the reasons that the interest or relationship cannot reasonably be ended by the effective date of the acquisition or other transaction.

.09 Following the discussion in paragraph .08b, if *those charged with governance* request the *member* or *member's firm* to continue to provide *financial statement* attest services to the *financial statement attest client*, the *member* or *member's firm* should do so only under the following circumstances:

- a. The interest in or relationship with the new *affiliate* that would *impair independence* will end as soon as reasonably possible but no later than six months after the effective date of the acquisition or other transaction.
- b. Any individual who has such an interest in or relationship with the new *affiliate*, including one that has arisen through performing a nonattest service that would *impair independence* under the "Nonattest Services" subtopic [1.295] of the "Independence Rule" [1.200.001], will not be a member of the *attest engagement team* or an individual responsible for the engagement quality control review.
- c. *Safeguards* will be applied, as necessary, and discussed with *those charged with governance*.

An Existing Financial Statement Attest Client or Its Affiliate Is Involved in an Acquisition or Other Transaction and the Member or Member's Firm Will Complete the Existing Financial Statement Attest Engagement but Will Not Continue Providing Such Services After the Current Attest Report Is Issued but the Report May Cover Periods After the Effective Date of the Acquisition or Other Transaction

.10 When a *member* or *member's firm* will not continue to provide *financial statement* attest services to the *financial statement attest client* that is involved in an acquisition or other transaction, the *member* or *member's firm* may issue

the current report covering a period after the effective date of the acquisition or other transaction if all the following conditions are met:

- a. The *member* or *member's firm* completed a significant amount of work on the current *financial statement attest engagement* prior to the effective date of the acquisition or other transaction. Whether a significant amount of work has been completed will depend upon the remaining procedures as compared to the overall engagement procedures.
- b. The *member* or *member's firm* expects to complete the remaining *financial statement attest* procedures and issue the attest report within a reasonable period of time. A reasonable period of time will be dependent upon facts and circumstances.
- c. *Those charged with governance* request that the *member* or *member's firm* complete the *financial statement attest engagement* despite the *member* or *member's firm* continuing to have an interest in or relationship with the new *affiliate* that will *impair independence*.
- d. The *member* or *member's firm* has evaluated the significance of the *threat* to *independence* and discussed the results with *those charged with governance*.
- e. The *member* or *member's firm* complies with the requirements of paragraph .09b-c.
- f. The *member* or *member's firm* ceases to be the auditor no later than the date that the attest report is issued.

Other Considerations When an Existing Financial Statement Attest Client or Its Affiliate Is Involved in an Acquisition or Other Transaction

.11 Objectivity. Even if all the requirements of paragraphs .06-.10 could be met, the *member* or *member's firm* should consider whether the requirements of the "Conflicts of Interest for Members in Public Practice" interpretation [1.110.010] under the "Integrity and Objectivity Rule" [1.100.001] are applicable, with regard to any circumstances identified in paragraphs .06, .07, or .10.

.12 Documentation. The *member* or *member's firm* should consider documenting the following:

- a. Any interests or relationships identified in paragraphs .07 or .10 that will not be ended by the effective date of the acquisition or other transaction and the reasons they will not be ended
- b. The *safeguards* applied, if appropriate
- c. The results of the discussion with *those charged with governance*
- d. The reasons the previous and current interests and relationships do not create a *threat* that will compromise objectivity

.13 Circumstances involving foreign network firms. A *member* should refer to paragraph .03 of "Application of the AICPA Code" [0.200.020] for guidance on circumstances involving foreign *network firms*.

Effective Date

.14 Paragraphs .01-.04 are effective for engagements covering periods beginning on or after January 1, 2014. Early implementation is allowed.

[See Revision History Table.]

Nonauthoritative questions and answers regarding the application of the independence rules to affiliates of employee benefit plans are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/faqs-application-independence-rules-affiliates-of-employee-benefit-plans.pdf>.

1.224.020 State and Local Government Client Affiliates

Applicability

.01 This interpretation applies to state and local government entities (as defined in paragraph .03d of this interpretation) that are *financial statement attest clients*.

.02 When an *interpretation* of the "Independence Rule" [1.200.001] is applied in a state or local government environment and the *interpretation* uses terminology that is not applicable in this environment, the *member* should use professional judgment to determine if there is an equivalent term. For example, certain *interpretations* use the phrase "officer, director, or owner of the *attest client*." In some state or local government environments, it may be necessary for the *member* to extend these *interpretations* to officials of the *financial statement attest client* when the official has governance responsibilities or control over financial reporting.

Terminology

.03 The following terms are defined here solely for use with this interpretation:

- a. An affiliate of a *financial statement attest client* exists in all the following situations:
 - i. The entity is included in the *financial statement attest client's financial statements* and the *member* or *member's firm* does not make reference to another auditor's report on the entity.
 - ii. The entity is included in the *financial statement attest client's financial statements*, the *member* or *member's firm* makes reference to another auditor's report on the entity, and
 - (1) the entity is material to the *financial statement attest client's financial statements* as a whole and
 - (2) the *financial statement attest client* has more than minimal influence over the entity's accounting or financial reporting process. There is a rebuttable presumption that the *financial statement attest client* has more than minimal influence over the accounting or financial reporting process of funds and blended component units.
 - iii. The entity is a material excluded entity, and the *financial statement attest client* has more than minimal influence over the entity's accounting or financial reporting process. A material excluded entity is an entity that is required under the applicable financial reporting framework to be

included in the *financial statements* of the *financial statement attest client* but is, nevertheless, excluded by the *financial statement attest client* and is material to the *financial statement attest client's financial statements* as a whole. There is a rebuttable presumption that the *financial statement attest client* has more than minimal influence over the accounting or financial reporting process of funds and blended component units.

- iv. The investor, which is either the *financial statement attest client* or an affiliate as defined in item (i) of this definition, has an investment in an investee when the investor either
 - (1) *controls* the investee, unless the investment in the investee is trivial and clearly inconsequential to the *financial statement attest client's financial statements* as a whole, or
 - (2) has *significant influence* over the investee and the investment in the investee is material to the *financial statement attest client's financial statements* as a whole.
- b. An entity is intended to be broadly defined and can include funds, component units, departments, agencies, programs, organizational units, fiduciary activities, custodial activities, employee benefit plans, and suborganizational units of the preceding entities.
- c. An investment is a security or other asset that an investor, which is either the *financial statement attest client* or an affiliate, as defined in item (ai) of this paragraph, holds primarily for the purpose of income or profit and has a present-service capacity based solely on its ability to generate cash or to be sold to generate cash. This includes investments and ownership of an equity interest in common stock accounted for using the equity method of accounting as provided for in GASB Codification Section I50. The following interests are not considered investments for purposes of this interpretation:
 - i. Interests obtained by an investor as a result of an action by a third party, such as through a bequest or a grant, and that the investor does not intend to retain and does not retain for more than a reasonable period of time given the temporary nature of the investment
 - ii. Equity interests in joint ventures, partnerships, LLCs, or other types of entities where the investor's principal purpose is to directly enhance its ability to provide governmental services
 - iii. Equity interests in component units where the investor's principal purpose is to directly enhance its ability to provide governmental services
 - iv. Interests that would otherwise be considered an entity as defined in item (b) of this paragraph
- d. State and local government entities are entities whose generally accepted accounting principles standard setter is GASB. Examples of state and local government entities include general purpose governments and special purpose governments. Examples of general purpose governments include states, counties, cities,

towns, villages, and Indian tribes. Examples of special purpose governments include cemetery districts, school districts, universities and colleges, utilities, hospitals or other health care organizations, public airports, public housing authorities, financing authorities, public transportation systems, public employee retirement systems (PERs), post-employment benefit plans, pension plans, public-entity risk pools, external investment pools, state tuition programs, and other special districts.

Interpretation

.04 *Financial interests* in, and other relationships with, affiliates of a *financial statement attest client* may create *threats* to a *member's* compliance with the "Independence Rule."

.05 *Members* should apply the "Independence Rule" and related *interpretations* applicable to a *financial statement attest client* to their affiliates except as provided for in paragraph .07 of this interpretation.

.06 However, if the *member* encounters circumstances or relationships that may create *threats* to *independence*, the *member* should apply the "Conceptual Framework for Independence" [1.210.010] to evaluate whether *threats* are at an *acceptable level*. Examples of such circumstances or relationships could include the following:

- a. A *covered member's* immediate family member is in a *key position* with a nonaffiliate that includes the *financial statement attest client* in its *financial statements* and the nonaffiliate provides accounting staff, shares financial information systems, or establishes internal controls over financial reporting for the *financial statement attest client*.
- b. The *member* or *member's firm* is considering providing financial information system design services to a nonaffiliate in which the same financial information system would also be used by the *financial statement attest client*.
- c. A *covered member* has a *financial interest* in a nonaffiliate that includes the *financial statement attest client* in its *financial statements*, and the nonaffiliate prepares the *financial statements* for the *financial statement attest client*.
- d. The *financial statement attest client* participates in a public-private partnership or joint venture that does not meet the definition of an investment in paragraph .03c of this interpretation. A *covered member* has a *financial interest* in an organization that is also involved with the public-private partnership or joint venture.
- e. A *covered member* owns utility bonds issued by a nonaffiliate, and the *financial statement attest client* is responsible for payment of the utility bond debt service.
- f. A *covered member* owns conduit debt issued by the *financial statement attest client* on behalf of a nonaffiliate. The conduit debt is not accounted for on the *financial statements* of the *financial statement attest client*, and the debt service is paid by the nonaffiliate.

Exception

.07 The *member* and *member's firm* may provide prohibited nonattest services to entities described under items (a_{ii}) and (a_{iii}) of paragraph .03 during the *period of the professional engagement* or during the period covered by the

financial statements provided that it is reasonable to conclude that the services do not create a self-review *threat* with respect to the *financial statement attest client* because the results of the nonattest services will not be subject to the *covered member's* financial statement attest procedures. For any other *threats* created by the provision of the nonattest services that are not at an *acceptable level* (in particular, those relating to management participation), the *member* should apply *safeguards* to eliminate or reduce the *threats* to an *acceptable level*.

Best Efforts

.08 A *member* must expend best efforts to obtain the information necessary to identify affiliates of a *financial statement attest client*. If, after expending best efforts, a *member* is unable to obtain the information to determine which entities are affiliates of a *financial statement attest client*, *threats* would be at an *acceptable level* and *independence* would not be *impaired* if the *member*

- a. discusses the matter, including the potential impact on *independence*, with *those charged with governance*;
- b. documents the results of that discussion and the efforts taken to obtain the information; and
- c. obtains written assurance from the *financial statement attest client* that it is unable to provide the *member* with the information necessary to identify the affiliates of the *financial statement attest client*.

More Than Minimal Influence Over Accounting and Financial Reporting Process

.09 The overall facts and circumstances should be considered when evaluating the level of influence the *financial statement attest client* has over the accounting or financial reporting process of an entity in the *financial statement attest client's financial statements*. The targeted analysis is applied solely to the accounting and financial reporting process of the entity as opposed to the analysis of what entities are included in the *financial statement attest client's financial statements*. Factors such as the following may assist *members* with this evaluation:

- a. The extent of involvement the *financial statement attest client* has in preparing the *financial statements* of the entity
- b. The extent of operational control the *financial statement attest client* has over the entity
- c. The extent to which both the *financial statement attest client* and the entity have the same
 - i. accounting or finance staff;
 - ii. accounting systems; and
 - iii. internal control over financial reporting systems
- d. The extent to which the *financial statement attest client*
 - i. can direct the behaviors or actions of the governing board of the entity;
 - ii. can add or remove members of the governing board of the entity;
 - iii. issues or pays for the entity's debt;
 - iv. finances the entity's deficits; and
 - v. uses or takes the entity's financial resources

.10 Whereas some factors may indicate influence, others may indicate little to no influence. Some factors may be weighted differently depending on the circumstances and the subject matter of any potential impairment. *Members* should take a substantive approach to evaluating the factors (for example, the *financial statement attest client* exercises a right) rather than merely considering form (for example, the *financial statement attest client* has a right that is not exercised). The consideration of these factors will require the *member* to exercise professional judgment when determining whether more than minimal influence exists.

Material to the Financial Statement Attest Client's Financial Statements as a Whole

.11 Determination of materiality is a matter of professional judgment. *Members* should consider both quantitative and qualitative factors when determining whether an entity or investment is material to a *financial statement attest client's financial statements* as a whole. For purposes of this interpretation, materiality is intended to be applied at the level of the *financial statement attest client's financial statements*, rather than individual opinion units in circumstances in which there may be more than one opinion unit.

[See Revision History Table.]

A nonauthoritative implementation guide to help understand which entities are affiliates of state and local government financial statement attest clients is available at <https://us.aicpa.org/content/dam/aicpa/interestareas/professionalethics/resources/downloadabledocuments/toolkitsandaids/implementation-guide-state-and-local-government-client-affiliates.pdf>. Additional related nonauthoritative tools include an excel template <https://us.aicpa.org/content/dam/aicpa/interestareas/professionalethics/resources/downloadabledocuments/toolkitsandaids/interactive-slg-affiliate-matrix.xlsx> and two survey tools at <https://www.surveymonkey.co.uk/r/Entityaffiliateevaluator> and <https://www.surveymonkey.co.uk/r/Investmentaffiliateevaluator>.

1.226 Reissued Reports

1.226.010 Consenting to the Use of a Previously Issued Report

.01 A *member* or *member's firm* who was in compliance with the "Independence Rule" [1.200.001] when initially issuing a report may reissue the previously issued report or consent to, or acknowledge the inclusion or incorporation by reference of, the report when the *member* or *member's firm's independence* is *impaired*, provided that the *member* or *member's firm* does not perform procedures that require updating the date or dual dating the report.

.02 In order to consent to, or acknowledge the inclusion or incorporation by reference of, a previously issued report, the *member* or *member's firm* may perform procedures required by applicable professional standards when the *member's* or *member's firm's independence* is *impaired*. Such procedures include making inquiries of successor auditors, reading the subsequent *financial statements*, or other procedures that the *member* believes are necessary to assess the effect of subsequently discovered facts on the *financial statements*.

covered by the previously issued report. [Prior reference: paragraphs .200–.201 of ET section 191]

1.228 Engagement Contractual Terms

1.228.010 Indemnification of a Covered Member

.01 *Threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* and a *covered member's independence* would not be *impaired* if the *covered member* includes in engagement letters a clause that provides that its *attest client* would release, indemnify, defend, and hold the *covered member* (and the *covered member's partners*, heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management. [Prior reference: paragraphs .188–.189 of ET section 191]

.02 Refer to the "Indemnification and Limitation of Liability Provisions" interpretation [1.400.060] of the "Acts Discreditable Rule" [1.400.001].

1.228.020 Indemnification of an Attest Client

.01 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if the *covered member* enters into an agreement providing, among other things, that the *covered member* indemnifies the *attest client* for damages, losses, or costs arising from lawsuits, claims, or settlements that relate, directly or indirectly, to the *attest client's* acts. The *covered member's independence* would be *impaired* under these circumstances. [Prior reference: paragraphs .204–.205 of ET section 191]

1.228.030 Alternative Dispute Resolution

.01 A *covered member* may include in an engagement letter a provision to use alternative dispute resolution (ADR) techniques to resolve disputes relating to past services (in lieu of litigation). *Threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* and *independence* would not be *impaired* because the *covered member* and *attest client* would not be in positions of material adverse interests due to threatened or actual litigation.

.02 The *covered member* should exercise professional judgment when rendering current services, regardless of the existence of the provision. [Prior reference: paragraphs .190–.191 of ET section 191]

.03 If ADR techniques are initiated to resolve a dispute with the *attest client*, *threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* when the ADR techniques are designed to facilitate negotiation, and the conduct of those negotiations does not place the *covered member* and the *attest client* in positions of material adverse interests. *Independence* would not be *impaired* under these circumstances. If, however, the ADR proceedings are sufficiently similar to litigation (as in the case of binding arbitration), an adverse interest *threat* may exist and place the *covered member* and the *attest client* in a position of material adverse interests. Under such circumstances, the *member* should apply the guidance under the "Actual or

Threatened Litigation" interpretation [1.290.010] of the "Independence Rule." [Prior reference: paragraphs .192–.193 of ET section 191]

1.230 Fees

A nonauthoritative question and answer regarding *pro bono* and below cost fees is available in the Ethics FAQ at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.230.010 Unpaid Fees

.01 The existence of unpaid fees to a *covered member* for *professional services* previously rendered to an *attest client* may create self-interest or undue influence *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001]. Unpaid fees include fees that are unbilled or a note receivable arising from such fees.

.02 Factors to consider when evaluating whether *threats* are at an *acceptable level* include the following:

- a. The significance of the unpaid fees to the *covered member*
- b. The length of time the fees have been due from the *attest client*
- c. The *attest client's* agreement to pay the unpaid fees
- d. The *covered member's* assessment of factors affecting the ability of the *attest client* to pay the fees

.03 *Threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] are at an *acceptable level* if, when the current-year attest report is issued, unpaid fees are both clearly insignificant to the *covered member* and relate to *professional services* provided less than one year prior to the date of the current-year attest report. Alternatively, *threats* would not be at an *acceptable level* if, when the current-year attest report is issued, unpaid fees are both significant to the *covered member* and relate to *professional services* provided more than one year prior to the issue date of the current-year attest report. Other situations may require judgment to assess whether there are *threats* to the *covered member's* compliance with the "Independence Rule."

.04 If the *covered member* concludes that *threats* are not at an *acceptable level*, then the *covered member* should apply safeguards to eliminate the threats or reduce them to an acceptable level. Application of more than one safeguard may be required to eliminate or reduce threats to an acceptable level. If safeguards are not available or cannot be applied to eliminate or reduce the threats to an acceptable level, then independence would be impaired. Examples of actions that might be safeguards include the following:

- a. Have an appropriate reviewer who has not provided attest or nonattest services to the *attest client* review the attest work performed before the current-year attest report is issued.
- b. Obtain partial payment of the unpaid fees balance before the current-year attest report is issued such that the remaining unpaid balance is insignificant to the *covered member*.
- c. Obtain an agreement from the *attest client* to a payment schedule before the current-year attest report is issued.
- d. Suspend further work on current attest engagements and not accept new engagements with this *attest client*.

.05 Communication with those charged with governance regarding evaluation of the unpaid fees and safeguards applied is not a sufficient safeguard when applied alone; however, it may be considered a safeguard when supplemented by other safeguard(s), such as those noted in paragraph .04a–d.

.06 This interpretation does not apply to unpaid fees from an *attest client* in bankruptcy. [Prior reference: paragraphs .103–.104 of ET section 191]

.07 Refer to the "Fees and Other Types of Remuneration" topic [1.500] for additional guidance.

[See Revision History Table.]

1.230.020 Fees and Other Types of Remuneration

.01 See the "Fees and Other Types of Remuneration" topic [1.500] for guidance on contingent fees, commissions, and referral fees. [No prior reference: new content]

Effective Date

.02 Effective December 15, 2014.

1.240 Financial Interests

1.240.010 Overview of Financial Interests

.01 If a *covered member* had or was committed to acquire any *direct financial interest* in an *attest client* during the *period of the professional engagement*, the self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*. [Prior reference: paragraphs .02A(1) and .17 of ET section 101]

.02 If a *covered member* had or was committed to acquire any *material indirect financial interest* in an *attest client* during the *period of the professional engagement*, the self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*. [Prior reference: paragraphs .02A(1) and .17 of ET section 101]

.03 If a *partner* or professional employee of the *firm*, his or her *immediate family*, or any group of such persons acting together owned more than 5 percent of an *attest client's* outstanding equity securities or other ownership interests during the *period of the professional engagement*, the self-interest *threat* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*. [Prior reference: paragraph .02B of ET section 101]

.04 Refer to the "Joint Closely Held Investments" interpretation [1.265.020] for additional guidance.

1.240.020 Unsolicited Financial Interests

.01 When a *covered member* becomes aware that he or she will receive, or has received, an *unsolicited financial interest* in an *attest client* during the

period of the professional engagement, such as through a gift or an inheritance, the self-interest *threat* would be at an *acceptable level* and *independence* would not be *impaired* if both of the following *safeguards* are met:

- a. The *covered member* disposes of the *financial interest* as soon as practicable but no later than 30 days after the *covered member* has knowledge of and obtains the right to dispose of the *financial interest*.
- b. The *covered member* does not participate on the *attest engagement team* during the period in which the *covered member* does not have the right to dispose of a material *direct financial interest* or material *indirect financial interest*. [Prior reference: paragraph .17 of ET section 101]

[See Revision History Table.]

1.240.030 *Mutual Funds*

.01 A *covered member* who owns shares in a mutual fund has a *direct financial interest* in the mutual fund. However, whether the underlying investments in the mutual fund are considered to be the *covered member's direct financial interests* or *indirect financial interests* depends on the proportion of the mutual fund's outstanding shares that the *covered member* owns and whether the mutual fund is diversified.

.02 If a *covered member* owns 5 percent or less of the outstanding shares of a diversified mutual fund, the underlying investments would be considered immaterial *indirect financial interests*. Accordingly, the self-interest *threat* would be at an *acceptable level*, and *independence* would not be *impaired*. To determine if the mutual fund is diversified, the *covered member* should consider referring to (a) the mutual fund's prospectus for disclosure regarding fund management's determination regarding diversification and (b) Section 5(b)(1) of the Investment Company Act of 1940.

.03 If a *covered member* owns more than 5 percent of a diversified mutual fund's outstanding shares, or if a *covered member* owns a *financial interest* in a nondiversified mutual fund, the *covered member* should evaluate the mutual fund's underlying investments to determine whether the *covered member* holds a material *indirect financial interest* in any of the underlying investments.

.04 The following example illustrates how to determine if the underlying investments are material to a *covered member's* net worth. If

- a nondiversified mutual fund owns shares in client company A,
- the mutual fund's net assets are \$10 million,
- the *covered member* owns 1 percent of the outstanding shares of the mutual fund, having a value of \$100,000, and
- the mutual fund has 10 percent of its assets invested in company A,

then the *covered member's indirect financial interest* in company A is \$10,000 (\$100,000 × 10%). The *covered member* would then compare the \$10,000 *indirect financial interest* with his or her net worth, including the net worth of his or her *immediate family*, to determine if the *indirect financial interest* in company A is material. [Prior reference: paragraph .17 of ET section 101]

1.240.040 Retirement, Savings, Compensation, or Similar Plans

.01 Depending upon the facts and circumstances, *financial interests* held in a retirement, savings, compensation, or similar plan are either *direct financial interests* or *indirect financial interests*.

.02 Investments held by a retirement, savings, compensation, or similar plan sponsored by a *firm* are *direct financial interests* of the *firm*.

.03 If a *covered member* or his or her *immediate family* self-directs the investments in a retirement, savings, compensation, or similar plan or has the ability to supervise or participate in the plan's investment decisions, the *financial interests* held by the plan are *direct financial interests* of the *covered member*. For example,

- a. when a *covered member* or his or her *immediate family member* is a trustee of a retirement, savings, compensation, or similar plan or otherwise has the authority to supervise or participate in the plan's investment decisions (including through the selection of investment managers or pooled investment vehicles), the underlying investments are *direct financial interests* of the *covered member*.
- b. for self-directed or participant-directed plans (that is, the *covered member* or his or her *immediate family member* selects the underlying plan investments or selects from investment alternatives offered by the plan), the underlying investments are *direct financial interests* of the *covered member*.

.04 When the *covered member* or his or her *immediate family* do not participate in a self-directed or participant-directed plan and have no authority to supervise or participate in the plan's investment decisions, the underlying investments would be considered to be *indirect financial interests* of the *covered member*.

.05 *Financial interests* held by a defined benefit plan are not considered *financial interests* of the *covered member* unless the *covered member* or his or her *immediate family member* is a trustee of the plan or otherwise has the ability to supervise or participate in the plan's investment decisions.

.06 Allocated shares held in an employee stock ownership plan (ESOP) are considered *beneficially owned* by the *covered member*. Until the *covered member* or his or her *immediate family member* has the right to dispose of the allocated shares of the ESOP, the beneficial ownership is considered an *indirect financial interest*. Once the participant has the right to dispose of the *financial interests*, the *financial interests* are *direct financial interests* of the *covered member*.

.07 Rights to acquire equity interests, restricted stock awards, or other *share-based compensation arrangements* are considered the *direct financial interests* of the *covered member*, regardless of whether such *financial interests* are vested or exercisable.

.08 See the "Plan Is an Attest Client or Is Sponsored by an Attest Client" interpretation [1.250.010] and the "Former Employment or Association With an Attest Client" interpretation [1.277.010] of the "Independence Rule" [1.200.001] and the interpretations of the "Family Relationships With Attest Clients" subtopic [1.270] under the "Independence Rule." [Prior reference: paragraph .17 of ET section 101]

1.240.050 Partnerships

.01 When used in this interpretation, control includes situations in which the *covered member* has the ability to exercise such control, either individually or acting together with his or her *firm* or other *partners* or professional employees of his or her *firm*.

.02 The ownership of a general or limited partnership interest is considered a *direct financial interest* in the partnership.

.03 *General partner.* If the *covered member* is a general partner, the *financial interests* held by a partnership are a *covered member's direct financial interests* because the *covered member* is in a position to control the partnership or supervise or participate in the partnership's investment decisions.

.04 *Limited partner.* If the *covered member* is a limited partner, the *financial interests* held by a limited partnership are a *covered member's indirect financial interests* as long as the *covered member* does not control the partnership or supervise or participate in the partnership's investment decisions. However, if the *covered member* has the ability to replace the general partner or has the authority to supervise or participate in the partnership's investment decisions, the partnership's *financial interests* would be the *covered member's direct financial interests*.

.05 Refer to the "Client Affiliates" interpretation [1.224.010] [1.200.001] and the "Joint Closely Held Investments" interpretation [1.265.020] of the "Independence Rule" for additional guidance. [Prior reference: paragraph .17 of ET section 101]

1.240.060 Limited Liability Companies

.01 When used in this interpretation, control includes situations in which the *covered member* has the ability to exercise such control, either individually or acting together with his or her *firm* or other *partners* or professional employees of his or her *firm*.

.02 Ownership of an interest in a limited liability company (LLC) is a *direct financial interest* in the LLC.

.03 In an LLC, managing members control the LLC and have the authority to supervise or participate in the LLC's investment decisions. Accordingly, if a *covered member* is a manager of the LLC, the *financial interests* of the LLC are the *covered member's direct financial interests*. When a *covered member* is not a managing member of the LLC, the *covered member* should review the LLC's operating agreement to determine whether he or she can control the LLC or has the authority to supervise or participate in the LLC's investment decisions. In situations in which the *covered member* does not control the LLC and does not have the authority to supervise or participate in the LLC's investment decisions, the *financial interests* held by the LLC are the *covered member's indirect financial interests*. [Prior reference: paragraph .17 of ET section 101]

1.240.070 Section 529 Plans

.01 Section 529 plans are sponsored by states or higher education institutions and may be prepaid tuition plans or savings plans. An account owner establishes both types of plans for the benefit of a single beneficiary. The account owner may change the beneficiary at any time to another individual who is a relative of the previous beneficiary.

.02 *Prepaid tuition plan.* A *covered member* who is the account owner of a Section 529 prepaid tuition plan is considered to have a *direct financial*

interest in the plan. The account owner does not have any *financial interests* in the plan's underlying investments because the credits purchased represent an obligation of the state or educational institution to provide the education regardless of the plan's investment performance or the cost of the education at the future date.

.03 *Savings plan.* A *covered member* who is the account owner of a Section 529 savings plan is considered to have a *direct financial interest* in both the plan and the plan's underlying investments because the account owner elects which sponsor's Section 529 savings plan to invest in, and prior to making the investment decision, the *covered member* has access to information about the plan's investment options or funds. However, if the Section 529 savings plan does not hold *financial interests* in an *attest client* at the time of the investment but the plan subsequently invests in that *attest client*, the financial interest *threat* would be at an *acceptable level* and *independence* would not be *impaired* if the *covered member* applies both of the following *safeguards*:

- a. The *covered member* transfers the account to another sponsor's Section 529 savings plan.
- b. The *covered member* transfers the account to another account owner who is not a *covered member*.

When the transfer of the account will result in a penalty or tax that is significant to the account, the *covered member* may continue to own the account until the account can be transferred without significant penalty or tax, provided that the *covered member* does not participate on the *attest engagement team* and is not an *individual in a position to influence the attest engagement*.

.04 *Beneficiary of Section 529 account.* A *covered member* who is a beneficiary of a Section 529 account is not considered to have a *financial interest* in the plan or the plan's underlying investments because the *covered member* does not own the account or possess any of the underlying benefits of ownership. The beneficiary's only interest is to receive distributions from the account for qualified higher education expenses if and when they are authorized by the account owner.

.05 *Government or governmental entity sponsors Section 529 plan.* Before becoming engaged to perform an *attest engagement* for a government or governmental entity that sponsors a Section 529 plan, *covered members* who are account owners of a Section 529 plan should consider the guidance in the "State and Local Government Client Affiliates" interpretation [1.224.020]. [Prior reference: paragraph .17 of ET section 101]

1.245 Trusts and Estates

1.245.010 *Trustee or Executor*

.01 The designation of a *covered member* to serve as a trustee of a trust or an executor or administrator of an estate that held, or was committed to acquire, any *direct financial interest* or any material *indirect financial interest* in an *attest client* during the *period of the professional engagement* does not in itself create a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001]. [Prior reference: paragraphs .021–.022 of ET section 191]

.02 However, when the *covered member* serves as the trustee or executor during the *period of the professional engagement*, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if

- a. the *covered member* (individually or with others) has the authority to make investment decisions for the trust or estate,
- b. the trust or estate owned or was committed to acquire more than 10 percent of the *attest client's* outstanding equity securities or other ownership interests, or
- c. the value of the trust's or estate's holdings in the *attest client* exceeds 10 percent of the total assets of the trust or estate.

Accordingly, in these situations, *independence* would be *impaired*. [Prior reference: paragraph .02A(2) of ET section 101]

1.245.020 Trust Investments

.01 When used in this interpretation, control includes situations in which the *covered member* has the ability to exercise such control, either individually or acting together with his or her *firm* or other *partners* or professional employees of his or her *firm*.

.02 When a *covered member* is a grantor of a trust, including a blind trust, the trust and its underlying investments are considered to be the *covered member's direct financial interest* if any of the following rights or responsibilities exist:

- a. The *covered member* has the ability to amend or revoke the trust.
- b. The *covered member* has authority to control the trust.
- c. The *covered member* has ability to supervise or participate in the trust's investment decisions.
- d. The underlying trust investments will ultimately revert to the *covered member* as the grantor of the trust.

However, the trust and the trust's underlying investments are not considered to be *financial interests* of a *covered member* if the *covered member* is the grantor of the trust and the *covered member* does not have any of the rights or responsibilities in items a–d.

.03 When a *covered member* is only a beneficiary of a trust and does not have any of the rights or responsibilities noted in paragraph .02, the trust is considered to be the *direct financial interest* of the *covered member*, and the trust's underlying investments are considered to be *indirect financial interests* of the *covered member*. [Prior reference: paragraph .17 of ET section 101]

Effective Date

.04 This revised interpretation is effective December 15, 2014.

A nonauthoritative question and answer regarding the use of blind trusts is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.250 Participation in Employee Benefit Plans

1.250.010 Plan Is an Attest Client or Is Sponsored by an Attest Client

.01 When a *covered member* participates in an employee benefit plan that is an *attest client* or is sponsored by an *attest client*, during the *period of the*

professional engagement or during the period covered by the *financial statements*, the self-interest *threat* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level*. *Independence* with respect to the employee benefit plan and the sponsor would be *impaired* except in the following specific situations:

- a. *Governmental organization*. When a *covered member* is an employee of a governmental organization that sponsors, cosponsors, or participates with other governmental organizations in a public employee retirement plan (the plan) and the *covered member* is required by law, rule, or regulation to audit the plan, *threats to independence* would be at an *acceptable level* if all of the following *safeguards* are met:
 - i. The *covered member* is required to participate in the plan as a condition of employment.
 - ii. The plan is offered to all employees in comparable employment positions.
 - iii. The *covered member* is not associated with the plan in any capacity prohibited by the "Simultaneous Employment or Association With an Attest Client" interpretation [1.275.005] of the "Independence Rule."
 - iv. The *covered member* has no influence or control over the investment strategy, benefits, or other management activities associated with the plan.
- b. *Former employment or association with the attest client*. The requirements of paragraph .04 of the "Former Employment or Association With an Attest Client" interpretation [1.277.010] must be met. [Prior reference: paragraphs .214–.215 of ET section 191]

.02 When an *immediate family* member participates as a result of his or her employment, in an employee benefit plan that is an *attest client* or is sponsored by an *attest client*, the requirements of the "Immediate Family Member Participation in an Employee Benefit Plan That Is an Attest Client or Is Sponsored by an Attest Client (Other Than Certain Share-Based Arrangements or Nonqualified Deferred Compensation Plans)" interpretation [1.270.030] of the "Independence Rule" [1.200.001] must be met. [Prior reference: paragraph .17 of ET section 101]

1.250.020 Former Partners and Professional Employees Participation in a Firm-Sponsored Plan

.01 When *partners* and professional employees leave a *firm* and are subsequently employed by, or associated with, an *attest client* of the *firm* in a *key position*, the requirements of paragraph .02a–c of the "Subsequent Employment or Association With an Attest Client" interpretation [1.279.020] must be met to reduce the familiarity, self-interest, or management participation *threats* to an *acceptable level*. [Prior reference: paragraph .04 of ET section 101]

1.255 Depository, Brokerage, and Other Accounts

1.255.010 Depository Accounts

.01 If a *covered member* maintains checking, savings, certificates of deposit, money market, or other depository accounts (depository accounts) at a

bank or similar depository institution that is an *attest client* during the *period of the professional engagement*, a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. For specific guidance applicable to any other types of custodial accounts (for example, brokerage accounts), see the "Brokerage and Other Accounts" interpretation [1.255.020] of the "Independence Rule."

.02 When the *covered member* is a *firm*, the *threat* would be at an *acceptable level*, and *independence* would not be *impaired* if the *firm* concludes that the likelihood is remote that the bank or similar depository institution will experience financial difficulties.

.03 When the *covered member* is an individual, the *threat* would be at an *acceptable level*, and *independence* would not be *impaired* if

- a. the balance in the depository account(s) is fully insured by the appropriate state or federal government deposit insurance agencies or by any other insurer, or
- b. any uninsured amounts, in the aggregate, were not material to the *covered member's* net worth, or
- c. if uninsured amounts were considered material, any uninsured amounts, in the aggregate, are reduced to an immaterial amount no later than 30 days from the date that the uninsured amount becomes material to the *covered member's* net worth.

.04 Refer to the "Member of a Credit Union" interpretation [1.280.040] of the "Independence Rule" [1.200.001] for additional guidance. [Prior reference: paragraphs .140–.141 of ET section 191]

1.255.020 Brokerage and Other Accounts

.01 If an *attest client* in the financial services industry, such as an insurance company, an investment adviser, a broker-dealer, a bank, or similar depository institution, has custody of a *covered member's* assets other than depository accounts, including retirement plan assets, during the *period of the professional engagement*, a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. For specific guidance applicable to depository accounts held at a bank or similar depository institution, see the "Depository Accounts" interpretation [1.255.010] of the "Independence Rule."

.02 *Threats* would not be at an *acceptable level* and *independence* would be *impaired* unless the following safeguards are met

- a. The *attest client's* services were rendered under the *attest client's* normal terms, procedures, and requirements.
- b. Any *covered member's* assets subject to the risk of loss are immaterial to the *covered member's* net worth.

.03 In determining if there is a risk of loss, the *covered member* should consider losses arising from the *attest client's* insolvency, bankruptcy, or acts of fraud or other illegal acts but should not consider potential losses arising from a market decline in the value of the assets.

.04 When considering the materiality of assets subject to the risk of loss, the *covered member* should consider the following:

- a. Protection that state or federal regulators provide for the assets, such as state insurance funds

- b. Private insurance or other forms of protection that the financial services company obtains to protect its customers' assets, such as coverage by the Securities Investor Protection Corporation
- c. Protection from creditors, such as assets held in a pooled separate account or separate escrow accounts [Prior reference: paragraphs .081–.082 of ET section 191]

1.257 Insurance Products

1.257.010 Insurance Policies With No Investment Option

.01 An insurance policy obtained from a stock or mutual insurance company that does not offer the policy holder an investment option is not considered a *financial interest*.

.02 If during the *period of the professional engagement*, a *covered member* owns an insurance policy with no investment option issued by an *attest client*, a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. *Threats* would not be at an *acceptable level*, and could not be reduced to an *acceptable level* through the application of *safeguards*, if the *covered member* purchased the policy not under the normal terms, procedures, and requirements. Accordingly, *independence* would be *impaired*. [Prior reference: paragraph .17 of ET section 101]

1.257.020 Insurance Policies With Investment Options

.01 If during the *period of the professional engagement* the *covered member* owns an insurance policy with investment options issued by an *attest client*, but the *covered member* did not purchase the policy under the insurance company's normal terms, procedures, and requirements, *threats* would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.02 When a *covered member* purchases an insurance policy, under the insurance company's normal terms, procedures, and requirements, which offers an investment option that allows the *covered member* to invest part of the policy's cash value in various investment products, the policy's underlying investments are considered to be *financial interests* of the *covered member*. Accordingly, a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.03 If the *covered member* has the ability to select the policy's underlying investments or the authority to supervise or participate in the investment decisions and the *covered member* invests in an *attest client* during the *period of the professional engagement*, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired* because the investment would be considered a *direct financial interest*. For example, if the *covered member* invested the policy's cash value into a mutual fund that is an *attest client*, the investment in the mutual fund would be considered a *direct financial interest* and *independence* would be *impaired*. However, the mutual fund's underlying investments are considered to be *indirect financial interests*.

.04 Refer to the "Financial Interests" subtopic [1.240] and the "Joint Closely Held Investments" interpretation [1.265.020] of the "Independence

Rule" [1.200.001] for additional guidance. [Prior reference: paragraph .17 of ET section 101]

1.257.030 Insurer Undergoes Demutualization

.01 If a mutual insurance company begins demutualization, a *covered member* who holds an insurance policy from the insurer should apply the guidance in the "Unsolicited Financial Interests" interpretation [1.240.020] of the "Independence Rule" [1.200.001]. [Prior reference: paragraph .17 of ET section 101]

1.260 Loans, Leases, and Guarantees

1.260.010 Loans

.01 If a *covered member* has a *loan* to or from an *attest client*, any officer or director of the *attest client* with the ability to affect decision-making, or any individual with a *beneficial ownership interest* (known through reasonable inquiry) that gives the individual *significant influence* over the *attest client*, a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. *Threats* would not be at an *acceptable level* and *independence* would be *impaired* if the *loan* exists during the *period of the professional engagement*, except as provided for in the

- a. "Loans and Leases With Lending Institutions" interpretation [1.260.020] of the "Independence Rule."
- b. "Client Affiliates" interpretation [1.224.010] of the "Independence Rule."

[See Revision History Table.]

1.260.020 Loans and Leases With Lending Institutions

.01 The "Loans" interpretation [1.260.010] of the "Independence Rule" [1.200.001] provides that a self-interest *threat* would not be at an *acceptable level* and *independence* would be *impaired* if a *covered member* had a *loan* to or from an *attest client*, any officer or director of the *attest client* with the ability to affect decision-making, or any individual with a *beneficial ownership interest* (known through reasonable inquiry) that gives the individual *significant influence* over the *attest client*, except as provided for in this interpretation.

Home Mortgages, Other Secured Loans, Immaterial Unsecured Loans, and Student Loans

.02 The *loans* covered by paragraph .03 include home mortgages, other secured *loans*, unsecured *loans* that are not material to the *covered member's* net worth (that is, immaterial unsecured *loans*), and student *loans*.

.03 *Threats* would be at an *acceptable level* and *independence* would not be *impaired* if a *covered member* or his or her *immediate family* has any of the *loans* identified in paragraph .02 from a *lending institution attest client*, if all the following *safeguards* are met:

- a. The *loans* were obtained under the *lending institution's normal lending procedures, terms, and requirements*.
- b. The *loans* were obtained in one of the following ways (in determining when the *loans* were obtained, the date a commitment

or line of credit is granted must be used, rather than the date a transaction closes or funds are obtained):

- i. From the *lending institution* prior to it becoming an *attest client*
 - ii. From a *lending institution* for which *independence* was not required and that was later sold to an *attest client*
 - iii. From a *lending institution attest client* by a borrower prior to the *member* becoming a *covered member* with respect to that *attest client*
 - iv. Prior to May 31, 2002, and the requirements of the loan transition provision in <https://us.aicpa.org/content/dam/aicpa/interestareas/professionalethics/community/downloadabledocuments/transistion%20periods.pdf> are met
- c. After an individual becomes a *covered member*, any *loans* must be kept current regarding all terms, at all times, and the terms may not change in any manner not provided for in the original agreement. Examples of changed terms are a new or extended maturity date, a new interest rate or formula, revised collateral, and revised or waived covenants.
 - d. The estimated fair value of the collateral for home mortgages or other secured *loans* should equal or exceed the outstanding balance during the term of the home mortgages or other secured *loans*. If the estimated fair value of the collateral is less than the outstanding balance of the home mortgages or other secured *loans*, the portion that exceeds the estimated fair value of the collateral may not be material to the *covered member's* net worth.

Loans to Partnerships and Other Similar Entities

.04 For purposes of applying the loan provision in paragraph .03 when the *covered member* is a partner in a partnership, a *loan* to a limited partnership (or similar type of entity) or general partnership would be ascribed to each *covered member* who is a partner in the partnership on the basis of his or her legal liability as a limited or general partner if

- a. the *covered member's* interest in the limited partnership, either individually or combined with the interest of one or more *covered members*, exceeds 50 percent of the total limited partnership interest, or
- b. the *covered member*, either individually or together with one or more *covered members*, can control the general partnership.

Even if no amount of a partnership *loan* is ascribed to the *covered member(s)* previously identified, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* through the application of *safeguards* if the partnership renegotiates a loan or obtains a new *loan* that is not a permitted *loan*, as described in paragraph .05 of this interpretation. Accordingly, *independence* would be *impaired*.

Other Loans and Leases

.05 *Threats* would be at an *acceptable level* and *independence* would not be *impaired* if a *covered member* obtains one of the following types of *loans* or leases under the *lending institution's* normal *lending procedures, terms, and*

requirements, provided the *covered member* complies with the terms of the loan or lease agreement at all times (for example, keeping payments current):

- a. Automobile *loans* and leases collateralized by the automobile
- b. *Loans* fully collateralized by the cash surrender value of an insurance policy
- c. *Loans* fully collateralized by cash deposits at the same *lending institution* (for example, passbook *loans*)

.06 *Threats* would be at an *acceptable level* and *independence* would not be *impaired* if a *covered member* has consumer *loans* (for example, credit cards, retail installment *loans*, and home improvement *loans*) and overdraft reserve accounts from the same *lending institution* that have an aggregate outstanding balance of \$10,000 or less on a current basis, taking into consideration the payment due date and any available grace period.

Other Matters

.07 *Members* should consider that certain state and federal agencies may proscribe more restrictive requirements over *lending institutions* that are subject to their oversight and that, in turn, impose more restrictive requirements upon *members* that perform *attest engagements* for these *lending institutions*. For example, the SEC proscribes more restrictive requirements over *members* providing attest services to *lending institutions* and broker-dealers within their purview. [Prior reference: paragraph .07 of ET section 101 and paragraphs .150–.151 of ET section 191]

.08 *Covered members* may be subject to additional restrictions, as described in the "Depository Accounts" interpretation [1.255.010], the "Member of a Credit Union" interpretation [1.280.040], and the "Leases" interpretation [1.260.040] of the "Independence Rule" [1.200.001].

[See Revision History Table.]

1.260.030 Servicing of a Loan

.01 The self-interest *threat* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* and *independence* would not be *impaired* if a *lending institution* *attest client* services a *loan* originally extended to a *covered member* by another *lending institution*. [Prior reference: paragraphs .134–.135 of ET section 191]

1.260.040 Leases

.01 When a *covered member* enters into or has a lease with an *attest client*, self-interest, familiarity, and undue influence *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

New or Renegotiated Leases

.02 If a *covered member* who is an individual on the *attest engagement team*, an individual in a position to influence the *attest engagement*, or the *firm* enters into a lease or renegotiates terms of an existing lease with an *attest client* during the *period of the professional engagement*, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. *Independence* would be *impaired*, unless all of the following *safeguards* are met at the time of entering into or renegotiating the lease:

- a. The lease is on market terms and established at arm's length.
- b. The lease is not material to any of the parties to the lease. When evaluating materiality, all leases between the *covered member* and the *attest client* should be considered in the aggregate.

.03 Once the *covered member* enters into or renegotiates the lease, *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would not be at an acceptable level and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired* if the lease amounts are not paid in accordance with the lease terms or provisions by the due date or within any available grace periods during the *period of the professional engagement*.

Existing Leases

.04 Under the circumstances in paragraph .05, the *covered member* should evaluate the significance of any *threats* to determine whether the *threats* are at an *acceptable level*. If the *covered member* determines that *threats* are not at an *acceptable level*, the *covered member* should apply *safeguards* to eliminate or reduce the *threats* to an acceptable level. If no *safeguards* are available to eliminate or reduce *threats* to an *acceptable level*, *independence* would be *impaired*.

.05 A *covered member* who is an individual on the *attest engagement team*, an *individual in a position to influence the attest engagement*, or the *firm* has a lease with an *attest client* that was

- a. entered into or renegotiated prior to the
 - i. *period of the professional engagement*,
 - ii. *member becoming a covered member*, or
 - iii. *counterparty becoming an attest client* or an affiliate of a *financial statement attest client*, or
- b. entered into or renegotiated during the *period of the professional engagement*, in compliance with paragraph .02, but, due to a change in circumstances after the lease is entered into or renegotiated, the lease becomes material to any party to the lease during the *period of the professional engagement*.

.06 The significance of the *threats* will depend on factors such as the following:

- a. The role of the *covered member* on the *attest engagement* or with the *firm*
- b. The materiality of the lease to the *covered member* or the *attest client* during the *period of the professional engagement*
- c. Whether multiple leases exist with the *attest client* and, if so, the aggregate materiality of those leases to the *covered member* or the *attest client*
- d. The extent to which the lease will be subject to attest procedures or financial statement disclosures
- e. The duration of the lease term
- f. Whether the lease is on market terms or established at arm's length

.07 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if the lease amounts are not paid in accordance with the lease terms

or provisions by the due date or within any available grace periods during the *period of the professional engagement*.

Applicability

.08 This interpretation excludes leases addressed by paragraph .04 of the "Loans and Leases With Lending Institutions" interpretation [1.260.020] under the "Independence Rule" [1.200.001].

.09 Refer to the "Client Affiliates" interpretation [1.224.010] under the "Independence Rule" [1.200.001] for additional guidance on leases held with certain affiliates of a *financial statement attest client*. [Prior reference: paragraph .17 of ET section 101]

.10 This interpretation is effective for fiscal years beginning after December 15, 2020, with early implementation allowed.

[See Revision History Table.]

1.260.050 Association With an Entity That Has a Loan To or From an Attest Client

.01 If a *covered member* is an officer, a director, or a shareholder of an entity and the entity has a *loan* to or from an *attest client* during the *period of the professional engagement*, a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. *Threats* to compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if the *covered member* has *control* over the entity. Accordingly, *independence* would be *impaired* because the lease would be considered to be a *loan* with an *attest client*. This paragraph excludes a lending relationship that is permitted under the "Loans and Leases With Lending Institutions" interpretation [1.260.020] of the "Independence Rule."

.02 If any *partner* or professional employee of the *firm* is an officer, a director, or a shareholder of an entity and the entity has a *loan* to or from an *attest client*, *threats* to the *partner's* or professional employee's objectivity may exist. If the *partner* or professional employee is able to exercise *significant influence* over the entity but is not a *covered member* who can *control* the entity (see paragraph .01), the *partner* or professional employee should consider the "Conflicts of Interest" interpretation [1.110.010] of the "Integrity and Objectivity Rule" [1.100.001].

.03 When making the decision about whether to perform a *professional service* and in making disclosure to the appropriate parties, the *member* should consider the "Confidential Client Information Rule" [1.700.001]. [Prior reference: paragraphs .220–.221 of ET section 191]

1.265 Business Relationships

1.265.010 Cooperative Arrangements With Attest Clients

.01 If a *member* or his or her *firm* has a cooperative arrangement with an *attest client*, self-interest, familiarity, and undue influence *threats* to the *member* or his or her *firm's* compliance with the "Independence Rule" [1.200.001] may exist. *Threats* to compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if, during the *period of the professional engagement*,

the cooperative arrangement is material to the *firm* or *attest client*. Accordingly, *independence* would be *impaired*.

.02 A cooperative arrangement exists when a *member* or the *member's firm* and an *attest client* jointly participate in a business activity. However, a cooperative arrangement would not exist when all of the following *safeguards* are met:

- a. The participation of the *firm* and *attest client* are governed by separate agreements, arrangements, or understandings that do not create rights or obligations between the *firm* and *attest client*.
- b. Neither the *firm* nor the *attest client* assumes responsibility for the other's activities or results.
- c. Neither party has the authority to act as the other's representative or agent.

.03 Examples of cooperative arrangements include the following:

- a. Prime and subcontractor arrangements to provide services or products to a third party
- b. Joint ventures to develop or market products or services
- c. Arrangements to combine one or more of the *firm's* services or products with one or more of the *attest client's* services or products and market the package with references to both parties
- d. Arrangements under which the *firm* acts as a distributor or marketer of the *attest client's* products or services or the *attest client* acts as the distributor or marketer of the *firm's* products or services

.04 Refer to the "Contingent Fees Rule" [1.510.001] and the "Commissions and Referral Fees Rule" [1.520.001] for additional guidance. [Prior reference: paragraph .14 of ET section 101]

1.265.020 Joint Closely Held Investments

.01 If a *covered member* has a *joint closely held investment*, a self-interest *threat* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. *Threats* to compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if the *covered member* holds a material *joint closely held investment* during the *period of the professional engagement*. Accordingly, *independence* would be *impaired*. [Prior reference: paragraph .02A(3) of ET section 101]

.02 A *joint closely held investment* includes a joint interest in a vacation home shared by a *covered member* and an *attest client* (or one of the client's officers or directors, or any owner who has the ability to exercise significant influence over the *attest client*), if the *covered member* and *attest client* (or one of the client's officers or directors or any owner who has the ability to exercise significant influence over the *attest client*) control the investment and the vacation home is material to the *covered member*. Such is the case even if the vacation home is solely intended for the personal use of the owners. [Prior reference: paragraphs .184–.185 of ET section 191]

1.270 Family Relationships With Attest Clients

1.270.010 Immediate Family Members

.01 The *immediate family* of a *covered member* must comply with the "Independence Rule" [1.200.001] and its *interpretations*, except as permitted in the following interpretations:

- a. "Immediate Family Member Is Employed by the Attest Client" [1.270.020]
- b. "Immediate Family Member Participation in an Employee Benefit Plan That Is an Attest Client or Is Sponsored by an Attest Client (Other Than Certain Share-Based Arrangements or Nonqualified Deferred Compensation Plans)" [1.270.030]
- c. "Immediate Family Member Participation in an Employee Benefit Plan With Financial Interests in an Attest Client" [1.270.040]
- d. "Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Beneficially Owned Financial Interests in Attest Clients" [1.270.050]
- e. "Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Rights to Acquire Shares in an Attest Client" [1.270.060]
- f. "Immediate Family Member Participation in Share-Based Compensation Arrangements Based Upon Stock Appreciation" [1.270.070]
- g. "Immediate Family Member Participation in a Nonqualified Deferred Compensation Plan" [1.270.080]

.02 Notwithstanding any exceptions provided for in paragraph .01, the ownership interests of a *covered member's immediate family* may not exceed those specified in paragraph .03 of the "Overview of Financial Interests" interpretation [1.240.010] of the "Independence Rule" [1.200.001].

.03 When materiality of a *financial interest* or a *loan* is identified as a factor affecting *independence* in the *interpretations* of the "Independence Rule" [1.200.001], interests of the *immediate family* member and the *covered member* should be combined to determine materiality to the *covered member*. [Prior reference: paragraph .02 of ET section 101]

[See Revision History Table.]

A nonauthoritative white paper, *Independence Rules Modernization Project*, provides some discussion on changes made to the independence provisions that are applicable to close relatives. The white paper is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/independencemodernizationwhitepaper.doc>.

A nonauthoritative basis-for-conclusions document summarizing considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.020 Immediate Family Member Is Employed by the Attest Client

.01 When an individual in a *covered member's immediate family* is employed by an *attest client*, management participation, familiarity, and self-interest *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If a *covered member's immediate family* is employed by an *attest client* but is not in a *key position*, *threats* would be at an *acceptable level* and *independence* would not be *impaired*.

.03 If a *covered member's immediate family* is in a *key position* with an *attest client* during the period covered by the *financial statements* or during the *period of the professional engagement*, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

Grandfathered Employment Relationships

.04 For information about grandfathered employment relationships for immediate family members, refer to <https://us.aicpa.org/interestareas/professionalethics/community/downloadabledocuments/transistion%20periods.pdf>. [Prior reference: paragraph .02 of ET section 101]

A nonauthoritative white paper, *Independence Rules Modernization Project*, provides some discussion on changes made to the independence provisions that are applicable to close relatives. The white paper is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/independencemodernizationwhitepaper.doc>.

A nonauthoritative basis-for-conclusions document summarizing considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.030 Immediate Family Member Participation in an Employee Benefit Plan That Is an Attest Client or Is Sponsored by an Attest Client (Other Than Certain Share-Based Arrangements or Nonqualified Deferred Compensation Plans)

.01 If during the period covered by the *financial statements* or during the *period of the professional engagement*, an *immediate family member* of a *covered member* participates in an employee benefit plan (plan) that is an *attest client* or is sponsored by an *attest client* (other than an *attest client's share-based compensation arrangement* and nonqualified deferred compensation plan), *threats* would be at an *acceptable level* and *independence* would not be *impaired* if all of the following *safeguards* were met:

- a. The *immediate family member* does not serve in a *key position* for the *attest client*, as discussed in the "Immediate Family Member Is Employed by the Attest Client" interpretation [1.270.020] of the "Independence Rule" [1.200.001].

- b. The plan is offered to all employees in comparable employment positions.
- c. The *immediate family* member does not serve in a position of governance (for example, board of trustees) for the plan.
- d. The *immediate family* member does not have the ability to supervise or participate in the plan's investment decisions or in the selection of the investment options made available to plan participants. [Prior reference: paragraph .02 of ET section 101]

.02 *Share-based compensation arrangements* and nonqualified deferred compensation plans are discussed in the following interpretations:

- a. "Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Beneficially Owned Financial Interests in Attest Clients" interpretation [1.270.050] of the "Independence Rule" [1.200.001]
- b. "Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Rights to Acquire Shares in an Attest Client" interpretation [1.270.060] of the "Independence Rule"
- c. "Immediate Family Member Participation in Share-Based Compensation Arrangements Based Upon Stock Appreciation" interpretation [1.270.070] of the "Independence Rule"
- d. "Immediate Family Member Participation in a Nonqualified Deferred Compensation Plan" interpretation [1.270.080] of the "Independence Rule"

A nonauthoritative basis-for-conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.040 Immediate Family Member Participation in an Employee Benefit Plan With Financial Interests in an Attest Client

.01 If during the *period of the professional engagement*, an *immediate family* member of a *covered member* is employed at a nonclient or employed in a non-key position at an *attest client*, the *immediate family* member may hold a *direct financial interest* or material *indirect financial interest* in an *attest client* through participation in an employee benefit plan if *threats* are at an *acceptable level*. *Threats* would be at an *acceptable level*, and *independence* would not be *impaired*, if all of the following *safeguards* were met:

- a. The *covered member* neither participates on the *attest engagement team* nor is an *individual in a position to influence the attest engagement*.
- b. Such investment is an unavoidable consequence of such participation. Unavoidable consequence means that the *immediate family* member has no other investment options available for selection, including money market or invested cash options, except for selecting an investment option in an *attest client*.
- c. In the event that a plan provides an option that permits the *immediate family* member to invest in a nonattest client or a nonclient investment option that becomes available, the *immediate family*

member is required to select the investment option in the non-client or nonattest *client* and dispose of *financial interests* in the *attest client* as soon as practicable but no later than 30 days after such option becomes available. When legal or other similar restrictions exist on an *immediate family* member's right to dispose of a *financial interest* at a particular time, the *immediate family* member need not dispose of the interest until the restrictions have lapsed. For example, an *immediate family* member is not required to dispose of a *financial interest* in an *attest client* if doing so would violate an employer's policies on insider trading. On the other hand, waiting for more advantageous market conditions to dispose of the interest would not fall within this exception. [Prior reference: paragraph .02 of ET section 101]

This paragraph excludes participation in *share-based compensation arrangements* and nonqualified deferred compensation arrangements (see paragraph .02).

.02 *Share-based compensation arrangements* and nonqualified deferred compensation plans are discussed in the following interpretations:

- a. "Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Beneficially Owned Financial Interests in Attest Clients" interpretation [1.270.050] of the "Independence Rule" [1.200.001]
- b. "Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Rights to Acquire Shares in an Attest Client" interpretation [1.270.060] of the "Independence Rule"
- c. "Immediate Family Member Participation in Share-Based Compensation Arrangements Based Upon Stock Appreciation" interpretation [1.270.070] of the "Independence Rule"
- d. "Immediate Family Member Participation in a Nonqualified Deferred Compensation Plan" interpretation [1.270.080] of the "Independence Rule"

A nonauthoritative basis-for-conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.050 Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Beneficially Owned Financial Interests in Attest Clients

.01 If during the *period of the professional engagement*, an *immediate family* member of a *covered member* participates in a *share-based compensation arrangement* of an *attest client*, such as an ESOP, that results in the *immediate family* member holding a *financial interest* in an *attest client* that is *beneficially owned*, *threats* are at an *acceptable level* and *independence* would not be *impaired* if all of the following *safeguards* were met:

- a. The *immediate family* member does not serve in a *key position* for the *attest client*, as discussed in the "Immediate Family Member Is Employed by the Attest Client" interpretation [1.270.020] of the "Independence Rule" [1.200.001].
- b. The *covered member* neither participates on the *attest engagement team* nor is an *individual in a position to influence the attest engagement*.
- c. The *immediate family* member does not serve as a trustee for the *share-based compensation arrangement* and does not have the ability to supervise or participate in the selection of any investment options made available to plan participants.
- d. When the *financial interests* that are *beneficially owned* are distributed or the *immediate family* member has the right to dispose of the *financial interests*, the *immediate family* member is required to do one of the following:
 - i. Dispose of the *financial interests* as soon as practicable but no later than 30 days after he or she has the right to dispose of the *financial interests*.
 - ii. Exercise his or her put option to require the employer to repurchase the *financial interests* as soon as permitted by the terms of the *share-based compensation arrangement*. In addition, any repurchase obligation due to the *immediate family* member arising from exercise of the option that is outstanding for more than 30 days needs to be immaterial to the *covered member* during the payout period. When legal or other similar restrictions exist on an *immediate family* member's right to dispose of a *financial interest* at a particular time, the *immediate family* member need not dispose of the interest until the restrictions have lapsed. For example, an *immediate family* member does not have to dispose of a *financial interest* in an *attest client* if doing so would violate an employer's policies on insider trading. On the other hand, waiting for more advantageous market conditions to dispose of the interest does not qualify for this exception.
- e. Benefits payable from the *share-based compensation arrangement* to the *immediate family* member upon termination of employment, whether through retirement, death, disability, or voluntary or involuntary termination, are funded by investment options other than the employer's *financial interests*, and any unfunded benefits payable are immaterial to the *covered member* at all times during the payout period. [Prior reference: paragraph .02 of ET section 101]

A nonauthoritative basis-for-conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.060 Immediate Family Member Participation in Share-Based Compensation Arrangements Resulting in Rights to Acquire Shares in an Attest Client

.01 If during the *period of the professional engagement* an *immediate family member of a covered member* participates in a *share-based compensation arrangement* resulting in a right to acquire shares in an *attest client*, such as an ESOP or restricted stock rights plan, *threats* are at an *acceptable level* and *independence* would not be *impaired* if all of the following *safeguards* were met:

- a. The *immediate family member* does not serve in a *key position* for the *attest client*, as discussed in the "Immediate Family Member Is Employed by the Attest Client" interpretation [1.270.020] of the "Independence Rule" [1.200.001].
- b. The *covered member* neither participates on the *attest engagement team* nor is an *individual in a position to influence the attest engagement*.
- c. The *immediate family member* exercises or forfeits these rights once he or she is vested, and the closing market price of the underlying stock equals or exceeds the exercise price for 10 consecutive days (market period). The exercise or forfeiture should occur as soon as practicable but no later than 30 days after the end of the market period. In addition, if the *immediate family member* exercises his or her right to acquire shares in the *attest client*, he or she should dispose of the shares as soon as practicable but no later than 30 days after the exercise date. Also, note the following:
 - i. When legal or other similar restrictions exist on an *immediate family member's* right to dispose of a *financial interest* at a particular time, the *immediate family member* need not dispose of the interest until the restrictions have lapsed. For example, an *immediate family member* does not have to dispose of a *financial interest* in an *attest client* if doing so would violate an employer's policies on insider trading. On the other hand, waiting for more advantageous market conditions to dispose of the interest would not qualify for this exception.
 - ii. If the employer repurchases the shares, any employer repurchase obligation due to the *immediate family member* that is outstanding for more than 30 days needs to be immaterial to the *covered member* during the payout period.

.02 Refer to paragraph .06 of the "Retirement, Savings, Compensation, or Similar Plans" interpretation [1.240.040] of the "Independence Rule" [1.200.001] for additional guidance. [Prior reference: paragraph .02 of ET section 101]

A nonauthoritative basis-for-conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.070 Immediate Family Member Participation in Share-Based Compensation Arrangements Based Upon Stock Appreciation

.01 If during the *period of the professional engagement* an *immediate family member* of a *covered member* participates in a *share-based compensation arrangement* based on the appreciation of an *attest client's* underlying shares, such as a stock appreciation plan or phantom stock plan, *threats* are at an *acceptable level* and *independence* would not be impaired if all of the following *safeguards* were met:

- a. The *immediate family member* does not serve in a *key position* for the *attest client*, as discussed in the "Immediate Family Member Is Employed by the Attest Client" interpretation [1.270.020] of the "Independence Rule" [1.200.001].
- b. The *share-based compensation arrangement* does not provide for the issuance of rights to acquire the employer's *financial interests*.
- c. The *covered member* neither participates on the *attest engagement team* nor is an *individual in a position to influence the attest engagement*.
- d. The *immediate family member* exercises or forfeits these rights once he or she is vested, if the underlying price of the employer's shares equals or exceeds the exercise price for 10 consecutive days (market period). Exercise or forfeiture should occur as soon as practicable but no later than 30 days after the end of the market period.
- e. Any resulting compensation payable to the *immediate family member* that is outstanding for more than 30 days is immaterial to the *covered member* during the payout period. [Prior reference: paragraph .02 of ET section 101]

A nonauthoritative basis-for-conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.080 Immediate Family Member Participation in a Nonqualified Deferred Compensation Plan

.01 If during the *period of the professional engagement* an *immediate family member* of a *covered member* participates in a nonqualified deferred compensation plan of an *attest client* as a result of his or her employment, *threats* are at an *acceptable level* and *independence* would not be impaired if all of the following *safeguards* were met:

- a. The *immediate family member* does not serve in a *key position* for the *attest client*, as discussed in the "Immediate Family Member Is Employed by the Attest Client" interpretation [1.270.020] of the "Independence Rule" [1.200.001].
- b. The *covered member* neither participates on the *attest engagement team* nor is an *individual in a position to influence the attest engagement*.

- c. The amount of the deferred compensation payable to the *immediate family* member is funded through life insurance, an annuity, a trust, or similar vehicle, and any unfunded portion is immaterial to the *covered member*.
- d. Any funding of the deferred compensation does not include *financial interests* in the *attest client*. [Prior reference: paragraph .02 of ET section 101]

A nonauthoritative basis-for-conclusions document summarizing considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsimmediatefamilymember6-1-10final.doc>.

1.270.100 Close Relatives

.01 When a *close relative* of a *covered member* is employed by an *attest client* or has *financial interests* in an *attest client*, management participation, familiarity, and self-interest *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if an individual participating on the *attest engagement team* has a *close relative* who has either of the following:

- a. A *key position* with the *attest client* during the period covered by the *financial statements* or during the *period of the professional engagement*.
- b. A *financial interest* in the *attest client* during the *period of the professional engagement* that
 - i. the individual knows or has reason to believe was material to the *close relative* or
 - ii. enabled the *close relative* to exercise *significant influence* over the *attest client*.

.03 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* and *independence* will be *impaired* if an *individual in a position to influence the attest engagement* or any *partner* or *partner equivalent* in the *office* in which the lead *attest engagement partner* or *partner equivalent* primarily practices in connection with the *attest engagement* has a *close relative* who has either of the following:

- a. A *key position* with the *attest client* during the period covered by the *financial statements* or during the *period of the professional engagement*.
- b. A *financial interest* in the *attest client* during the *period of the professional engagement* that
 - i. the individual, *partner*, or *partner equivalent* knows or has reason to believe was material to the *close relative* and
 - ii. enabled the *close relative* to exercise *significant influence* over the *attest client*.

Grandfathered Employment Relationships

.04 For information about grandfathered employment relationships for close relatives, refer to <https://us.aicpa.org/interestareas/professionalethics/community/downloadabledocuments/transistion%20periods.pdf>. [Prior reference: paragraph .02 of ET section 101]

Effective Date

.05 The addition of partner equivalents to paragraph .03 is effective for engagements covering periods beginning on or after December 15, 2014.

A nonauthoritative white paper, *Independence Rules Modernization Project*, provides some discussion about changes made to the independence provisions that are applicable to close relatives. The white paper is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/independencemodernizationwhitepaper.doc>.

1.275 Current Employment or Association With an Attest Client

1.275.005 Simultaneous Employment or Association With an Attest Client

.01 In this interpretation, simultaneous employment or association with an *attest client* is serving as a director, an officer, an employee, a promoter, an underwriter, a voting trustee, a trustee for any pension or profit-sharing trust of the *attest client*, or in any capacity equivalent to that of a member of management of an *attest client* during the period covered by the *financial statements* or the *period of the professional engagement*.

.02 If a *partner* or professional employee of the *member's firm* is simultaneously employed or associated with an *attest client*, familiarity, management participation, advocacy, or self-review *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*. [Prior reference: paragraph .02C of ET section 101]

.03 However, *threats* will be at an *acceptable level* and *independence* will not be *impaired* when either of the following situations exists:

- a. A *partner* or professional employee of a *firm* serves as an adjunct faculty member of an educational institution that is an *attest client* of the *firm* and the *partner* or professional employee meets all of the following *safeguards*:
 - i. Does not hold a *key position* at the educational institution
 - ii. Does not participate on the *attest engagement team*
 - iii. Is not an *individual in a position to influence the attest engagement*
 - iv. Is employed by the educational institution on a part-time and non-tenure basis
 - v. Does not participate in any employee benefit plans sponsored by the educational institution, unless participation is required

- vi. Does not assume any management responsibilities or set policies for the educational institution

Upon termination of employment, the *partner* or professional employee should comply with the requirements of the "Former Employment or Association With an Attest Client" interpretation [1.277.010] of the "Independence Rule" [1.200.001]. [Prior reference: paragraph .21 of ET section 101]

- b. A *member* in a government audit organization performs an *attest engagement* with respect to the government entity and the head of the government audit organization meets at least one of the following:
 - i. Is directly elected by voters of the government entity with respect to which *attest engagements* are performed
 - ii. Is appointed by a legislative body and is subject to removal by a legislative body
 - iii. Is appointed by someone other than the legislative body, as long as the appointment is confirmed by the legislative body and removal is subject to oversight or approval by the legislative body

.04 *Members* that are simultaneously employed or associated with an *attest client* should consider their obligations as a *member in business* under part 2 of the code. [No prior reference: new content]

Effective Date

.05 Paragraph .04 of this interpretation is effective December 15, 2014.

A nonauthoritative question and answer regarding independent contractors retained by the firm who are simultaneously employed or associated with an attest client is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

[See Revision History Table.]

1.275.007 Staff Augmentation Arrangements

.01 In this interpretation, staff augmentation arrangements involve lending *firm* personnel (augmented staff) to an *attest client* whereby the attest client is responsible for the direction and supervision of the activities performed by the augmented staff. Under such arrangements, the *firm* bills the *attest client* for the activities performed by the augmented staff but does not direct or supervise the actual performance of the activities.

.02 If a *partner* or professional employee of the *member's firm* serves as augmented staff for an *attest client*, familiarity, management participation, advocacy, or self-review *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist. *Threats* would not be at an *acceptable level* and *independence* would be impaired unless all the following *safeguards* are met:

- a. The staff augmentation arrangement is being performed due to an unexpected situation that would create a significant hardship for the *attest client* to make other arrangements.

- b. The augmented staff arrangement is not expected to reoccur.
- c. The augmented staff arrangement is performed for only a short period of time. There is a rebuttable presumption that a short period of time would not exceed 30 days.
- d. The augmented staff neither participates in, nor is in a position to influence, an *attest engagement* covering any period that includes the staff augmentation arrangement.
- e. The augmented staff performs only activities that would not be prohibited by the "Nonattest Services" subtopic [1.295] of the "Independence Rule" [1.200.001].
- f. The *member* is satisfied that management of the *attest client* designates an individual or individuals who possess suitable skill, knowledge, and experience, preferably within senior management, to be responsible for
 - i. determining the nature and scope of the activities to be provided by the augmented staff;
 - ii. supervising and overseeing the activities performed by the augmented staff; and
 - iii. evaluating the adequacy of the activities performed by the augmented staff and the findings resulting from the activities.

.03 Refer to the "Agreed-Upon Procedure Engagements Performed in Accordance With SSAEs" interpretation [1.297.020] and paragraph .02*f* of the "Client Affiliates" interpretation [1.224.010] of the "Independence Rule" [1.200.001] for additional guidance.

Effective Date

.04 This interpretation is effective November 30, 2021.

[See Revision History Table.]

1.275.010 Honorary Director or Trustee of a Not-for-Profit Organization

.01 When a *partner* or professional employee of a *member's firm* is asked to lend the prestige of his or her name to a not-for-profit organization (the assumption is that the organization limits its activities to charitable, religious, or civic or other matters of a similar nature) by serving as an honorary director or trustee of the organization during the period covered by the *financial statements* or during the *period of the professional engagement*, familiarity, self-review, or management participation *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist. However, *threats* would be at an *acceptable level* and *independence* would not be *impaired* if all of the following *safeguards* are met:

- a. The position is clearly honorary and the individual holds the position in name only.
- b. The individual cannot vote or otherwise participate in board or management responsibilities.
- c. If the individual is named in letterheads and externally circulated materials, the individual is identified as an honorary director or honorary trustee. [Prior reference: paragraph .06 of ET section 101]

.02 *Members* that are simultaneously employed or associated with an *attest client* should consider their obligations as a *member in business* under part 2 of the code. [No prior reference: new content]

Effective Date

.03 Paragraph .02 of this interpretation is effective December 15, 2014.

1.275.015 Member of Advisory Board

.01 If a *partner* or professional employee of a *member's firm* serves on an advisory board of an *attest client*, familiarity, self-review, or management participation *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist. However, *threats* would be at an *acceptable level* and *independence* would not be *impaired* if all of the following *safeguards* are met:

- a. The responsibilities of the advisory board are in fact advisory in nature.
- b. The advisory board has no authority to make nor does it appear to make management decisions on behalf of the *attest client*.
- c. The advisory board and those having authority to make management decisions, including the board of directors or its equivalent, are distinct groups with minimal, if any, common membership. [Prior reference: paragraphs .144–.145 of ET section 191]

.02 *Members* in such positions should consider their obligations as *members in business* under part 2 of the code. [No prior reference: new content]

Effective Date

.03 Paragraph .02 of this interpretation is effective December 15, 2014.

1.275.020 Member of Governmental Advisory Committee

.01 If a *partner* or professional employee of the *firm* serves on a citizens' advisory committee that is studying possible changes in the form of a county government that is an *attest client* of the *member's firm*, familiarity, self-review, or management participation *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist. However, *threats* would be at an *acceptable level* and *independence* would not be *impaired* with respect to the county.

.02 If a *partner* or professional employee of the *firm* serves on an advisory committee appointed to study the financial status of the state in which the county is located, *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level*. Accordingly, *independence* would not be *impaired* with respect to the county. [Prior reference: paragraphs .039–.040 of ET section 191]

.03 *Members* in such positions should consider their obligations as *members in business* under part 2 of the code. [No prior reference: new content]

Effective Date

.04 Paragraph .03 of this interpretation is effective December 15, 2014.

1.275.025 Individual in a Campaign Treasurer or Similar Financial Position

.01 For purposes of this interpretation, a campaign treasurer would also include individuals with similar financial responsibilities as a campaign treasurer. While other campaign positions may result in *threats* to compliance with the "Independence Rule" [1.200.001], such positions are not covered by this interpretation. Accordingly, *members* should consult the Conceptual Framework for Independence [1.210.010] if *partners* or professional employees serve in campaign positions not specifically addressed by this interpretation.

Campaign Organization Is Attest Client

.02 If during the *period of the professional engagement* or during the period covered by the *financial statements*, a *partner* or professional employee of a *member's firm* serves as a campaign treasurer and the campaign organization is an *attest client*, the management participation *threat* to the *member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

Candidate Running for Election of a Governmental Entity That Is an Attest Client

.03 If, during the *period of the professional engagement* or during the period covered by the *financial statements*, a *partner* or professional employee serves as a campaign treasurer for either (a) an elected official of a governmental entity that is an *attest client*, or (b) for a candidate who is running for election but is not yet an elected official of such *attest client*, then advocacy, adverse interest, and familiarity *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an acceptable level by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

Political Party Is Attest Client

.04 If during the *period of the professional engagement* or during the period covered by the *financial statements* a *partner* or professional employee serves as a campaign treasurer for a candidate and the political party for which the candidate is a member is an *attest client*, advocacy and familiarity *threats* may exist. Accordingly, a responsible individual within the *firm* should evaluate the significance of the *threats* to determine if the *threats* are at an *acceptable level*. If the responsible individual within the *firm* determines that *threats* are not at an *acceptable level*, he or she should apply *safeguards* to eliminate or reduce the *threats* to an *acceptable level*. However, *threats* would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* and *independence* would be *impaired* if the candidate is a member of one of the political party's governing bodies.

General

.05 In the state and local government environment, *members* should consult the "State and Local Government Client Affiliates" interpretation [1.224.020] to determine which entities related to their *attest client* require the

member's independence. Also refer to the "Conflicts of Interest for Members in Public Practice" interpretation [1.110.010] of the "Integrity and Objectivity Rule" [1.100.001] for additional guidance. In addition, *members* in such positions should consider their obligations as *members in business* under part 2 of the code. [Prior reference: paragraphs .164–.165 of ET section 191]

Grandfathered Positions

.06 *Independence* would not be *impaired* as a result of the more restrictive requirements of this interpretation that are effective on May 31, 2015, provided the *attest engagement* commenced prior to April 30, 2015, and the *member* was in compliance with the preexisting requirements of this interpretation.

[See Revision History Table.]

1.275.030 Member of Federated Fund-Raising Organization

.01 When a *partner* or professional employee of a *member's firm* serves as a director or an officer of a federated fund-raising organization, such as United Way (the organization), during the period covered by the *financial statements* or during the *period of the professional engagement*, and a charity that receives funds from the organization is an *attest client* of the *member's firm*, management participation or self-review *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the organization has managerial control over the charity, the *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.03 Even if the organization does not have managerial control over the charity, a conflict of interest could arise that may create a *threat* to the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001]. In such situations, the *member* should consult the "Conflicts of Interest" interpretation [1.110.010]. [Prior reference: paragraphs .027–.028 of ET section 191]

.04 In addition, *members* in such positions should consider their obligations as *members in business* under part 2 of the code. [No prior reference: new content]

Effective Date

.05 Paragraph .04 of this interpretation is effective December 15, 2014.

1.275.035 Member of Organization that Receives Funds From Fund-Raising Organization

.01 When a *partner* or professional employee of a *member's firm* serves on the board of directors of an organization during the period covered by the *financial statements* or during the *period of the professional engagement* and the organization receives funds from a fund-raising foundation that is an *attest client*, management participation or self-review *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the fund-raising foundation functions solely to raise funds for that organization, the *threat* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.03 However, if the directorship is clearly honorary, in accordance with the "Honorary Director or Trustee of a Not-for-Profit Organization" interpretation [1.275.010] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level*. Accordingly, *independence* would not be *impaired*. [Prior reference: paragraphs .128–.129 of ET section 191]

.04 *Members* in such positions should consider their obligations as a *member in business* under part 2 of the code. [No prior reference: new content]

Effective Date

.05 Paragraph .04 of this interpretation is effective December 15, 2014.

1.277 Former Employment or Association With an Attest Client

1.277.010 Former Employment or Association With an Attest Client

.01 This interpretation applies to *covered members* who were formerly employed by an entity or associated with an entity as an officer, a director, a promoter, an underwriter, a voting trustee, or a trustee for the entity's pension or profit sharing trust and subsequently became employed by a *firm* that provides attest service to that entity.

.02 When a *member* becomes a *partner* or professional employee of a *firm* that provides attest services to an entity where the *member* was formerly employed or otherwise associated, familiarity, self-interest, self-review, or management participation *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist.

.03 If a *covered member* participates on the *client's attest engagement* or is an *individual in a position to influence the attest engagement* covering any period that includes the *covered member's* former employment or association with the *attest client*, *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.04 If a *member* fails to disassociate from the *attest client* before becoming a *covered member*, *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and *independence* would be *impaired* unless all of the following *safeguards* are met:

- a. The *covered member* ceases to participate in all employee health and welfare plans sponsored by the *attest client*, unless the *attest client* is legally required to allow the *member* to participate in the plan (for example, the Consolidated Omnibus Budget Reconciliation Act [COBRA]) and the *member* pays 100 percent of the *member's* portion of the cost of participation on a current basis.
- b. The *covered member* ceases to participate in all other employee benefit plans by liquidating or transferring, at the earliest date permitted under the plan, all vested benefits in the *attest client's* defined benefit plans, defined contribution plans, *share-based compensation arrangements*, deferred compensation plans, and other similar arrangements.

However, when a *covered member's* participation in one of these plans results from former employment or association with an *attest client*, *threats* would be at an *acceptable level* and *independence* would not be *impaired* provided the liquidation or transfer

of any vested benefits is either not permitted under the terms of the plan or would result in a penalty significant to the benefits being imposed upon such liquidation or transfer and the *covered member*

- i. does not participate on the *attest engagement team* or
- ii. is not an *individual in a position to influence the attest engagement*.

A penalty includes an early withdrawal penalty levied under the applicable tax law but excludes other income taxes that would be owed, or market losses that may be incurred, as a result of such liquidation or transfer.

- c. The *covered member* disposes of any *direct financial interest* or material *indirect financial interests* in the *attest client*.
- d. The *covered member* collects or repays any *loans* to or from the *attest client*, except for *loans* specifically permitted or grandfathered by the *interpretations* of the "Loans, Leases, and Guarantees" subtopic [1.260] under the "Independence Rule."
- e. *Covered members* should evaluate whether other relationships with the *attest client* create *threats* that require the *member* to apply *safeguards* to reduce those *threats* to an *acceptable level*. [Prior reference: paragraph .02 of ET section 101]

1.279 Considering or Subsequent Employment or Association With an Attest Client

1.279.010 Considering Employment or Association With an Attest Client

.01 This interpretation applies to a member of the *attest engagement team* or an *individual in a position to influence the attest engagement* (individual) who intends to seek or discuss potential employment or association with an *attest client* or is in receipt of a specific offer of employment from an *attest client*.

.02 The undue influence and self-interest *threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* and *independence* would not be *impaired* if all of the following *safeguards* are met:

- a. The individual promptly reports such consideration or offer to an appropriate person in the *firm*.
- b. The individual immediately ceases participation in the engagement and does not provide any services to the *attest client* until the employment offer is rejected or employment is no longer sought.
- c. If a *covered member* becomes aware that an individual is considering employment or association with an *attest client*, the *covered member* should notify an appropriate person in the *firm*.
- d. The appropriate person in the *firm* should consider whether, based on the nature of the engagement and the individual involved, the *firm* should perform additional procedures to provide reasonable assurance that any work that the individual performed for the *attest client* was performed in compliance with the "Integrity and Objectivity Rule" [1.100.001].

.03 If the individual accepts an offer of employment or otherwise becomes associated with the *attest client* in a *key position*, see the "Subsequent Employment or Association With an Attest Client" interpretation [1.279.020] of the "Independence Rule" [1.200.001] for additional requirements. [Prior reference: paragraph .04 of ET section 101]

1.279.020 Subsequent Employment or Association With an Attest Client

.01 This interpretation applies to *partners* and professional employees who leave their *firms* and are subsequently employed by, or associated with, one of the *firm's attest clients* in a *key position*.

.02 The familiarity, self-interest, undue influence, or management participation *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and *independence* would be *impaired* unless all of the *safeguards* in items *a–e* of the following list are met:

Individual Safeguards

- a. Amounts due to the former *partner* or professional employee for his or her previous interest in the *firm* and unfunded, vested retirement benefits cannot be material to the *firm*, and the underlying formula used to calculate the payments remain fixed during the payout period. The *firm* may adjust the retirement benefits for inflation and pay interest on amounts due.
- b. The former *partner* or professional employee is not in a position to influence the *firm's* operations or financial policies.
- c. The former *partner* or professional employee does not participate or appear to participate in the *firm's* business and is not otherwise associated with the *firm*, regardless of whether he or she is compensated for such participation or association, once employment or association with the *attest client* begins. For example, the individual would appear to participate in, or be associated with, the *firm* if
 - i. the individual provides consultation to the *firm*;
 - ii. the *firm* provides the individual with an *office* and related amenities, such as administrative and technology services;
 - iii. the individual's name is included in the *firm's office* directory; or
 - iv. the individual is identified as a member of the *firm* in membership lists of business, professional, or civic organizations, unless the *member* is clearly designated as retired.

Ongoing Attest Engagement Team Safeguards

- d. The ongoing *attest engagement team* should consider whether to modify the engagement procedures to adjust for the risk that the former *partner's* or professional employee's prior knowledge of the audit plan could reduce audit effectiveness. In addition, if the individual will have significant interaction with the *attest engagement team*, an appropriate individual in the *firm* should evaluate whether the existing *attest engagement team* members have sufficient experience and stature to deal effectively with the individual in conducting the engagement.
- e. If the former *partner* or professional employee joins the *attest client* in a *key position* within one year of disassociating from the *firm* and has significant interaction with the *attest engagement*

team, an appropriate professional in the *firm* should review the subsequent *attest engagement* to determine whether the engagement team members maintained the appropriate level of skepticism when evaluating the individual's representations and work. The professional applying this *safeguard* should have appropriate stature, expertise, and objectivity. In performing this review, the professional should consider relevant factors, such as the following:

- i. The position that the individual assumed at the *attest client*.
- ii. The position that the individual held at the *firm*.
- iii. The nature of the services that the individual provided to the *attest client*. The professional should take appropriate actions, as deemed necessary, based on the results of this review.

.03 The procedures performed in applying items *d–e* of paragraph .02 of this interpretation will depend on several factors, including the following:

- a. Whether the individual served on the engagement team
- b. The positions that the individual held at the *firm* and has accepted at the *attest client*
- c. The length of time that has elapsed since the individual left the *firm*
- d. The circumstances of the individual's departure

.04 An inadvertent and isolated failure to apply items *d–e* in paragraph .02 of this interpretation would not *impair independence* provided that the relevant parties perform the required procedures promptly upon discovery of the failure to do so and all other provisions of this interpretation are met. [Prior reference: paragraph .04 of ET section 101]

1.280 Memberships

1.280.010 Member of a Social Club

.01 If a *covered member* belongs to a social club (for example, a country club, tennis club) that is an *attest client* and is required to acquire a pro rata share of the club's equity or debt securities, then management participation, self-review, and self-interest *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. *Threats* would be at an *acceptable level* if the club membership is essentially a social matter, because such equity or debt ownership would not be considered to be a *direct financial interest*. Accordingly, *independence* would not be *impaired*.

.02 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if a *partner* or professional employee is simultaneously employed or associated with the *attest client's* social club as described in the "Simultaneous Employment or Association With an Attest Client" interpretation [1.275.005] of the "Independence Rule." Accordingly, *independence* would be *impaired*. [Prior reference: paragraphs .033–.034 of ET section 191]

1.280.020 Member of a Trade Association

.01 If a *covered member* belongs to a trade association that is an *attest client*, management participation or self-review *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if a *partner* or professional employee is simultaneously employed or associated with the trade association as described in the "Simultaneous Employment or Association With an Attest Client" interpretation [1.275.005] of the "Independence Rule." Accordingly, *independence* would be *impaired*. [Prior reference: paragraphs .003–.004 of ET section 191]

1.280.030 Member of Common Interest Realty Association

.01 If a *covered member* belongs to a common interest realty association (CIRA) because the *covered member* owns or leases real estate, then management participation, self-interest, self-review, or advocacy *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. Examples of CIRAs include cooperatives, condominium associations, planned unit developments, homeowners associations, and timeshare developments.

.02 *Threats* would be at an *acceptable level* and *independence* would not be *impaired* if all of the following *safeguards* are met:

- a. The CIRA performs functions similar to local governments, such as public safety, road maintenance, and utilities.
- b. The *covered member's* annual assessment is not material to either the *covered member* or the CIRA's operating budgeted assessments.
- c. The liquidation of the CIRA or the sale of common assets would not result in a distribution to the *covered member*.
- d. The CIRA's creditors would not have recourse to the *covered member's* assets if the CIRA became insolvent.

.03 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and cannot be reduced to an *acceptable level* by the application of *safeguards* if a *partner* or professional employee is simultaneously employed or associated with the CIRA as described in the "Simultaneous Employment or Association With an Attest Client" interpretation [1.275.005] of the "Independence Rule." Accordingly, *independence* would be *impaired*.

.04 A *member* who has a personal or professional relationship with a real estate developer or management company that is associated with the CIRA should consider the "Conflicts of Interest" interpretation [1.110.010] under the "Integrity and Objectivity Rule" [1.100.001]. [Prior reference: paragraphs .061–.062 of ET section 191]

1.280.040 Member of a Credit Union

.01 When a *covered member* is a member of a credit union that is an *attest client*, the self-interest *threat* would be at an *acceptable level*, and *independence* would not be *impaired*, if the *covered member* individually qualifies to join the credit union other than by virtue of the *professional services* provided to the credit union. However, if during the *period of the professional engagement*

the *member's* qualification to join the credit union is a result of the *professional services* provided to the credit union, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.02 *Covered members* may be subject to additional restrictions, as described in the "Depository Accounts" interpretation [1.255.010] and the "Loans and Leases With Lending Institutions" interpretation [1.260.020] of the "Independence Rule" [1.200.001]. In addition, *partners* and professional employees may be subject to additional restrictions, as described in paragraph .03 of the "Overview of Financial Interests" interpretation [1.240.010] of the "Independence Rule." [Prior reference: paragraphs .150–.151 of ET section 191]

[See Revision History Table.]

1.285 Gifts and Entertainment

1.285.010 Offering or Accepting Gifts or Entertainment

.01 For purposes of this interpretation, the *attest client* also includes an individual in a *key position* with the *attest client* and individuals owning 10 percent or more of the *attest client's* outstanding equity securities or other ownership interests.

.02 Accepting a gift from an attest client during the *period of the professional engagement* may create undue influence or self-interest *threats* to a *member's* compliance with the "Independence Rule" [1.200.001]. If a *member's firm*, a member of the *attest engagement team*, or an *individual in a position to influence the attest engagement* accepts a gift from an attest client and the value is not clearly insignificant to the recipient, the *threat* to the *member's* compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.03 Accepting entertainment from an attest client during the *period of the professional engagement* may create undue influence or self-interest *threats* to a *member's* compliance with the "Independence Rule" [1.200.001]. If a *covered member* accepts entertainment from an attest client that is not reasonable in the circumstances, the *threats* to the *member's* compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.04 Offering gifts or entertainment to an attest client during the *period of the professional engagement* may create a familiarity *threat* to a *member's* compliance with the "Independence Rule" [1.200.001]. If a *covered member* offers a gift or entertainment to an attest client that is not reasonable in the circumstances, the *threat* to the *member's* compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

.05 The *member* should exercise judgment in determining whether gifts or entertainment would be considered reasonable in the circumstances. Examples of relevant facts and circumstances include the following:

- a. The nature of the gift or entertainment
- b. The occasion giving rise to the gift or entertainment

- c. The cost or value of the gift or entertainment
- d. The nature, frequency, and value of other gifts and entertainment offered or accepted
- e. Whether the entertainment was associated with the active conduct of business directly before, during, or after the entertainment
- f. Whether other attest clients also participated in the entertainment
- g. The individuals from the attest client's and *member's firm* who participated in the entertainment

.06 Refer to the "Offering or Accepting Gifts or Entertainment" interpretation [1.120.010] of the "Integrity and Objectivity Rule" [1.100.001] for additional guidance. [Prior reference: paragraphs .228–.229 of ET section 191]

A nonauthoritative basis-for-conclusions document summarizing considerations that were deemed significant in the development of this interpretation is available at https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/gifts_basis_document.pdf.

A nonauthoritative question and answer regarding campaign contributions made to the campaign of an individual that is associated with an attest client in a key position or holds a financial interest in an attest client that is material or enables the individual to exercise significant influence over the attest client is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.290 Actual or Threatened Litigation

1.290.010 Actual or Threatened Litigation

.01 The relationship between an *attest client's* management and a *covered member* must be characterized by complete candor and full disclosure regarding all aspects of the *attest client's* business operations. In addition, the *covered member* must not be biased so that the *covered member* can exercise professional judgment and objectivity in evaluating management's financial reporting decisions.

.02 Litigation or the expressed intention to commence litigation between a *covered member* and an *attest client* or its management and, in some cases, other parties during the *period of the professional engagement* may create self-interest or adverse interest *threats* to the *member's* compliance with the "Independence Rule" [1.200.001]. Accordingly, *covered members* should evaluate all such circumstances in accordance with this interpretation.

.03 Litigation or the expressed intention to commence litigation between a *covered member* and an *attest client* or its management and, in some cases, other parties requires the *covered member* to assess the materiality of the litigation to the *covered member*, the *covered member's firm*, and the *attest client*. The *covered member's* assessment should include an evaluation of the nature of the matter(s) underlying the litigation and all other relevant factors.

Litigation Between the Attest Client and Member

.04 When an *attest client's* present management commences, or expresses an intention to commence, legal action against a *covered member*, the *covered member* and the *attest client's* management may be placed in adversarial positions in which self-interest may affect the *covered member's* objectivity and management's willingness to make complete disclosures.

.05 Accordingly, *independence* may be *impaired* whenever the *covered member* and the *covered member's attest client* or its management are in threatened or actual positions of material adverse interests due to threatened or actual litigation.

.06 Situations involving threatened or actual litigation are complex and diverse, making it difficult to identify precise points at which *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level*. There are situations regarding litigation between *covered members* and *attest clients* in which *threats* to the *covered member's* compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by *safeguards* and *independence* would be *impaired*. Examples of these situations are:

- a. An *attest client's* present management commences litigation alleging deficiencies in audit work performed for the *attest client* or expresses its intention to commence such litigation, and the *covered member* concludes that it is probable that such a claim will be filed.
- b. A *covered member* commences litigation against an *attest client's* present management alleging management fraud or deceit.

.07 If threatened or actual litigation is unrelated to the performance of an *attest engagement* and is for an amount that is not material to the *covered member's firm* or the *attest client*, *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level*, and *independence* would not be *impaired*. Such claims may arise, for example, out of immaterial disputes regarding billings for services, results of tax or management services advice, or similar matters.

Litigation by Security Holders

.08 A *covered member* may also become involved in litigation (primary litigation) in which the *covered member* and the *attest client* or its management are defendants. For example, one or more stockholders may bring a stockholders' derivative action or class-action lawsuit against the *attest client* or its management, the *attest client's* officers, directors, or underwriters, and *covered members*.

.09 Such primary litigation by itself would not *threaten* the *covered member's* compliance with the "Independence Rule" [1.200.001]. However, if other circumstances exist that may create *threats*, the *covered member* should apply the "Conceptual Framework for Independence" interpretation [1.210.010] to evaluate whether the *threats* are at an *acceptable level*. For example, *threats* will exist if cross-claims are filed against the *covered member* alleging that the *covered member* is responsible for any deficiencies in work performed for the *attest client* or if the *covered member*, as a defense, alleges that the *attest client's* management engaged in fraud or deceit.

.10 The following are examples of situations in which *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would not

be at an *acceptable level* and could not be reduced to an acceptable level by *safeguards*, thereby *impairing independence*:

- a. The *attest client* or its management or directors have filed cross-claims to protect a right to legal redress in the event of a future adverse decision in the primary litigation (or, in lieu of cross-claims, agreements to extend the statute of limitations), and there is a significant risk that the cross-claim will result in a settlement or judgment in an amount that is material to the *covered member's firm* or the *attest client*.
- b. The *attest client's* underwriter and the *attest client* or its present management assert cross-claims against the *covered member*.

.11 If only the underwriter or officers or directors of the *covered member's* other *attest clients* file cross-claims against the *covered member*, *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* unless other circumstances create *threats* to compliance with the "Independence Rule."

Other Third-Party Litigation

.12 A *lending institution* or other creditor, security holder, or insurance company that alleges reliance on the *attest client's financial statements* as a basis for having extended credit or insurance coverage to an *attest client* may commence third-party litigation against the *covered member* to recover their loss. An example is an insurance company commencing litigation either as a result of receiving an assignment of a claim or under subrogation rights against the *covered member* in the *attest client's* name to recover losses that the insurer reimbursed to the *attest client*. If the *attest client* is only the nominal plaintiff, *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* unless other circumstances exist, such as when the *covered member* alleges, as a defense, that present management engaged in fraud or deceit. The *attest client* is a nominal plaintiff when the insurance company or lender sues in the name of the *attest client* as a result of obtaining subrogation rights or an assignment from the *attest client* and the *attest client* does not have a beneficial interest in the claim.

.13 If the real party in interest in the litigation (for example, the insurance company) is also the *covered member's attest client* (the plaintiff client), *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist if the litigation carries a significant risk of a settlement or judgment in an amount that would be material to the *covered member's firm* or the plaintiff client.

Termination of Impairment

.14 *Threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] would be eliminated or reduced to an *acceptable level* when the parties reach a final resolution of the matter(s) at issue and the matter(s) no longer affects the relationship between the *covered member* and the *attest client*, as described in paragraph .01 of this interpretation. The *covered member* should determine whether the conditions of such resolution have effectively eliminated such *threats* or reduced them to an *acceptable level*. [Prior reference: paragraph .08 of ET section 101]

[See Revision History Table.]

1.295 Nonattest Services

1.295.010 Scope and Applicability of Nonattest Services

.01 When a *member* performs nonattest services for an *attest client*, self-review, management participation, or advocacy *threats* to the *member's* compliance with the "Independence Rule" [1.200.001] may exist. When significant *independence threats* exist during the *period of the professional engagement* or the period covered by the *financial statements* (except as provided for in paragraph .03), *independence* will be *impaired* unless the *threats* are reduced to an *acceptable level* and any requirements included in the *interpretations* of the "Nonattest Services" subtopic [1.295] under the "Independence Rule" have been met.

.02 For purposes of the *interpretations* of the "Nonattest Services" subtopic [1.295] under the "Independence Rule" [1.200.001], the term *member* includes the *member's firm*.

.03 *Period of engagement.* A *member's independence* would not be *impaired* if the *member* performed nonattest services that would have otherwise *impaired independence* during the period covered by the *financial statements* if all of the following conditions exist:

- a. The nonattest services were provided prior to *period of the professional engagement*.
- b. The nonattest services related to periods prior to the period covered by the *financial statements*.
- c. The *financial statements* for the period to which the nonattest services relate were audited by another *firm* (or in the case of a review engagement, reviewed or audited by another *firm*).

Nonauthoritative questions and answers regarding the period of the professional engagement are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

.04 *Activities related to attest services.* Performing attest services often involves communications between the *member* and *client* management regarding

- a. the *client's* selection and application of accounting standards or policies and *financial statement* disclosure requirements;
- b. the appropriateness of the *client's* methods used in determining accounting and financial reporting;
- c. adjusting journal entries that the *member* has prepared or proposed for *client* management consideration; and
- d. the form or content of the *financial statements*.

These communications are considered a normal part of the *attest engagement* and are not considered nonattest services subject to the "General Requirements for Performing Nonattest Services" [1.295.040] and "Documentation Requirements When Providing Nonattest Services" [1.295.050] interpretations.

.05 However, the *member* should exercise judgment in determining whether his or her involvement has become so extensive that it would constitute performing a separate service which would be subject to the "General Requirements for Performing Nonattest Services" interpretation [1.295.040].

.06 For example, activities such as *financial statement* preparation, cash-to-accrual conversions, and reconciliations are considered outside the scope of

the *attest engagement* and, therefore, constitute a nonattest service. Such activities would not *impair independence* if the requirements of the *interpretations* of the "Nonattest Services" subtopic [1.295] are met.

Nonauthoritative questions and answers regarding routine activities are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

.07 *Engagements subject to independence rules of certain regulatory or standard-setting bodies.* *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* through the application of *safeguards* if a member is not in compliance with the *independence* regulations of authoritative regulatory bodies that are more restrictive than the *interpretations* of the "Nonattest Services" subtopic [1.295] under the "Independence Rule" (examples of such authoritative bodies are the SEC, the Government Accountability Office [GAO], the Department of Labor [DOL], the Public Company Accounting Oversight Board [PCAOB], and state boards of accountancy) when a member performs nonattest services for an *attest client* and is required to be independent of the *attest client* under the regulations of the applicable regulatory body. Independence would be *impaired* under these circumstances. [Prior reference: paragraph .05 of ET section 101]

.08 Refer to the "Staff Augmentation Arrangements" interpretation [1.275.007] when the engagement involves lending *firm* personnel (augmented staff) to an *attest client* whereby the *attest client* is responsible for the direction and supervision of the activities performed by the augmented staff.

Effective Date

.09 Paragraph .06 of this interpretation is effective for engagements covering periods beginning on or after December 15, 2014.

[See Revision History Table.]

1.295.020 Cumulative Effect on Independence When Providing Multiple Nonattest Services

.01 The *interpretations* of the "Nonattest Services" subtopic [1.295] under the "Independence Rule" [1.200.001] include various examples of nonattest services that individually would not *impair independence* because the *safeguards* in the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] reduce the self-review and management participation *threats* to an *acceptable level*. However, performing multiple nonattest services can increase the significance of these *threats* as well as other *threats* to *independence*.

.02 Before agreeing to perform nonattest services, the member should evaluate whether the performance of multiple nonattest services by the *member* or *member's firm* in the aggregate creates a significant *threat* to the member's *independence* that cannot be reduced to an *acceptable level* by the application of the *safeguards* in the "General Requirements for Performing Nonattest Services" interpretation [1.295.040].

.03 In situations in which a member determines that *threats* are not at an *acceptable level*, *safeguards* in addition to those in the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] should be applied to eliminate the *threats* or reduce them to an *acceptable level*. If no

safeguards exist that will eliminate or reduce the *threats* to an *acceptable level*, *independence* would be *impaired*.

.04 For purposes of this interpretation, the member is not required to consider the possible *threats* to *independence* created due to the provision of nonattest services by other *network firms* within the *firm's network*. [Prior reference: paragraph .05 of ET section 101]

Effective Date

.05 This interpretation is effective for engagements covering periods beginning on or after December 15, 2014.

1.295.030 Management Responsibilities

.01 If a member were to assume a management responsibility for an *attest client*, the management participation *threat* would be so significant that no *safeguards* could reduce the *threat* to an *acceptable level* and *independence* would be *impaired*. It is not possible to specify every activity that is a management responsibility. However, management responsibilities involve leading and directing an entity, including making significant decisions regarding the acquisition, deployment, and control of human, financial, physical, and intangible resources.

.02 Whether an activity is a management responsibility depends on the circumstances and requires the exercise of judgment. Examples of activities that would be considered management responsibilities and, as such, *impair independence* if performed for an *attest client*, include

- a. setting policy or strategic direction for the *attest client*.
- b. directing or accepting responsibility for actions of the *attest client's* employees except to the extent permitted when using internal auditors to provide assistance for services performed under auditing or attestation standards.
- c. authorizing, executing, or consummating transactions or otherwise exercising authority on behalf of an *attest client* or having the authority to do so.
- d. preparing *source documents*, in electronic or other form, that evidence the occurrence of a transaction.
- e. having custody of an *attest client's* assets.
- f. deciding which recommendations of the member or other third parties to implement or prioritize.
- g. reporting to *those charged with governance* on behalf of management.
- h. serving as an *attest client's* stock transfer or escrow agent, registrar, general counsel or equivalent.
- i. accepting responsibility for the management of an *attest client's* project.
- j. accepting responsibility for the preparation and fair presentation of the *attest client's financial statements* in accordance with the applicable financial reporting framework.
- k. accepting responsibility for designing, implementing, or maintaining internal control.
- l. performing ongoing evaluations of the *attest client's* internal control as part of its monitoring activities.

[Prior reference: paragraph .05 of ET section 101]

Nonauthoritative questions and answers regarding management responsibilities and controllership services are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

1.295.040 General Requirements for Performing Nonattest Services

.01 When a member performs a nonattest service for an *attest client*, *threats* to the member's compliance with the "Independence Rule" [1.200.001] may exist. Unless an *interpretation* of the "Nonattest Services" subtopic [1.295] under the "Independence Rule" states otherwise, *threats* would be at an *acceptable level*, and *independence* would not be *impaired*, when all the following *safeguards* are met:

- a. The member determines that the *attest client* and its management agree to
 - i. assume all management responsibilities as described in the "Management Responsibilities" interpretation [1.295.030].
 - ii. oversee the service, by designating an individual, preferably within senior management, who possesses suitable skill, knowledge, and/or experience. The member should assess and be satisfied that such individual understands the services to be performed sufficiently to oversee them. However, the individual is not required to possess the expertise to perform or re-perform the services.
 - iii. evaluate the adequacy and results of the services performed.
 - iv. accept responsibility for the results of the services.
- b. The member does not assume management responsibilities (See the "Management Responsibilities" interpretation [1.295.030] of the "Independence Rule") when providing nonattest services and the member is satisfied that the *attest client* and its management will
 - i. be able to meet all of the criteria delineated in item *a*;
 - ii. make an informed judgment on the results of the member's nonattest services; and
 - iii. accept responsibility for making the significant judgments and decisions that are the proper responsibility of management.

If the *attest client* is unable or unwilling to assume these responsibilities (for example, the *attest client* cannot oversee the nonattest services provided or is unwilling to carry out such responsibilities due to lack of time or desire), the member's performance of nonattest services would *impair independence*.

- c. Before performing nonattest services the member establishes and documents in writing his or her understanding with the *attest client* (board of directors, audit committee, or management, as appropriate in the circumstances) regarding
 - i. objectives of the engagement,
 - ii. services to be performed,

- iii. *attest client's* acceptance of its responsibilities,
- iv. member's responsibilities, and
- v. any limitations of the engagement.

.02 The *safeguards* in paragraph .01 and the "Documentation Requirements When Providing Nonattest Services" interpretation [1.295.050] of the "Independence Rule" [1.200.001] do not apply to certain routine activities performed by the member, such as providing advice and responding to the *attest client's* questions as part of the *attest client*-member relationship. However, in providing such services, the member must not assume management responsibilities, as described in the "Management Responsibilities" interpretation [1.295.030] of the "Independence Rule." [Prior reference: paragraph .05 of ET section 101]

Nonauthoritative questions and answers regarding suitable skill, knowledge, and experience are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

1.295.050 Documentation Requirements When Providing Nonattest Services

.01 Before performing nonattest services, the member should document in writing the member's understanding established with the *attest client*, as described in paragraph .01c of the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001].

.02 Failure to prepare the required documentation does not *impair independence* provided that the member did establish the understanding with the *attest client*. However, failure to prepare the required documentation would be considered a violation of the "Compliance With Standards Rule" [1.310.001].

.03 The documentation requirement does not apply to nonattest services performed prior to the *period of the professional engagement* for an *attest client*. However, for nonattest services provided during the period covered by the *financial statements*, the member should document in writing that the requirements of the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] were met prior to the *period of the professional engagement*, including the requirement to establish an understanding with the *attest client*. [Prior reference: paragraph .05 of ET section 101]

Sample language for how to document your understanding with the *attest client* is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

1.295.105 Advisory Services

.01 Self-review or management participation *threats* to compliance with the "Independence Rule" [1.200.001] may exist when a member performs advisory services for an *attest client*.

.02 If the member's services are only advisory in nature and the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, a member may

- a. provide advice, research materials, and recommendations to assist management in performing its functions and making decisions.
- b. attend board meetings as a nonvoting advisor.
- c. interpret *financial statements*, forecasts, or other analyses.
- d. provide management with advice regarding its potential plans, strategies, or relationships.

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if a member assumes any management responsibilities, as described in the "Management Responsibilities" interpretation [1.295.030]. Accordingly, *independence* is *impaired*. [Prior reference: paragraph .05 of ET section 101 and paragraphs .015–.016 of ET section 191]

1.295.110 Appraisal, Valuation, and Actuarial Services

.01 Self-review or management participation *threats* to compliance with the "Independence Rule" [1.200.001] may exist when a member performs appraisal, valuation, or actuarial service for an *attest client*.

.02 *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if the member performs an appraisal, a valuation, or an actuarial service for an *attest client* when (a) the services involve a significant degree of subjectivity and (b) the results of the service, individually or when combined with other valuation, appraisal, or actuarial services, are material to the *attest client's financial statements*. Accordingly, *independence* would be *impaired* under these circumstances.

.03 When performing appraisal, valuation, and actuarial services for an *attest client* that are permitted under this interpretation, all requirements of the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001] should be met, including that all significant assumptions and matters of judgment are determined or approved by the *attest client*, and the *attest client* is in a position to have an informed judgment on, and accepts responsibility for, the results of the service.

Valuations Involving a Significant Degree of Subjectivity

.04 Examples of valuations that generally involve a significant degree of subjectivity include, ESOPs, business combinations, or appraisals of assets or liabilities. Accordingly, if these services produce results that are material to the *attest client's financial statements*, *independence* would be *impaired*.

Actuarial Valuations of Pension or Postemployment Benefit Liabilities

.05 An actuarial valuation of an *attest client's* pension or postemployment benefit liabilities generally does not involve a significant degree of subjectivity because reasonably consistent results are produced when the same

assumptions and information are used in performing the valuation. Therefore, *threats* would be at an *acceptable level* and *independence* would not be *impaired*.

Appraisal, Valuations, and Actuarial Services for Nonfinancial Statement Purposes

.06 *Threats* would be at an *acceptable level* if a member provided appraisal, valuation, or actuarial services solely for nonfinancial statement purposes. Some examples are appraisal, valuation, and actuarial services performed for tax planning or tax compliance, estate and gift taxation, and divorce proceedings. Accordingly, *independence* would not be *impaired*. [Prior reference: paragraph .05 of ET section 101]

Nonauthoritative questions and answers regarding appraisal, valuation, and actuarial services are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

1.295.113 Assisting Attest Clients With Implementing Accounting Standards

.01 When a *member* assists an *attest client* with planning and executing the implementation of an accounting standard, self-review or management participation *threats* to compliance with the "Independence Rule" [1.200.001] may exist.

.02 If a *member* applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired* if, for example, a *member* does the following:

- a. Develops and provides training to *attest client* personnel on the effects of the accounting standard
- b. Researches, provides advice, makes recommendations, and assists management in identifying *financial statement* account balances, contracts, and transactions to be assessed under the accounting standard
- c. Provides advice and recommendations related to the application of the accounting standard, including
 - i. analyzing and advising management on the potential impact of the accounting standard on the entity's accounting policies, procedures, and internal controls
 - ii. recommending possible revisions to existing policies, procedures, and internal controls
 - iii. assisting the *attest client* with summarizing the *attest client's* analysis and policies related to the accounting positions under the accounting standard
 - iv. preparing transition-related calculations to illustrate the impact of the application of the accounting standard for management's consideration and selection

- d. Provides observations and recommendations on management's existing overall project plan timeline or assists management in developing an overall project plan timeline to adopt the accounting standard
- e. Assists management in drafting implementation strategies or methods used to implement the accounting standard
- f. Assists the *attest client* in developing implementation templates or provides the *attest client* with firm-developed templates or tools, including those related to specific calculations under the accounting standard that meet the exception in paragraph .03a of the "Information Systems Services" interpretation [1.295.145] under the "Independence Rule," provided the attest client's management understands the nature of any underlying calculations and the impact the results will have on the financial statements
- g. Proposes standard journal entries or adjustments to existing journal entries necessary for adoption of the accounting standard, subject to *attest client* approval in accordance with paragraph .02e of the "Bookkeeping, Payroll, and Other Disbursements" interpretation [1.295.120]
- h. Provides recommendations related to existing or new information systems as a result of the accounting standard

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired* if, for example, a *member* does any of the following:

- a. Leads or supervises any *attest client* implementation team
- b. Makes decisions on which recommendations to prioritize or how to implement the accounting standard
- c. Sets any policy or procedures related to the accounting standard
- d. Accepts responsibility for designing new or redesigning existing internal controls over financial reporting
- e. Designs or develops new or redesigns existing financial information systems as described in the "Information System Services" interpretation [1.295.145] under the "Independence Rule"

Effective Date

.04 This interpretation is effective December 31, 2022. Early implementation is allowed.

[See Revision History Table.]

Nonauthoritative questions and answers regarding suitable skill, knowledge, and experience are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

A nonauthoritative practice aid related to the "Information Systems Services" interpretation [1.295.145] is available at <https://us.aicpa.org/content/dam/aicpa/interestareas/professionalethics/community/exposedrafts/downloadabledocuments/2021/isspracticeaid.pdf>.

1.295.115 *Benefit Plan Administration*

.01 When a member provides benefit plan administration services to an *attest client*, self-review and management participation *threats* to the member's compliance with the "Independence Rule" [1.200.001] may exist.

.02 Notwithstanding the conclusions reached in paragraph .03 of this interpretation, a member should comply with the more restrictive independence provisions of the Employee Retirement Income Security Act (ERISA) of 1974 and DOL regulations when performing audits of employee benefit plans subject to those regulations.

.03 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, the member may

- a. communicate summary plan data to a plan trustee.
- b. advise management regarding the application and impact of provisions in a plan document.
- c. process certain transactions that have been initiated by plan participations or approved by the plan administrators using the member's electronic media, such as an interactive voice response system or Internet connection or other media. Such transactions may include processing investment or benefit elections, changes in contributions to the plan, data entry, participant confirmations, and distributions and *loans*.
- d. prepare account valuations for plan participants using data collected through the member's electronic or other media.
- e. prepare and transmit participant statements to plan participants based on data collected through the member's electronic or other media.

.04 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level*, and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired* if, for example, a member

- a. makes policy decisions on behalf of management.
- b. interprets the provisions in a plan document for a plan participant on behalf of management without first obtaining management's concurrence.
- c. makes disbursements on behalf of the plan.
- d. has custody of the plan's assets.
- e. serves in a fiduciary capacity, as defined by ERISA. [Prior reference: paragraph .05 of ET section 101]

1.295.120 *Bookkeeping, Payroll, and Other Disbursements*

.01 When a member provides bookkeeping, payroll, and other disbursement services to an *attest client*, self-review and management participation *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule"

[1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, a member may

- a. record transactions to an *attest client's* general ledger when management has determined or approved the account classifications for the transaction.
- b. post transactions coded by the *attest client* to the *attest client's* general ledger.
- c. prepare *financial statements* based on information in the *attest client's* trial balance.
- d. post *client*-approved journal or other entries to an *attest client's* trial balance.
- e. propose standard, adjusting, or correcting journal entries or other changes affecting the *financial statements* to the *attest client*. Prior to the member posting these journal entries or changes, the member should be satisfied that management has reviewed the entries and understands the nature of the proposed entries and the effect the entries will have on the *attest client's financial statements*.
- f. generate unsigned checks using *source documents* or other records provided and approved by the *attest client*.
- g. process an *attest client's* payroll using payroll time records that the *attest client* has provided and approved.
- h. transmit *client*-approved payroll or other disbursement information to a bank or similar entity subsequent to the *attest client's* review and authorization for the member to make the transmission. Prior to such transmission, the *attest client* is responsible for making the arrangements with the bank or similar entity to limit the corresponding individual payments regarding the amount and payee. In addition, once transmitted, the *attest client* must authorize the bank or similar entity to process the payroll information.
- i. prepare a reconciliation (for example, bank and accounts receivable) that identifies reconciling items for the *client's* evaluation.

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if, for example, a member

- a. determines or changes journal entries, any account coding or classification of transactions, or any other accounting records without first obtaining the *attest client's* approval.
- b. authorizes or approves transactions.
- c. prepares *source documents*.
- d. makes changes to *source documents* without the *attest client's* approval.
- e. accepts responsibility to authorize payment of *attest client* funds, electronically or otherwise, except for electronic payroll tax payments when the member complies with the requirements of the "Tax Services" interpretation [1.295.160] of the "Independence Rule."
- f. accepts responsibility to sign or cosign an *attest client's* checks, even if only in emergency situations.

- g. maintains an *attest client's* bank account or otherwise has custody of an *attest client's* funds or makes credit or banking decisions for the *attest client*.
- h. approves vendor invoices for payment. [Prior reference: paragraph .05 of ET section 101]

Nonauthoritative questions and answers about bookkeeping services are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

[See Revision History Table.]

1.295.125 Business Risk Consulting

.01 When a member provides business risk consulting services to an *attest client*, self-review and management participation *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, a member may

- a. assist management in its assessment of the *attest client's* business risk control processes.
- b. recommend improvements to an *attest client's* business risk control processes and assists in the implementation of these improvements.

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if, for example, a member

- a. makes or approves business risk decisions.
- b. presents business risk considerations to the board or others on behalf of management. [Prior reference: paragraph .05 of ET section 101]

1.295.130 Corporate Finance Consulting

.01 When a member provides corporate finance consulting services to an *attest client*, self-review, management participation, and advocacy *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, a member may

- a. assist management in developing its corporate strategies.
- b. assist management in identifying possible sources of capital that meet the *attest client's* specifications or criteria.
- c. introduce management to possible sources of capital that meet the *attest client's* specifications or criteria.

- d. assist management in analyzing the effects of proposed transactions with potential buyers, sellers, or capital sources.
- e. advise an *attest client* during its negotiations with potential buyers, sellers, or capital sources.
- f. assist the *attest client* in drafting its offering document or memorandum.
- g. participate with management in its transaction negotiations in an advisory capacity.
- h. be named as a financial adviser in an *attest client's* private placement memoranda or offering documents.

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if, for example, a member

- a. commits the *attest client* to the terms of a transaction.
- b. consummates a transaction on behalf of the *attest client*.
- c. acts as a promoter, an underwriter, a broker-dealer, or a guarantor of an *attest client's* securities or as a distributor of private placement memoranda or offering documents.
- d. maintains custody of an *attest client's* securities. [Prior reference: paragraph .05 of ET section 101]

1.295.135 Executive or Employee Recruiting

.01 When a member provides executive or employee recruiting services to an *attest client*, self-review and management participation *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, a member may

- a. recommend a position description or candidate specifications.
- b. solicit and screen candidates based on criteria approved by the *attest client*, such as required education, skills, or experience.
- c. recommend qualified candidates to the *attest client* for their consideration based on criteria approved by the *attest client*.
- d. participate in employee hiring or compensation discussions in an advisory capacity.

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if, for example, a member

- a. commits the *attest client* to employee compensation or benefit arrangements.
- b. hires or terminates the *attest client's* employees. [Prior reference: paragraph .05 of ET section 101]

[See Revision History Table.]

1.295.140 Forensic Accounting

.01 Forensic accounting services. For purposes of this interpretation, forensic accounting services are nonattest services that involve the application of (a) special skills in accounting, auditing, finance, quantitative methods or certain areas of the law, and research and (b) investigative skills to collect, analyze, and evaluate evidential matter and to interpret and communicate findings. Forensic accounting services consist of investigative services and litigation services.

.02 Attest client. For purposes of this interpretation, the term *attest client* refers to the *attest client* with respect to which the member is providing litigation services, not the law firm that engages the member on behalf of the law firm's client. If the law firm that engages the member on behalf of the member's *attest client* is also an *attest client* of the member, the member should consider the applicability of the "Cooperative Arrangements With Attest Clients" interpretation [1.265.010] of the "Independence Rule" [1.200.001].

.03 Investigative services. For purposes of this interpretation, investigative services include all forensic services that do not involve actual or threatened litigation, such as performing analyses or investigations that may require the same skills used in litigation services. When a member provides investigative services to an *attest client*, self-review and management participation *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. However, if the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule," *threats* will be at an *acceptable level* and *independence* will not be *impaired*.

.04 Litigation services. For purposes of this interpretation, litigation services recognize the role of the member as an expert or a consultant and consist of providing assistance for actual or potential legal or regulatory proceedings before a trier of fact in connection with the resolution of disputes between parties. Litigation services consist of expert witness services, litigation consulting services, or other litigation services:

- a. **Expert witness services.** For purposes of this interpretation, expert witness services are those litigation services in which a member is engaged to render an opinion before a trier of fact about the matter(s) in dispute based on the member's expertise, rather than his or her direct knowledge of the disputed facts or events:
 - i. Expert witness services create the appearance that a member is advocating or promoting an *attest client's* position. Therefore, the advocacy *threat* would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, if a member is engaged conditionally or unconditionally to provide expert witness services or expert testimony for an *attest client*, *independence* would be *impaired*, except as discussed in the following item ii.
 - ii. *Threats* to compliance with the "Independence Rule" [1.200.001] would be at an acceptable level, and *independence* would not be *impaired*, if a member provides expert witness services for a large group of plaintiffs or defendants that includes one or more *attest clients* of the *firm*, provided that at the outset of the engagement

1. the member's *attest clients* constitute less than 20 percent of the members of the group, voting interests of the group, and the claim;
 2. no *attest client* within the group is designated as the lead plaintiff or defendant of the group; and
 3. no *attest client* has the sole decision-making power to select or approve the selection of the expert witness.
- iii. *Fact witness testimony.* Acting as a fact witness (also referred to as a "percipient witness" or "sensory witness") would not be considered a nonattest service. Fact witness testimony is based on the member's direct knowledge of the matters, facts, or events in dispute obtained through the member's performance of prior *professional services* for the *attest client*. As a fact witness, the member's role is to provide factual testimony to the trier of fact. While testifying as a fact witness, the trier of fact or counsel may question a member about the member's opinions pertaining to matters within the member's area of expertise. Answering such questions would not *impair* the member's *independence*.
- iv. In determining whether the member's services are considered expert witness services or fact witness testimony, members should refer to Rules 701–703 of Article VII, "Opinions and Expert Testimony," of the *Federal Rules of Evidence* and also refer to other applicable laws, regulations, and rules.
- v. When providing expert witness services or fact witness testimony, members are required to comply with the "Integrity and Objectivity Rule" [1.100.001].
- b. *Litigation consulting services.* For purposes of this interpretation, litigation consulting services are those litigation services in which a member provides advice about the facts, issues, or strategy pertaining to a matter. The consultant does not testify as an expert witness before a trier of fact:
- i. When a member provides litigation consulting services, advocacy and management participation *threats* to the *covered member's* compliance with the "Independence Rule" may exist. If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule," *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For purposes of complying with paragraph .01b of the "General Requirements for Performing Nonattest Services" interpretation of the "Independence Rule," the *attest client* may designate its attorney to oversee the litigation consulting services.
 - ii. However, if the member providing litigation consulting services subsequently agrees to serve as an expert witness, *threats* to the member's compliance with the "Independence Rule" would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*. Accordingly, *independence* would be *impaired*.

- c. *Other litigation services.* The advocacy *threat* would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards* if a member serves as a trier of fact, a special master, a court-appointed expert, or an arbitrator (including serving on an arbitration panel) in a matter involving an *attest client*. These services create the appearance that the member is not independent; accordingly, *independence* would be *impaired*.
- d. However, if the member applies the "General Requirements for Performing Nonattest Services" interpretation of the "Independence Rule," *threats* would be at an *acceptable level* and *independence* would not be *impaired* when a member serves as a mediator or any similar role in a matter involving an *attest client*, provided that the member is not making any decisions on behalf of the parties but, rather, is acting as a facilitator by assisting the parties in reaching their own agreement. When providing such services, the member should consider the requirements of the "Conflicts of Interest" interpretation [1.110.010] of the "Integrity and Objectivity Rule." [Prior reference: paragraph .05 of ET section 101]

.05 See <https://us.aicpa.org/interestareas/professionalethics/community/downloadabledocuments/transistion%20periods.pdf> for information about transition provision for engagements commenced prior to February 28, 2007.

.06 When providing any type of forensic accounting service, members are required to comply with the "Integrity and Objectivity Rule" [1.100.001].

[See Revision History Table.]

1.295.143 Hosting Services

.01 For purpose of this interpretation, hosting services are nonattest services that involve a *member* accepting responsibility for the following:

- a. Acting as the sole host of a financial or non-financial information system of an *attest client*
- b. Taking custody of or storing an *attest client's* data or records whereby, that data or records are available only to the *attest client* from the *member*, such that the *attest client's* data or records are otherwise incomplete
- c. Providing electronic security or back-up services for an *attest client's* data or records

.02 When a *member* provides hosting services, the *member* is maintaining the *attest client's* internal control over its data or records. Accordingly, the management participation threat to the *member's* compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level*, and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*.

.03 Examples of activities that are considered hosting services, and as such will *impair independence* if performed for an *attest client*, include accepting responsibility for the following:

- a. Housing the *attest client's* website or other non-financial information system
- b. Keeping the *attest client's* data or records on the *attest client's* behalf, for example, the *attest client's* general ledger information, supporting schedules (such as, depreciation or amortization

schedules), lease agreements or other legal documents are stored on the *member's firm's* servers or servers licensed by the *member's firm* or the *member* is responsible for storing hard copy versions of the data or records

- c. Being the *attest client's* business continuity or disaster recovery provider

.04 Examples of activities that are not considered to be hosting services, and as such will not *impair independence* provided *members* comply with the requirements of the other *interpretations* of the "Nonattest Services" subtopic include these:

- a. Retaining a copy of an *attest client's* data or records as documentation to support a service the *member* provided to the *attest client*. Some examples are as follows:
 - i. The payroll data that support a payroll tax return prepared by the *member* for the *attest client*
 - ii. A bank reconciliation that supports attest procedures performed by the *member* on the *attest client's* cash account
 - iii. The *attest client's* vendor data used to prepare an analysis of vendor activity
- b. Retaining, for a *member's* records, a copy of a work product prepared by the *member* (for example, a tax return).
- c. Using general ledger software to facilitate the delivery of bookkeeping services when either of the following occurs:
 - i. The *member* and the *attest client* maintain separate instances of the software on their respective servers, and the *member* provides updated financial information electronically to the *attest client*.
 - ii. The *attest client* enters into an agreement with a third-party service provider to maintain its software in a cloud-based solution and grants the *member* access to the software so that the *member* can perform the bookkeeping service for the *attest client*.
- d. Retaining data collected by the *member* related to a work product that the *member* prepared for an *attest client*. For example, the *member* conducts an employee survey and provides the *attest client* with a report. The *member* retains the survey data collected to support the work product.
- e. Electronically exchanging data, records, or the *member's* work product with an *attest client* or on behalf of an *attest client* at the *attest client's* request. For example, the *member* uses a portal as follows:
 - i. To exchange data and records with the *attest client* related to *professional services* provided by the *member* to the *attest client*
 - ii. To deliver the *member's* work product to third parties at the *attest client's* request

To avoid providing hosting services, *members* should terminate the *attest client's* access to the data or records in the portal within a reasonable period of time after the conclusion of the engagement.

- f. Licensing software to an *attest client* that the *attest client* uses to input its data and receive an output that the *attest client* is responsible for maintaining, provided the software does not perform an activity that, if performed directly by the *member*, would *impair independence*.
- g. Having possession of a depreciation schedule prepared by the *member*, provided the depreciation schedule and calculation are given to the *attest client* so that *attest client's* books and records are complete.
- h. Retaining an *attest client's* original data or records to facilitate the performance of a nonattest service (for example, obtaining original records to prepare the attest client's tax return), provided that the data or records are returned to the *attest client* at the end of the engagement or, in a multi-year engagement, at least annually. This does not apply to ongoing hosting services as described in paragraph .01 of this interpretation.

Effective Date

.05 This interpretation is effective July 1, 2019.

[See Revision History Table.]

Nonauthoritative questions and answers regarding hosting services are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

1.295.145 Information Systems Design, Implementation, or Integration

.01 When a member provides information systems design, implementation, or integration services to an *attest client*, self-review and management participation *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, a member may

- a. install or integrate an *attest client's* financial information system that the member did not design or develop (for example, an off-the-shelf accounting package).
- b. assist in setting up the *attest client's* chart of accounts and *financial statement* format with respect to the *attest client's* financial information system.
- c. design, develop, install, or integrate an *attest client's* information system that is unrelated to the *attest client's financial statements* or accounting records.
- d. provide training and instruction to an *attest client's* employees on an information and control system.
- e. perform network maintenance, such as updating virus protection, applying routine updates and patches, or configuring user settings consistent with management's request.

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if, for example, a member

- a. designs or develops an *attest client's* financial information system.
- b. makes other than insignificant modifications to source code underlying an *attest client's* existing financial information system.
- c. supervises *attest client* personnel in the daily operation of an *attest client's* information system.
- d. operates an *attest client's* network. [Prior reference: paragraph .05 of ET section 101]

Nonauthoritative questions and answers regarding information systems design, implementation, and integration services are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

June 2019

The revised interpretation "Information Systems Services," formerly "Information Systems Design, Implementation, or Integration" (ET sec. 1.295.145) under the "Independence Rule" (ET sec. 1.200.001) is effective January 1, 2023, and early implementation is allowed.

Information Systems Services

Introduction

.01 Self-review and management participation *threats* to the member's compliance with the "Independence Rule" [1.200.001] may exist when a member provides nonattest services related to an attest client's information systems.

.02 This interpretation applies to all attest engagements, including those in which the subject matter of the engagement is not financial statements. In these cases, the member should define a financial information system as any information system that is subject to the member's attest procedures considering the relevant factors in paragraph .03a.

Terminology

.03 The following terms are defined solely for the purpose of applying this interpretation:

- a. A financial information system (FIS) is a system that aggregates source data underlying the *financial statements* or generates information that is significant to either the financial statements or financial processes as a whole. An FIS includes a tool that calculates results unless
 - i. the tool performs only discrete calculations;
 - ii. the attest client evaluates and accepts responsibility for the input and assumptions; and

- iii. the attest client has sufficient information to understand the calculation and the results.
- b. Designing an information system means determining how a system or transaction will function, process data, and produce results (for example, reports, journal vouchers, and documents such as sales and purchase orders) to provide a blueprint or schematic for the development of software code (programs) and data structures.
- c. Developing an information system entails creating software code, for individual or multiple modules, and testing such code to confirm it is functioning as designed.
- d. Commercial off-the-shelf (COTS) refers to software developed, distributed, maintained, and supported by an entity or entities that are not the member or member's firm (a third-party vendor), sometimes referred to as an "off-the-shelf" package or solution. COTS solutions have generally referred to traditional on-premise software that runs on a customer's own computers or on a third-party vendor's "cloud" infrastructure. COTS solutions range from software packages that require only installation on a computer and are ready to run to large-scale, complex enterprise applications.

Design, Development, or Implementation Services Not Related to an FIS

.04 When performing design, development, or implementation services described in this interpretation for an *attest client* that are not related to an FIS, *threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* provided all requirements of the "Nonattest Services" subtopic [1.295] of the "Independence Rule" are met, including that the attest client has not outsourced a function, process, or activity to the *member*, which would result in the member assuming a management responsibility.

Design or Develop an FIS

.05 When a *member* designs or develops an *attest client's* FIS, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an acceptable level by the application of *safeguards* and *independence* would be *impaired*.

.06 To determine whether a nonattest service is related to an FIS, *members* should consider all relevant factors, such as whether the nonattest service will affect the following:

- a. System controls or system output that will be subject to attest procedures.
- b. A system that generates data that are used as input to the financial statements, including data or information that is either reflected in or used in determining amounts and disclosures included in the financial statements.
- c. A data-gathering system, such as an analytical or reporting tool, that is used in management's decision-making about matters that could significantly affect financial reporting.

- d. A system that is part of the *attest client's* internal controls over financial reporting, including information systems used to effect internal controls over financial reporting (for example, a system used to ensure that information produced for the financial statements is accurate). However, information systems used only in connection with controlling the efficiency and effectiveness of operations are considered unrelated to the financial statements and accounting records.

Implement a COTS FIS Software Solution

.07 Implementation services involve activities related to an *attest client's* information systems after the design and development of the system. Implementation ceases when the system is available on a regular basis to the attest client for its intended use. For example, implementation services can include activities such as installing, configuring, interfacing, customizing, and data translation. Services that are performed post-implementation, such as the maintenance, support, and monitoring of the system, are not implementation services.

.08 *Threats* created by certain COTS implementation services related to the *attest client's* FIS may be reduced to an *acceptable level* by the application of *safeguards*; however, in other situations, threats to compliance with the "Independence Rule" [1.200.001] would be significant and could not be reduced to an acceptable level by the application of safeguards. These situations are addressed in paragraphs .09–.20 of this interpretation.

Install a COTS FIS Software Solution

.09 To install a COTS FIS software solution means the initial loading of software on the client's designated hosting site. Software configuration, interfacing, customizing and data translation activities may follow installation.

.10 When a *member* installs a COTS FIS software solution, *threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level*, provided all requirements of the "Nonattest Services" subtopic [1.295] of the "Independence Rule" are met.

Configure a COTS FIS Software Solution

.11 To configure a COTS FIS software solution means inputting the client-selected features, functionality options, and settings within the third-party vendor's software, which determines how the software will perform certain transactions and process data. Configuration options may also include selecting the predefined format of certain data attributes and the inclusion or exclusion of such attributes. However, if the member were to design or develop new software code or features to modify or alter the functionality of the COTS software solution in ways not predefined by the third-party vendor, this would be considered designing or developing activities, as described in items (b)–(c) of paragraph .03.

.12 When a *member* configures a COTS FIS software solution based on client-selected features, functionality options, and settings within the third-party vendor's software, *threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* provided all requirements of the "Nonattest Services" subtopic [1.295] of the "Independence Rule" are met.

Customize a COTS FIS Software Solution

.13 To customize a COTS FIS software solution means to modify or enhance the features and functions in ways that go beyond the options provided by the third-party vendor when configuring the COTS software solution.

- a. Modification involves altering the COTS software solution code to change or add to the functionality provided by the third-party vendor.
- b. Enhancements involve developing new code, external to the COTS software solution, that works in concert with the COTS software solution to provide altered or additional functionality.

.14 If a *member* customizes an *attest client's* COTS FIS software solution, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an acceptable level and could not be reduced to an acceptable level by the application of *safeguards*; *independence* would be *impaired*.

Interface a COTS FIS Software Solution

.15 Providing interface services for a COTS FIS software solution means connecting two or more systems by designing and developing software code that passes data from one system to another. Interfaces may flow in one direction or be bidirectional. Interfaces may involve the performance of an end-to-end transaction or they may pass data from one system to another.

.16 If a *member* provides interface services for a COTS FIS software solution, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an acceptable level by the application of *safeguards*; *independence* would be *impaired* except as provided for in paragraph .17.

.17 If a *member* uses a third-party vendor's application, such as an application programming interface (API), to interface legacy or COTS FIS software solutions, *threats* to *independence* would be at an *acceptable level*, provided the member will not be designing or developing code for the application to work and all requirements of the "Nonattest Services" subtopic [1.295] of the "Independence Rule" [1.200.001] are met.

Data Translation Services Related to a COTS FIS Software Solution

.18 Performing data translation services for a COTS FIS software solution involves designing and developing the rules or logic necessary to convert legacy system data to a format compatible with that of the new system.

.19 If a *member* performs data translation services for a COTS FIS software solution, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an acceptable level by the application of *safeguards* and *independence* would be *impaired* except as provided for in paragraph .20.

.20 If a *member* uses a third-party vendor's application, such as an API, to perform data translation services for a COTS FIS software solution, *threats* to *independence* would be at an *acceptable level*, provided the member will not be designing or developing code for the application to work and all requirements of the "Nonattest Services" subtopic [1.295] of the "Independence Rule" [1.200.001] are met.

System and Network Maintenance, Support, and Monitoring

.21 Maintenance, support, and monitoring services are activities that are provided after a financial or nonfinancial system or network is implemented. If post-implementation services involve the *attest client* outsourcing an ongoing function, process, or activity to the *member* that would result in the member assuming a management responsibility, compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an acceptable level by the application of *safeguards* and *independence* would be *impaired*. Examples of services that involve an ongoing function, process, or activity that would result in the member assuming a management responsibility include services in which the *member* directly or indirectly does any of the following:

- a. Operates the attest client's network, such as managing the attest client's systems or software applications
- b. Supervises client personnel involved in the operation of the attest client's information systems
- c. Has responsibility for monitoring or maintaining the attest client's network performance
- d. Operates or manages the attest client's information technology help desk
- e. Has responsibility to perform ongoing network maintenance, such as updating virus protection solutions, applying routine updates and patches, or configuring user settings
- f. Has responsibility for maintaining the security of the attest client's networks and systems

.22 *Independence* will not be *impaired* provided all requirements of the "Nonattest Services" subtopic [1.295] of the "Independence Rule" [1.200.001] are met and the maintenance, support, or monitoring services are individually separate, distinct, and not ongoing engagements in which the *attest client* has outsourced no function, process, or activity to the *member* that would result in the member assuming a management responsibility. Examples of services that would not impair independence may include any of the following services:

- a. Analyzing a network and providing observations or recommendations
- b. Applying virus protection solutions or updates that the member did not design or develop
- c. Applying certain updates and patches that the member did not design or develop
- d. Providing advice, training, or instruction on a software solution
- e. Assessing the design or operating effectiveness of an attest client's security over information technology systems
- f. Assessing the attest client's information technology security policies or practices

Nonauthoritative questions and answers regarding information systems services are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

1.295.150 Internal Audit

.01 For purposes of this interpretation, internal audit services involve assisting the *attest client* in the performance of its internal audit activities, sometimes referred to as "internal audit outsourcing." When a member provides internal audit services to an *attest client*, self-review and management participation *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 The *attest client's* management is responsible for directing the internal audit function, including the management thereof. Such responsibilities include, but are not limited to, designing, implementing and maintaining internal control. *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level*, cannot be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired* if the *attest client* outsources the internal audit function to the member, whereby the member, in effect, manages the *attest client's* internal audit activities.

.03 However, except for the outsourcing services discussed in paragraph .02, *threats* to compliance with the "Independence Rule" [1.200.001] would be at an *acceptable level* and *independence* would not be *impaired* if the member assists the *attest client* in performing financial and operational internal audit activities, provided that, in addition to the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule," the member is satisfied that management

- a. designates an individual or individuals who possess suitable skill, knowledge, and experience, preferably within senior management, to be responsible for the internal audit function.
- b. determines the scope, risk, and frequency of internal audit activities, including those the member will perform in providing the services.
- c. evaluates the findings and results arising from the internal audit activities, including those the member will perform in providing the services.
- d. evaluates the adequacy of the audit procedures performed and the findings resulting from the performance of those procedures.

.04 For example, if the member applies the *safeguards* in paragraph .03, the member may assess whether performance is in compliance with management's policies and procedures, identify opportunities for improvement, and recommend improvement or further action for management consideration and decision making.

.05 The member may assist the individual responsible for the internal audit function in performing preliminary audit risk assessments, preparing audit

plans, and recommending audit priorities. The member should also be satisfied that *those charged with governance* are informed about the member's and management's respective roles and responsibilities in connection with the engagement. Such information should provide *those charged with governance* a basis for developing guidelines for management and the member to follow in carrying out these responsibilities and monitoring how well the respective responsibilities have been met.

.06 *Threats to compliance with the "Independence Rule" [1.200.001] would not be at an acceptable level and could not be reduced to an acceptable level by the application of safeguards, and independence would be impaired, if, for example, in addition to those activities listed in the "Management Responsibilities" interpretation [1.295.030] of the "Independence Rule," a member*

- a. performs ongoing evaluations (see paragraph .10 that follows) or control activities (for example, reviewing *loan* originations as part of the *attest client's* approval process or reviewing customer credit information as part of the customer's sales authorization process) that affect the execution of transactions or ensure that transactions are properly executed or accounted for, or both, and performs routine activities in connection with the *attest client's* operating or production processes that are equivalent to those of an ongoing compliance or quality control function.
- b. performs separate evaluations on the effectiveness of a significant control such that the member is, in effect, performing routine operations that are built into the *attest client's* business process.
- c. has *attest client* management rely on the member's work as the primary basis for the *attest client's* assertions on the design or operating effectiveness of internal controls.
- d. determines which, if any, recommendations for improving the internal control system should be implemented.
- e. reports to the board of directors or audit committee on behalf of management or the individual responsible for the internal audit function.
- f. approves or is responsible for the overall internal audit work plan, including the determination of the internal audit risk and scope, project priorities, and frequency of performance of audit procedures.
- g. is connected with the *attest client* as an employee or in any capacity equivalent to a member of management (for example, being listed as an employee in the *attest client's* directories or other *attest client* publications, permitting himself or herself to be referred to by title or description as supervising or being in charge of the *attest client's* internal audit function, or using the *attest client's* letterhead or internal correspondence forms in communications).

.07 *Monitoring activities.* Designing, implementing, or maintaining the *attest client's* monitoring activities are management responsibilities. Accordingly, *independence* would be *impaired* if a member accepts responsibility for performing such activities. Monitoring activities are procedures performed to assess whether components of internal control are present and functioning. Monitoring can be done through ongoing evaluations, separate evaluations, or some combination of the two. Ongoing evaluations are generally defined, routine operations built in to the *attest client's* business processes and performed on a real-time basis. Ongoing evaluations, including managerial activities and everyday supervision of employees, monitor the presence and functioning of the

components of internal control in the ordinary course of managing the business. A member who performs such activities for an *attest client* would be considered to be accepting responsibility for maintaining the *attest client's* internal control. Accordingly, the management participation *threat* created by a member performing ongoing evaluations is so significant that no *safeguards* could reduce the *threat* to an *acceptable level*, and thus *independence* would be *impaired*.

.08 Separate evaluations are conducted periodically and generally not ingrained within the business but can be useful in taking a fresh look at whether internal controls are present and functioning. Such evaluations include observations, inquiries, reviews, and other examinations, as appropriate, to ascertain whether controls are designed, implemented, and conducted. The scope and frequency of separate evaluations is a matter of judgment and vary depending on assessment of risks, effectiveness of ongoing evaluations, and other considerations. Because separate evaluations are not built into the *attest client's* business process, separate evaluations generally do not create a significant management participation *threat* to *independence*.

.09 Members should refer to the Committee of Sponsoring Organizations of the Treadway Commission's (COSO's) *Internal Control—Integrated Framework*, for additional guidance on monitoring activities and distinguishing between ongoing and separate evaluations.

.10 Members should use judgment in determining whether otherwise permitted internal audit services performed may result in a significant management participation *threat* to *independence*, considering factors such as the significance of the controls being tested, the scope or extent of the controls being tested in relation to the overall *financial statements* of the *attest client*, as well as the frequency of the internal audit services. If the *threat* to *independence* is considered significant, the member should apply *safeguards* to eliminate or reduce the *threat* to an *acceptable level*. If no *safeguards* could reduce the *threat* to an *acceptable level*, then *independence* would be *impaired*.

.11 *Attest-related services*. Services considered extensions of the member's audit scope applied in the audit of the *attest client's financial statements*, such as confirming accounts receivable and analyzing fluctuations in account balances, are not considered internal audit services and would not be subject to this interpretation even if the extent of such testing exceeds that required by generally accepted auditing standards (GAAS). In addition, engagements performed under the attestation standards would not be considered internal audit services and, therefore, would not *impair independence*.

.12 When a member performs internal audit services that would not *impair independence* under this interpretation and is subsequently engaged to perform an attestation engagement to report on management's assertion regarding the effectiveness of its internal control, *independence* would not be considered *impaired*, provided the member is satisfied that *attest client* management does not rely on the member's work as the primary basis for its assertion. [Prior reference: paragraph .05 of ET section 101]

[See Revision History Table.]

1.295.155 Investment Advisory or Management

.01 When a member provides investment advisory or management services to an *attest client*, self-review and management participation *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist.

.02 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*. For example, a member may

- a. recommend the *attest client's* allocation of funds among various investments or asset classes based upon the *attest client's* desired rate of return, risk tolerance, or other parameters.
- b. perform recordkeeping and reporting of the *attest client's* portfolio balances, including providing the *attest client* with a comparative analysis of the *attest client's* investments to third-party benchmarks.
- c. evaluate the manner in which an *attest client's* portfolio is being managed by investment account managers, including assessing whether the managers are
 - i. following the guidelines of the *attest client's* investment policy statement.
 - ii. meeting the *attest client's* investment objectives.
 - iii. conforming to the *attest client's* stated investment parameters or risk tolerance.
- d. transmit an *attest client's* investment selection, with the *attest client's* consent, to the *attest client's* broker-dealer or equivalent, provided that the *attest client* has authorized the broker-dealer or equivalent to execute the transaction.

.03 However, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if, for example, a member

- a. makes investment decisions on behalf of management or otherwise has discretionary authority over an *attest client's* investments.
- b. executes a transaction to buy or sell an *attest client's* investments.
- c. has custody of an *attest client's* assets, such as taking temporary possession of securities purchased by an *attest client*. [Prior reference: paragraph .05 of ET section 101]

1.295.160 Tax Services

.01 For purposes of this interpretation, tax services include preparation of a tax return, transmittal of a tax return, and transmittal of any related tax payment to the taxing authority, signing and filing a tax return, having a power of attorney limited strictly to tax matters; and authorized representation of *attest clients* in administrative proceedings before a taxing authority.

.02 For purposes of this interpretation, a tax return includes all tax filings, including informational tax forms (such as estimated tax vouchers), extension forms, and Forms 990, 5500, 1099, and W-2, filed with a taxing authority or other regulatory agency.

.03 *Preparation and transmittal*. When a member prepares a tax return and transmits the tax return and related tax payment to a taxing authority in paper or electronic form, self-review and management participation *threats* to the member's compliance with the "Independence Rule" [1.200.001] may exist. If the member applies the "General Requirements for Performing Nonattest

Services" interpretation [1.295.040] of the "Independence Rule," *threats* would be at an *acceptable level* and *independence* would not be *impaired*, provided that the member does not have custody or control over the *attest client's* funds or assets and the individual designated by the *attest client* to oversee the tax services

- a. reviews and approves the tax return and related tax payment.
- b. if required for filing, signs the tax return prior to the member transmitting the return to the taxing authority.

The following are not considered having custody or control over an *attest client's* funds: making electronic tax payments authorized by an *attest client* pursuant to a taxing authority's prescribed criteria (as discussed in paragraph .04), affixing the *attest client's* depository account information on a tax return, or remitting an *attest client's* check made payable to the taxing authority.

.04 If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired* when a member signs and files a tax return on behalf of management, provided that the member has the legal authority to do so and

- a. the taxing authority has prescribed procedures in place for an *attest client* to permit a member to sign and file a tax return on behalf of the *attest client* (for example, Forms 8879 or 8453), and such procedures meet, at the minimum, standards for electronic return originators and officers outlined in Form 8879, or
- b. an individual in management who is authorized to sign and file the *attest client's* tax return provides the member with a signed statement that clearly identifies the return being filed and represents that such individual
 - i. is authorized to sign and file the tax return.
 - ii. has reviewed the tax return, including accompanying schedules and statements, and it is true, correct, and complete to the best of the individual's knowledge and belief.
 - iii. authorizes the *member* or another named individual in the *member's firm* to sign and file the tax return on the *attest client* behalf.

.05 *Authorized representation in administrative proceedings.* If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired* if a member acts as the *attest client's* authorized representative in administrative proceedings before a taxing authority, provided that the member obtains the *attest client's* agreement prior to committing the *attest client* to a specific resolution with the taxing authority. [Prior reference: paragraph .05 of ET section 101]

.06 *Power of attorney.* When a member has an *attest client's* power of attorney, the self-review, management participation, and advocacy *threats* to the *covered member's* compliance with the "Independence Rule" [1.200.001] may exist. If the member applies the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule," *threats* would be at an *acceptable level* and *independence* would not be *impaired*, provided that the member's use of the power of attorney is limited strictly to tax matters and the member does not bind the *attest client* to any agreement with a taxing authority or other regulatory agency. [No prior reference: new content]

.07 *Representation in court.* *Threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level*, and could not be reduced to an *acceptable level* through the application of *safeguards*, and *independence* would be *impaired* if a member represents an *attest client* in court to resolve a tax dispute. For purposes of this interpretation, court encompasses a tax, district, or federal court of claims and the equivalent state, local, or foreign forums. [Prior reference: paragraph .05 of ET section 101]

.08 For information about transition provision for engagements commenced prior to February 28, 2007, see <https://us.aicpa.org/interestareas/professionalethics/community/downloadabledocuments/transistion%20periods.pdf>.

Effective Date

.09 Paragraph .06 of this interpretation is effective December 15, 2014.

A nonauthoritative basis-for-conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsnonattestservices.doc>.

In addition, nonauthoritative questions and answers regarding performance tax services are available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/nonattestservicesfaqs.pdf>.

1.297 Independence Standards for Engagements Performed in Accordance With Statements on Standards for Attestation Engagements

1.297.010 Application of the Independence Rule to Engagements Performed in Accordance With Statements on Standards for Attestation Engagements

.01 The "Independence Rule" [1.200.001] and its *interpretations* apply to all *attest engagements*. However, when performing engagements to issue reports in accordance with Statements on Standards for Attestation Engagements (SSAEs), when *independence* is required or when the *member's* compilation report does not disclose a lack of *independence*, the *covered member* needs to be independent with respect to the responsible party(ies), as defined in the SSAEs.

.02 If the individual or entity that engages the *covered member* (engaging entity) is not the responsible party, the *covered member* need not be *independent* of that engaging entity. However, because *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001] and the "Conflicts of Interest" interpretation [1.110.010] may still exist with respect to the engaging entity, *members* should comply with this rule and interpretation.

.03 In addition, application of the "Independence Rule" [1.200.001] is further modified as set forth in the "Agreed-Upon Procedures Engagements in Accordance With SSAEs" interpretation [1.297.020] and the "Engagements, Other

Than AUPs, Performed in Accordance With SSAEs" interpretation [1.297.030] of the "Independence Rule." [Prior reference: paragraph .13 of ET section 101]

[See Revision History Table.]

1.297.020 Agreed-Upon Procedure Engagements Performed in Accordance With SSAEs

.01 For purposes of this interpretation, subject matter is as defined in the SSAEs.

.02 When performing agreed-upon procedures (AUP) engagements in accordance with the SSAEs, the application of the "Independence Rule" [1.200.001] is modified, as described in the "Application of the Independence Rule to Engagements Performed in Accordance With Statements on Standards for Attestation Engagements" interpretation [1.297.010] of the "Independence Rule" and this interpretation.

.03 When providing nonattest services that would otherwise *impair independence* under the *interpretations* of the "Nonattest Services" subtopic [1.295] under the "Independence Rule" [1.200.001], *threats* would be at an *acceptable level* and *independence* would not be *impaired*, provided that the nonattest services do not relate to the specific subject matter of the SSAE engagement. *Threats* would be at an *acceptable level* and *independence* would also not be *impaired* if the "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" were not applied when providing the nonattest services, provided that the nonattest services do not relate to the specific subject matter of the AUP engagement.

.04 When a *member* or *member's firm* enters into a staff augmentation arrangement as described in paragraph .01 of the "Staff Augmentation Arrangements" interpretation [1.275.007], *threats* would be at an *acceptable level* and *independence* would not be *impaired* provided that the services performed by the augmented staff are unrelated to the specific subject matter of the AUP engagement.

.05 In addition, when performing an AUP engagement under the SSAEs, *threats* would be at an *acceptable level* and *independence* would not be *impaired*, if the following *covered members* and their *immediate families* are independent of the responsible party(ies):

- a. Individuals participating on the AUP engagement team
- b. Individuals who directly supervise or manage the AUP engagement *partner* or *partner equivalent*
- c. Individuals who consult with the *attest engagement team* regarding technical or industry-related issues specific to the AUP engagement

.06 Furthermore, *threats* to compliance with the "Independence Rule" [1.200.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and *independence* would be *impaired*, if the *firm* had a material financial relationship with the responsible party(ies) that was covered by any of the following interpretations of the "Independence Rule":

- a. Paragraphs .01–.02 of "Overview of Financial Interests" [1.240.010]
- b. "Trustee or Executor" [1.245.010]

- c. "Joint Closely Held Investments" [1.265.020]
- d. "Loans" [1.260.010] [Prior reference: paragraph .13 of ET section 101]

Effective Date

.07 The addition of *partner equivalents* to paragraph .05 is effective for engagements covering periods beginning on or after December 15, 2014.

[See Revision History Table.]

1.297.030 Engagements, Other Than AUPs, Performed in Accordance With SSAEs

.01 For purposes of this interpretation, subject matter is as defined in the SSAEs.

.02 When performing an engagement, other than an AUP, in accordance with the SSAEs, the application of the "Independence Rule" [1.200.001] is modified, as described in the "Application of the Independence Rule to Engagements Performed in Accordance With Statements on Standards for Attestation Engagements" interpretation [1.297.010] of the "Independence Rule" and this interpretation.

.03 When providing nonattest services that would otherwise *impair independence* under the *interpretations* of the "Nonattest Services" subtopic [1.295], *threats* would be at an *acceptable level* and *independence* would not be *impaired* if the following safeguards are met:

- a. Nonattest services do not relate to the specific subject matter of the SSAE engagement.
- b. The "General Requirements for Performing Nonattest Services" interpretation [1.295.040] of the "Independence Rule" [1.200.001] are met when providing the nonattest service. [Prior reference: paragraph .13 of ET section 101]

1.298 Breach of an Independence Interpretation

1.298.010 Breach of an Independence Interpretation

Introduction

.01 AICPA bylaws require *members* to comply with the "Independence Rule" [1.200.001]. This interpretation provides guidance to assist *members* in evaluating and addressing the consequences of a breach of an *independence interpretation* and the effect on the *attest engagement team's* integrity, objectivity, and professional skepticism so the *member* or *member's firm* can determine if the consequences of a breach can be satisfactorily addressed. This interpretation also provides specific steps and actions the *member* should take when the *member* becomes aware that a breach of an *independence interpretation* has occurred. However, a *member's* determination that the consequences of a breach of an *independence interpretation* have been satisfactorily addressed will not preclude an investigation or enforcement action. In any case, the *member* should be prepared to justify such determination.

Required Policies and Procedures Established by the Firm

.02 In order for the consequences of an *independence* breach to be addressed by a *member* or the *member's firm* pursuant to the provisions of this interpretation, the *firm* must be compliant with QM section 10A, *A Firm's System of Quality Control* (AICPA, *Professional Standards*), which requires the *member's firm* to have established policies and procedures designed to provide it with reasonable assurance that the *firm*, its personnel, and, when applicable, others subject to *independence* requirements, maintain *independence* when required. The policies and procedures should enable the *firm* to communicate its *independence* requirements to its personnel and, when applicable, others subject to them; to identify and evaluate circumstances and relationships that create *threats* to *independence*; and to take appropriate action to eliminate those *threats* or reduce them to an *acceptable level* by applying *safeguards* or, if effective *safeguards* cannot be applied, withdrawing from the engagement. These policies and procedures should be designed to provide the *firm* with reasonable assurance that it is notified of breaches of *independence* requirements and to enable it to take appropriate actions to resolve such situations.

Breaches Resulting in Significant Threats

.03 In situations in which a *partner* or professional employee of the *firm* breaches an *independence interpretation* and the *threat* to *independence* resulting from the breach is significant such that the *attest engagement team's* integrity, objectivity, and professional skepticism are compromised, the provisions of this interpretation could not address the consequences of the breach as no actions could be taken to satisfactorily address the consequences of the breach.

.04 In situations in which the lead *attest engagement* partner or an *individual in a position to influence the attest engagement* either (1) committed the breach or (2) knows of a breach and fails to ensure the breach is promptly communicated to or known by an appropriate individual within the firm as described in this interpretation, there is a rebuttable presumption the provisions of this interpretation would not be able to address the breach as the *threats* to the *attest engagement team's* integrity, objectivity, and professional skepticism and the threats to the appearance of *independence* would be considered so significant that no actions could be taken to satisfactorily address the consequences of the breach.

Identifying and Communicating a Breach

.05 When a breach is identified, the *member* should, in accordance with his or her *firm's* policies and procedures, promptly communicate the breach to an appropriate individual within the *firm*, for example, an individual or individuals with responsibility for the policies and procedures relating to *independence*, or the *attest engagement partner* (the responsible individual).

.06 The responsible individual should report the breach to those who need to take appropriate action and, when appropriate, should report the breach to relevant *network firms*. The responsible individual should be satisfied that the interest or relationship that caused the breach has been terminated, suspended, or eliminated and should address the consequences of the breach. A consequence of a breach may be that termination of the *attest engagement* is necessary.

Evaluating the Significance of a Breach

.07 The responsible individual should evaluate the significance of the breach and its effect on the *attest engagement team's* integrity, objectivity, and professional skepticism and the ability to issue an attest report. The significance of the breach will depend on factors such as the following:

- a. The nature and duration of the breach
- b. The number and nature of any previous breaches with respect to the current *attest engagement*
- c. Whether a *member* of the *attest engagement team* had knowledge of the interest or relationship that caused the breach
- d. Whether the individual who caused the breach is a *member* of the *attest engagement team* or another individual for whom there are *independence* requirements
- e. The role of the individual if the breach relates to a *member* of the *attest engagement team*
- f. The effect of the service, if any, on the accounting records or the *attest client's financial statements* if the breach was caused by the provision of a *professional service*
- g. Whether a *partner* or *partner equivalent* of the *firm* had knowledge of the breach and failed to ensure that the breach was promptly communicated to an appropriate individual within the *firm*
- h. Whether the breach involved solely an *affiliate* of a *financial statement attest client* and if so, the nature of the *affiliate* relationship
- i. The extent of the self-interest, advocacy, undue influence, or other *threats* created by the breach

Addressing the Consequences of a Breach

.08 Depending upon the significance of the breach, it may be necessary to terminate the *attest engagement* or it may be possible to take action that satisfactorily addresses the consequences of the breach. Certain breaches described in this interpretation cannot be addressed by the provisions of this interpretation. For all other breaches, the responsible individual should determine whether satisfactory action can be taken and is appropriate in the circumstances. In making this determination, the responsible individual should exercise professional judgment and take into account whether a reasonable and informed third party, weighing the significance of the breach, the action to be taken, and all the specific facts and circumstances available to the *member* at that time, would likely conclude that the *attest engagement team's* integrity, objectivity, and professional skepticism would be compromised and therefore whether *independence* is *impaired*.

.09 Examples of actions that the responsible individual may consider include the following:

- a. Removing the relevant individual from the *attest engagement team*
- b. Conducting an additional review of the affected attest work or re-performing that work to the extent necessary; in either case, using different personnel

- c. Recommending that the *attest client* engage another *firm* to review or re-perform the affected attest work to the extent necessary
- d. Engaging another *firm* to evaluate the results of the nonattest service or having another firm re-perform the nonattest service to the extent necessary to enable it to take responsibility for the service if the breach relates to a nonattest service that affects the accounting records or an amount that is recorded in the *financial statements*

Communicating With Those Charged With Governance at the Attest Client

.10 If the responsible individual determines that action cannot be taken to satisfactorily address the consequences of the breach, the responsible individual should inform *those charged with governance* as soon as practicable and take the steps necessary to terminate the *attest engagement* in compliance with any applicable legal or regulatory requirements relevant to terminating the *attest engagement*. Where termination is not permitted by law or regulation, the responsible individual should comply with any reporting or disclosure requirements.

.11 If the responsible individual determines that action can be taken to satisfactorily address the consequences of the breach, the responsible individual should discuss the breach and the action taken or proposed to be taken with *those charged with governance* as soon as practicable, unless *those charged with governance* have specified an alternative timing for reporting less significant breaches. The matters to be discussed should include the following:

- a. The significance of the breach, including its nature and duration
- b. How the breach occurred and how it was identified
- c. The action taken or proposed to be taken and the responsible individual's rationale for how the action will satisfactorily address the consequences of the breach and enable the *firm* to issue the attest report
- d. The conclusion that, in the responsible individual's professional judgment, the integrity, objectivity, and professional skepticism of the *attest engagement team* has not been compromised and the rationale for that conclusion
- e. Any steps that the responsible individual has taken or proposes to take to reduce or avoid the risk of further breaches occurring

.12 The responsible individual should communicate in writing with *those charged with governance* all matters discussed in accordance with the paragraph above and obtain the concurrence of *those charged with governance* that action can be, or has been, taken to satisfactorily address the consequences of the breach. The communication shall include a description of the *firm's* policies and procedures relevant to the breach designed to provide it with reasonable assurance that *independence* is maintained and any steps that the *firm* has taken, or proposes to take, to reduce or avoid the risk of further breaches occurring. If *those charged with governance* do not concur that the action satisfactorily addresses the consequences of the breach, the responsible individual should take the steps necessary to terminate the *attest engagement*, where permitted by law or regulation, in compliance with any applicable legal or regulatory requirements relevant to terminating the *attest engagement*. Where termination is not permitted by law or regulation, the responsible individual should comply with any reporting or disclosure requirements.

Breaches Relating to Previously Issued Reports

.13 If the breach occurred prior to the issuance of the previous attest report, the responsible individual should comply with this section in evaluating the significance of the breach and its effect on the *attest engagement team's* objectivity, integrity, and professional skepticism and its ability to issue an attest report in the current period. The responsible individual should also consider the effect of the breach, if any, on the *attest engagement team's* integrity, objectivity, and professional skepticism in relation to any previously issued attest reports, and the possibility of withdrawing such attest reports in accordance with professional standards, and discuss the matter with *those charged with governance*.

Documentation

.14 The responsible individual should document the breach, the action taken, key decisions made and all the matters discussed with *those charged with governance* and any discussions with a professional body, relevant regulator, or oversight authority. When the *firm* continues with the *attest engagement*, the matters to be documented should also include the conclusion that, in the responsible individual's professional judgment, the integrity, objectivity, and professional skepticism of the *attest engagement team* have not been compromised and the rationale for why the action taken satisfactorily addressed the consequences of the breach such that the *firm* could issue an attest report. Failure to prepare the required documentation does not *impair independence* provided the *member* can demonstrate the *member* satisfactorily addressed the consequences of the breach and discussed the breach, the action taken, and key decisions made with *those charged with governance*, and as applicable, a professional body, relevant regulator, or oversight authority. However, failure to prepare the required documentation would be considered a violation of the "Compliance With Standards Rule" [1.310.001].

.15 Refer to the "Unsolicited Financial Interests" interpretation [1.240.020] of the "Independence Rule" [1.200.001] for guidance on unsolicited financial interests.

Effective Date

.16 This interpretation is effective March 31, 2016. Early implementation is allowed.

1.300 General Standards

1.300.001 General Standards Rule

.01 *A member shall comply with the following standards and with any interpretations thereof by bodies designated by Council:*

- a. Professional Competence. Undertake only those *professional services* that the *member* or the *member's firm* can reasonably expect to be completed with professional competence.
- b. Due Professional Care. Exercise due professional care in the performance of *professional services*.
- c. Planning and Supervision. Adequately plan and supervise the performance of *professional services*.

- d. Sufficient Relevant Data. Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any *professional services* performed.

(See appendix A, "Council Resolution Designating Bodies to Promulgate Technical Standards.") [Prior reference: paragraph .01 of ET section 201]

Interpretations Under the General Standards Rule

1.300.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "General Standards Rule" [1.300.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "General Standards Rule" [1.300.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.300.010 Competence

.01 Competence, in this context, means that the *member* or *member's* staff possess the appropriate technical qualifications to perform *professional services* and that the *member*, as required, supervises and evaluates the quality of work performed. Competence encompasses knowledge of the profession's standards, the techniques and technical subject matter involved, and the ability to exercise sound judgment in applying such knowledge in the performance of *professional services*.

.02 A *member's* agreement to perform *professional services* implies that the *member* has the necessary competence to complete those services according to professional standards and to apply the *member's* knowledge and skill with reasonable care and diligence. However, the *member* does not assume a responsibility for infallibility of knowledge or judgment.

.03 The *member* may have the knowledge required to complete the services in accordance with professional standards prior to performance. A normal part of providing *professional services* involves performing additional research or consulting with others to gain sufficient competence.

.04 If a *member* is unable to gain sufficient competence, the *member* should suggest, in fairness to the *client* and public, the engagement of a competent

person to perform the needed *professional service*, either independently or as an associate. [Prior reference: paragraph .02 of ET section 201]

1.300.020 Supervision of a Specialist on Consulting Engagements

.01 A *member* who employs a specialist to perform consulting services for the *member's clients* must be qualified to supervise and evaluate the work of that specialist. Although the *member* is not required to be able to perform each of the specialist's tasks, the *member* should be able to define the tasks and evaluate the end product. [Prior reference: paragraphs .017–.018 of ET section 291]

1.300.030 Submission of Financial Statements

.01 When a *member* prepares or submits *financial statements* as a stockholder, a partner, a director, an officer, or an employee of an entity using the *firm's* letterhead or similar identification, the *member* should comply with the "Compliance With Standards Rule" [1.310.001], including any requirements to disclose a lack of *independence* in the *member's* report.

.02 Refer to the "Use of a CPA Credential" interpretation [2.400.100] of the "Acts Discreditable Rule" [2.400.001] and the "Submission of Financial Statements" interpretation [2.300.030] of the "General Standards Rule" [2.300.001] for additional guidance. [Prior reference: paragraphs .019–.020 of ET section 291]

1.300.040 Use of a Third-Party Service Provider

.01 A *member* who uses a *third-party service provider* to assist the *member* in providing *professional services* such as bookkeeping, tax preparation, or consulting or attest services, including related clerical or data entry functions, is required to comply with the "General Standards Rule" [1.300.001] and the "Compliance With Standards Rule" [1.310.001]. To accomplish this,

- a. before using a *third-party service provider*, the *member* should ensure that the *third-party service provider* has the required professional qualifications, technical skills, and other resources. Factors that can be helpful in evaluating a prospective *third-party service provider* include business, financial, and personal references from banks, other CPAs, and other customers of the *third-party service provider*; the *third-party service provider's* professional reputation and recognition in the community; published materials (articles and books that he or she has authored); and the *member's* personal evaluation of the *third-party service provider*.
- b. the *member* must adequately plan and supervise the *third-party service provider's professional services* so that the *member* ensures that the services are performed with competence and due professional care. The *member* must also obtain sufficient relevant data to support the work product and comply with all technical standards applicable to the *professional services*.

.02 The *member's* responsibility for planning and supervising the *third-party service provider's* work does not extend beyond the requirements of applicable professional standards, which may vary depending upon the nature of the *member's* engagement.

.03 Refer to the "Use of a Third-Party Service Provider" interpretation [1.150.040] of the "Integrity and Objectivity Rule" [1.100.001] and the "Disclosing Information to a Third-Party Service Provider" interpretation [1.700.040] of the "Confidential Client Information Rule" [1.700.001] for additional guidance. [Prior references: paragraphs .015–.016 and .023–.024 of ET section 291]

A nonauthoritative basis-for-conclusion document summarizing considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsoutsourcing.pdf>.

1.310 Compliance With Standards

1.310.001 Compliance With Standards Rule

.01 A *member* who performs auditing, review, compilation, management consulting, tax, or other *professional services* shall comply with standards promulgated by bodies designated by *Council*.

.02 See Appendix A "Council Resolution Designating Bodies to Promulgate Technical Standards." [Prior reference: paragraph .01 of ET section 202]

A nonauthoritative question and answer regarding use of standards that have not been established by a body designated by AICPA Council is available in the FAQ at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

In addition, a nonauthoritative question and answer regarding whether a member needs to comply with the Standards for Consulting Services when providing consulting services but not holding out as a CPA is available in the FAQ document at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

Interpretations Under the Compliance with Standards Rule

1.310.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Compliance With Standards Rule" [1.310.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Compliance With Standards Rule" [1.310.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member*

encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.320 Accounting Principles

1.320.001 Accounting Principles Rule

.01 A *member* shall not (1) express an opinion or state affirmatively that the *financial statements* or other financial data of any entity are presented in conformity with generally accepted accounting principles or (2) state that he or she is not aware of any material modifications that should be made to such statements or data in order for them to be in conformity with generally accepted accounting principles, if such statements or data contain any departure from an accounting principle promulgated by bodies designated by *Council* to establish such principles that has a material effect on the statements or data taken as a whole. If, however, the statements or data contain such a departure and the *member* can demonstrate that due to unusual circumstances the *financial statements* or data would otherwise have been misleading, the *member* can comply with the rule by describing the departure, its approximate effects, if practicable, and the reasons why compliance with the principle would result in a misleading statement.

.02 See appendix A "Council Resolution Designating Bodies to Promulgate Technical Standards." [Prior reference: paragraph .01 of ET section 203]

Interpretations Under the Accounting Standards Rule

1.320.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Accounting Principles Rule" [1.320.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Accounting Principles Rule" [1.320.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.320.010 Responsibility for Affirming That Financial Statements Are in Conformity With the Applicable Financial Reporting Framework

.01 A *member* shall not state affirmatively that an entity's *financial statements* or other financial data are presented in conformity with generally accepted accounting principles (GAAP) if such statements or data contain any departure from an accounting principle promulgated by a body designated by *Council* to establish such principles. *Members* who affirm that *financial statements* or other financial data are presented in conformity with GAAP should comply with the "Accounting Principles Rule" [1.320.001]. A *member's* representation in a letter or other communication that an entity's *financial statements* are in conformity with GAAP may be considered an affirmative statement within the meaning of this rule with respect to the *member* who signed the letter or other communication (for example, the *member* signed a report to a regulatory authority). [Prior reference: paragraph .05 of ET section 203]

1.320.020 Status of Financial Accounting Standards Board, Governmental Accounting Standards Board, Federal Accounting Standards Advisory Board, and International Accounting Standards Board Interpretations

.01 The "Accounting Principles Rule" [1.320.001] authorizes *Council* to designate bodies to establish accounting principles. *Council* has designated the Financial Accounting Standards Board (FASB) as such a body and has resolved that FASB *Accounting Standards Codification*® (ASC) constitutes accounting principles as contemplated in the rule. *Council* designated the Governmental Accounting Standards Board (GASB), with respect to Statements of Governmental Accounting Standards issued in July 1984 and thereafter, as the body to establish financial accounting principles for state and local governmental entities, pursuant to the "Accounting Principles Rule." *Council* designated the Federal Accounting Standards Advisory Board (FASAB), with respect to Statements of Federal Accounting Standards adopted and issued in March 1993 and subsequently, as the body to establish accounting principles for federal government entities, pursuant to the "Accounting Principles Rule." *Council* designated the International Accounting Standards Board (IASB) as an accounting body for purposes of establishing international financial accounting and reporting principles.

.02 Reference to GAAP in the "Accounting Principles Rule" [1.320.001] means those accounting principles promulgated by bodies designated by *Council*, which are listed in paragraph .01 and in appendix A, "Council Resolution Designating Bodies to Promulgate Technical Standards."

.03 The Professional Ethics Division will look to the codification or statements and any *interpretations* thereof issued by FASB, GASB, FASAB, or IASB in determining whether a *member* has departed from an accounting principle established by a designated accounting standard-setter in FASB ASC, a Statement of Governmental Accounting Standards, a Statement of Federal

Accounting Standards, or International Financial Reporting Standards (IFRS). [Prior reference: paragraph .03 of ET section 203]

1.320.030 Departures From Generally Accepted Accounting Principles

.01 It is difficult to anticipate all the circumstances in which accounting principles may be applied. However, there is a strong presumption that adherence to GAAP would, in nearly all instances, result in *financial statements* that are not misleading. The "Accounting Principles Rule" [1.320.001] recognizes that, upon occasion, there may be unusual circumstances when the literal application of GAAP would have the effect of rendering *financial statements* misleading. In such cases, the proper accounting treatment to apply is that which will not render the *financial statements* misleading.

.02 The question of what constitutes unusual circumstances, as referred to in the "Accounting Principles Rule" [1.320.001], is a matter of professional judgment involving the ability to support the position that adherence to a promulgated principle within GAAP would be regarded generally by reasonable persons as producing misleading *financial statements*.

.03 Examples of circumstances that may justify a departure from GAAP include new legislation or evolution of a new form of business transaction. Examples of circumstances that do not justify departures from GAAP include an unusual degree of materiality or conflicting industry practices. [Prior reference: paragraph .02 of ET section 203]

.04 If the statements or data contain such departures, see the "Accounting Principles Rule" [1.320.001] for further guidance.

1.320.040 Financial Statements Prepared Pursuant to Financial Reporting Frameworks Other Than GAAP

.01 Reference to GAAP in the "Accounting Principles Rule" [1.320.001] means those accounting principles promulgated by bodies designated by *Council*, which are listed in appendix A. The bodies designed by *Council* to promulgate accounting principles are

- a. FASAB,
- b. FASB,
- c. GASB, and
- d. IASB.

.02 *Financial statements* prepared pursuant to other accounting principles would be considered financial reporting frameworks other than GAAP within the context of the "Accounting Principles Rule" [1.320.001].

.03 However, the "Accounting Principles Rule" [1.320.001] does not preclude a *member* from preparing or reporting on *client financial statements* that have been prepared pursuant to financial reporting frameworks other than GAAP, such as

- a. financial reporting frameworks generally accepted in another country, including jurisdictional variations of IFRS such that the *client's financial statements* do not meet the requirements for full compliance with IFRS, as promulgated by the IASB;
- b. financial reporting frameworks prescribed by an agreement or a contract; or

- c. other special purpose frameworks, including statutory financial reporting provisions required by law or a U.S. or foreign governmental regulatory body to whose jurisdiction the entity is subject.

.04 In such circumstances, however, the *client's financial statements* and *member's* reports thereon should not purport that the *financial statements* are in accordance with GAAP, and the *financial statements* or reports on those *financial statements*, or both, should clarify the financial reporting framework(s) used. [Prior reference: paragraph .06 of ET section 203]

1.400 Acts Discreditable

1.400.001 Acts Discreditable Rule

.01 A *member* shall not commit an act discreditable to the profession. [Prior reference: paragraph .01 of ET section 501]

Interpretations Under the Acts Discreditable Rule

1.400.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Acts Discreditable Rule" [1.400.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Acts Discreditable Rule" [1.400.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.400.010 Discrimination and Harassment in Employment Practices

.01 A *member* would be presumed to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [1.400.001] if a final determination, no longer subject to appeal, is made by a court or an administrative agency of competent jurisdiction that a *member* has violated any antidiscrimination laws of the United States, a state, or a municipality, including those related to sexual and other forms of harassment. [Prior reference: paragraph .03 of ET section 501]

1.400.020 Solicitation or Disclosure of CPA Examination Questions and Answers

.01 A *member* who solicits or knowingly discloses the Uniform CPA Examination question(s) or answer(s), or both, without the AICPA's written authorization shall be considered to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [1.400.001]. [Prior reference: paragraph .07 of ET section 501]

1.400.030 Failure to File a Tax Return or Pay a Tax Liability

.01 A *member* who fails to comply with applicable federal, state, or local laws or regulations regarding (a) the timely filing of the *member's* personal tax returns or tax returns of the *member's firm* that the *member* has the authority to timely file or (b) the timely remittance of all payroll and other taxes collected on behalf of others may be considered to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [1.400.001]. [Prior reference: paragraph .08 of ET section 501]

1.400.040 Negligence in the Preparation of Financial Statements or Records

.01 A *member* shall be considered in violation of the "Acts Discreditable Rule" [1.400.001] if the *member*, by virtue of his or her negligence, does any of the following:

- a. Makes, or permits or directs another to make, materially false and misleading entries in the *financial statements* or records of an entity.
- b. Fails to correct an entity's *financial statements* that are materially false and misleading when the *member* has the authority to record an entry.
- c. Signs, or permits or directs another to sign, a document containing materially false and misleading information. [Prior reference: paragraph .05 of ET section 501]

1.400.050 Governmental Bodies, Commissions, or Other Regulatory Agencies

.01 Many governmental bodies, commissions, or other regulatory agencies have established requirements, such as audit standards, guides, rules, and regulations, that *members* are required to follow in the preparation of *financial statements* or related information or in performing attest or similar services for entities subject to their jurisdiction. For example, the SEC; the Federal Communications Commission; state insurance commissions; and other regulatory agencies, such as the PCAOB, have established such requirements.

.02 If a *member* prepares *financial statements* or related information for purposes of reporting to such bodies, commissions, or regulatory agencies, the *member* should follow the requirements of such organizations, in addition to the applicable financial reporting framework.

.03 If a *member* agrees to perform an attest or a similar service for the purpose of reporting to such bodies, commissions, or regulatory agencies, the *member* should follow such requirements, in addition to the applicable financial reporting framework.

.04 A *member's* material departure from such requirements would be considered a violation of the "Acts Discreditable Rule" [1.400.001] unless the *member* discloses in the *financial statements* or his or her report, as applicable, that such requirements were not followed and the applicable reasons. [Prior reference: paragraph .06 of ET section 501]

1.400.055 Governmental Audits

.01 Engagements for audits of government grants, government units, or other recipients of government monies typically require that such audits be in compliance with government audit standards, guides, procedures, statutes, rules, and regulations, in addition to GAAS.

.02 If a *member* accepts such an engagement and undertakes an obligation to follow specified government audit standards, guides, procedures, statutes, rules, and regulations, the *member* is obligated to follow such requirements, in addition to GAAS.

.03 Failure to do so is a violation of the "Acts Discreditable Rule" [1.400.001] unless the *member* discloses in his or her report that such requirements were not followed and the applicable reasons for not following the requirements. [Prior reference: paragraph .04 of ET section 501]

1.400.060 Indemnification and Limitation of Liability Provisions

.01 Certain governmental bodies, commissions, or other regulatory agencies (collectively, regulators) have established requirements through laws, regulations, or published interpretations that

- a. prohibit entities subject to their regulation (regulated entity) from including certain types of indemnification and limitation of liability provisions in agreements for the performance of audit or other attest services that are required by such regulators or
- b. provide that the existence of such provisions disqualifies a *member* from rendering such services to these entities.

For example, federal banking regulators, state insurance commissions, and the SEC have established such requirements.

.02 If a *member* enters into or directs or knowingly permits another individual to enter into a contract for the performance of audit or other attest services that are subject to the requirements of these regulators, the *member* should not include or knowingly permit or direct another individual to include an indemnification or limitation of liability provision that would cause the regulated entity or a *member* to be in violation of such requirements or disqualify a *member* from providing such services to the regulated entity. A *member* who enters into or directs or knowingly permits another individual to enter into such an agreement for the performance of audit or other attest services would be considered in violation of the "Acts Discreditable Rule" [1.400.001].

.03 Refer to the "Indemnification of a Covered Member" [1.228.010] and "Indemnification of an Attest Client" [1.228.020] interpretations of the "Independence Rule" [1.200.001] for additional guidance. [Prior reference: paragraph .09 of ET section 501]

1.400.070 Confidential Information Obtained From Employment or Volunteer Activities

.01 A *member* should maintain the confidentiality of his or her employer's or *firm's* (employer) confidential information and should not use or disclose any confidential employer information obtained as a result of an employment relationship, such as discussions with the employer's vendors, customers, or lenders (for example, any confidential information pertaining to a current or previous employer, subsidiary, affiliate, or parent thereof, as well as any entities for which the *member* is working in a volunteer capacity).

.02 For purposes of this interpretation, confidential employer information is any proprietary information pertaining to the employer or any organization for whom the *member* may work in a volunteer capacity that is not known to be available to the public and is obtained as a result of such relationships.

.03 A *member* should be alert to the possibility of inadvertent disclosure, particularly to a close business associate or *close relative* or *immediate family member*. The *member* should also take reasonable steps to ensure that staff under his or her control or others within the *employing organization* and persons from whom advice and assistance are obtained are aware of the confidential nature of the information.

.04 When a *member* changes employment, a *member* should not use confidential employer information acquired as a result of a prior employment relationship to his or her personal advantage or the advantage of a third party, such as a current or prospective employer. The requirement to maintain the confidentiality of an employer's confidential information continues even after the end of the relationship between a *member* and the employer. However, the *member* is entitled to use experience and expertise gained through prior employment relationships.

.05 A *member* would be considered in violation of the "Acts Discreditable Rule" [1.400.001] if the *member* discloses or uses any confidential employer information acquired as a result of employment or volunteer relationships without the proper authority or specific consent of the employer or organization for whom the *member* may work in a volunteer capacity, unless there is a legal or professional responsibility to use or disclose such information.

.06 The following are examples of situations in which *members* are permitted or may be required to disclose confidential employer information or when such disclosure may be appropriate:

- a. Disclosure is permitted by law and authorized by the employer.
- b. Disclosure is required by law, for example, to
 - i. comply with a validly issued and enforceable subpoena or summons or
 - ii. inform the appropriate public authorities of violations of law that have been discovered.
- c. There is a professional responsibility or right to disclose information, when not prohibited by law, to
 - i. initiate a complaint with, or respond to any inquiry made by, the Professional Ethics Division or trial board of the AICPA or a duly constituted investigative or disciplinary body of a state CPA society, board of accountancy, or other regulatory body;

- ii. protect the *member's* professional interests in legal proceedings;
 - iii. comply with professional standards and other ethics requirements; or
 - iv. report potential concerns regarding questionable accounting, auditing, or other matters to the employer's confidential complaint hotline or *those charged with governance*.
- d. Disclosure is permitted on behalf of the employer to
- i. obtain financing with lenders;
 - ii. communicate with vendors, *clients*, and customers; or
 - iii. communicate with the employer's external accountant, attorneys, regulators, and other business professionals.

.07 In deciding whether to disclose confidential employer information, relevant factors to consider include the following:

- a. Whether all the relevant information is known and substantiated to the extent that it is practicable. When the situation involves unsubstantiated facts, incomplete information, or unsubstantiated conclusions, the *member* should use professional judgment in determining the type of disclosure to be made, if any.
- b. Whether the parties to whom the communication may be addressed are appropriate recipients.

.08 A *member* may wish to consult with his or her legal counsel prior to disclosing, or determining whether to disclose, confidential employer information.

.09 Refer to the "Subordination of Judgment" interpretation [1.130.020] of the "Integrity and Objectivity Rule" [1.100.001] and the "Confidential Information" topic [1.700] for additional guidance. [Prior reference: paragraph .10 of ET section 501]

1.400.090 False, Misleading, or Deceptive Acts in Promoting or Marketing Professional Services

.01 A *member* would be in violation of the "Acts Discreditable Rule" [1.400.001] if the *member* promotes or markets the *member's* abilities to provide *professional services* or makes claims about the *member's* experience or qualifications in a manner that is false, misleading, or deceptive.

.02 Promotional efforts would be false, misleading, or deceptive if they contain any claim or representation that would likely cause a reasonable person to be misled or deceived. This includes any representation about CPA licensure or any other professional certification or accreditation that is not in compliance with the requirements of the relevant licensing authority or designating body.

.03 Refer to the "False, Misleading, or Deceptive Acts in Advertising or Solicitations" interpretation [1.600.010] of the "Advertising and Other Forms of Solicitation Rule" [1.600.001] for additional guidance. [No prior reference: new content]

Effective Date

.04 Effective December 15, 2014.

1.400.100 Use of the CPA Credential

.01 A *member* should refer to applicable state accountancy laws and board of accountancy rules and regulations for guidance regarding the use of the CPA credential. A *member* who fails to follow the accountancy laws, rules, and regulations on use of the CPA credential in any of the jurisdictions in which the CPA practices would be considered to have used the CPA credential in a manner that is false, misleading, or deceptive and in violation of the "Acts Discreditable Rule" [1.400.001]. [Prior reference .12 section 501]

1.400.200 Records Requests

Terminology

.01 The following terms are defined here solely for use with this interpretation:

- a. A client includes current and former *clients*.
- b. A member means the *member* or the *member's firm*.
- c. Client-provided records are accounting or other records, including hardcopy and electronic reproductions of such records, belonging to the client that were provided to the member by, or on behalf of, the client.
- d. Member-prepared records are accounting or other records that the member was not specifically engaged to prepare and that are not in the client's books and records or are otherwise not available to the client, thus rendering the client's financial information incomplete. Examples include adjusting, closing, combining, or consolidating journal entries (including computations supporting such entries) and supporting schedules and documents that the member proposed or prepared as part of an engagement (for example, an audit).
- e. Member's work products are deliverables set forth in the terms of the engagement, such as tax returns.
- f. Working papers are all other items prepared solely for purposes of the engagement and include items prepared by the
 - i. member, such as audit programs, analytical review schedules, and statistical sampling results and analyses.
 - ii. client at the request of the member and reflecting testing or other work done by the member.
- g. Make records available means to provide the records in any format that is usable and accessible, whether electronic or otherwise, regardless of the format in which they were received.
- h. Beneficiary is a person or entity for which the engaging entity has requested the member to perform *professional services*.

Applicability

.02 When a person or entity engages a member to perform *professional services* (engaging entity) with respect to a beneficiary, the member will be considered in compliance with the requirements of this interpretation related to client-provided records if the member makes these records available to the person or entity that provided the records to the member or to the individual designated or held out as the entity's or individual's representative.

.03 The member will be considered in compliance with the requirements of this interpretation related to member-prepared records and a member's work products if the member makes such records and work products available to the beneficiary or to the individual designated or held out as the beneficiary's representative. For example, if a company engages a member to perform personal tax services for the benefit of its executives, the member would be in compliance with the interpretation if the member made the tax returns available to the executives (see the "Confidential Client Information Rule" [1.700.001]).

.04 When an engaging entity engages a member to perform *professional services* with respect to another entity that is not the beneficiary of the *professional services*, absent an agreement stating otherwise, the member would be in compliance with the requirements of this interpretation related to a member's work products if the member made such work products available to the engaging entity or to the individual designated or held out as the engaging entity's representative. For example, if a company engaged a member to value the assets of another company for a possible acquisition, absent an agreement stating otherwise, the member would be in compliance with this interpretation if the member made the valuation report available only to the engaging entity.

Interpretation

.05 Members must comply with the rules and regulations of authoritative regulatory bodies, such as the member's state board(s) of accountancy, when the member performs services for a client and is subject to the rules and regulations of such regulatory bodies. For example, a member's state board(s) of accountancy may not permit a member to withhold certain records, even though fees are due to the member for the work performed. Failure to comply with the more restrictive provisions of the applicable regulatory body's rules and regulations concerning the return of certain records would constitute a violation of this *interpretation*.

.06 When an initial request for client-provided records is received, the member should make those records in the member's custody or control available to the person or entity that provided the records to the member. The member may charge a reasonable fee for the time and expense incurred to retrieve, copy, and ship such records; however, the client-provided records may not be withheld for nonpayment of such fees.

.07 A member and the client or beneficiary may agree to terms other than those stated in this paragraph. When this occurs, the member should respond in accordance with such agreement. Otherwise, a member should respond to a request for member-prepared records or a member's work products that are in the member's custody or control and that have not previously been made available to the client or, if applicable, to the beneficiary as follows:

- a. The member should make available member-prepared records relating to a completed and issued work product; however, such records may be withheld if fees are due to the member for that specific work product.
- b. Member's work products should be made available; however, such work products may be withheld if
 - i. fees are due to the member for the specific work product;
 - ii. the work product is incomplete;
 - iii. for purposes of complying with professional standards (for example, withholding an audit report with outstanding audit issues); or

- iv. threatened or outstanding litigation exists concerning the engagement or the member's work.

.08 Once a member has complied with paragraphs .02–.07, the member is under no ethical obligation to

- a. comply with any subsequent requests to again make records or copies of records available. However, if after complying with a request, a loss of records due to a natural disaster or an act of war is experienced, the member should, when practicable, comply with an additional request to make such records available.
- b. retain records for periods that exceed applicable professional standards, state and federal statutes and regulations, and contractual agreements relating to the service performed. [Prior reference: paragraph .02 of ET section 501]
- c. make the records available to any other associated party, such as the general partner, majority shareholder, or spouse. [Prior reference: paragraphs .377–.378 of ET section 591]

.09 Working papers are the member's property, and the member is not required to make such information available. However, state and federal statutes and regulations and contractual agreements may impose additional requirements on the member.

.10 In fulfilling a request for the member's copy of client-provided records that was previously made available to the client or a party identified in paragraph .02, member-prepared records, or a member's work products, the member may

- a. charge a reasonable fee for the time and expense incurred to retrieve, copy, and ship such records and require payment before the member makes the records available.
- b. make the requested records available in any usable and accessible format. However, the member is not required to convert records that are not in electronic format to electronic format. If the records are requested in a specific format and the records are available in such format within the member's custody and control, the request should be honored. In addition, the member is not required to make formulas available, unless the member was engaged to make such formulas available as part of a completed work product or the formulas were used to create member-prepared records without which the client's financial information would be incomplete.
- c. make and retain copies of any records that the member already made available.

.11 When a member is required to return or make records available, the member should comply as soon as practicable but, absent extenuating circumstances, no later than 45 days after the request is made.

.12 The fact that the statutes of the state in which the member practices grant the member a lien on certain records in his or her custody or control does not relieve the member of his or her obligation to comply with this *interpretation*. [Prior reference: paragraph .02 of ET section 501]

.13 A member would be considered in violation of the "Acts Discreditable Rule" [1.400.001] if the member does not comply with the requirements of this interpretation.

Nonauthoritative questions and answers are available in the Ethics FAQ at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

[See Revision History Table.]

1.400.205 Transfer of Files and Return of Client Records in Sale, Transfer, Discontinuance or Acquisition of a Practice

Sale or Transfer of Member's Practice

.01 A *member* or *member's firm* (member) that sells or transfers all or part of the member's practice to another person, *firm*, or entity (successor firm) and will no longer retain any ownership in the practice should do all of the following:

- a.* Submit a written request to each *client* subject to the sale or transfer, requesting the *client's* consent to transfer its files to the successor firm and, notify the *client* that its consent may be presumed if it does not respond to the member's request within a period of not less than 90 days, unless prohibited by law, including but not limited to the rules and regulations of the applicable state boards of accountancy. The member should not transfer any *client* files to the successor firm until either the *client's* consent is obtained or the 90 days has lapsed, whichever is shorter. The member is encouraged to retain evidence of consent, whether obtained from the *client* or presumed after 90 days.
- b.* With respect to files not subject to the sale or transfer, make arrangements to return any *client* records that the member is required to provide to the *client* as set forth in the "Records Request" interpretation [1.400.200] unless the member and *client* agree to some other arrangement.

.02 In cases in which the member is unable to contact the *client*, *client* files and records not transferred should be retained in a confidential manner and in accordance with the *firm's* record retention policy or as required by applicable legal or regulatory requirements, whichever is longer. When practicing before the IRS or other taxing authorities or regulatory bodies, members should ensure compliance with any requirements that are more restrictive.

Discontinuance of Member's Practice

.03 A member who discontinues his or her practice but does not sell or transfer the practice to a successor firm, should do all of the following:

- a.* Notify each *client* in writing of the discontinuance of the practice. The member is encouraged to retain evidence of notification made to *clients*. The member is not required to provide notification to former *clients* of the *firm*.
- b.* Make arrangements to return any *client* records that the member is required to provide to the *client* as set forth in the "Records Request" interpretation [1.400.200] unless the member and *client* agree to some other arrangement.

.04 In cases in which the member is unable to contact the *client*, *client* files should be retained in a confidential manner and in accordance with the *firm's* record retention policy or as required by applicable legal or regulatory requirements, whichever is longer. When practicing before the IRS or other taxing authorities or regulatory bodies, members should ensure compliance with any requirements that are more restrictive.

Acquisition of Practice by a Member

.05 A member who acquires all or part of a practice from another person, *firm*, or entity (predecessor firm) should be satisfied that all *clients* of the predecessor firm subject to the acquisition have, as required in paragraph .01, consented to the member's continuation of *professional services* and retention of any *client* files or records the successor firm retains

.06 A member will be considered in violation of the "Acts Discreditable Rule" [1.400.001] if the member does not comply with any of the requirements of this interpretation.

Effective Date

.07 This interpretation is effective June 30, 2017. Early implementation is allowed.

Nonauthoritative questions and answers related to form of communication and transfer of client files to another partner in the firm or during a merger are available in the FAQ document at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.400.210 Removing Client Files or Proprietary Information From a Firm

.01 A *member* whose employment relationship is terminated would be considered in violation of the "Acts Discreditable Rule" [1.400.001] if the *member* takes or retains (a) originals or copies (in any format) from the *firm's client* files or (b) proprietary information without the *firm's* permission, unless the *member* has a contractual arrangement with the *firm* allowing such action. [Prior reference: paragraphs .381–.382 of ET section 591]

.02 A *firm's* ownership agreement would govern ownership of *client* files and proprietary information; accordingly, this interpretation would not apply to owners of *firms*. [No prior reference: new content]

Effective Date

.03 Paragraph .02 of this interpretation is effective December 15, 2014.

1.400.240 Use of Confidential Information From Nonclient Sources

.01 If a *member* discloses confidential information obtained from a prospective *client* or nonclient without consent, the *member* would be in violation of the

"Acts Discreditable Rule" [1.400.001]. [Prior reference: paragraphs .027–.028 of ET section 391 and new content]

Effective Date

.02 This interpretation is effective December 15, 2014.

1.500 Fees and Other Types of Remuneration

1.500.008 Unpaid Fees

.01 Refer to the "Fees" topic [1.230] of the "Independence Rule" [1.200.001] for guidance. [No prior reference: new content]

Effective Date

.02 Effective December 15, 2014.

1.510 Contingent Fees

1.510.001 Contingent Fees Rule

.01 A *member in public practice* shall not

- a. Perform for a contingent fee any *professional services* for, or receive such a fee from a *client* for whom the *member* or the *member's firm* performs,
 - i. an audit or review of a *financial statement*; or
 - ii. a compilation of a *financial statement* when the *member* expects, or reasonably might expect, that a third party will use the *financial statement* and the *member's* compilation report does not disclose a lack of *independence*; or
 - iii. an examination of prospective financial information; or
- b. Prepare an original or amended tax return or claim for a tax refund for a contingent fee for any *client*.

.02 The prohibition in a. above applies during the period in which the *member* or *member's firm* is engaged to perform any of the services listed above and the period covered by any historical *financial statements* involved in any such listed services.

.03 Except as stated in the next sentence, a contingent fee is a fee established for the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such service. Solely for purposes of this rule, fees are not regarded as being contingent if fixed by courts or other public authorities, or, in tax matters, if determined based on the results of judicial proceedings or the findings of governmental agencies.

.04 A *member's* fees may vary depending, for example, on the complexity of services rendered. [Prior reference: paragraph .01 of ET section 302]

Interpretations Under the Contingent Fees Rule

1.510.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Contingent Fees Rule" [1.510.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Contingent Fees Rule" [1.510.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.510.010 Tax Matters

.01 This interpretation defines certain terms used in the "Contingent Fees Rule" [1.510.001] and provides examples of the application of the rule in tax matters. When practicing before the IRS or before other taxing authorities, *members* should also comply with other applicable and more restrictive requirements.

Contingent Fee Language

.02 Preparation of an original or amended tax return or claim for tax refund includes giving advice on events that have occurred at the time that the advice is given if such advice is directly relevant to determining the existence, character, or amount of a schedule, an entry, or another portion of a return or claim for refund

.03 A fee is considered determined based on the findings of governmental agencies and, therefore, is not a contingent fee if the *member* can demonstrate a reasonable expectation, at the time of a fee arrangement, that a government agency will provide substantive consideration of the subject matter with respect to the *member's client*. Such an expectation is not reasonable if the *member* prepares a *client's* original tax returns as outlined in paragraph .02 above.

Examples of When a Contingent Fee Is Permitted

.04 The following are examples of circumstances in which a contingent fee is permitted under the "Contingent Fees Rule" [1.510.001]:

- a. Representing a *client* in connection with a revenue agent's examination of the *client's* federal or state income tax return

- b. Filing an amended federal or state income tax return claiming a tax refund based on a tax issue that is the subject of a test case involving a different taxpayer or with respect to which the taxing authority is developing a position
- c. Filing an amended federal or state income tax return (or refund claim) claiming a tax refund in an amount greater than the threshold for review by the Joint Committee on Taxation or state taxing authority
- d. Requesting a refund of either overpayments of interest or penalties charged to a *client's* account or tax deposits that a federal or state taxing authority improperly accounted for in circumstances in which the taxing authority has established procedures for the substantive review of such refund requests
- e. Requesting, by means of a protest or similar document, the state or local taxing authority's consideration of a reduction in a property's assessed value under an established taxing authority's review process for hearing all taxpayer arguments relating to assessed value
- f. Representing a *client* in connection with obtaining a private letter ruling or influencing the drafting of a regulation or statute

Example of When a Contingent Fee Is Not Permitted

.05 A contingent fee is not permitted if a *member* prepared a *client's* amended federal or state income tax return claiming a refund of taxes because a valid deduction was inadvertently omitted from the originally filed return. [Prior reference: paragraph .02 of ET section 302]

1.510.020 Receipt of Contingent Fee

.01 A contingent fee is considered to be received when the *member* has completed the related services and the fee is determined. [Prior reference: paragraphs .033–.034 of ET section 391]

1.510.030 Services Performed by a Member's Spouse For a Contingent Fee

.01 A *member's* spouse may provide services for a contingent fee to a *client* with respect to which the *member* performs a service listed in paragraph .01a of the "Contingent Fees Rule" [1.510.001] without causing the *member* to be in violation of the "Contingent Fees Rule" if

- a. the activities of the *member's* spouse are separate from the *member's* practice and
- b. the *member* is not significantly involved in the spouse's activities.

.02 In all such situations, the *members* should consider the "Conflicts of Interest" interpretation [1.110.010] of the "Integrity and Objectivity Rule" [1.100.001] to determine the appropriate action. [Prior reference: paragraphs .037–.038 of ET section 391]

[See Revision History Table.]

1.510.040 Contingent Fee Arrangements With an Investment Advisory Services Nonattest Client That Is Related to a Client

.01 A *member* or *member's firm* may provide investment advisory services for a contingent fee to

- a. owners, officers, or employees of a *client* with respect to which the *member* performs a service listed in paragraph .01a of the "Contingent Fees Rule" [1.510.001].
- b. a nonattest *client* employee benefit plan that is sponsored by an *attest client* with respect to which the *member* performs a service listed in paragraph .01a of the "Contingent Fees Rule."

.02 The *member* should also consider the "Conflicts of Interest" interpretation [1.110.010] and the "Confidential Client Information Rule" [1.700.001] to determine the appropriate action(s). [Prior reference: paragraphs .049–.050 of ET section 391]

[See Revision History Table.]

1.510.050 Investment Advisory Services

.01 A *member* or *member's firm* may provide investment advisory services for a fee based on a percentage of the investment portfolio to a *client* with respect to which the *member* performs a service listed in paragraph .01a of the "Contingent Fees Rule" [1.510.001] without violating that rule if all of the following *safeguards* are met:

- a. The fee is determined based on a specified percentage of the *attest client's* investment portfolio.
- b. The dollar amount of the portfolio on which the fee is based is determined at the beginning of each quarter (or longer period of time as may be agreed upon) and is adjusted only for the *attest client's* additions or withdrawals during the period.
- c. The fee arrangement is not renewed with the *attest client* more frequently than on a quarterly basis. [Prior reference: paragraphs .047–.048 of ET section 391]

.02 When performing such services, the *member* should also consider the "Independence Rule" [1.200.001], especially the *interpretations* of the "Nonattest Services" subtopic [1.295] under the "Independence Rule."

[See Revision History Table.]

1.520 Commissions and Referral Fees

1.520.001 Commissions and Referral Fees Rule

.01 *Prohibited commissions.* A *member* in *public practice* shall not for a commission recommend or refer to a *client* any product or service, or for a commission recommend or refer any product or service to be supplied by a *client*, or receive a commission, when the *member* or *member's firm* also performs for that *client*

- a. an audit or review of a *financial statement*; or
- b. a compilation of a *financial statement* when the *member* expects, or reasonably might expect, that a third party will use the *financial statement* and the *member's* compilation report does not disclose a lack of *independence*; or
- c. an examination of prospective financial information.

.02 This prohibition applies during the period in which the *member* is engaged to perform any of the services listed above and the period covered by any historical *financial statements* involved in such listed services.

.03 *Disclosure of permitted commissions.* A *member* in public practice who is not prohibited by this rule from performing services for or receiving a commission and who is paid or expects to be paid a commission shall disclose that fact to any person or entity to whom the *member* recommends or refers a product or service to which the commission relates.

.04 *Referral fees.* Any *member* who accepts a referral fee for recommending or referring any service of a CPA to any person or entity or who pays a referral fee to obtain a *client* shall disclose such acceptance or payment to the *client*. [Prior reference: paragraph .01 of ET section 503]

A nonauthoritative question and answer regarding disclosure of a commission is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

Interpretations Under the Commission and Referral Fees Rule

1.520.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Commissions and Referral Fees Rule" [1.520.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Commissions and Referral Fees Rule" [1.520.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.520.020 Receipt of Commission

.01 A commission is considered to be received when the performance of the related services is complete and the fee has been determined. For example, if in one year a *member* sells a life insurance policy to a *client*, and the *member's* commission payments are determined to be a fixed percentage of future years' renewal premiums, the commission is deemed to be received in the year that the policy is sold. [Prior reference: paragraphs .367–.368 of ET section 591]

1.520.030 Services Performed by a Member's Spouse For a Commission

.01 A *member's* spouse may receive a commission for referring products or services to or from a *client* with respect to which the *member* performs a service listed in paragraph .01 of the "Commissions and Referral Fees Rule" [1.520.001] without causing the *member* to be in violation of the "Commissions and Referral Fees Rule" if both

- a. the activities of the *member's* spouse are separate from the *member's* practice and
- b. the *member* is not significantly involved in the spouse's activities.

.02 In such situations, *members* should consider the "Conflicts of Interest" interpretation [1.110.010] of the "Integrity and Objectivity Rule" [1.100.001] to determine the appropriate action. [Prior reference: paragraphs .373–.374 of ET section 591]

[See Revision History Table.]

1.520.040 Referral of Products of Others

.01 Paragraph .04 of the "Application of the AICPA Code" [0.200.020] section of the preface provides that a *member* shall not permit others to perform acts on the *member's* behalf that, if carried out by the *member*, would place the *member* in violation of the rules. Therefore, the *member* would be held responsible for the actions of third parties, such as distributors or agents, that act on the *member's* behalf.

.02 For example, if the *member* or *member's* firm performs for a *client* a service listed in paragraph .01 of the "Commissions and Referral Fees Rule" [1.520.001], the *member* may not recommend or refer to that *client* any product or services for a commission that will be paid through a distributor or an agent or receive a commission for the recommendation or referral. This prohibition applies during the period in which the *member* is engaged to perform any of the services listed in paragraph .01 of the rule and during the period covered by any historical *financial statements* in such services.

.03 In addition, if a *member* receives a commission for referring a third party's product or service to a *client* with respect to which the *member* does not perform a service listed in paragraph .01 of the "Commissions and Referral Fees Rule" [1.520.001] through a distributor or an agent and receives a commission from the third party, the *member* should disclose the commission, as discussed in paragraph .03 of the "Commissions and Referral Fees Rule." However, any subsequent performance of a service listed in paragraph .01 of that rule during a period in which the commission was received would be considered to violate the rule. [Prior reference: paragraphs .375–.376 of ET section 591]

A nonauthoritative question and answer regarding disclosure of a commission is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

[See Revision History Table.]

1.520.050 Commission Arrangements With an Investment Advisory Services Nonattest Client That Is Related to a Client

.01 A *member* or *member's* firm may receive a commission for referring a nonclient or nonattest *client's* products or services to the following:

- a. Owners, officers, or employees of a *client* with respect to which the *member* performs a service listed in paragraph .01 of the "Commissions and Referral Fees Rule" [1.520.001]
- b. A nonattest *client* employee benefit plan that is sponsored by a *client* with respect to which the *member* performs a service listed in paragraph .01 of the "Commissions and Referral Fees Rule"

.02 In such instances, the *member* should disclose the commission arrangement to the *client's* owners, officers, or employees or the employee benefit plan. The *member's* failure to disclose the commission would be in violation of the "Commissions and Referral Fees Rule" [1.520.001].

.03 When making the disclosure, *members* should also consider the applicability of the "Conflicts of Interest" interpretation [1.110.010] of the "Integrity and Objectivity Rule" [1.100.001] and the *member's* professional responsibilities under the "Confidential Client Information Rule" [1.700.001] to determine the appropriate action(s). [Prior reference: paragraphs .383–.384 of ET section 591]

A nonauthoritative question and answer regarding disclosure of a commission is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

[See Revision History Table.]

1.520.060 Sale of Products to Clients

.01 If a *member* purchases a product, taking title to the product and assuming all the associated risks of ownership, any profit the *member* receives on reselling it to a *client* would not constitute a commission. [Prior reference: paragraphs .369–.370 of ET section 591]

1.520.070 Billing for a Subcontractor's Services

.01 If, in providing *professional services* to a *client*, a *member* subcontracts the services of another person or entity, any mark-up of the cost of the subcontracted services would not constitute a commission.

.02 Refer to the following for additional guidance:

- "Use of a Third-Party Service Provider" interpretation [1.150.040] of the "Integrity and Objectivity Rule" [1.100.001]
- "Fees" subtopic [1.230] under the "Independence Rule" [1.200.001]
- "Use of a Third-Party Service Provider" interpretation [1.300.040] of the "General Standards Rule" [1.300.001]
- "Disclosing Information to a Third-Party Service Provider" interpretation [1.700.040] of the "Confidential Client Information Rule" [1.700.001] [Prior reference: paragraphs .371–.372 of ET section 591]

Effective Date

.03 The revisions to this interpretation are effective December 15, 2014.

1.520.080 Disclosure of Commissions and Referral Fees

.01 The member should make the disclosures required by paragraphs .03 and .04 of the "Commissions and Referral Fees Rule" [1.520.001] in writing.

Effective Date

.02 Effective for commission or a referral fee arrangements entered into on or after January 31, 2017.

A nonauthoritative question and answer regarding disclosure of a commission is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/ethics-general-faqs.pdf>.

1.600 Advertising and Other Forms of Solicitation

1.600.001 Advertising and Other Forms of Solicitation Rule

.01 A *member* in *public practice* shall not seek to obtain *clients* by advertising or other forms of solicitation in a manner that is false, misleading, or deceptive. Solicitation by the use of coercion, over-reaching, or harassing conduct is prohibited. [Prior reference: paragraph .01 of ET section 502]

Interpretations Under the Advertising and Other Forms of Solicitation Rule

1.600.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Advertising and Other Forms of Solicitation Rule" [1.600.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Advertising and Other Forms of Solicitation Rule" [1.600.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.600.010 False, Misleading, or Deceptive Acts in Advertising or Solicitations

.01 A *member* would be in violation of the "Advertising and Other Forms of Solicitation Rule" [1.600.001] if the *member's* promotional efforts are false, misleading, or deceptive. If a *member* is asked to perform *professional services* for a *client* or customer of a third party, the *member* should determine that the third party's promotional efforts comply with the "Advertising and Other Forms of Solicitation Rule." Such action is required because the *member* will receive the benefits of such efforts by third parties, and *members* must not do through others what they are prohibited from doing themselves. [Prior reference: paragraph .06 of ET section 502]

.02 Promotional efforts would be considered false, misleading, or deceptive if they

- a. create false or unjustified expectations of favorable results.
- b. imply the ability to influence any court, tribunal, regulatory agency, or similar body or official.
- c. contain a representation that the *member* will perform specific *professional services* in current or future periods for a stated fee, estimated fee, or fee range when it was likely at the time of the representation that such fees would be substantially increased and the *member* failed to advise the prospective *client* of that likelihood.
- d. contain any other representations that would be likely to cause a reasonable person to misunderstand or be deceived. [Prior reference: paragraph .03 of ET section 502]

1.600.030 Use of AICPA-Awarded Designation

.01 A *member* who holds an AICPA-awarded designation, such as the Personal Financial Specialist (PFS) designation, may use the designation after the *member's* name.

.02 A *member's firm* may use an AICPA-awarded designation, such as the PFS designation, on *firm* letterhead and in marketing materials if all the *firm's* partners hold the AICPA-awarded designation. [Prior reference: paragraphs .365–.366 of ET section 591]

Effective Date

.03 The revisions to this interpretation are effective December 15, 2014.

1.600.100 Use of the CPA Credential

.01 A *member* should refer to applicable state accountancy laws and board of accountancy rules and regulations for guidance regarding the use of the CPA credential. A *member* who fails to follow the accountancy laws, rules, and regulations on use of the CPA credential in any of the jurisdictions in which the CPA practices would be considered to have used the CPA credential in a manner that is false, misleading, or deceptive and in violation of the "Advertising and Other Forms of Solicitation Rule" [1.600.001]. [Prior reference .07 section 502.]

1.700 Confidential Information

1.700.001 Confidential Client Information Rule

.01 A *member* in *public practice* shall not disclose any *confidential client information* without the specific consent of the *client*.

.02 This rule shall not be construed (1) to relieve a *member* of his or her professional obligations of the "Compliance With Standards Rule" [1.310.001] or the "Accounting Principles Rule" [1.320.001], (2) to affect in any way the *member's* obligation to comply with a validly issued and enforceable subpoena or summons, or to prohibit a *member's* compliance with applicable laws and government regulations, (3) to prohibit review of a *member's* professional practice under AICPA or state CPA society or Board of Accountancy authorization, or (4) to preclude a *member* from initiating a complaint with, or responding to any inquiry made by, the professional ethics division or trial board of the *Institute* or a duly constituted investigative or disciplinary body of a state CPA society or Board of Accountancy. *Members* of any of the bodies identified in (4) above and *members* involved with professional practice reviews identified in (3) above shall not use to their own advantage or disclose any *member's confidential client information* that comes to their attention in carrying out those activities. This prohibition shall not restrict *members'* exchange of information in connection with the investigative or disciplinary proceedings described in (4) above or the professional practice reviews described in (3) above. [Prior reference: paragraph .01 of ET section 301]

Interpretations Under the Confidential Client Information Rule

1.700.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Confidential Client Information Rule" [1.700.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Confidential Client Information Rule" [1.700.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.700.010 Client Competitors

.01 When a *member* provides *professional services* to *clients* that are competitors, *threats* to compliance with the "Confidential Client Information Rule" [1.700.001] may exist because the *member* may have access to *confidential client information*, such as sales, purchases, and gross profit percentages of the respective competitors.

.02 To reduce the *threat* of disclosing *confidential client information* to a competitor, the *member* should emphasize to all relevant parties, including employees of the *firm* and affected *clients*, that the "Confidential Client Information Rule" [1.700.001] prohibits *members* from revealing to others any *confidential client information* obtained in their professional capacity. [Prior reference: paragraphs .011–.012 of ET section 391]

1.700.020 Disclosing Information From Previous Engagements

.01 When a *member* evaluates whether to accept a new *client* engagement, the *member* should consider whether knowledge and experience that the *member* or *member's firm* will share while providing the *professional services* to the prospective *client* would be *confidential client information*. If such information would be *confidential client information*, and the circumstances are such that the prospective *client* would be able to identify the *client* or *clients* that are the source of the information, the engagement should not be accepted unless the *member* obtains the original *client's* specific consent to disclose the information. [Prior reference: paragraphs .029–.030 of ET section 391]

.02 When a *member* withdraws from an engagement due to, for example, discovery of irregularities in a *client's* tax return, if contacted by the successor, the *member* should suggest that the successor ask the *client* to permit the *member* to discuss all matters freely with the successor. The successor is then on notice of some conflict.

.03 The "Confidential Client Information Rule" [1.700.001] is not intended to help an unscrupulous *client* cover up illegal acts or otherwise hide information by changing CPAs. Due to the possibility of legal implications in such matters, the *member* should seek legal advice on the *member's* status and obligations in the matter. [Prior reference: paragraphs .005–.006 of ET section 391]

1.700.030 Disclosing Information to Clients

.01 When a *member* is engaged by either spouse to prepare a married couple's joint tax return, the two spouses are considered to be one *client*, even if the *member* deals exclusively with one spouse. Accordingly, if the married couple is undergoing a divorce and one spouse directs the *member* to withhold joint tax information from the other spouse, the *member* may provide the information to both spouses, in compliance with the "Confidential Client Information Rule" [1.700.001], because both are the *member's client*. The *member* should consider reviewing

- a. the legal implications of such disclosure with an attorney and
- b. responsibilities under any tax performance standards, such as Section 10.29 of IRS Circular 230. [Prior reference: paragraphs .031–.032 of ET section 391]

.02 When a person or entity engages a *member* to perform *professional services* (engaging entity) for the benefit of another person or entity (beneficiary), the engaging entity and the beneficiary are considered two separate *clients*. Accordingly, the *member* should not disclose *confidential client information* of

either *client* to the other without consent of the *client* whose confidential information is to be disclosed. For example, if a company engages a *member* to perform personal tax services for the benefit of its executives, the *member's* disclosure of the executives' *confidential client information* to the company without the consent of the applicable executive would be a violation of the "Confidential Client Information Rule" [1.700.001]. [Prior reference: paragraphs .041–.042 of ET section 391]

[See Revision History Table.]

1.700.040 Disclosing Information to a Third-Party Service Provider

.01 When a *member* uses a *third-party service provider* to assist the *member* in providing *professional services*, *threats* to compliance with the "Confidential Client Information Rule" [1.700.001] may exist.

.02 *Clients* may not expect the *member* to use a *third-party service provider* to assist the *member* in providing the *professional services*. Therefore, before disclosing *confidential client information* to a *third-party service provider*, the *member* should do one of the following:

- a. Enter into a contractual agreement with the *third-party service provider* to maintain the confidentiality of the information and provide reasonable assurance that the *third-party service provider* has appropriate procedures in place to prevent the unauthorized release of confidential information to others. The nature and extent of procedures necessary to obtain reasonable assurance depends on the facts and circumstances, including the extent of publicly available information on the *third-party service provider's* controls and procedures to *safeguard confidential client information*.
- b. Obtain specific consent from the *client* before disclosing *confidential client information* to the *third-party service provider*.

.03 Refer to the "Use of a Third-Party Service Provider" interpretation [1.150.040] of the "Integrity and Objectivity Rule" [1.100.001] and the "Use of a Third-Party Service Provider" interpretation [1.300.040] of the "General Standards Rule" [1.300.001] for additional guidance. [Prior reference: paragraphs .001–.002 of ET section 391]

A nonauthoritative basis-for-conclusions document that summarizes considerations that were deemed significant in the development of this interpretation is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/basisforconclusionsoutsourcing.pdf>.

In addition, nonauthoritative sample client disclosure language that could be used to fulfill the requirement discussed in this interpretation is also available at https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/sample_disclosure_notification.pdf.

1.700.050 Disclosing Client Information in Connection With a Review or Acquisition of the Member's Practice

.01 For purposes of the "Confidential Client Information Rule" [1.700.001], a review of a *member's* professional practice includes a review performed in conjunction with a prospective purchase, sale, or merger of all or part of a *member's* practice. Such reviews may *threaten* a *member's* compliance with the "Confidential Client Information Rule." To reduce the *threat* to an *acceptable level*, a *member* must take appropriate precautions (for example, through a written confidentiality agreement with the prospective purchaser) to help ensure that the prospective purchaser does not disclose any *confidential client information* obtained in the course of the review.

.02 *Members* who perform such reviews should not use to their advantage or disclose any *confidential client information* that comes to their attention during the review. [Prior reference: paragraph .04 of ET section 301]

.03 *Members* who obtain *client* files as the result of acquiring all or part of another *member's* professional practice should not disclose any *confidential client information* contained in such files. *Members* should refer to the "Transfer of Files and Return of Client Records in Sale, Transfer Discontinuance or Acquisition of a Practice" interpretation under the "Acts Discreditable Rule" [1.400.205] for guidance related to *client* files obtained through acquiring a practice.

[See Revision History Table.]

1.700.060 Disclosure of Client Information to Third Parties

.01 When a *member* receives a request from a third party (for example, a trade association, member of academia, or surveying or benchmarking organization) to disclose *client* information or intends to use such information for the *member's* own purposes (for example, publication of benchmarking data or studies) in a manner that may result in the *client's* information being disclosed to others without the *client* being specifically identified, *threats* to compliance with the "Confidential Client Information Rule" [1.700.001] may exist.

.02 If the information is considered to be *confidential client information*, the *member* would be in violation of the "Confidential Client Information Rule" [1.700.001] if the *member* discloses or uses the information unless the *member* has the *client's* specific consent, preferably in writing, for the disclosure or use of such information. The consent should specify the nature of the information that may be disclosed, the type of third party to whom it may be disclosed, and its intended use.

.03 If the information is not considered to be *confidential client information*, the disclosure or use of the information is not subject to the "Confidential Client Information Rule" [1.700.001]. However, the *member* should be cautious in the disclosure or use of the information so as not to disclose *client* information that may go beyond what is available to the public or that the *client* has agreed may be disclosed.

.04 A *member* is not prohibited from marketing his or her services or advising a third party, such as a current or prospective *client*, of information based on his or her expertise or knowledge obtained from prior experiences with *clients* (for example, the nature of services provided to other *clients* or common practices within a *client's* industry). However, if the information may be identifiable to one or more *clients*, specific consent, preferably in writing, is required from such *client(s)*. Prior to disclosing *confidential client information*

to a third party, the *member* should consider whether a contractual agreement with the third party to maintain the confidentiality or limit the use of the information is necessary.

.05 In addition, the *member* should consider whether federal, state, or local statutes, rules, or regulations concerning the confidentiality of *client* information may be more restrictive than the requirements in this interpretation.

.06 Refer to the "Use of a Third-Party Service Provider" interpretation [1.300.040] of the "General Standards Rule" [1.300.001] for additional guidance. [Prior reference: paragraphs .003–.004 of ET section 391]

A nonauthoritative table providing examples of client information that is available to the public, client information not available to the public, and other information in the member's possession is available at <https://us.aicpa.org/interestareas/professionalethics/resources/tools/downloadabledocuments/categories-of-information.pdf>.

1.700.070 Disclosing Client Information During Litigation

.01 The "Confidential Client Information Rule" [1.700.001] is not intended to prohibit a *member* from disclosing information necessary to initiate, pursue, or defend the *member* in an actual or a threatened lawsuit or alternative dispute resolution proceeding. Accordingly, releasing *confidential client information* to the *member's* liability insurance carrier solely to assist in the defense against an actual or a potential claim against the *member* would not violate the "Confidential Client Information Rule." [Prior reference: paragraphs .039–.040 and .045–.046 of ET section 391]

1.700.080 Disclosing Client Information in Director Positions

.01 When a *member* serves as a director of an organization, such as a bank or an insurance company, the *member's* fiduciary responsibilities to the organization may create *threats* to compliance with the "Integrity and Objectivity Rule" [1.100.001] and the "Confidential Client Information Rule" [1.700.001]. For example, the *member's* fiduciary duty to the organization may conflict with the *member's* obligations pursuant to the "Confidential Client Information Rule" (for example, failure to disclose information may constitute a breach of the director's fiduciary responsibilities) when the *member's clients* are customers of the organization.

.02 A *member's* general knowledge and experience may be very helpful to an organization in formulating a policy and making business decisions. Nevertheless, if the *member's clients* are likely to engage in significant transactions with the organization, it would be more appropriate for the *member* to serve as a consultant to the board. Under such an arrangement, the *member* could limit activities to those that do not *threaten* the *member's* compliance with the "Integrity and Objectivity Rule" [1.100.001] and the "Confidential Client Information Rule" [1.700.001]. If, however, the *member* serves as a board member of the organization, the *member* should evaluate the significance of any *threats* and apply *safeguards*, when necessary, to eliminate or reduce the *threats* to an *acceptable level*.

.03 See the "Director Positions" interpretation [1.110.020] of the "Integrity and Objectivity Rule" [1.100.001]. [Prior reference: paragraphs .035–.036 of ET section 391]

Effective Date

.04 The revisions to this interpretation are effective December 15, 2014.

1.700.090 Disclosing Client Names

.01 The *member's* disclosure of a *client's* name would not violate the "Confidential Client Information Rule" [1.700.001] if disclosure of the *client's* name does not constitute the release of *confidential client information*. For example, if a *member's* practice is limited to bankruptcy matters, disclosure of the *client's* name could suggest that the *client* may be experiencing financial difficulties, which may be *confidential client information*. [Prior reference: paragraphs .013–.014 of ET section 391]

1.700.100 Disclosing Confidential Client Information as a Result of a Subpoena or Summons

.01 The *member's* disclosure of *confidential client information* in compliance with a validly issued and enforceable subpoena or summons would not violate the "Confidential Client Information Rule" [1.700.001].

.02 When complying with such subpoena or summons, the *member* is not required to notify the *client* that its records have been subpoenaed or that a summons related to the *client's* records has been issued. The *member* may also wish to consult with legal counsel to determine the validity and enforceability of the subpoena or summons and the specific *client* information required to be provided. The *member* may also wish to consult with his or her state board of accountancy. [No prior reference: New content from informal policy position]

Effective Date

.03 Effective December 15, 2014.

1.700.110 Disclosing Client Information in Connection With a Quality Review

.01 For purposes of the "Confidential Client Information Rule" [1.700.001], a review of a *member's* professional practice includes a quality review of a *member's* tax practice (for example, a voluntary tax practice review) performed under the monitoring function of the member's tax practice quality control policies and procedures. When a *member* uses a third party to perform such reviews of the *member's* tax practice, *threats* to compliance with the "Confidential Client Information Rule" may exist.

.02 To reduce the *threat* to an acceptable level, the *member* should, at a minimum, be satisfied that the *member* complies with the requirements of Treasury Regulation 301.7216-2(p) and any applicable state or local regulations related to disclosures of any federal, state, or local tax return information during such reviews. In addition, the *member* should be satisfied that the third-party reviewer is aware of and subject to the requirements of Treasury Regulation 301.7216-2(p) and any applicable state or local regulations. If the *member* determines that *threats* have not been reduced to an *acceptable level*, the *member* should apply additional *safeguards* to reduce the *threats* to an *acceptable level* (for example, enter into a written confidentiality agreement with the reviewer or de-identify tax return information provided to the reviewer).

.03 *Members* who perform such reviews should not use to their advantage or disclose any *confidential client information* that comes to their attention

during the review. *Members* should refer to Treasury Regulation 301.7216-2(p) and any applicable state or local regulations for further guidance related to tax return information obtained during such reviews.

Effective Date

.04 This interpretation is effective December 31, 2018.

[See Revision History Table.]

1.800 Form of Organization and Name

1.800.001 Form of Organization and Name Rule

.01 A *member* may practice public accounting only in a form of organization permitted by law or regulation whose characteristics conform to resolutions of *Council*.

.02 A *member* shall not practice public accounting under a *firm* name that is misleading.

.03 Names of one or more past owners may be included in the *firm* name of a successor organization.

.04 A *firm* may not designate itself as "*Members of the American Institute of Certified Public Accountants*" unless all its CPA owners are *members* of the AICPA.

.05 See appendix B, "*Council Resolution Concerning Form of Organization and Name*." [Prior reference: paragraph .01 of ET section 505]

Interpretations Under the Form of Organization and Name Rule

1.800.005 Application of the Conceptual Framework for Members in Public Practice and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Form of Organization and Name Rule" [1.800.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Public Practice" [1.000.010].

.02 A *member* would be considered in violation of the "Form of Organization and Name Rule" [1.800.001] if the *member* cannot demonstrate the application of *safeguards* that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [1.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015 and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

1.810 Form of Organization and Related Practice Issues

1.810.010 Ownership of a Separate Business

.01 A *member* may own an interest in a separate business that performs for *clients* accounting, tax, personal financial planning, or litigation support services or other services for which standards are promulgated by bodies designated by *Council*.

.02 If the *member*, either individually or collectively with the *member's firm* or others in the *firm*, *controls* the separate business, then the separate business, its owners (including the *member*), and its professional employees must comply with the code. For example, if one or more *members* individually or collectively *control* the separate business, the *member(s)* and others associated with the separate business are subject to the "Commissions and Referral Fees Rule" [1.520.001] and its *interpretations*. With respect to an *attest client*, the "Independence Rule" [1.200.001] and its *interpretations* would apply to the activities of the separate business, its owners, and its professional employees.

.03 When the *member*, individually or collectively with the *member's firm* or others in the *firm*, does not *control* the separate business, the provisions of the code would apply to the *member's* actions but not to the separate business, its other (nonmember) owners, and its professional employees. For example, the separate business could enter into a contingent fee arrangement with the *member's attest client* or accept commissions for the referral of products or services to the *member's attest client*. [Prior reference: paragraph .03 of ET section 505]

.04 When the owners of the separate business are non-CPAs, to prevent any misunderstanding or misrepresentation, the CPA *member* should advise *clients* and other interested parties that the CPA *member* is an owner in two separate businesses: one made up of non-CPAs (except for the CPA *member*) and another that is a CPA *firm*. [Prior reference: paragraphs .275–.276 of ET section 591]

.05 See the "Network and Network Firms" interpretation [1.220.010] of the "Independence Rule" [1.200.001] and the definitions of *networks* and *network firms* for guidance applicable to these entities.

1.810.020 Partner Designation

.01 Only *members* of a *firm* who are legally *partners* should use the designation *partner*. *Members* who are not parties to the *firm's* partnership agreement should not hold themselves out in any manner that might lead *clients* or the public to believe that they are *partners*. For example, using the designation "nonproprietary partner" to describe a high-ranking professional employee would be misleading and in violation of the "Form of Organization and Name Rule" [1.800.001] even if the professional employee was a *partner* in one of the predecessor *firms* that merged into the *firm*. [Prior reference: paragraphs .273–.274 of ET section 591]

1.810.030 A Member's Responsibility for Nonmember Practitioners

.01 A *member* who becomes an employee of a *firm* made up of one or more nonmember practitioners must still comply with the code. If the *member* becomes an owner in the *firm*, the *member* will be responsible for *firm's* professional employees, including the nonmember practitioners.

.02 Similarly, if a *member* forms a partnership with a nonmember, the *member* is ethically responsible for all the activities of the partnership. If the nonmember *partner* violates the code, the *member* would be held accountable for that *partner's* actions.

.03 See paragraph .04 of the "Application of the AICPA Code" [0.200.020] section of the preface and appendix B. [Prior reference: paragraphs .005–.006 and .281–.282 of ET section 591]

1.810.040 Attest Engagement Performed With a Former Partner

.01 Unless there are laws, rules or regulations that are applicable to the *member* that conclude otherwise, two former *partners* may continue to jointly perform an *attest engagement* even if one of them is not a CPA. However, to be clear that a partnership no longer exists and to assure the *attest client* and others that both individuals performed the *attest engagement*, they should present their report on plain paper (that is, paper with no letterhead) that is signed in the following manner:

John Doe, Certified Public Accountant
Richard Roe, Accountant

[Prior reference: paragraphs .271–.272 of ET section 591]

Effective Date

.02 The revisions to this interpretation are effective December 15, 2014.

1.810.050 Alternative Practice Structures

.01 The "Form of Organization and Name Rule" [1.800.001] states, "A *member* may practice public accounting only in a form of organization permitted by law or regulation whose characteristics conform to resolutions of *Council*." The *Council* resolution (appendix B) requires, among other things, that CPAs own a majority of the *financial interests* in a *firm* engaged to provide attest services (as defined therein) to the public. This interpretation explains the application of this rule to an alternative practice structure (APS) in which (a) the majority of the *financial interests* in the attest *firm* is owned by CPAs and (b) all or substantially all of the revenues are paid to another entity in return for services and the lease of employees, equipment, and *office space*.

.02 To protect the public interest, the overriding focus of the resolution is that CPAs remain responsible, financially and otherwise, for a *firm's* attest work. In addition to the provisions of the resolution, other requirements of the code and bylaws ensure responsibility for

- a. compliance with all aspects of applicable law or regulation,
- b. enrollment in an AICPA-approved practice monitoring program,
- c. compliance with the "Independence Rule" [1.200.001], and
- d. compliance with applicable standards promulgated by *Council*-designated bodies ("Compliance With Standards Rule" [1.310.001]) and all other provisions of the code, including "Structure and Application of the AICPA Code" [0.200].

.03 Given all the previously mentioned *safeguards* that protect the public interest, if the CPAs who own the attest *firm* remain financially responsible, under applicable law or regulation, for the *firm's* attest work, the *member* is considered to be in compliance with the financial interests provision of the resolution. [Prior reference: paragraph .04 of ET section 505]

1.820 Firm Name

1.820.010 Use of a Retired Partner's Name

.01 The "Form of Organization and Name Rule" [1.800.001] permits the use of the name(s) of former *partner(s)* in a *firm's* name. For example, if two *firms* merge, the newly formed *firm* may use in its *firm* name the name of retired or other *partners* in either or both of the merged *firms* without violating the "Form of Organization and Name Rule." [Prior reference: paragraphs .289–.290 of ET section 591]

1.820.020 A Practice With Non-CPA Partners

.01 Unless there are laws, rules, or regulations that are applicable to the *member* that conclude otherwise, a CPA *member* who is in a partnership with non-CPAs may sign reports in the *firm's* name and also affix the designation, "Certified Public Accountant," to the *member's* signature if it is clear that the partnership itself is not being held out as entirely comprising CPAs. [Prior reference: paragraphs .379–.380 of ET section 591]

1.820.030 Misleading Firm Names

.01 The "Form of Organization and Name Rule" [1.800.001] prohibits a *member* from practicing public accounting under a *firm* name that is misleading. If the *firm* name contains any representation that would be likely to cause a reasonable person to misunderstand, or be confused about, what the legal form of the *firm* is or who the owners or members of the *firm* are, the *firm* name would be misleading and the *member* would be in violation of the "Form of Organization and Name Rule." For example, the *member* should not refer to a type of organization or an abbreviation thereof that does not accurately reflect the form under which the *firm* is organized.

.02 In addition, the *member* should consider the rules and regulations of his or her state board(s) of accountancy concerning misleading *firm* names that may be more restrictive than the requirements in this interpretation. [Prior reference: paragraph .05 of ET section 505]

1.820.040 Use of a Common Brand Name in Firm Name

.01 *Firms* within a *network* sometimes share the use of a common brand or share common initials as part of the *firm* name. The sharing of a common brand name or common initials of a *network* as part of the *member's firm* name would not be considered misleading, provided the *firm* is a *network firm*.

.02 The sharing of a common brand name or common initials of a *network* as the entire name of the *member's firm* would not be considered misleading, if the *firm* is a *network firm* and shares one or more of the following characteristics with other *firms* in the *network*:

- a. Common *control* among the firms through ownership, management, or other means
- b. Profits or costs, excluding costs of operating the *network*; costs of developing audit methodologies, manuals, and training courses; and other costs that are immaterial to the *firm*
- c. Common business strategy that involves ongoing collaboration amongst the *firms* whereby the *firms* are responsible for implementing the *network's* strategy and are held accountable for performance pursuant to that strategy

- d. Significant part of professional resources
- e. Common quality control policies and procedures that *firms* are required to implement and that are monitored by the *network*

.03 Refer to the "Network and Network Firms" interpretation [1.220.010] of the "Independence Rule" [1.200.001] for additional guidance. [Prior reference: paragraph .06 of ET section 505]

2.000 Introduction

.01 Part 2 of the Code of Professional Conduct (the code) applies to *members in business*. Accordingly, when the term *member* is used in part 2 of the code, the requirements apply only to *members in business*. When a *member in business* is also a *member in public practice* (for example, a *member* has a part-time tax practice), the *member* should also consult part 1 of the code, which applies to *members in public practice*. [No prior reference: new content]

Effective Date

.02 Effective December 15, 2014.

2.000.010 Conceptual Framework for Members in Business

Introduction

.01 *Members* may encounter various relationships or circumstances that create *threats* to the *member's* compliance with the rules. The rules and *interpretations* seek to address many situations; however, they cannot address all relationships or circumstances that may arise. Thus, in the absence of an *interpretation* that addresses a particular relationship or circumstance, a *member* should evaluate whether that relationship or circumstance would lead a reasonable and informed third party who is aware of the relevant information to conclude that there is a *threat* to the *member's* compliance with the rules that is not at an *acceptable level*. When making that evaluation, the *member* should apply the conceptual framework approach as outlined in this interpretation.

.02 The code specifies that in some circumstances, no *safeguards* can reduce a *threat* to an *acceptable level*. For example, the code specifies that a *member* may not subordinate the *member's* professional judgment to others without violating the "Integrity and Objectivity Rule" [2.100.001]. A *member* may not use the conceptual framework to overcome this or any other prohibition or requirement in the code.

Definitions Used in Applying the Conceptual Framework

.03 Acceptable level. A level at which a reasonable and informed third party who is aware of the relevant information would be expected to conclude that a *member's* compliance with the rules is not compromised.

.04 Safeguards. Actions or other measures that may eliminate a *threat* or reduce a threat to an *acceptable level*.

.05 Threat(s). Relationships or circumstances that could compromise a *member's* compliance with the rules.

Conceptual Framework Approach

.06 Under the conceptual framework approach, *members* should identify *threats* to compliance with the rules and evaluate the significance of those *threats*. *Members* should evaluate identified *threats* both individually and in the aggregate because *threats* can have a cumulative effect on a *member's* compliance with the rules. *Members* should perform three main steps in applying the conceptual framework approach:

- a. *Identify threats.* The relationships or circumstances that a *member* encounters in various engagements and work assignments or

positions will often create different *threats* to complying with the rules. When a *member* encounters a relationship or circumstance that is not specifically addressed by a rule or an *interpretation*, under this approach, the *member* should determine whether the relationship or circumstance creates one or more *threats*, such as those identified in paragraphs .09–.14 that follow. The existence of a *threat* does not mean that the *member* is in violation of the rules; however, the *member* should evaluate the significance of the *threat*.

- b. *Evaluate the significance of a threat.* In evaluating the significance of an identified *threat*, the *member* should determine whether a *threat* is at an *acceptable level*. A *threat* is at an *acceptable level* when a reasonable and informed third party who is aware of the relevant information would be expected to conclude that the *threat* would not compromise the *member's* compliance with the rules. *Members* should consider both qualitative and quantitative factors when evaluating the significance of a *threat*, including the extent to which existing *safeguards* already reduce the *threat* to an *acceptable level*. If the *member* evaluates the *threat* and concludes that a reasonable and informed third party who is aware of the relevant information would be expected to conclude that the *threat* does not compromise a *member's* compliance with the rules, the *threat* is at an *acceptable level* and the *member* is not required to evaluate the *threat* any further under this conceptual framework approach.
- c. *Identify and apply safeguards.* If, in evaluating the significance of an identified *threat*, the *member* concludes that the *threat* is not at an *acceptable level*, the *member* should apply *safeguards* to eliminate the *threat* or reduce it to an *acceptable level*. The *member* should apply judgment in determining the nature of the *safeguards* to be applied because the effectiveness of *safeguards* will vary depending on the circumstances. When identifying appropriate *safeguards* to apply, one *safeguard* may eliminate or reduce multiple *threats*. In some cases, the *member* should apply multiple *safeguards* to eliminate or reduce one *threat* to an *acceptable level*. In other cases, an identified *threat* may be so significant that no *safeguards* will eliminate the *threat* or reduce it to an *acceptable level*, or the *member* will be unable to implement effective *safeguards*. Under such circumstances, providing the specific *professional services* would compromise the *member's* compliance with the rules, and the *member* should determine whether to decline or discontinue the *professional services* or resign from the *employing organization*.

Threats

.07 Many *threats* fall into one or more of the following six broad categories: adverse interest, advocacy, familiarity, self-interest, self-review, and undue influence.

.08 Examples of *threats* associated with a specific relationship or circumstance are identified in the *interpretations* of the code. Paragraphs .09–.14 of this section define and provide examples, which are not all inclusive, of each of these *threat* categories.

.09 *Adverse interest threat.* The *threat* that a *member* will not act with objectivity because the *member's* interests are opposed to the interests of

the *employing organization*. Examples of adverse interest *threats* include the following:

- a. A *member* has charged, or expressed an intention to charge, the *employing organization* with violations of law.
- b. A *member* or the *member's immediate family* or *close relative* has a financial or another relationship with a vendor, customer, competitor, or potential acquisition of the *employing organization*.
- c. A *member* has sued or expressed an intention to sue the *employing organization* or its officers, directors, or employees.

.10 Advocacy threat. The *threat* that a *member* will promote an *employing organization's* interests or position to the point that his or her objectivity is compromised. Examples of advocacy *threats* include the following:

- a. Obtaining favorable financing or additional capital is dependent upon the information that the *member* includes in, or excludes from, a prospectus, an offering, a business plan, a financing application, or a regulatory filing.
- b. The *member* gives or fails to give information that the *member* knows will unduly influence the conclusions reached by an external service provider or other third party.

.11 Familiarity threat. The *threat* that, due to a long or close relationship with a person or an *employing organization*, a *member* will become too sympathetic to their interests or too accepting of the person's work or *employing organization's* product or service. Examples of familiarity *threats* include the following:

- a. A *member* uses an *immediate family's* or a *close relative's* company as a supplier to the *employing organization*.
- b. A *member* may accept an individual's work product with little or no review because the individual has been producing an acceptable work product for an extended period of time.
- c. A *member's immediate family* or *close relative* is employed as a *member's* subordinate.
- d. A *member* regularly accepts gifts or entertainment from a vendor or customer of the *employing organization*.

.12 Self-interest threat. The *threat* that a *member* could benefit, financially or otherwise, from an interest in, or relationship with, the *employing organization* or persons associated with the *employing organization*. Examples of self-interest *threats* include the following:

- a. A *member's immediate family* or *close relative* has a *financial interest* in the *employing organization*.
- b. A *member* holds a *financial interest* (for example, shares or share options) in the *employing organization*, and the value of that *financial interest* is directly affected by the *member's* decisions.
- c. A *member* is eligible for a profit or other performance-related bonus, and the value of that bonus is directly affected by the *member's* decisions.

.13 Self-review threat. The *threat* that a *member* will not appropriately evaluate the results of a previous judgment made or service performed or supervised by the *member*, or an individual in the *employing organization* and that the *member* will rely on that service in forming a judgment as part of another service. Examples of self-review *threats* include the following:

- a. When performing an internal audit procedure, an internal auditor accepts work that he or she previously performed in a different position.
- b. The *member* accepts the work previously performed by the *member*, alone or with others, that will be the basis for providing another *professional service*.

.14 Undue influence threat. The *threat* that a *member* will subordinate his or her judgment to that of an individual associated with the *employing organization* or any relevant third party due to that individual's position, reputation or expertise, aggressive or dominant personality, or attempts to coerce or exercise excessive influence over the *member*. Examples of undue influence *threats* include the following:

- a. A *member* is pressured to become associated with misleading information.
- b. A *member* is pressured to deviate from a company policy.
- c. A *member* is pressured to change a conclusion regarding an accounting or a tax position.
- d. A *member* is pressured to hire an unqualified individual.

Safeguards

.15 Safeguards may partially or completely eliminate a *threat* or diminish the potential influence of a *threat*. The nature and extent of the *safeguards* applied will depend on many factors. To be effective, *safeguards* should eliminate the *threat* or reduce it to an *acceptable level*.

.16 Safeguards that may eliminate a *threat* or reduce it to an *acceptable level* fall into two broad categories:

- a. *Safeguards* created by the profession, legislation, or regulation
- b. *Safeguards* implemented by the *employing organization*

.17 The effectiveness of a *safeguard* depends on many factors, including those listed here:

- a. The facts and circumstances specific to a particular situation
- b. The proper identification of *threats*
- c. Whether the *safeguard* is suitably designed to meet its objectives
- d. The party(ies) who will be subject to the *safeguard*
- e. How the *safeguard* is applied
- f. The consistency with which the *safeguard* is applied
- g. Who applies the *safeguard*
- h. How the *safeguard* interacts with a *safeguard* from another category
- i. Whether the *employing organization* is a *public interest entity*

.18 Examples of *safeguards* within each category are presented in the following paragraphs. Because these are only examples and are not intended to be all inclusive, it is possible that *threats* may be sufficiently mitigated through the application of other *safeguards* not specifically identified herein.

.19 The following are examples of *safeguards* created by the profession, legislation, or regulation:

- a. Education and training requirements on ethics and professional responsibilities

- b. Continuing education requirements on ethics
- c. Professional standards and the threat of discipline
- d. Legislation establishing prohibitions and requirements for entities and employees
- e. Competency and experience requirements for professional licensure
- f. Professional resources, such as hotlines, for consultation on ethical issues

.20 Examples of *safeguards* implemented by the *employing organization* are as follows:

- a. A tone at the top emphasizing a commitment to fair financial reporting and compliance with applicable laws, rules, regulations, and corporate governance policies
- b. Policies and procedures addressing ethical conduct and compliance with laws, rules, and regulations
- c. Audit committee charter, including independent audit committee members
- d. Internal policies and procedures requiring disclosure of identified interests or relationships among the *employing organization*, its directors or officers, and vendors, suppliers, or customers
- e. Internal policies and procedures related to purchasing controls
- f. Internal policies and procedures related to customer acceptance or credit limits
- g. Dissemination of corporate ethical compliance policies and procedures, including whistle-blower hotlines, the reporting structure, dispute resolution, or other similar policies, to promote compliance with laws, rules, regulations, and other professional requirements
- h. Human resource policies and procedures *safeguarding* against discrimination or harassment, such as those concerning a worker's religion, sexual orientation, gender, or disability
- i. Human resource policies and procedures stressing the hiring and retention of technically competent employees
- j. Policies and procedures for implementing and monitoring ethical policies
- k. Assigning sufficient staff with the necessary competencies to projects and other tasks
- l. Policies segregating personal assets from company assets
- m. Staff training on applicable laws, rules, and regulations
- n. Regular monitoring of internal policies and procedures
- o. A reporting structure whereby the internal auditor does not report to the financial reporting group
- p. Policies and procedures that do not allow an internal auditor to monitor areas where the internal auditor has operational or functional responsibilities
- q. Policies for promotion, rewards, and enforcement of a culture of high ethics and integrity
- r. Use of third-party resources for consultation as needed on significant matters of professional judgment [No prior reference: new content]

Effective Date

.21 Effective December 15, 2015. Early implementation is allowed provided the member has implemented the revised code.

A nonauthoritative Conceptual Framework Toolkit for Members in Business is available at <https://us.aicpa.org/content/dam/aicpa/interestareas/professionalethics/resources/downloadabledocuments/toolkitsandaids/conceptualframeworktoolkitformembersinbusiness.docm>.

2.000.020 Ethical Conflicts

.01 An ethical conflict arises when a *member* encounters one or both of the following:

- a. Obstacles to following an appropriate course of action due to internal or external pressures
- b. Conflicts in applying relevant professional and legal standards.

.02 Once an ethical conflict is encountered, a *member* may be required to take steps to best achieve compliance with the rules and law. In weighing alternative courses of action, the *member* should consider factors such as the following:

- a. Relevant facts and circumstances, including applicable rules, laws, or regulations
- b. Ethical issues involved
- c. Established internal procedures

.03 The *member* should also be prepared to justify any departures that the *member* believes were appropriate in applying the relevant rules and law. If the *member* was unable to resolve the conflict in a way that permitted compliance with the applicable rules and law, the *member* may have to address the consequences of any violations.

.04 Before pursuing a course of action, the *member* should consider consulting with appropriate persons within the organization that employs the *member*.

.05 If a *member* decides not to consult with appropriate persons within the organization that employs the *member*, and the conflict remains unresolved after pursuing the selected course of action, the *member* should consider either consulting with other individuals for help in reaching a resolution or obtaining advice from an appropriate professional body or legal counsel. The *member* also should consider documenting the substance of the issue, the parties with whom the issue was discussed, details of any discussions held, and any decisions made concerning the issue.

.06 If the ethical conflict remains unresolved, the *member* will in all likelihood be in violation of one or more rules if he or she remains associated with the matter creating the conflict. Accordingly, the *member* should consider his or her continuing relationship with the specific assignment or employer. [No prior reference; new content]

.07 Refer to the "Responding to Noncompliance With Laws and Regulations" interpretation [2.180.010] of the "Integrity and Objectivity Rule" [2.100.001] for additional guidance.

Effective Date

.08 Effective December 15, 2014.

[See Revision History Table.]

2.100 Integrity and Objectivity

2.100.001 Integrity and Objectivity Rule

.01 In the performance of any *professional service*, a *member* shall maintain objectivity and integrity, shall be free of conflicts of interest, and shall not knowingly misrepresent facts or subordinate his or her judgment to others. [Prior reference: paragraph .01 of ET section 102]

Interpretations Under the Integrity and Objectivity Rule

2.100.005 Application of the Conceptual Framework for Members in Business and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Integrity and Objectivity Rule" [2.100.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Business" [2.000.010].

.02 A *member* would be considered in violation of the "Integrity and Objectivity Rule" [2.100.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [2.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

2.110 Conflicts of Interest

2.110.010 Conflicts of Interest for Members in Business

.01 A *member* may be faced with a conflict of interest when undertaking a *professional service*. In determining whether a *professional service*, relationship, or matter would result in a conflict of interest, a *member* should use professional judgment, taking into account whether a reasonable and informed third party who is aware of the relevant information would conclude that a conflict of interest exists.

.02 A conflict of interest creates adverse interest and self-interest *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [2.100.001]. For example, *threats* may be created when

- a. a *member* undertakes a *professional service* related to a particular matter involving two or more parties whose interests with respect to that matter are in conflict, or

- b. the interests of a *member* with respect to a particular matter and the interests of a party for whom the *member* undertakes a *professional service* related to that matter are in conflict.

.03 A party may include an *employing organization*, a vendor, a customer, a lender, a shareholder, or other party.

.04 The following are examples of situations in which conflicts of interest may arise:

- a. Serving in a management or governance position for two *employing organizations* and acquiring confidential information from one *employing organization* that could be used by the *member* to the advantage or disadvantage of the other *employing organization*
- b. Undertaking a *professional service* for each of two parties in a partnership employing the *member* to assist in dissolving their partnership
- c. Preparing financial information for certain *members* of management of the *employing organization* who are seeking to undertake a management buy-out
- d. Being responsible for selecting a vendor for the *member's employing organization* when the *member* or his or her *immediate family member* could benefit financially from the transaction
- e. Serving in a governance capacity or influencing an *employing organization* that is approving certain investments for the company in which one of those specific investments will increase the value of the personal investment portfolio of the *member* or his or her *immediate family member*

Identification of a Conflict of Interest

.05 In identifying whether a conflict of interest exists or may be created, a *member* should take reasonable steps to determine

- a. the nature of the relevant interests and relationships between the parties involved and
- b. the nature of the services and its implication for relevant parties.

.06 The nature of the relevant interests and relationships and the services may change over time. The *member* should remain alert to such changes for the purposes of identifying circumstances that might create a conflict of interest.

Evaluation of a Conflict of Interest

.07 When an actual conflict of interest has been identified, the *member* should evaluate the significance of the *threat* created by the conflict of interest to determine if the *threat* is at an *acceptable level*. *Members* should consider both qualitative and quantitative factors when evaluating the significance of the *threat*, including the extent to which existing *safeguards* already reduce the *threat* to an *acceptable level*.

.08 In evaluating the significance of an identified *threat*, *members* should consider the following:

- a. The significance of relevant interests or relationships.
- b. The significance of the *threats* created by undertaking the *professional service* or services. In general, the more direct the connection between the *member* and the matter on which the parties'

interests are in conflict, the more significant the *threat* to compliance with the rule will be.

.09 If the *member* concludes that the *threat* is not at an *acceptable level*, the *member* should apply *safeguards* to eliminate the *threat* or reduce it to an *acceptable level*. Examples of *safeguards* include the following:

- a. Restructuring or segregating certain responsibilities and duties
- b. Obtaining appropriate oversight
- c. Withdrawing from the decision making process related to the matter giving rise to the conflict of interest
- d. Consulting with third parties, such as a professional body, legal counsel, or another professional accountant

.10 In cases where an identified *threat* may be so significant that no *safeguards* will eliminate the *threat* or reduce it to an *acceptable level*, or the *member* is unable to implement effective *safeguards*, the *member* should (a) decline to perform or discontinue the *professional services* that would result in the conflict of interest; or (b) terminate the relevant relationships or dispose of the relevant interests to eliminate the *threat* or reduce it to an *acceptable level*.

Disclosure of a Conflict of Interest and Consent

.11 When a conflict of interest exists, the *member* should disclose the nature of the conflict to the relevant parties, including to the appropriate levels within the *employing organization* and obtain their consent to undertake the *professional service*. The *member* should disclose the conflict of interest and obtain consent even if the *member* concludes that *threats* are at an *acceptable level*.

.12 The *member* is encouraged to document the nature of the circumstances giving rise to the conflict of interest, the *safeguards* applied to eliminate or reduce the *threats* to an *acceptable level*, and the consent obtained.

.13 When addressing a conflict of interest, a *member* is encouraged to seek guidance from within the *employing organization* or from others, such as a professional body, legal counsel, or another professional accountant. When making disclosures and seeking guidance of third parties, the *member* should remain alert to the requirements of the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [2.400.070] of the "Acts Discreditable Rule" [2.400.001]. In addition, federal, state, or local statutes, or regulations concerning confidentiality of employer information may be more restrictive than the requirements contained in the Code of Professional Conduct.

.14 A *member* may encounter other *threats* to compliance with the "Integrity and Objectivity Rule" [2.100.001]. This may occur, for example, when preparing or reporting financial information as a result of undue pressure from others within the *employing organization* or financial, business or personal relationships that *close relatives* or *immediate family* members of the *member* have with the *employing organization*. Guidance on managing such *threats* is covered by the "Knowing Misrepresentations in the Preparation of Financial Statements or Records" interpretation [2.130.010] and the "Subordination of Judgment" interpretation [2.130.020] under the "Integrity and Objectivity Rule."

[See Revision History Table.]

2.120 Gifts and Entertainment

2.120.010 Offering or Accepting Gifts or Entertainment

.01 For purposes of this interpretation, a customer or vendor of the *member's* employer includes a representative of the customer or vendor.

.02 When a *member* offers to, or accepts gifts or entertainment from, a customer or vendor of the *member's* employer, self-interest, familiarity, or undue influence *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [2.100.001] may exist.

.03 *Threats* to compliance with the "Integrity and Objectivity Rule" [2.100.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and the *member* would be presumed to lack integrity in violation of the "Integrity and Objectivity Rule" in the following circumstances:

- a. The *member* offers to, or accepts gifts or entertainment from, a customer or vendor of the *member's* employer that violate applicable laws, rules, or regulations or the policies of the *member's* employer or the customer or vendor.
- b. The member knows of the violation or demonstrates recklessness in not knowing.

.04 A *member* should evaluate the significance of any *threats* to determine if they are at an *acceptable level*. *Threats* are at an *acceptable level* when gifts or entertainment are reasonable in the circumstances. The *member* should exercise judgment in determining whether gifts or entertainment would be considered reasonable in the circumstances. The following are examples of relevant facts and circumstances:

- a. The nature of the gift or entertainment
- b. The occasion giving rise to the gift or entertainment
- c. The cost or value of the gift or entertainment
- d. The nature, frequency, and value of other gifts and entertainment offered or accepted
- e. Whether the entertainment was associated with the active conduct of business directly before, during, or after the entertainment
- f. Whether other customers or vendors also participated in the entertainment
- g. The individuals from the customer or vendor and a *member's* employer who participated in the entertainment

.05 *Threats* to compliance with the "Integrity and Objectivity Rule" [2.100.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* through the application of *safeguards* if a *member* offers to, or accepts gifts or entertainment from, a customer or vendor of the *member's* employer that is not reasonable in the circumstances. The *member* would be considered to lack objectivity in violation of the "Integrity and Objectivity Rule," under these circumstances. [Prior reference: paragraphs .226–.227 of ET section 191]

A nonauthoritative basis-for-conclusions document summarizing considerations that were deemed significant in the development of this interpretation is available at https://us.aicpa.org/InterestAreas/ProfessionalEthics/Resources/Tools/DownloadableDocuments/Gifts_Basis_Document.pdf.

2.130 Preparing and Reporting Information

2.130.010 *Knowing Misrepresentations in the Preparation and Presentation of Information*

.01 *Members* at all levels in an *employing organization* may be involved in the preparation and presentation of information for use both within and outside the *employing organization*. Stakeholders for whom such information is prepared or presented include the following:

- a. Management and *those charged with governance*
- b. Investors, lenders, and other creditors
- c. Regulators

.02 This information may assist stakeholders in understanding and evaluating aspects of the *employing organization's* operations and finances and in making decisions concerning the *employing organization*. This includes financial and non-financial information that may be made public or used for internal purposes such as the following:

- a. Operating and performance reports
- b. Decision support analyses
- c. Budgets and forecasts
- d. Information provided to the internal and external auditors
- e. Risk analyses
- f. General and special purpose *financial statements*
- g. Tax returns
- h. Reports filed with regulators for legal and compliance purposes

.03 *Members* who are responsible for recording, maintaining, preparing, approving, or presenting information should do so in accordance with the "Integrity and Objectivity Rule" [2.100.001] as follows:

- a. Presenting the information in accordance with a relevant reporting framework, where applicable
- b. Preparing or presenting information in a manner that is intended not to mislead, including not to influence contractual or regulatory outcomes inappropriately
- c. Preparing or presenting information without omissions that would render the information misleading

.04 This responsibility involves using professional judgment in the following:

- a. Representing the facts accurately and completely in all material respects

- b. Describing clearly the true nature of business transactions or activities
- c. Classifying and recording information in a timely and proper manner

Preparation and Presentation of Financial Statements and Records

.05 *Threats* to compliance with the "Integrity and Objectivity Rule" [2.100.001] would not be at an *acceptable level* and could not be reduced to an *acceptable level* by the application of *safeguards*, and the *member* would be considered to have knowingly misrepresented facts in violation of the "Integrity and Objectivity Rule," if the *member*

- a. makes, or permits or directs another to make, materially false and misleading entries in an entity's *financial statements* or records;
- b. fails to correct an entity's *financial statements* or records that are materially false and misleading when the *member* has the authority to record the entries; or
- c. signs, or permits or directs another to sign, a document containing materially false and misleading information. [Prior reference: paragraph .02 of ET section 102]

.06 Preparing or presenting information may require the exercise of discretion in making professional judgments. Preparing or presenting such information in compliance with the "Integrity and Objectivity Rule" [2.100.001] requires the *member* not to exercise such discretion with the intention of misleading.

Preparation and Presentation of Information Not Subject to a Reporting Framework

.07 When performing professional activities, especially those that do not require compliance with a relevant reporting framework, the *member* should use professional judgment to identify and take into account the purpose for which the information is to be used, the context in which it is provided, and the audience to whom it is addressed. For example, when preparing or presenting pro forma reports, budgets, or forecasts, the inclusion of relevant estimates, approximations, and assumptions, where appropriate, would enable those who may rely on such information to form their own judgments. The *member* may also consider clarifying the intended audience, context, and purpose of the information presented.

Reliance on the Work of Others

.08 A *member* who intends to rely on the work of others, either internal or external to the organization, should use professional judgment to determine what steps to take, if any, to ensure that the requirements set out in paragraphs .03, .04, and .05 are fulfilled. Factors to consider in determining whether reliance on others is reasonable include reputation, expertise, objectivity, resources available to the individual or organization, and whether the other individual is subject to applicable professional and ethical standards. Such information may be gained from prior association with, or from consulting others about, the individual or the organization.

Association With Misleading Information

.09 If the *member* knows or has reason to believe that the information with which he or she is associated is misleading, the *member* should apply appropriate *safeguards* to seek to resolve the matter, including the following:

- a. Consulting the *employing organization's* policies and procedures (for example, an ethics or whistleblowing policy) regarding how such matters should be addressed internally
- b. Discussing concerns that the information is misleading with the *member's* supervisor or the appropriate levels of management within the *member's employing organization* or *those charged with governance* and requesting such individuals to take appropriate action to resolve the matter. Such action may include the following:
 - i. Having the information corrected
 - ii. If the information has already been disclosed to the intended users, informing them of the correct information

.10 If the *member* determines that appropriate action has not been taken and continues to have reason to believe that the information is misleading, *threats* to compliance with the "Integrity and Objectivity Rule" [2.100.001] would not be at an *acceptable level*. In such circumstances, the *member*, being alert to the requirements of the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [2.400.070], should consider one or more of the following *safeguards*:

- a. Consulting with a relevant professional body
- b. Consulting with the *employing organization's* internal auditor and external accountant
- c. Determining whether any requirements exist to communicate to third parties, including users of the information, the organization's external accountant, or regulatory authorities
- d. Consulting legal counsel regarding his or her responsibilities

.11 If, after exhausting all feasible options, the *member* determines that appropriate action has not been taken and there is reason to believe that the information is still misleading, the *member* should refuse to be or to remain associated with the information. The *member* also should consider whether to continue a relationship with the *employing organization*.

.12 Nothing in this *interpretation* precludes a *member* from resigning from the organization at any time. However, resignation may not relieve the *member* of responsibilities in the situation, including any responsibility to disclose concerns to third parties, such as regulatory authorities or the *employing organization's* (or former *employing organization's*) external accountant.

.13 The *member* is also encouraged to document his or her understanding of the facts, the accounting principles or other relevant professional standards involved, and the communications and parties with whom these matters were discussed, the courses of action considered, and how the *member* attempted to address the matter.

.14 When *threats* to compliance with the "Integrity and Objectivity Rule" [2.100.001] are due to differences of opinion between a *member* and his or her supervisor (or any other person within the *member's* organization) relating to the application of accounting principles, auditing standards, or other relevant

professional standards, the *member* should also refer to the "Subordination of Judgment" interpretation [2.130.020].

[See Revision History Table]

2.130.020 Subordination of Judgment

.01 The "Integrity and Objectivity Rule" [2.100.001] prohibits a *member* from knowingly misrepresenting facts or subordinating his or her judgment when performing *professional services* for an employer or on a volunteer basis. This interpretation addresses differences of opinion between a member and his or her supervisor or any other person within the *member's* organization.

.02 Self-interest, familiarity, and undue influence *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [2.100.001] may exist when a *member* and his or her supervisor or any other person within the *member's* organization have a difference of opinion relating to the application of accounting principles; auditing standards; or other relevant professional standards, including standards applicable to tax and consulting services or applicable laws or regulations.

.03 A *member* should evaluate the significance of any *threats* to determine if they are at an *acceptable level*. *Threats* are at an *acceptable level* if the *member* concludes that the position taken does not result in a material misrepresentation of fact or a violation of applicable laws or regulations. If *threats* are not at an *acceptable level*, the *member* should apply the *safeguards* in paragraphs .06–.08 to eliminate or reduce the threat(s) to an *acceptable level* so that the *member* does not subordinate his or her judgment.

.04 In evaluating the significance of any identified *threats*, the *member* should determine, after appropriate research or consultation, whether the result of the position taken by the supervisor or other person

- a. fails to comply with professional standards, when applicable;
- b. creates a material misrepresentation of fact; or
- c. may violate applicable laws or regulations.

.05 If the *member* concludes that *threats* are at an *acceptable level*, the *member* should discuss his or her conclusions with the person taking the position. No further action would be needed under this interpretation.

.06 If the *member* concludes that the position results in a material misrepresentation of fact or a violation of applicable laws or regulations, then *threats* would not be at an *acceptable level*. In such circumstances, the *member* should discuss his or her concerns with the supervisor.

.07 If the difference of opinion is not resolved after discussing the concerns with the supervisor, the *member* should discuss his or her concerns with the appropriate higher level(s) of management within the *member's* organization (for example, the supervisor's immediate superior, senior management, and those charged with governance).

.08 If after discussing the concerns with the supervisor and appropriate higher level(s) of management within the *member's* organization, the *member* concludes that appropriate action was not taken, then the *member* should consider, in no specific order, the following *safeguards* to ensure that *threats* to the *member's* compliance with the "Integrity and Objectivity Rule" [2.100.001] are eliminated or reduced to an *acceptable level*:

- a. Determine whether the organization's internal policies and procedures have any additional requirements for reporting differences of opinion.
- b. Determine whether he or she is responsible for communicating to third parties, such as regulatory authorities or the organization's (former organization's) external accountant. In considering such communications, the *member* should be cognizant of his or her obligations under the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [2.400.070] of the "Acts Discreditable Rule" [2.400.001] and the "Obligation of a Member to His or Her Employer's External Accountant" interpretation [2.130.030] of the "Integrity and Objectivity Rule" [2.100.001].
- c. Consult with his or her legal counsel regarding his or her responsibilities.
- d. Document his or her understanding of the facts, the accounting principles, auditing standards, or other relevant professional standards involved or applicable laws or regulations and the conversations and parties with whom these matters were discussed.

.09 If the *member* concludes that no *safeguards* can eliminate or reduce the *threats* to an *acceptable level* or if the *member* concludes that appropriate action was not taken, then he or she should consider the continuing relationship with the *member's* organization and take appropriate steps to eliminate his or her exposure to subordination of judgment.

.10 Nothing in this interpretation precludes a *member* from resigning from the organization at any time. However, resignation may not relieve the *member* of responsibilities in the situation, including any responsibility to disclose concerns to third parties, such as regulatory authorities or the employer's (former employer's) external accountant.

.11 A *member* should use professional judgment and apply similar *safeguards*, as appropriate, to other situations involving a difference of opinion as described in this interpretation so that the *member* does not subordinate his or her judgment. [Prior reference: paragraph .05 of ET section 102]

2.130.030 Obligation of a Member to His or Her Employer's External Accountant

.01 The "Integrity and Objectivity Rule" [2.100.001] requires a *member* to maintain objectivity and integrity in the performance of a *professional service*. When dealing with an employer's external accountant, a *member* must be candid and not knowingly misrepresent facts or knowingly fail to disclose material facts. This would include, for example, responding to specific inquiries for which the employer's external accountant requests written representation. [Prior reference: paragraph .04 of ET section 102]

2.160 Educational Services

2.160.010 Educational Services

.01 *Members* who perform educational services, such as teaching full or part time at a university, teaching a continuing professional education course, or engaging in research and scholarship, are performing *professional services*

and, therefore, are subject to the "Integrity and Objectivity Rule" [2.100.001].
[Prior reference: paragraph .06 of ET section 102]

2.170 Pressure to Breach the Rules

2.170.010 Pressure to Breach the Rules

.01 This interpretation addresses pressures that could result in a *member* taking actions that breach or cause others to breach the rules, particularly the "Integrity and Objectivity Rule" [2.100.001].

.02 A *member* may face pressure that could create *threats*, for example undue influence *threats*, to compliance with the "Integrity and Objectivity Rule" [2.100.001] when undertaking a *professional service*. Pressure may be explicit or implicit. Pressure may come from within the *employing organization*, for example, from a colleague or superior, from an external individual or organization such as a vendor, customer or lender, or from the need to meet internal or external targets and expectations.

.03 A *member* should not allow pressure from others to result in a breach of the "Integrity and Objectivity Rule" [2.100.001]. A *member* also should not place pressure on others that the *member* knows, or has reason to believe, would result in the other individuals breaching the rules of the AICPA Code of Professional Conduct.

.04 Examples of pressure that could result in a breach of the "Integrity and Objectivity Rule" [2.100.001] include the following:

- a. Pressure related to conflicts of interest, for example, pressure from a family member bidding to act as a vendor to the *member's employing organization* to select that vendor over another prospective vendor

Refer to the "Conflicts of Interest for Members in Business" interpretation [2.110.010] for additional guidance.

- b. Pressure to influence presentation of information:
 - i. Pressure to report misleading financial results to meet investor, analyst, or lender expectations.
 - ii. Pressure from elected officials on government accountants to misrepresent programs or projects to voters.
 - iii. Pressure from colleagues to misstate income, expenditure, or rates of return to bias decision-making on capital projects and acquisitions.
 - iv. Pressure from superiors to approve or process expenditures that are not legitimate business expenses.
 - v. Pressure to suppress internal audit reports containing adverse findings.

Refer to the "Knowing Misrepresentations in the Preparation and Presentation of Information" interpretation [2.130.010] for additional guidance.

- c. Pressure to act without sufficient competence or due care:
 - i. Pressure from superiors to inappropriately reduce the extent of work performed.
 - ii. Pressure from superiors to perform a task without sufficient skills or training or within unrealistic deadlines.

Refer to the "General Standards Rule" [2.300.001] for additional guidance.

- d. Pressure related to *financial interests*. For example, pressure to manipulate performance indicators from superiors, colleagues or others, such as those who may benefit from participation in compensation or incentive arrangements.
- e. Pressure related to gifts or entertainment:
 - i. Pressure from others, either internal or external to the *employing organization*, to offer gifts or entertainment to inappropriately influence the judgment or decision-making process of an individual or organization.
 - ii. Pressure from colleagues to accept inappropriate gifts or entertainment from potential vendors in a bidding process.

Refer to the "Offering or Accepting Gifts or Entertainment" interpretation [2.120.010] for additional guidance.

.05 In determining whether the pressure could result in a breach of the "Integrity and Objectivity Rule" [2.100.001], the *member* might consider factors including the following:

- a. The intent of the individual who is exerting the pressure and the nature and significance of the pressure.
- b. The application of relevant laws, regulations, and professional standards to the circumstances.
- c. The culture and leadership of the *employing organization* including the extent to which it emphasizes the importance of ethical behavior and the expectation that employees will act in an ethical manner. For example, a corporate culture that tolerates unethical behavior may increase the likelihood that the pressure would result in a breach of the rules.
- d. Policies and procedures, if any, that the *employing organization* has established, such as ethics or human resources policies that address pressure.

.06 In considering the factors in paragraph .05 along with other factors, and being alert to the requirements of the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [2.400.070], the *member* may consult with the following:

- a. A colleague, superior, human resources personnel, internal compliance personnel, or another professional accountant.
- b. Relevant professional or regulatory bodies or industry associations.
- c. Legal counsel.

.07 If the *member* determines that the pressure would result in a breach of the "Integrity and Objectivity Rule" [2.100.001], the *member* might consider *safeguards*, including these:

- a. Discussing the matter with the individual who is exerting the pressure to seek to resolve it.
- b. Discussing the matter with the *member's* supervisor if the supervisor is not the individual exerting the pressure.
- c. Escalating the matter within the *employing organization*, for example, with higher levels of management, internal or external auditors, or *those charged with governance*, including independent

directors and, when appropriate, explaining any consequential risks to the organization.

- d. Requesting restructuring or segregating certain responsibilities and duties so that the *member* is no longer involved with the individual or entity exerting the pressure, when doing so would eliminate the pressure to breach the "Integrity and Objectivity Rule." For example, if a *member* is pressured in relation to a conflict of interest, the pressure to breach the rule may be eliminated if the *member* avoids being associated with the matter creating the conflict.
- e. Disclosing the matter in accordance with the *employing organization's* policies, including ethics and whistleblowing policies, using any established mechanism, such as a confidential ethics hotline.
- f. Consulting with legal counsel.

.08 In situations in which the *member* determines that the pressure to breach the "Integrity and Objectivity Rule" [2.100.001] has not been eliminated, the *member* should do the following:

- a. Decline to undertake or discontinue the professional activity that would result in a breach of the rule.
- b. Consider whether to continue a relationship with the *employing organization*.

.09 The *member* is also encouraged to document the facts, the communications, the courses of action considered, the parties with whom these matters were discussed, and how the matter was addressed.

Effective Date

.10 This interpretation is effective August 31, 2017.

2.180 Responding to Noncompliance With Laws and Regulations

2.180.010 Responding to Noncompliance With Laws and Regulations

Introduction

.01 When a *member in business* encounters or is made aware of noncompliance or suspected noncompliance with laws and regulations in the course of carrying out *professional services*, *threats* to compliance with the "Integrity and Objectivity Rule" [2.100.001] may exist. The purpose of this interpretation is to set out the *member's* responsibilities when encountering such noncompliance or suspected noncompliance and guide the *member* in evaluating the implications of the matter and the possible courses of action when responding to it. This interpretation applies regardless of the nature of the *employing organization*.

.02 Noncompliance with laws and regulations (noncompliance) comprises acts of omission or commission, intentional or unintentional, that are contrary to the prevailing laws or regulations and are committed by the *member's employing organization* or by *those charged with governance*, by management, or by other individuals working for or under the direction of the *employing organization*.

.03 When responding to noncompliance or suspected noncompliance in the course of carrying out *professional services*, the *member* should consider

the *member's* obligations under the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [2.400.070] of the "Acts Discreditable Rule" [2.400.001]. For example, a *member* should not disclose the noncompliance or suspected noncompliance to a third party without the employer's consent unless expressly permitted under the "Confidential Information Obtained From Employment or Volunteer Activities" interpretation [2.400.070], such as when reporting the noncompliance or suspected noncompliance to a regulatory authority in order to comply with applicable laws and regulations, as discussed in paragraph .04.

.04 Some regulators, for example, the SEC or state boards of accountancy, may have regulatory provisions governing how a *member* should address noncompliance or suspected noncompliance which may differ from or go beyond this interpretation. In some circumstances, state and federal civil and criminal laws may also impose additional requirements. When encountering noncompliance or suspected noncompliance, a *member* has a responsibility to obtain an understanding of those legal or regulatory provisions and comply with them, including any requirement to report the matter to an appropriate authority and any prohibition on alerting the relevant party prior to making any disclosure.

.05 A distinguishing mark of the accounting profession is its acceptance of the responsibility to act in the public interest. When responding to noncompliance or suspected noncompliance, the objectives of a *member* are as follows:

- a. To comply with the "Integrity and Objectivity Rule" [2.100.001]
- b. To alert management or, when appropriate, *those charged with governance* of the *employing organization*, to enable them to
 - i. rectify, remediate, or mitigate the consequences of the identified or suspected noncompliance or
 - ii. deter the commission of the noncompliance when it has not yet occurred
- c. To take such further action as appropriate in the public interest
- d. To comply with applicable laws, regulations, and the "Compliance With Standards Rule" [2.310.001]

Applicability

.06 This interpretation does not apply to the following:

- a. Personal misconduct unrelated to the business activities of the *employing organization*
- b. Noncompliance by parties other than
 - i. the *employing organization*,
 - ii. *those charged with governance*,
 - iii. management, or
 - iv. other individuals working for or under the direction of the *employing organization*.
- c. The provision of professional services by a *member in business* involving the following:
 - i. A litigation or investigation as defined in AICPA Statement on Standards for Forensic Services No. 1.
 - ii. A matter where the purpose is to identify, reach a conclusion regarding, or otherwise respond to a known or potential NOCLAR.

- iii. A matter pursuant to which the protections set forth in IRC Section 7525 or any comparable state or local statutes apply.
- iv. A matter where compliance with this interpretation would cause a violation of law or regulation.

A *member* may nevertheless find the guidance in this interpretation helpful in considering how to respond in these situations.

Scope

.07 This interpretation sets out the approach to be taken by a *member* who encounters or is made aware of noncompliance or suspected noncompliance with the following:

- a. Laws and regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the *employing organization's financial statements*
- b. Other laws and regulations that do not have a direct effect on the determination of the amounts and disclosures in the *employing organization's financial statements*, but compliance with which may be fundamental to the operating aspects of the *employing organization's* business, to its ability to continue its business, or to avoid material penalties

.08 Examples of laws and regulations which this interpretation addresses may include those that deal with the following:

- a. Fraud, corruption, and bribery
- b. Money laundering
- c. Securities markets and trading
- d. Banking and other financial products and services
- e. Data protection
- f. Tax and pension liabilities and payments
- g. Environmental protection
- h. Public health and safety

.09 Noncompliance may result in fines, litigation, or other consequences for the *employing organization* that may have a material effect on its *financial statements*. Importantly, such noncompliance may have wider public interest implications in terms of potentially substantial harm to investors, creditors, employees, or the general public. For the purposes of this interpretation, an act that causes substantial harm is one that results in serious adverse consequences to any of these parties in financial or nonfinancial terms.

.10 A *member* who encounters or is made aware of matters that are clearly inconsequential is not required to comply with this interpretation with respect to such matters.

Responsibilities of the Employing Organization's Management and Those Charged With Governance

.11 It is the responsibility of the *employing organization's* management, with the oversight of *those charged with governance*, to ensure that the *employing organization's* business activities are conducted in accordance with laws and regulations. It is also the responsibility of management and *those charged with governance* to identify and address any noncompliance by the *employing organization* or by an individual charged with governance of the entity, by a

member of management, or by other individuals working for or under the direction of the *employing organization*.

Responsibilities of Members in Business

.12 Many *employing organizations* have established protocols and procedures (for example, an ethics policy or internal whistleblowing mechanism) regarding how noncompliance or suspected noncompliance by the *employing organization* should be raised internally. Such protocols and procedures may allow for matters to be reported anonymously through designated channels. If these protocols and procedures exist within the *member's employing organization*, the *member* should consider them in determining how to respond to such noncompliance.

.13 When a *member* becomes aware of a matter to which this interpretation applies, the *member* should take timely steps to comply with this interpretation, taking into account the *member's* understanding of the nature of the matter and the potential harm to the interests of the *employing organization*, investors, creditors, employees, or the general public.

Responsibilities of Members Who Are Senior Professional Accountants in Business

.14 *Members* who are senior professional accountants in business are directors, officers, or senior employees able to exert significant influence over, and make decisions regarding, the acquisition, deployment, and control of the *employing organization's* human, financial, technological, physical, and intangible resources. Because of their roles, positions, and spheres of influence within the *employing organization*, there is a greater expectation for them to take whatever action is appropriate in the public interest to respond to noncompliance or suspected noncompliance than other professional accountants within the *employing organization*.

.15 *Obtaining an understanding of the matter.* If, in the course of carrying out *professional services*, a *member* who is a senior professional accountant becomes aware of credible information concerning an instance of noncompliance or suspected noncompliance, the *member* should obtain an understanding of the matter, including the following:

- a. The nature of the act and the circumstances in which it has occurred or is likely to occur
- b. The application of the relevant laws and regulations to the circumstances
- c. The potential consequences to the *employing organization*, investors, creditors, employees, or the wider public

.16 A *member* who is a senior professional accountant is expected to apply knowledge, professional judgment, and expertise but is not expected to have a level of understanding of laws and regulations beyond that required for the *member's* role within the *employing organization*. Whether an act constitutes noncompliance is ultimately a matter to be determined by a court or other appropriate adjudicative body.

.17 Depending on the nature and significance of the matter, the *member* may cause, or take appropriate steps to cause, the matter to be investigated internally.

.18 *Addressing the matter.* If the *member* who is a senior professional accountant identifies or suspects that noncompliance has occurred or may

occur, the *member* should, subject to paragraph .12, discuss the matter with the *member's* immediate superior, if any, to determine how the matter should be addressed. If the *member's* immediate superior appears to be involved in the matter, the *member* should discuss the matter with the next higher level of authority within the *employing organization*.

.19 The *member* who is a senior professional accountant should take the appropriate steps to

- a. have the matter communicated to *those charged with governance* to obtain their concurrence regarding appropriate actions to take to respond to the matter and to enable them to fulfill their responsibilities.
- b. comply with applicable laws and regulations, including legal or regulatory provisions governing the reporting of noncompliance or suspected noncompliance to an appropriate authority.
- c. have the consequences of the noncompliance or suspected noncompliance rectified, remediated, or mitigated.
- d. reduce the risk of reoccurrence.
- e. seek to deter the commission of the noncompliance if it has not yet occurred.

.20 In addition to responding to the matter in accordance with the provisions of this section, the *member* who is a senior professional accountant should disclose the matter to the *employing organization's* external auditor, if any, if the *member* determines such disclosure is necessary pursuant to the *member's* obligation to provide all information necessary to enable the auditor to perform the audit. See the "Obligation of a Member to His or Her Employer's External Accountant" interpretation [2.130.030] of the "Integrity and Objectivity Rule" [2.100.001] for additional guidance.

.21 *Determining whether further action is necessary.* The *member* who is a senior professional accountant should evaluate the appropriateness of the response of the *member's* superiors, if any, and *those charged with governance*.

.22 Relevant factors to consider in evaluating the appropriateness of the response of the *member's* superiors, where applicable, and *those charged with governance* may include whether

- a. the response is timely.
- b. they have taken or authorized appropriate action to seek to rectify, remediate, or mitigate the consequences of the noncompliance, or to avert the noncompliance if it has not yet occurred.
- c. the matter has been disclosed to an appropriate authority where appropriate and, if so, whether the disclosure appears adequate.

.23 In light of the response of the *member's* superiors, if applicable, and *those charged with governance*, the *member* should determine if further action is necessary in the public interest. The determination of whether further action is necessary, and the nature and extent of it, may depend on various factors, including these:

- a. The legal and regulatory framework
- b. The urgency of the matter
- c. The pervasiveness of the matter throughout the *employing organization*

- d. Whether the *member* who is a senior professional accountant continues to have confidence in the integrity of the *member's* superiors and, if applicable, *those charged with governance*
- e. Whether the noncompliance or suspected noncompliance is likely to reoccur
- f. Whether there is credible evidence of actual or potential substantial harm to the interests of the *employing organization*, investors, creditors, employees, or the general public

.24 Examples of circumstances that may cause the *member* who is a senior professional accountant no longer to have confidence in the integrity of the *member's* superiors, if applicable, and *those charged with governance* include situations such as the following:

- a. The *member* suspects or has evidence of management's involvement or intended involvement in any noncompliance.
- b. Contrary to legal or regulatory requirements, management has not reported the matter, or authorized the matter to be reported, to an appropriate authority within a reasonable period.

.25 Further action by the *member* who is a senior professional accountant may include the following:

- a. Informing the management of the parent entity of the matter if the *employing organization* is a member of a group
- b. Resigning from the *employing organization*
- c. Reporting the noncompliance or suspected noncompliance to an appropriate authority unless prohibited by laws or regulations

.26 When the *member* who is a senior professional accountant determines that resigning from the *employing organization* would be appropriate, doing so would not be a substitute for taking other actions that may be necessary to achieve the member's objectives under this section.

.27 The determination of whether to disclose the matter to an appropriate authority may also depend on external factors such as the following:

- a. Whether there is an appropriate authority that is able to receive the information and cause the matter to be investigated and action to be taken. Identifying an appropriate authority will depend upon the nature of the matter. For example, an appropriate authority could be a securities regulator in the case of fraudulent financial reporting or an environmental protection agency in the case of a breach of environmental laws and regulations.
- b. Whether there exists robust and credible protection from civil, criminal, or professional liability or retaliation afforded by legislation or regulation, such as under whistleblowing legislation or regulation.
- c. Whether there are actual or potential threats to the physical safety of the senior professional accountant or other individuals.

.28 As consideration of the matter may involve complex analysis and judgments, the *member* who is a senior professional accountant may want to consider consulting internally or externally, including obtaining legal or other advice to understand the *member's* options and the implications of taking any particular course of action.

.29 Documentation. In relation to an identified or suspected act of non-compliance that falls within the scope of this section, the *member* who is a senior professional accountant is encouraged to have the following matters documented:

- a. The matter
- b. The results of discussions with the *member's* superiors, where applicable, and *those charged with governance* and other parties
- c. How the *member's* superiors, where applicable, and *those charged with governance* have responded to the matter
- d. The judgments made and the courses of action the *member* took
- e. How the *member* is satisfied that the *member* has fulfilled the responsibility set out in paragraph .23

Responsibilities of Members Other Than Those Who Are Senior Professional Accountants in Business

.30 If, in the course of carrying out *professional services*, a *member* becomes aware of information concerning an instance of noncompliance or suspected noncompliance, the *member* should seek to obtain an understanding of the matter, including the nature of the act and the circumstances in which it has occurred or may occur.

.31 The *member* is expected to apply knowledge, professional judgment, and expertise but is not expected to have a level of understanding of laws and regulations beyond that required for the *member's* role within the *employing organization*. Whether an act constitutes noncompliance is ultimately a matter to be determined by a court or other appropriate adjudicative body.

.32 If the *member* identifies or suspects that noncompliance has occurred or may occur, the *member* should, subject to paragraph .12, inform an immediate superior to enable the superior to take appropriate action. If the *member's* immediate superior appears to be involved in the matter, the *member* should inform the next higher level of authority within the *employing organization*.

.33 In addition to responding to the matter in accordance with the provisions of this section, the *member* should disclose the matter to the *employing organization's* external auditor, if any, if the *member* determines such disclosure is necessary pursuant to the *member's* obligation to provide all information necessary to enable the auditor to perform the audit. See the "Obligation of a Member to His or Her Employer's External Accountant" interpretation [2.130.030] for additional guidance.

.34 Further action by the *member* may include reporting the noncompliance or suspected noncompliance to an appropriate authority unless prohibited by laws or regulations. In determining whether to disclose the matter to an appropriate authority, the *member* may consider the factors in paragraph .27.

.35 Documentation. In relation to an identified or suspected act of noncompliance that falls within the scope of this section, the *member* is encouraged to have the following matters documented:

- a. The matter
- b. The results of discussions with the *member's* superior; management and, where applicable, *those charged with governance*; and other parties
- c. How the *member's* superior has responded to the matter
- d. The judgments made and the courses of action the *member* took

Effective Date

.36 This interpretation is effective June 30, 2023. Early implementation is allowed.

2.300 General Standards**2.300.001 General Standards Rule**

.01 A *member* shall comply with the following standards and with any *interpretations* thereof by bodies designated by *Council*.

- a. *Professional Competence*. Undertake only those *professional services* that the *member* or the *member's firm* can reasonably expect to be completed with professional competence.
- b. *Due Professional Care*. Exercise due professional care in the performance of *professional services*.
- c. *Planning and Supervision*. Adequately plan and supervise the performance of *professional services*.
- d. *Sufficient Relevant Data*. Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any *professional services* performed.

.02 See appendix A, "Council Resolution Designating Bodies to Promulgate Technical Standards." [Prior reference: paragraph .01 of ET section 201]

Interpretations Under the General Standards Rule**2.300.005 Application of the Conceptual Framework for Members in Business and Ethical Conflicts**

.01 In the absence of an *interpretation* of the "General Standards Rule" [2.300.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Business" [2.000.010].

.02 A *member* would be considered in violation of the "General Standards Rule" [2.300.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [2.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional and legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

2.300.010 Competence

.01 Competence, in this context, means that the *member* or *member's* staff possesses the appropriate technical qualifications to perform *professional*

services and, as required, supervises and evaluates the quality of work performed. Competence encompasses knowledge of the profession's standards, the techniques and technical subject matter involved, and the ability to exercise sound judgment in applying such knowledge in the performance of *professional services*.

.02 A *member's* agreement to perform *professional services* implies that the *member* has the necessary competence to complete those services according to professional standards and to apply the *member's* knowledge and skill with reasonable care and diligence. However, the *member* does not assume a responsibility for infallibility of knowledge or judgment.

.03 The *member* may have the knowledge required to complete the services in accordance with professional standards prior to performance. A normal part of providing professional services involves performing additional research or consulting with others to gain sufficient competence.

.04 If a *member* is unable to gain sufficient competence, the *member* should suggest the involvement of a competent person to perform the needed *professional service*, either independently or as an associate. [Prior reference: paragraph .02 of ET section 201]

2.300.030 Submission of Financial Statements

.01 When a *member* is a stockholder, a *partner*, a director, an officer, or an employee of an entity and, in this capacity, prepares or submits the entity's *financial statements* to third parties, the *member* should clearly communicate, preferably in writing, the *member's* relationship to the entity and should not imply that the *member* is independent of the entity. In addition, if the communication states affirmatively that the *financial statements* are presented in conformity with the applicable financial reporting framework, the *member* should comply with the "Accounting Principles Rule" [2.320.001].

.02 Refer to the "Use of CPA Credential" interpretation [2.400.100] of the "Acts Discreditable Rule" [2.400.001] for additional guidance. [Prior reference: paragraphs .019–.020 of ET section 291]

2.310 Compliance With Standards

2.310.001 Compliance With Standards Rule

.01 A *member* who performs auditing, review, compilation, management consulting, tax, or other *professional services* shall comply with standards promulgated by bodies designated by *Council*.

.02 See appendix A, "Council Resolution Designating Bodies to Promulgate Technical Standards." [Prior reference: paragraph .01 of ET section 202]

A nonauthoritative question and answer regarding use of standards that have not been established by a body designated by AICPA Council is available in the FAQ at <https://us.aicpa.org/InterestAreas/ProfessionalEthics/Resources/Tools/DownloadableDocuments/Ethics-General-FAQs.pdf>.

Interpretations Under the Compliance with Standards Rule

2.310.005 Application of the Conceptual Framework for Members in Business and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Compliance With Standards Rule" [2.310.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Business" [2.000.010]

.02 A *member* would be considered in violation of the "Compliance With Standards Rule" [2.310.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [2.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015, and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

2.320 Accounting Principles

2.320.001 Accounting Principles Rule

.01 A *member* shall not (1) express an opinion or state affirmatively that the *financial statements* or other financial data of any entity are presented in conformity with generally accepted accounting principles or (2) state that he or she is not aware of any material modifications that should be made to such statements or data in order for them to be in conformity with generally accepted accounting principles, if such statements or data contain any departure from an accounting principle promulgated by bodies designated by *Council* to establish such principles that has a material effect on the statements or data taken as a whole. If, however, the statements or data contain such a departure and the *member* can demonstrate that due to unusual circumstances the *financial statements* or data would otherwise have been misleading, the *member* can comply with the rule by describing the departure, its approximate effects, if practicable, and the reasons why compliance with the principle would result in a misleading statement.

.02 See appendix A, "Council Resolution Designating Bodies to Promulgate Technical Standards." [Prior reference: paragraph .01 of ET section 203]

Interpretations Under the Accounting Principles Rule

2.320.005 Application of the Conceptual Framework for Members in Business and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Accounting Principles Rule" [2.320.001] that addresses a particular relationship or circumstance, a

member should apply the "Conceptual Framework for Members in Business" [2.000.010].

.02 A *member* would be considered in violation of the "Accounting Principles Rule" [2.320.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [2.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to following an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015 and early implementation is allowed provided the member has implemented the revised code. Paragraph .03 is effective December 15, 2014.

2.320.010 Responsibility for Affirming That Financial Statements Are in Conformity With the Applicable Financial Reporting Framework

.01 A *member* shall not state affirmatively that an entity's *financial statements* or other financial data are presented in conformity with generally accepted accounting principles (GAAP) if such statements or data contain any departure from an accounting principle promulgated by a body designated by *Council* to establish such principles. *Members* who affirm that *financial statements* or other financial data are presented in conformity with GAAP should comply with the "Accounting Principles Rule" [2.320.001]. A *member's* representation in a letter or other communication that an entity's *financial statements* are in conformity with GAAP may be considered an affirmative statement within the meaning of this rule with respect to the *member* who signed the letter or other communication (for example, the *member* signed a report to a regulatory authority, a creditor, or an auditor). [Prior reference: paragraph .05 ET section 203]

2.320.020 Status of Financial Accounting Standards Board, Governmental Accounting Standards Board, Federal Accounting Standards Advisory Board, and International Accounting Standards Board Interpretations

.01 The "Accounting Principles Rule" [2.320.001] authorizes *Council* to designate bodies to establish accounting principles. *Council* has designated the Financial Accounting Standards Board (FASB) as such a body and has resolved that FASB *Accounting Standards Codification* (ASC) constitutes accounting principles as contemplated in the rule. *Council* designated the Governmental Accounting Standards Board (GASB), with respect to Statements of Governmental Accounting Standards issued in July 1984 and thereafter, as the body to establish financial accounting principles for state and local governmental entities, pursuant to the "Accounting Principles Rule." *Council* designated the Federal Accounting Standards Advisory Board (FASAB), with respect to Statements of Federal Accounting Standards adopted and issued in March 1993 and subsequently, as the body to establish accounting principles for federal government entities, pursuant to the "Accounting Principles Rule."

Council designated the International Accounting Standards Board (IASB) as an accounting body for purposes of establishing international financial accounting and reporting principles.

.02 Reference to GAAP in the "Accounting Principles Rule" [2.320.001] means those accounting principles promulgated by bodies designated by *Council*, which are listed in paragraph .01 and in appendix A, "Council Resolution Designating Bodies to Promulgate Technical Standards."

.03 The Professional Ethics Division will look to the codification or statements and any interpretations thereof issued by FASB, GASB, FASAB, or IASB in determining whether a *member* has departed from an accounting principle established by a designated accounting standard-setter in FASB ASC, a Statement of Governmental Accounting Standards, a Statement of Federal Accounting Standards, or International Financial Reporting Standards (IFRS). [Prior reference: paragraph .03 of ET section 203]

2.320.030 Departures From Generally Accepted Accounting Principles

.01 It is difficult to anticipate all the circumstances in which accounting principles may be applied. However, there is a strong presumption that adherence to GAAP would, in nearly all instances, result in *financial statements* that are not misleading. The "Accounting Principles Rule" [2.320.001] recognizes that, upon occasion, there may be unusual circumstances when the literal application of GAAP would have the effect of rendering *financial statements* misleading. In such cases, the proper accounting treatment to apply is that which will not render the *financial statements* misleading.

.02 The question of what constitutes unusual circumstances, as referred to in the "Accounting Principles Rule" [2.320.001], is a matter of professional judgment involving the ability to support the position that adherence to a promulgated principle within GAAP would be regarded generally by reasonable persons as producing misleading *financial statements*.

.03 Examples of circumstances that may justify a departure from GAAP include new legislation or evolution of a new form of business transaction. Examples of circumstances that would not justify departures from GAAP include an unusual degree of materiality or conflicting industry practices. [Prior reference: paragraph .02 of ET section 203]

.04 If the statements or data contain such departures, see the "Accounting Principles Rule" [2.320.001] for further guidance.

2.320.040 Financial Statements Prepared Pursuant to Financial Reporting Frameworks Other Than GAAP

.01 Reference to GAAP in the "Accounting Principles Rule" [2.320.001] means those accounting principles promulgated by bodies designated by *Council*, which are listed in appendix A. The bodies designed by *Council* to promulgate accounting principles are

- a. FASAB,
- b. FASB,
- c. GASB, and
- d. IASB.

.02 *Financial statements* prepared pursuant to other accounting principles would be considered financial reporting frameworks other than GAAP within the context of the "Accounting Principles Rule" [2.320.001].

.03 However, the "Accounting Principles Rule" [2.320.001] does not preclude a *member* from preparing or reporting on *financial statements* that have been prepared pursuant to financial reporting frameworks other than GAAP, such as

- a. financial reporting frameworks generally accepted in another country, including jurisdictional variations of IFRS such that the entity's *financial statements* do not meet the requirements for full compliance with IFRS, as promulgated by the IASB;
- b. financial reporting frameworks prescribed by an agreement or a contract; or
- c. other special purpose frameworks, including statutory financial reporting provisions required by law or a U.S. or foreign governmental regulatory body to whose jurisdiction the entity is subject.

.04 In such circumstances, however, the *financial statements* or *member's* reports thereon should not purport that the *financial statements* are in accordance with GAAP and the *financial statements* or reports on those *financial statements*, or both, should clarify the financial reporting framework(s) used. [Prior reference: paragraph .06 of ET section 203]

2.400 Acts Discreditable

2.400.001 Acts Discreditable Rule

.01 A *member* shall not commit an act discreditable to the profession. [Prior reference: paragraph .01 of ET section 501]

Interpretations Under the Acts Discreditable Rule

2.400.005 Application of the Conceptual Framework for Members in Business and Ethical Conflicts

.01 In the absence of an *interpretation* of the "Acts Discreditable Rule" [2.400.001] that addresses a particular relationship or circumstance, a *member* should apply the "Conceptual Framework for Members in Business" [2.000.010].

.02 A *member* would be considered in violation of the "Acts Discreditable Rule" [2.400.001] if the *member* cannot demonstrate that *safeguards* were applied that eliminated or reduced significant *threats* to an *acceptable level*.

.03 A *member* should consider the guidance in "Ethical Conflicts" [2.000.020] when addressing ethical conflicts that may arise when the *member* encounters obstacles to follow an appropriate course of action. Such obstacles may be due to internal or external pressures or to conflicts in applying relevant professional standards or legal standards, or both. [No prior reference: new content]

Effective Date

.04 Paragraphs .01 and .02 are effective December 15, 2015 and early implementation is allowed. Paragraph .03 is effective December 15, 2014.

2.400.010 Discrimination and Harassment in Employment Practices

.01 A *member* would be presumed to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [2.400.001] if a final determination, no longer subject to appeal, is made by a court or an administrative agency of competent jurisdiction that a *member* has violated any antidiscrimination laws of the United States, state, or municipality, including those related to sexual and other forms of harassment. [Prior reference: paragraph .03 of ET section 501]

2.400.020 Solicitation or Disclosure of CPA Examination Questions and Answers

.01 A *member* who solicits or knowingly discloses the Uniform CPA Examination question(s) or answer(s), or both, without the AICPA's written authorization shall be considered to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [2.400.001]. [Prior reference: paragraph .07 of ET section 501]

2.400.030 Failure to File a Tax Return or Pay a Tax Liability

.01 A *member* who fails to comply with applicable federal, state, or local laws or regulations regarding (a) the timely filing of the *member's* personal tax returns or tax returns for the *member's* employer that the *member* has the authority to timely file or (b) the timely remittance of all payroll and other taxes collected on behalf of others may be considered to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [2.400.001]. [Prior reference: paragraph .08 of ET section 501]

2.400.040 Negligence in the Preparation of Financial Statements or Records

.01 A *member* shall be considered in violation of the "Acts Discreditable Rule" [2.400.001] if the *member*, by virtue of his or her negligence, does any of the following:

- a. Makes, or permits or directs another to make, materially false and misleading entries in the *financial statements* or records of an entity.
- b. Fails to correct an entity's *financial statements* that are materially false and misleading when the *member* has the authority to record an entry.
- c. Signs, or permits or directs another to sign, a document containing materially false and misleading information. [Prior reference: paragraph .05 of ET section 501]

2.400.050 Governmental Bodies, Commissions, or Other Regulatory Agencies

.01 Many governmental bodies, commissions, or other regulatory agencies have established requirements, such as standards, guides, rules, and regulations, that *members* are required to follow in the preparation of *financial statements* or related information. For example, the SEC, the Federal Communications Commission, state insurance commissions, and other regulatory agencies have established such requirements.

.02 If a *member* prepares *financial statements* or related information (for example, management's discussion and analysis) for purposes of reporting to such bodies, commissions, or regulatory agencies, the *member* should follow the requirements of such organizations in addition to the applicable financial reporting framework.

.03 A *member's* material departure from such requirements would be considered a violation of the "Acts Discreditable Rule" [2.400.001] unless the *member* discloses in the *financial statements* or related information that such requirements were not followed and the applicable reasons. [Prior reference: paragraph .06 of ET section 501]

2.400.060 Indemnification and Limitation of Liability Provisions

.01 Certain governmental bodies, commissions, or other regulatory agencies (collectively, regulators) have established requirements through laws, regulations, or published interpretations that

- a. prohibit entities subject to their regulation (regulated entity) from including certain types of indemnification and limitation of liability provisions in agreements for the performance of audit or other attest services that are required by such regulators; or
- b. provide that the existence of such provisions disqualifies a *member* from rendering such services to these entities.

For example, federal banking regulators, state insurance commissions, and the SEC have established such requirements.

.02 If a *member* enters into, or directs or knowingly permits another individual to enter into, a contract for the performance of audit or other attest services that are subject to the requirements of these regulators, the *member* should not include, or knowingly permit or direct another individual to include, an indemnification or limitation of liability provision that would cause the regulated entity or a *member* to be in violation of such requirements or disqualify a *member* from providing such services to the regulated entity. A *member* who enters into, or directs or knowingly permits another individual to enter into, such an agreement for the performance of audit or other attest services would be considered in violation of the "Acts Discreditable Rule" [2.400.001]. [Prior reference: paragraph .09 of ET section 501]

2.400.070 Confidential Information Obtained From Employment or Volunteer Activities

.01 A *member* should maintain the confidentiality of his or her employer's confidential information and should not use or disclose any confidential employer information obtained as a result of an employment relationship, such as discussions with the employer's vendors, customers, or lenders (for example, any confidential information pertaining to a current or previous employer, subsidiary, affiliate, or parent thereof, as well as any entities for which the *member* is working in a volunteer capacity).

.02 For purposes of this interpretation, confidential employer information is any proprietary information pertaining to the employer or any organization for whom the *member* may work in a volunteer capacity that is not known to be available to the public and is obtained as a result of such relationships.

.03 A *member* should be alert to the possibility of inadvertent disclosure, particularly to a close business associate or *close relative* or *immediate family member*. The *member* should also take reasonable steps to ensure that staff

under his or her control or others within the *employing organization* and persons from whom advice and assistance are obtained are aware of the confidential nature of the information.

.04 When a *member* changes employment, a *member* should not use confidential employer information acquired as a result of a prior employment relationship to his or her personal advantage or the advantage of a third party, such as a current or prospective employer. The requirement to maintain the confidentiality of an employer's confidential information continues even after the end of the relationship between a *member* and the employer. However, the *member* is entitled to use experience and expertise gained through prior employment relationships.

.05 A *member* would be considered in violation of the "Acts Discreditable Rule" [2.400.001] if the *member* discloses or uses any confidential employer information acquired as a result of employment or volunteer relationships without the proper authority or specific consent of the employer or organization for whom the *member* may work in a volunteer capacity, unless there is a legal or professional responsibility to use or disclose such information.

.06 The following are examples of situations in which *members* are permitted or may be required to disclose confidential employer information or when such disclosure may be appropriate:

- a. Disclosure is permitted by law and authorized by the employer.
- b. Disclosure is required by law, for example, to
 - i. comply with a validly issued and enforceable subpoena or summons or
 - ii. inform the appropriate public authorities of violations of law that have been discovered.
- c. There is a professional responsibility or right to disclose information, when not prohibited by law, to
 - i. initiate a complaint with, or respond to any inquiry made by, the Professional Ethics Division or trial board of the AICPA or a duly constituted investigative or disciplinary body of a state CPA society, board of accountancy, or other regulatory body;
 - ii. protect the *member's* professional interests in legal proceedings;
 - iii. comply with professional standards and other ethics requirements; or
 - iv. report potential concerns regarding questionable accounting, auditing, or other matters to the employer's confidential complaint hotline or *those charged with governance*.
- d. Disclosure is permitted on behalf of the employer to
 - i. obtain financing with lenders;
 - ii. communicate with vendors, *clients*, and customers; or
 - iii. communicate with the employer's external accountant, attorneys, regulators, and other business professionals.

.07 In deciding whether to disclose confidential employer information, relevant factors to consider include the following:

- a. Whether all the relevant information is known and substantiated to the extent that it is practicable. When the situation involves unsubstantiated facts, incomplete information, or unsubstantiated

conclusions, the member should use professional judgment in determining the type of disclosure to be made, if any.

- b. Whether the parties to whom the communication may be addressed are appropriate recipients.

.08 A *member* may wish to consult with his or her legal counsel prior to disclosing, or determining whether to disclose, confidential employer information.

.09 Refer to the "Subordination of Judgment" interpretation [2.130.020] of the "Integrity and Objectivity Rule" [2.100.001] for additional guidance. [Prior reference: paragraph .10 of ET section 501]

2.400.090 False, Misleading, or Deceptive Acts in Promoting or Marketing Professional Services

.01 A *member* would be in violation of the "Acts Discreditable Rule" [2.400.001] if the *member* promotes or markets the *member's* abilities to provide *professional services* or makes claims about the *member's* experience or qualifications in a manner that is false, misleading, or deceptive.

.02 Promotional efforts would be false, misleading, or deceptive if they contain any claim or representation that would likely cause a reasonable person to be misled or deceived. This includes any representation about CPA licensure or any other professional certification or accreditation that is not in compliance with the requirements of the relevant licensing authority or designating body. [Prior reference: paragraph .11 of ET section 501]

2.400.100 Use of the CPA Credential

.01 A *member* should refer to applicable state accountancy laws and board of accountancy rules and regulations for guidance regarding the use of the CPA credential. A *member* who fails to follow the accountancy laws, rules, and regulations on use of the CPA credential in any of the jurisdictions in which the CPA practices would be considered to have used the CPA credential in a manner that is false, misleading, or deceptive and in violation of the "Acts Discreditable Rule" [2.400.001]. [Prior reference: paragraph .12 of ET section 501].

3.000 Introduction

.01 Part 3 of the Code of Professional Conduct (the code) applies to *members* who are not in *public practice* and are not *members in business*. Accordingly, when the term *member* is used in part 3 of the code, the requirements apply only to such *members*. [No prior reference: new content]

Effective Date

.02 Effective December 15, 2014.

3.000.030 Applicability

.01 Part 3 of the code applies to *members* who are neither *members in public practice* nor *members in business*, for example *members* who are retired or not currently employed. These *members* are subject to the "Acts Discreditable Rule" [3.400.001]. [No prior reference: new content]

Effective Date

.02 Effective December 15, 2014.

3.400 Acts Discreditable

3.400.001 Acts Discreditable Rule

.01 A *member* shall not commit an act discreditable to the profession. [Prior reference: paragraph .01 of ET section 501]

Interpretations Under the Acts Discreditable Rule

3.400.010 Discrimination and Harassment in Employment Practices

.01 A *member* would be presumed to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [3.400.001] if a final determination, no longer subject to appeal, is made by a court or an administrative agency of competent jurisdiction that a *member* has violated any antidiscrimination laws of the United States, state, or municipality, including those related to sexual and other forms of harassment. [Prior reference: paragraph .03 of ET section 501]

3.400.020 Solicitation or Disclosure of CPA Examination Questions and Answers

.01 A *member* who solicits or knowingly discloses the Uniform CPA Examination question(s) or answer(s), or both, without the AICPA's written authorization shall be considered to have committed an act discreditable to the profession, in violation of the "Acts Discreditable Rule" [3.400.001]. [Prior reference: paragraph .07 of ET section 501]

3.400.030 Failure to File a Tax Return or Pay a Tax Liability

.01 A *member* who fails to comply with applicable federal, state, or local laws or regulations regarding (a) the timely filing of the *member's* personal tax returns or (b) the timely remittance of all payroll and other taxes collected on behalf of others may be considered to have committed an act discreditable to

the profession, in violation of the "Acts Discreditable Rule" [3.400.001]. [Prior reference: paragraph .08 of ET section 501]

3.400.070 Confidential Information Obtained From Former Employment or Previous Volunteer Activities

.01 A *member* should maintain the confidentiality of his or her former employer's confidential information and should not use or disclose any confidential employer information obtained as a result of an employment relationship, such as discussions with the employer's vendors, customers, or lenders (for example, any confidential information pertaining to a previous employer, subsidiary, affiliate, or parent thereof, as well as any entities for which the *member* worked in a volunteer capacity).

.02 For purposes of this interpretation, confidential employer information is any proprietary information pertaining to the former employer or any organization for whom the *member* may have worked in a volunteer capacity that is not known to be available to the public and is obtained as a result of such relationships.

.03 A *member* should be alert to the possibility of inadvertent disclosure, particularly to a close business associate or *close relative* or *immediate family member*.

.04 A *member* should not use confidential employer information acquired as a result of a prior employment relationship to his or her personal advantage or the advantage of a third party, such as a current or prospective employer. The requirement to maintain the confidentiality of an employer's confidential information continues even after the end of the relationship between a *member* and the employer. However, the *member* is entitled to use experience and expertise gained through prior employment relationships.

.05 A *member* would be considered in violation of the "Acts Discreditable Rule" [3.400.001] if the *member* discloses or uses any confidential employer information acquired as a result of former employment or volunteer relationships without the proper authority or specific consent of the former employer or organization for whom the *member* may work in a volunteer capacity, unless there is a legal or professional responsibility to use or disclose such information.

.06 The following are examples of situations in which *members* are permitted or may be required to disclose confidential employer information or when such disclosure may be appropriate:

- a. Disclosure is permitted by law and authorized by the former employer.
- b. Disclosure is required by law, for example, to
 - i. comply with a validly issued and enforceable subpoena or summons or
 - ii. inform the appropriate public authorities of violations of law that have been discovered.
- c. There is a professional responsibility or right to disclose information, when not prohibited by law, to
 - i. initiate a complaint with, or respond to any inquiry made by, the Professional Ethics Division or trial board of the AICPA or a duly constituted investigative or disciplinary body of a state CPA society, board of accountancy, or other regulatory body;

- ii. protect the *member's* professional interests in legal proceedings;
 - iii. comply with professional standards and other ethics requirements; or
 - iv. report potential concerns regarding questionable accounting, auditing, or other matters to the former employer's confidential complaint hotline or *those charged with governance*.
- d. Disclosure is permitted on behalf of the former employer to
- i. obtain financing with lenders;
 - ii. communicate with vendors, *clients*, and customers; or
 - iii. communicate with the former employer's external accountant, attorneys, regulators, and other business professionals.

.07 In deciding whether to disclose confidential employer information, relevant factors to consider include the following:

- a. Whether all the relevant information is known and substantiated to the extent that it is practicable. When the situation involves unsubstantiated facts, incomplete information, or unsubstantiated conclusions, the member should use professional judgment in determining the type of disclosure to be made, if any.
- b. Whether the parties to whom the communication may be addressed are appropriate recipients.

.08 A *member* may wish to consult with his or her legal counsel prior to disclosing, or determining whether to disclose, confidential employer information. [Prior reference: paragraph .10 of ET section 501]

3.400.090 False, Misleading, or Deceptive Acts in Promoting or Marketing Services

.01 A *member* would be in violation of the "Acts Discreditable Rule" [3.400.001] if the *member* promotes or markets the *member's* abilities to provide services or makes claims about the *member's* experience or qualifications in a manner that is false, misleading, or deceptive.

.02 Promotional efforts would be false, misleading, or deceptive if they contain any claim or representation that would likely cause a reasonable person to be misled or deceived. This includes any representation about CPA licensure or any other professional certification or accreditation that is not in compliance with the requirements of the relevant licensing authority or designating body. [No prior reference: new content]

Effective Date

.03 Effective December 15, 2014.

3.400.100 Use of the CPA Credential

.01 A *member* should refer to applicable state accountancy laws and board of accountancy rules and regulations for guidance regarding the use of the

CPA credential. A *member* who fails to follow the accountancy laws, rules, and regulations on use of the CPA credential in any of the jurisdictions in which the CPA practices would be considered to have used the CPA credential in a manner that is false, misleading, or deceptive and in violation of the "Acts Discreditable Rule" [3.400.001]. [Prior reference: paragraph .12 of ET section 501]

Council Resolution Designating Bodies to Promulgate Technical Standards

[As amended January 12, 1988; Revised April 1992, October 1999, May 2004, October 2007, May 2008, October 2012, May 2013, and May 20, 2018.]

Federal Accounting Standards Advisory Board

RESOLVED: That the Federal Accounting Standards Advisory Board, with respect to its statements of federal accounting standards and concepts adopted and issued in March of 1993 and subsequently, in accordance with its rules of procedure, the memorandum of understanding, and public notice designating FASAB's standards and concepts as having substantial authoritative support, be, and hereby is, designated by the Council of the American Institute of Certified Public Accountants as the body to establish financial accounting principles for federal governmental entities pursuant to the "Accounting Principles Rule" (AICPA, *Professional Standards*, ET sec. 1.320.001 and 2.320.001) of the Code.¹

[Added by *Council* October 1999.]

Financial Accounting Standards Board

WHEREAS: In 1959 the *Council* designated the Accounting Principles Board to establish accounting principles, and

WHEREAS: The *Council* is advised that the Financial Accounting Standards Board (FASB) has become operational, it is

RESOLVED: That as of the date hereof the FASB, in respect of statements of financial accounting standards finally adopted by such board in accordance with its rules of procedure and the bylaws of the Financial Accounting Foundation, be, and hereby is, designated by this *Council* as the body to establish accounting principles pursuant to the "Accounting Principles Rule," (AICPA, *Professional Standards*, ET sec. 1.320.001 and 2.320.001) and standards on disclosure of financial information for such entities outside *financial statements* in published financial reports containing *financial statements* under the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001 and 2.310.001) of the Code of Professional Conduct of the American Institute of Certified Public Accountants provided, however, any accounting research bulletins, or opinions of the accounting principles board issued or approved for exposure by the accounting principles board prior to April 1, 1973, and finally adopted by such board on or before June 30, 1973, shall constitute statements of accounting principles promulgated by a body designated by *Council* as contemplated in the "Accounting Principles Rule" (AICPA, *Professional Standards*, ET sec. 1.320.001 and 2.320.001) of the Code unless and until such time as they are expressly superseded by action of the FASB.¹

¹ The changes to this appendix as of December 15, 2014, are administrative changes that were made to conform to the reformatted Code of Professional Conduct.

Governmental Accounting Standards Board

WHEREAS: The Governmental Accounting Standards Board (GASB) has been established by the board of trustees of the Financial Accounting Foundation (FAF) to issue standards of financial accounting and reporting with respect to activities and transactions of state and local governmental entities, and

WHEREAS: The American Institute of Certified Public Accountants is a signatory to the agreement creating the GASB as an arm of the FAF and has supported the GASB professionally and financially, it is

RESOLVED: That as of the date hereof, the GASB, with respect to statements of governmental accounting standards adopted and issued in July 1984 and subsequently, in accordance with its rules of procedure and the bylaws of the FAF, be, and hereby is, designated by the Council of the American Institute of Certified Public Accountants as the body to establish financial accounting principles for state and local governmental entities, pursuant to the "Accounting Principles Rule" (AICPA, *Professional Standards*, ET sec. 1.320.001 and 2.320.001) of the Code of Professional Conduct, and standards on disclosure of financial information for such entities outside *financial statements* in published financial reports containing *financial statements* under the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001 and 2.310.001) of the Code of Professional Conduct.¹

Public Company Accounting Oversight Board

WHEREAS: The Public Company Accounting Oversight Board (PCAOB) has been established pursuant to the Sarbanes-Oxley Act of 2002 (the Act), and

WHEREAS: The PCAOB has authority under the Act to establish or adopt, or both, by PCAOB rule, auditing and related attestation standards, quality control, ethics, *independence* and other standards relating to the preparation and issuance of audit reports for issuers as defined in the Act.

RESOLVED: That the PCAOB be, and hereby is, designated by the Council of the American Institute of Certified Public Accountants as the body to establish standards relating to the preparation and issuance of audit reports for entities within its jurisdiction as defined by the Act pursuant to the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001) of the Code of Professional Conduct.¹

[Added by *Council* May 2004.]

International Accounting Standards Board

WHEREAS, At its Spring, 2008 meeting, the *Council* resolved that the International Accounting Standards Board (IASB) be designated as the body which is authorized to establish professional standards with regard to international accounting and reporting principles under the "Compliance With Standards Rule" (ET sec. 1.310.001 and 2.310.001) and the "Accounting Principles Rule" (ET sec. 1.320.001 and 2.320.001) of the AICPA Code of Professional Conduct, with the proviso that Council would, three to five years after such designation, reassess whether continued recognition of the IASB for such purposes is appropriate, and readopted that resolution in May 2013, and

[Added by Council May 19, 2013, amended May 20, 2018.]

¹ The changes to this appendix as of December 15, 2014 are administrative changes that were made to conform to the reformatted Code of Professional Conduct.

WHEREAS, The Council supports the IASB and believes recognition of the IASB as the body authorized to establish professional standards with regard to international accounting and reporting principles under the "Compliance With Standards Rule" (ET sec. 1.310.001 and 2.310.001) and the "Accounting Principles Rule" (ET sec. 1.320.001 and 2.320.001) of the AICPA Code of Professional Conduct should continue; and

[Added by Council May 19, 2013; readopted by Council, May 20, 2018.]

WHEREAS, The Council also believes it should again reassess such recognition three to five years after the effective date of this resolution; now

[Added by Council May 19, 2013; readopted by Council, May 20, 2018.]

BE IT RESOLVED, That the Council hereby readopts the resolutions related to the IASB set out in Appendix A to the Code of Professional Conduct as set out below.

[Added by Council May 19 2013; readopted by Council, May 20, 2018.]

RESOLVED: That the International Accounting Standards Board (IASB) is hereby designated as the body to establish professional standards with respect to international financial accounting and reporting principles pursuant to the "Compliance With Standards Rule" (ET sec. 1.310.001 and 2.310.001) and the "Accounting Principles Rule" (ET sec. 1.320.001 and 2.320.001) of the Code of Professional Conduct; and

BE IT FURTHER RESOLVED: That the Council shall reassess, no sooner than three years but no later than five years after the effective date of this resolution, whether continued recognition of the IASB as the body designated to establish professional standards with respect to international financial accounting and reporting principles under the "Compliance With Standards Rule" (ET sec. 1.310.001 and 2.310.001) and the "Accounting Principles Rule" (ET sec. 1.320.001 and 2.320.001) of the Code of Professional Conduct is appropriate.¹

[Added by Council May 18, 2008; readopted by Council, May 19, 2013 and May 20, 2018.]

AICPA COMMITTEES AND BOARDS

WHEREAS: The membership of the *Institute* has adopted the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001 and 2.300.001) of the Code of Professional Conduct, which authorizes the Council to designate bodies to promulgate technical standards with which members must comply, and therefore it is¹

Accounting and Review Services Committee

RESOLVED: That the AICPA accounting and review services committee is hereby designated to promulgate standards under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001) of the Code of Professional Conduct with respect to unaudited *financial statements* or other unaudited financial information of an entity that is not required to file *financial statements* with a regulatory agency in connection with the sale or trading of its securities in a public market.¹

¹ See footnote 1 in this paragraph.

Auditing Standards Board

RESOLVED: That, with respect to standards relating to the preparation and issuance of audit reports not included within the resolution on the Public Company Accounting Oversight Board, the AICPA auditing standards board is hereby designated as the body authorized under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001) of the Code of Professional Conduct to promulgate auditing, attestation, and quality control standards and procedures.

RESOLVED: That the auditing standards board shall establish under statements on auditing standards, the responsibilities of *members* with respect to standards for disclosure of financial information outside of the *financial statements* in published financial reports containing *financial statements*.¹

[Revised May 2004.]

Management Consulting Services Executive Committee

RESOLVED: That the AICPA management consulting services executive committee is hereby designated to promulgate standards under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001 and 2.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001 and 2.310.001) of the Code of Professional Conduct with respect to the offering of management consulting services, provided, however, that such standards do not deal with the broad question of what, if any, services should be proscribed.

AND FURTHER RESOLVED: That any *Institute* committee or board now or in the future authorized by the *Council* to issue enforceable standards under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001 and 2.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001 and 2.310.001) of the Code of Professional Conduct must observe an exposure process seeking comment from other affected committees and boards, as well as the general membership.¹

[Revised April 1992.]

Attestation Standards

RESOLVED: That the AICPA accounting and review services committee, auditing standards board, and management consulting services executive committee are hereby designated as bodies authorized under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001) of the Code of Professional Conduct to promulgate attestation standards in their respective areas of responsibility.¹

[Added by *Council*, May 1988; revised April 1992.]

Tax Executive Committee

RESOLVED: That the Tax Executive Committee is hereby designated as the body authorized under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001 and 2.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001 and 2.310.001)

¹ The changes to this appendix as of December 15, 2014 are administrative changes that were made to conform to the reformatted Code of Professional Conduct.

of the Code of Professional Conduct to promulgate professional practice standards with respect to tax services.¹

[Added by *Council*, October 1999.]

Forensic and Valuation Services Executive Committee

RESOLVED: That the Forensic and Valuation Services Executive Committee is hereby designated as the body to promulgate professional standards with respect to forensic and valuation services under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001 and 2.300.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001 and 2.310.001) of the Code of Professional Conduct.¹

[Added by *Council*, October 2007.]

Personal Financial Planning Executive Committee

RESOLVED: That the Personal Financial Planning Executive Committee is hereby designated as the body to promulgate professional standards with respect to personal financial planning services under the "General Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.300.001 and 2.310.001) and the "Compliance With Standards Rule" (AICPA, *Professional Standards*, ET sec. 1.310.001 and 2.310.001) of the Code of Professional Conduct.¹

[Added by *Council*, October 2012.]

ET Appendix B

Council Resolution Concerning the Form of Organization and Name Rule

[As adopted May 23, 1994; revised May 7, 1997, May 15, 2000, May 22, 2006 August 2011, and October 19, 2014.]

A. RESOLVED: That with respect to a *member* engaged in *public practice* in a *firm* or organization which performs (1) any audit or other engagement performed in accordance with the Statements on Auditing Standards, (2) any review of a *financial statement* performed in accordance with the Statements on Standards for Accounting and Review Services, (3) any examination of prospective financial information performed in accordance with the Statements on Standards for Attestation Engagements, (4) any engagement to be performed in accordance with the standards of the Public Company Accounting Oversight Board (PCAOB), or (5) any examination, review, or agreed upon procedures engagement to be performed in accordance with the SSAE, other than an examination described in subsection (A) (3), or which holds itself out as a *firm* of certified public accountants or uses the term "certified public accountant(s)" or the designation "CPA" in connection with its name, the characteristics of such a *firm* or organization under the "Form of Organization and Name Rule" (AICPA, *Professional Standards*, ET sec. 1.800.001) of the Code of Professional Conduct are as set forth below:

1. A majority of the ownership of the *member's firm* in terms of financial interests and voting rights must belong to CPAs. Any non-CPA owner would have to be actively engaged as a member of the *firm* or its affiliates. Ownership by investors or commercial enterprises not actively engaged as members of the *firm* or its affiliates is against the public interest and continues to be prohibited.
2. There must be a CPA who has ultimate responsibility for all the services described in A above, compilation services and other engagements governed by Statements on Auditing Standards or Statements on Standards for Accounting and Review Services, and non-CPA owners could not assume ultimate responsibility for any such services or engagements.
3. Non-CPA owners would be permitted to use the title "principal," "owner," "officer," "member" or "shareholder" or any other title permitted by state law, but not hold themselves out to be CPAs.
4. A *member* shall not knowingly permit a person, whom the *member* has the authority or capacity to control, to carry out on his or her behalf, either with or without compensation, acts which, if carried out by the *member*, would place the *member* in violation of the rules. Further, a *member*

may be held responsible for the acts of all persons associated with him or her in the *public practice* whom the *member* has the authority or capacity to control.

5. Owners shall at all times own their equity in their own right and shall be the beneficial owners of the equity capital ascribed to them. Provision would have to be made for the ownership to be transferred, within a reasonable period of time, to the *firm* or to other qualified owners if the owner ceases to be actively engaged in the *firm* or its affiliates.
 6. Non-CPA owners would not be eligible for regular membership in the AICPA, unless they meet the requirements in BL section 2.2.1.
- B. RESOLVED: The characteristics of all other *firms* or organizations are deemed to be whatever is legally permissible under applicable law or regulation, except as otherwise provided in paragraph C below.
- C. RESOLVED: That with respect to a *member* engaged in *public practice* in a *firm* or organization which is not within the description of a *firm* or organization set forth in paragraph A above, but who performs compilations of *financial statements* performed in accordance with the Statements on Standards for Accounting and Review Services, the characteristics of such a *firm* or organization under the "Form of Organization and Name Rule" of the Code are as set forth below.
1. There must be a CPA who has ultimate responsibility for any *financial statement* compilation services provided by the *firm* and by each business unit performing such compilation services and non-CPA owners could not assume ultimate responsibility for any such services.
 2. Any compilation report must be signed individually by a CPA, and may not be signed in the name of the *firm* or organization.

Revision History Table

Revisions made to the Code of Professional Conduct subsequent to June 1, 2014, appear below in the Revision History Table. In addition to identifying the numeric citation for the change, the effective date is identified and a link to the marked version of the content is provided when available. If the revision changes guidance that is already authoritative, the action taken (see "Action" column) will be identified as "revised." If the revision is new guidance, the action taken will be identified as "added."

The "New and Revised Interpretations and Other Guidance" [0.600.010] section and the "Pending Interpretations and Other Guidance" [0.600.020] section provide a listing of current activity.

Mapping Document

[As of December 31, 2013]

On June 1, 2014, the AICPA issued a codification of the code's principles, rules, *interpretations* and rulings (revised code). To assist users in understanding where the content from the prior code appears in the revised code, this mapping document was created. The first two columns identify the citation and title where the content resided in the prior code and the second two columns identify the citation and title where the content now resides *in the revised code*. The "Prior Code Citations" box *has been left blank where* the content did not exist in the prior code and is new to the revised code. "New Titles" that appear in regular roman text are effective December 15, 2014, in bold italic December 15, 2015, and in italic have components that are effective both December 15, 2014, and December 15, 2015.

<i>Prior Code Citations</i>	<i>Title in Prior Code</i>	<i>New Citation</i>	<i>New Title</i>

Bylaws of the American Institute of Certified Public Accountants

As Amended October 28, 1997, unless otherwise indicated

DEFINITIONS

As used in these bylaws, implementing resolutions of Council thereunder, or the Code of Professional Conduct, masculine terms shall be understood to include the feminine; "state" shall be understood to include the District of Columbia, Puerto Rico, and the territories, or territorial possessions of the United States of America; "firm" shall be understood to mean any organization permitted by law or regulation; "owner" shall be understood to include partners, partner equivalents, shareholders, or other owners of a firm; "official records of the Institute" shall be understood to mean the records of the membership department; and "committee" shall be understood to include any board (except the AICPA Board of Directors), division, task force, or any subdivision thereof. "Association" shall be understood to mean the Association of International Certified Professional Accountants as it may be constituted after June 30, 2016. "President" shall be understood to mean the Chief Executive Officer of the Institute.

[As revised May 15, 2000; revised November 6, 2007; revised June 16, 2016.]

BL Section 101***Name and Purpose***

**As amended
January 12, 1988**

.01 The name of this organization shall be the American Institute of Certified Public Accountants. In keeping with the Institute's certificate of incorporation, its objectives shall be to unite certified public accountants in the United States; to promote and maintain high professional standards of practice; to assist in the maintenance of standards for entry to the profession; to promote the interests of CPAs; to develop and improve accounting education; and to encourage cordial relations between CPAs and professional accountants in other countries.

BL Section 210

2.1 Members

**As amended
January 12, 1988**

.01 Members of the Institute shall be

2.1.1 Members of the Institute at the effective date of these bylaws,
and

2.1.2 Persons who shall qualify for admission as provided in section 2.2
of this article and who shall be admitted under procedures adopted by the
Board of Directors.

BL Section 220**2.2 Requirements for Admission to Membership**

**As amended
January 12, 1988,
unless otherwise indicated**

.01 Persons may qualify for admission as members of the Institute if they satisfy the criteria listed below:

2.2.1 They are in possession of a valid and unrevoked certified public accountant certificate issued by a legally constituted authority, or at any time possessed the certificate described herein and the certificate was not revoked as a result of a disciplinary action, or meet the education, examination, and experience requirements set out in the Uniform Accountancy Act and who are of good moral character and have never been granted a right to practice,

2.2.2 They have passed an examination in accounting and other related subjects satisfactory to the Board of Directors, and

2.2.3 With respect to those persons who are engaged in the practice of public accounting as an owner or as an employee who has been licensed as a CPA for more than two years, either they are practicing in a firm that is enrolled in an Institute-approved practice-monitoring program if the services performed by such a firm are within the scope of the AICPA's practice-monitoring standards and the firm issues reports purporting to be in accordance with AICPA professional standards, or if authorized by Council, are themselves enrolled in such a program.

[As amended October 28, 1997, May 15, 2000, and October 8, 2010.]

(See section 220R.)

2.2.4 With respect to persons who first become eligible to take the examination required by section 2.2.2 after the year 2012, they shall have obtained 150 semester hours of education at an accredited college or university including a bachelor's degree or its equivalent. After 2012, a person who does not meet the educational requirement set out in this section shall, nonetheless, be eligible for membership upon enactment (regardless of the effective date) of the education requirement set out in this section by the state which grants the certificate required under section 2.2.1.

[As revised May 15, 2000; revised November 6, 2007.]

BL Section 220R***Implementing Resolution Under Section 2.2
Requirements for Admission to Membership***

As amended
October 24, 1994,
unless otherwise indicated

**Under Sections 2.2.3 and 2.3.4 to Implement the
Practice-Monitoring Requirement*****Resolved:***

.01 That the Board of Directors is authorized to establish within the Institute a peer review division governed by an executive committee named the "peer review board" having senior status with authority to carry out the activities of the division. The primary activities of the division will be to establish and conduct, in cooperation with state CPA societies, practice-monitoring programs for AICPA and state society members engaged in the practice of public accounting. Such activities shall not conflict with the policies and standards of the AICPA and shall be subject to the oversight of the Board of Directors. The nominees to serve on the peer review board shall be selected by the AICPA nominations committee and elected by Council.

[As revised by Council May 15, 2000.]

Further Resolved:

.02 A firm within the description of subparagraph A of Council Resolution Concerning the Form of Organization and Name Rule shall be required to enroll in an Institute-approved practice-monitoring program. An individual engaged in the practice of public accounting in a firm not within the description of Subparagraph A of Council Resolution Concerning the Form of Organization and Name Rule, but who performs compilations of financial statements in accordance with the Statements on Standards for Accounting and Review Services shall be enrolled in an Institute-approved practice-monitoring program. A firm or individual enrolled in a practice-monitoring program established herein shall be deemed to be enrolled in an approved practice-monitoring program under sections 2.2.3 and 2.3.4 of the bylaws. A firm or individual which is dropped for disciplinary reasons from enrollment in a practice-monitoring program established herein is ineligible to enroll in another Institute-approved practice-monitoring program until the cause of the disciplinary action is removed.

[As amended by Council October 28, 1997; revised May 15, 2000; revised November 6, 2007.]

Further Resolved:

[.03] [Deleted May 15, 2000.]

BL Section 230***2.3 Requirements for Retention of Membership***

**As amended
January 8, 1990,
unless otherwise indicated**

.01 Members of the Institute shall

2.3.1 Pay dues as established by Council.

2.3.2 Conform with these bylaws and the Rules of the Code of Professional Conduct.

2.3.3 Complete continuing professional education requirements established by Council.

(See section 230R.)

2.3.4 Engage in the practice of public accounting with a firm that is enrolled in an Institute-approved practice-monitoring program if the services performed by such a firm are within the scope of the AICPA's practice-monitoring standards and the firm issues reports purporting to be in accordance with AICPA professional standards or, if authorized by Council, themselves enroll in such a program.

[As amended October 28, 1997; revised May 15, 2000.]

(See section 220R, as amended October 24, 1994.)

2.3.5

[Deleted November 6, 2007.]

BL Section 230R***Implementing Resolutions Under Section 2.3
Requirements for Retention of Membership***

As amended
January 12, 1988,
unless otherwise indicated

**Under Sections 2.2.3 and 2.3.4 to Implement the
Practice-Monitoring Requirement**

[.01–.03] [Deleted March 1995. See section 220R.]

**Under Section 2.3.3 Continuing Professional Education
for Members*****Resolved:***

.04 That pursuant to section 2.3.3 of the bylaws the continuing professional education requirement for membership in the American Institute of Certified Public Accountants shall be as follows:

From January 1, 2001, forward and for each three-year reporting period thereafter, all AICPA members shall complete 120 hours, or its equivalent, of continuing professional education. Compliance can be achieved either by a formal program of education or by any other means, however measured, that would be reasonably expected to maintain professional competencies in the member's area of practice or employment. Members shall report compliance with such requirement to the AICPA each year and shall keep appropriate records and submit copies of such on request of the Institute.

[As amended by Council September 23, 1989 and May 7, 1997.]

[.05–.06] [Deleted January 1, 2001.]

Further Resolved:

.07 That the Board of Directors, or a body designated or appointed by it, shall have the power and authority to

- a. Identify and accept methods of learning to meet and measure this continuing professional education requirement.
- b. Grant exceptions for reasons such as retirement, inactive dues status, health, military service, foreign residency, or any other reason it deems appropriate.

[As amended by Council May 7, 1997.]

Under Section 2.3.5, Definition of "SEC Client"

[.08] [Deleted November 6, 2007.]

BL Section 240***2.4 Certificate of Membership***

**As amended
January 12, 1988**

.01 Upon admission each member shall be entitled to a certificate setting forth that the person is a member of the Institute, but no certificate shall be issued until receipt of dues for the current year. Certificates of membership shall be returned upon the demand of the secretary of the Institute in the event of suspension or termination of membership.

BL Section 250***2.5 Right of Members to Describe
Themselves as Such***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 A member of the Institute shall be entitled to use the designation "Member of the American Institute of Certified Public Accountants." A firm shall be entitled to use the designation "Members of the American Institute of Certified Public Accountants" only if all of its CPA owners are members.

[As revised May 15, 2000.]

BL Section 260***2.6 International Associates***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 International associates shall include those who were international associates on or before January 12, 1988. Thereafter, citizens of other countries who shall satisfy such requirements as the Council may prescribe may be admitted as international associates. The Council shall adopt rules governing such association and indications thereof.

[As revised May 15, 2000.]

(See section 260R.)

BL Section 260R***Implementing Resolution Under Section 2.6
International Associates***

**As adopted
May 7, 1997,
unless otherwise indicated**

Resolved:

.01 That membership in the nonvoting international associate category created pursuant to bylaw section 2.6 shall be available to any individual who holds a valid non-U.S. accounting credential from a professional organization, governmental entity, or similar accountancy body with which the AICPA Board of Directors has approved a recognition agreement, and who is of good moral character and does not hold a CPA certificate issued by a U.S. jurisdiction and who meets either the CPE requirement for a CPA or its equivalent in the individual's home country or for an AICPA member. If reasonably practicable and appropriate, all member benefits will be made available to international associates, except for voting, eligibility for a seat on Council and as a nonpublic member of the Board of Directors.

[As revised by Council May 24, 2010.]

Further Resolved:

.02 That any individual who was an international associate as of May 25, 2010, shall be eligible to continue as a member of the international associate category.

[As adopted by Council May 24, 2010.]

BL Section 310

3.1 *General*

**As amended
January 12, 1988,
unless otherwise indicated**

.01 The organization of the Institute shall include the members, the Council, the Board of Directors, officers, and committees.

.02 The Board of Directors may from time to time organize the committees and staff of the Institute into divisions and, subject to section 3.6, may adopt rules of procedure and operating policies for such divisions.

3.1.1 Communications With Members

Any communication, notification or other action required by these bylaws to be provided or undertaken by mail or in writing, to or from the members, may be provided or undertaken by any means including but not limited to electronic or telephonic means, as authorized by Council. Except for determining a member's residence for voting purposes under section 3.2.3, a member's mailing address for purposes of these bylaws may be an electronic or other form of address, in lieu of a postal address.

[As adopted May 15, 2000.]

BL Section 320

3.2 Membership

As amended
June 17, 1996,
unless otherwise indicated

.01 The rights and powers of the membership of the Institute shall be as defined herein.

3.2.1 Attendance at Meetings

Every member and international associate of the Institute shall be entitled to attend all meetings of the Institute.

3.2.2 Voting Rights

Every member, but no international associate, shall be entitled to vote in person, when in attendance, upon all questions brought before duly called meetings of the Institute, and by mail ballot for the election of Council members pursuant to sections 6.1 through 6.1.6, on proposed amendments to these bylaws or to the Code of Professional Conduct as provided in article 8, and upon proposed resolutions of the membership as provided in section 5.1.4.

3.2.3 Residence for Voting Purposes

The state from which a member may vote shall be that indicated by the member's mailing address as carried in the official records of the Institute, and may be either the state in which the member resides or that in which the member's office is located.

3.2.4 Resolutions of the Membership

As provided in section 5.1.4, the members by mail ballot may enact resolutions of the membership, not inconsistent with these bylaws, which shall be binding upon the membership, the Council, the Board of Directors, officers, committees, and staff.

3.2.5 Certain Positions to Be Held Only by Members

With the exceptions noted below, only members of the Institute, as defined in section 2.1, may serve as members of the Council, the Board of Directors, or any committee or board designated as "senior" by the Council (see section 3.6.1) or as "permanent" by these bylaws (see section 3.6.2). Exceptions to this rule are as follows:

1. Three representatives of the public, none of whom shall be members of the Institute, shall be members of the Board of Directors and Council.
2. Council may authorize the appointment of persons who are not Institute members to any senior or permanent committee or board provided the non-Institute members do not constitute more than twenty-five percent of its membership.

[As revised May 15, 2000.]

3.2.6 Dual Membership

Every member of the Institute shall have dual membership in the Institute and the Association, as long as such individual is a member of the

Institute. Every individual who belongs to any of the Institute's associate or affiliate categories shall also be in a similar membership category of the Association in a manner determined by the Association's Board of Directors, as long as such individual belongs to any Institute associate or affiliate category.

[As adopted June 16, 2016.]

BL Section 320R

Implementing Resolution Under Section 3.2 Membership

As adopted
May 15, 2000,
unless otherwise indicated

Under Section 3.2.5 Certain Positions to Be Held Only by Members

Resolved:

.01 That pursuant to bylaw section 3.2.5, persons who are not Institute members may be appointed to the following senior or permanent committees or boards:

- Board of Examiners
- Professional Ethics Executive Committee
- Auditing Standards Board
- Financial Reporting Executive Committee
- Center for Audit Quality Governing Board
- Peer Review Board
- Personal Financial Planning Executive Committee
- Information Management and Technology Assurance Executive Committee
- Forensic and Valuation Services Executive Committee
- National Accreditation Commission

[As revised by Council October 21, 2003; revised October 24, 2005; revised May 21, 2006; revised May 24, 2010; revised May 20, 2013.]

Further Resolved:

.02 That except as otherwise provided by Council, and except for committees of the Board of Directors, such as the Committee on Audit, no public member on a senior or permanent committee or board may serve as its chair.

BL Section 330

3.3 Council

As amended
January 12, 1988

- .01 The governing body of the Institute shall be the Council.

3.3.1 Composition

The Council shall be composed of

3.3.1.1 Members of the Institute directly elected by the membership in each state in accordance with sections 6.1.1 through 6.1.6;

3.3.1.2 Representatives of the recognized state societies of certified public accountants selected in accordance with section 6.2;

3.3.1.3 Twenty-one members-at-large selected in accordance with section 6.3;

3.3.1.4 All members of the Board of Directors of the Institute;

3.3.1.5 All past presidents of the American Institute of Certified Public Accountants who served prior to December 31, 1973, and are members of the Institute;

3.3.1.6 All past chairmen of the board of the American Institute of Certified Public Accountants who are members of the Institute.

3.3.2 Powers

The Council may exercise all powers requisite for the purposes of the Institute, not inconsistent with these bylaws or with duly enacted resolutions of the membership, including but not limited to the authority to prescribe the policies and procedures of the Institute and to enact resolutions binding upon the Board of Directors, the officers, committees, and staff.

3.3.3 Reports to Membership

The actions of the Council shall be reported to the membership at least annually.

BL Section 340

3.4 Board of Directors

**As amended
January 12, 1988**

.01 Between meetings of the Council, the activities of the Institute shall be directed by the Board of Directors, the composition of which shall be prescribed by the Council.

(See section 340R.)

3.4.1 Powers

The Board of Directors shall act as the executive committee of Council between meetings of Council, shall control and manage the property, business, and activities of the Institute, and shall take whatever action it deems desirable including the establishment of policies for the conduct of the affairs of the Institute consistent with the provisions of these bylaws, resolutions of the membership, or actions of the Council.

3.4.2 Reports to Council

The actions of the Board of Directors shall be reported to the Council at least semiannually.

BL Section 340R***Implementing Resolution Under Section 3.4
Board of Directors***

**As amended
May 23, 1994**

Resolved:

- .01** That the Institute's Board of Directors shall be composed of
- (a) The chairman, the vice chairman, and the immediate past chairman of the Board of Directors;
 - (b) The president of the Institute;
 - (c) Eleven present or former members of the Council elected pursuant to section 6.3 to serve for three years or until the election of their successors; and
 - (d) Three representatives of the public, who are not members of the Institute.

[As amended by Council June 16, 2016, and October 20, 2021.]

BL Section 350***3.5 Officers Elected by Council***

**As amended
June 17, 1996**

.01 The officers of the Institute elected by the Council shall be a chairman of the Board of Directors and a vice chairman of the board, who shall be the chairman of the board nominee, both of whom shall be members possessing valid and unrevoked certified public accountant certificates. The chairman and the vice chairman of the board shall have such terms of office, powers, and privileges as the Council may prescribe.

(See section 350R.)

3.5.1 Officers Authorized by the Board of Directors

The officers of the Institute authorized by the Board of Directors shall be a president, who shall be an employee and who shall be a member possessing a valid and unrevoked certified public accountant certificate, and a secretary, who shall be an employee, but need not be a member of the Institute. The president and the secretary shall have such terms of office, powers, and privileges as the Institute's Board of Directors may prescribe. The president of the Institute may also appoint senior staff who shall be neither members of the board nor of the Council and who shall perform such duties and have such titles as may be assigned to them by the president.

[As revised June 16, 2016.]

BL Section 350R***Implementing Resolution Under Section 3.5
Officers Elected by Council***

**As amended
January 14, 1992**

Resolved:**Term of Office**

.01 That the chairman and the vice chairman of the Board of Directors shall each be elected annually by the Council for a term of one year or until the election of that person's successor. Neither may succeed oneself in the same office after serving a full term of one year. The term of the president and the secretary shall be determined by the Board of Directors.

Chairman of the Board

.02 That the chairman of the Board of Directors shall preside at meetings of members of the Institute, the Council, and the Board of Directors. The chairman shall appoint committees and boards as provided in section 3.6 of the bylaws. The chairman shall act as a spokesperson for the Institute and appear on its behalf before other organizations.

Vice Chairman of the Board

.03 That the vice chairman shall be chairman-nominee of the Board of Directors and shall preside in the absence of the chairman at meetings of the Institute, the Council, and the Board of Directors. The vice chairman shall familiarize oneself with the duties of the office of chairman and shall perform such other related duties as may be assigned to the vice chairman by the chairman.

President

.04 That the president shall have full responsibility for the execution of the policies and programs of the Institute, act as a spokesperson for the Institute, and perform such other services as may be assigned to the president by the Council and the Board of Directors.

Secretary

.05 That the secretary of the Institute shall have the usual duties of a corporate secretary and shall perform such other related duties as may be assigned to the secretary by the president. An assistant secretary to serve in the secretary's absence, who need not be a member of the Institute, may be appointed by the Board of Directors.

BL Section 360

3.6 Committees

**As amended
June 17, 1996,
unless otherwise indicated**

.01 Except as otherwise provided by these bylaws or the Council (see section 3.6.1), the chairman of the Board of Directors, or the chairman's delegate, may appoint committees and boards with such duties, powers, responsibilities, and procedures as the chairman may prescribe. The chairman of the board and the president shall have the privilege of the floor at meetings of all committees.

(See section 360R.)

3.6.1 Senior Committees

The Council may designate any committee as a "senior" committee. The appointment by the chairman of the Board of Directors of members and any appointed pursuant to bylaw 3.2.5, to senior committees shall require the approval of the Board of Directors. The scope of responsibility of senior committees shall be as the Council may prescribe consistent with the specific provisions of these bylaws. The Board of Directors shall prescribe the duties, powers, and procedures of such committees.

[As revised November 6, 2007.]

(See section 360R.)

3.6.2 Permanent Committees, Boards, and Divisions

The following shall be permanent committees, boards, or divisions of the Institute: the nominations committee (see section 3.6.2.1); the professional ethics division (see section 3.6.2.2); the trial board (see section 3.6.2.3); and the board of examiners (see section 3.6.2.4).

(See section 360R.)

3.6.2.1 Nominations Committee

There shall be a nominations committee composed of eight persons, including any appointed pursuant to bylaw 3.2.5 and members of the Institute, elected by the Council in such manner as the Council shall prescribe. It shall be the responsibility of the committee to make nominations for the offices of chairman of the Institute's Board of Directors, vice chairman of the Institute's Board of Directors, the elected members of the Institute's Board of Directors, the joint trial board, the peer review board, and the Council, as elsewhere provided in these bylaws, and to apportion among the states directly elected Council seats pursuant to section 6.1.2.

[As revised June 16, 2016.]

(See section 360R.)

3.6.2.2 Professional Ethics Division

The executive committee of the professional ethics division, including any appointed pursuant to bylaw 3.2.5, shall serve as the ethics committee of the Institute, and there shall be such other committees within the division as the Board of Directors shall authorize. The executive committee shall (1) subject to amendment, suspension, or revocation by the Board of Directors, adopt rules governing procedures consistent with these bylaws or actions of Council to investigate potential disciplinary matters involving members, (2) arrange for presentation of a case before the trial board where the committee finds prima facie evidence of infraction of these bylaws or of the Code of Professional Conduct, (3) interpret the Code of Professional Conduct, (4) propose amendments thereto, and (5) perform such related services as the Council may prescribe.

(See section 360R.)

3.6.2.3 Joint Trial Board

There shall be a trial board that, in addition to any appointed pursuant to bylaw 3.2.5, shall consist of members possessing a valid and unrevoked certified public accountant certificate, each of whom shall have been a member for at least five consecutive years prior to that person's appointment to the joint trial board, to adjudicate disciplinary charges against members of the Institute pursuant to section 7.4. Members of the trial board shall be elected by the Council for such terms as the Council may prescribe.

The trial board is empowered to adopt rules, consistent with these bylaws or actions of the Council, governing procedure in cases heard by any hearing panel, and in connection with any application for review of a decision of a hearing panel.

Decisions of any hearing panel shall be subject to review only by the trial board.

(See section 360R.)

3.6.2.4 Board of Examiners

There shall be a board of examiners, that, in addition to any appointed pursuant to bylaw 3.2.5, shall consist of persons who have passed the Uniform CPA Examination and who possess valid and unrevoked certified public accountant certificates, appointed by the chairman of the Board of Directors subject to the approval of the Board of Directors. It shall supervise the preparation of a uniform examination which may be adopted by the legally constituted authorities of the states in examining candidates for the certified public accountant certificate and the conduct of the grading service offered by the Institute. The board of examiners shall formulate the necessary rules and regulations for the conduct of its work, but all such rules and regulations may be amended, suspended, or revoked by the Board of Directors. The board of examiners may delegate to members of the Institute's staff or other duly qualified persons the preparation of examination questions and the operation of the grading service conducted by the Institute.

BL Section 360R***Implementing Resolutions Under
Section 3.6 Committees***

**As amended
January 12, 1988,
unless otherwise indicated**

Resolved:

.01 (1) That the following be designated as senior committees and boards:*

- Accounting and review services committee*
- Assurance services executive committee*
- Auditing standards board*
- Board of examiners
- Center for audit quality governing board*
- Employee benefit plans audit quality center executive committee
- Financial reporting executive committee*
- Forensic and valuation services executive committee*
- Government audit quality center executive committee
- Management consulting services executive committee*
- National Accreditation Commission
- Peer review board*
- Personal financial planning executive committee*
- Private companies practice executive committee*
- Professional ethics executive committee*
- Tax executive committee*

[As amended by Council May 1988 and May 1991; revised April 1992; amended October 1994; revised June 1996; revised May 1997; revised October 21, 2003; revised October 24, 2005; revised October 2007; revised May 24, 2010; revised October 2012; revised May 17, 2022.]

[.02]

[As amended by Council May 1988 and May 1991; revised April 1992; amended October 24, 1994; revised May 1997; revised October 21, 2003; revised October 24, 2005; deleted October 2007.]

* Note: * Indicates a senior committee which is authorized to make statements, without clearance with the Council or the Board of Directors, in matters related to its area of practice.

Under Section 3.6.2.1 Nominations Committee

Resolved:

.03 That the nominations committee shall be chaired by the immediate past chairman of the Institute's Board and shall consist of seven additional members serving two-year terms. At the Council meeting held in conjunction with the annual meeting, the Institute's Board of Directors, after having considered at least seven candidates, shall recommend the candidates necessary to fill the projected vacancies for election to the nominations committee, each for a two-year term. At any one time, no more than two members, in addition to the chairman, shall be members of Council, and none shall be a member of the Institute's Board of Directors. Other nominations from the floor shall be permitted. Voting shall be by voice vote of the incoming Council, or, if requested by a majority of those present, by written ballot. A majority vote shall elect. With the exception of its chairman, no member, having served on the nominations committee, shall be eligible again to serve on the nominations committee until the passage of five years.

[As amended by Council May 1991; revised May 15, 2000; amended by Council June 16, 2016.]

Further Resolved:

.04 That the nominations committee shall not select any of its members for positions to be filled by the committee.

Under Section 3.6.2.2 Professional Ethics Division

Resolved:

.05 That in cases where the professional ethics executive committee concludes that a prima facie violation of the Code of Professional Conduct or by-laws is not of sufficient gravity to warrant further formal action, the committee may direct the member or members concerned to complete specified continuing professional education courses, or to take other remedial or corrective action, provided, however, that there will be no publication of such action in the Institute's principal membership periodical and the member concerned is notified of the member's right to reject such direction. In the case of such a rejection, the professional ethics executive committee shall determine whether to bring the matter to a hearing panel of the trial board for a hearing.

Further Resolved:

.06 That in cases where there is prima facie evidence of one or more actions by or with respect to a member as described in subparagraphs 7.4.1 through and including 7.4.6 of bylaw section 7.4, the professional ethics executive committee may decide to offer the member or members concerned the opportunity to avoid further investigation and a possible hearing before the trial board by entering into a settlement agreement under such terms and conditions as the committee deems appropriate including but not limited to agreement by the member or members (a) to resign from membership or (b) to complete specified continuing professional education courses and/or to submit to independent preissuance review of some or all financial statements and accountant's reports and/or submit to an accelerated practice-monitoring review, and/or to perform other remedial or corrective action as the committee may determine and/or (c) to submit to disciplinary action with publication by the Institute as provided in Council resolutions under bylaw section 7.6. The committee shall monitor compliance with the settlement agreement and may initiate an investigation where it finds there has been noncompliance.

[As revised by Council April 28, 2003; revised November 6, 2007.]

.07 A member's rejection of the terms and conditions of a proposed settlement agreement will not in any way affect the rights of a member under the bylaws and implementing resolutions in any subsequent investigation by the professional ethics executive committee in a hearing before the trial board.

[As adopted by Council May 26, 1993.]

Under Section 3.6.2.3 Joint Trial Board

Resolved:

.08 That the joint trial board shall consist of at least thirty-six members elected for a three-year term by Council on a staggered basis on nomination of the nominations committee. No member shall serve more than two full successive terms. The size of the trial board shall be determined by the Board of Directors. No member of the Institute's professional ethics division, of a state society ethics committee, or of a state board of accountancy shall be a member of the trial board.

[As revised by Council June 17, 1996.]

.09 The trial board shall elect from its membership a chairman and a vice chairman, the vice chairman to serve as chairman during any period of unavailability of the chairman. It shall also elect a secretary who need not be a member.

.10 The chairman or vice chairman, when acting as chairman, pursuant to the trial board rules of practice and procedure, may appoint from the members of the trial board a panel consisting of not less than three members, which may, but need not, include the chairman to sit as a hearing panel and hear and adjudicate charges against members, or an ad hoc committee consisting of not less than three members of the trial board to consider requests for nonapplication of sections 7.2 and 7.3. Decisions of hearing panels shall be reviewable by the trial board under the conditions and procedures as provided for in Council resolution under section 7.4 of the bylaws.

[As revised by Council May 15, 2000.]

Resolved:

.11 That the trial board is authorized to receive and act on petitions requesting review of a decision of the peer review board terminating a firm's or an individual's enrollment in the practice-monitoring program or of an AICPA peer review committee's decision terminating a firm's or an individual's enrollment in another Institute-approved practice-monitoring program. Following such review, the trial board may affirm, modify, or reverse all or any part of the peer review board's or an AICPA peer review committee's decision, but it may not increase the severity of the peer review board's or an AICPA peer review committee's sanction.

[As revised by Council June 17, 1996; revised October 24, 2005; revised November 6, 2007.]

Resolved:

.12 That the trial board is authorized to receive and act on petitions requesting review of a decision by the Center for Audit Quality Governing Board which imposed a sanction upon, or denied a reinstatement request by, a member or associate member of the Center for Audit Quality. Following such review, the trial board may affirm or reverse the Board's decision.

[As adopted by Council October 24, 2005.]

Resolved:

.13 That the trial board may hear and adjudicate charges involving alleged violations of a state CPA society's bylaws or code of professional conduct when there is in force a written agreement for such procedure between the Institute and the state CPA society concerned.

BL Section 401***Financial Management and Controls***

**As amended
January 12, 1988**

.01 The Council shall delegate to the Institute's Board of Directors, and through it to the Association's Board of Directors, financial management and budgetary controls to ensure the effective governance, management and operations of the Institute and Association.

[As revised June 16, 2016.]

(See section 401R.)

BL Section 401R***Implementing Resolution Under Article 4
Financial Management and Controls***

**As amended
January 12, 1988,
unless otherwise indicated**

Resolved:

.01 That Council, at each regular meeting, shall be presented for review a report that contains information related to the Institute's and the Association's financial operations and material variations from the annual budget. The Institute's Board of Directors shall approve the Institute's annual budget for the succeeding fiscal year, which shall be incorporated into the consolidated Association budget and approved by the Association's Board of Directors.

[As revised by Council May 15, 2000, and June 16, 2016.]

BL Section 410

4.1 Audit

**As amended
January 12, 1988**

.01 The Council shall, for each fiscal year, appoint a certified public accountant or certified public accountants to express an opinion on the financial statements of the Institute and its affiliated organizations. The financial statements of the Institute and the report of the auditor or auditors for each fiscal year shall be published for the information of the membership.

BL Section 420***4.2 Committee on Audit***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 The chairman of the board shall appoint from among the members of the Board of Directors, other than the officers, a committee on audit to make arrangements with the auditor or auditors for their examination, to review the audit report, and to perform such other duties appropriate for such a committee as directed by the Board of Directors.

[As revised May 15, 2000.]

BL Section 430***4.3 Execution of Instruments on Behalf of the Institute***

**As amended
January 12, 1988**

.01 All checks, drafts, deeds, mortgages, bonds, contracts, reports, proxies, and other instruments may be executed on behalf of the Institute by such officers or employees as the Council or the Board of Directors may from time to time designate, either generally or in specific instances.

BL Section 440**4.4 Indemnification**

**As amended
January 12, 1988**

.01 The Institute shall indemnify to the full extent authorized by law for the good faith exercise of judgment in the performance of assigned duties any person made or threatened to be made a party to any action, suit, or proceeding, whether criminal, civil, administrative, or investigative, by reason of the fact that the person, the person's testator, or intestate is or was a member of Council, the Board of Directors, or any committee, trustee, officer, employee, or agent of the Institute or any affiliated entity or serves or served any other enterprise as a director, trustee, officer, employee, or agent at the request of the Institute.

.02 Without limiting the generality of the foregoing, the Institute may contract for insurance against all or a portion of any liabilities and expenses, if any, resulting from the indemnification of any of the foregoing persons pursuant to this section or otherwise as permitted by law, and may also contract for companion insurance directly insuring any or all of such persons against liabilities and expenses.

BL Section 450

4.5 Dues

As amended
January 14, 1992

.01 The Council shall determine the annual dues which shall be paid by each member and international associate in accordance with such classifications as it deems appropriate, and may require dues of a different amount for each class so created.

.02 Dues shall be payable on or before the first day of each fiscal year of the Institute or in such other manner as the Council shall prescribe. For new members or international associates, dues shall be apportioned to the end of the fiscal year.

.03 No dues shall be paid by members or international associates of the Institute while they are engaged in military service of the United States or its allies during war. Individual members or international associates may be excused from payment of dues for reasonable cause by the chairman of the Finance Committee.

BL Section 460

4.6 Fiscal Year

**As amended
January 12, 1988**

.01 The fiscal year of the Institute shall be as the Council shall prescribe.

(See section 460R.)

BL Section 460R

Implementing Resolution Under Section 4.6 Fiscal Year

**As amended
January 12, 1988**

Resolved:

.01 That the fiscal year of the Institute shall be the twelve months beginning January 1 and ending December 31.

[As amended by Council October 25, 2016.]

**5. MEETINGS OF THE INSTITUTE AND
THE COUNCIL**

TABLE OF CONTENTS

<i>Section</i>		<i>Paragraph</i>
501	Meetings of the Institute and the Council	.01
510	5.1 Meetings of the Institute.....	.01
520	5.2 Meetings of Council	.01
530	5.3 General Provisions Governing Meetings	.01

BL Section 501

Meetings of the Institute and the Council

**As amended
January 12, 1988**

.01 This article shall govern meetings of the Institute and of the Council. The Board of Directors shall determine the dates of meetings of Council and the matters to be presented for action.

BL Section 510

5.1 Meetings of the Institute

As amended
January 12, 1988

.01 The membership shall meet pursuant to sections 5.1.1 through 5.1.3, conduct its business pursuant to section 5.1.3, and may adopt resolutions pursuant to section 5.1.4. Meetings of the membership shall be known as meetings of the Institute.

5.1.1 Regular Meetings of the Institute

There shall be a regular annual meeting of the Institute on a date to be fixed by the Institute's Board of Directors. This meeting shall also be known as the annual meeting of the Institute.

[As revised June 16, 2016.]

5.1.2 Special Meetings of the Institute

The chairman of the board shall call special meetings of the Institute when so requested by the Council or the Board of Directors, or upon the written request of at least 5 percent of the membership of the Institute or any thirty members of Council. Special meetings of the Institute shall be held at places designated by the Board of Directors. No business shall be transacted at a special meeting of the Institute other than that for which the meeting shall have been convened.

5.1.3 Notice of Meetings of the Institute

Notice of each meeting of the Institute, whether regular or special, shall be mailed to each member of the Institute, at the member's mailing address as shown on the official records of the Institute, at least thirty days prior to the date of such meeting.

5.1.4 Resolution of the Membership by Mail Ballot

A majority of the members of the Institute, assembled at any duly called corporate meeting of the Institute at which a quorum is present, may direct that the chairman of the board submit any question to the entire membership for a vote by mail. Any resolution enacted in such a mail ballot by two-thirds of the members voting shall be declared by the chairman of the board a resolution of the membership and shall be binding, if consistent with these bylaws, upon the Council, the Board of Directors, committees, officers, and staff. Mail ballots shall be valid and counted only if received within sixty days after the date of the mailing of ballot forms.

BL Section 520***5.2 Meetings of Council***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 Meetings of the Council shall be governed by sections 5.2.1 through 5.2.5, section 5.3, and section 6.6.

5.2.1 Regular Meetings of Council

A regular meeting of the Council shall be held in conjunction with the annual meeting of the Institute and on such other dates as the Council or the Board of Directors may designate.

[As revised May 15, 2000.]

5.2.2 Special Meetings of Council

The chairman of the board shall call special meetings of the Council when requested to do so by the Board of Directors or when requested in writing by at least thirty members of the Council. Special meetings of the Council shall be held at places designated by the Board of Directors.

5.2.3 Mail Ballot in Lieu of Special Meeting of Council

In lieu of a special meeting of the Council, the chairman of the board, with the approval of the Board of Directors, may submit any question to the Council for a vote by mail, and any action therein approved in writing by not less than two-thirds of those voting shall be declared by the chairman of the board an act of the Council and shall be recorded in the minutes of the Council provided, however, that at least a majority of the Council must have cast ballots on the question.

[As revised November 6, 2007.]

5.2.4 Notice

Notice of each meeting of the Council shall be sent to each member of the Council, at the member's mailing address as shown in the official records of the Institute, at least twenty-one days before such meeting. Such notice, as far as practicable, shall contain a statement of the business to be transacted.

5.2.5 Minutes

A copy of the minutes of each meeting of the Council shall be forwarded to each member of the Council within forty-five days after such meeting.

BL Section 530**5.3 General Provisions Governing Meetings**

**As amended
January 12, 1988**

.01 The following general provisions shall govern quorum and parliamentary procedure.

5.3.1 Meetings—Quorum

Five hundred members of the Institute shall constitute a quorum for the transaction of any business duly presented at any meeting of the Institute. Thirty members of Council shall constitute a quorum of the Council at any duly called meeting of the Council. A majority of the members of the Institute's Board of Directors shall constitute a quorum of the board.

[As revised June 16, 2016.]

5.3.2 Meetings—Rules of Parliamentary Procedure Applicable

The rules of parliamentary procedure contained in *Robert's Rules of Order Revised* shall govern all meetings of the Institute and of the Council.

BL Section 601

Election of Council, Board of Directors, and Officers of the Institute

**As amended
January 12, 1988**

.01 Except for ex officio members of Council (see sections 3.3.1.4 through 3.3.1.6), the election of members of the Council, the Board of Directors, and officers of the Institute shall be in accordance with the provisions of this article.

BL Section 610***6.1 Members of Council Directly Elected by Members of the Institute***

**As amended
June 17, 1996,
unless otherwise indicated**

.01 Members of Council directly elected by the membership in the respective states (see section 3.3.1.1) shall be elected in accordance with sections 6.1.1 through 6.1.6 as supplemented by Council resolution.

6.1.1 At Least One Member of Council Directly Elected by Membership of Each State

There shall be at least one member of Council directly elected by the members of the Institute in each state having one or more persons enrolled upon the membership lists of the Institute.

6.1.2 Number and Allocation of Directly Elected Council Seats Among the States

The total number of directly elected members of Council, in addition to those provided for by section 6.1.1, shall be eighty-five except as modified by section 6.1.2.1. The number of seats, excluding those extended by section 6.1.2.1, shall be equitably allocated among the states in direct proportion to the number of Institute members enrolled from each state.

6.1.2.1 Unexpired Terms Unaffected by Reduced Allocation

No member of Council directly elected by the membership in any state shall lose the member's seat for the term the member then serves should the allocation of that state be diminished by virtue of section 6.1.2; but, no state's allocation of directly elected Council seats shall be extended by this section beyond the natural expiration of a seat's full term or its vacation by the member filling it, whichever first occurs.

6.1.2.2 Allocation to Be Made by Nominations Committee

The nominations committee shall make the allocation provided in section 6.1.2. It shall be made at five-year intervals, at least nine months prior to annual meetings to be held each calendar year which ends in one and in six, and shall govern the five annual elections immediately following. It shall be based upon the membership figures and addresses carried on the books of the Institute the last day of the fiscal year immediately preceding the date of such determination.

If a state gains an additional seat from such allocation, the state society may request the nominations committee to authorize election for an initial term of less than three years in order to promote orderly rotation of Council members from that state. Upon receipt of such request, the nominations committee may authorize such shortened term. Following the expiration of such shortened term, subsequent terms for the seat shall be for three years, as provided in section 6.1.3.

In the event that a state has three or more directly elected members whose terms are not evenly staggered over a three-year cycle, the state society may request the nominations committee, for the election following the year these bylaws are adopted and thereafter in calendar years ending in one and in six, to approve the election of a nominee to fill a vacancy for a term of less than three years in order to effect a more orderly rotation of the Council members from that state. The nominations committee may authorize such shortened term. Subsequent terms for such a seat shall be three years, as provided in section 6.1.3.

6.1.3 Term of Office

Except as specified by this section 6.1.3, the term of office of a directly elected member of the Council shall commence when the member's election is announced by the chairman of the Board of Directors at the meeting of the Council held in conjunction with the annual meeting of the Institute, as prescribed by section 6.6, and shall run until the announcement of the election of new directly elected members of the Council at the meeting of the Council held in conjunction with the annual meeting of the Institute three years after the member's election. If any such member of the Council shall not serve that member's full term, the vacancy so created may be filled pursuant to section 6.5. The term of office of any member directly elected by the members in that member's state to fill such vacancy shall be the remainder of the three-year term with respect to which the vacancy occurred.

No member having served for two consecutive full terms as a directly elected member of the Council shall be eligible to serve another such term until at least one year after the completion of the member's second consecutive full term.

6.1.4 Number of Council Seats to Be Filled by Election

The number of Council seats to be filled in a state's quota of directly elected members of the Council for any given year shall be the number of its allocation of directly elected Council seats less the number of members of the Council from that state filling such seats for terms running through that year.

6.1.5 Nominations

At least eight months prior to the annual meeting of the Institute, the nominations committee shall request, from the recognized society of certified public accountants in each state for which any vacancies (see section 6.1.4) will arise in the coming year, the names of suggested candidates from the state represented by such society to fill each such vacancy. The committee shall give due consideration to the names so submitted, but shall not be required to select its nominees from among such names. In the absence of a satisfactory response from any such state society, the nominations committee shall select the nominees from such state.

The nominations committee shall make its nominations for directly elected members of the Council at least six months prior to the annual meeting of the Institute. Notice of such nominations shall be published to the membership by the secretary at least five months prior to the annual meeting of the Institute. Five percent, but in no event less than twenty members of the Institute from any given state for which a vacancy shall arise, may submit to the secretary independent nominations for directly

elected members of the Council from that state provided that such nominations be filed with the secretary at least four months prior to the annual meeting of the Institute.

[As revised November 6, 2007.]

6.1.6 Election

The nominees of the nominations committee for directly elected seats on Council shall be declared elected by the secretary if no independent nominations are filed for such seats as required by section 6.1.5.

If independent nominations are received, the secretary shall mail to all members of the Institute in each state in which there is a contest for a directly elected seat on Council, at least ninety days prior to the annual meeting of the Institute, mail ballots containing the names and relevant background information of nominees from that state nominated by the nominations committee and the names and relevant background information of nominees independently nominated. Each ballot shall contain an announcement that votes will be counted only if received by the secretary at least forty-five days before the annual meeting of the Institute. Election to contested seats on Council shall be determined by a plurality of the votes received from each jurisdiction by that date. Mail ballots shall be counted by the secretary, who shall certify the results for publication to the membership. Newly elected members shall be notified promptly and advised to attend the meeting of Council held in conjunction with the annual meeting of the Institute. They shall take office as provided in section 6.6.

[As revised May 15, 2000; revised November 6, 2007]

(See section 610R.)

BL Section 610R***Implementing Resolution Under Section 6.1
Members of Council Directly Elected by
Members of the Institute***

As amended
January 12, 1988

Under Section 6.1.6 Election***Resolved:***

.01 That the withdrawal of a nomination for whatever reason after the balloting has commenced will not be acted upon until the certification of election has been completed. Vacancies then arising will be filled in accordance with section 6.5 of the bylaws, except that in states where the number of nominees exceeds the number of vacancies, the vacancy created by any withdrawal will be filled by that nominee having the highest number of votes after all other vacancies have been filled.

BL Section 620***6.2 Selection of Members of Council to Represent State Societies***

**As amended
June 17, 1996,
unless otherwise indicated**

.01 Each recognized state society of certified public accountants shall designate, in a manner it deems appropriate, an Institute member to represent it on the Council. The term of each member of the Council so designated shall commence at the meeting of Council held in conjunction with the annual meeting of the Institute after notification to the secretary by the society designating the member. The term shall run for one year or until the commencement of the successor's term, provided that no such member of the Council shall represent a state society for more than six consecutive years.

[As revised May 15, 2000.]

BL Section 630***6.3 Election of Members-at-Large of Council, Board of Directors, Chairman of the Board, and Vice Chairman of the Board***

**As amended
January 14, 1992,
unless otherwise indicated**

.01 At the meeting of the Council held in conjunction with the annual meeting of the Institute, following the completion of such other business as the Council may transact, seven Institute members, without regard to the states in which they reside, shall be elected annually by the Council as members-at-large of the Council. This election shall occur prior to the installation of the members of the Council newly elected under section 6.1. The at-large members shall serve for a term of three years or until the election of their successors. At the same meeting, but after all newly elected and designated Council members have been installed, the Council shall elect the chairman of the board, the vice chairman of the board, one-third (or as near to one-third as mathematically possible) of the elected members of the Board of Directors. The elected members of the Board of Directors shall serve for a term of three years or until election of their successors. The Council shall also elect one representative of the public, who is not a member of the Institute, to the Board of Directors for a term of three years, or until election of a successor. Nominations for all these positions on the Board of Directors shall be made by the nominations committee at least six months prior to the annual meeting of the Institute. Notice of those nominations shall be published to the membership of the Institute at least five months prior to such annual meeting. Independent nominations may be made by any twenty members of the Council if filed with the secretary at least four months prior to the annual meeting of the Institute. No nominations from the floor will be recognized. A majority of votes shall elect. Nominees may be invited to the meeting at which the election is to be held, and those elected shall take office as prescribed in section 6.6.

[As amended June 17, 1996; revised May 15, 2000.]

.02 No member having served for two consecutive full terms as a member-at-large of the Council shall be eligible to serve another such term until at least one year after the completion of the member's second consecutive full term.

6.3.1. Re-election to Board of Directors

No elected member of the Board of Directors who has served a full three-year term shall be eligible for re-election to such a term until the meeting of the Council one year after the completion of the member's full three-year term, provided, however, that a public member may be elected to serve a second three-year term.

BL Section 640***6.4 Forfeiture of Office for Nonattendance***

**As amended
January 12, 1988**

.01 Any directly elected member or member-at-large of Council who shall be absent from three consecutive meetings shall forfeit that member's seat.

[Section renumbered as a result of the deletion of the former sections 640 and 640R on June 17, 1996.]

BL Section 650**6.5 Vacancies**

**As amended
June 17, 1996**

.01 Vacancies in the membership of Council, or in the Board of Directors, or in any of the offices of the Institute elected by the Council, occurring between annual meetings of the Institute, may be filled by election of replacements by the Council, either at a meeting of Council or by mail ballot, under such conditions as the Council may prescribe. If the Council should so replace a directly elected member of the Council, such interim appointment will run only until the member's seat is filled by direct election of the membership of that member's state as provided in these bylaws.

.02 Pending action by the Council to fill a vacancy among any of the officers of the Institute who are elected by the Council, the Board of Directors may appoint a temporary successor to act in the capacity indicated.

(See section 650R.)

[Section renumbered as a result of the deletion of the former sections 640 and 640R on June 17, 1996.]

BL Section 650R***Implementing Resolution Under Section 6.5
Vacancies***

**As amended
June 17, 1996**

Resolved:

.01 That if a vacancy occurs in the membership of Council, or in the Board of Directors, or in any of the offices of the Institute elected by the Council between annual meetings of the Institute, the Board of Directors shall recommend replacements for election by Council. Voting on such replacement may be conducted by mail ballot, in which case provision shall be made for write-in votes, or at the next meeting of Council, as may appear most desirable in the circumstances. If the voting takes place at a Council meeting, nominations from the floor shall be permitted; voting may be by voice vote, or, at the request of a majority of those present, by written ballot. A majority vote shall elect. In any event, persons elected to fill vacancies in the Board of Directors, in the Council, or in any of the offices of the Institute elected by the Council shall serve only for the remainder of the unexpired term of the previous incumbent or until a successor is elected.

[Section renumbered as a result of the deletion of the former sections 640 and 640R on June 17, 1996.]

BL Section 660***6.6 Election Meeting of Council***

**As amended
June 17, 1996,
unless otherwise indicated**

.01 New members-at-large of Council elected pursuant to section 6.3 shall take office as soon as their election is completed, replacing those members-at-large whose terms shall have expired. Then the presiding officer shall announce the installation of members of the Council newly elected under section 6.1, at which time they shall take office, replacing those directly elected members of Council whose terms shall have expired. Election of officers who are elected by the Council, new members of the Board of Directors, and others shall then be held, and each officer or member of the Board of Directors so elected shall replace that person's predecessor upon such election, provided, however, that the retiring chairman of the board shall continue in office through the end of the annual meeting of the Institute.

[Section renumbered as a result of the deletion of the former sections 640 and 640R on June 17, 1996; as revised May 15, 2000.]

BL Section 670***6.7 Term Limit***

**As adopted
November 6, 2007**

.01 Regardless of whether a member has served as a designated, directly elected, or at-large member of Council, no Council member who has served in any, or all, of the foregoing categories may serve more than seven consecutive years. A member who has served seven consecutive years shall not be eligible to serve on Council as a designated, directly elected, or at-large member of the Council until at least one year after the seventh consecutive year the member last served on the Council. Notwithstanding anything to the contrary in any section of these bylaws, any period during which an individual served as an ex officio Council member, such as president or a member of the Board of Directors, shall not be included in any determination of eligibility under this section.

760R	Implementing Resolution Under Section 7.6 Publication of Disciplinary Action	.01
770	7.7 Disciplinary Sections Not to Be Applied Retroactively	.01

BL Section 701***Termination of Membership and Disciplinary Sanctions***

**As amended
January 12, 1988**

.01 This article shall govern the termination or suspension of membership in the Institute, whether imposed as a matter of discipline or voluntarily sought, and the imposition of any other disciplinary sanction, or administrative reprimand, whether public or private, or imposition of conditions for retention of membership.

BL Section 710***7.1 Resignation of Membership***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 Resignations of members shall be in writing and may be offered at any time. Actions on such resignations and applications for reinstatement of resigned members shall be taken by the Board of Directors under such provisions as the Council may prescribe. Council may make separate provision for action on resignations of members not in good standing or against whom disciplinary proceedings or investigations are pending or as to whom or to whose firm a practice-monitoring review has begun but has not been completed, and the resignation or resignations would make the firm or member ineligible to enroll in an Institute-approved practice-monitoring program, and on applications for reinstatement of persons whose resignation was accepted when in such classification.

[As revised November 6, 2007]

(See section 710R.)

BL Section 710R***Implementing Resolution Under Section 7.1
Resignation of Membership***

**As amended,
January 12, 1988,
unless otherwise indicated**

Resolved:

.01 That the Board of Directors shall act upon resignation of members, which shall become effective on the date of acceptance, but no action shall be taken on the resignation of a member with respect to whom charges are under investigation by the professional ethics division, or against whom a complaint is pending before the trial board, or as to whom or whose firm a practice-monitoring review has begun but has not been completed, and the resignation or resignations would make the firm or member ineligible to enroll in an Institute-approved practice-monitoring program unless the division, the trial board, or the Peer Review Board or peer review committee, as the case may be, recommends that such resignation be accepted. If a person whose resignation was accepted when that person was under investigation or the object of a complaint or during the pendency of a practice-monitoring review when that resignation or resignations would make the firm or member ineligible to enroll in an Institute-approved practice-monitoring program, should subsequently apply for reinstatement, the Board of Directors shall not reinstate such person without the consent of the division or the trial board, or the Peer Review Board or committee as the case may be.

[As revised November 6, 2007.]

BL Section 720***7.2 Termination of Membership for
Nonpayment of Financial Obligation
or for Failure to Comply With
Membership-Retention Requirements***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 The Board of Directors may, in its discretion, terminate the membership of a member who fails to pay dues or any other obligation to the Institute within five months after such debt has become due and terminate the membership of a member who fails to comply with the practice-monitoring or continuing education membership-retention requirements. The Council shall provide for consideration and disposition by the trial board, with or without hearing, of a timely written petition that membership should not be terminated pursuant to this section. Any membership so terminated may be reinstated by the Board of Directors, under such conditions and procedures as the Council may prescribe.

(See section 720R.)

7.2.1 Termination of Association of International Associate

The Board of Directors may terminate the affiliation of an international associate at its discretion.

[As revised May 15, 2000.]

BL Section 720R***Implementing Resolution Under
Section 7.2 Termination of Membership
for Nonpayment of Financial Obligation
or for Failure to Comply With
Membership-Retention Requirements***

**As amended
January 12, 1988**

Resolved:

.01 That if a person whose membership has terminated for nonpayment of dues or other financial obligation shall apply for reinstatement, the Board of Directors, in its discretion, may reinstate the member, provided that all dues and other obligations owing to the Institute at the time membership was terminated shall have been paid.

Further Resolved:

.02 That if a person whose membership has terminated for failure to comply with membership-retention requirements relating to CPE or practice-monitoring shall apply for reinstatement, the Board of Directors, in its discretion, may reinstate the person as a member provided the person shall have satisfactorily demonstrated that the failure to comply with the CPE or practice-monitoring requirements has been rectified.

Further Resolved:

.03 That no person shall be considered to have resigned in good standing if at the time of resignation the person was in debt to the Institute for dues or other obligations. A member submitting a resignation after the beginning of the fiscal year, but before expiration of the time limit for payment of dues or other obligations, may attain good standing by paying dues prorated according to the portion of the fiscal year which has elapsed, provided obligations other than dues shall have been paid in full.

.04 A member who has resigned or whose membership has terminated in any manner may not file a new application for admission but may apply for reinstatement under this resolution or applicable provisions of the bylaws.

BL Section 730**7.3 Disciplinary Action Without a Hearing**

As amended
January 12, 1988,
unless otherwise indicated

.01 Membership in the Institute shall be suspended or terminated without a hearing for disciplinary purposes, or a member may be subjected to other disciplinary actions, as provided in sections 7.3.1 and 7.3.2, under such conditions and by such procedure as shall be prescribed by the Council.

[As revised October 18, 2003.]

(See section 730R.)

7.3.1 Criminal Conviction of Member

Membership in the Institute shall be suspended without a hearing should there be filed with the secretary of the Institute a judgment of conviction imposed upon any member for

7.3.1.1 A crime punishable by imprisonment for more than one year;

7.3.1.2 The willful failure to file any income tax return which the member, as an individual taxpayer, is required by law to file;

7.3.1.3 The filing of a false or fraudulent income tax return on the member's or a client's behalf; or

7.3.1.4 The willful aiding in the preparation and presentation of a false and fraudulent income tax return of a client; and

shall be terminated in like manner upon the similar filing of a final judgment of conviction; however, the Council shall provide for the consideration and disposition by the trial board, with or without hearing, of a timely written petition of any member that the member's membership should not be suspended or terminated pursuant to section 7.3.1.1, herein.

7.3.2 Other Disciplinary Action

7.3.2.1 Membership in the Institute shall be suspended without a hearing should a member's certificate as a certified public accountant or license or permit to practice as such or to practice public accounting be suspended as a disciplinary measure; however, such suspension of membership shall terminate upon reinstatement of the certificate, license or permit. Membership in the Institute shall be terminated without a hearing should such certificate, license, or permit be revoked, withdrawn, surrendered, indefinitely suspended, or cancelled as a disciplinary measure or in connection therewith.

[As revised October 18, 2003.]

7.3.2.2 The professional ethics executive committee and the Board of Directors may jointly approve certain governmental agencies and other organizations whose disciplinary actions against a member will permit the Institute to take disciplinary action against that member without a hearing. To be eligible for approval, the governmental

agency must be one which has the authority to prohibit a member from either practicing before it or serving as a director, officer or trustee of an entity. To be eligible for approval, an organization other than a governmental agency must be one which has been granted the authority by statute or regulation to regulate accountants. If such approved governmental agency or organization temporarily suspends, prohibits or restricts a member from practicing before it or another governmental agency, or from serving as a director, officer or trustee of any entity, the member's membership in the Institute shall be suspended; however, such suspension of membership shall terminate upon such agency's or organization's termination of the suspension, prohibition or restriction. If such approved governmental agency or organization bars or permanently or indefinitely suspends, prohibits or restricts a member from practicing before it or another governmental agency, or from serving as a director, officer or trustee of any entity, the member's membership in the Institute shall be terminated.

[As adopted October 18, 2003.]

7.3.2.3 A member who has been subjected to any sanction as a disciplinary measure other than or in addition to those sanctions addressed above, by an authority covered in section 7.3.2.1 or section 7.3.2.2, may also be subjected to discipline by the Institute without a hearing pursuant to guidelines established by the professional ethics executive committee and approved by the Board of Directors.

[As adopted October 18, 2003.]

7.3.2.4 Council shall permit the trial board, with or without a hearing, to consider a timely written petition by the professional ethics executive committee or the member that the member should not be disciplined pursuant to this section 7.3.2.

[As revised October 18, 2003.]

7.3.3 Trial Board Disciplining Not Precluded

Application of the provisions of section 7.3.1 and section 7.3.2 shall not preclude the summoning of the member concerned to appear before a hearing panel of the trial board pursuant to section 7.4.

BL Section 730R***Implementing Resolution Under Section 7.3
Disciplinary Action Without a Hearing***

**As amended
January 12, 1988,
unless otherwise indicated**

Resolved:

.01 (1) That the membership of a member who is convicted by a court of any of the criminal offenses enumerated in section 7.3.1 of the bylaws shall become automatically suspended upon the mailing of a notice of such suspension, as provided in paragraph (6) of this resolution. Such notice shall be mailed within a reasonable time after a certified copy of a judgment of conviction of such criminal offense has been filed with the secretary of the Institute.

[As revised by Council October 18, 2003.]

.02 (2) That the membership of a member who has been convicted by a court of any of the offenses enumerated in section 7.3.1 of the bylaws, and which conviction has become final, shall become automatically terminated upon the mailing of a notice of such termination, as provided in paragraph (6) of this resolution. Such notice shall be mailed within a reasonable time after a certified copy of such conviction and evidence that it has become final has been filed with the secretary of the Institute.

[As revised by Council October 18, 2003.]

.03 (3) That the membership of a member (a) whose certificate, license or permit to practice public accounting or as a certified public accountant has been suspended as a disciplinary measure or (b) who is subject to a temporary suspension, prohibition or restriction by an approved governmental agency or organization covered in section 7.3.2 as a disciplinary measure shall, except as provided in paragraph (7) of this resolution, become automatically suspended upon the expiration of thirty days after the mailing of a notice of such suspension, as provided in paragraph (6) of this resolution. Such notice shall be mailed within a reasonable time after a statement by such authority showing the suspension, prohibition or restriction and specifying the cause and duration of such authority's action has been filed with the secretary of the Institute. Such automatic suspension shall cease upon the expiration of the period of suspension, prohibition or restriction so specified.

[As revised by Council October 18, 2003.]

.04 (4) That the membership of a member (a) whose certificate, license or permit to practice public accounting or as a certified public accountant has been revoked, withdrawn, indefinitely suspended, surrendered or cancelled as a disciplinary measure, or (b) who has been subjected to a bar, to a permanent or indefinite suspension, prohibition or restriction by an approved governmental agency or organization covered in section 7.3.2 shall, except as provided in paragraph (7) of this resolution, become automatically terminated upon the expiration of thirty days after the mailing of a notice of such termination, as provided in paragraph (6) of this resolution. Such notice shall be mailed within

a reasonable time after a statement by such authority showing the revocation, withdrawal, surrender, cancellation, bar, permanent or indefinite suspension, prohibition or restriction and specifying the cause of such authority's action, has been filed with the secretary of the Institute.

[As revised by Council October 18, 2003.]

.05 (5) That, if a member has been subjected to any sanction as a disciplinary measure, other than or in addition to those set out in paragraph (1), (2), (3) or (4), the member shall, except as provided in paragraph (7), have their membership suspended or terminated or be otherwise disciplined upon the expiration of thirty days after the mailing of a notice of such disciplinary action taken pursuant to guidelines developed by the professional ethics executive committee and approved by the Board of Directors, under section 7.3.2.

[As adopted by Council October 18, 2003.]

.06 (6) That notices of disciplinary action pursuant to paragraph (1), (2), (3), (4) or (5) of this resolution shall be signed by the secretary of the Institute and mailed by registered or certified mail, postage prepaid, addressed to the member concerned at the member's last known address according to the official records of the Institute, which are the records of the membership department.

[As revised by Council June 17, 1996; revised October 18, 2003.]

.07 (7) That the operation of paragraph (1), (2), (3), (4) or (5) of this resolution shall become postponed if, before the expiration of thirty days after mailing the notice of disciplinary action, the secretary of the Institute receives a written petition from either the member concerned or the professional ethics executive committee that the pertinent provision not become operative. The petition shall state briefly the facts and reasons relied upon. All such petitions shall be referred to the trial board for action thereon by a panel of the trial board consisting of at least three members appointed by the chairman of the trial board or vice chairman, when acting as chairman. If the petition is denied, the disciplinary action shall become effective upon such denial, and the party that made the petition shall be so notified in writing by the secretary of the Institute. No appeal shall be allowable with respect to a denial of such a petition. If the petition is granted, the disciplinary action shall not become effective. In such event, the secretary shall transmit the matter to the professional ethics division to take whatever action it considers proper in the circumstances. A determination that paragraph (1), (2), (3), (4) or (5) of this resolution shall not become operative shall be made only when it clearly appears that, because of exceptional or unusual circumstances, it would be inequitable to permit such automatic disciplinary action.

[As revised by Council May 15, 2000; revised October 18, 2003.]

BL Section 740***7.4 Disciplining of Member by Trial Board***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 Under such conditions and by such procedure as the Council may prescribe, a hearing panel of the trial board, by a two-thirds vote of the members present and voting, may expel a member (except as otherwise provided in section 7.4.3), or by a majority vote of the members present and voting, may suspend a member for a period not to exceed two years not counting any suspension imposed under sections 7.3.1 and 7.3.2, or may impose such lesser sanctions as the Council may prescribe on any member if the member

7.4.1 Infringes any of these bylaws or any rule of the Code of Professional Conduct;

7.4.2 Is declared by a court of competent jurisdiction to have committed any fraud;

7.4.3 Is held by a hearing panel of the trial board to have been guilty of an act discreditable to the profession, or to have been convicted of a criminal offense which tends to discredit the profession; provided that should a hearing panel of the trial board find by a majority vote that the member has been convicted by a criminal court of an offense involving moral turpitude, or any of the offenses enumerated in section 7.3.1, the penalty shall be expulsion;

7.4.4 Is declared by any competent court to be insane or otherwise incompetent;

7.4.5 Is subject to a disciplinary action by an authority covered in section 7.3.2 that could result in automatic discipline under section 7.3.2; or
[As revised October 18, 2003.]

7.4.6 Fails to cooperate with the professional ethics division in any disciplinary investigation of the member, owner or employee of the firm by not making a substantive response to interrogatories or a request for documents from a committee of the professional ethics division or by not complying with the educational and remedial or corrective action determined to be necessary by the professional ethics executive committee, within thirty days after the posting of notice of such interrogatories, or a request for documents, or directive to take CPE or corrective action by registered or certified mail, postage prepaid, to the member at the member's last known address shown in the official records of the Institute.

[As revised May 15, 2000.]

.02 With respect to a member residing in a state in which the state society has entered into an agreement approved by the Institute's Board of Directors

to deal with complaints against society members in cooperation with the professional ethics division, disciplinary hearings shall be conducted before a hearing panel of the joint trial board.

(See section 740R.)

BL Section 740R***Implementing Resolution Under Section 7.4
Disciplining of Member by Trial Board***

As amended
January 12, 1988,
unless otherwise indicated

Resolved:

.01 (1) Any complaint preferred against a member under section 7.4 of the bylaws shall be submitted to the professional ethics division, which in turn may refer the complaint for investigation and recommendation to an ethics committee (or its equivalent) of a state society of certified public accountants that has made an agreement with the Institute of the type authorized in section 7.4 of the bylaws. If, upon consideration of the complaint, investigation and/or recommendation thereon, it appears that a prima facie case is established showing a violation of any applicable bylaws or any rule of the Code of Professional Conduct of the Institute or any state society making an agreement with the Institute referred to above or showing any conduct discreditable to a certified public accountant, the professional ethics division or the ethics committee of such state society, except as provided in the implementing resolution under section 3.6.2.2 of the bylaws, shall report the matter to the secretary of the joint trial board who shall summon the member involved to respond to the charges preferred against the member, which response may include the entering of a plea of guilty without a hearing, in accordance with rules established by the trial board, provided, however, that with respect to a case in which the trial board has granted a petition that automatic discipline shall not become operative under the provisions of paragraph (7) in the implementing resolution under section 7.3.2 of the bylaws, the division or such state society ethics committee shall have discretion as to whether and when to report the matter to the secretary for such summoning.

[As revised by Council October 18, 2003.]

.02 (2)

- (a) If the professional ethics division or state society ethics committee dismisses any complaint preferred against a member or shall fail to initiate its inquiry within ninety days after such complaint is presented to it in writing, the member preferring the complaint may present the complaint in writing to the trial board, provided, however, that this provision shall not apply to a case falling within the scope of section 7.3.
- (b) The chairman of the trial board shall cause such investigation to be made of the matter as the chairman may deem necessary, and shall either dismiss the complaint or refer it to the secretary of the trial board who shall summon the member to answer the complaint in accordance with the provisions in paragraph (1) hereof.
- (c) Prior to causing the investigation referred to in paragraph (b), the chairman of the trial board shall designate six members of the trial

board who shall not be involved in such investigation in order that not less than three of them may be appointed to an independent hearing panel if necessary. The chairman shall report the names of such members to the secretary of the trial board prior to any action under paragraph (b).

[As revised by Council May 15, 2000.]

.03 (3) For the purpose of adjudicating charges against members of the Institute, as provided in the foregoing paragraphs of this resolution, the following must take place:

- (a) The secretary shall mail to the member concerned, at least thirty days prior to the proposed meeting of a panel appointed to hear the case, written notice of the charges to be adjudicated. Such notice, when mailed by registered or certified mail, postage prepaid, addressed to the member concerned at the member's last known address according to the official records of the Institute, which are the records of the membership department, shall be deemed properly served.
- (b) After considering the evidence presented by the professional ethics division or other complainant and by the defense, the panel hearing the case, a quorum present, by vote of the members present and voting, may, in a manner consistent with section 7.4 of the bylaws, admonish, suspend for a period of not more than two years, or expel the member against whom the complaint is made and take such other disciplinary, remedial or corrective action as the panel deems appropriate.
- (c) In a case decided by a panel, the member concerned may request a review by the trial board of the decision of the panel, provided such a request for review is filed with the secretary of the trial board within thirty days after the decision of the panel, and that such information as may be required by the rules of the trial board shall be filed with such request. Such a review shall not be a matter of right. Each such request for a review shall be considered by an ad hoc committee to be appointed by the chairman of the trial board, or its vice chairman in the event of the chairman's unavailability, and to consist of not less than three members of the trial board who did not participate in the prior proceedings in the case. The ad hoc committee shall have power to decide whether such request for review by the trial board shall be granted, and such committee's decision that such request shall not be granted shall be final and subject to no further review. A quorum of such ad hoc committee shall consist of a majority of the appointed. If such request for review is granted, the trial board shall review the decision of the panel in accordance with its rules of practice and procedure. On review of such decision, the trial board may affirm, modify, or reverse all or any part of such decision or make such other disposition of the case as it deems appropriate. The trial board may, by general rule, indicate the character of reasons that may be considered to be of sufficient importance to warrant an ad hoc committee granting a request for review of a decision of a panel.

[As revised by Council May 15, 2000.]

- (d) Any decision of the trial board, including any decision reviewing a decision of a panel, shall become effective when made, unless the trial board's decision indicates otherwise, in which latter event it shall become effective at the time determined by the trial board. Any decision of a panel shall become effective as follows:
 - (i) Upon the expiration of thirty days after it is made, if no request for review is properly filed within such thirty-day period.
 - (ii) Upon the denial of a request for review, if such request has been properly filed within such thirty-day period and is denied by an ad hoc committee.
 - (iii) Upon the date of a decision of a review panel affirming the decision of a hearing panel in cases where a review has been granted by an ad hoc committee.
- (e) A plea of guilty, if it conforms to the rules and procedures of the trial board, shall become effective upon acceptance by the trial board.

[As revised by Council June 17, 1996.]

.04 (4) In the case of a settlement agreement between a member and the professional ethics executive committee that provides for disciplinary action pursuant to the Council resolution implementing bylaw section 3.6.2.2, the matter shall be referred to a panel of the trial board which, upon finding that there has been a waiver of the member's rights under Article 7.4, shall recognize such settlement agreement and arrange for publication of such disciplinary action under section 7.6 of the bylaws.

[As revised by Council May 26, 1993; revised April 28, 2003.]

BL Section 750***7.5 Reinstatement***

**As amended
January 12, 1988**

.01 The Council may prescribe the conditions and procedures under which members suspended or terminated under sections 7.3 and 7.4 may be reinstated.

(See section 750R.)

BL Section 750R***Implementing Resolution Under
Section 7.5 Reinstatement***

**As amended
January 12, 1988,
unless otherwise indicated**

Resolved:

.01 (1) That at any time after the publication by the Institute of a statement of a case and decision, including cases in which a guilty plea was entered without a hearing, on application of the member concerned to the secretary of the trial board, the appropriate panel of the trial board that last heard the case and whose decision provided the basis for the publication or, where the original panel cannot be reappointed, or in the case of a guilty plea, a newly formed panel, may, by a two-thirds vote of the members present and voting, rescind or modify such decision. Any such action shall be published by the Institute. The denial of an application under this section shall not be published and shall not prevent the member concerned from applying for reinstatement under section (2) hereof.

[As revised by Council May 26, 1993; revised May 15, 2000.]

.02 (2) That

- (a) Should an order, judgment of conviction, decision or action on which the suspension or termination of membership was based under section 7.3 of the bylaws be reversed or otherwise set aside or invalidated, such suspension shall terminate or such member shall become reinstated when a certified copy of the order reversing or otherwise setting aside or invalidating such order, conviction, decision or action is filed with the secretary of the joint trial board, who shall refer the matter to the professional ethics division for whatever action it deems appropriate.

[As revised by Council October 18, 2003.]

- (b) A member who has been suspended or expelled by the trial board pursuant to section 7.4 of the bylaws may request that the suspension terminate or may request reinstatement if an order, judgment of conviction, decision or action on which the suspension or termination was based has been reversed or otherwise set aside or invalidated. Such request shall be referred to the trial board whereupon a hearing panel composed of five members designated by the chairman of the trial board may, after investigating all related circumstances, terminate the suspension or reinstate the member concerned by a majority vote of the members present and entitled to vote.

[As revised by Council October 18, 2003.]

- (c) Except as provided in subparagraphs (a) and (b) of this paragraph (2), a member whose membership has been automatically terminated

under section 7.3, or who has been expelled by or had the member's resignation accepted by a panel of the trial board may, at any time after three years from the effective date of such termination, expulsion, or acceptance of resignation, request reinstatement of their membership. Such request shall be referred to the trial board, whereupon the chairman shall designate five members of the board to a hearing panel which may, after investigation, reinstate such member on such terms and conditions as it shall determine to be appropriate. If an application for reinstatement under this subparagraph is denied, the member concerned may again apply for reinstatement at any time after two years from the date of such denial.

BL Section 760***7.6 Publication of Disciplinary Action***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 Notice of disciplinary action pursuant to section 7.3 or 7.4 or of termination of enrollment of a member or a member's firm in an Institute-approved practice-monitoring program, together with a statement of the reasons therefore, shall be published in such form and manner as the Council may prescribe. Council also may prescribe any additional disclosures regarding any matter within the jurisdiction of the professional ethics executive committee.

[As revised May 15, 2000; revised October 18, 2003; revised November 6, 2007.]

(See section 760R.)

BL Section 760R***Implementing Resolution Under Section 7.6
Publication of Disciplinary Action***

**As amended
May 26, 1993,
unless otherwise indicated**

Resolved:

.01 That notice of disciplinary action taken under section 7.3 or 7.4 of the bylaws or of termination of enrollment of a member or a member's firm in an Institute-approved practice monitoring program, and the basis therefore shall be published by the Institute and that the professional ethics division, the Peer Review Board or peer review committee as appropriate shall maintain a record of such information and disclose that information upon request. In the case of disciplinary action pursuant to section 7.3 of the bylaws, such notice shall be in a form approved by the chairman of the trial board and consistent with this Council resolution. In any action pursuant to section 7.4 of the bylaws in which the member is found guilty or has entered into a settlement agreement with the professional ethics executive committee, the trial board or panel hearing the case shall decide on the form of the notice of the case and the decision to be published. All notices shall disclose, at least, the name of the member involved and, when appropriate, the terms and conditions of any settlement agreement and the nature of the violation. The statement and decision, as released by the chairman, trial board, or hearing panel, shall be published by the Institute. No such publication shall be made until such decision has become effective. The professional ethics executive committee may inform the complainant of the outcome of its investigation without regard to whether the action taken results in publication under section 7.6 of the bylaws.

[As revised by Council May 15, 2000; revised October 18, 2003; revised November 6, 2007.]

BL Section 770***7.7 Disciplinary Sections Not to Be Applied Retroactively***

**As amended
January 12, 1988**

.01 Sections 7.3 and 7.4 shall not be applied to offenses of wrongful conduct occurring prior to their effective dates, but such offenses shall be subject to discipline under the bylaws of the Institute in effect at the time of their occurrence.

BL Section 800
8. AMENDMENTS

TABLE OF CONTENTS		
<i>Section</i>		<i>Paragraph</i>
801	Amendments.....	.01
810	8.1 Proposals to Amend the Bylaws	.01
820	8.2 Proposals to Amend the Code of Professional Conduct	.01
830	8.3 Submission to Council via Board of Directors	.01
840	8.4 Submission to Membership by Mail Ballot	.01

BL Section 801***Amendments***

**As amended
January 12, 1988**

.01 Amendments to these bylaws and the Code of Professional Conduct shall be accomplished in a manner consistent with this article.

BL Section 810***8.1 Proposals to Amend the Bylaws***

**As amended
June 17, 1996**

.01 Proposals to amend the bylaws may be made by any thirty members of the Council, by any two hundred or more members of the Institute in good standing, by the Board of Directors, or by petition of 5 percent of the membership as of the end of the prior fiscal year. Any such petition shall include the member's name (typed or printed), membership number and the date it is signed, and the signature of a member on such a petition shall be valid for one year from the date thereof. The changes to this provision will not apply to petitions, regardless of when they are signed, submitted pursuant to efforts to gather such petitions which were ongoing as of July 13, 1995.

BL Section 820***8.2 Proposals to Amend the Code of Professional Conduct***

**As amended
June 17, 1996**

.01 Proposals to amend the Code of Professional Conduct may be made by any thirty members of the Council, by any two hundred or more members of the Institute in good standing, by the Board of Directors, by the professional ethics division, or by petition of 5 percent of the membership as of the end of the prior fiscal year. Any such petition shall include the member's name (typed or printed), membership number and the date it is signed, and the signature of a member on such a petition shall be valid for one year from the date thereof. The changes to this provision will not apply to petitions, regardless of when they are signed, submitted pursuant to efforts to gather such petitions which were ongoing as of July 13, 1995.

BL Section 830***8.3 Submission to Council via
Board of Directors***

**As amended
January 12, 1988**

.01 All such proposals to amend the bylaws or the Code of Professional Conduct, unless made at a meeting of the Council or the Board of Directors, shall be submitted in writing to the Board of Directors. The Board of Directors shall submit all such proposals, accompanied by its recommendation, to the Council for action.

8.3.1 Proposals Not Requiring Council Approval

Following discussion at a meeting of the Council, proposals sponsored by at least 5 percent of the membership shall be submitted to the membership of the Institute for vote by mail ballot pursuant to section 8.4.

BL Section 840***8.4 Submission to Membership by Mail Ballot***

**As amended
January 12, 1988,
unless otherwise indicated**

.01 Amendments proposed under section 8.3.1 and those authorized by the Council under section 8.3 shall be submitted to all of the members of the Institute for a vote by mail ballot no later than 180 days following discussion or authorization by the Council. If at least two-thirds of those voting approve such proposal, it shall become effective as an amendment to the bylaws or to the Code of Professional Conduct, as applicable. Mail ballots shall be considered valid and counted only if received as instructed by the Institute for the return of such votes within sixty days from the date of mailing the ballots to the members.

BL Section 921***A Description of the Professional Practice of Certified Public Accountants***

- .01** Certified public accountants practice in the broad field of accounting.
- .02** Accounting is a discipline which provides financial and other information essential to the efficient conduct and evaluation of the activities of any organization.
- .03** The information which accounting provides is essential for (1) effective planning, control, and decision-making by management, and (2) discharging the accountability of organizations to investors, creditors, government agencies, taxing authorities, association members, contributors to welfare institutions, and others.
- .04** Accounting includes the development and analysis of data, the testing of their validity and relevance, and the interpretation and communication of the resulting information to intended users. The data may be expressed in monetary or other quantitative terms, or in symbolic or verbal forms.
- .05** Some of the data with which accounting is concerned are not precisely measurable, but necessarily involve assumptions and estimates as to the present effect of future events and other uncertainties. Accordingly, accounting requires not only technical knowledge and skill, but even more important, disciplined judgment, perception, and objectivity.
- .06** Within this broad field of accounting, certified public accountants are the identified professional accountants. They provide leadership in accounting research and education. In the practice of public accounting CPAs bring competence of professional quality, independence, and a strong concern for the usefulness of the information and advice they provide, but they do not make management decisions.
- .07** The professional quality of their services is based upon experience and the requirements for the CPA certificate—education and examination—and upon the ethical and technical standards established and enforced by their profession.
- .08** CPAs have a distinctive role in auditing financial statements submitted to investors, creditors, and other interested parties, and in expressing independent opinions on the fairness of such statements. This distinctive role has inevitably encouraged a demand for the opinions of CPAs on a wide variety of other representations, such as compliance with rules and regulations of government agencies, sales statistics under lease and royalty agreements, and adherence to covenants in indentures. [Revised, July 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 58.]
- .09** The audit of financial statements requires CPAs to review many aspects of an organization's activities and procedures. Consequently they can advise clients of needed improvements in internal control and make constructive suggestions on financial, tax, and other operating matters. [Revised, July 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 58.]

.10 In addition to furnishing advice in conjunction with their independent audits of financial statements, CPAs are engaged to provide objective advice and consultation on various management problems. Many of these involve information and control systems and techniques, such as budgeting, cost control, profit planning, internal reporting, automatic data processing, and quantitative analysis. CPAs also assist in the development and implementation of programs approved by management. [Revised, July 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 58.]

.11 Among the major management problems depending on the accounting function is compliance with tax requirements. An important part of the practice of CPAs includes tax planning and advice, preparation of tax returns, and representation of clients before government agencies.

.12 CPAs also participate in conferences with government agencies such as the Securities and Exchange Commission, and with other interested parties, such as bankers.

.13 Like other professionals, CPAs are often consulted on business, civic, and other problems on which their judgment, experience, and professional standards permit them to provide helpful advice and assistance.

.14 The complexities of an industrial society encourage a high degree of specialization in all professions. The accounting profession is no exception. Its scope is so wide and varied that many individual CPAs choose to specialize in particular types of service.

.15 Although their activities may be diverse, all CPAs have demonstrated basic competence of professional quality in the discipline of accounting. It is this which unites them as members of one profession, and provides a foundation for extension of their services into new areas.

Valuation of a Business, Business Ownership Interest, Security, or Intangible Asset

Source: Statement on Standards for Valuation Services No. 1

June 2007

Foreword

Why Issued

Valuations of businesses, business ownership interests, securities, or intangible assets (hereinafter collectively referred to in this Foreword as *business valuations*) may be performed for a wide variety of purposes including the following:

1. Transactions (or potential transactions), such as acquisitions, mergers, leveraged buyouts, initial public offerings, employee stock ownership plans and other share based plans, partner and shareholder buy-ins or buyouts, and stock redemptions
2. Litigation (or pending litigation) relating to matters such as marital dissolution, bankruptcy, contractual disputes, owner disputes, dissenting shareholder and minority ownership oppression cases, and employment and intellectual property disputes
3. Compliance-oriented engagements, including (a) financial reporting and (b) tax matters such as corporate reorganizations; S corporation conversions; income, estate, and gift tax compliance; purchase price allocations; and charitable contributions
4. Planning oriented engagements for income tax, estate tax, gift tax, mergers and acquisitions, and personal financial planning

In recent years, the need for business valuations has increased significantly. Performing an engagement to estimate value involves special knowledge and skill.

Given the increasing number of members of the AICPA who are performing business valuation engagements or some aspect thereof, the AICPA Consulting Services Executive Committee has written this standard to improve the consistency and quality of practice among AICPA members performing business valuations. AICPA members will be required to follow this standard when they perform engagements to estimate value that culminate in the expression of a conclusion of value or a calculated value.

The Consulting Services Executive Committee is a body designated by AICPA Council to promulgate professional standards under the "General Standards Rule" (ET sec. 1.300.001 and 2.300.001) and the "Compliance with Standards Rule" (ET sec. 1.310.001 and 2.310.001) of the AICPA Code of Professional Conduct (the code).

Introduction and Scope

.01 This statement establishes standards for AICPA members (hereinafter referred to in this statement as *members*) who are engaged to, or, as part of

another engagement, estimate the value of a **business**,¹ *business ownership interest, security, or intangible asset* (hereinafter collectively referred to in this statement as **subject interest**). For purposes of this statement, the definition of a business includes not-for-profit entities or activities.

.02 As described in this statement, the term **engagement to estimate value** refers to an engagement or any part of an engagement (for example, a tax, litigation, or acquisition-related engagement) that involves estimating the value of a subject interest. An engagement to estimate value culminates in the expression of either a **conclusion of value** or a **calculated value** (see paragraph .21). A member who performs an engagement to estimate value is referred to, in this statement, as a **valuation analyst**.

.03 Valuation analysts should be aware of any governmental regulations and other professional standards applicable to the engagement, including the code and the Statement on Standards for Consulting Services (SSCS) No. 1, *Consulting Services: Definitions and Standards* (CS sec. 100), and the extent to which they apply to engagements to estimate value. Compliance is the responsibility of the valuation analyst.

.04 In the process of estimating value as part of an engagement, the valuation analyst applies **valuation approaches** and **valuation methods**, as described in this statement, and uses professional judgment. The use of professional judgment is an essential component of estimating value.

Exceptions From This Statement

.05 This statement is not applicable to a member who participates in estimating the value of a subject interest as part of performing an attest engagement defined by the "Independence Rule" of the code (ET sec. 1.200.001) (for example, as part of an audit, review, or compilation engagement).

.06 This statement is not applicable when the value of a subject interest is provided to the member by the client or a third party, and the member does not apply valuation approaches and methods, as discussed in this statement.

.07 This statement is not applicable to internal use assignments from employers to employee members not in public practice, as that term is defined in the code (ET sec. 0.400.42). See also Valuation Interpretation No. 1, "Scope of Applicable Services" (VS sec. 9100), illustrations 24 and 25 (VS sec. 9100 par. .78–.81).

.08 This statement is not applicable to engagements that are exclusively for the purpose of determining economic damages (for example, lost profits) unless those determinations include an engagement to estimate value. See also Interpretation No. 1, illustrations 1, 2, and 3 (VS sec. 9100 par. .06–.11).

.09 This statement is not applicable to mechanical computations that do not rise to the level of an engagement to estimate value; that is, when the member does not apply valuation approaches and methods and does not use professional judgment. See Interpretation No. 1, illustration 8 (VS sec. 9100 par. .20–.23).

¹ This statement includes two glossaries. Appendix B, "International Glossary of Business Valuation Terms" (par. .81), is a verbatim reproduction of the glossary jointly developed by the AICPA, the American Society of Appraisers (ASA), the Canadian Institute of Chartered Business Valuators, the National Association of Certified Valuation Analysts, and the Institute of Business Appraisers. Appendix C, "Glossary of Additional Terms" (par. .82), provides definitions for terms included in this statement but not defined in the jointly developed glossary. The terms defined in appendix B are in boldface type the first time they appear in this statement; the terms defined in appendix C are in italicized boldface type the first time they appear in this statement.

This statement is not applicable when it is not practical or not reasonable to obtain or use relevant information; as a result, the member is unable to apply valuation approaches and methods that are described in this statement.²

Jurisdictional Exception

.10 If any part of this statement differs from published governmental, judicial, or accounting authority, or such authority specifies valuation development procedures or valuation reporting procedures, then the valuation analyst should follow the applicable published authority or stated procedures with respect to that part applicable to the valuation in which the member is engaged. The other parts of this statement continue in full force and effect (Interpretation No. 1 [VS sec. 9100 par. .01–.89]).

Overall Engagement Considerations

Professional Competence

.11 The "General Standards Rule" of the code (ET sec. 1.300.001 and 2.300.001) states that a member shall "undertake only those *professional services* that the *member* or the *member's firm* can reasonably expect to be completed with professional competence." Performing a valuation engagement with professional competence involves special knowledge and skill. A valuation analyst should possess a level of knowledge of valuation principles and theory and a level of skill in the application of such principles that will enable him or her to identify, gather, and analyze data, consider and apply appropriate valuation approaches and methods, and use professional judgment in developing the estimate of value (whether a single amount or a range). An in-depth discussion of valuation theory and principles, and how and when to apply them, is not within the scope of this statement.

.12 In determining whether he or she can reasonably expect to complete the valuation engagement with professional competence, the valuation analyst should consider, at a minimum, the following:

- a. Subject entity and its industry
- b. Subject interest
- c. **Valuation date**
- d. Scope of the valuation engagement
 - i. Purpose of the valuation engagement
 - ii. **Assumptions and limiting conditions** expected to apply to the valuation engagement (see paragraph .18)
 - iii. Applicable **standard of value** (for example, ***fair value*** or ***fair market value***) and the applicable **premise of value** (for example, going concern)
 - iv. Type of valuation report to be issued (see paragraph .48), intended use and users of the report, and restrictions on the use of the report
- e. Governmental regulations or other professional standards that apply to the subject interest or to the valuation engagement

² Unless prohibited by statute or by rule, a member may use the client's estimates for compliance reporting to a third party if the member determines that the estimates are reasonable (based on the facts and circumstances known to the member). See Interpretation No. 1, "Scope of Applicable Services" (VS sec. 9100 par. .01–.89), and Statement for Standards on Tax Services No. 4, *Use of Estimates* (TS sec. 400).

Nature and Risks of the Valuation Services and Expectations of the Client

.13 In understanding the nature and risks of the **valuation services** to be provided, and the expectations of the client, the valuation analyst should consider the matters in paragraph .12, and in addition, at a minimum, the following:

- a. The proposed terms of the valuation engagement
- b. The identity of the client
- c. The nature of the interest and ownership rights in the business, business interest, security, or intangible asset being valued, including **control** characteristics and the degree of **marketability** of the interest
- d. The procedural requirements of a valuation engagement and the extent, if any, to which procedures will be limited by either the client or circumstances beyond the client's or the valuation analyst's control
- e. The use of and limitations of the report, and the conclusion or calculated value
- f. Any obligation to update the valuation

Objectivity and Conflict of Interest

.14 The code requires objectivity in the performance of all professional services, including valuation engagements. Objectivity is a state of mind. The principle of objectivity imposes the obligation to be impartial, intellectually honest, disinterested, and free from conflicts of interest. Where a potential conflict of interest may exist, a valuation analyst should make the disclosures and obtain consent as required by the "Conflicts of Interest" interpretation (ET sec. 1.110.010 and 2.110.010) under the "Integrity and Objectivity Rule" (ET sec. 1.100.001 and 2.100.001).

Independence and Valuation

.15 If valuation services are performed for a client for which the valuation analyst or valuation analyst's firm also performs an attest engagement (defined by the "Independence Rule" of the code), the valuation analyst should meet the requirements included in the interpretations of the "Nonattest Services" subtopic (ET sec. 1.295) under the "Independence Rule" (ET sec. 1.200.001) so as not to impair the member's independence with respect to the client.

Establishing an Understanding With the Client

.16 The valuation analyst should establish an understanding with the client, preferably in writing, regarding the engagement to be performed. If the understanding is oral, the valuation analyst should document that understanding by appropriate memoranda or notations in the working papers. (If the engagement is being performed for an attest client, the "General Requirements for Performing Nonattest Services" interpretation [ET sec. 1.295.040] of the "Independence Rule" [ET sec. 1.200.001] requires the engagement understanding to be in writing.) Regardless of whether the understanding is written or oral, the valuation analyst should modify the understanding if he or she encounters circumstances during the engagement that make it appropriate to modify that understanding.

.17 The understanding with the client reduces the possibility that either the valuation analyst or the client may misinterpret the needs or expectations of the other party. The understanding should include, at a minimum, the nature,

purpose, and objective of the valuation engagement, the client's responsibilities, the valuation analyst's responsibilities, the applicable assumptions and limiting conditions, the type of report to be issued, and the standard of value to be used.

Assumptions and Limiting Conditions

.18 Assumptions and limiting conditions are common to valuation engagements. Examples of typical assumptions and limiting conditions for a business valuation are provided in appendix A, "Illustrative List of Assumptions and Limiting Conditions for a Business Valuation" (par. .80). The assumptions and limiting conditions should be disclosed in the valuation report (see paragraphs .52*l*, .68*g*, and .71*m*).

Scope Restrictions or Limitations

.19 A restriction or limitation on the scope of the valuation analyst's work, or the data available for analysis, may be present and known to the valuation analyst at the outset of the valuation engagement or may arise during the course of a valuation engagement. Such a restriction or limitation should be disclosed in the valuation report (see paragraphs .52*m*, .68*e*, and .71*n*).

Using the Work of Specialists in the Engagement to Estimate Value

.20 In performing an engagement to estimate value, the valuation analyst may rely on the work of a third party specialist (for example, a real estate or equipment appraiser). The valuation analyst should note in the assumptions and limiting conditions the level of responsibility, if any, being assumed by the valuation analyst for the work of the third party specialist. At the option of the valuation analyst, the written report of the third party specialist may be included in the valuation analyst's report.

Development

Types of Engagement

.21 There are two types of engagements to estimate value—a ***valuation engagement*** and a ***calculation engagement***. The valuation engagement requires more procedures than does the calculation engagement. The valuation engagement results in a conclusion of value. The calculation engagement results in a calculated value. The type of engagement is established in the understanding with the client (see paragraphs .16 and .17):

- a. *Valuation engagement.* A valuation analyst performs a valuation engagement when (1) the engagement calls for the valuation analyst to estimate the value of a subject interest and (2) the valuation analyst estimates the value (as outlined in paragraphs .23–.45) and is free to apply the valuation approaches and methods he or she deems appropriate in the circumstances. The valuation analyst expresses the results of the valuation as a conclusion of value; the conclusion may be either a single amount or a range.
- b. *Calculation engagement.* A valuation analyst performs a calculation engagement when (1) the valuation analyst and the client agree on the valuation approaches and methods the valuation analyst will use and the extent of procedures the valuation analyst will perform in the

process of calculating the value of a subject interest (these procedures will be more limited than those of a valuation engagement) and (2) the valuation analyst calculates the value in compliance with the agreement. The valuation analyst expresses the results of these procedures as a calculated value. The calculated value is expressed as a range or as a single amount. A calculation engagement does not include all of the procedures required for a valuation engagement (see paragraph .46).

Hypothetical Conditions

.22 Hypothetical conditions affecting the subject interest may be required in some circumstances. When a valuation analyst uses hypothetical conditions during a valuation or calculation engagement, he or she should indicate the purpose for including the hypothetical conditions and disclose these conditions in the valuation or calculation report (see paragraphs .52*n*, .71*o*, and .74).

Valuation Engagement

.23 In performing a valuation engagement, the valuation analyst should do the following:

- Analyze the subject interest (paragraphs .25–.30)
- Consider and apply appropriate valuation approaches and methods (paragraphs .31–.42)
- Prepare and maintain appropriate documentation (paragraphs .44–.45)

.24 Even though the list in paragraph .23 and some requirements and guidance in this statement are presented in a manner that suggests a sequential valuation process, valuations involve an ongoing process of gathering, updating, and analyzing information. Accordingly, the sequence of the requirements and guidance in this statement may be implemented differently at the option of the valuation analyst.

Analysis of the Subject Interest

.25 The analysis of the subject interest will assist the valuation analyst in considering, evaluating, and applying the various valuation approaches and methods to the subject interest. The nature and extent of the information needed to perform the analysis will depend on, at a minimum, the following:

- Nature of the subject interest
- Scope of the valuation engagement
- Valuation date
- Intended use of the valuation
- Applicable standard of value
- Applicable **premise of value**
- Assumptions and limiting conditions
- Applicable governmental regulations or other professional standards

.26 In analyzing the subject interest, the valuation analyst should consider financial and nonfinancial information. The type, availability, and significance of such information vary with the subject interest.

Nonfinancial Information

.27 The valuation analyst should, as available and applicable to the valuation engagement, obtain sufficient nonfinancial information to enable him or her to understand the subject entity, including the following:

- Nature, background, and history
- Facilities
- Organizational structure
- Management team (which may include officers, directors, and key employees)
- Classes of **equity** ownership interests and rights attached thereto
- Products or services, or both
- Economic environment
- Geographical markets
- Industry markets
- Key customers and suppliers
- Competition
- **Business risks**
- Strategy and future plans
- Governmental or regulatory environment

Ownership Information

.28 The valuation analyst should obtain, where applicable and available, ownership information regarding the subject interest to enable him or her to

- determine the type of ownership interest being valued and ascertain whether that interest exhibits control characteristics.
- analyze the different ownership interests of other owners and assess the potential effect on the value of the subject interest.
- understand the classes of equity ownership interests and rights attached thereto.
- understand the rights included in, or excluded from, each intangible asset.
- understand other matters that may affect the value of the subject interest, such as the following:
 - *For a business, business ownership interest, or security:* Shareholder agreements, partnership agreements, operating agreements, voting trust agreements, buy-sell agreements, loan covenants, restrictions, and other contractual obligations or restrictions affecting the owners and the subject interest.
 - *For an intangible asset:* Legal rights, licensing agreements, sublicense agreements, nondisclosure agreements, development rights, commercialization or exploitation rights, and other contractual obligations.

Financial Information

.29 The valuation analyst should obtain, where applicable and available, financial information on the subject entity such as the following:

- Historical financial information (including annual and interim financial statements and key financial statement ratios and statistics) for an appropriate number of years
- Prospective financial information (for example, budgets, forecasts, and projections)
- Comparative summaries of financial statements or information covering a relevant time period
- Comparative common size financial statements for the subject entity for an appropriate number of years
- Comparative common size industry financial information for a relevant time period
- Income tax returns for an appropriate number of years
- Information on compensation for owners including benefits and personal expenses
- Information on key man or officers' life insurance
- Management's response to inquiry regarding the following:
 - Advantageous or disadvantageous contracts
 - Contingent or off-balance-sheet assets or liabilities
 - Information on prior sales of company stock

.30 The valuation analyst should read and evaluate the information to determine that it is reasonable for the purposes of the engagement.

Valuation Approaches and Methods

.31 In developing the valuation, the valuation analyst should consider the three most common valuation approaches:

- **Income (income-based) approach**
- **Asset (asset-based) approach** (used for businesses, business ownership interests, and securities) or **cost approach** (used for intangible assets)
- **Market (market-based) approach**

.32 The valuation analyst should use the valuation approaches and methods that are appropriate for the valuation engagement. General guidance on the use of approaches and methods appears in paragraphs .33–.41, but detailed guidance on specific valuation approaches and methods and their applicability is outside the scope of this statement.

.33 *Income Approach.* Two frequently used valuation methods under the income approach include the **capitalization of benefits method** (for example, earnings or cash flows) and the **discounted future benefits method** (for example, earnings or cash flows). When applying these methods, the valuation analyst should consider a variety of factors, including but not limited to, the following:

- a. *Capitalization of benefits (for example, earnings or cash flows) method.* The valuation analyst should consider the following:
 - i. **Normalization** adjustments
 - ii. Nonrecurring revenue and expense items
 - iii. Taxes
 - iv. Capital structure and financing costs

- v. Appropriate capital investments
 - vi. Noncash items
 - vii. Qualitative judgments for risks used to compute discount and **capitalization rates**
 - viii. Expected changes (growth or decline) in future benefits (for example, earnings or cash flows)
- b. *Discounted future benefits method (for example, earnings or cash flows).* In addition to the items in item a, the valuation analyst should consider the following:
- i. Forecast or projection assumptions
 - ii. Forecast or projected earnings or cash flows
 - iii. **Terminal value**
- c. For an intangible asset, the valuation analyst should also consider, when relevant, the following:
- i. Remaining useful life
 - ii. Current and anticipated future use of the intangible asset
 - iii. Rights attributable to the intangible asset
 - iv. Position of intangible asset in its life cycle
 - v. Appropriate discount rate for the intangible asset
 - vi. Appropriate **capital or contributory asset charge**, if any
 - vii. Research and development or marketing expense needed to support the intangible asset in its existing state
 - viii. Allocation of income (for example, **incremental income, residual income, or profit split income**) to intangible asset
 - ix. Whether any tax amortization benefit would be included in the analysis
 - x. Discounted multi-year excess earnings
 - xi. Market royalties
 - xii. Relief from royalty

Asset Approach and Cost Approach

.34 A frequently used method under the asset approach is the adjusted net asset method. When using the adjusted net asset method in valuing a business, business ownership interest, or security, the valuation analyst should consider, as appropriate, the following information related to the premise of value:

- Identification of the assets and liabilities
- Value of the assets and liabilities (individually or in the aggregate)
- Liquidation costs (if applicable)

.35 When using methods under the cost approach to value intangible assets, the valuation analyst should consider the type of cost to be used (for example, reproduction cost or replacement cost), and, where applicable, the appropriate forms of depreciation and obsolescence and the remaining useful life of the intangible asset.

Market Approach

.36 Three frequently used valuation methods under the market approach for valuing a business, business ownership interest, or security are as follows:

- **Guideline public company method**
- **Guideline company transactions method**
- Guideline sales of interests in the subject entity, such as business ownership interests or securities

Three frequently used market approach valuation methods for intangible assets are as follows:

- Comparable uncontrolled transactions method (which is based on arm's-length sales or licenses of guideline intangible assets)
- Comparable profit margin method (which is based on comparison of the profit margin earned by the subject entity that owns or operates the intangible asset to profit margins earned by guideline companies)
- **Relief from royalty method** (which is based on the royalty rate, often expressed as a percentage of revenue that the subject entity that owns or operates the intangible asset would be obligated to pay to a hypothetical third-party licensor for the use of that intangible asset)

For the methods involving guideline intangible assets (for example, the comparable profit margin method), the valuation analyst should consider the subject intangible asset's remaining useful life relative to the remaining useful life of the guideline intangible assets, if available.

.37 In applying the methods listed in paragraph .36 or other methods to determine valuation pricing multiples or metrics, the valuation analyst should consider the following:

- Qualitative and quantitative comparisons
- Arm's-length transactions and prices
- The dates and, consequently, the relevance of the market data

.38 The valuation analyst should set forth in the report the rationale and support for the valuation methods used (see paragraph .47).

.39 *Rules of Thumb*. Although technically not a valuation method, some valuation analysts use rules of thumb or industry benchmark indicators (hereinafter, collectively referred to as **rules of thumb**) in a valuation engagement. A rule of thumb is typically a reasonableness check against other methods used and should generally not be used as the only method to estimate the value of the subject interest.

Valuation Adjustments

.40 During the course of a valuation engagement, the valuation analyst should consider whether valuation adjustments (discounts or premiums) should be made to a **pre-adjustment** value. Examples of valuation adjustments for valuation of a business, business ownership interest, or security include a **discount for lack of marketability or liquidity** and a **discount for lack of control**. An example of a valuation adjustment for valuation of an intangible asset is obsolescence.

.41 When valuing a controlling ownership interest under the income approach, the value of any **non-operating assets**, non-operating liabilities, or **excess or deficient operating assets** should be excluded from the computation of the value based on the operating assets and should be added to or deleted

from the value of the operating entity. When valuing a non-controlling ownership interest under the income approach, the value of any non-operating assets, non-operating liabilities, or excess or deficient operating assets may or may not be used to adjust the value of the operating entity depending on the valuation analyst's assessment of the influence exercisable by the non-controlling interest. In the asset-based or cost approach, it may not be necessary to separately consider non-operating assets, non-operating liabilities, or excess or deficient operating assets.

Conclusion of Value

- .42** In arriving at a conclusion of value, the valuation analyst should
- a.* correlate and reconcile the results obtained under the different approaches and methods used.
 - b.* assess the reliability of the results under the different approaches and methods using the information gathered during the valuation engagement.
 - c.* determine, based on items *a* and *b*, whether the conclusion of value should reflect
 - i.* the results of one valuation approach and method, or
 - ii.* a combination of the results of more than one valuation approach and method.

Subsequent Events

.43 The valuation date is the specific date at which the valuation analyst estimates the value of the subject interest and concludes on his or her estimation of value. Generally, the valuation analyst should consider only circumstances existing at the valuation date and events occurring up to the valuation date. An event that could affect the value may occur subsequent to the valuation date; such an occurrence is referred to as a **subsequent event**. Subsequent events are indicative of conditions that were not known or knowable at the valuation date, including conditions that arose subsequent to the valuation date. The valuation would not be updated to reflect those events or conditions. Moreover, the valuation report would typically not include a discussion of those events or conditions because a valuation is performed as of a point in time—the valuation date—and the events described in this subparagraph, occurring subsequent to that date, are not relevant to the value determined as of that date. In situations in which a valuation is meaningful to the intended user beyond the valuation date, the events may be of such nature and significance as to warrant disclosure (at the option of the valuation analyst) in a separate section of the report in order to keep users informed (see paragraphs .52p, .71r, and .74). Such disclosure should clearly indicate that information regarding the events is provided for informational purposes only and does not affect the determination of value as of the specified valuation date.

Documentation

.44 Documentation is the principal record of information obtained and analyzed, procedures performed, valuation approaches and methods considered and used, and the conclusion of value. The quantity, type, and content of documentation are matters of the valuation analyst's professional judgment. Documentation may include the following:

- Information gathered and analyzed to obtain an understanding of matters that may affect the value of the subject interest (paragraphs .25–.30)

- Assumptions and limiting conditions (paragraph .18)
- Any restriction or limitation on the scope of the valuation analyst's work or the data available for analysis (paragraph .19)
- Basis for using any **valuation assumption** during the valuation engagement
- Valuation approaches and methods considered
- Valuation approaches and methods used including the rationale and support for their use
- If applicable, information relating to subsequent events considered by the valuation analyst (paragraph .43)
- For any rule of thumb used in the valuation, source(s) of data used, and how the rule of thumb was applied (paragraph .39)
- Other documentation considered relevant to the engagement by the valuation analyst

.45 The valuation analyst should retain the documentation for a period of time sufficient to meet the needs of applicable legal, regulatory, or other professional requirements for records retention.

Calculation Engagement

.46 In performing a calculation engagement, the valuation analyst should consider, at a minimum, the following:

- a. Identity of the client
- b. Identity of the subject interest
- c. Whether or not a business interest has ownership control characteristics and its degree of marketability
- d. Purpose and intended use of the calculated value
- e. Intended users of the report and the limitations on its use
- f. Valuation date
- g. Applicable premise of value
- h. Applicable standard of value
- i. Sources of information used in the calculation engagement
- j. Valuation approaches or valuation methods agreed upon with the client
- k. Subsequent events, if applicable (see paragraph .43)

In addition, the valuation analyst should comply with the documentation requirements listed in paragraphs .44 and .45. The quantity, type, and content of documentation are matters of the valuation analyst's professional judgment.

The Valuation Report

.47 A valuation report is a written or oral communication to the client containing the conclusion of value or the calculated value of the subject interest. Reports issued for purposes of certain controversy proceedings are exempt from this reporting standard (see paragraph .50).

.48 The three types of written reports that a valuation analyst may use to communicate the results of an engagement to estimate value are as follows:

either a detailed report or a summary report for a valuation engagement and a calculation report for a calculation engagement:

- a. *Valuation engagement—detailed report.* This report may be used only to communicate the results of a valuation engagement (conclusion of value); it should not be used to communicate the results of a calculation engagement (calculated value) (paragraph .51).
- b. *Valuation engagement—summary report.* This report may be used only to communicate the results of a valuation engagement (conclusion of value); it should not be used to communicate the results of a calculation engagement (calculated value) (paragraph .71). For a valuation engagement, the determination of whether to prepare a detailed report or a summary report is based on the level of reporting detail agreed to by the valuation analyst and the client.
- c. *Calculation engagement—calculation report.* This type of report should be used only to communicate the results of a calculation engagement (calculated value); it should not be used to communicate the results of a valuation engagement (conclusion of value) (see paragraph .73).

.49 The valuation analyst should indicate in the valuation report the restrictions on the use of the report (which may include restrictions on the users of the report, the uses of the report by such users, or both) (paragraph .65d).

Reporting Exemption for Certain Controversy Proceedings

.50 A valuation performed for a matter before a court, an arbitrator, a mediator or other facilitator, or a matter in a governmental or administrative proceeding, is exempt from the reporting provisions of this statement. The reporting exemption applies whether the matter proceeds to trial or settles. The exemption applies only to the reporting provisions of this statement (see paragraphs .47–.49 and .51–.78). The developmental provisions of the statement (see paragraphs .21–.46) still apply whenever the valuation analyst expresses a conclusion of value or a calculated value (Interpretation No. 1 [VS sec. 9100 par. .01–.89]).

Detailed Report

.51 The *detailed report* is structured to provide sufficient information to permit intended users to understand the data, reasoning, and analyses underlying the valuation analyst's conclusion of value. A detailed report should include, as applicable, the following sections titled using wording similar in content to that shown:

- Letter of transmittal
- Table of contents
- Introduction
- Sources of information
- Analysis of the subject entity and related nonfinancial information
- Financial statement or financial information analysis
- Valuation approaches and methods considered
- Valuation approaches and methods used
- Valuation adjustments

- Non-operating assets, non-operating liabilities, and excess or deficient operating assets (if any)
- Representation of the valuation analyst
- Reconciliation of estimates and conclusion of value
- Qualifications of the valuation analyst
- Appendixes and exhibits

The report sections previously listed and the detailed information within the sections described in the following paragraphs .52–.77 may be positioned in the body of the report or elsewhere in the report at the discretion of the valuation analyst.

Introduction

.52 This section should provide an overall description of the valuation engagement. The information in the section should be sufficient to enable the intended user of the report to understand the nature and scope of the valuation engagement, as well as the work performed. The introduction section may include, among other things, the following information:

- a.* Identity of the client
- b.* Purpose and intended use of the valuation
- c.* Intended users of the valuation
- d.* Identity of the subject entity
- e.* Description of the subject interest
- f.* Whether the business interest has ownership control characteristics and its degree of marketability
- g.* Valuation date
- h.* Report date
- i.* Type of report issued (namely, a detailed report) (paragraph .51)
- j.* Applicable premise of value
- k.* Applicable standard of value
- l.* Assumptions and limiting conditions (alternatively, these often appear in an appendix) (paragraph .18)
- m.* Any restrictions or limitations in the scope of work or data available for analysis (paragraph .19)
- n.* Any hypothetical conditions used in the valuation engagement, including the basis for their use (paragraph .22)
- o.* If the work of a specialist was used in the valuation engagement, a description of how the specialist's work was relied upon (paragraph .20)
- p.* Disclosure of subsequent events in certain circumstances (paragraph .43)
- q.* Any application of the jurisdictional exception (paragraph .10)
- r.* Any additional information the valuation analyst deems useful to enable the user(s) of the report to understand the work performed

If the items previously listed are not included in the introduction, they should be included elsewhere in the valuation report.

Sources of Information

.53 This section of the report should identify the relevant sources of information used in performing the valuation engagement. It may include, among other things, the following:

- a. For valuation of a business, business ownership interest, or security, whether and to what extent the subject entity's facilities were visited
- b. For valuation of an intangible asset, whether the legal registration, contractual documentation, or other tangible evidence of the asset was inspected
- c. Names, positions, and titles of persons interviewed and their relationships to the subject interest
- d. Financial information (paragraphs .54 and .56)
- e. Tax information (paragraph .55)
- f. Industry data
- g. Market data
- h. Economic data
- i. Other empirical information
- j. Relevant documents and other sources of information provided by or related to the entity

.54 If the financial information includes financial statements that were reported on (audit, review, compilation, or attest engagement performed under the Statements on Standards for Attestation Engagements [SSAEs] [AT sec. 20–701]) by the valuation analyst's firm, the valuation report should disclose this fact and the type of report issued. If the valuation analyst or the valuation analyst's firm did not audit, review, compile, or attest under the SSAEs (AT sec. 20–701) to the financial information, the valuation analyst should so state and should also state that the valuation analyst assumes no responsibility for the financial information.

.55 The financial information may be derived from or may include information derived from tax returns. With regard to such derived information and other tax information (see paragraph .53e), the valuation analyst should identify the tax returns used and any existing relationship between the valuation analyst and the tax preparer. If the valuation analyst or the valuation analyst's firm did not audit, review, compile, or attest under the SSAEs (AT sec. 20–701) to any financial information derived from tax returns that is used during the valuation engagement, the valuation analyst should so state and should also state that the valuation analyst assumes no responsibility for that derived information.

.56 If the financial information used was derived from financial statements prepared by management that were not the subject of an audit, review, compilation, or attest engagement performed under the SSAEs, the valuation report should do the following:

- Identify the financial statements
- State that, as part of the valuation engagement, the valuation analyst did not audit, review, compile, or attest under the SSAEs (AT sec. 20–710) to the financial information and assumes no responsibility for that information

Analysis of the Subject Entity and Related Nonfinancial Information

.57 The valuation analyst should include a description of the relevant non-financial information listed and discussed in paragraph .27.

Financial Statement or Financial Information Analysis

.58 This section should include a description of the relevant information listed in paragraph .29. Such description may include the following:

- a. The rationale underlying any normalization or **control adjustments** to financial information
- b. Comparison of current performance with historical performance
- c. Comparison of performance with industry trends and norms, where available

Valuation Approaches and Methods Considered

.59 This section should state that the valuation analyst has considered the valuation approaches discussed in paragraph .31.

Valuation Approaches and Methods Used

.60 In this section, the valuation analyst should identify the valuation methods used under each valuation approach and the rationale for their use.

.61 This section should also identify the following for each of the three approaches (if used):

- a. Income approach:
 - Composition of the representative benefit stream
 - Method(s) used, and a summary of the most relevant risk factors considered in selecting the appropriate **discount rate**, the capitalization rate, or both
 - Other factors as discussed in paragraph .33
- b. Asset-based approach or cost approach:
 - *Asset-based approach*. Any adjustments made by the valuation analyst to the relevant balance sheet data
 - *Cost approach*. The type of cost used, how this cost was estimated, and, if applicable, the forms of and costs associated with depreciation and obsolescence used under the approach and how those costs were estimated
- c. Market approach:
 - For the guideline public company method:
 - The selected guideline companies and the process used in their selection
 - The pricing multiples used, how they were used, and the rationale for their selection. If the pricing multiples were adjusted, the rationale for such adjustments
 - For the guideline company transactions method, the sales transactions and pricing multiples used, how they were used, and the rationale for their selection; if the pricing multiples were adjusted, the rationale for such adjustments

- For the guideline sales of interests in the subject entity method, the sales transactions used, how they were used, and the rationale for determining that these sales are representative of arm's length transactions

.62 When a rule of thumb is used in combination with other methods, the valuation report should disclose the source(s) of data used and how the rule of thumb was applied (see paragraph .39).

Valuation Adjustments

.63 This section should (a) identify each valuation adjustment considered and determined to be applicable, for example, discount for lack of marketability, (b) describe the rationale for using the adjustment and the factors considered in selecting the amount or percentage used, and (c) describe the pre-adjustment value to which the adjustment was applied (see paragraph .40).

Non-Operating Assets and Excess Operating Assets

.64 When the subject interest is a business, business ownership interest, or security, the valuation report should identify any related non-operating assets, non-operating liabilities, or excess or deficient operating assets and their effect on the valuation (see paragraph .41).

Representation of the Valuation Analyst

.65 Each written report should contain the representation of the valuation analyst. The representation is the section of the report wherein the valuation analyst summarizes the factors that guided his or her work during the engagement. Examples of these factors include the following:

- a. The analyses and conclusion of value included in the valuation report are subject to the specified assumptions and limiting conditions (see paragraph .18), and they are the personal analyses and conclusion of value of the valuation analyst.
- b. The economic and industry data included in the valuation report have been obtained from various printed or electronic reference sources that the valuation analyst believes to be reliable (any exceptions should be noted). The valuation analyst has not performed any corroborating procedures to substantiate that data.
- c. The valuation engagement was performed in accordance with the American Institute of Certified Public Accountants Statement on Standards for Valuation Services.
- d. The parties for which the information and use of the valuation report is restricted are identified; the valuation report is not intended to be and should not be used by anyone other than such parties (see paragraph .49).
- e. The analyst's compensation is fee-based or is contingent on the outcome of the valuation.
- f. The valuation analyst used the work of one or more outside specialists to assist during the valuation engagement. (An outside specialist is a specialist other than those employed in the valuation analyst's firm.) If the work of such a specialist was used, the specialist should be identified. The valuation report should include a statement identifying the level of responsibility, if any, the valuation analyst is assuming for the specialist's work.

- g. The valuation analyst has no obligation to update the report or the conclusion of value for information that comes to his or her attention after the date of the report.
- h. The valuation analyst and, if applicable, the person(s) assuming responsibility for the valuation should sign the representation in their own name(s). The names of those providing significant professional assistance should be identified.

Representations Regarding Information Provided to the Valuation Analyst

.66 It may be appropriate for the valuation analyst to obtain written representations regarding information that the subject entity's management provides to the valuation analyst for purposes of his or her performing the valuation engagement. The decision whether to obtain a representation letter is a matter of judgment for the valuation analyst.

Qualifications of the Valuation Analyst

.67 The report should contain information regarding the qualifications of the valuation analyst.

Conclusion of Value

.68 This section should present a reconciliation of the valuation analyst's estimate or various estimates of the value of the subject interest. In addition to a discussion of the rationale underlying the conclusion of value, this section should include the following or similar statements:

- a. A valuation engagement was performed, including the subject interest and the valuation date.
- b. The analysis was performed solely for the purpose described in this report, and the resulting estimate of value should not be used for any other purpose.
- c. The valuation engagement was conducted in accordance with the Statement(s) on Standards for Valuation Services of the American Institute of Certified Public Accountants.
- d. A statement that the estimate of value resulting from a valuation engagement is expressed as a conclusion of value.
- e. The scope of work or data available for analysis is explained, including any restrictions or limitations (see paragraph .19).
- f. A statement describing the conclusion of value, either a single amount or a range.
- g. The conclusion of value is subject to the assumptions and limiting conditions (see paragraph .18) and to the valuation analyst's representation (see paragraph .65).
- h. The report is signed in the name of the valuation analyst or the valuation analyst's firm.
- i. The date of the valuation report is included.
- j. The valuation analyst has no obligation to update the report or the conclusion of value for information that comes to his or her attention after the date of the report.

.69 The following is an example of report language that could be used, but is not required, when reporting the results of a valuation engagement:

We have performed a *valuation engagement*, as that term is defined in the Statement on Standards for Valuation Services (SSVS) of the American Institute of

Certified Public Accountants, of [DEF Company, GHI business ownership interest of DEF Company, GHI security of DEF Company, or GHI intangible asset of DEF Company] as of [valuation date]. This valuation was performed solely to assist in the matter of [purpose of the valuation]; the resulting estimate of value should not be used for any other purpose or by any other party for any purpose. This valuation engagement was conducted in accordance with the SSVS. The estimate of value that results from a valuation engagement is expressed as a conclusion of value.

[If applicable] We were restricted or limited in the scope of our work or data available for analysis as follows: [describe restrictions or limitations].

Based on our analysis, as described in this valuation report, the estimate of value of [DEF Company, GHI business ownership interest of DEF Company, GHI security of DEF Company, or GHI intangible asset of DEF Company] as of [valuation date] was [value, either a single amount or a range]. This conclusion is subject to the Statement of Assumptions and Limiting Conditions found in [reference to applicable section of valuation report] and to the Valuation Analyst's Representation found in [reference to applicable section of valuation report]. We have no obligation to update this report or our conclusion of value for information that comes to our attention after the date of this report.

[Date]

Appendixes and Exhibits

.70 Appendixes or exhibits may be used for required information or information that supplements the detailed report. Often, the assumptions and limiting conditions and the valuation analyst's representation are provided in appendixes to the detailed report.

Summary Report

.71 A summary report is structured to provide an abridged version of the information that would be provided in a detailed report, and therefore, need not contain the same level of detail as a detailed report. However, a summary report should, at a minimum, include the following:

- a. Identity of the client
- b. Purpose and intended use of the valuation
- c. Intended users of the valuation
- d. Identity of the subject entity
- e. Description of the subject interest
- f. The business interest's ownership control characteristics, if any, and its degree of marketability
- g. Valuation date
- h. Valuation report date
- i. Type of report issued (namely, a summary report) (paragraph .48)
- j. Applicable premise of value
- k. Applicable standard of value
- l. Sources of information used in the valuation engagement
- m. Assumptions and limiting conditions of the valuation engagement (paragraph .18)

- n. The scope of work or data available for analysis including any restrictions or limitations (paragraph .19)
- o. Any hypothetical conditions used in the valuation engagement, including the basis for their use (paragraph .22)
- p. If the work of a specialist was used in the valuation (paragraph .20), a description of how the specialist's work was used, and the level of responsibility, if any, the valuation analyst is assuming for the specialist's work
- q. The valuation approaches and methods used
- r. Disclosure of subsequent events in certain circumstances (paragraph .43)
- s. Any application of the jurisdictional exception (paragraph .10)
- t. Representation of the valuation analyst (paragraph .65)
- u. The report is signed in the name of the valuation analyst or the valuation analyst's firm
- v. A section summarizing the reconciliation of the estimates and the conclusion of value as discussed in paragraphs .68 and .69
- w. A statement that the valuation analyst has no obligation to update the report or the conclusion of value for information that comes to his or her attention after the date of the valuation report

.72 Appendixes or exhibits may be used for required information (see paragraph .70) or information that supplements the summary report. Often, the assumptions, limiting conditions, and the valuation analyst's representation are provided in appendixes to the summary report.

Calculation Report

.73 As indicated in paragraph .48, a calculation report is the only report that should be used to report the results of a calculation engagement. The report should state that it is a calculation report. The calculation report should include the representation of the valuation analyst similar to that in paragraph .65, but adapted for a calculation engagement.

.74 The calculation report should identify any hypothetical conditions used in the calculation engagement, including the basis for their use (paragraph .22), any application of the jurisdictional exception (paragraph .10), and any assumptions and limiting conditions applicable to the engagement (paragraph .18). If the valuation analyst used the work of a specialist (paragraph .20), the valuation analyst should describe in the calculation report how the specialist's work was used and the level of responsibility, if any, the valuation analyst is assuming for the specialist's work. The calculation report may also include a disclosure of subsequent events in certain circumstances (paragraph .43).

.75 Appendixes or exhibits may be used for required information (paragraph .72) or information that supplements the calculation report. Often, the assumptions and limiting conditions and the valuation analyst's representation are provided in appendixes to the calculation report.

.76 The calculation report should include a section summarizing the calculated value. This section should include the following (or similar) statements:

- a. Certain calculation procedures were performed; include the identity of the subject interest and the calculation date.

- b. Describe the calculation procedures and the scope of work performed or reference the section(s) of the calculation report in which the calculation procedures and scope of work are described.
- c. Describe the purpose of the calculation procedures, including that the calculation procedures were performed solely for that purpose and that the resulting calculated value should not be used for any other purpose or by any other party for any purpose.
- d. The calculation engagement was conducted in accordance with the Statement on Standards for Valuation Services of the American Institute of Certified Public Accountants.
- e. A description of the business interest's characteristics, including whether the subject interest exhibits control characteristics, and a statement about the marketability of the subject interest.
- f. The estimate of value resulting from a calculation engagement is expressed as a calculated value.
- g. A general description of a calculation engagement is given, including that
 - i. a calculation engagement does not include all of the procedures required for a valuation engagement, and
 - ii. had a valuation engagement been performed, the results may have been different.
- h. The calculated value, either a single amount or a range, is described.
- i. The report is signed in the name of the valuation analyst or the valuation analyst's firm.
- j. The date of the valuation report is given.
- k. The valuation analyst has no obligation to update the report or the calculation of value for information that comes to his or her attention after the date of the report.

.77 The following is an example of report language that could be used, but is not required, in reporting a calculation engagement:

We have performed a *calculation engagement*, as that term is defined in the Statement on Standards for Valuation Services (SSVS) of the American Institute of Certified Public Accountants. We performed certain calculation procedures on [DEF Company, GHI business ownership interest of DEF Company, GHI security of DEF Company, or GHI intangible asset of DEF Company] as of [calculation date]. The specific calculation procedures are detailed in paragraphs [reference to paragraph numbers] of our calculation report. The calculation procedures were performed solely to assist in the matter of [purpose of valuation procedures], and the resulting calculation of value should not be used for any other purpose or by any other party for any purpose. This calculation engagement was conducted in accordance with the SSVS. The estimate of value that results from a calculation engagement is expressed as a calculated value.

In a calculation engagement, the valuation analyst and the client agree on the specific valuation approaches and valuation methods the valuation analyst will use and the extent of valuation procedures the valuation analyst will perform to estimate the value of the subject interest. A calculation engagement does not include all of the procedures required in a *valuation engagement*, as that term is defined in the SSVS. Had a valuation engagement been performed, the results might have been different.

Based on our calculations, as described in this report, which are based solely on the procedures agreed upon as previously referred to, the resulting calculated value of [DEF Company, GHI business ownership interest of DEF Company,

GHI security of DEF Company, or GHI intangible asset of DEF Company] as of *[valuation date]* was *[calculated value, either a single amount or a range]*. This calculated value is subject to the Statement of Assumptions and Limiting Conditions found in *[reference to applicable section of valuation report]* and to the Valuation Analyst's Representation found in *[reference to applicable section of valuation report]*. We have no obligation to update this report or our calculation of value for information that comes to our attention after the date of this report.

[Signature]

[Date]

Oral Report

.78 An oral report may be used in a valuation engagement or a calculation engagement. An oral report should include all information the valuation analyst believes necessary to relate the scope, assumptions, limitations, and the results of the engagement so as to limit any misunderstandings between the analyst and the recipient of the oral report. The member should document in the working papers the substance of the oral report communicated to the client.

Effective Date

.79 This statement applies to engagements to estimate value accepted on or after January 1, 2008. Earlier application is encouraged.

Appendix A

Illustrative List of Assumptions and Limiting Conditions for a Business Valuation

The valuation report or calculation report should include a list of assumptions and limiting conditions under which the engagement was performed. This appendix includes an illustrative list of assumptions and limiting conditions that may apply to a business valuation.

Illustrative List of Assumptions and Limiting Conditions

1. The conclusion of value (or the calculated value) arrived at herein is valid only for the stated purpose as of the date of the valuation.
2. Financial statements and other related information provided by [ABC Company] or its representatives, in the course of this engagement, have been accepted without any verification as fully and correctly reflecting the enterprise's business conditions and operating results for the respective periods, except as specifically noted herein. [Valuation Firm] has not audited, reviewed, or compiled the financial information provided to us and, accordingly, we express no audit opinion or any other form of assurance on this information.
3. Public information and industry and statistical information have been obtained from sources we believe to be reliable. However, we make no representation as to the accuracy or completeness of such information and have performed no procedures to corroborate the information.
4. We do not provide assurance on the achievability of the results forecasted by [ABC Company] because events and circumstances frequently do not occur as expected; differences between actual and expected results may be material; and achievement of the forecasted results is dependent on actions, plans, and assumptions of management.
5. The conclusion of value (or the calculated value) arrived at herein is based on the assumption that the current level of management expertise and effectiveness would continue to be maintained, and that the character and integrity of the enterprise through any sale, reorganization, exchange, or diminution of the owners' participation would not be materially or significantly changed.
6. This report and the conclusion of value (or the calculated value) arrived at herein are for the exclusive use of our client for the sole and specific purposes as noted herein. They may not be used for any other purpose or by any other party for any purpose. Furthermore the report and conclusion of value (or the calculated value) are not intended by the author and should not be construed by the reader to be investment advice in any manner whatsoever. The stated valuation represents the considered conclusion of value (or the calculated value) of [Valuation Firm], based on information furnished to them by [ABC Company] and other sources.
7. Neither all nor any part of the contents of this report (especially the conclusion of value [or the calculated value], the identity of any

valuation specialist(s), or the firm with which such valuation specialists are connected or any reference to any of their professional designations) should be disseminated to the public through advertising media, public relations, news media, sales media, mail, direct transmittal, or any other means of communication without the prior written consent and approval of [Valuation Firm].

8. Future services regarding the subject matter of this report, including, but not limited to testimony or attendance in court, shall not be required of [Valuation Firm] unless previous arrangements have been made in writing.
9. [Valuation Firm] is not an environmental consultant or auditor, and it takes no responsibility for any actual or potential environmental liabilities. Any person entitled to rely on this report, wishing to know whether such liabilities exist, or the scope and their effect on the value of the property, is encouraged to obtain a professional environmental assessment. [Valuation Firm] does not conduct or provide environmental assessments and has not performed one for the subject property.
10. [Valuation Firm] has not determined independently whether [ABC Company] is subject to any present or future liability relating to environmental matters (including, but not limited to CERCLA/Superfund liability) nor the scope of any such liabilities. [Valuation Firm]'s valuation takes no such liabilities into account, except as they have been reported to [Valuation Firm] by [ABC Company] or by an environmental consultant working for [ABC Company], and then only to the extent that the liability was reported to us in an actual or estimated dollar amount. Such matters, if any, are noted in the report. To the extent such information has been reported to us, [Valuation Firm] has relied on it without verification and offers no warranty or representation as to its accuracy or completeness.
11. [Valuation Firm] has not made a specific compliance survey or analysis of the subject property to determine whether it is subject to, or in compliance with, the American Disabilities Act of 1990, and this valuation does not consider the effect, if any, of noncompliance.
12. [Sample wording for use if the jurisdictional exception is invoked.] The conclusion of value (or the calculated value) in this report deviates from the Statement on Standards for Valuation Services as a result of published governmental, judicial, or accounting authority.
13. No change of any item in this report shall be made by anyone other than [Valuation Firm], and we shall have no responsibility for any such unauthorized change.
14. Unless otherwise stated, no effort has been made to determine the possible effect, if any, on the subject business due to future Federal, state, or local legislation, including any environmental or ecological matters or interpretations thereof.
15. If prospective financial information approved by management has been used in our work, we have not examined or compiled the prospective financial information and therefore, do not express an audit opinion or any other form of assurance on the prospective financial information or the related assumptions. Events and circumstances frequently do not occur as expected and there will

usually be differences between prospective financial information and actual results, and those differences may be material.

16. We have conducted interviews with the current management of [ABC Company] concerning the past, present, and prospective operating results of the company.
17. Except as noted, we have relied on the representations of the owners, management, and other third parties concerning the value and useful condition of all equipment, real estate, investments used in the business, and any other assets or liabilities, except as specifically stated to the contrary in this report. We have not attempted to confirm whether or not all assets of the business are free and clear of liens and encumbrances or that the entity has good title to all assets.

Appendix B

International Glossary of Business Valuation Terms^{*}

To enhance and sustain the quality of business valuations for the benefit of the profession and its clientele, the subsequently identified societies and organizations have adopted the definitions for the terms included in this glossary.

The performance of business valuation services requires a high degree of skill and imposes upon the valuation professional a duty to communicate the valuation process and conclusion in a manner that is clear and not misleading. This duty is advanced through the use of terms whose meanings are clearly established and consistently applied throughout the profession.

If, in the opinion of the business valuation professional, one or more of these terms needs to be used in a manner which materially departs from the enclosed definitions, it is recommended that the term be defined as used within that valuation engagement.

This glossary has been developed to provide guidance to business valuation practitioners by further memorializing the body of knowledge that constitutes the competent and careful determination of value and, more particularly, the communication of how that value was determined.

Departure from this glossary is not intended to provide a basis for civil liability and should not be presumed to create evidence that any duty has been breached.

American Institute of Certified Public Accountants

American Society of Appraisers

Canadian Institute of Chartered Business Valuators

National Association of Certified Valuation Analysts

The Institute of Business Appraisers

Adjusted Book Value Method—a method within the asset approach whereby all assets and liabilities (including off-balance sheet, intangible, and contingent) are adjusted to their fair market values. {NOTE: In Canada on a going concern basis}

Adjusted Net Asset Method —see **Adjusted Book Value Method**.

Appraisal—see **Valuation**.

Appraisal Approach—see **Valuation Approach**.

Appraisal Date—see **Valuation Date**.

Appraisal Method—see **Valuation Method**.

Appraisal Procedure—see **Valuation Procedure**.

Arbitrage Pricing Theory—a multivariate model for estimating the cost of equity capital, which incorporates several systematic risk factors.

^{*} Reproduced verbatim from the International Glossary of Business Valuation Terms (the Glossary), which appears at www.aicpa.org/InterestAreas/ForensicAndValuation/Membership/DownloadableDocuments/Intl%20Glossary%20of%20BV%20Terms.pdf. Note that the phrase, "we discourage the use of this term," that appears herein is also reproduced verbatim.

Asset (Asset-Based) Approach—a general way of determining a value indication of a business, business ownership interest, or security using one or more methods based on the value of the assets net of liabilities.

Beta—a measure of systematic risk of a stock; the tendency of a stock's price to correlate with changes in a specific index.

Blockage Discount—an amount or percentage deducted from the current market price of a publicly traded stock to reflect the decrease in the per share value of a block of stock that is of a size that could not be sold in a reasonable period of time given normal trading volume.

Book Value—see **Net Book Value**.

Business—see **Business Enterprise**.

Business Enterprise—a commercial, industrial, service, or investment entity (or a combination thereof) pursuing an economic activity.

Business Risk—the degree of uncertainty of realizing expected future returns of the business resulting from factors other than financial leverage. See **Financial Risk**.

Business Valuation—the act or process of determining the value of a business enterprise or ownership interest therein.

Capital Asset Pricing Model (CAPM)—a model in which the cost of capital for any stock or portfolio of stocks equals a risk-free rate plus a risk premium that is proportionate to the systematic risk of the stock or portfolio.

Capitalization—a conversion of a single period of economic benefits into value.

Capitalization Factor—any multiple or divisor used to convert anticipated economic benefits of a single period into value.

Capitalization of Earnings Method—a method within the income approach whereby economic benefits for a representative single period are converted to value through division by a capitalization rate.

Capitalization Rate—any divisor (usually expressed as a percentage) used to convert anticipated economic benefits of a single period into value.

Capital Structure—the composition of the invested capital of a business enterprise; the mix of debt and equity financing.

Cash Flow—cash that is generated over a period of time by an asset, group of assets, or business enterprise. It may be used in a general sense to encompass various levels of specifically defined cash flows. When the term is used, it should be supplemented by a qualifier (for example, "discretionary" or "operating") and a specific definition in the given valuation context.

Common Size Statements—financial statements in which each line is expressed as a percentage of the total. On the balance sheet, each line item is shown as a percentage of total assets, and on the income statement, each item is expressed as a percentage of sales.

Control—the power to direct the management and policies of a business enterprise.

Control Premium—an amount or a percentage by which the pro rata value of a controlling interest exceeds the pro rata value of a non-controlling interest in a business enterprise to reflect the power of control.

Cost Approach—a general way of determining a value indication of an individual asset by quantifying the amount of money required to replace the future service capability of that asset.

Cost of Capital—the expected rate of return that the market requires in order to attract funds to a particular investment.

Debt-Free—*we discourage the use of this term.* See **Invested Capital**.

Discount for Lack of Control—an amount or percentage deducted from the pro rata share of value of 100% of an equity interest in a business to reflect the absence of some or all of the powers of control.

Discount for Lack of Marketability—an amount or percentage deducted from the value of an ownership interest to reflect the relative absence of marketability.

Discount for Lack of Voting Rights—an amount or percentage deducted from the per share value of a minority interest voting share to reflect the absence of voting rights.

Discount Rate—a rate of return used to convert a future monetary sum into present value.

Discounted Cash Flow Method—a method within the income approach whereby the present value of future expected net cash flows is calculated using a discount rate.

Discounted Future Earnings Method—a method within the income approach whereby the present value of future expected economic benefits is calculated using a discount rate.

Economic Benefits—inflows such as revenues, net income, net cash flows, etc.

Economic Life—the period of time over which property may generate economic benefits.

Effective Date—see **Valuation Date**.

Enterprise—see **Business Enterprise**.

Equity—the owner's interest in property after deduction of all liabilities.

Equity Net Cash Flows—those cash flows available to pay out to equity holders (in the form of dividends) after funding operations of the business enterprise, making necessary capital investments, and increasing or decreasing debt financing.

Equity Risk Premium—a rate of return added to a risk-free rate to reflect the additional risk of equity instruments over risk free instruments (a component of the cost of equity capital or equity discount rate).

Excess Earnings—that amount of anticipated economic benefits that exceeds an appropriate rate of return on the value of a selected asset base (often net tangible assets) used to generate those anticipated economic benefits.

Excess Earnings Method—a specific way of determining a value indication of a business, business ownership interest, or security determined as the sum of a) the value of the assets derived by capitalizing excess earnings and b) the value of the selected asset base. Also frequently used to value intangible assets. See **Excess Earnings**.

Fair Market Value—the price, expressed in terms of cash equivalents, at which property would change hands between a hypothetical willing and

able buyer and a hypothetical willing and able seller, acting at arm's length in an open and unrestricted market, when neither is under compulsion to buy or sell and when both have reasonable knowledge of the relevant facts. [NOTE: In Canada, the term "*price*" should be replaced with the term "*highest price*."]]

Fairness Opinion—an opinion as to whether or not the consideration in a transaction is fair from a financial point of view.

Financial Risk—the degree of uncertainty of realizing expected future returns of the business resulting from financial leverage. See **Business Risk**.

Forced Liquidation Value—liquidation value, at which the asset or assets are sold as quickly as possible, such as at an auction.

Free Cash Flow—*we discourage the use of this term*. See **Net Cash Flow**.

Going Concern—an ongoing operating business enterprise.

Going Concern Value—the value of a business enterprise that is expected to continue to operate into the future. The intangible elements of Going Concern Value result from factors such as having a trained work force, an operational plant, and the necessary licenses, systems, and procedures in place.

Goodwill—that intangible asset arising as a result of name, reputation, customer loyalty, location, products, and similar factors not separately identified.

Goodwill Value—the value attributable to goodwill.

Guideline Public Company Method—a method within the market approach whereby market multiples are derived from market prices of stocks of companies that are engaged in the same or similar lines of business and that are actively traded on a free and open market.

Income (Income-Based) Approach—a general way of determining a value indication of a business, business ownership interest, security, or intangible asset using one or more methods that convert anticipated economic benefits into a present single amount.

Intangible Assets—nonphysical assets such as franchises, trademarks, patents, copyrights, goodwill, equities, mineral rights, securities, and contracts (as distinguished from physical assets) that grant rights and privileges and have value for the owner.

Internal Rate of Return—a discount rate at which the present value of the future cash flows of the investment equals the cost of the investment.

Intrinsic Value—the value that an investor considers, on the basis of an evaluation or available facts, to be the "true" or "real" value that will become the market value when other investors reach the same conclusion. When the term applies to options, it is the difference between the exercise price and strike price of an option and the market value of the underlying security.

Invested Capital—the sum of equity and debt in a business enterprise. Debt is typically (a) all interest-bearing debt or (b) long-term, interest-bearing debt. When the term is used, it should be supplemented by a specific definition in the given valuation context.

Invested Capital Net Cash Flows—those cash flows available to pay out to equity holders (in the form of dividends) and debt investors (in the form of

principal and interest) after funding operations of the business enterprise and making necessary capital investments.

Investment Risk—the degree of uncertainty as to the realization of expected returns.

Investment Value—the value to a particular investor based on individual investment requirements and expectations. (NOTE: in Canada, the term used is "*Value to the Owner.*")

Key Person Discount—an amount or percentage deducted from the value of an ownership interest to reflect the reduction in value resulting from the actual or potential loss of a key person in a business enterprise.

Levered Beta—the beta reflecting a capital structure that includes debt.

Limited Appraisal—the act or process of determining the value of a business, business ownership interest, security, or intangible asset with limitations in analyses, procedures, or scope.

Liquidity—the ability to quickly convert property to cash or pay a liability.

Liquidation Value—the net amount that would be realized if the business is terminated and the assets are sold piecemeal. Liquidation can be either "orderly" or "forced."

Majority Control—the degree of control provided by a majority position.

Majority Interest—an ownership interest greater than 50% of the voting interest in a business enterprise.

Market (Market-Based) Approach—a general way of determining a value indication of a business, business ownership interest, security, or intangible asset by using one or more methods that compare the subject to similar businesses, business ownership interests, securities, or intangible assets that have been sold.

Market Capitalization of Equity—the share price of a publicly traded stock multiplied by the number of shares outstanding.

Market Capitalization of Invested Capital—the market capitalization of equity plus the market value of the debt component of invested capital.

Market Multiple—the market value of a company's stock or invested capital divided by a company measure (such as economic benefits, number of customers).

Marketability—the ability to quickly convert property to cash at minimal cost.

Marketability Discount—see **Discount for Lack of Marketability**.

Merger and Acquisition Method—a method within the market approach whereby pricing multiples are derived from transactions of significant interests in companies engaged in the same or similar lines of business.

Mid-Year Discounting—a convention used in the Discounted Future Earnings Method that reflects economic benefits being generated at midyear, approximating the effect of economic benefits being generated evenly throughout the year.

Minority Discount—a discount for lack of control applicable to a minority interest.

Minority Interest—an ownership interest less than 50% of the voting interest in a business enterprise.

Multiple—the inverse of the capitalization rate.

Net Book Value—with respect to a business enterprise, the difference between total assets (net of accumulated depreciation, depletion, and amortization) and total liabilities as they appear on the balance sheet (synonymous with Shareholder's Equity). With respect to a specific asset, the capitalized cost less accumulated amortization or depreciation as it appears on the books of account of the business enterprise.

Net Cash Flows—when the term is used, it should be supplemented by a qualifier. See **Equity Net Cash Flows** and **Invested Capital Net Cash Flows**.

Net Present Value—the value, as of a specified date, of future cash inflows less all cash outflows (including the cost of investment) calculated using an appropriate discount rate.

Net Tangible Asset Value—the value of the business enterprise's tangible assets (excluding excess assets and nonoperating assets) minus the value of its liabilities.

Nonoperating Assets—assets not necessary to ongoing operations of the business enterprise. {NOTE: in Canada, the term used is "*Redundant Assets*."}

Normalized Earnings—economic benefits adjusted for nonrecurring, noneconomic, or other unusual items to eliminate anomalies and/or facilitate comparisons.

Normalized Financial Statements—financial statements adjusted for nonoperating assets and liabilities and/or for nonrecurring, noneconomic, or other unusual items to eliminate anomalies and/or facilitate comparisons.

Orderly Liquidation Value—liquidation value at which the asset or assets are sold over a reasonable period of time to maximize proceeds received.

Premise of Value—an assumption regarding the most likely set of transactional circumstances that may be applicable to the subject valuation; for example, going concern, liquidation.

Present Value—the value, as of a specified date, of future economic benefits and/or proceeds from sale, calculated using an appropriate discount rate.

Portfolio Discount—an amount or percentage deducted from the value of a business enterprise to reflect the fact that it owns dissimilar operations or assets that do not fit well together.

Price/Earnings Multiple—the price of a share of stock divided by its earnings per share.

Rate of Return—an amount of income (loss) and/or change in value realized or anticipated on an investment, expressed as a percentage of that investment.

Redundant Assets—see **Nonoperating Assets**.

Report Date—the date conclusions are transmitted to the client.

Replacement Cost New—the current cost of a similar new property having the nearest equivalent utility to the property being valued.

Reproduction Cost New—the current cost of an identical new property.

Required Rate of Return—the minimum rate of return acceptable by investors before they will commit money to an investment at a given level of risk.

Residual Value—the value as of the end of the discrete projection period in a discounted future earnings model.

Return on Equity—the amount, expressed as a percentage, earned on a company's common equity for a given period.

Return on Investment—See **Return on Invested Capital** and **Return on Equity**.

Return on Invested Capital—the amount, expressed as a percentage, earned on a company's total capital for a given period.

Risk-Free Rate—the rate of return available in the market on an investment free of default risk.

Risk Premium—a rate of return added to a risk-free rate to reflect risk.

Rule of Thumb—a mathematical formula developed from the relationship between price and certain variables based on experience, observation, hearsay, or a combination of these; usually industry specific.

Special Interest Purchasers—acquirers who believe they can enjoy post-acquisition economies of scale, synergies, or strategic advantages by combining the acquired business interest with their own.

Standard of Value—the identification of the type of value being utilized in a specific engagement; for example, fair market value, fair value, investment value.

Sustaining Capital Reinvestment—the periodic capital outlay required to maintain operations at existing levels, net of the tax shield available from such outlays.

Systematic Risk—the risk that is common to all risky securities and cannot be eliminated through diversification. The measure of systematic risk in stocks is the beta coefficient.

Tangible Assets—physical assets (such as cash, accounts receivable, inventory, property, plant and equipment, etc.).

Terminal Value—See **Residual Value**.

Transaction Method—See **Merger and Acquisition Method**.

Unlevered Beta—the beta reflecting a capital structure without debt.

Unsystematic Risk—the risk specific to an individual security that can be avoided through diversification.

Valuation—the act or process of determining the value of a business, business ownership interest, security, or intangible asset.

Valuation Approach—a general way of determining a value indication of a business, business ownership interest, security, or intangible asset using one or more valuation methods.

Valuation Date—the specific point in time as of which the valuator's opinion of value applies (also referred to as "Effective Date" or "Appraisal Date").

Valuation Method—within approaches, a specific way to determine value.

Valuation Procedure—the act, manner, and technique of performing the steps of an appraisal method.

Valuation Ratio—a fraction in which a value or price serves as the numerator and financial, operating, or physical data serve as the denominator.

Value to the Owner—see **Investment Value**.

Voting Control—*de jure* control of a business enterprise.

Weighted Average Cost of Capital (WACC)—the cost of capital (discount rate) determined by the weighted average, at market value, of the cost of all financing sources in the business enterprise's capital structure.

Appendix C

Glossary of Additional Terms

assumptions and limiting conditions. Parameters and boundaries under which a valuation is performed, as agreed upon by the valuation analyst and the client or as acknowledged or understood by the valuation analyst and the client as being due to existing circumstances. An example is the acceptance, without further verification, by the valuation analyst from the client of the client's financial statements and related information.

business ownership interest. A designated share in the ownership of a business (business enterprise).

calculated value. An estimate as to the value of a business, business ownership interest, security, or intangible asset, arrived at by applying valuation procedures agreed upon with the client and using professional judgment as to the value or range of values based on those procedures.

calculation engagement. An engagement to estimate value wherein the valuation analyst and the client agree on the specific valuation approaches and valuation methods that the valuation analyst will use and the extent of valuation procedures the valuation analyst will perform to estimate the value of a subject interest. A calculation engagement generally does not include all of the valuation procedures required for a valuation engagement. If a valuation engagement had been performed, the results might have been different. The valuation analyst expresses the results of the calculation engagement as a calculated value, which may be either a single amount or a range.

capital or contributory asset charge. A fair return on an entity's *contributory assets*, which are tangible and intangible assets used in the production of income or cash flow associated with an intangible asset being valued. In this context, *income or cash flow* refers to an applicable measure of income or cash flow, such as net income, or operating cash flow before taxes and capital expenditures. A capital charge may be expressed as a percentage return on an economic rent associated with, or a profit split related to, the contributory assets.

capitalization of benefits method. A method within the income approach whereby expected future benefits (for example, earnings or cash flow) for a representative single period are converted to value through division by a capitalization rate.

comparable profits method. A method of determining the value of intangible assets by comparing the profits of the subject entity with those of similar uncontrolled companies that have the same or similar complement of intangible assets as the subject company.

comparable uncontrolled transaction method. A method of determining the value of intangible assets by comparing the subject transaction to similar transactions in the market place made between independent (uncontrolled) parties.

conclusion of value. An estimate of the value of a business, business ownership interest, security, or intangible asset, arrived at by applying the valuation procedures appropriate for a valuation engagement and using

professional judgment as to the value or range of values based on those procedures.

control adjustment. A valuation adjustment to financial statements to reflect the effect of a controlling interest in a business. An example would be an adjustment to owners' compensation that is in excess of market compensation.

engagement to estimate value. An engagement, or any part of an engagement (for example, a tax, litigation, or acquisition-related engagement), that involves determining the value of a business, business ownership interest, security, or intangible asset. Also known as *valuation service*.

excess operating assets. Operating assets in excess of those needed for the normal operation of a business.

fair value. In valuation applications, there are two commonly used definitions for fair value:

- (1) For financial reporting purposes only, the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. *Source:* Financial Accounting Standards Board *Accounting Standards Codification* glossary.
- (2) For state legal matters only, some states have laws that use the term *fair value* in shareholder and partner matters. For state legal matters only, therefore, the term may be defined by statute or case law in the particular jurisdiction.

guideline company transactions method. A method within the market approach whereby market multiples are derived from the sales of entire companies engaged in the same or similar lines of business.

hypothetical condition. That which is or may be contrary to what exists, but is supposed for the purpose of analysis.

incremental income. Additional income or cash flow attributable to an entity's ownership or operation of an intangible asset being valued, as determined by a comparison of the entity's income or cash flow with the intangible asset to the entity's income or cash flow without the intangible asset. In this context, *income or cash flow* refers to an applicable measure of income or cash flow, such as license royalty income or operating cash flow before taxes and capital expenditures.

normalization. See *Normalized Earnings* in appendix B, "International Glossary of Business Valuation Terms." (see paragraph .81).

pre-adjustment value. The value arrived at prior to the application, if appropriate, of valuation discounts or premiums.

profit split income. With respect to the valuation of an intangible asset of an entity, a percentage allocation of the entity's income or cash flow whereby (1) a split (or percentage) is allocated to the subject intangible and (2) the remainder is allocated to all of the entity's tangible and other intangible assets. In this context, *income or cash flow* refers to an applicable measure of income or cash flow, such as net income or operating cash flow before taxes and capital expenditures.

relief from royalty method. A valuation method used to value certain intangible assets (for example, trademarks and trade names) based on the premise that the only value that a purchaser of the assets receives is the

exemption from paying a royalty for its use. Application of this method usually involves estimating the fair market value of an intangible asset by quantifying the present value of the stream of market-derived royalty payments that the owner of the intangible asset is exempted from or "relieved" from paying.

residual income. For an entity that owns or operates an intangible asset being valued, the portion of the entity's income or cash flow remaining after subtracting a capital charge on all of the entity's tangible and other intangible assets. *Income or cash flows* can refer to any appropriate measure of income or cash flow, such as net income or operating cash flow before taxes and capital expenditures.

security. A certificate evidencing ownership or the rights to ownership in a business enterprise that (1) is represented by an instrument or by a book record or contractual agreement, (2) is of a type commonly dealt in on securities exchanges or markets or, when represented by an instrument, is commonly recognized in any area in which it is issued or dealt in as a medium for investment, and (3) either one of a class or series or, by its terms, is divisible into a class or series of shares, participations, interests, rights, or interest-bearing obligations.

subject interest. A business, business ownership interest, security, or intangible asset that is the subject of a valuation engagement.

subsequent event. An event that occurs subsequent to the valuation date.

valuation analyst. For purposes of this statement, an AICPA member who performs an engagement to estimate value that culminates in the expression of a conclusion of value or a calculated value.

valuation assumptions. Statements or inputs utilized in the performance of an engagement to estimate value that serve as a basis for the application of particular valuation methods.

valuation engagement. An engagement to estimate value in which a valuation analyst determines an estimate of the value of a subject interest by performing appropriate valuation procedures, as outlined in the AICPA Statement on Standards for Valuation Services, and is free to apply the valuation approaches and methods he or she deems appropriate in the circumstances. The valuation analyst expresses the results of the valuation engagement as a conclusion of value, which may be either a single amount or a range.

valuation service. See **engagement to estimate value.**

VS Section 9100

Valuation of a Business, Business Ownership Interest, Security, or Intangible Asset: Valuation Services Interpretations of Section 100

1. Scope of Applicable Services

Background

.01 The Statement on Standards for Valuation Services (SSVS) No. 1, *Valuation of a Business, Business Ownership Interest, Security, or Intangible Asset* [VS section 100] establishes standards of performance and reporting for all AICPA members performing those valuation services that are within the scope of the Statement. When originally proposed on March 30, 2005, the Exposure Draft contained a list of questions and answers (Appendix A of the March 30, 2005 Exposure Draft) that were intended to assist members in determining if an engagement, particularly with regard to litigation or tax engagements, fell within the scope of the Statement. Through the Exposure Draft process, it was determined that the questions and answers were an integral part of the Statement and should be made authoritative. This Interpretation is part of the AICPA's continuing efforts at self-regulation of its members in valuation practice, and its desire to provide guidance to members when providing valuation services. The Interpretation does not change or elevate any level of conduct prescribed by any standard. Its goal is to clarify existing standards.

General Interpretation

.02 The SSVSs apply to an engagement to estimate value if, as all or as part of another engagement, a member determines the value of a business, business ownership interest, security, or intangible asset (SSVS No. 1, paragraphs 1 and 2 [VS section 100.01–.02]). In the process of estimating value, professional judgment is used to apply valuation approaches and valuation methods as described in the SSVS No. 1, paragraph 4 [VS section 100.04].

.03 In determining whether a particular service falls within the scope of the Statement, a member should consider those services that are specifically excluded:

- Audit, review, and compilation engagements (SSVS No. 1, paragraph 5 [VS section 100.05])
- Use of values provided by the client or a third party (SSVS No. 1, paragraph 6 [VS section 100.06])
- Internal use assignments from employers to employee members not in the *practice of public accounting* (SSVS No. 1, paragraph 7 [VS section 100.07])
- Engagements that are exclusively for the purpose of determining economic damages (for example, lost profits) and that do not include an

engagement to estimate value (SSVS No. 1, paragraph 8 [VS section 100.08])

- Mechanical computations that do not rise to the level of an engagement to estimate value (SSVS No. 1, paragraph 9(a) [VS section 100.09a])
- Engagements where it is not practical or reasonable to obtain or use relevant information and, therefore, the member is unable to apply valuation approaches and methods described in this Statement. (SSVS No. 1, paragraph 9(b) [VS section 100.09b])
- Engagements meeting the jurisdictional exception (SSVS No. 1, paragraph 10 [VS section 100.10])

.04 A member should be diligent in determining if an engagement falls within the scope of the Statement. Unless specifically excluded by the SSVS, if the engagement requires a member to apply valuation approaches and methods, and use professional judgment in applying those approaches and methods, the SSVS would apply. In determining the scope and requirements of the engagement, a member should consider the client's needs, or the requirements of a third party for which the valuation is intended, including governmental, judicial, and accounting authorities. In addition, a member should consider other professional standards that might apply.

Specific Illustrations

.05 The following illustrations address general fact patterns. Accordingly, the application of the guidance discussed in the "General Interpretation" section to variations in general facts, or to particular facts and circumstances, may lead to different conclusions. In each illustration, there is no authority other than that indicated.

Illustrations Relating to Litigation Engagements and Certain Controversy Proceedings

.06 *Illustration 1.* Do lost profits damage computations fall within the scope of the Statement?

.07 *Conclusion.* No, unless the computations are undertaken as part of an engagement to estimate value (SSVS No. 1, paragraphs 1, 2, and 8 [VS section 100.01, .02, and .08]).

.08 *Illustration 2.* Is an economic damages computation that incorporates a terminal value within the scope of the Statement?

.09 *Conclusion.* The use of a terminal value exclusively for the determination of lost profits is not within the scope of this statement unless that determination will be used as part of an engagement to estimate value (*Illustration 1*).

.10 *Illustration 3.* If a start-up business is destroyed, is the economic damages computation within the scope of the Statement?

.11 *Conclusion.* There are two common measures of damages: lost profits and loss of value. If a valuation analyst performs an engagement to estimate value to determine the loss of value of a business or intangible asset, the Statement applies. Otherwise, the Statement does not apply (*Illustration 1*). In order to determine whether the Statement applies, a member acting as an expert witness should evaluate whether the particular damages calculation constitutes an engagement to estimate value with respect to the business, business interest, security, or intangible asset or whether it constitutes a lost-profits computation.

.12 Illustration 4. Does the Statement include any exceptions relating to litigation or controversy proceedings?

.13 Conclusion. Yes, the Statement includes a reporting exemption for certain controversy proceedings (SSVS No. 1, paragraph 50 [VS section 100.50]); however, there is no litigation or controversy proceeding exemption from the developmental provisions of the Statement (SSVS No. 1, paragraphs 21–46 [VS section 100.21–.46]) in circumstances in which an engagement to estimate value is performed (*Illustration 1*).

.14 Illustration 5. Is the Statements reporting exemption for litigation or controversy proceedings (see SSVS No. 1, paragraph 50 [VS section 100.50]) the same as the "litigation exemption" in the AICPA attestation standards?

.15 Conclusion. No, the so-called "litigation exemption" is provided for in the AICPA attestation standards and is further discussed in the attestation interpretations. The attestation standards do not apply to engagements in which a practitioner is engaged to testify as an expert witness in accounting, auditing, taxation, or other matters, given certain stipulated facts. This is clarified in the attestation interpretation, which states, in part, that the attestation standards do not apply to litigation services engagements when (among other requirements) the practitioner "has not been engaged to issue and does not issue an examination, a review, or an agreed-upon procedures report on the subject matter, or an assertion about the subject matter that is the responsibility of another party." (Interpretation No. 3, "Applicability of Attestation Standards to Litigation Services," of Chapter 1, "Attest Engagements," of Statement on Standards for Attestation Engagements No. 10, *Attestation Standards: Revision and Recodification*, as revised [AT section 9101.34–.42]. However, unlike the AICPA attestation standards, which do not apply in any capacity to litigation or controversy proceeding situations, as discussed above, the Statements exemption for litigation or certain controversy proceedings is an exemption from the reporting provisions of the Statement (SSVS No. 1, paragraphs 47–78 [VS section 100.47–.78]).

Illustrations Relating to Tax Engagements

.16 Illustration 6. When does the Statement apply to members who determine values related to tax reporting and planning engagements?

.17 Conclusion. The Statement applies when the member is engaged to estimate the value of a business, business ownership interest, security, or intangible asset (SSVS No. 1, paragraph 1 [VS section 100.01]). The application of valuation approaches and methods and the use of professional judgment (SSVS No. 1, paragraph 4 [VS section 100.04]) are required, unless an exception applies (SSVS No. 1, paragraphs 5–10 [VS section 100.05–.10]).

.18 Illustration 7. If the sole purpose of an engagement is reporting a value in a tax return and the Statement applies to this engagement, are any separate reports (specifically, valuation reports) required to be issued? To whom are those reports required to be provided? Is a report required to be attached to the tax return? Are any specific disclosures required?

.19 Conclusion. The Statement requires the preparation of a written or oral valuation report (SSVS No. 1, paragraphs 47–78 [VS section 100.47–.78]) that is communicated to the client (SSVS No. 1, paragraph 47 [VS section 100.47]) but does not require that any report be attached to the tax return or mandate any other tax-specific disclosures. In limited circumstances, a taxing authority may require its own report, which would obviate the need for a separate valuation report (SSVS No. 1, paragraph 10 [VS section 100.10] and *Illustration 18*).

There is also a reporting exemption for certain controversy proceedings (SSVS No. 1, paragraph 50 [VS section 100.50] and *Illustration 4*).

.20 *Illustration 8.* Are mechanical computations of value, for example, computations using actuarial tables, excluded from the Statement?

.21 *Conclusion.* Mechanical computations of value are excluded from the Statement if they do not rise to the level of an engagement to estimate value, that is, if the member does not apply valuation approaches and methods, and does not use professional judgment, as described in the Statement (SSVS No. 1, paragraph 9(a) [VS section 100.09a]).

.22 Examples of services that do **not** rise to the level of an engagement to estimate value include: (a) computations of a remainder interest under a grantor retained annuity trust (GRAT) using actuarial tables; (b) determining the value of relatively small blocks (relative to the total amount of corporate stock outstanding) of publicly traded stock whose per share price is readily ascertainable; (c) preparing a tax return using the valuation of a business that was provided by a third-party appraiser, or by the client (SSVS No. 1, paragraph 6, [VS section 100.06]); and (d) calculating cash "hold back" requirements for tax contingencies (SSVS No. 1, paragraphs 4 and 9(a) [VS section 100.01, .04, and .09a]).

.23 Examples of services that rise to the level of an engagement to estimate value include: (a) valuing a block of publicly traded stock, if the analysis includes consideration of a discount for blockage, lock-up, or other contractual or market restrictions such that valuation approaches and methods are applied, and professional judgment is used to determine the fair value, fair market value, or other applicable standard of value; (b) valuing stock that is not publicly traded; and (c) computing the fair market value of assets in a charitable remainder trust (CRT), if the engagement requires the application of valuation approaches and methods, and the use of professional judgment to estimate the fair market value.

.24 *Illustration 9.* Does the "jurisdictional exception" (SSVS No. 1, paragraph 10 [VS section 100.10]) provide that an engagement to estimate value is not subject to the Statement if a member determines and reports values using procedures mandated or allowed by the Internal Revenue Code (IRC), Internal Revenue Service (IRS) regulations, court cases, or other published guidance and other sources of federal, state, and local law solely for purposes of tax return preparation and other tax services using these methods?

.25 *Conclusion.* No, the "jurisdictional exception" would not exempt the engagement from this Statement, even if the engagements sole purpose was to value a subject interest (SSVS No. 1, paragraph 1 [VS section 100.01]) for tax reporting purposes. Only the portion of the Statement that differs from the published governmental or judicial authority is superseded for purposes of the engagement. The remainder of the Statement applies to the engagement.

.26 *Illustration 10.* Is an interest in a publicly traded partnership whose shares are frequently traded considered a "security" under the Statement? Is an interest in a family limited partnership (FLP), or in another nontraded partnership, considered a "security" under the Statement?

.27 *Conclusion.* Whether interest constitutes a "security" is a legal determination. However, where the value of a security is readily ascertainable, a valuation analyst does not need to apply valuation approaches and methods and use professional judgment. Accordingly, the valuation of such an interest would not be subject to the Statement (SSVS No. 1, paragraphs 1 and 9(a) [VS section 100.01 and .09a]). An interest in a nonpublicly traded partnership, such

as an FLP, whether considered a security or not, is a business ownership interest. The valuation of such nonpublicly traded interest requires the application of valuation approaches and methods and the use of professional judgment, and, accordingly, would be subject to the Statement (SSVS No. 1, paragraphs 1, 4, [VS section 100.01 and .04], and *Illustration 6*), unless the exception under SSVS No. 1, paragraph 9(b) [VS section 100.09b] applies (*Illustration 13e*). If the engagement requires the valuation analyst to consider and apply adjustments, for example, valuation discounts or premiums, then the engagement would be subject to the Statement.

.28 *Illustration 11.* A client engages a member to provide advice for planning purposes (such as estate planning, personal financial planning, or merger and acquisitions planning). The client holds an ownership interest in a family business being operated as a limited liability company, an interest in a private real estate limited partnership, publicly traded stock, a personal residence, and a retirement account (not an IRA). Is this a valuation engagement subject to the Statement?

.29 *Conclusion.* It depends. Providing technical advice, without reference to values for the various assets, is not subject to the Statement. However, if a member calculates a value to illustrate various planning options, he or she may fall under the Statement with regard to various assets. If one or more of the assets for which value is to be determined for purposes of the plan illustrations is a business, business ownership interest, security, or intangible asset, and the client or a third party does not provide the values for these assets, or the member does not use assumed or hypothetical values as part of the overall engagement, the member performing the valuation(s) is subject to the Statement with regard to these assets (SSVS No. 1, paragraph 1, [VS section 100.01] and *Illustration 6*). In this example, if the member applies valuation approaches and methods and uses professional judgment to determine the value of the ownership interest in the family business or the interest in the private real estate limited partnership in order to provide planning advice, the Statement would apply. In contrast, if the client or a third party provides the values for these assets, or the member uses assumed or hypothetical values, the Statement would not apply because the member would not be applying valuation approaches and methods and using professional judgment. In addition, the exception under SSVS No. 1, paragraph 9(b), [VS section 100.09b], where it is not practical or reasonable to obtain or use relevant information, could apply (see *Illustration 13e*). The computation of the "estimated estate tax" or other taxes once the values have been determined, assumed, or provided is not subject to the Statement, as the computation is a tax computation but would be subject to the Statements on Standards for Tax Services [TS sections 100–900] (*Illustration 10* at paragraph .27 of this Interpretation).

.30 *Illustration 12.* There are many instances where a tax engagement involves the need for a member to estimate value. The estimation of value may not be the primary purpose of the engagement, but rather a necessary task to perform or item to consider, when making a tax determination concerning the reporting of a transaction on a tax return. Consider the following practice situations:

.31 *Illustration 12a.* A member has been engaged to determine the deductibility of interest on a nonrecourse loan. Under applicable regulations, interest on a nonrecourse loan cannot be deducted if it is clear that the company will be unable to service the debt. For purposes of tax reporting, a conclusion must be reached concerning the ability of the company to service the debt. Is this considered a valuation engagement subject to the Statement?

.32 Conclusion. This is not a valuation engagement covered by the Statement because it is not the valuation of a subject interest (SSVS No. 1, paragraph 1 [VS section 100.01]). This example is a debt-service analysis.

.33 Illustration 12b. There are compliance filings that require an estimate of the value of a company. For example, the "market value" of "intangible personal property," as defined by a state's taxing authority may need to be reported annually on an intangible personal property tax return. A client has a subject interest that is considered intangible personal property for purposes of the return. The member has been engaged to prepare the tax return. Is this a valuation engagement subject to the Statement?

.34 Conclusion. It depends. If the state requires an estimation of the value of a subject interest, and the estimation of value requires the application of valuation approaches and methods and the use of professional judgment (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]), the Statement applies. If, however, the client or a third-party appraiser provides the value of the subject interest to the member, the Statement does not apply (SSVS No. 1, paragraphs 1 and 6 [VS section 100.01 and .06]). In addition, the exception under SSVS No. 1, paragraph 9(b) [VS section 100.09b], where it is not practical or reasonable to obtain or use relevant information, could apply (*Illustration 13e*). Alternatively, if the state follows more informal rules where the application of valuation approaches or valuation methods are not necessary, the Statement does not apply (SSVS No. 1, paragraph 4 [VS section 100.04]).

.35 Illustration 12c. There are times when a member must allocate value among various assets. For example, IRC sections 1060 and 338 require the allocation to assets, based on relative values, of consideration paid. In partnership taxation, there may be allocations under IRC sections 754, 743, and 734 and special tax basis adjustments for partnerships (sales or exchanges and transfers at or upon death) may require an allocation of value among various partnership assets. Are these types of allocations engagements to estimate value subject to the Statement?

.36 Conclusion. It depends. If one or more of the assets to which value is to be allocated is a subject interest (that is, a business, business ownership interest, security, or intangible asset), and the client or a third party did not provide the member with a value for those assets, then the member performing the allocation would be subject to the Statement, and the member is required to apply valuation approaches and methods, and use professional judgment to value those assets (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04], and *Illustration 6*), unless an exception applies (SSVS No. 1, paragraphs 5–10 [VS section 100.05–.10]). For example, in an IRC section 1060 allocation, after the allocation of purchase price to cash, receivables, inventory, and depreciable tangible assets, there is a residual amount of value allocable to goodwill or going concern. The mechanical assignment of the residual amount to goodwill or going concern is not subject to the Statement. However, if the member allocates this residual amount to specific intangible assets (such as to various customer-based and supplier-based intangibles), such allocation is based on the assets relative values. Because the member applies valuation approaches and methods and uses professional judgment to value those specific intangible assets, the Statement applies.

.37 Illustration 12d. If the member does not apply any discount and simply computes the fair market value of an interest in a family limited partnership (FLP) for tax purposes, is this a valuation engagement subject to the Statement?

.38 Conclusion. Yes, the Statement applies if the member determines the value of the FLP or an interest in an FLP. The application of valuation

approaches and methods, and the use of professional judgment are required, unless an exception applies (SSVS No. 1, paragraphs 5–10 [VS section 100.05–.10]). The fact that the member does not apply a discount does not exempt the engagement from the Statement (SSVS No. 1, paragraphs 1–4 and 9(a) [VS section 100.01–.04 and .09a]).

.39 Illustration 12e. Would the Statement apply to the computation of the fair market value of assets in, or the computation of the required distribution of, a charitable remainder trust (CRT)?

.40 Conclusion. It depends on the underlying assets held by the CRT. The Statement would apply only if the member determines the value of a business, business ownership interest, security, or intangible asset (SSVS No. 1, paragraph 1 [VS section 100.01]). To the extent that the CRT holds assets that, to be valued, require the application of valuation approaches and methods, and the use of professional judgment, such as an interest in a limited liability corporation (LLC), the Statement would apply. However, if the CRT only holds publicly traded stock with a readily ascertainable value, the Statement would not apply because valuation approaches and methods and professional judgment would not be needed in the computation (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04], and *Illustration 6*).

.41 Illustration 12f. In circumstances in which the value of assets contributed by partners to a partnership differ from their cost basis, each difference must be tracked for tax purposes under IRC section 704(c) so that amounts of gain or loss can be properly assigned to the contributing partners. Are these types of asset value assignments valuation engagements subject to the Statement?

.42 Conclusion. It depends. If one or more of the assets for which value is relevant under IRC section 704(c) is a subject interest that is, a business, business ownership interest, security, or intangible asset, and the client or a third party does not provide the valuation, and the member applies valuation approaches and methods and uses professional judgment to value these assets for IRC section 704(c) tax purposes, then the Statement applies (SSVS No. 1, paragraphs 1 and 6 [VS section 100.01 and .06], and *Illustration 6*).

.43 Illustration 12g. A member has been engaged to perform a cost segregation study. The study involves an analysis of the costs of building a structure and the allocation of such costs to the real and personal property components of the structure so that depreciation of those components may be properly computed. Is this a valuation engagement subject to the Statement?

.44 Conclusion. No, none of the assets constitutes a subject interest (SSVS No. 1, paragraph 1 [VS section 100.01]).

.45 Illustration 12h. A member has been engaged to provide advice to a company regarding the tax planning for income from discharge of indebtedness under IRC section 108. The company has advised the member that the company will be able to negotiate a settlement in complete satisfaction of an obligation at 30 cents on the dollar. Is this a valuation engagement subject to the Statement?

.46 Conclusion. It depends. Under IRC section 108(a), gross income of the company excludes income from discharge of indebtedness only under certain circumstances. One of those circumstances is the insolvency of the company. Under IRC section 108(d) (3), insolvency results from an excess of liabilities over the fair market value of assets. If (a) the company must rely on the insolvency provisions of IRC section 108; (b) one or more of the assets for which value is relevant under IRC section 108 is a subject interest (that is, a business, business ownership interest, security, or intangible asset); (c) the company or a third

party does not provide the valuation; and (d) the member applies valuation approaches and methods, and uses professional judgment to value the subject interest(s) for purposes of the IRC section 108(d)(3) insolvency determination, the Statement applies.

.47 Illustration 13. An executor has engaged a member to prepare an estate tax return, which requires determining values for the following estate assets: (a) shares in a publicly traded company, "TI Corporation," whose shares are infrequently traded; (b) a large block of stock in "LB Corporation," a publicly traded company; (c) a brokerage account consisting of shares in various publicly traded companies; (d) "CHB Corporation," a closely held business owned by the decedent and the decedent's family; and (e) a 5 percent interest in "RP," a privately held rental real estate partnership. Does the Statement apply to any of the following assets owned by the estate? (See *Illustration 10* at paragraph .27 of this Interpretation regarding the valuation of a security.)

.48 Illustration 13a. Does the Statement apply to shares in a publicly traded company, "TI Corporation," whose shares are traded infrequently?

.49 Conclusion. It depends; although the price of a share of publicly traded stock is ascertainable from published sources, there are no definitive criteria that would indicate when the Statement applies to shares that are infrequently traded. A key consideration is the average daily trading volume of TI Corporation stock on or around the valuation date. The concept of fair market value incorporates the notions that (1) cash could have been received for the stock at the valuation date, and (2) the share price of an infrequently traded stock could decrease if a relatively large block of the stock were to be put on the market on that date. If the subject shares held by the estate do not represent a significant percentage of the daily trading volume of TI stock on or around the valuation date, and the price of a share of the stock is readily ascertainable on the valuation date, then the resulting value (the quoted share price times the number of shares owned) represents a cash price that could have been received at the valuation date for the block, and the Statement does not apply because the calculation of value is mechanical (SSVS No. 1, paragraph 9(a) [VS section 100.09a]). If, however, the subject shares held by the estate represent a large percentage of the average daily trading volume of the stock, the quoted market price for a share may not be adequate for purposes of determining the fair market value of the block of shares on the valuation date. In that case, the Statement applies because valuation approaches and methods need to be applied, and professional judgment needs to be used in determining the value of the block (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]) (See *Illustration 10* at paragraph .27 of this Interpretation regarding the valuation of a security.)

.50 Illustration 13b. Does the Statement apply to a large block of stock in "LB Corporation," a publicly traded company?

.51 Conclusion. The answer depends on the amount of shares to be valued in relation to the average daily trading volume in LB Corporation on or around the valuation date. There are no definitive criteria that would indicate when the Statement applies to the valuation of a large block of publicly traded stock. The concept of fair market value incorporates the notion that cash could have been received from a sale of the block on the valuation date. A large block could decrease the share price if sold on the valuation date. The Statement would typically not apply to the valuation of a large block (for example, 200,000 shares) of a large and actively-traded public company. Even though the value of the estate's stock may be large in absolute terms, the daily trading volume in such stock on the valuation date may be sufficiently high that a sale of the block on the valuation date would not affect the market price of a company's

shares. In such a case, the quoted market price of a share times the number of shares held by the estate may be considered to reflect the fair market value of the subject block of stock, and because it would not be the case that valuation approaches and methods would need to be applied and professional judgment used, the Statement would not apply. If, however, the large block of publicly traded shares represents a significant percentage of the daily trading volume, the Statement would apply because valuation approaches and methods would need to be applied and professional judgment used to determine the value (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]).

.52 *Illustration 13c.* Does the Statement apply to a brokerage account consisting of shares in various publicly traded companies?

.53 *Conclusion.* The Statement would not apply to the determination of the value of a brokerage account consisting of publicly traded securities, except as discussed in paragraphs .49 and .51 of this Interpretation. Absent certain scenarios involving infrequently traded securities or large blocks of stock, the application of valuation approaches and methods and the use of professional judgment are not necessary in that determination (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]).

.54 *Illustration 13d.* Does the Statement apply to "CHB Corporation," a closely held business owned by the decedent and the decedent's family?

.55 *Conclusion.* The Statement would apply to the determination of value of CHB Corporation because valuation approaches and methods need to be applied, and professional judgment needs to be used to determine the fair market value of the ownership interest in CHB (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]).

.56 *Illustration 13e.* Does the Statement apply to a 5 percent interest in a privately held rental real estate partnership (RP)?

.57 *Conclusion.* The Statement would apply to the determination of value of the 5 percent interest in rental real estate partnership (RP) because valuation approaches and methods need to be applied and professional judgment needs to be used to determine the fair market value of the ownership of a fractional interest in a privately held partnership (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]). However, where it is not practical or not reasonable to obtain or use relevant information and, therefore, the member is unable to apply valuation approaches and methods, the Statement would not apply. For example, the member has requested from RP's general partner financial information the member needs in order to apply valuation approaches and methods. The general partner is not responsive to the member's requests, and the due date for filing the estate tax return is near. Given the small ownership interest, and given that RP is likely a relatively small percent of the total estate, unless prohibited by statute or by rule, the member may then use the taxpayer's estimates if the member determines that the estimates are reasonable (based on the facts and circumstances known to the member) (SSVS No. 1, paragraph 9(b) [VS section 100.09b]).

.58 *Illustration 14.* Would the answers to *Illustration 13* change if the values were provided by the client or a client-engaged third party?

.59 *Conclusion.* The Statement would not apply if the values were provided by the client or by a client-engaged third party because the member is not applying valuation approaches and methods and using professional judgment to determine value (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]). However, the member would be subject to Statement on Standards for Tax Services No. 3, *Certain Procedural Aspects of Preparing Returns* [TS section 300],

in providing appropriate due diligence with respect to the values provided to the member. It is also recommended that the understanding between member and client in these circumstances include documentation of the fact that the member is not determining but rather is being provided with the value of the subject interest.

.60 Illustration 15. Would the answers to *Illustration 13* change if the values were provided by an outside third-party specialist hired by the member?

.61 Conclusion. If the member engages an outside third-party specialist to assist with the member's work, and it is the member expressing a conclusion or calculated value, the member will be applying valuation approaches and methods and using professional judgment; thus, the Statement would apply (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]; SSVS No. 1, paragraph 20, "Using the Work of Specialists in the Valuation Engagement," [VS section 100.20]). If, however, the third-party specialist is determining the value in his or her own name and providing that value to the client, and the member will not be applying valuation approaches and methods or using professional judgment (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04], and *Illustration 6*), the Statement would not apply, but the member would be subject to Statement on Standards for Tax Services No. 3, *Certain Procedural Aspects of Preparing Returns* [TS section 300] in providing appropriate due diligence with respect to the values provided.

.62 Illustration 16. The client and the member agree that the member will value a partnership interest and then apply an "average" discount that the member is to determine (based on the results of various studies and case law). Does the Statement apply? If so, is this a valuation engagement or a calculation engagement?

.63 Conclusion. Yes, the Statement applies because the member determined the value of the partnership interest by applying valuation approaches and valuation methods and using professional judgment. This would be considered a calculation engagement because the member and the client have agreed on the specific valuation approaches or valuation methods the valuation analyst will use and the extent of valuation procedures the valuation analyst will perform (SSVS No. 1, paragraph 21(b) [VS section 100.21b] and *Illustration 6*).

.64 Illustration 17. Would the Statement apply if a member has an informal conversation or communicates in writing with a client regarding the alternative tax consequences of gifting versus selling a business using a presumption of a specific value of the business?

.65 Conclusion. No, the Statement would not apply. The member is providing tax advice using an assumed or hypothetical value of a business and is not determining value, applying valuation approaches and methods, and using professional judgment to value a business (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04], and *Illustration 6*).

.66 Illustration 18. Would the Statement apply to a transfer pricing study (IRC section 482) that involves the use of specific methodologies, data, terminology, and documentation requirements that are provided in the IRS regulations and procedures, and whose methodologies and documentation requirements differ from those contained in the Statement?

.67 Conclusion. No. To the extent that the transfer pricing study applies, for example, to the valuation of inventory or services, the Statement would not apply (see SSVS No. 1, paragraph 1 [VS section 100.01] and *Illustration 6*). To the extent that the transfer pricing study applies to the valuation of intangible assets, the Statement would normally apply. However, because the

IRS regulations require that the taxpayer reasonably calculate an arm's-length price according to the best method that is determined using third-party comparable data under explicit IRS rules and documentation procedures, and to the extent these IRS rules and procedures differ from the Statement, the jurisdictional exception (SSVS No. 1, paragraph 10 [VS section 100.10]) would exempt the valuation of the intangible assets from the developmental provisions of the Statement (SSVS No. 1, paragraphs 25–48 [VS section 100.25–.48]). In addition, to the extent that the IRS regulations (such as IRS regulation section 1.6662-6(d) (2) (iii)) and procedures provide specific documentation requirements for avoiding potential penalties, and if a transfer pricing report is provided to a client according to such IRS documentation requirements, the jurisdictional exception would apply to the reporting provisions of the Statement (SSVS No. 1, paragraphs 50–78 [VS section 100.50–.78]) and thus a valuation report would not be necessary.

.68 Illustration 19. In a situation where the Statement applies to members who determine value as part of tax engagements, would the member also be required to be in compliance with the Statements on Standards for Tax Services (SSTSs) [TS sections 100–900]?

.69 Conclusion. Yes, the Statement would apply only to the valuation determination and reporting aspects of the engagement but the SSTSs would apply to all aspects of the engagement. For example, even though the Statement would govern the determination of value of an applicable asset reported on a tax return, the member would also have to be in compliance with SSTS No. 1, *Tax Return Positions*, [TS section 100], for that valuation.

.70 Illustration 21. Do settlements or negotiations of value in offers-in-compromise or tax disputes fall under the Statement?

.71 Conclusion. No, settlements or negotiations of value in offers-in-compromise or tax disputes are part of a tax process. However, if a member prepares a valuation in preparation for a settlement or negotiation of value, and the valuation involves the application of valuation approaches and methods and the use of professional judgment, the valuation would fall under the developmental aspects of the Statement. The settlement or negotiation process itself is not a valuation and would not fall under the Statement. In addition, the Statement's reporting exemption for certain controversy proceedings would apply as the valuation was performed specifically for the administrative matter (SSVS No. 1, paragraph 50 [VS section 100.50]).

Illustrations Relating to Other Engagements

.72 Illustration 20. Does determining the value of accounts receivable fall under the Statement?

.73 Conclusion. No, accounts receivable constitute **tangible assets** under the Statement (SSVS No. 1, Appendix B [VS section 100.81], and do not constitute a subject interest (SSVS No. 1, paragraph 1 [VS section 100.01]).

.74 Illustration 22. In the course of performing a valuation under the Statement, if a valuation analyst prepares prospective financial information (for example, as part of a discounted cash flow or discounted earnings analysis within the income approach), does this require the valuation analyst to examine or compile such information in accordance with the Statements on Standards for Attestation Engagements (SSAEs) [AT sections 20–701]?

.75 Conclusion. No, Chapter 1, "Attest Engagements," of SSAE No. 10, *Attestation Standards: Revision and Recodification*, as amended [AT section 101.01] states that the attestation standards apply when a practitioner is "engaged to issue or does issue an examination, a review, or an agreed-upon procedures report on subject matter, or an assertion about the subject matter..., that is the responsibility of another party." If the valuation analyst has not been engaged to examine, compile, assemble, review, or apply agreed-upon procedures to prospective financial information, and does not issue an examination, compilation, assembly, or agreed-upon report on prospective financial information, the SSAEs [AT sections 20–701] do not apply (SSARS 14 [AR section 120]).

.76 Illustration 23. Under a valuation engagement, a valuation analyst is free to select any and all valuation approaches and methods the valuation analyst deems appropriate in the circumstances. Under a calculation engagement, the valuation analyst and the client agree to the specific approaches or methods the valuation analyst will use or the extent of calculation procedures the valuation analyst will perform. (SSVS No. 1, paragraph 21 [VS section 100.21]) Under SSVS No. 1, paragraph 18 [VS section 100.18], a restriction or limitation on the scope of the valuation analyst's work, or the data available for analysis may be present and known to the valuation analyst at the outset of the engagement, or may arise during the course of an engagement (and such restriction or limitation should be disclosed in the report). Is it possible to have a restriction or limitation that is of such a degree that a valuation analyst engaged to perform a valuation engagement should propose altering the engagement to be a calculation engagement?

.77 Conclusion. Although the two engagements represent two different types of service performed by valuation analysts, the possibility exists. If, in the course of a valuation engagement, restrictions, or limitations on the scope of the valuation analyst's work or the data available for analysis are so significant that the valuation analyst believes that he or she cannot, even with disclosure in the valuation report of the restrictions or limitations, adequately perform a valuation engagement leading to a conclusion of value, the valuation analyst should determine whether he or she has the ability to adequately complete the engagement as a calculation engagement or should consider resigning from the engagement.

.78 Illustration 24. If a member employed in industry, government, or education "moonlights" doing engagements to estimate value, do the Standards apply?

.79 Conclusion. Yes, the Standard applies. By moonlighting, the member is holding him or herself out as a certified public accountant and as being in public practice. The Standard would apply just as it would to any other member in public practice unless one of the exceptions applies.

.80 Illustration 25. Does the Statement apply to an assignment from an employer to an employee member not in public practice to prepare a valuation for internal financial reporting purposes?

.81 Conclusion. No, SSVS No. 1, paragraph 7 [VS section 100.07] exempts internal use assignments from an employer to an employee member not in the practice of public accounting. However, if the valuation is to be used for financial reporting purposes, the employer and the employee may wish to consider whether the work will be accepted by the employer's outside auditors if the statement is not followed.

Illustrations for PFP-Specific Engagements

These illustrations assume the member has not been engaged to perform a business valuation.

.82 Illustration 26. When does the Statement apply to members who determine values related to personal financial planning engagements?

.83 Conclusion. The Statement applies to personal financial planning engagements when the member determines the value of a business, business ownership interest, security, or intangible asset (SSVS No. 1, paragraph 1 [VS section 100.01]) and in the process of determining the value applies valuation approaches and methods and uses professional judgment (SSVS No. 1, paragraph 4 [VS section 100.04]) unless an exception applies (SSVS No. 1, paragraphs 5–10 [VS section 100.05–.10]).

.84 Illustration 27. If a member is engaged to provide personal financial planning services to a client and, in the course of the engagement, estimates the proceeds from a hypothetical future sale of the client's business interest, does the Statement apply?

.85 Conclusion. No. The Statement does not apply because estimate of future sales proceeds does not in itself constitute a valuation engagement (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]).

.86 Illustration 28. A member is engaged to provide personal financial planning services to a client and, in the course of the engagement, estimates the proceeds from a hypothetical future sale of the client's business interest. As part of that engagement, the member shares general industry knowledge to assist the client in estimating the current value of the business interest. Does the Statement apply?

.87 Conclusion:

(a) If, in the process of determining the current value from which the member estimates future sales proceeds, the member applies valuation approaches and methods and uses professional judgment, the Statement applies to the determination of the current value (SSVS No. 1, paragraph 4 [VS section 100.04]). However, the Statement does not apply when the member shares general industry knowledge with the client instead of applying professional judgment.

(b) If the client or another party provides the current value, and the member does not apply valuation approaches and methods, the Statement does not apply (SSVS No. 1, paragraphs 4 and 6 [VS section 100.04 and .06]).

(c) If the member uses a hypothetical or assumed value as the starting point for the calculation of future sales proceeds and does not apply valuation approaches and methods, the Statement does not apply (SSVS No. 1, paragraphs 1 and 4 [VS section 100.01 and .04]). The Statement does not apply to a general discussion with the client of valuation concepts or industry price multiples based on the member's industry knowledge, which assists the client in determining a hypothetical or assumed value (SSVS No. 1, paragraphs 4 and 6 [VS section 100.04 and .06]).

.88 Illustration 29. The client has asked the member to prepare a personal financial plan that includes an estimate of future proceeds from a sale of the business interest at retirement. The member estimates the future proceeds based on an estimate of the business' current value by applying a rule of thumb for the business' industry, but the member does not consider the risk factors of the subject interest or exercise other professional judgment in applying the multiple. Does the Statement apply?

.89 Conclusion. No, the Statement does not apply because the member did not use professional judgment (SSVS No. 1, paragraph 4 [VS section 100.04]). If the member considers specific risk factors of the business interest in applying the price multiple, the Statement applies.

This Statement titled Valuation of a Business, Business Ownership Interest, Security, or Intangible Asset was unanimously adopted by the assenting votes of the AICPA Consulting Services Executive Committee.

FS Section

STATEMENT ON STANDARDS FOR
FORENSIC SERVICES

Statements on Standards for Forensic Services (SSFSSs) are issued by the Forensic and Valuation Services Executive Committee (FVS Executive Committee). The FVS Executive Committee provides guidance and establishes enforceable standards for members performing certain forensic and valuation services. The AICPA Council has designated the FVS Executive Committee as a body to establish professional standards under the "Compliance With Standards Rule," found in ET sections 1.310.001 and 2.310.001 of the AICPA Code of Professional Conduct. Members should be prepared to justify departures from this section (ET sec. 0.100.010).

Statement on Standards for Forensic Services No. 1

Source: Statement on Standards for Forensic Services No. 1

Effective for engagements accepted on or after January 1, 2020.

June 2019

Why Issued

The term *forensic* is defined as "used in, or suitable to, courts of law or public debate."¹ Forensic accounting services² generally involve the application of specialized knowledge and investigative skills by a member³ to collect, analyze, and evaluate certain evidential matter and to interpret and communicate findings (forensic services).

The FVS Executive Committee has issued this standard to protect the public interest by preserving and enhancing the quality of practice of a member performing forensic services. Practice aids and other guidance issued at the direction of the FVS Executive Committee continue to serve as nonauthoritative guidance on the application of professional standards.⁴ Authoritative standards and nonauthoritative guidance are not a substitute for the use of professional judgment.

Introduction and Scope — Forensic Services

.01 This section establishes standards for a member providing services to a client⁵ as part of the following engagements:

- *Litigation*. An actual or potential legal or regulatory proceeding before a trier of fact or a regulatory body as an expert witness, consultant, neutral, mediator, or arbitrator in connection with the resolution of disputes between parties. The term *litigation* as used herein is not limited to formal litigation but is inclusive of disputes and all forms of alternative dispute resolution.
- *Investigation*. A matter conducted in response to specific concerns of wrongdoing in which the member is engaged to perform procedures to collect, analyze, evaluate, or interpret certain evidential matter to assist the stakeholders (for example, client, board of directors, independent auditor, or regulator) in reaching a conclusion on the merits of the concerns.

¹ Bryan A. Garner, ed. *Black's Law Dictionary*, 10 ed., St. Paul, MN: Thomson West Publishing Co., 2014.

² ET section 1.295.140.01.

³ ET section 0.400.31.

⁴ Professionals should be aware of any governmental regulations and other professional standards applicable to the engagement.

⁵ See ET section 0.400.07 for the definition of *client*, which indicates there may be multiple clients for one engagement.

.02 For purposes of this section, forensic services consist of either litigation or investigation engagements. When an engagement meets the definition of *forensic services*, CS section 100, *Consulting Services: Definitions and Standards*, does not apply. This section applies when services provided under VS section 100, *Valuation of a Business, Business Ownership Interest, Security, or Intangible Asset*, are provided as part of a litigation or investigation engagement.

Except as provided hereunder, this section does not apply to a member who performs forensic services as part of an attest engagement (for example, as part of an audit, review, or compilation) or under TS section 100, *Tax Return Positions*.

When a member is engaged as an expert witness by one party in a litigation engagement to provide expert opinions, the member may not perform the work under AT-C section 215, *Agreed-Upon Procedures Engagements* (AUP standard). When performing services under the AUP standard, "the member does not perform an examination or a review and does not provide an opinion or conclusion." However, results may be reported under the AUP standard in an engagement in which a member is engaged by the trier of fact or both sides of the dispute jointly, or both. In each scenario, this section and the AUP standard applies.

.03 The key consideration of this section's applicability is the purpose for which the member was engaged (for example, litigation or investigation) as opposed to the skill set employed or services provided. As an example, a member may provide data analysis services in a client engagement that does not constitute a litigation or investigation engagement. Conversely, similar data analysis services may also be performed in a client engagement, which constitutes a litigation or investigation engagement. This section would apply under the second scenario and would not apply under the first scenario.

.04 This section applies when a member, who may have been engaged originally to perform services under another set of standards, discovers that the original scope of the engagement has been modified or amended and has become a litigation or investigation engagement. The member should modify his or her understanding with the client if such an engagement converts to a forensic services engagement.

.05 This section is not applicable to internal use assignments from employers to employee members not in public practice. *Public practice* is defined as the performance of professional services for a client by a member or member's firm (ET sec. 0.400.42). The definition of a *client* specifically excludes a member's employer (ET sec. 0.400.07).

Standards for Forensic Services

.06 The general standards of the profession are contained in the "General Standards Rule" (ET sec. 1.300.001 and 2.300.001) and apply to all services performed by a member, including forensic services. They are as follows:

- *Professional competence.* Undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence.
- *Due professional care.* Exercise due professional care in the performance of professional services.

- *Planning and supervision.* Adequately plan and supervise the performance of professional services.
- *Sufficient relevant data.* Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.07 A member must serve his or her client with integrity and objectivity, as required by the AICPA Code of Professional Conduct. A member performing forensic services should not subordinate his or her opinion to that of any other party.

.08 A member performing forensic services must follow additional general standards, which are promulgated to address the distinctive nature of such services. These standards are established under the "Compliance With Standards Rule" (ET sec. 1.300.001 and 2.300.001):

- *Client interest.* Serve the client interest by seeking to accomplish the objectives established by the understanding with the client while maintaining integrity and objectivity.
 - *Integrity.* Integrity is described as follows: "Integrity requires a member to be, among other things, honest and candid within the constraints of client confidentiality. Service and the public trust should not be subordinated to personal gain and advantage. Integrity can accommodate the inadvertent error and the honest difference of opinion; it cannot accommodate deceit or subordination of principle." (ET sec. 0.300.040)
 - *Objectivity.* Objectivity is described as follows: "Objectivity is a state of mind, a quality that lends value to a member's services. It is a distinguishing feature of the profession. The principle of objectivity imposes the obligation to be impartial, intellectually honest, and free of conflicts of interest." (ET sec. 0.300.050)
- *Understanding with client.* Establish with the client a written or oral understanding about the responsibilities of the parties and the nature, scope, and limitations of services to be performed and modify the understanding if circumstances require a significant change during the engagement.
- *Communication with client.* Inform the client of (a) conflicts of interest that may occur pursuant to the "Integrity and Objectivity Rule" (ET sec. 1.100.001 and 2.100.001), (b) significant reservations concerning the scope or benefits of the engagement, and (c) significant engagement findings or events.

The "Conflicts of Interest for Members in Public Practice" interpretation (ET sec. 1.110.010) under the "Integrity and Objectivity Rule" provides guidance about the identification, evaluation, disclosures, and consent related to conflict of interest. This section states, in part, the following:

- In determining whether a professional service, relationship, or matter would result in a conflict of interest, a member should use professional judgment, taking into account whether a reasonable and informed third party who

is aware of the relevant information would conclude that a conflict of interest exists.

.09 A member engaged as an expert witness in a litigation engagement may not provide opinions pursuant to a contingent fee arrangement, unless explicitly allowed otherwise under the "Contingent Fees Rule" (ET sec. 1.510.001).

.10 The ultimate decision regarding the occurrence of fraud is determined by a trier of fact; therefore, a member performing forensic services is prohibited from opining regarding the ultimate conclusion of fraud. This does not apply when the member is the trier of fact. A member may provide expert opinions relating to whether evidence is consistent with certain elements of fraud or other laws based on objective evaluation.

Effective Date

.11 This section is effective for new engagements accepted on or after January 1, 2020. Early application of the provisions of this section is permissible.

CS Section
CONSULTING SERVICES

**STATEMENT ON
STANDARDS FOR CONSULTING SERVICES**

Statements on Standards for Consulting Services are issued by the AICPA Management Consulting Services Executive Committee, the senior technical committee of the Institute designated to issue pronouncements in connection with consulting services. Council has designated the AICPA Management Consulting Services Executive Committee as a body to establish professional standards under the "Compliance with Standards Rule" (ET sec. 1.310.001) of the Institute's Code of Professional Conduct (code). Members should be prepared to justify departures from this statement.

Consulting Services: Definitions and Standards

Source: Statement on Standards for Consulting Services No. 1

Effective for engagements accepted on or after January 1, 1992, unless otherwise indicated.

Introduction

.01 Consulting services that CPAs provided to their clients have evolved from advice on accounting-related matters to a wide range of services involving diverse technical disciplines, industry knowledge, and consulting skills. Most practitioners, including those who provide audit and tax services, also provide business and management consulting services to their clients.

.02 Consulting services differ fundamentally from the CPA's function of attesting to the assertions of other parties. In an attest service, the practitioner expresses a conclusion about the reliability of a written assertion that is the responsibility of another party, the assertor. In a consulting service, the practitioner develops the findings, conclusions, and recommendations presented. The nature and scope of work is determined solely by the agreement between the practitioner and the client. Generally, the work is performed only for the use and benefit of the client.

.03 Historically, CPA consulting services have been commonly referred to as management consulting services, management advisory services, business advisory services, or management services. A series of Statements on Standards for Management Advisory Services (SSMASs) previously issued by the AICPA contained guidance on certain types of consulting services provided by members. This Statement on Standards for Consulting Services (SSCS) supersedes the SSMASs and provides standards of practice for a broader range of professional services, as described in paragraph .05.

.04 This SSCS and any subsequent SSCSs apply to any AICPA member holding out as a CPA while providing consulting services as defined herein.

Definitions

.05 Terms established for the purpose of SSCSs are as follows:

Consulting services practitioner. Any AICPA member holding out as a CPA while engaged in the performance of a Consulting Service for a client, or any other individual who is carrying out a Consulting Service for a client on behalf of any Institute member or member's firm holding out as a CPA.

Consulting process. The analytical approach and process applied in a Consulting Service. It typically involves some combination of activities relating to determination of client objective, fact-finding, definition of the problems or opportunities, evaluation of alternatives, formulation of proposed action, communication of results, implementation, and follow-up.

Consulting services. Professional services that employ the practitioner's technical skills, education, observations, experiences, and knowledge of the consulting process.¹ Consulting services may include one or more of the following:

- a. *Consultations*, in which the practitioner's function is to provide counsel in a short time frame, based mostly, if not entirely, on existing personal knowledge about the client, the circumstances, the technical matters involved, client representations, and the mutual intent of the parties. Examples of consultations are reviewing and commenting on a client-prepared business plan and suggesting computer software for further client investigation.
- b. *Advisory services*, in which the practitioner's function is to develop findings, conclusions, and recommendations for client consideration and decision making. Examples of advisory services are an operational review and improvement study, analysis of an accounting system, assistance with strategic planning, and definition of requirements for an information system.
- c. *Implementation services*, in which the practitioner's function is to put an action plan into effect. Client personnel and resources may be pooled with the practitioner's to accomplish the implementation objectives. The practitioner is responsible to the client for the conduct and management of engagement activities. Examples of implementation services are providing computer system installation and support, executing steps to improve productivity, and assisting with the merger of organizations.
- d. *Transaction services*, in which the practitioner's function is to provide services related to a specific client transaction, generally with a third party. Examples of transaction services are insolvency services, valuation services, preparation of information for obtaining financing, analysis of a potential merger or acquisition, and litigation services.
- e. *Staff and other support services*, in which the practitioner's function is to provide appropriate staff and possibly other support to perform tasks specified by the client. The staff provided will be directed by the client as circumstances require. Examples of staff and other support services are data processing facilities management, computer programming, bankruptcy trusteeship, and controllership activities.
- f. *Product services*, in which the practitioner's function is to provide the client with a product and associated professional services in support of the installation, use, or maintenance of the product.

¹ The definition of consulting services excludes the following:

- a. Services subject to other AICPA professional standards such as Statements on Auditing Standards (SASs), Statements on Standards for Attestation Engagements (SSAEs), or Statements on Standards for Accounting and Review Services (SSARSs). (These excluded services may be performed in conjunction with consulting services, but only the consulting services are subject to the Statement on Standards for Consulting Services [SSCS].)
- b. Engagements specifically to perform tax return preparation, tax planning or advice, tax representation, personal financial planning or bookkeeping services, or situations involving the preparation of written reports or the provision of oral advice on the application of accounting principles to specified transactions or events, either completed or proposed, and the reporting thereof.
- c. Recommendations and comments prepared during the same engagement as a direct result of observations made while performing the excluded services.

Examples of product services are the sale and delivery of packaged training programs, the sale and implementation of computer software, and the sale and installation of systems development methodologies.

Standards for Consulting Services

.06 The general standards of the profession are contained in the "General Standards Rule" of the code (ET sec. 1.300.001 and 2.300.001) and apply to all services performed by members. They are as follows:

- *Professional competence.* Undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence.
- *Due professional care.* Exercise due professional care in the performance of professional services.
- *Planning and supervision.* Adequately plan and supervise the performance of professional services.
- *Sufficient relevant data.* Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.07 The following additional general standards for all consulting services are promulgated to address the distinctive nature of consulting services in which the understanding with the client may establish valid limitations on the practitioner's performance of services. These standards are established under the "Compliance with Standards Rule" of the code (ET sec. 1.310.001 and 2.310.001):

- *Client interest.* Serve the client interest by seeking to accomplish the objectives established by the understanding with the client while maintaining integrity and objectivity.²
- *Understanding with client.* Establish with the client a written or oral understanding about the responsibilities of the parties and the nature, scope, and limitations of services to be performed, and modify the understanding if circumstances require a significant change during the engagement.
- *Communication with client.* Inform the client of (a) conflicts of interest that may occur pursuant to the "Integrity and Objectivity Rule" of the code (ET sec. 1.100.001 and 2.100.001),³ (b) significant

² In "Integrity" (ET sec. 0.300.040), *integrity* is described as follows: "Integrity requires a member to be, among other things, honest and candid within the constraints of client confidentiality. Service and the public trust should not be subordinated to personal gain and advantage. Integrity can accommodate the inadvertent error and the honest difference of opinion; it cannot accommodate deceit or subordination of principle."

In "Objectivity and Independence" (ET sec. 0.300.050), *objectivity* and *independence* are differentiated as follows: "Objectivity is a state of mind, a quality that lends value to a member's services. It is a distinguishing feature of the profession. The principle of objectivity imposes the obligation to be impartial, intellectually honest, and free of conflicts of interest. *Independence* precludes relationships that may appear to *impair a member's* objectivity in rendering attestation services."

³ The "Conflict of Interest Rule" (ET sec. 1.110.010) states, in part, the following:

A conflict of interest may occur if a *member* or the *member's firm* has a relationship with another person, entity, product, or service that, in the member's professional judgment, the client or other appropriate parties may view as impairing the *member's* objectivity...

A *member* may perform the *professional service* if he or she determines that the service can be performed with objectivity because the *threats* are not significant or can be reduced to an *acceptable level* through the application of *safeguards*...

reservations concerning the scope or benefits of the engagement, and (c) significant engagement findings or events.

.08 Professional judgment must be used in applying Statements on Standards for Consulting Services in a specific instance because the oral or written understanding with the client may establish constraints within which services are to be provided. For example, the understanding with the client may limit the practitioner's effort with regard to gathering relevant data. The practitioner is not required to decline or withdraw from a consulting engagement when the agreed-upon scope of services includes such limitations.

Consulting Services for Attest Clients

.09 The performance of consulting services for an attest client does not impair independence.⁴ However, members and their firms performing attest services for a client should comply with applicable independence standards, rules and regulations issued by AICPA, the state boards of accountancy, state CPA societies, and other regulatory agencies.

Effective Date

.10 This section is effective for engagements accepted on or after January 1, 1992. Early application of the provisions of this section is permissible.

[Revised, January 2015, to reflect the revised Code of Professional Conduct.]

⁴ AICPA independence standards relate only to the performance of attestation services; objectivity standards apply to all services. See footnote 2.

QUALITY MANAGEMENT

STATEMENTS ON QUALITY MANAGEMENT STANDARDS

Statements on Quality Management Standards (previously titled Statements on Quality Control Standards) are issued by the Auditing Standards Board, the senior technical body of the AICPA designated to issue pronouncements on auditing, attestation, and quality control matters. The "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct requires compliance with these standards when firms perform auditing and accounting services for a nonissuer.

QM Section 10

A Firm's System of Quality Management

(Supersedes SQCS No. 8.)

Source: SQMS No. 1.

Systems of quality management in compliance with this section are required to be designed and implemented by December 15, 2025, and the evaluation of the system of quality management required by paragraphs .54-.55 is required to be performed within one year following December 15, 2025.

Introduction

Scope of This Section

.01 This section deals with a firm's responsibilities to design, implement, and operate a system of quality management for its accounting and auditing practice.

.02 Engagement quality reviews form part of the firm's system of quality management and

- a. this section addresses the firm's responsibility to establish policies or procedures addressing engagements that are required to be subject to engagement quality reviews.
- b. section 20, *Engagement Quality Reviews*, deals with the appointment and eligibility of the engagement quality reviewer, and the performance and documentation of the engagement quality review.

.03 Other professional standards include requirements for engagement partners and other engagement team members regarding quality management at the engagement level. For example, Statement on Auditing Standards (SAS) No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards* (AU-C sec. 220), deals with the specific responsibilities of the auditor regarding quality management at the engagement level for an audit of financial statements and the related responsibilities of the engagement partner. Other professional standards, including AT-C section 105, *Concepts Common to All Attestation Engagements*, and AR-C section 60, *General Principles for Engagements Performed in Accordance With Statements on Standards for Accounting and Review Services*, also establish requirements for the engagement partner for the management of quality at the engagement level.

.04 This section is to be read in conjunction with the AICPA Code of Professional Conduct (AICPA code) and other relevant ethical requirements. Law, regulation, or relevant ethical requirements may establish responsibilities for the firm's management of quality beyond those described in this section. (Ref: par. A1)

.05 This section applies to audit and attestation engagements performed by a firm in accordance with *Government Auditing Standards*. This section does not apply to government audit organizations. Instead, those government audit

organizations are subject to the quality control and assurance requirements of *Government Auditing Standards*.

.06 This section applies to all firms that perform any engagement included in a firm's accounting and auditing practice. The system of quality management that is established in accordance with the requirements of this section enables the consistent performance by the firm of all such engagements.

The Firm's System of Quality Management

.07 A system of quality management operates in a continual and iterative manner and is responsive to changes in the nature and circumstances of the firm and its engagements. It does not operate in a linear manner. However, for the purposes of this section, a system of quality management addresses the following eight components: (Ref: par. .A2)

- a. The firm's risk assessment process
- b. Governance and leadership
- c. Relevant ethical requirements
- d. Acceptance and continuance of client relationships and specific engagements
- e. Engagement performance
- f. Resources
- g. Information and communication
- h. The monitoring and remediation process

.08 This section requires the firm to apply a risk-based approach in designing, implementing, and operating the components of the system of quality management in an interconnected and coordinated manner such that the firm proactively manages the quality of engagements performed by the firm. (Ref: par. .A3)

.09 The risk-based approach is embedded in the requirements of this section through the following:

- a. *Establishing quality objectives.* The quality objectives established by the firm consist of objectives in relation to the components of the system of quality management that are to be achieved by the firm. The firm is required to establish the quality objectives specified by this section and any additional quality objectives considered necessary by the firm to achieve the objectives of the system of quality management.
- b. *Identifying and assessing risks to the achievement of the quality objectives* (referred to in this section as *quality risks*). The firm is required to identify and assess quality risks to provide a basis for the design and implementation of responses.
- c. *Designing and implementing responses to address the quality risks.* The nature, timing, and extent of the firm's responses to address the quality risks are based on, and responsive to, the reasons for the assessments given to the quality risks.

.10 This section requires that, at least annually, the individual or individuals assigned ultimate responsibility and accountability for the system of quality management, on behalf of the firm, evaluate the system of quality management and conclude whether the system of quality management provides the firm with reasonable assurance that the objectives of the system, stated in paragraph .15a–b, are being achieved. (Ref: par. .A4)

Scalability

.11 In applying a risk-based approach, the firm is required to take into account

- a. the nature and circumstances of the firm, and
- b. the nature and circumstances of the engagements performed by the firm.

Accordingly, the design of the firm's system of quality management — in particular, the complexity and formality of the system — will vary. For example, a firm that performs different types of engagements for a wide variety of entities, such as audits of specialized industries or group audits for multinational entities, will likely need to have a more complex and formalized system of quality management and supporting documentation than a firm that performs only reviews of financial statements or compilation engagements.

Networks and Service Providers

.12 This section addresses the firm's responsibilities when the firm

- a. belongs to a network, and the firm complies with network requirements or uses network services in the system of quality management or in performing engagements, or
- b. uses resources from a service provider in the system of quality management or in performing engagements.

Even when the firm complies with network requirements or uses network services or resources from a service provider, the firm is responsible for its system of quality management.

Authority of This Section

.13 Paragraph .15 contains the objective of the firm in following this section. This section contains the following: (Ref: par. .A5)

- a. Requirements designed to enable the firm to meet the objective in paragraph .15 (Ref: par. .A6)
- b. Related guidance in the form of application and other explanatory material (Ref: par. .A7)
- c. Introductory material that provides context relevant to a proper understanding of this section
- d. Definitions (Ref: par. .A8)

Effective Date

.14 Systems of quality management in compliance with this section are required to be designed and implemented by December 15, 2025, and the evaluation of the system of quality management required by paragraphs .54–.55 is required to be performed within one year following December 15, 2025.

Objective

.15 The objective of the firm is to design, implement, and operate a system of quality management for engagements performed by the firm in its accounting and auditing practice that provides the firm with reasonable assurance that

- a. the firm and its personnel fulfill their responsibilities in accordance with professional standards and applicable legal and regulatory requirements and conduct engagements in accordance with such standards and requirements, and
- b. engagement reports issued by the firm are appropriate in the circumstances.

.16 The public interest is served by the consistent performance of quality engagements. The design, implementation, and operation of the system of quality management enables the consistent performance of quality engagements by providing the firm with reasonable assurance that the objectives of the system of quality management, stated in paragraph .15a–b, are achieved. Quality engagements are achieved through planning and performing engagements and reporting on them in accordance with professional standards and applicable legal and regulatory requirements. Achieving the objectives of those standards and complying with the requirements of applicable law or regulation involves exercising professional judgment and, when applicable to the type of engagement, maintaining professional skepticism.

Definitions

.17 For purposes of the QM sections, the following terms have the meanings attributed as follows:

Accounting and auditing practice. A practice that performs engagements covered by this section, which are audit, attestation, review, compilation, and any other services for which standards have been promulgated by the AICPA Auditing Standards Board (ASB) or the AICPA Accounting and Review Services Committee (ARSC) under the "General Standards Rule" (ET sec. 1.300.001) or the "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA code. (Ref: par. .A9)

Deficiency in the firm's system of quality management (referred to as *deficiency* in this section). This exists when (Ref: par. .A10 and .A174–.A175)

- a quality objective required to achieve the objective of the system of quality management is not established;
- a quality risk, or combination of quality risks, is not identified or properly assessed; (Ref: par. .A11)
- a response, or combination of responses, does not reduce to an acceptably low level the likelihood of a related quality risk occurring because the responses are not properly designed, implemented, or operating effectively; or
- another aspect of the system of quality management is absent, or not properly designed, implemented, or operating effectively, such that a requirement of this section has not been addressed. (Ref: par. .A12–.A13)

Engagement documentation. The record of work performed, results obtained, and conclusions the practitioner reached (terms such as *working papers* or *work papers* are sometimes used).

Engagement partner. The partner or other individual appointed by the firm who is responsible for the engagement and its performance, and for the report that is issued on behalf of the firm, and who, when

required, has the appropriate authority from a professional, legal, or regulatory body.

Engagement quality review. An objective evaluation of the significant judgments made by the engagement team and the conclusions reached thereon performed by the engagement quality reviewer and completed on or before the date of the engagement report.

Engagement quality reviewer. A partner, other individual in the firm, or an external individual appointed by the firm to perform the engagement quality review.

Engagement team. All partners and staff performing the engagement, and any other individuals who perform procedures on the engagement, excluding an external specialist¹ and internal auditors who provide direct assistance on an engagement. (Ref: par. .A14)

External inspections. Inspections or investigations, undertaken by an external oversight authority, related to the firm's system of quality management or engagements performed by the firm. (Ref: par. .A15)

Findings (in relation to a system of quality management). Information about the design, implementation, and operation of the system of quality management that has been accumulated from the performance of monitoring activities, external inspections, and other relevant sources, which indicates that one or more deficiencies may exist. (Ref: par. .A16–.A18)

Firm. A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the AICPA and that is engaged in public practice. (Ref: par. .A19)

Inspection. Inspection is an evaluation of the adequacy of aspects of the firm's quality management policies and procedures, its personnel's understanding of those policies and procedures, and the extent of the firm's compliance with them.

Network. As defined in "Definitions" (ET sec. 0.400) in the AICPA code, an association of entities that includes one or more firms. (Ref: par. .A20)

Network firm. As defined in "Definitions" in the AICPA code, a firm or other entity that belongs to a network. References to a *network firm* are to be read hereafter as "another firm or entity that belongs to the same network as the firm."

Partner. Any individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, partner may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms might use different titles to refer to individuals with this authority.

Personnel. Partners and staff in the firm. (Ref: par. .A21–.A22)

Professional judgment. The application of relevant training, knowledge, and experience, within the context of professional standards, in making informed decisions about the courses of action that are

¹ Paragraph .06 of AU-C section 620, *Using the Work of an Auditor's Specialist*, defines the term *auditor's specialist*.

appropriate in the design, implementation, and operation of the firm's system of quality management.

Professional standards. Standards promulgated by the ASB or ARSC under the "General Standards Rule" or the "Compliance With Standards Rule" of the AICPA code or other standard-setting bodies that set auditing and attest standards applicable to the engagement being performed and relevant ethical requirements.

Quality objectives. The desired outcomes in relation to the components of the system of quality management to be achieved by the firm.

Quality risk. A risk that has a reasonable possibility of

- occurring, and
- individually, or in combination with other risks, adversely affecting the achievement of one or more quality objectives.

Reasonable assurance. In the context of the QM sections, a high, but not absolute, level of assurance.

Relevant ethical requirements. Principles of professional ethics and ethical requirements to which the firm, engagement team, engagement quality reviewer, and other firm personnel are subject when undertaking engagements in the firm's accounting and auditing practice that consist of the AICPA code together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive. (Ref: par. .A23–.A24 and .A64)

Response (in relation to a system of quality management). Policies or procedures designed and implemented by the firm to address one or more quality risks. (Ref: par. .A25–.A27 and .A52)

- *Policies* are statements of what should, or should not, be done to address quality risks. Such statements may be documented, explicitly stated in communications, or implied through actions and decisions.
- *Procedures* are actions to implement policies.

Service provider (in the context of this section). An individual or organization external to the firm that provides a resource that is used in the system of quality management or in performing engagements. Service providers exclude the firm's network, other network firms, or other structures or organizations in the network. (Ref: par. .A28 and .A110)

Staff. Professionals, other than partners, including any specialists the firm employs.

System of quality management. A system designed, implemented, and operated by a firm to provide the firm with reasonable assurance that

- a. the firm and its personnel fulfill their responsibilities in accordance with professional standards and applicable legal and regulatory requirements, and conduct engagements in accordance with such standards and requirements; and
- b. engagement reports issued by the firm are appropriate in the circumstances.

Requirements

Applying and Complying With Relevant Requirements

.18 The firm should comply with each requirement of this section unless the requirement is not relevant to the firm because of the nature and circumstances of the firm or its engagements. (Ref: par. .A29)

.19 The individual or individuals assigned ultimate responsibility and accountability for the firm's system of quality management, and the individual or individuals assigned operational responsibility for the firm's system of quality management, should have an understanding of this section, including the application and other explanatory material, to understand the objective of this section and to apply its requirements properly.

System of Quality Management

.20 The firm should design, implement, and operate a system of quality management. In doing so, the firm should exercise professional judgment, taking into account the nature and circumstances of the firm and its engagements. The governance and leadership component of the system of quality management establishes the environment that supports the design, implementation, and operation of the system of quality management. (Ref: par. .A30–.A31)

Responsibilities

.21 The firm should assign (Ref: par. .A32–.A36)

- a. ultimate responsibility and accountability for the system of quality management to the firm's CEO or the firm's managing partner (or equivalent) or, if appropriate, the firm's managing board of partners (or equivalent);
- b. operational responsibility for the system of quality management; and
- c. operational responsibility for specific aspects of the system of quality management, including
 - i. compliance with independence requirements, and (Ref: par. .A37)
 - ii. the monitoring and remediation process.

.22 In assigning the roles in paragraph .21, the firm should determine that the individual or individuals (Ref: par. .A38)

- a. have the appropriate experience, knowledge, influence, and authority within the firm and sufficient time to fulfill their assigned responsibility, and (Ref: par. .A39)
- b. understand their assigned roles and that they are accountable for fulfilling them.

.23 The firm should determine that the individual or individuals assigned operational responsibility for the system of quality management, compliance with independence requirements, and the monitoring and remediation process have a direct line of communication to the individual or individuals assigned ultimate responsibility and accountability for the system of quality management.

The Firm's Risk Assessment Process

.24 The firm should design and implement a risk assessment process to establish quality objectives, identify and assess quality risks, and design and implement responses to address the quality risks. (Ref: par. .A40–.A42)

.25 The firm should establish the quality objectives specified by this section and any additional quality objectives considered necessary by the firm to achieve the objectives of the system of quality management. (Ref: par. .A43–.A45)

.26 The firm should identify and assess quality risks to provide a basis for the design and implementation of responses. In doing so, the firm should do the following:

- a. Obtain an understanding of the conditions, events, circumstances, actions, or inactions that may adversely affect the achievement of the quality objectives, including the following: (Ref: par. .A46–.A48)
 - i. With respect to the nature and circumstances of the firm, those relating to
 - (1) the complexity and operating characteristics of the firm;
 - (2) the strategic and operational decisions and actions, business processes, and business model of the firm;
 - (3) the characteristics and management style of leadership;
 - (4) the resources of the firm, including the resources provided by service providers;
 - (5) law, regulation, professional standards, and the environment in which the firm operates; and
 - (6) in the case of a firm that belongs to a network, the nature and extent of the network requirements and network services, if any
 - ii. With respect to the nature and circumstances of the engagements performed by the firm, those relating to
 - (1) the types of engagements performed by the firm and the reports to be issued, and
 - (2) the types of entities for which such engagements are undertaken
- b. Take into account how, and the degree to which, the conditions, events, circumstances, actions, or inactions in (a) may adversely affect the achievement of the quality objectives. (Ref: par. .A49–.A50)

.27 The firm should design and implement responses to address the quality risks in a manner that is based on, and responsive to, the reasons for the assessments given to the quality risks. The firm's responses should include the responses specified in paragraph .35. However, the responses specified in paragraph .35 alone are not sufficient to achieve the objectives of the system of quality management. (Ref: par. .A51–.A53)

.28 The firm should establish policies or procedures that are designed to identify information that indicates additional quality objectives, or additional or modified quality risks or responses, are needed due to changes in the nature

and circumstances of the firm or its engagements. If such information is identified, the firm should consider the information and, when appropriate, (Ref: par. .A54–.A55)

- a. establish additional quality objectives or modify additional quality objectives previously established by the firm; (Ref: par. .A56)
- b. identify and assess additional quality risks, modify the quality risks, or reassess the quality risks; or
- c. design and implement additional responses or modify the responses.

Governance and Leadership

.29 The firm should establish the following quality objectives that address the firm's governance and leadership, which establishes the environment that supports the system of quality management:

- a. The firm demonstrates a commitment to quality through a culture that exists throughout the firm, which recognizes and reinforces the following: (Ref: par. .A57–.A58)
 - i. The firm's role in serving the public interest by consistently performing quality engagements
 - ii. The importance of professional ethics, values, and attitudes
 - iii. The responsibility of all personnel for quality relating to the performance of engagements or activities within the system of quality management and their expected behavior
 - iv. The importance of quality in the firm's strategic decisions and actions, including the firm's financial and operational priorities
- b. Leadership is responsible and accountable for quality. (Ref: par. .A59)
- c. Leadership demonstrates a commitment to quality through its actions and behaviors. (Ref: par. .A60)
- d. The organizational structure and assignment of roles, responsibilities, and authority is appropriate to enable the design, implementation, and operation of the firm's system of quality management. (Ref: par. .A32–.A35 and .A61)
- e. Resource needs, including financial resources, are planned for, and resources are obtained, allocated, or assigned in a manner that is consistent with the firm's commitment to quality. (Ref: par. .A62–.A63)

Relevant Ethical Requirements

.30 The firm should establish the following quality objectives that address the fulfillment of responsibilities in accordance with relevant ethical requirements, including those related to independence: (Ref: par. .A64–.A66 and .A68)

- a. The firm and its personnel
 - i. understand the relevant ethical requirements to which the firm and the firm's engagements are subject, and (Ref: par. .A23)

- ii. fulfill their responsibilities in relation to the relevant ethical requirements to which the firm and the firm's engagements are subject.
- b. Others, including the network, network firms, individuals in the network or network firms, or service providers, who are subject to the relevant ethical requirements to which the firm and the firm's engagements are subject
 - i. understand the relevant ethical requirements that apply to them, and (Ref: par. .A23 and .A67)
 - ii. fulfill their responsibilities in relation to the relevant ethical requirements that apply to them. (Ref: par. .A68)

Acceptance and Continuance of Client Relationships and Specific Engagements

.31 The firm should establish the following quality objectives that address the acceptance and continuance of client relationships and specific engagements:

- a. Judgments by the firm about whether to accept or continue a client relationship or specific engagement are appropriate based on the following:
 - i. Information obtained about the nature and circumstances of the engagement and the integrity and ethical values of the client (including management and, when appropriate, those charged with governance) that is sufficient to support such judgments (Ref: par. .A69–.A74)
 - ii. The firm's ability to perform the engagement in accordance with professional standards and applicable legal and regulatory requirements (Ref: par. .A75–.A76)
- b. The financial and operational priorities of the firm do not lead to inappropriate judgments about whether to accept or continue a client relationship or specific engagement. (Ref: par. .A77–.A78)

Engagement Performance

.32 The firm should establish the following quality objectives that address the performance of quality engagements:

- a. Engagement teams understand and fulfill their responsibilities in connection with the engagements, including, as applicable, the overall responsibility of engagement partners for managing and achieving quality on the engagement and being sufficiently and appropriately involved throughout the engagement. (Ref: par. .A79)
- b. The nature, timing, and extent of direction and supervision of engagement teams and review of the work performed is appropriate based on the nature and circumstances of the engagements and the resources assigned or made available to the engagement teams; the work performed by less experienced engagement team members is directed, supervised, and reviewed by suitably experienced engagement team members. (Ref: par. .A80–.A81)

- c. Engagement teams exercise appropriate professional judgment and, when applicable to the type of engagement, maintain professional skepticism. (Ref: par. .A82)
- d. Consultation on difficult or contentious matters is undertaken, and the conclusions agreed to are implemented. (Ref: par. .A83–.A85)
- e. Differences of opinion within the engagement team, or between the engagement team and the engagement quality reviewer or individuals performing activities within the firm's system of quality management, are brought to the attention of the firm and resolved. (Ref: par. .A86)
- f. Engagement documentation is assembled on a timely basis after the date of the engagement report and is appropriately maintained and retained to meet the needs of the firm and comply with law, regulation, relevant ethical requirements, and professional standards. (Ref: par. .A87–.A89)

Resources

.33 The firm should establish the following quality objectives that address appropriately obtaining, developing, using, maintaining, allocating, and assigning resources in a timely manner to enable the design, implementation, and operation of the system of quality management: (Ref: par. .A90–.A91)

Human Resources

- a. Personnel are hired, developed, and retained and have the competence and capabilities to (Ref: par. .A92–.A94)
 - i. consistently perform quality engagements, including having knowledge or experience relevant to the engagements the firm performs, or
 - ii. perform activities or carry out responsibilities in relation to the operation of the firm's system of quality management.
- b. Personnel demonstrate a commitment to quality through their actions and behaviors, develop and maintain the appropriate competence to perform their roles, and are held accountable or recognized through timely evaluations, compensation, promotion, and other incentives. (Ref: par. .A95–.A97)
- c. Individuals are obtained from external sources (that is, the network, another network firm, or a service provider) when the firm does not have sufficient or appropriate personnel to enable the operation of firm's system of quality management or performance of engagements. (Ref: par. .A98)
- d. Engagement team members, including an engagement partner, who have appropriate competence and capabilities to consistently perform quality engagements, including being given sufficient time, are assigned to each engagement. (Ref: par. .A92–.A93 and .A99–.A101)
- e. Individuals who have appropriate competence and capabilities, including sufficient time, to perform such activities are assigned to perform activities within the system of quality management.

Technological Resources

- f. Appropriate technological resources are obtained or developed, implemented, maintained, and used to enable the operation of the firm's system of quality management and the performance of engagements. (Ref: par. .A102–.A106 and .A109)

Intellectual Resources

- g. Appropriate intellectual resources are obtained or developed, implemented, maintained, and used to enable the operation of the firm's system of quality management and the consistent performance of quality engagements, and such intellectual resources are consistent with professional standards and applicable legal and regulatory requirements, where applicable. (Ref: par. .A107–.A109)

Service Providers

- h. Human, technological, or intellectual resources from service providers are appropriate for use in the firm's system of quality management and in performing engagements, taking into account the quality objectives in (d–g). (Ref: par. .A110–.A115)

Information and Communication

.34 The firm should establish the following quality objectives that address obtaining, generating, or using information regarding the system of quality management and communicating information within the firm and to external parties on a timely basis to enable the design, implementation, and operation of the system of quality management: (Ref: par. .A116)

- a. The information system identifies, captures, processes, and maintains relevant and reliable information that supports the system of quality management, whether from internal or external sources. (Ref: par. .A117–.A119)
- b. The culture of the firm recognizes and reinforces the responsibility of personnel to exchange information with the firm and with one another. (Ref: par. .A120)
- c. Relevant and reliable information is exchanged throughout the firm and with engagement teams, including the following: (Ref: par. .A120)
 - i. Information is communicated to personnel and engagement teams, and the nature, timing, and extent of the information is sufficient to enable them to understand and carry out their responsibilities relating to performing activities within the system of quality management or engagements.
 - ii. Personnel and engagement teams communicate information to the firm when performing activities within the system of quality management or engagements.
- d. Relevant and reliable information is communicated to external parties, including the following:
 - i. Information is communicated by the firm to or within the firm's network or to service providers, if any, enabling the network or service providers to fulfill their responsibilities

relating to the network requirements or network services or resources provided by them. (Ref: par. .A121)

- ii. Information is communicated externally when required by law, regulation, or professional standards or to support external parties' understanding of the system of quality management. (Ref: par. .A122–.A123)

Specified Responses

.35 In designing and implementing responses in accordance with paragraph .27, the firm should include the following responses: (Ref: par. .A124)

- a. The firm establishes policies or procedures for
 - i. identifying, evaluating, and addressing threats to compliance with the relevant ethical requirements. (Ref: par. .A125)
 - ii. identifying, communicating, evaluating, and reporting of any breaches of the relevant ethical requirements and appropriately responding to the causes and consequences of the breaches in a timely manner. (Ref: par. .A126–.A127)
- b. The firm obtains, at least annually, a documented confirmation of compliance with independence requirements from all personnel required by relevant ethical requirements to be independent.
- c. The firm establishes policies or procedures for receiving, investigating, and resolving complaints and allegations about failures to perform work in accordance with professional standards and applicable legal and regulatory requirements or noncompliance with the firm's policies or procedures established in accordance with this section. (Ref: par. .A128–.A129)
- d. The firm establishes policies or procedures that address the following circumstances:
 - i. The firm becomes aware of information subsequent to accepting or continuing a client relationship or specific engagement that would have caused it to decline the client relationship or specific engagement had that information been known prior to accepting or continuing the client relationship or specific engagement. (Ref: par. .A130–.A131)
 - ii. The firm is obligated by law or regulation to accept a client relationship or specific engagement. (Ref: par. .A132–.A133)
- e. The firm establishes policies or procedures that (Ref: par. .A134–.A137)
 - i. address when it is appropriate to communicate with external parties about the firm's system of quality management, and (Ref: par. .A138–.A140)
 - ii. address the information to be provided when communicating externally about the firm's system of quality management, including the nature, timing, and extent and appropriate form of communication. (Ref: par. .A141–.A142)
- f. The firm establishes policies or procedures that address engagement quality reviews in accordance with section 20 and requires an engagement quality review for the following:

- i. Audits or other engagements for which an engagement quality review is required by law or regulation (Ref: par. .A143)
- ii. Audits or other engagements for which the firm determines that an engagement quality review is an appropriate response to address one or more quality risks (Ref: par. .A144–.A147)

Monitoring and Remediation Process

.36 The firm should establish a monitoring and remediation process to (Ref: par. .A148)

- a. provide relevant, reliable, and timely information about the design, implementation, and operation of the system of quality management.
- b. take appropriate actions to respond to identified deficiencies such that deficiencies are remediated on a timely basis.

Designing and Performing Monitoring Activities

.37 The firm should design and perform monitoring activities to provide a basis for the identification of deficiencies.

.38 In determining the nature, timing, and extent of the monitoring activities, the firm should take the following into account: (Ref: par. .A149–.A152)

- a. The reasons for the assessments given to the quality risks
- b. The design of the responses
- c. The design of the firm's risk assessment process and monitoring and remediation process (Ref: par. .A153–.A155)
- d. Changes in the system of quality management (Ref: par. .A156)
- e. The results of previous monitoring activities, whether previous monitoring activities continue to be relevant in evaluating the firm's system of quality management and whether remedial actions to address previously identified deficiencies were effective (Ref: par. .A157–.A158)
- f. Other relevant information, including complaints and allegations about failures to perform work in accordance with professional standards and applicable legal and regulatory requirements or noncompliance with the firm's policies or procedures established in accordance with this section, information from external inspections, and information from service providers (Ref: par. .A159–.A161)

.39 The firm should include the inspection of completed engagements in its monitoring activities and should determine which engagements and engagement partners to select. In doing so, the firm should (Ref: par. .A150 and .A162–.A166)

- a. take into account the matters in paragraph .38;
- b. consider the nature, timing, and extent of other monitoring activities undertaken by the firm and the engagements and engagement partners subject to such monitoring activities; (Ref: par. .A167–.A168) and
- c. select at least one completed engagement for each engagement partner on a cyclical basis determined by the firm.

.40 The firm should establish policies or procedures that

- a. require the individuals performing the monitoring activities to have the competence and capabilities, including sufficient time, to perform the monitoring activities effectively; and
- b. address the objectivity of the individuals performing the monitoring activities, based on the premise that objectivity is enhanced when the engagement team members or the engagement quality reviewer of an engagement are not involved in performing any monitoring activities related to that engagement. (Ref: par. .A169–.A173)

Evaluating Findings and Identifying Deficiencies

.41 The firm should evaluate findings to determine whether deficiencies exist, including in the monitoring and remediation process. (Ref: par. .A174–.A178)

Evaluating Identified Deficiencies

.42 The firm should evaluate the severity and pervasiveness of identified deficiencies by (Ref: par. .A177 and .A179–.A180)

- a. investigating the root causes of the identified deficiencies. In determining the nature, timing, and extent of the procedures to investigate the root causes, the firm should take into account the nature of the identified deficiencies and their possible severity. (Ref: par. .A181–.A185)
- b. evaluating the effect of the identified deficiencies, individually and in aggregate, on the system of quality management.

Responding to Identified Deficiencies

.43 The firm should design and implement remedial actions to address identified deficiencies that are responsive to the results of the root cause analysis. (Ref: par. .A186–.A188)

.44 The individual or individuals assigned operational responsibility for the monitoring and remediation process should evaluate whether the remedial actions

- a. are appropriately designed to address the identified deficiencies and their related root causes and determine that they have been implemented.
- b. implemented to address previously identified deficiencies are effective.

.45 If the evaluation indicates that the remedial actions are not appropriately designed and implemented or are not effective, the individual or individuals assigned operational responsibility for the monitoring and remediation process should take appropriate action to determine that the remedial actions are appropriately modified such that they are effective.

Findings About a Particular Engagement

.46 The firm should respond to circumstances in which findings indicate that there is an engagement for which required procedures were omitted during the performance of the engagement, or that the report issued may be inappropriate. The firm's response should include the following: (Ref: par. .A190)

- a. Taking appropriate action to comply with relevant professional standards and applicable legal and regulatory requirements

- b. When the report is considered to be inappropriate, considering the implications and taking appropriate action, including considering whether to obtain legal advice

Ongoing Communication Related to Monitoring and Remediation

.47 The individual or individuals assigned operational responsibility for the monitoring and remediation process should communicate the following on a timely basis to the individual or individuals assigned ultimate responsibility and accountability for the system of quality management and the individual or individuals assigned operational responsibility for the system of quality management: (Ref: par. .A190)

- a. A description of the monitoring activities performed
- b. The identified deficiencies, including the severity and pervasiveness of such deficiencies
- c. The remedial actions to address the identified deficiencies

.48 The firm should communicate the matters described in paragraph .47 to engagement teams and other individuals assigned activities within the system of quality management to enable them to take prompt and appropriate action in accordance with their responsibilities.

Network Requirements or Network Services

.49 When the firm belongs to a network, the firm should understand the following, when applicable: (Ref: par. .A20 and .A191–.A193)

- a. The requirements established by the network regarding the firm's system of quality management, including requirements for the firm to implement or use resources or services designed or otherwise provided by or through the network (that is, network requirements)
- b. Any services or resources provided by the network that the firm chooses to implement or use in the design, implementation, or operation of the firm's system of quality management (that is, network services)
- c. The firm's responsibilities for any actions that are necessary to implement the network requirements or use network services (Ref: par. .A194)

The firm remains responsible for its system of quality management, including professional judgments made in the design, implementation, and operation of the system of quality management. The firm should not allow compliance with the network requirements or use of network services to contravene the requirements of this section. (Ref: par. .A20 and par. .A195)

.50 Based on the understanding obtained in accordance with paragraph .49, the firm should

- a. determine how the network requirements or network services are relevant to, and are taken into account in, the firm's system of quality management, including how they are to be implemented. (Ref: par. .A196)
- b. evaluate whether and, if so, how the network requirements or network services need to be adapted or supplemented by the firm to be appropriate for use in its system of quality management. (Ref: par. .A197–.A199)

Monitoring Activities Undertaken by the Network on the Firm's System of Quality Management

.51 For circumstances in which the network performs monitoring activities relating to the firm's system of quality management, the firm should

- a. determine the effect of the monitoring activities performed by the network on the nature, timing, and extent of the firm's monitoring activities performed in accordance with paragraphs .37–.39;
- b. determine the firm's responsibilities in relation to the monitoring activities, including any related actions by the firm; and
- c. as part of evaluating findings and identifying deficiencies in paragraph .41, obtain the results of the monitoring activities from the network in a timely manner. (Ref: par. .A200)

Monitoring Activities Undertaken by the Network Across the Network Firms

.52 The firm should

- a. understand the overall scope of the monitoring activities undertaken by the network across the network firms, including monitoring activities to determine that network requirements have been appropriately implemented across the network firms, and how the network will communicate the results of its monitoring activities to the firm.
- b. at least annually, obtain information from the network about the overall results of the network's monitoring activities across the network firms, if applicable, and (Ref: par. .A201–.A203)
 - i. communicate the information to engagement teams and other individuals assigned activities within the system of quality management, as appropriate, to enable them to take prompt and appropriate action in accordance with their responsibilities, and
 - ii. consider the effect of the information on the firm's system of quality management.

Deficiencies in Network Requirements or Network Services Identified by the Firm

.53 If the firm identifies a deficiency in the network requirements or network services, the firm should (Ref: par. .A204)

- a. communicate to the network relevant information about the identified deficiency, and
- b. in accordance with paragraph .43, design and implement remedial actions to address the effect of the identified deficiency in the network requirements or network services. (Ref: par. .A205)

Evaluating the System of Quality Management

.54 The individual or individuals assigned ultimate responsibility and accountability for the system of quality management should evaluate, on behalf of the firm, the system of quality management. The evaluation should be undertaken as of a point in time and performed at least annually. (Ref: par. .A206–.A209)

.55 Based on the evaluation, the individual or individuals assigned ultimate responsibility and accountability for the system of quality management

should conclude, on behalf of the firm, one of the following: (Ref: par. .A210 and .A217)

- a. The system of quality management provides the firm with reasonable assurance that the objectives of the system of quality management are being achieved. (Ref: par. .A211)
- b. Except for matters related to identified deficiencies that have a severe but not pervasive effect on the design, implementation, and operation of the system of quality management, the system of quality management provides the firm with reasonable assurance that the objectives of the system of quality management are being achieved. (Ref: par. .A212)
- c. The system of quality management does not provide the firm with reasonable assurance that the objectives of the system of quality management are being achieved. (Ref: par. .A212–.A216)

.56 If the individual or individuals assigned ultimate responsibility and accountability for the system of quality management reaches the conclusion described in paragraph .55*b* or .55*c*, the firm should do the following: (Ref: par. .A218)

- a. Take prompt and appropriate action.
- b. Communicate to
 - i. engagement teams and other individuals assigned activities within the system of quality management to the extent that it is relevant to their responsibilities, and (Ref: par. .A219)
 - ii. external parties in accordance with the firm's policies or procedures required by paragraph .35*e*. (Ref: par. .A220)

.57 The firm should undertake periodic performance evaluations of the individual or individuals assigned ultimate responsibility and accountability for the system of quality management and the individual or individuals assigned operational responsibility for the system of quality management. In doing so, the firm should take into account the evaluation of the system of quality management. (Ref: par. .A221–.A223)

Documentation

.58 The firm should prepare documentation of its system of quality management that is sufficient to (Ref: par. .A224–.A226)

- a. support a consistent understanding of the system of quality management by personnel, including an understanding of their roles and responsibilities with respect to the system of quality management and performing engagements.
- b. support the consistent implementation and operation of the responses.
- c. provide evidence of the design, implementation, and operation of the responses to support the evaluation of the system of quality management by the individual or individuals assigned ultimate responsibility and accountability for the system of quality management.

.59 In preparing documentation, the firm should include the following:

- a. Identification of the individual or individuals assigned ultimate responsibility and accountability for the system of quality management and operational responsibility for the system of quality management
- b. The firm's quality objectives and quality risks (Ref: par. .A227)
- c. A description of the responses and how the firm's responses address the quality risks
- d. Regarding the monitoring and remediation process,
 - i. evidence of the monitoring activities performed;
 - ii. the evaluation of findings, and identified deficiencies and their related root causes; and
 - iii. remedial actions to address identified deficiencies and the evaluation of the design and implementation of such remedial actions
 - iv. communications about monitoring and remediation
- e. The conclusion reached pursuant to paragraph .55 and the basis for that conclusion

.60 The firm should document the matters in paragraph .59 as they relate to network requirements or network services and the evaluation of the network requirements or network services in accordance with paragraph .50b. (Ref: par. .A228)

.61 The firm should establish a period of time for the retention of documentation for the system of quality management that is sufficient to enable the firm and its peer reviewer to monitor the design, implementation, and operation of the firm's system of quality management or for a longer period if required by law or regulation.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .03–.04)

.A1 The AICPA code establishes the fundamental principles of professional ethics, which include the obligation to act in a way that serves the public interest.² As indicated in paragraph .16, in the context of engagement performance as described in this section, the consistent performance of quality engagements forms part of the obligation to act in the public interest.

The Firm's System of Quality Management (Ref: par. .07–.10)

.A2 The firm may use different terminology or frameworks to describe the components of its system of quality management.

.A3 Examples of the interconnected nature of the components include the following:

- The firm's risk assessment process sets out the process the firm is required to follow in implementing a risk-based approach across the system of quality management.

² Paragraph .01 of ET section 0.300.030.

- The governance and leadership component establishes the environment that supports the system of quality management.
- The resources and information and communication components enable the design, implementation, and operation of the system of quality management.
- The monitoring and remediation process is designed to monitor the entire system of quality management. The results of the monitoring and remediation process provide information that is relevant to the firm's risk assessment process.
- There may be relationships between specific matters; for example, certain aspects of relevant ethical requirements are relevant to accepting and continuing client relationships and specific engagements.

.A4 Reasonable assurance is obtained when the system of quality management reduces to an acceptably low level the risk that the objectives stated in paragraph .15a–b are not achieved. Reasonable assurance is not an absolute level of assurance because there are inherent limitations of a system of quality management. Such limitations include the fact that human judgment in decision making can be faulty and that breakdowns in a firm's system of quality management may occur, for example, due to human error or behavior or failures in IT applications.

Authority of This Section (Ref: par. .13)

.A5 The objective of this section provides the context in which the requirements of this section are set, establishes the desired outcome of this section, and is intended to assist the firm in understanding what needs to be accomplished and, when necessary, the appropriate means of doing so.

.A6 The requirements of this section are expressed using the word *should*.

.A7 When necessary, the application and other explanatory material provides further explanation of the requirements and guidance for carrying them out. In particular, it may

- explain more precisely what a requirement means or is intended to cover, and
- include examples that illustrate how the requirements might be applied.

Although such guidance does not, in itself, impose a requirement, it is relevant to the proper application of the requirements. The application and other explanatory material may also provide background information on matters addressed in this section. These additional considerations assist in the application of the requirements in this section. They do not, however, limit or reduce the responsibility of the firm to apply and comply with the requirements in this section.

.A8 This section includes, under the heading "Definitions," a description of the meanings attributed to certain terms for purposes of this section. These definitions are provided to assist in the consistent application and interpretation of this section and are not intended to override definitions that may be established for other purposes, whether in law, regulation, or otherwise.

Definitions

Accounting and Auditing Practice (Ref: par. .17)

.A9 Standards promulgated by the ASB and ARSC that apply to engagements covered by this section comprise the following:

- Statements on Auditing Standards (SASs)
- Statements on Standards for Attestation Engagements (SSAEs)
- Statements on Standards for Accounting and Review Services (SSARSs)

Although standards for other engagements may be promulgated by other AICPA technical committees, engagements performed in accordance with those standards are not encompassed in the definition of an *accounting and auditing practice*.

Deficiency (Ref: par. .17)

.A10 The firm identifies deficiencies by evaluating findings. A deficiency may arise from a finding or a combination of findings.

.A11 When a deficiency is identified as a result of a quality risk, or combination of quality risks, not being identified or properly assessed, the responses to address such quality risks may also be absent or not appropriately designed or implemented.

.A12 The other aspects of the system of quality management consist of the requirements in this section addressing the following:

- Assigning responsibilities (paragraphs .21–.22)
- The firm's risk assessment process
- The monitoring and remediation process
- The evaluation of the system of quality management

.A13 Examples of deficiencies related to other aspects of the system of quality management include the following:

- The firm's risk assessment process fails to identify information that indicates changes in the nature and circumstances of the firm and its engagements and the need to establish additional quality objectives or modify the quality risks or responses.
- The firm's monitoring and remediation process is not designed or implemented in a manner that
 - provides relevant, reliable, and timely information about the design, implementation, and operation of the system of quality management.
 - enables the firm to take appropriate actions to respond to identified deficiencies such that deficiencies are remediated on a timely basis.
- The individual or individuals assigned ultimate responsibility and accountability for the system of quality management do not undertake the annual evaluation of the system of quality management.

Engagement Team (Ref: par. .17)

.A14 SAS No. 146³ provides guidance in applying the definition of *engagement team* in the context of an audit of financial statements. AU-C section 600, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*, expands on how SAS No. 146 is to be applied in relation to an audit of group financial statements. The quality risks and responses to those risks relevant to group audit engagements may be different for engagement team members who are firm personnel than for engagement team members who are external to the firm (for example, engagement team members who are from network firms or are service providers, such as component auditors from firms not within the firm's network).

External Inspections (Ref: par. .17)

.A15 In some circumstances, an external oversight authority, such as the U.S. Department of Labor, may undertake other types of inspections, for example, reviews that focus on, for a selection of firms, particular aspects of audit engagements or firm-wide practices.

Findings (Ref: par. .17)

.A16 As part of accumulating findings from monitoring activities, external inspections, and other relevant sources, the firm may identify other observations about the firm's system of quality management, such as positive outcomes or opportunities for the firm to improve, or further enhance, the system of quality management. Paragraph .A168 explains how other observations may be used by the firm in the system of quality management.

.A17 Paragraph .A157 provides examples of information from other relevant sources.

.A18 Monitoring activities include monitoring at the engagement level, such as inspection of engagements. Furthermore, external inspections and other relevant sources may include information that relates to specific engagements. As a result, information about the design, implementation, and operation of the system of quality management includes engagement-level findings that may be indicative of findings in relation to the system of quality management.

Firm (Ref: par. .17)

.A19 The definition of *firm* in relevant ethical requirements may differ from the definition set out in this section.

Network (Ref: par. .17 and .49)

.A20 Networks and the firms within the network may be structured in a variety of ways. For example, in the context of a firm's system of quality management,

- the network may establish requirements for the firm related to its system of quality management or provide services that are used by the firm in its system of quality management or in performing engagements.
- other firms within the network may provide services (for example, resources) that are used by the firm in its system of quality management or in performing engagements.

³ Paragraphs A15–A21 of Statement on Auditing Standards (SAS) No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

- other structures or organizations within the network may establish requirements for the firm related to its system of quality management or provide services.

For the purposes of this section, any network requirements or network services that are obtained from the network, another firm within the network, or another structure or organization in the network are considered "network requirements or network services."

Personnel (Ref: par. .17)

.A21 In addition to personnel (that is, individuals in the firm), the firm may use individuals external to the firm in performing activities in the system of quality management or in performing engagements. For example, individuals external to the firm may include individuals from other network firms (for example, individuals in a service delivery center of a network firm) or individuals employed by a service provider (for example, a component auditor from another firm not within the firm's network).

.A22 Personnel also includes partners and staff in other structures of the firm, such as a service delivery center in the firm.

Relevant Ethical Requirements (Ref: par. .17 and .30)

.A23 The relevant ethical requirements that are applicable in the context of a system of quality management may vary, depending on the nature and circumstances of the firm and its engagements. The AICPA code acknowledges that federal, state, or local statutes, rules, or regulations may be more restrictive than the AICPA code.

.A24 Various provisions of the relevant ethical requirements may apply only to individuals in the context of the performance of engagements and not the firm itself. For example, the "Integrity and Objectivity Rule" (ET sec. 1.100.001) of the AICPA code prohibits individuals from knowingly misrepresenting facts or subordinating their judgment when performing professional services for a client or for an employer. Compliance with such relevant ethical requirements by individuals may need to be addressed by the firm's system of quality management.

Response (Ref: par. .17)

.A25 Policies are implemented through the actions of personnel and other individuals whose actions are subject to the policies (including engagement teams) or through their restraint from taking actions that would conflict with the firm's policies.

.A26 Procedures may be mandated, through formal documentation or other communications, or may result from behaviors that are not mandated but, rather, are conditioned by the firm's culture. Procedures may be enforced through the actions permitted by IT applications or other aspects of the firm's IT environment.

.A27 If the firm uses individuals external to the firm in the system of quality management or in performing engagements, different policies or procedures may need to be designed by the firm to address the actions of the individuals. SAS No. 146⁴ provides guidance when different policies or procedures may need to be designed by the firm to address the actions of individuals external to the firm in the context of an audit of financial statements.

⁴ Paragraphs A23–A25 of SAS No. 146.

Service Provider (Ref: par. .17)

.A28 Service providers include component auditors from other firms not within the firm's network.

Applying, and Complying With, Relevant Requirements (Ref: par. .18)

.A29 Examples of when a requirement of this section may not be relevant to the firm include the following:

- The firm is a sole practitioner. For example, the requirements addressing the organizational structure and assigning roles, responsibilities, and authority within the firm; direction, supervision, and review; and addressing differences of opinion may not be relevant.
- The firm only performs engagements that are preparation of financial statements engagements in accordance with AR-C section 70, *Preparation of Financial Statements*. For example, because the firm is not required to maintain independence for preparation of financial statements engagements, the requirement to obtain a documented confirmation of compliance with independence requirements from all personnel would not be relevant.

System of Quality Management**Design, Implement, and Operate a System of Quality Management (Ref: par. .20)**

.A30 Quality management is not a separate function of the firm; it is the integration of a culture that demonstrates a commitment to quality with the firm's strategy, operational activities, and business processes. As a result, designing the system of quality management and the firm's operational activities and business processes in an integrated manner may promote a harmonious approach to managing the firm and enhance the effectiveness of quality management.

.A31 The quality of professional judgments exercised by the firm is likely to be enhanced when individuals making such judgments demonstrate an attitude that includes an inquiring mind, which involves

- considering the source, relevance, and sufficiency of information obtained about the system of quality management, including information related to the nature and circumstances of the firm and its engagements, and
- being open and alert to a need for further investigation or other action.

Responsibilities (Ref: par. .21–.22 and .29d)

.A32 The governance and leadership component includes a quality objective that the firm has an organizational structure and assignment of roles, responsibilities, and authority that is appropriate to enable the design, implementation, and operation of the firm's system of quality management.

.A33 Notwithstanding the assignment of responsibilities related to the system of quality management in accordance with paragraph .21, the firm

remains ultimately responsible for the system of quality management and holding individuals responsible and accountable for their assigned roles. For example, in accordance with paragraphs .54–.55, although the firm assigns the evaluation of the system of quality management and conclusion thereon to the individual or individuals assigned ultimate responsibility and accountability for the system of quality management, the firm is responsible for the evaluation and conclusion.

.A34 Individuals who have the appropriate influence and authority within the firm, as required by paragraph .22, to be assigned responsibility for the matters in paragraph .21 are typically partners of the firm. However, based on the legal structure of the firm, there may be circumstances in which an individual may not be a partner of the firm, but the individual has the appropriate influence and authority within the firm to perform the assigned role because of formal arrangements made by the firm or the firm's network.

.A35 How the firm assigns roles, responsibilities, and authority within the firm may vary, and law or regulation may impose certain requirements for the firm that affect the leadership and management structure or their assigned responsibilities. An individual assigned responsibility for a matter in paragraph .21 may further assign roles, procedures, tasks, or actions to other individuals to assist the individual in fulfilling the responsibilities. However, an individual assigned responsibility for a matter in paragraph .22 remains responsible and accountable for the responsibilities assigned to the individual.

.A36 An example of scalability to demonstrate how assigning roles and responsibilities may be undertaken in firms of different complexity is as follows:

- In a less complex firm, ultimate responsibility and accountability for the system of quality management may be assigned to a single managing partner with sole responsibility for the oversight of the firm. This individual may also assume responsibility for all aspects of the system of quality management, including operational responsibility for the system of quality management, compliance with independence requirements, and the monitoring and remediation process.
- In a more complex firm, the organizational structure of the firm may include multiple levels of leadership, and the firm may have an independent governing body that has nonexecutive oversight of the firm, which may comprise external individuals. Furthermore, the firm may assign operational responsibility for specific aspects of the system of quality management beyond those specified in paragraph .21c, such as operational responsibility for compliance with ethical requirements or operational responsibility for managing a service line.

.A37 Compliance with independence requirements is essential to the performance of engagements in a firm's accounting and auditing practice and is an expectation of stakeholders relying on the firm's reports. The individual or individuals assigned operational responsibility for compliance with independence requirements are ordinarily responsible for the oversight of all matters related to independence so that a robust and consistent approach is designed and implemented by the firm to deal with independence requirements.

.A38 Law, regulation, or professional standards may establish additional requirements for an individual assigned responsibility for a matter in paragraph .21, such as requirements for professional licensing, professional education, or continuing professional development.

.A39 The appropriate experience and knowledge for the individual or individuals assigned operational responsibility for the system of quality management ordinarily includes an understanding of the firm's strategic decisions and actions and experience with the firm's business operations.

The Firm's Risk Assessment Process (Ref: par. .24)

.A40 How the firm designs the firm's risk assessment process may be affected by the nature and circumstances of the firm, including how the firm is structured and organized.

Examples of scalability to demonstrate how the firm's risk assessment process may differ from that of other firms include the following:

- In a less complex firm, the individual or individuals assigned operational responsibility for the system of quality management may have a sufficient understanding of the firm and its engagements to undertake the risk assessment process. Furthermore, the documentation of the quality objectives, quality risks, and responses may be less extensive than for a more complex firm (for example, it may be documented in a single document).
- In a more complex firm, there may be a formal risk assessment process involving multiple individuals and numerous activities. The process may be centralized (for example, the quality objectives, quality risks, and responses are established centrally for all business units, functions, and service lines) or decentralized (for example, the quality objectives, quality risks, and responses are established at a business unit, function, or service line level, with the outputs combined at the firm level). The firm's network may also provide the firm with quality objectives, quality risks, and responses to be included in the firm's system of quality management.

.A41 The process of establishing quality objectives, identifying and assessing quality risks, and designing and implementing responses is iterative, and the requirements of this section are not intended to be addressed in a linear manner. Examples of the iterative and nonlinear nature of the firm's risk assessment process include the following:

- In identifying and assessing quality risks, the firm might determine that an additional quality objective needs to be established.
- When designing and implementing responses, the firm might determine that a quality risk was not identified and assessed.

.A42 Information sources that enable the firm to establish quality objectives, identify and assess quality risks, and design and implement responses are part of the firm's information and communication component and include the following:

- The results of the firm's monitoring and remediation process (see paragraphs .43 and .A169)
- Information from the network or service providers, including
 - information about network requirements or network services (see paragraph .49)
 - other information from the network, including information about the results of monitoring activities undertaken by

the network across the network firms (see paragraphs .51–.52)

Other information, whether internal or external, may also be relevant to the firm's risk assessment process, such as the following:

- Information regarding complaints and allegations about failures to perform work in accordance with professional standards and applicable legal and regulatory requirements or noncompliance with the firm's policies or procedures established in accordance with this section
- The results of external inspections
- Information from regulators about the entities for whom the firm performs engagements that is made available to the firm, such as information from a securities regulator about an entity for whom the firm performs engagements (for example, irregularities in the entity's financial statements or noncompliance with securities regulations)
- Changes in the system of quality management that affect other aspects of the system; for example, changes in the firm's resources
- Other external sources, such as regulatory actions and litigation against the firm or other firms in the jurisdiction that may highlight areas for the firm to consider

Establish Quality Objectives (Ref: par. .25)

.A43 Law, regulation, or professional standards may establish requirements that give rise to additional quality objectives. For example, if a firm is required by law or regulation to appoint nonexecutive individuals to the firm's governance structure, the firm may consider it necessary to establish additional quality objectives to address the requirements.

.A44 While the nature and circumstances of the firm and its engagements are specific to the firm, the quality objectives are sufficiently comprehensive such that it is unlikely that the firm would find it necessary to establish additional quality objectives.

.A45 The firm may establish sub-objectives to enhance the firm's identification and assessment of quality risks and design and implementation of responses.

Identify and Assess Quality Risks (Ref: par. .26)

.A46 There may be other conditions, events, circumstances, actions, or inactions not described in paragraph .26a that may adversely affect the achievement of a quality objective.

.A47 A risk arises from how, and the degree to which, a condition, event, circumstance, action, or inaction may adversely affect the achievement of a quality objective. Not all risks meet the definition of a *quality risk*. Professional judgment assists the firm in determining whether a risk is a quality risk, which is based on the firm's consideration of whether there is a reasonable possibility of the risk occurring and, individually or in combination with other risks, adversely affecting the achievement of one or more quality objectives.

.A48 Examples of the firm's understanding of the conditions, events, circumstances, actions, or inactions that may adversely affect the achievement of the quality objectives and the related quality risks are as follows:

<i>Examples of the firm's understanding of the conditions, events, circumstances, actions, or inactions that may adversely affect the achievement of the quality objectives</i>	<i>Examples of quality risks that may arise</i>
The strategic and operational decisions and actions, business processes, and business model of the firm: The firm's overall financial goals are overly dependent on the extent of services provided by the firm not within the scope of this section.	In the context of governance and leadership, this may give rise to a number of quality risks such as the following: • Resources are allocated or assigned in a manner that prioritizes the services not within the scope of this section and may negatively affect the quality of engagements within the scope of this section. • Decisions about financial and operational priorities do not fully or adequately consider the importance of quality in performing engagements within the scope of this section.
The characteristics and management style of leadership: The firm is a smaller firm with a few engagement partners with shared authority.	In the context of governance and leadership, this may give rise to a number of quality risks such as the following: • Leadership's responsibilities and accountability for quality are not clearly defined and assigned. • The actions and behaviors of leadership that do not promote quality are not questioned.
The complexity and operating characteristics of the firm: The firm has recently completed a merger with another firm.	In the context of resources, this may give rise to a number of quality risks, including the following: • Technological resources used by the two merged firms may be incompatible. • Engagement teams may use intellectual resources developed by a firm prior to the merger, which are no longer consistent with the new methodology being used by the new merged firm.

.A49 Given the evolving nature of the system of quality management, the responses designed and implemented by the firm may give rise to conditions, events, circumstances, actions, or inactions that result in further quality risks. For example, the firm may implement a resource (for example, a technological resource) to address a quality risk, and quality risks may arise from the use of such resource.

.A50 The degree to which a risk, individually or in combination with other risks, may adversely affect the achievement of a quality objective may vary based on the conditions, events, circumstances, actions, or inactions giving rise to the risk, taking matters such as the following into account:

- How the condition, event, circumstance, action, or inaction would affect the achievement of the quality objective
- How frequently the condition, event, circumstance, action, or inaction is expected to occur
- How long it would take after the condition, event, circumstance, action, or inaction occurred for it to have an effect, and whether in that time the firm would have an opportunity to respond to mitigate the effect of the condition, event, circumstance, action, or inaction
- How long the condition, event, circumstance, action, or inaction would affect the achievement of the quality objective once it has occurred

The assessment of quality risks need not comprise formal ratings or scores, although firms are not precluded from using them.

Design and Implement Responses to Address the Quality Risks **(Ref: par. .17 and .27)**

.A51 The nature, timing, and extent of the responses are based on the reasons for the assessment given to the quality risks.

.A52 The responses designed and implemented by the firm may operate at the firm level or engagement level, or there may be a combination of responsibilities for actions to be taken at the firm and engagement level. An example of a response designed and implemented by the firm that operates at both the firm and engagement level is as follows:

The firm establishes policies or procedures for consultation, which include with whom consultation should be undertaken by engagement teams and the specific matters for which consultation is required. The firm appoints suitably qualified and experienced individuals to provide the consultations. The engagement team is responsible for identifying when matters for consultation occur, initiating consultation, and implementing the conclusions from consultation.⁵

.A53 The need for formally documented policies or procedures may be greater for firms that have many personnel or that are geographically dispersed, in order to achieve consistency across the firm.

Changes in the Nature and Circumstances of the Firm or Its Engagements **(Ref: par. .28)**

.A54 Examples of scalability to demonstrate how policies or procedures for identifying information about changes in the nature and circumstances of the firm and its engagements may vary from other firms include the following:

⁵ Paragraph 35 of SAS No. 146.

- In a less complex firm, the firm may have informal policies or procedures to identify information about changes in the nature and circumstances of the firm or its engagements, particularly when the individual or individuals responsible for establishing quality objectives, identifying and assessing quality risks, and designing and implementing responses are able to identify such information in the normal course of their activities.
- In a more complex firm, the firm may need to establish more formal policies or procedures to identify and consider information about changes in the nature and circumstances of the firm or its engagements. This may include, for example, a periodic review of information relating to the nature and circumstances of the firm and its engagements, including ongoing tracking of trends and occurrences in the firm's internal and external environment.

.A55 Additional quality objectives may need to be established, or quality risks and responses added to or modified, as part of the remedial actions undertaken by the firm to address an identified deficiency in accordance with paragraph .43.

.A56 The firm may have established quality objectives in addition to those specified by this section. The firm may also identify information that indicates that additional quality objectives previously established by the firm are no longer needed or need to be modified.

Governance and Leadership

Commitment to Quality (Ref: par. .29a)

.A57 The firm's culture is an important factor in influencing the behavior of personnel. Relevant ethical requirements ordinarily establish the principles of professional ethics and are further addressed in the "Relevant Ethical Requirements" section. Professional values and attitudes may include the following:

- Professional manner; for example, timeliness, courteousness, respect, accountability, responsiveness, and dependability
- A commitment to teamwork
- Maintaining an open mind to new ideas or different perspectives in the professional environment
- Pursuit of excellence
- A commitment to continual improvement (for example, setting expectations beyond the minimum requirements and placing a focus on continual learning)
- Social responsibility

.A58 The firm's strategic decision-making process, including the establishment of a business strategy, may include matters such as the firm's decisions about financial and operational matters, the firm's financial goals, how financial resources are managed, growth of the firm's market share, industry specialization, or new service offerings. The firm's financial and operational priorities may directly or indirectly affect the firm's commitment to quality; for example, the firm may have incentives focused on financial and operational priorities that may discourage behaviors that demonstrate a commitment to quality.

Leadership (Ref: par. .29b–c)

.A59 The responses designed and implemented by the firm to hold leadership responsible and accountable for quality include the performance evaluations required by paragraph .57.

.A60 Although leadership establishes the tone at the top through its actions and behaviors, clear, consistent, and frequent actions and communications at all levels within the firm collectively contribute to the firm's culture and demonstrate a commitment to quality.

Organizational Structure (Ref: par. .29d)

.A61 The organizational structure of the firm may include operating units, operational processes, divisions, or geographical locations and other structures. In some instances, the firm may concentrate or centralize processes or activities in a service delivery center, and engagement teams may include personnel from the firm's service delivery center who perform specific tasks that are repetitive or specialized in nature.

Resources (Ref: par. .29e)

.A62 The individual or individuals assigned ultimate responsibility and accountability or operational responsibility for the system of quality management are, in most cases, able to influence the nature and extent of resources that the firm obtains, develops, uses, and maintains and how those resources are allocated or assigned, including the timing of when they are used.

.A63 Because resource needs may change over time, it may not be practicable to anticipate all resource needs. The firm's resource planning may involve determining the resources currently required, forecasting the firm's future resource needs, and establishing processes to deal with unanticipated resource needs when they arise.

Relevant Ethical Requirements (Ref: par. .17 and .30)

.A64 The AICPA code sets out the fundamental principles of ethics that provide the framework for the rules that govern the performance of professional responsibilities. The fundamental principles are responsibilities, the public interest, integrity, objectivity and independence, due care, and scope and nature of services. Independence requirements are set forth in the "Independence Rule" (ET sec. 1.200.001) and related interpretations of the AICPA code and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence and safeguards to mitigate such threats involving matters that are not explicitly addressed in the AICPA code are set forth in the "Conceptual Framework for Independence" (ET sec. 1.210.010).

.A65 In some cases, the matters addressed by the firm in its system of quality management may be more specific than, or additional to, the provisions of relevant ethical requirements. Examples of matters that a firm may include in its system of quality management that are more specific than, or additional to, the provisions of relevant ethical requirements include the following:

- The firm prohibits the acceptance of gifts and hospitality from a client, even if the value is trivial and inconsequential.
- The firm sets rotation periods for all engagement partners, including those performing attestation, review, and compilation engagements.

.A66 Other components may affect or relate to the relevant ethical requirements component. Examples of relationships between the relevant ethical requirements component and other components include the following:

- The information and communication component may address the communication of various matters related to relevant ethical requirements, including
 - the firm communicating the independence requirements to all personnel and others subject to independence requirements.
 - personnel and engagement teams communicating relevant information to the firm without fear of reprisals, such as situations that may create threats to independence or breaches of relevant ethical requirements.
- As part of the resources component, the firm may
 - assign individuals to manage and monitor compliance with relevant ethical requirements or to provide consultation on matters related to relevant ethical requirements.
 - use IT applications to monitor compliance with relevant ethical requirements, including recording and maintaining information about independence.

.A67 The relevant ethical requirements that apply to others depend on the provisions of the relevant ethical requirements and how the firm uses others in its system of quality management or in performing engagements. Examples of relevant ethical requirements that apply to others include the following:

- Relevant ethical requirements may include requirements for independence that apply to network firms or employees of network firms; for example, the AICPA code includes independence requirements that apply to network firms.
- Relevant ethical requirements may include a definition of *engagement team* or other similar concept, and the definition may include any individual who performs assurance procedures on the engagement (for example, a service provider engaged to attend a physical inventory count at a remote location). Accordingly, any requirements of the relevant ethical requirements that apply to the engagement team as defined in the relevant ethical requirements, or other similar concept, may also be relevant to such individuals.
- The principle of confidentiality may apply to the firm's network, other network firms, or service providers when they have access to client information obtained by the firm.

.A68 AU-C section 600⁶ states that when the component auditor is not subject to the AICPA code, compliance with the ethics and independence requirements set forth in the International Ethics Standards Board for Accountants (IESBA) *International Code of Ethics for Professional Accountants* is sufficient to fulfill the component auditor's ethical responsibilities in the group

⁶ Paragraph .A46 of AU-C section 600, *Special Considerations — Audits of Group Financial Statements (Including the Work of Component Auditors)*.

audit.⁷ The firm may use, for example, confirmations, letters of representation, or other affirmations from network firms, employees of network firms, or service providers regarding the fulfillment of ethical requirements that are relevant to the firm.

Acceptance and Continuance of Client Relationships and Specific Engagements

The Nature and Circumstances of the Engagement and the Integrity and Ethical Values of the Client (Ref: par. .31a(i))

.A69 The information obtained about the nature and circumstances of the engagement may include the following:

- The industry of the entity for which the engagement is being undertaken and relevant regulatory factors
- The nature of the entity; for example, its operations, organizational structure, ownership and governance, its business model, and how it is financed
- The nature of the underlying subject matter and the applicable criteria; for example, in the case of sustainability reporting,
 - the underlying subject matter may include social, environmental, or health and safety information.
 - the applicable criteria may be performance measures established by a recognized body of specialists.

.A70 The information obtained to support the firm's judgments about the integrity and ethical values of the client may include the identity and business reputation of the client's principal owners, key management, and those charged with its governance.

.A71 Examples of factors that may affect the nature and extent of information obtained about the integrity and ethical values of the client include the following:

- The nature of the entity for which the engagement is being performed, including the complexity of its ownership and management structure
- The nature of the client's operations, including its business practices
- Information concerning the attitude of the client's principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and the internal control environment
- Whether the client is aggressively concerned with keeping the firm's fees as low as possible

⁷ The section, "Application of the AICPA Code" (ET sec. 0.200.020), of the AICPA Code of Professional Conduct (AICPA code) explains that an AICPA member who is the group engagement partner will not be considered in violation of the AICPA code if a component auditor practicing outside the United States departs from the AICPA code with respect to the audit or review of group financial statements, as long as the component auditor's conduct, at a minimum, is in accordance with the ethics and independence requirements set forth in the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants.

- Indications of a client-imposed limitation in the scope of work
- Indications that the client might be involved in money laundering or other criminal activities
- The reasons for the proposed appointment of the firm and non-reappointment of the previous firm
- The identity and business reputation of related parties

.A72 The firm may obtain the information from a variety of internal and external sources, including the following:

- In the case of an existing client, information from current or previous engagements, if applicable, or inquiry of other personnel who have performed other engagements for the client.
- In the case of a new client, inquiry of existing or previous providers of auditing services to the client, in accordance with relevant ethical requirements.
- Discussions with other third parties, such as bankers, legal counsel, and industry peers.
- Background searches of relevant databases (which may be intellectual resources). In some cases, the firm may use a service provider to perform the background search.

.A73 Information that is obtained during the firm's acceptance and continuance process also may often be relevant to the engagement team when planning and performing the engagement. Professional standards may specifically require the engagement team to obtain or consider such information. For example, SAS No. 146⁸ requires the engagement partner to take into account information obtained in the acceptance and continuance process in planning and performing the audit engagement.

.A74 Professional standards or applicable legal and regulatory requirements may include specific provisions that need to be addressed before accepting or continuing a client relationship or specific engagement and may also require the firm to make inquiries of an existing or predecessor firm when accepting an engagement. For example, when there has been a change of auditors, AU-C section 210, *Terms of Engagement*,⁹ requires the auditor, prior to starting an initial audit, to request management to authorize the predecessor auditor to respond fully to the auditor's inquiries regarding matters that will assist the auditor in determining whether to accept the engagement. The "Conflicts of Interest for Members in Public Practice" interpretation (ET sec. 1.110.010) of the AICPA code also addresses consideration of conflicts of interest in accepting or continuing a client relationship or specific engagement.

The Firm's Ability to Perform Engagements (Ref: par. .31a(ii))

.A75 The firm's ability to perform the engagement in accordance with professional standards and applicable legal and regulatory requirements may be affected by the following:

- The availability of appropriate resources to perform the engagement

⁸ Paragraph 23 of SAS No. 146.

⁹ Paragraph .11 of AU-C section 210, *Terms of Engagement*.

- Having access to information to perform the engagement or to the persons who provide such information
- Whether the firm and the engagement team are able to fulfill their responsibilities in relation to the relevant ethical requirements

.A76 Examples of factors the firm may consider in determining whether appropriate resources are available to perform the engagement include the following:

- The circumstances of the engagement and the reporting deadline.
- The availability of individuals with the appropriate competence and capabilities, including sufficient time, to perform the engagement. This includes having
 - individuals to take overall responsibility for directing and supervising the engagement,
 - individuals with knowledge of the relevant industry or the underlying subject matter or criteria to be applied in the preparation of the subject matter information and experience with relevant regulatory or reporting requirements, and
 - individuals to perform audit procedures on the financial information of a component for purposes of an audit of group financial statements.
- The availability of specialists, if needed.
- If an engagement quality review is needed, whether there is an individual available who meets the eligibility requirements in section 20.
- The need for technological resources; for example, IT applications that enable the engagement team to perform procedures on the entity's data.
- The need for intellectual resources; for example, a methodology, industry or subject-matter-specific guides, or access to information sources.

The Firm's Financial and Operational Priorities (Ref: par. .31b)

.A77 Financial priorities may focus on the profitability of the firm, and fees obtained for performing engagements have an effect on the firm's financial resources. Operational priorities may include strategic focus areas, such as growth of the firm's market share, industry specialization, or new service offerings. There may be circumstances in which the firm is satisfied with the fee quoted for an engagement, but it is not appropriate for the firm to accept or continue the engagement or client relationship (for example, when the client lacks integrity and ethical values).

.A78 There may be other circumstances in which the fee quoted for an engagement is not sufficient given the nature and circumstances of the engagement, and it may diminish the firm's ability to perform the engagement in accordance with professional standards and applicable legal and regulatory requirements. The "Fees and Other Types of Remuneration" rule (ET sec. 1.500) of the AICPA code addresses fees and other types of remuneration.

Engagement Performance

Responsibilities of the Engagement Team and Direction, Supervision, and Review (Ref: par. .32a–b)

.A79 Professional standards or applicable legal and regulatory requirements may include specific provisions regarding the overall responsibility of the engagement partner. For example, SAS No. 146 deals with the overall responsibility of the engagement partner for managing and achieving quality on the engagement and for being sufficiently and appropriately involved throughout the engagement, including taking responsibility for appropriate direction and supervision of the engagement team and review of its work.

.A80 Examples of direction, supervision, and review include the following:

- Direction and supervision of the engagement team may include
 - tracking the progress of the engagement,
 - considering the following with respect to members of the engagement team:
 - Whether they understand their instructions
 - Whether the work is being carried out in accordance with the planned approach to the engagement
 - addressing matters arising during the engagement, considering their significance, and modifying the planned approach appropriately, and
 - identifying matters for consultation or consideration by more experienced engagement team members during the engagement.
- A review of work performed may include considering whether
 - the work has been performed in accordance with the firm's policies or procedures, professional standards, and applicable legal and regulatory requirements;
 - significant matters have been raised for further consideration;
 - appropriate consultations have been undertaken, and the resulting conclusions have been documented and implemented;
 - there is a need to revise the nature, timing, and extent of planned work;
 - the work performed supports the conclusions reached and is appropriately documented;
 - the evidence obtained for an assurance engagement is sufficient and appropriate to support the report; and
 - the objectives of the engagement procedures have been achieved.

.A81 In some circumstances, the firm may use personnel from a service delivery center in the firm or individuals from a service delivery center in another network firm to perform procedures on the engagement (that is, the personnel

or other individuals are included in the engagement team). In such circumstances, the firm's policies or procedures may specifically address the direction and supervision of the individuals and review of their work, such as

- what aspects of the engagement may be assigned to individuals in the service delivery center;
- how the engagement partner, or their designee, is expected to direct, supervise, and review the work undertaken by individuals in the service delivery center; and
- the protocols for communication between the engagement team and individuals in the service delivery center.

Professional Judgment and Professional Skepticism (Ref: par. .32c)

.A82 Professional skepticism supports the quality of judgments made on an assurance engagement and, through these judgments, the overall effectiveness of the engagement team in performing the assurance engagement. Other professional standards may address the exercise of professional judgment or maintenance of professional skepticism at the engagement level. For example, SAS No. 146¹⁰ provides examples of impediments to the maintenance of professional skepticism at the engagement level, unconscious auditor biases that may impede the maintenance of professional skepticism, and possible actions that the engagement team may take to mitigate such impediments.

Consultation (Ref: par. .32d)

.A83 Consultation typically involves a discussion at the appropriate professional level, with individuals within or outside the firm who have specialized expertise on difficult or contentious matters. An environment that reinforces the importance and benefit of consultation and encourages engagement teams to consult may contribute to supporting a culture that demonstrates a commitment to quality.

.A84 Difficult or contentious matters on which consultation is needed may either be specified by the firm, or the engagement team may identify matters that require consultation. The firm may also specify how conclusions should be agreed upon and implemented.

.A85 SAS No. 146¹¹ includes requirements for the engagement partner related to consultation.

Differences of Opinion (Ref: par. .32e)

.A86 The firm may encourage identifying differences of opinion at an early stage and may specify the steps to be taken in raising and dealing with them, including how the matter is to be resolved and how the related conclusions should be implemented and documented. In some circumstances, resolving differences of opinion may be achieved through consulting with another practitioner or firm, or a professional or regulatory body.

Engagement Documentation (Ref: par. .32f)

.A87 Law, regulation, or professional standards may prescribe the time limits by which the assembly of final engagement files for specific types of engagements are to be completed. When no such time limits are prescribed, the

¹⁰ Paragraphs A34–A36 of SAS No. 146.

¹¹ Paragraph 35 of SAS No. 146.

time limit may be determined by the firm. For example, in the case of engagements conducted in accordance with the SSAEs or SSARSSs, an appropriate time limit within which to complete the assembly of the final engagement file is ordinarily not more than 60 days after the date of the engagement report.

.A88 The retention and maintenance of engagement documentation may include managing the safe custody, integrity, accessibility, or retrievability of the underlying data and the related technology. The retention and maintenance of engagement documentation may involve the use of IT applications. The integrity of engagement documentation may be compromised if it is altered, supplemented, or deleted without authorization to do so, or if it is permanently lost or damaged.

.A89 Law, regulation, or professional standards may prescribe the retention periods for engagement documentation. If the retention periods are not prescribed, the firm may consider the nature of the engagements performed by the firm and the firm's circumstances, including whether the engagement documentation is needed to provide a record of matters of continuing significance to future engagements. In the case of engagements conducted under generally accepted auditing standards or the SSAEs, the retention period is ordinarily no shorter than five years from the date of the engagement report or, if later, the date of the auditor's report on the group financial statements, when applicable.

Resources (Ref: par. .33)

.A90 Resources for the purposes of the resources component include the following:

- Human resources
- Technological resources; for example, IT applications
- Intellectual resources; for example, written policies or procedures, a methodology, or guides

Financial resources are also relevant to the system of quality management because they are necessary for obtaining, developing, and maintaining the firm's human resources, technological resources, and intellectual resources. Given that the management and allocation of financial resources is strongly influenced by leadership, the quality objectives in governance and leadership, such as those that address financial and operational priorities, address financial resources.

.A91 Resources may be internal to the firm or may be obtained externally from the firm's network, another network firm, or service provider. Resources may be used in performing activities within the firm's system of quality management or in performing engagements as part of operating the system of quality management. In circumstances in which a resource is obtained from the firm's network or another network firm, paragraphs .49–.53 form part of the responses designed and implemented by the firm in achieving the objectives in this component.

Human Resources

Hiring, Developing, and Retaining Personnel and Personnel Competence and Capabilities (Ref: par. .33a and .33d)

.A92 *Competence* is the ability of the individual to perform a role and goes beyond knowledge of principles, standards, concepts, facts, and procedures; it is the integration and application of technical competence, professional skills, and professional ethics, values, and attitudes. Competence can be developed

through a variety of methods, including professional education, continuing professional development, training, work experience, or coaching of less experienced engagement team members by more experienced engagement team members.

.A93 Law, regulation, or professional standards may establish requirements addressing competence and capabilities. For example, law or regulation may establish requirements for the professional licensing of engagement partners, including requirements regarding their professional education and continuing professional development.

.A94 The policies or procedures designed and implemented by the firm relating to hiring, developing, and retaining personnel may address, for example, the following:

- Recruiting individuals who have, or are able to develop, appropriate competence
- Training programs focused on developing the competence of personnel and continuing professional development
- Evaluation mechanisms that are undertaken at appropriate intervals and include competency areas and other performance measures
- Compensation, promotion, and other incentives, for all personnel, including engagement partners and individuals assigned roles and responsibilities related to the firm's system of quality management

Personnel's Commitment to Quality and Accountability and Recognition for Commitment to Quality (Ref: par. .33b)

.A95 Timely evaluations and feedback help support and promote the continual development of the competence of personnel. Less formal methods of evaluation and feedback may be used, such as in the case of firms with fewer personnel.

.A96 Positive actions or behaviors demonstrated by personnel may be recognized through various means, such as through compensation, promotion, or other incentives. In some circumstances, simple or informal incentives that are not based on monetary rewards may be appropriate.

.A97 The manner in which the firm holds personnel accountable for actions or behaviors that negatively affect quality, such as failing to demonstrate a commitment to quality, develop and maintain the competence to perform their role, or implement the firm's responses as designed, may depend on the nature of the action or behavior, including its severity and frequency of occurrence. The following are some actions the firm may take when personnel demonstrate actions or behaviors that negatively affect quality:

- Training or other professional development
- Considering the effect of the matter on the evaluation, compensation, promotion, or other incentives of those involved
- Disciplinary action, if appropriate

Individuals obtained from external sources (Ref: par. .33c).

.A98 Professional standards may include responsibilities for the engagement partner regarding the appropriateness of resources. For example, SAS

No. 146¹² addresses the responsibility of the engagement partner for determining that sufficient and appropriate resources to perform the engagement are assigned or made available to the engagement team in a timely manner in accordance with the firm's policies or procedures.

Engagement Team Members Assigned to Each Engagement (Ref: par. .33d)

.A99 Engagement team members may be assigned to engagements by

- the firm, including assigning personnel from a service delivery center in the firm.
- the firm's network or another network firm when the firm uses individuals from the firm's network or another network firm to perform procedures on the engagement (for example, a component auditor or a service delivery center of the network or another network firm).
- a service provider when the firm uses individuals from a service provider to perform procedures on the engagement (for example, a component auditor from a firm not within the firm's network).

.A100 SAS No. 146¹³ addresses the responsibility of the engagement partner to determine that members of the engagement team, and any auditor's external specialists and internal auditors who provide direct assistance (who are not part of the engagement team), collectively have the appropriate competence and capabilities, including sufficient time, to perform the engagement. The responses designed and implemented by the firm to address the competence and capabilities of engagement team members assigned to the engagement may include policies or procedures that address the following:

- Information that may be obtained by the engagement partner and factors to consider in determining that the engagement team members assigned to the engagement, including those assigned by the firm's network, another network firm, or service provider, have the competence and capabilities to perform the engagement
- How concerns about the competence and capabilities of engagement team members, in particular those assigned by the firm's network, another network firm, or service provider, may be resolved

.A101 The requirements in paragraphs .49–.53 are also applicable when using individuals from the firm's network or another network firm on an engagement, including component auditors (see, for example, paragraph .A190).

Technological Resources (Ref: par. .33f)

.A102 Technological resources, which are typically IT applications, form part of the firm's IT environment. The firm's IT environment also includes the supporting IT infrastructure and the IT processes and human resources involved in those processes:

- An IT application is a program or a set of programs that is designed to perform a specific function directly for the user or, in some cases, for another application program.
- The IT infrastructure comprises the IT network, operating systems, and databases and their related hardware and software.

¹² Paragraph 25 of SAS No. 146.

¹³ Paragraph 26 of SAS No. 146.

- The IT processes are the firm's processes to manage access to the IT environment, program changes or changes to the IT environment, and IT operations, which includes monitoring the IT environment.

.A103 A technological resource may serve multiple purposes within the firm, and some of the purposes may be unrelated to the system of quality management. Technological resources that are relevant for the purposes of this section are as follows:

- Technological resources that are directly used in designing, implementing, or operating the firm's system of quality management
- Technological resources that are used directly by engagement teams in performing engagements
- Technological resources that are essential to enabling the effective operation of the preceding, such as, in relation to an IT application, the IT infrastructure and IT processes supporting the IT application

.A104 Examples of scalability to demonstrate how the technological resources that are relevant for the purposes of this section may differ in firms of different complexity include the following:

- In a less complex firm, the technological resources may comprise a commercial IT application used by engagement teams that has been purchased from a service provider. The IT processes that support the operation of the IT application may also be relevant, although they may be simple (for example, processes for authorizing access to the IT application and processing updates to the IT application).
- In a more complex firm, the technological resources may be more complex and may comprise the following:
 - Multiple IT applications, including custom-developed applications or applications developed by the firm's network, such as
 - IT applications used by engagement teams (for example, engagement software and automated audit tools) and
 - IT applications developed and used by the firm to manage aspects of the system of quality management (for example, IT applications to monitor independence or assign personnel to engagements)
 - The IT processes that support the operation of these IT applications, including the individuals responsible for managing the IT infrastructure and processes and the firm's processes for managing program changes to IT applications

.A105 The firm may consider the following matters in obtaining, developing, implementing, and maintaining an IT application:

- The data inputs are complete and appropriate.
- Confidentiality of the data is preserved.
- The IT application operates as designed and achieves the purpose for which it is intended.

- The outputs of the IT application achieve the purpose for which they will be used.
- The general IT controls necessary to support the IT application's continued operation as designed are appropriate.
- The need for specialized skills to use the IT application effectively, including the training of individuals who will use the IT application.
- The need to develop procedures that set out how the IT application operates.

.A106 The firm may specifically prohibit the use of IT applications or features of IT applications until such time that it has been determined that they operate appropriately and have been approved for use by the firm. Alternatively, the firm may establish policies or procedures to address circumstances in which the engagement team uses an IT application that is not approved by the firm. Such policies or procedures may require the engagement team to determine that the IT application is appropriate for use prior to using it on the engagement, through considering the matters in paragraph .A102. SAS No. 146¹⁴ addresses the engagement partner's responsibilities for engagement resources.

Intellectual Resources (Ref: par. .33g)

.A107 Intellectual resources include the information and materials the firm uses to enable the operation of the system of quality management and promote consistency in performing engagements. Examples of intellectual resources include written policies or procedures, a methodology, industry or subject-matter-specific guides, accounting guides, standardized documentation, or access to information sources (for example, subscriptions to websites that provide in-depth information about entities or other information that is typically used in performing engagements).

.A108 Intellectual resources may be made available through technological resources; for example, the firm's methodology may be embedded in the IT application that facilitates the planning and performance of the engagement.

Use of Technological and Intellectual Resources (Ref: par. .33f–g)

.A109 The firm may establish policies or procedures regarding the use of the firm's technological and intellectual resources. Examples of such policies or procedures include the following:

- Requiring the use of certain IT applications or intellectual resources in performing engagements, or relating to other aspects of the engagement, such as in archiving the engagement file
- Specifying the qualifications or experience that individuals need to use the resource, including the need for a specialist or training; for example, the firm may specify the qualifications or expertise needed to use an IT application that analyzes data, given that specialized skills may be needed to interpret the results
- Specifying the responsibilities of the engagement partner regarding the use of technological and intellectual resources
- Setting out how the technological or intellectual resources are to be used, including how individuals should interact with an IT application or how the intellectual resource should be applied, and

¹⁴ Paragraphs 25–28 of SAS No. 146.

the availability of support or assistance in using the technological or intellectual resource

Service Providers (Ref: par. .17 and .33h)

.A110 In some circumstances, the firm may use resources that are provided by a service provider, particularly in circumstances in which the firm does not have access to the appropriate resources internally. Notwithstanding that a firm may use resources from a service provider, the firm remains responsible for its system of quality management.

.A111 Examples of resources from a service provider include the following:

- Individuals engaged to perform the firm's monitoring activities or engagement quality reviews, or to provide consultation on technical matters
- A commercial IT application used to perform audit engagements
- Individuals performing procedures on the firm's engagements; for example, component auditors from firms not within the firm's network or individuals engaged to attend a physical inventory count at a remote location
- An auditor's external specialist used by the firm to assist the engagement team in obtaining audit evidence

.A112 In identifying and assessing quality risks, the firm is required to obtain an understanding of the conditions, events, circumstances, actions, or inactions that may adversely affect the achievement of the quality objectives, which includes conditions, events, circumstances, actions, or inactions relating to service providers. In doing so, the firm may consider the nature of the resources provided by service providers, how and the extent to which they will be used by the firm, and the general characteristics of the service providers used by the firm (for example, the varying types of other professional services firms that are used) to identify and assess quality risks related to the use of such resources.

.A113 In determining whether a resource from a service provider is appropriate for use in the firm's system of quality management or performing engagements, the firm may obtain information about the service provider and the resource it provides from a number of sources. The following are matters the firm may consider:

- The related quality objective and quality risks. For example, in the case of a methodology from a service provider, there may be quality risks related to the quality objective in paragraph .33g, such as a quality risk that the service provider does not update the methodology to reflect changes in professional standards and applicable legal and regulatory requirements.
- The nature and scope of the resources and the conditions of the service (for example, in relation to an IT application, how often updates will be provided, limitations on the use of the IT application, and how the service provider addresses confidentiality of data).
- The extent to which the resource is used across the firm, how the resource will be used by the firm, and whether it is suitable for that purpose.
- The extent of customization of the resource for the firm.
- The firm's previous use of the service provider.

- The service provider's experience in the industry and reputation in the market.
- The results of attestation engagements performed by independent third parties on the resource (for example, assurance engagements on quality control materials or reports on service organization controls).

.A114 The firm may have a responsibility to take further actions in using the resource from a service provider so that the resource functions effectively. For example, the firm may need to communicate information to the service provider in order for the resource to function effectively or, in relation to an IT application, the firm may need to have supporting IT infrastructure and IT processes in place.

.A115 The evaluation of a service provider from a firm not within the firm's network that is used as a component auditor may be different than that of a service provider engaged directly by the firm. For example, in understanding the competency of the component auditor to perform the engagement, it may not be necessary or practicable for the firm to obtain an understanding of how the component auditor updates its methodology to reflect changes in professional standards. Rather, the firm could perform procedures such as review of results of regulatory inspections, transparency or audit quality information published by the component auditor's firm, or evaluation of the reputation of the component auditor.

Information and Communication (Ref: par. .34)

.A116 Obtaining, generating, or communicating information is generally an ongoing process that involves all personnel and encompasses the dissemination of information within the firm and externally. Information and communication are pervasive to all components of the system of quality management.

The Firm's Information System (Ref: par. .34a)

.A117 Reliable and relevant information includes information that is accurate, complete, timely, and valid to enable the proper functioning of the firm's system of quality management and to support decisions regarding the system of quality management.

.A118 The information system may include the use of manual or IT elements, which affect the manner in which information is identified, captured, processed, maintained, and communicated. The procedures to identify, capture, process, maintain, and communicate information may be enforced through IT applications and in some cases may be embedded within the firm's responses for other components. In addition, digital records may replace or supplement physical records.

.A119 An example of scalability is that less complex firms with fewer personnel and direct involvement of leadership may not need rigorous policies and procedures that specify how information should be identified, captured, processed, and maintained.

Communication Within the Firm (Ref: par. .34b–c)

.A120 The firm may recognize and reinforce the responsibility of personnel and engagement teams to exchange information with the firm and one another by establishing communication channels to facilitate communication across

the firm. Examples of communication among the firm, engagement teams, and other individuals include the following:

- The firm communicates the responsibility for implementing the firm's responses to personnel and engagement teams.
- The firm communicates changes to the system of quality management to personnel and engagement teams to the extent that the changes are relevant to their responsibilities and enables personnel and engagement teams to take prompt and appropriate action in accordance with their responsibilities.
- The firm communicates information that is obtained during the firm's acceptance and continuance process that is relevant to engagement teams in planning and performing engagements.
- Engagement teams communicate the following information to the firm:
 - Information about the client that is obtained during the performance of an engagement that may have caused the firm to decline the client relationship or specific engagement had that information been known prior to accepting or continuing the client relationship or specific engagement
 - Information about the operation of the firm's responses (for example, concerns about the firm's processes for assigning personnel to engagements) which, in some cases, may indicate a deficiency in the firm's system of quality management
- Engagement teams communicate information to the engagement quality reviewer or individuals providing consultation.
- Group engagement teams communicate matters to component auditors in accordance with the firm's policies or procedures, including matters related to quality management at the engagement level.
- The individual or individuals assigned operational responsibility for compliance with independence requirements communicate to relevant personnel and engagement teams changes in the independence requirements and the firm's policies or procedures to address such changes.

Communication With External Parties

Communication to or Within the Firm's Network and to Service Providers (Ref: par. .34d(i))

.A121 In addition to the firm communicating information to or within the firm's network or to a service provider, the firm may need to obtain information from the network, a network firm, or a service provider that supports the firm in the design, implementation, and operation of its system of quality management. For example, the firm may obtain information from the network or other network firms about clients of other network firms when there are independence requirements that affect the firm.

Communication With Others External to the Firm (Ref: par. .34d(ii))

.A122 Examples of when law, regulation, or professional standards may require the firm to communicate information to external parties include the following:

- The firm becomes aware of noncompliance with laws and regulations by a client, and relevant ethical requirements require the firm to report the noncompliance with laws and regulations to an appropriate authority outside the client entity or to consider whether such reporting is an appropriate action in the circumstances.
- Law or regulation requires the firm to publish a transparency report and specifies the nature of the information that is required to be included in the transparency report.
- Securities law or regulation requires the firm to communicate certain matters to those charged with governance.

Paragraphs .A131–.A135 address communications to support external parties' understanding of the system of quality management beyond those required by law, regulation, or professional standards.

.A123 In some cases, law or regulation may preclude the firm from communicating information related to its system of quality management externally. Examples of when the firm may be precluded from communicating information externally include the following:

- Confidentiality law or regulation prohibits disclosure of certain information
- Law, regulation, or relevant ethical requirements include provisions addressing the duty of confidentiality

Specified Responses (Ref: par. .35)

.A124 The specified responses may address multiple quality risks related to more than one quality objective across different components. For example, policies or procedures for complaints and allegations may address quality risks related to quality objectives in resources (for example, personnel's commitment to quality), relevant ethical requirements, and governance and leadership.

Relevant Ethical Requirements (Ref: par. .35a–b)

.A125 Relevant ethical requirements may contain provisions regarding the identification and evaluation of threats and how they should be addressed. For example, the AICPA code provides a conceptual framework for this purpose and, in applying the conceptual framework, requires that the firm use the reasonable and informed third-party test.

.A126 Relevant ethical requirements may specify how the firm is required to respond to a breach. For example, the "Breach of an Independence" interpretation (ET sec. 1.298.010) of the "Independence Rule" (ET sec. 1.200.001) contains guidance addressing a breach of an independence interpretation of the AICPA code, which also contains guidance addressing a breach of any other provision of the AICPA code.

.A127 Matters the firm may address relating to breaches of the relevant ethical requirements include the following:

- The communication of breaches of the relevant ethical requirements to appropriate personnel

- The evaluation of the significance of a breach and its effect on compliance with relevant ethical requirements
- The actions to be taken to satisfactorily address the consequences of a breach, including that such actions be taken as soon as practicable
- Determining whether to report a breach to external parties, such as those charged with governance of the entity to which the breach relates or an external oversight authority
- Determining the appropriate actions to be taken in relation to the individual or individuals responsible for the breach

Complaints and Allegations (Ref: par. .35c)

.A128 Establishing policies or procedures for dealing with complaints and allegations may assist the firm in preventing engagement reports from being issued that are inappropriate. It also may assist the firm in

- identifying and dealing with individuals, including leadership, who do not act or behave in a manner that demonstrates a commitment to quality and supports the firm's commitment to quality, or
- identifying deficiencies in the system of quality management.

.A129 Complaints and allegations may be made by personnel or others external to the firm (for example, clients, component auditors, or individuals within the firm's network).

Information That Becomes Known Subsequent to Accepting or Continuing a Client Relationship or Specific Engagement (Ref: par. .35d)

.A130 Information that becomes known subsequent to accepting or continuing a client relationship or specific engagement may

- have existed at the time of the firm's decision to accept or continue the client relationship or specific engagement, and the firm was not aware of such information, or
- relate to new information that has arisen since the decision to accept or continue the client relationship or specific engagement.

.A131 Examples of matters addressed in the firm's policies or procedures for circumstances in which information becomes known subsequent to accepting or continuing a client relationship or specific engagement that may have affected the firm's decision to accept or continue a client relationship or specific engagement include the following:

- Undertaking consultation within the firm or with legal counsel
- Considering whether there is a professional, legal, or regulatory requirement for the firm to continue the engagement
- Discussing with the appropriate level of the client's management and with those charged with governance or the engaging party the action that the firm might take based on the relevant facts and circumstances
- When it is determined that withdrawal is an appropriate action:
 - Informing the client's management and those charged with governance or the engaging party of this decision and the reasons for the withdrawal

- Considering whether there is a professional, legal, or regulatory requirement for the firm to report the withdrawal from the engagement, or from both the engagement and the client relationship, together with the reasons for the withdrawal, to regulatory authorities

.A132 In some circumstances, law or regulation may impose an obligation on the firm to accept or continue a client engagement.

.A133 Examples of matters addressed in the firm's policies or procedures in circumstances in which the firm is obligated to accept or continue an engagement, or the firm is unable to withdraw from an engagement, and the firm is aware of information that would have caused the firm to decline or discontinue the engagement, include the following:

- The firm considers the effect of the information on the performance of the engagement.
- The firm communicates the information to the engagement partner and requests the engagement partner to increase the extent and frequency of the direction and supervision of the engagement team members and review of their work.
- The firm assigns more experienced personnel to the engagement.
- The firm determines that an engagement quality review should be performed.

Communication With External Parties (Ref: par. .35e)

.A134 The firm's ability to maintain stakeholder confidence in the quality of its engagements may be enhanced through relevant, reliable, and transparent communication by the firm about the activities that it has undertaken to address quality and the effectiveness of those activities.

.A135 External parties who may use information about the firm's system of quality management, and the extent of their interest in the firm's system of quality management, may vary based on the nature and circumstances of the firm and its engagements.

.A136 Examples of external parties who may use information about the firm's system of quality management include the following:

- Management or those charged with governance of the firm's clients may use the information to determine whether to appoint the firm to perform an engagement.
- External oversight authorities may have indicated a desire for the information to support their responsibilities in monitoring the quality of engagements across a jurisdiction and in understanding the work of firms.
- Other firms who use the work of the firm in performing engagements (for example, in relation to a group audit) may have requested such information.
- Other users of the firm's engagement reports, such as investors who use engagement reports in their decision making, may have indicated a desire for the information.

.A137 The information about the system of quality management provided to external parties, including information communicated to those charged with governance about how the system of quality management supports the

consistent performance of quality engagements, may address such matters as the following:

- The nature and circumstances of the firm, such as the organizational structure, business model, strategy, and operating environment
- The firm's governance and leadership, such as
 - its culture;
 - how it demonstrates a commitment to quality; and
 - how roles, responsibilities, and authority with respect to the system of quality management are assigned
- How the firm fulfills its responsibilities in accordance with relevant ethical requirements, including those related to independence
- Factors that contribute to quality engagements; for example, such information may be presented in the form of engagement quality indicators with narrative to explain the indicators
- The results of the firm's monitoring activities and external inspections and how the firm has remediated identified deficiencies or is otherwise responding to them
- The evaluation undertaken in accordance with paragraphs .54–.55 of whether the system of quality management provides the firm with reasonable assurance that the objectives of the system are being achieved and the conclusion thereon, including the basis for the judgments made in evaluating and concluding
- How the firm has responded to emerging developments and changes in the circumstances of the firm or its engagements, including how the system of quality management has been adapted to respond to such changes
- The relationship between the firm and the network, the overall structure of the network, a description of network requirements and network services, the responsibilities of the firm and the network (including that the firm is ultimately responsible for the system of quality management), and information about the overall scope and results of network monitoring activities across the network firms

Determining When It Is Appropriate to Communicate With External Parties (Ref: par. .35e(i))

.A138 The firm's determination of when it is appropriate to communicate with external parties about the firm's system of quality management is a matter of professional judgment and may be influenced by matters such as the following:

- The types of engagements performed by the firm
- The types of entities for which such engagements are undertaken; for example, entities that may have public interest or public accountability characteristics, such as
 - entities that hold a significant amount of assets in a fiduciary capacity for a large number of stakeholders, including financial institutions, such as certain banks, insurance companies, and pension funds;

- entities with a high public profile or whose management or owners have a high public profile; and
 - entities with a large number and wide range of stakeholders.
- The nature and circumstances of the firm
 - The nature of the firm's operating environment, such as customary business practice in the firm's jurisdiction and the characteristics of the financial markets in which the firm operates
 - The extent to which the firm has already communicated with external parties in accordance with law or regulation (that is, whether further communication is needed and, if so, the matters to be communicated)
 - The expectations of stakeholders in the firm's jurisdiction, including the understanding and interest that external parties have expressed about the engagements undertaken by the firm, and the firm's processes in performing the engagements
 - Jurisdictional trends
 - The information that is already available to external parties
 - How external parties may use the information, and their general understanding of matters related to firms' systems of quality management and engagements performed by the firm in its accounting and auditing practice
 - The public interest benefits of external communication and whether it would reasonably be expected to outweigh the costs (monetary or otherwise) of such communication

The preceding matters may also affect the information provided by the firm in the communication and the nature, timing, and extent and appropriate form of communication.

.A139 AU-C section 260, *The Auditor's Communication With Those Charged With Governance*, deals with the auditor's responsibility to communicate with those charged with governance in an audit of financial statements and addresses the auditor's determination of the appropriate person or persons within the entity's governance structure with whom to communicate¹⁵ and the communication process.¹⁶ In some circumstances, it may be appropriate to include information about the firm's system of quality management in those communications with those charged with governance (or when performing other engagements, for example, review or examination engagements). How the communication with those charged with governance is undertaken (that is, by the firm or the engagement team) may depend on the firm's policies or procedures and the circumstances of the engagement.

Considerations for Engagements for Governmental Organizations

.A140 The firm may determine it is appropriate to communicate to those charged with governance of a governmental organization about how the firm's system of quality management supports the consistent performance of quality engagements, taking into account the size and complexity of the governmental

¹⁵ Paragraphs .07–.09 of AU-C section 260, *The Auditor's Communication With Those Charged With Governance*.

¹⁶ Paragraphs .15–.20 of AU-C section 260.

organization, the range of its stakeholders, the nature of the services it provides, and the roles and responsibilities of those charged with governance.

Nature, Timing, and Extent and Appropriate Form of Communication With External Parties (Ref: par. .35e(ii))

.A141 The firm may consider the following attributes in preparing information that is communicated to external parties:

- The information is specific to the circumstances of the firm. Relating the matters in the firm's communication directly to the specific circumstances of the firm may help to minimize the potential that such information becomes overly standardized and less useful over time.
- The information is presented in a clear and understandable manner, and the manner of presentation is neither misleading nor would inappropriately influence the users of the communication (for example, the information is presented in a manner that is appropriately balanced toward positive and negative aspects of the matter being communicated).
- The information is accurate and complete in all material respects and does not contain information that is misleading.
- The information takes into consideration the information needs of the users for whom it is intended. In considering the information needs of the users, the firm may consider matters such as the level of detail that users would find meaningful and whether users have access to relevant information through other sources (for example, the firm's website).

.A142 The firm uses professional judgment in determining, in the circumstances, the appropriate form of communication with the external party, including communication with those charged with governance when performing an audit of financial statements of listed entities, which may be made orally or in writing. Accordingly, the form of communication may vary.

Examples of forms of communication to external parties include the following:

- A publication such as a transparency report or audit quality report
- Targeted written communication to specific stakeholders (for example, information about the results of the firm's monitoring and remediation process)
- Direct conversations and interactions with the external party (for example, discussions between the engagement team and those charged with governance)
- A web page
- Other forms of digital media, such as social media, or interviews or presentations via webcast or video

Engagements Subject to an Engagement Quality Review

Engagement Quality Review Required by Law or Regulation (Ref: par. .35f(i))

.A143 Law or regulation may require an engagement quality review to be performed, for example, for audit engagements for entities that

- are *public interest entities* as defined in a particular jurisdiction,
- are governmental organizations or recipients of government funding, or entities with public accountability,

- operate in certain industries (for example, financial institutions such as banks, insurance companies, and pension funds),
- meet a specified asset threshold, or
- are under the management of a court or judicial process (for example, liquidation).

Engagement Quality Review as a Response to Address One or More Quality Risks(Ref: par. .35f(ii))

.A144 The firm's understanding of the conditions, events, circumstances, actions, or inactions that may adversely affect the achievement of the quality objectives as required by paragraph .26a(ii) relates to the nature and circumstances of the engagements performed by the firm. In designing and implementing responses to address one or more quality risks, the firm may determine that an engagement quality review is an appropriate response based on the reasons for the assessments given to the quality risks.

.A145 Criteria established by the firm to determine whether an engagement quality review is an appropriate response for one or more quality risks may relate to the types of engagements performed by the firm and reports to be issued, and the types of entities for which engagements are undertaken. Examples of conditions, events, circumstances, actions, or inactions giving rise to such quality risks include the following:

Those relating to the types of engagements performed by the firm and reports to be issued:

- Engagements that involve a high level of complexity or judgment, such as the following:
 - Audits of financial statements for entities operating in an industry that typically has accounting estimates with a high degree of estimation uncertainty (for example, certain large financial institutions or mining entities) or for entities for which uncertainties exist related to events or conditions that may cast significant doubt on their ability to continue as a going concern
 - Assurance engagements that require specialized skills and knowledge in measuring or evaluating the underlying subject matter against the applicable criteria (for example, a greenhouse gas statement in which there are significant uncertainties associated with the quantities reported therein)
- Engagements on which issues have been encountered, such as audit engagements with recurring internal or external inspection findings, unremediated significant deficiencies in internal control, or a material restatement of comparative information in the financial statements
- Engagements for which unusual circumstances have been identified during the firm's acceptance and continuance process (for example, a new client that had a disagreement with its previous auditor or assurance practitioner)
- Engagements that involve reporting on financial or nonfinancial information that is expected to be included in a regulatory filing and that may involve a higher degree of judgment, such as pro forma financial information to be included in a prospectus

Those relating to the types of entities for which engagements are undertaken:

- Entities in emerging industries or for which the firm has no previous experience
- Entities for which concerns were expressed in communications from regulators
- Entities that may have public interest or public accountability characteristics, such as the following:
 - Entities that hold a significant amount of assets in a fiduciary capacity for a large number of stakeholders, including financial institutions such as certain banks, insurance companies, and pension funds for which an engagement quality review is not otherwise required by law or regulation
 - Entities with a high public profile or whose management or owners have a high public profile
 - Entities with a large number and wide range of stakeholders
 - Governmental organizations
 - Due to their size and complexity, the range of their stakeholders or the nature of the services they provide
 - Due to the complexity, and importance to users, of additional reporting requirements established by law or regulation (for example, a separate report on instances of noncompliance with law or regulation to the legislature or other governing body or communicating such instances in the auditor's report on the financial statements)

.A146 The firm's responses to address quality risks may include other forms of engagement reviews that are not an engagement quality review. For example, for audits of financial statements, the firm's responses may include reviews of the engagement team's procedures relating to significant risks, or reviews of certain significant judgments, by personnel who have specialized technical expertise. In some cases, these other types of engagement reviews may be undertaken in addition to an engagement quality review.

.A147 In some cases, the firm may determine that there are no audits or other engagements for which an engagement quality review or another form of engagement review is an appropriate response to address the quality risks.

Monitoring and Remediation Process (Ref: par. .36–.48)

.A148 In addition to enabling the evaluation of the system of quality management, the monitoring and remediation process facilitates the proactive and continual improvement of engagement quality and the system of quality management. Examples follow:

- Given the inherent limitations of a system of quality management, the firm's identification of deficiencies is not unusual, and it is an important aspect of the system of quality management because prompt identification of deficiencies enables the firm to remediate them in a timely and effective manner and contributes to a culture of continual improvement.

- The monitoring activities may provide information that enables the firm to prevent a deficiency through responding to a finding that could, over a period of time, lead to a deficiency.

Designing and Performing Monitoring Activities (Ref: par. .38–.39)

.A149 The firm's monitoring activities may comprise a combination of on-going monitoring activities and periodic monitoring activities. Ongoing monitoring activities are generally routine activities built into the firm's processes and performed on a real-time basis. Periodic monitoring activities are conducted at certain intervals by the firm. In most cases, ongoing monitoring activities provide information about the system of quality management in a timelier manner.

.A150 Monitoring activities may include the inspection of in-process engagements. Inspections of engagements are designed to monitor whether an aspect of the system of quality management is designed, implemented, and operating in the manner intended. In some circumstances, the system of quality management may include responses that are designed to review engagements while they are in the process of being performed that appear similar in nature to an inspection of in-process engagements (for example, reviews that are designed to detect failures or shortcomings in the system of quality management so that they can prevent a quality risk from occurring). The purpose of the activity drives its design and implementation and where it fits within the system of quality management (that is, whether it is an inspection of an in-process engagement that is a monitoring activity or a review of an engagement that is a response to address a quality risk).

.A151 The nature, timing, and extent of the monitoring activities may also be affected by other matters, including

- the size, structure, and organization of the firm,
- the involvement of the firm's network in monitoring activities, and
- the resources that the firm intends to use to enable monitoring activities, such as the use of IT applications.

.A152 When performing monitoring activities, the firm may determine that changes to the nature, timing, and extent of the monitoring activities are needed, such as when findings indicate the need for more extensive monitoring activities.

The Design of the Firm's Risk Assessment Process and Monitoring and Remediation Process (Ref: par. .38c)

.A153 How the firm's risk assessment process is designed (for example, a centralized or decentralized process, or the frequency of review) may affect the nature, timing, and extent of the monitoring activities, including monitoring activities over the firm's risk assessment process.

.A154 How the firm's monitoring and remediation process is designed (that is, the nature, timing, and extent of the monitoring and remediation activities, taking into account the nature and circumstances of the firm) may affect the monitoring activities undertaken by the firm to determine whether the monitoring and remediation process is achieving the intended purpose as described in paragraph .36.

.A155 An example of scalability to demonstrate how the monitoring activities for the monitoring and remediation process may differ in firms of different complexity is as follows:

- In a less complex firm, the monitoring activities may be simple because information about the monitoring and remediation process may be readily available in the form of leadership's knowledge, based on their frequent interaction with the system of quality management, of the nature, timing, and extent of the monitoring activities undertaken, the results of the monitoring activities, and the firm's actions to address the results.
- In a more complex firm, the monitoring activities for the monitoring and remediation process may be specifically designed to determine that the monitoring and remediation process is providing relevant, reliable, and timely information about the system of quality management, and responding appropriately to identified deficiencies.

Changes in the System of Quality Management (Ref: par. .38d)

.A156 Changes in the system of quality management may include

- changes to address an identified deficiency in the system of quality management, and
- changes to the quality objectives, quality risks, or responses as a result of changes in the nature and circumstances of the firm and its engagements.

When changes occur, previous monitoring activities undertaken by the firm may no longer provide the firm with information to support the evaluation of the system of quality management and, therefore, the firm's monitoring activities may include monitoring of those areas of change.

Previous Monitoring Activities (Ref: par. .38e and .44b)

.A157 The results of the firm's previous monitoring activities may indicate areas of the system where a deficiency may arise, particularly areas where there is a history of identified deficiencies.

.A158 Previous monitoring activities undertaken by the firm may no longer provide the firm with information to support the evaluation of the system, including on areas of the system of quality management that have not changed, particularly when time has elapsed since the monitoring activities were undertaken.

Other Relevant Information (Ref: par. .38f)

.A159 In addition to the sources of information indicated in paragraph .38f, other relevant information may include the following:

- Information communicated by the firm's network in accordance with paragraphs .51c and .52b about the firm's system of quality management, including the network requirements or network services that the firm has included in its system of quality management
- Information communicated by a service provider about the resources the firm uses in its system of quality management
- Information from regulators about the entities for whom the firm performs engagements that is made available to the firm, such as information from a securities regulator about an entity for whom the firm performs engagements (for example, irregularities in the entity's financial statements)

.A160 The results of external inspections or other relevant information, both internal and external, may indicate that previous monitoring activities undertaken by the firm failed to identify a deficiency in the system of quality management. This information may affect the firm's consideration of the nature, timing, and extent of the monitoring activities.

.A161 External inspections are not a substitute for the firm's internal monitoring activities. Nevertheless, the results of external inspections inform the nature, timing, and extent of the monitoring activities.

Engagement Inspections (Ref: par. .39)

.A162 Examples of matters in paragraph .38 that may be considered by the firm in selecting completed engagements for inspection include the following:

- In relation to the conditions, events, circumstances, actions, or in-actions giving rise to the quality risks:
 - The types of engagements performed by the firm, and the extent of the firm's experience in performing the type of engagement
 - The types of entities for which engagements are undertaken, such as the following:
 - Entities operating in emerging industries
 - Entities operating in industries associated with a high level of complexity or judgment
 - Entities operating in an industry that is new to the firm
 - The tenure and experience of engagement partners
- The results of previous inspections of completed engagements, including for each engagement partner
- In relation to other relevant information:
 - Complaints or allegations about an engagement partner
 - The results of external inspections, including for each engagement partner
 - The results of the firm's evaluation of each engagement partner's commitment to quality

.A163 The firm may undertake multiple monitoring activities, other than inspection of completed engagements, that focus on determining whether engagements have complied with policies or procedures. These monitoring activities may be undertaken on certain engagements or engagement partners. The nature and extent of these monitoring activities, and the results, may be used by the firm in determining the following:

- How often to select completed engagements for inspection, and which completed engagements to select, based on the factors described in paragraph .A159
- Which engagement partners to select for inspection, and how frequently to select an engagement partner for inspection, based on factors such as how long it has been since the engagement partner was subject to inspection, the results of previous inspections of the engagement partner, or the engagement partner's experience with performing engagements at different levels of service, in new industries, or with complex financial reporting matters

- Which aspects of the engagement to consider when performing the inspection of completed engagements

For example, if the firm has undertaken inspections of in-process engagements,

- the firm may determine it appropriate to reduce the extent of selection of completed engagements for inspection;
- the results of the inspections of in-process engagements may indicate areas of risk that may affect which completed engagements are selected for inspection; or
- the results of the inspections of in-process engagements may identify negative quality issues that prompt the firm to shorten the inspection cycle or expand the extent of completed engagement inspections.

.A164 The inspection of completed engagements for engagement partners on a cyclical basis may assist the firm in monitoring whether engagement partners have fulfilled their overall responsibility for managing and achieving quality on the engagements to which they are assigned.

.A165 Examples of policies and procedures that a firm may establish to apply a cyclical basis for the inspection of completed engagements for each engagement partner include the following policies or procedures that

- set forth the standard period of the inspection cycle, such as the inspection of a completed engagement for each engagement partner performing audits of financial statements once every, for example, three years, and for all other engagement partners, once every, for example, five years.
- set out the criteria for selecting completed engagements, including that for an engagement partner performing audits of financial statements, the engagements selected include an audit engagement.
- address the selection of engagement partners in a manner that is unpredictable.
- address when it is necessary or appropriate to select engagement partners more, or less, frequently than the standard period set out in the policy. Examples follow:
 - The firm may select engagement partners more frequently than the standard period set out in the firm's policy when the following apply:
 - Multiple deficiencies have been identified by the firm that have been evaluated as severe, and the firm determines that a more frequent cyclical inspection is needed across all engagement partners.
 - The engagement partner performs engagements for entities operating in a certain industry in which there are high levels of complexity or judgment.
 - An engagement performed by the engagement partner has been subject to other monitoring activities, and the results of the other monitoring activities were unsatisfactory.

- The engagement partner has performed an engagement for an entity operating in an industry in which the engagement partner has limited experience.
 - The engagement partner has limited experience in performing that level of service engagements.
 - The engagement partner is a newly appointed engagement partner or has recently joined the firm from another firm or another jurisdiction.
- The firm may defer the selection of the engagement partner (for example, deferring for a year beyond the standard period set out in the firm's policy) when
- engagements performed by the engagement partner have been subject to other monitoring activities during the standard period set out in the firm's policy, and
 - the results of the other monitoring activities provide sufficient information about the engagement partner; that is, performing the inspection of completed engagements would unlikely provide the firm with further information about the engagement partner.

.A166 The matters considered in an inspection of an engagement depend on how the inspection will be used to monitor the system of quality management. Ordinarily, the inspection of an engagement includes determining that responses that are implemented at the engagement level (for example, the firm's policies and procedures in respect of engagement performance) have been implemented as designed and are operating effectively.

The Relationship of Peer Review to Monitoring

.A167 A peer review is not a substitute for all monitoring activities. However, because the objective of a peer review is similar to that of an inspection, the firm's quality management policies or procedures may provide that a peer review conducted under standards established by the AICPA may be a substitute for the inspection of engagement documentation, reports, and clients' financial statements for some or all engagements for the period covered by the peer review.

.A168 A peer review may result in findings or deficiencies. However, the definitions of *findings* and *deficiencies* in this section are different from the definitions of those terms in *AICPA Standards for Performing and Reporting on Peer Reviews*.¹⁷ Accordingly, findings and deficiencies may be evaluated differently for peer review purposes than for purposes of this section. Findings or deficiencies identified in a firm's system of quality management may not necessarily result in a peer review finding or deficiency; similarly, peer review findings or deficiencies may not necessarily equate to findings or deficiencies in a firm's system of quality management. As with other items identified in the firm's monitoring activities, the firm would need to assess any peer review findings or deficiencies to determine the impact on the firm's evaluation of its system of quality management.

¹⁷ Paragraph .11 of PR-C section 100, *Concepts Common to All Peer Reviews*.

Individuals Performing the Monitoring Activities (Ref: par. .40)

.A169 It is important that individuals performing the monitoring activities have the competence, capabilities, including sufficient time, and objectivity to perform the monitoring activities. Each of these attributes is equally essential. In some circumstances, there may not be personnel who have the competence, capabilities, including sufficient time, and objectivity to perform the monitoring activities. In these circumstances, the firm may use network services or a service provider to perform the monitoring activities.

.A170 The provisions of relevant ethical requirements are relevant in designing the policies or procedures addressing the objectivity of the individuals performing the monitoring activities. A self-review threat may arise when an individual who performs an inspection of an engagement was an engagement team member or the engagement quality reviewer of that engagement. A self-review threat may also arise when an individual involved in operating the response to a quality risk is performing the monitoring of that response. For example, a self-review threat may arise if an individual responsible for accepting client engagements is also responsible for monitoring compliance with the firm's client acceptance policies and procedures.

.A171 This section does not preclude an individual from performing monitoring activities, including inspections, of their own compliance with a quality management system. However, such self-inspections may be less effective than compliance inspections by another qualified individual. When an individual inspects their own compliance with the firm's policies and procedures, the firm has a higher risk that noncompliance with policies and procedures will not be detected or reported. To effectively monitor one's own compliance, it is necessary that an individual be able to critically review their own performance, assess their own strengths and weaknesses, and maintain an attitude of continual improvement.

.A172 Responses that may provide safeguards against the self-review threat and lessen the likelihood of deficiencies in the system of quality management include the following actions:

- Fostering a commitment to continuing professional education and providing effective training programs so that personnel stay current on accounting, auditing, and quality management standards
- Providing training on how to perform monitoring inspections and requiring the use of peer review or other inspection checklists
- Requiring the passage of time after the completion of an engagement before self-inspections are performed

.A173 The firm may have responses in place to address quality risks other than the self-review threat that may be particularly helpful when self-inspections are performed, such as the following actions:

- Establishing strong client acceptance and engagement continuance policies that address the risk of the firm accepting or continuing engagements it doesn't have the competency and resources to perform
- Establishing consultation policies that require engagement teams to consult when they encounter technical accounting and auditing difficulties
- Taking corrective action in response to the results identified by the firm's internal monitoring, engagement quality reviews, peer

review results or other external inspections; for example, inspections by the U.S. Department of Labor

- Requiring the use of an external service provider to perform engagement quality reviews or monitoring activities when
 - deficiencies identified by the firm's monitoring activities, peer reviewers, or other external inspections indicate that self-inspection is not effective, or
 - changes in conditions and the environment within the firm (such as obtaining clients in an industry not previously serviced or significantly changing the size of the firm) occur.

Evaluating Findings and Identifying Deficiencies (Ref: par. .17 and .41–.42)

.A174 The firm accumulates findings from the performance of monitoring activities, external inspections, and other relevant sources. Information accumulated by the firm from the monitoring activities, external inspections, and other relevant sources may reveal other observations about the firm's system of quality management, such as

- actions, behaviors, or conditions that have given rise to positive outcomes in the context of quality or the effectiveness of the system of quality management, or
- similar circumstances in which no findings were noted (for example, engagements in which no findings were noted, and the engagements have a similar nature to the engagements in which findings were noted).

Other observations may be useful to the firm because they may assist the firm in investigating the root causes of identified deficiencies, indicate practices that the firm can support or apply more extensively (for example, across all engagements), or highlight opportunities for the firm to enhance the system of quality management.

.A175 The firm exercises professional judgment in determining whether findings, individually or in combination with other findings, give rise to a deficiency in the system of quality management. In making the judgment, the firm may need to take into account the relative importance of the findings in the context of the quality objectives, quality risks, responses, or other aspects of the system of quality management to which they relate. The firm's judgments may be affected by quantitative and qualitative factors relevant to the findings. In some circumstances, the firm may determine it appropriate to obtain more information about the findings in order to determine whether a deficiency exists. Not all findings, including engagement findings, will be a deficiency.

.A176 Examples of quantitative and qualitative factors that a firm may consider in determining whether findings give rise to a deficiency include the following:

Quality risks and responses

- If the findings relate to a response, factors such as the following:
 - How the response is designed; for example, the nature of the response, the frequency of its occurrence (if applicable), and the relative importance of the response to addressing the quality risks and achieving the quality objectives to which it relates

- The nature of the quality risk to which the response relates and the extent to which the findings indicate that the quality risk has not been addressed
- Whether there are other responses that address the same quality risk and whether there are findings for those responses

Nature of the findings and their pervasiveness

- The nature of the findings; for example, findings related to leadership actions and behaviors may be qualitatively significant, given the pervasive effect this could have on the system of quality management as a whole
- Whether the findings, in combination with other findings, indicate a trend or systemic issue; for example, similar engagement findings that appear on multiple engagements may indicate a systemic issue

Extent of Monitoring Activity and Extent of Findings

- The extent of the monitoring activity from which the findings arose, including the number or size of the selections.
- The extent of the findings in relation to the selection covered by the monitoring activity and in relation to the expected deviation rate; for example, in the case of inspection of engagements, the number of engagements selected in which the findings were identified relative to the total number of engagements selected, and the expected deviation rate set by the firm

.A177 Evaluating findings and identifying deficiencies and evaluating the severity and pervasiveness of an identified deficiency, including investigating the root causes of an identified deficiency, are part of an iterative and nonlinear process. Examples follow:

- In investigating the root causes of an identified deficiency, the firm may identify a circumstance that has similarities to other circumstances in which there were findings that were not considered deficiencies. As a result, the firm adjusts its evaluation of the other findings and classifies them as deficiencies.
- In evaluating the severity and pervasiveness of an identified deficiency, the firm may identify a trend or systemic issue that correlates with other findings that are not considered deficiencies. As a result, the firm adjusts its evaluation of the other findings and also classifies them as deficiencies.

.A178 The results of monitoring activities, results of external inspections, and other relevant information (for example, network monitoring activities or complaints and allegations) may reveal information about the effectiveness of the monitoring and remediation process. For example, the results of external inspections may provide information about the system of quality management that has not been identified by the firm's monitoring and remediation process, which may highlight a deficiency in that process.

Evaluating Identified Deficiencies (Ref: par. .42)

.A179 Factors the firm may consider in evaluating the severity and pervasiveness of an identified deficiency include the following:

- The nature of the identified deficiency, including the aspect of the firm's system of quality management to which the deficiency relates, and whether the deficiency is in the design, implementation, or operation of the system of quality management
- In the case of identified deficiencies related to responses, whether there are compensating responses to address the quality risk to which the response relates
- The root causes of the identified deficiency
- The frequency with which the matter giving rise to the identified deficiency occurred
- The magnitude of the identified deficiency, how quickly it occurred, and the duration of time that it existed and had an effect on the system of quality management

.A180 The severity and pervasiveness of identified deficiencies affects the evaluation of the system of quality management that is undertaken by the individual or individuals assigned ultimate responsibility and accountability for the system of quality management.

Root Cause of the Identified Deficiencies (Ref: par. .42a)

.A181 The objective of investigating the root causes of identified deficiencies is to understand the underlying circumstances that caused the deficiencies to enable the firm to

- evaluate the severity and pervasiveness of the identified deficiency and
- appropriately remediate the identified deficiency.

Performing a root cause analysis involves the exercise of professional judgment based on the evidence available by those performing the assessment.

.A182 The nature, timing, and extent of the procedures undertaken to understand the root causes of an identified deficiency may also be affected by the nature and circumstances of the firm, such as the following:

- The complexity and operating characteristics of the firm.
- The size of the firm.
- The geographical dispersion of the firm.
- How the firm is structured or the extent to which the firm concentrates or centralizes its processes or activities. For example, in the case of a less complex firm with a single location, the firm's procedures to understand the root causes of a deficiency may be simple because the information to inform the understanding may be readily available and concentrated, and the root causes may be more apparent. In the case of a more complex firm with multiple locations, the procedures to understand the root causes of a deficiency may include using individuals specifically trained on investigating the root causes of identified deficiencies and developing a methodology with more formalized procedures for identifying root causes.
- The nature of the identified deficiency. For example, the firm's procedures to understand the root causes of an identified deficiency may be more rigorous in circumstances when an engagement report related to an audit of financial statements was issued that

was inappropriate, or the identified deficiency relates to leadership's actions and behaviors regarding quality.

- The possible severity of the identified deficiency. For example, the firm's procedures to understand the root causes of an identified deficiency may be more rigorous in circumstances in which the deficiency has been identified across multiple engagements, or there is an indication that policies or procedures have high rates of non-compliance.

.A183 In investigating the root causes of identified deficiencies, the firm may consider why deficiencies did not arise in other circumstances that are of a similar nature to the matter to which the identified deficiency relates. Such information may also be useful in determining how to remediate an identified deficiency. For example, the firm may determine that a deficiency exists because similar findings have occurred across multiple engagements. However, the findings have not occurred in several other engagements within the same population being tested. By contrasting the engagements, the firm concludes that the root cause of the identified deficiency is a lack of appropriate involvement by the engagement partners at key stages of the engagements.

.A184 Identifying root causes that are appropriately specific may support the firm's process for remediating identified deficiencies. For example, the firm may identify that engagement teams performing audits of financial statements are failing to obtain sufficient appropriate audit evidence on accounting estimates when management's assumptions have a high degree of subjectivity. Although the firm notes that these engagement teams are not maintaining appropriate professional skepticism, the underlying root cause of this issue may relate to another matter, such as a cultural environment that does not encourage engagement team members to question individuals with greater authority or insufficient direction, supervision, and review of the work performed on the engagements.

.A185 In addition to investigating the root causes of identified deficiencies, the firm may also investigate the root causes of positive outcomes because doing so may reveal opportunities for the firm to improve, or further enhance, the system of quality management.

Responding to Identified Deficiencies (Ref: par. .43)

.A186 The nature, timing, and extent of remedial actions may depend on a variety of other factors, including the following:

- The root causes
- The severity and pervasiveness of the identified deficiency and, therefore, the urgency with which it needs to be addressed
- The effectiveness of the remedial actions in addressing the root causes, such as whether the firm needs to implement more than one remedial action in order to effectively address the root causes, or needs to implement remedial actions as interim measures until the firm is able to implement more effective remedial actions

.A187 In some circumstances, the remedial action may include establishing additional quality objectives, or quality risks or responses may be added or modified, because it is determined that they are not appropriate.

.A188 In circumstances in which the firm determines that the root cause of an identified deficiency relates to a resource provided by a service provider, the firm may also

- consider whether to continue using the resource provided by the service provider, or
- communicate the matter to the service provider/

The firm is responsible for addressing the effect of the identified deficiency related to a resource provided by a service provider on the system of quality management and taking action to prevent the deficiency from recurring with respect to the firm's system of quality management. However, the firm is not ordinarily responsible for remediating the identified deficiency on behalf of the service provider or further investigating the root cause of the identified deficiency at the service provider.

Findings About a Particular Engagement (Ref: par. .46)

.A189 AU-C section 585, *Consideration of Omitted Procedures After the Report Release Date*, addresses the auditor's responsibilities in circumstances in which procedures were omitted, or the report issued is inappropriate. In such circumstances relating to other assurance and attest engagements, the action taken by the firm may include the following:

- Consulting with appropriate individuals regarding the appropriate action
- Discussing the matter with management of the entity or those charged with governance
- Performing the omitted procedures

The actions taken by the firm do not relieve the firm of the responsibility to take further actions relating to the finding in the context of the system of quality management, including evaluating the findings to identify deficiencies and, when a deficiency exists, investigating the root causes of the identified deficiency.

Ongoing Communication Related to the Monitoring and Remediation (Ref: par. .47)

.A190 The information communicated about the monitoring and remediation to the individual or individuals assigned ultimate responsibility and accountability for the system of quality management may be communicated on an ongoing basis or periodically. The individual or individuals may use the information in multiple ways. Examples follow:

- As a basis for further communications to personnel about the importance of quality
- To hold individuals accountable for their roles assigned to them
- To identify key concerns about the system of quality management in a timely manner

The information also provides a basis for the evaluation of the system of quality management, and conclusion thereon, as required by paragraphs .54–.56.

Network Requirements or Network Services (Ref: par. .49)

.A191 In some circumstances, the firm may belong to a network. Networks may establish requirements regarding the firm's system of quality management or may make services or resources available that the firm may choose to implement or use in the design, implementation, and operation of its system of quality management. Such requirements or services may be intended to promote the consistent performance of quality engagements across the firms that belong to the network. The extent to which the network will provide the firm

with quality objectives, quality risks, and responses that are common across the network will depend on the firm's arrangements with the network.

.A192 Examples of network requirements include the following:

- Requirements for the firm to include additional quality objectives or quality risks in the firm's system of quality management that are common across the network firms.
- Requirements for the firm to include responses in the firm's system of quality management that are common across the network firms. Such responses designed by the network may include network policies or procedures that specify the leadership roles and responsibilities, including how the firm is expected to assign authority and responsibility within the firm, or resources, such as network-developed methodologies for performing engagements or IT applications.
- Requirements that the firm be subject to the network's monitoring activities. These monitoring activities may relate to network requirements (for example, monitoring that the firm has implemented the network's methodology appropriately) or to the firm's system of quality management in general.

.A193 Examples of network services include services or resources that are optional for the firm to use in its system of quality management or in performing engagements, such as voluntary training programs, use of component auditors or specialists from within the network, or use of a service delivery center established at the network level, or by another network firm or group of network firms.

.A194 The network may establish responsibilities for the firm in implementing the network requirements or network services. Examples follow:

- The firm is required to have certain IT infrastructure and IT processes in place to support an IT application provided by the network that the firm uses in the system of quality management.
- The firm is required to provide firm-wide training on the methodology provided by the network, including when updates are made to the methodology.

.A195 The firm's understanding of the network requirements or network services and the firm's responsibilities relating to the implementation thereof may be obtained through inquiries of, or documentation provided by, the network about matters such as the following:

- The network's governance and leadership
- The procedures undertaken by the network in designing, implementing, and, if applicable, operating, the network requirements or network services
- How the network identifies and responds to changes that affect the network requirements or network services or other information, such as changes in the professional standards or information that indicates a deficiency in the network requirements or network services
- How the network monitors the appropriateness of the network requirements or network services, which may include through the network firms' monitoring activities, and the network's processes for remediating identified deficiencies

Network Requirements or Network Services in the Firm’s System of Quality Management (Ref: par. .50)

.A196 The characteristics of the network requirements or network services are a condition, event, circumstance, action, or inaction in identifying and assessing quality risks. An example of a network requirement or network service that gives rise to a quality risk is as follows.

The network may require the firm to use an IT application for the acceptance and continuance of client relationships and specific engagements that is standardized across the network. This may give rise to a quality risk that the IT application does not address matters in local law or regulation that need to be considered by the firm in accepting and continuing client relationships and specific engagements.

.A197 The purpose of the network requirements may include the promotion of consistent performance of quality engagements across the network firms. The firm may be expected by the network to implement the network requirements; however, the firm may need to adapt or supplement the network requirements such that they are appropriate for the nature and circumstances of the firm and its engagements.

.A198 Examples of how the network requirements or network services may need to be adapted or supplemented include the following:

<i>Network requirement or network service</i>	<i>How the firm adapts or supplements the network requirement or network service</i>
The network requires the firm to include certain quality risks in the system of quality management so that all firms in the network address the quality risks. The network does not provide an assessment of the quality risks.	As part of identifying and assessing quality risks, the firm assesses the quality risks that are required by the network. The firm also designs and implements responses to address the assessed quality risks that are required by the network.
The network requires that the firm design and implement certain responses.	As part of designing and implementing responses, the firm determines • which assessed quality risks the responses address. • how the responses required by the network will be incorporated into the firm's system of quality management, given the nature and circumstances of the firm. This may include tailoring the response to reflect the nature and circumstances of the firm and the engagements performed by the firm (for example, tailoring a methodology to include matters related to law or regulation).

<i>Network requirement or network service</i>	<i>How the firm adapts or supplements the network requirement or network service</i>
The firm uses individuals from other network firms as component auditors. Network requirements are in place that drive a high degree of commonality across the network firms' systems of quality management. The network requirements include specific criteria that apply to individuals assigned to work on a component for a group audit.	The firm establishes policies or procedures that require the engagement team to confirm with the component auditor (that is, the other network firm) that the individuals assigned to the component meet the specific criteria set out in the network requirements.

.A199 In some circumstances, in adapting or supplementing the network requirements or network services, the firm may identify possible improvements to the network requirements or network services and may communicate these improvements to the network.

Monitoring Activities Undertaken by the Network on the Firm's System of Quality Management (Ref: par. .51c)

.A200 The results of the network's monitoring activities of the firm's system of quality management may include information such as the following:

- A description of the monitoring activities, including their nature, timing, and extent
- Findings, identified deficiencies, and other observations about the firm's system of quality management (for example, positive outcomes or opportunities for the firm to improve, or further enhance, the system of quality management)
- The network's evaluation of the root causes of the identified deficiencies, the assessed effect of the identified deficiencies, and recommended remedial actions

Monitoring Activities Undertaken by the Network Across the Network Firms (Ref: par. .52b)

.A201 The information from the network about the overall results of the network's monitoring activities undertaken across the network firms' systems of quality management may be an aggregation or summary of the information described in paragraph .A193, including trends and common areas of identified deficiencies across the network, or positive outcomes that may be replicated across the network. Such information may

- be used by the firm
 - in identifying and assessing quality risks, and
 - as part of other relevant information considered by the firm in determining whether deficiencies exist in the network requirements or network services used by the firm in its system of quality management.
- be communicated to group engagement partners, in the context of considering the competence and capabilities of component auditors from a network firm who are subject to common network

requirements (for example, common quality objectives, quality risks, and responses).

.A202 In some circumstances, the firm may obtain information from the network about deficiencies identified in a network firm's system of quality management that affects the firm. The network may also gather information from network firms regarding the results of external inspections over network firms' systems of quality management. In some instances, law or regulation in a particular jurisdiction may prevent the network from sharing information with other network firms or may restrict the specificity of such information.

.A203 In circumstances in which the network does not provide the information about the overall results of the network's monitoring activities across the network firms, the firm may take further actions, such as

- discussing the matter with the network, and
- determining the effect on the firm's engagements and communicating the effect to engagement teams.

Deficiencies in Network Requirements or Network Services Identified by the Firm (Ref: par. .53)

.A204 As network requirements or network services used by the firm form part of the firm's system of quality management, they are also subject to the requirements of this section regarding monitoring and remediation. The network requirements or network services may be monitored by the network, the firm, or a combination of both; for example, a network may undertake monitoring activities at a network level for a common methodology. The firm may also monitor the application of the methodology by engagement team members through performing engagement inspections.

.A205 In designing and implementing the remedial actions to address the effect of the identified deficiency in the network requirements or network services, the firm may

- understand the planned remedial actions by the network, including whether the firm has any responsibilities for implementing the remedial actions, and
- consider whether supplementary remedial actions need to be taken by the firm to address the identified deficiency and the related root causes, such as when
 - the network has not taken appropriate remedial actions, or
 - the network's remedial actions will take time to effectively address the identified deficiency.

Evaluating the System of Quality Management (Ref: par. .54)

.A206 The individual or individuals assigned ultimate responsibility and accountability for the system of quality management may be assisted by other individuals in performing the evaluation. Nevertheless, the individual or individuals assigned ultimate responsibility and accountability for the system of quality management remain responsible and accountable for the evaluation.

.A207 The point in time at which the evaluation is undertaken may depend on the circumstances of the firm and may coincide with the fiscal year-end of the firm or the completion of an annual monitoring cycle.

.A208 The information that provides the basis for the evaluation of the system of quality management includes the information communicated to the individuals assigned ultimate responsibility and accountability for the system of quality management in accordance with paragraph .47.

.A209 An example of scalability to demonstrate how the information that provides the basis for the evaluation of the system of quality management may be obtained in firms of different complexity is as follows:

- In a less complex firm, the individual or individuals assigned ultimate responsibility and accountability for the system of quality management may be directly involved in the monitoring and remediation and, therefore, will be aware of the information that supports the evaluation of the system of quality management.
- In a more complex firm, the individual or individuals assigned ultimate responsibility and accountability for the system of quality management may need to establish processes to collate, summarize, and communicate the information needed to evaluate the system of quality management.

Concluding on the System of Quality Management (Ref: par. .55)

.A210 In the context of this section, it is intended that the operation of the system as a whole provides the firm with reasonable assurance that the objectives of the system of quality management are being achieved. In concluding on the system of quality management, the individual or individuals assigned ultimate responsibility and accountability for the system of quality management may, in using the results of the monitoring and remediation process, consider the following:

- The severity and pervasiveness of identified deficiencies and the effect on the achievement of the objectives of the system of quality management
- Whether remedial actions have been designed and implemented by the firm and whether the remedial actions taken up to the time of the evaluation are effective
- Whether the effect of identified deficiencies on the system of quality management have been appropriately corrected, such as whether further actions have been taken in accordance with paragraph .46

.A211 There may be circumstances in which identified deficiencies that are severe (including identified deficiencies that are severe and pervasive) have been appropriately remediated and the effect of them corrected at the point in time of the evaluation. In such cases, the individual or individuals assigned ultimate responsibility and accountability for the system of quality management may conclude that the system of quality management provides the firm with reasonable assurance that the objectives of the system of quality management are being achieved.

.A212 An identified deficiency may have a pervasive effect on the design, implementation, and operation of the system of quality management when, for example, the deficiency

- affects several components or aspects of the system of quality management.

- is confined to a specific component or aspect of the system of quality management but is fundamental to the system of quality management.
- affects several business units or geographical locations of the firm.
- is confined to a business unit or geographical location, but the business unit or location affected is fundamental to the firm overall.
- affects a substantial portion of engagements that are of a certain type or nature.

.A213 An example of an identified deficiency that may be considered severe but not pervasive is as follows:

The firm identifies a deficiency in one of its smaller regional offices. The identified deficiency relates to noncompliance with many firm policies or procedures. The firm determines that the culture in the regional office, particularly the actions and behavior of leadership in the regional office, which were overly focused on financial priorities, has contributed to the root cause of the identified deficiency. The firm determines that the effect of the identified deficiency is as follows:

- Severe, because it relates to the culture of the regional office and overall compliance with firm policies or procedures
- Not pervasive, because it is limited to the smaller regional office

.A214 The individual or individuals assigned ultimate responsibility and accountability for the system of quality management may conclude that the system of quality management does not provide the firm with reasonable assurance that the objectives of the system of quality management are being achieved in circumstances in which identified deficiencies are severe and pervasive, actions taken to remediate the identified deficiencies are not appropriate, and the effect of the identified deficiencies have not been appropriately corrected.

.A215 An example of an identified deficiency that may be considered severe and pervasive is as follows:

The firm identifies a deficiency in a regional office, which is the firm's largest office and provides financial, operational, and technical support for the entire region. The identified deficiency relates to noncompliance with many firm policies or procedures. The firm determines that the culture in the regional office, particularly the actions and behavior of leadership in the regional office, which were overly focused on financial priorities, has contributed to the root cause of the identified deficiency. The firm determines that the effect of the identified deficiency is as follows:

- Severe, because it relates to the culture of the regional office and overall compliance with firm policies or procedures
- Pervasive, because the regional office is the largest office and provides support to many other offices, and the noncompliance with firm policies or procedures may have had a broader effect on the other offices

.A216 It may take time for the firm to remediate identified deficiencies that are severe and pervasive. As the firm continues to take action to remediate the identified deficiencies, the pervasiveness of the identified deficiencies may be diminished, and it may be determined that the identified deficiencies are still severe but no longer severe and pervasive. In such cases, the individual or individuals assigned ultimate responsibility and accountability for the

system of quality management may conclude that, except for matters related to identified deficiencies that have a severe but not pervasive effect on the design, implementation, and operation of the system of quality management, the system of quality management provides the firm with reasonable assurance that the objectives of the system of quality management are being achieved.

.A217 This section does not require the firm to obtain an independent evaluation (for example, a peer review report or report on service organization controls) on its system of quality management annually or preclude the firm from doing so.

Taking Prompt and Appropriate Action and Further Communication (Ref: par. .56)

.A218 In circumstances in which the individual or individuals assigned ultimate responsibility and accountability for the system of quality management reach the conclusion described in paragraph .55b or 55c, the prompt and appropriate action taken by the firm may include the following:

- Taking measures to support performing engagements through assigning more resources or developing more guidance and to confirm that reports issued by the firm are appropriate in the circumstances, until such time as the identified deficiencies are remediated, and communicating such measures to engagement teams
- Obtaining legal advice

.A219 In some circumstances, the firm may have an independent governing body that has nonexecutive oversight of the firm. In such circumstances, communications may include informing the independent governing body.

.A220 Examples of circumstances in which it may be appropriate for the firm to communicate to external parties about the evaluation of the system of quality management include the following:

- When the firm belongs to a network
- When other network firms use the work performed by the firm, for example, in the case of a group audit
- When a report issued by the firm is determined by the firm to be inappropriate as a result of the failure of the system of quality management, and management or those charged with governance of the entity need to be informed
- When law or regulation requires the firm to communicate to an oversight authority or a regulatory body

Performance Evaluations (Ref: par. .57)

.A221 Periodic performance evaluations promote accountability. In considering the performance of an individual, the firm may take the following into account:

- The results of the firm's monitoring activities for aspects of the system of quality management that relate to the responsibility of the individual. In some circumstances, the firm may set targets for the individual and measure the results of the firm's monitoring activities against those targets.

- The actions taken by the individual in response to identified deficiencies that relate to the responsibility of that individual, including the timeliness and effectiveness of such actions.

.A222 An example of scalability to demonstrate how firms of different complexity may undertake the performance evaluations is as follows:

- In a less complex firm, the firm may engage a service provider to perform the evaluation, or the results of the firm's monitoring activities may provide an indication of the performance of the individual.
- In a more complex firm, the performance evaluations may be undertaken by an independent nonexecutive member of the firm's governing body or a special committee overseen by the firm's governing body.

.A223 A positive performance evaluation may be rewarded through compensation, promotion, and other incentives that focus on the individual's commitment to quality and reinforce accountability. On the other hand, the firm may take corrective actions to address a negative performance evaluation that may affect the firm's achievement of its quality objectives.

Documentation (Ref: par. .58–.60)

.A224 Documentation provides evidence that the firm complies with this section, as well as law, regulation, or relevant ethical requirements. It may also be useful for training personnel and engagement teams, ensuring the retention of organizational knowledge, and providing a history of the basis for decisions made by the firm about its system of quality management. It is neither necessary nor practicable for the firm to document every matter considered, or judgment made, about its system of quality management. Furthermore, compliance with this section may be evidenced by the firm through its information and communication component, documents or other written materials, or IT applications that are integral to the components of the system of quality management.

.A225 Documentation may be formal (for example, written manuals, checklists, and forms), informal (for example, email communication or postings on websites), or held in IT applications or other digital forms (for example, in databases). Factors that may affect the firm's judgments about the form, content, and extent of documentation, including how often documentation is updated, may include the following:

- The complexity of the firm and the number of offices
- The nature and complexity of the firm's practice and organization
- The nature of engagements the firm performs and the nature of the entities for whom engagements are performed
- The nature and complexity of the matter being documented, such as whether it relates to an aspect of the system of quality management that has changed or an area of greater quality risk, and the complexity of the judgments relating to the matter
- The frequency and extent of changes in the system of quality management

In a less complex firm, it may not be necessary to have documentation supporting matters communicated because informal communication methods may

be effective. Nevertheless, a less complex firm may determine it appropriate to document such communications in order to provide evidence that they occurred.

.A226 In some instances, an external oversight authority may establish documentation requirements, either formally or informally, for example, as a result of the outcome of external inspection findings. Relevant ethical requirements may also include specific requirements addressing documentation; for example, the AICPA code requires documentation of particular matters, including certain situations related to conflicts of interest, noncompliance with laws and regulations, and independence.

.A227 The firm is not required to document the consideration of every condition, event, circumstance, action, or inaction for each quality objective or each risk that may give rise to a quality risk. However, in documenting the quality risks and how the firm's responses address the quality risks, the firm may document the reasons for the assessment given to the quality risks (that is, the considered occurrence and effect on the achievement of one or more quality objectives) to support the consistent implementation and operation of the responses.

.A228 The documentation may be provided by the network, other network firms, or other structures or organizations within the network.

QM Section 10A*

A Firm's System of Quality Control

(Supersedes SQCS No. 7.)

Source: SQCS No. 8; SAS No. 122; SAS No. 128.

Effective date: Applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 2012.

Introduction

Scope of This Section

.01 This section addresses a CPA firm's responsibilities for its system of quality control for its accounting and auditing practice. This section is to be read in conjunction with the AICPA Code of Professional Conduct and other relevant ethical requirements.

.02 This section, although applicable to audit and attestation engagements performed by CPA firms in accordance with *Government Auditing Standards*, does not apply to government audit organizations. Instead, those government audit organizations are subject to the quality control and assurance requirements of *Government Auditing Standards*, which are similar to those of this section.

.03 Other professional standards set out additional requirements and guidance on the responsibilities of firm personnel regarding quality control procedures for specific types of engagements. AU-C section 220A, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, for example, addresses quality control procedures for engagements conducted in accordance with generally accepted auditing standards. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

.04 A system of quality control consists of policies designed to achieve the objective set out in paragraph .12 and the procedures necessary to implement and monitor compliance with those policies.

Authority of the SQCSs

.05 This section applies to all CPA firms with respect to engagements in their accounting and auditing practice. The nature and extent of the policies and procedures developed by an individual firm to comply with this section will depend on various factors, such as the size and operating characteristics of the firm and whether it is part of a network.

.06 Statements on Quality Control Standards (SQCSs) contain the objective of the firm in following the SQCSs and requirements designed to enable the

* Prior to the release of Statement on Quality Management Standards (SQMS) Nos. 1-2, this section used a "QC" identifier. Upon the issuance of SQMS Nos. 1-2, which supersede this content, the title "Quality Control" was changed to "Quality Management," and the section identifiers were changed to "QM."

firm to meet that stated objective. In addition, SQCSs contain related guidance in the form of application and other explanatory material, as discussed further in paragraph .09, and introductory material that provides context relevant to a proper understanding of the SQCSs and definitions.

.07 The objective provides the context in which the requirements of SQCSs are set and is intended to assist the firm in the following:

- Understanding what needs to be accomplished
- Deciding whether more needs to be done to achieve the objective

.08 SQCSs use two categories of professional requirements, identified by specific terms, to describe the degree of responsibility they impose on firms, as follows:

- *Unconditional requirements.* The firm is required to comply with an unconditional requirement in all cases in which such a requirement is relevant. SQCSs use the word *must* to indicate an unconditional requirement.
- *Presumptively mandatory requirements.* The firm is also required to comply with a presumptively mandatory requirement in all cases in which such a requirement is relevant; however, in rare circumstances, the firm may depart from a presumptively mandatory requirement, provided that the firm documents the justification for the departure and how the alternative policies established, or procedures performed, in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. SQCSs use the word *should* to indicate a presumptively mandatory requirement.

If an SQCS provides that a procedure or action is one that the firm "should consider," the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not. The professional requirements of an SQCS are to be understood and applied in the context of the explanatory material that provides guidance for their application.

.09 When necessary, the application and other explanatory material provides further explanation of the requirements and guidance for carrying them out. In particular, it may

- explain more precisely what a requirement means or is intended to cover.
- include examples of policies and procedures that may be appropriate in the circumstances.

The words *may*, *might*, and *could*, among others, are used to describe these actions and procedures. Although such guidance does not, in itself, impose a requirement, it is relevant to the proper application of the requirements. The application and other explanatory material may also provide background information on matters addressed in SQCSs. When appropriate, additional considerations specific to governmental entities or smaller firms are included within the application and other explanatory material. These additional considerations assist in the application of the requirements in SQCSs. They do not, however, limit or reduce the responsibility of the firm to apply and comply with the requirements in SQCSs.

.10 SQCSs include, under the heading "Definitions," a description of the meanings attributed to certain terms for purposes of the SQCSs. These are provided to assist in the consistent application and interpretation of SQCSs and

are not intended to override definitions that may be established for other purposes, whether in law, regulation, or otherwise. The AU-C glossary contains a complete listing of terms defined in this section. It also includes descriptions of other terms found in this section to assist in common and consistent interpretation. [Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Effective Date

.11 The provisions of this section are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 2012.

Objective

.12 The objective of the firm is to establish and maintain a system of quality control to provide it with reasonable assurance that

- a. the firm and its personnel comply with professional standards and applicable legal and regulatory requirements and
- b. reports issued by the firm are appropriate in the circumstances.

Definitions

.13 For purposes of SQCSs, the following terms have the meanings attributed as follows:

Accounting and auditing practice. A practice that performs engagements covered by this section, which are audit, attestation, compilation, review, and any other services for which standards have been promulgated by the AICPA Auditing Standards Board (ASB) or the AICPA Accounting and Review Services Committee (ARSC) under the "General Standards Rule" (ET sec. 1.300.001) or the "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct. Although standards for other engagements may be promulgated by other AICPA technical committees, engagements performed in accordance with those standards are not encompassed in the definition of an *accounting and auditing practice*.

Engagement documentation. The record of the work performed, results obtained, and conclusions that the practitioner reached (also known as *working papers* or *workpapers*).

Engagement partner. The partner or other person in the firm who is responsible for the engagement and its performance and for the report that is issued on behalf of the firm and who, when required, has the appropriate authority from a professional, legal, or regulatory body.

Engagement quality control review. A process designed to provide an objective evaluation, before the report is released, of the significant judgments the engagement team made and the conclusions it reached in formulating the report. The engagement quality control review process is only for those engagements, if any, for which the firm has determined that an engagement quality control review is required, in accordance with its policies and procedures.

Engagement quality control reviewer. A partner, other person in the firm, suitably qualified external person, or team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to objectively evaluate the

significant judgments that the engagement team made and the conclusions it reached in formulating the report.

Engagement team. All partners and staff performing the engagement and any individuals engaged by the firm or a network firm who perform procedures on the engagement. This excludes external specialists engaged by the firm or a network firm.¹

The term *engagement team* also excludes individuals within the client's internal audit function who provide direct assistance on an audit engagement when the external auditor complies with the requirements of section 610, *Using the Work of Internal Auditors*.

Firm. A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the AICPA and that is engaged in public practice.

Inspection. A retrospective evaluation of the adequacy of the firm's quality control policies and procedures, its personnel's understanding of those policies and procedures, and the extent of the firm's compliance with them. Inspection includes a review of completed engagements.

Monitoring. A process comprising an ongoing consideration and evaluation of the firm's system of quality control, including inspection or a periodic review of engagement documentation, reports, and clients' financial statements for a selection of completed engagements, designed to provide the firm with reasonable assurance that its system of quality control is designed appropriately and operating effectively.

Network. An association of entities, as defined in ET section 0.400, *Definitions*.

Network firm. A firm or other entity that belongs to a network, as defined in ET section 0.400.

Partner. Any individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, *partner* may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority.

Personnel. Partners and staff.

Professional standards. Standards promulgated by the ASB or ARSC under the "General Standards Rule" or the "Compliance With Standards Rule" of the AICPA Code of Professional Conduct, or other standards-setting bodies that set auditing and attest standards applicable to the engagement being performed and relevant ethical requirements.

Reasonable assurance. In the context of this section, a high, but not absolute, level of assurance.

Relevant ethical requirements. Ethical requirements to which the firm and its personnel are subject, which consist of the AICPA Code of Professional Conduct together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive.

Staff. Professionals, other than partners, including any specialists that the firm employs.

¹ Paragraph .06 of AU-C section 620, *Using the Work of an Auditor's Specialist*, defines the term *auditor's specialist*. [Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Suitably qualified external person. An individual outside the firm with the competence and capabilities to act as an engagement partner (for example, a partner of another firm).

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122. As amended, effective for audits of financial statements for periods ending on or after December 15, 2014, by SAS No. 128. Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

Requirements

Applying and Complying With Relevant Requirements

.14 Personnel within the firm responsible for establishing and maintaining the firm's system of quality control should have an understanding of the entire text of this section, including its application and other explanatory material, to understand its objective and apply its requirements properly.

.15 The firm should comply with each requirement of this section unless, in the circumstances of the firm, the requirement is not relevant to the services provided by a firm's accounting and auditing practice. (Ref: par. .A1)

.16 The requirements are designed to enable the firm to achieve the objective stated in this section. The proper application of the requirements is, therefore, expected to provide a sufficient basis for the achievement of the objective. However, because circumstances vary widely and all such circumstances cannot be anticipated, the firm should consider whether there are particular matters or circumstances that require the firm to establish policies and procedures in addition to those required by this section to meet the stated objective.

Elements of a System of Quality Control

.17 The firm must establish and maintain a system of quality control. The system of quality control should include policies and procedures addressing each of the following elements:

- a. Leadership responsibilities for quality within the firm (the tone at the top)
- b. Relevant ethical requirements
- c. Acceptance and continuance of client relationships and specific engagements
- d. Human resources
- e. Engagement performance
- f. Monitoring

Policies and procedures established by the firm related to each element are designed to achieve reasonable assurance with respect to the purpose of that element. Deficiencies in policies and procedures for an element may result in not achieving reasonable assurance with respect to the purpose of that element; however, the system of quality control as a whole may still be effective in achieving the objective described in paragraph .12.

.18 The firm should document its policies and procedures and communicate them to the firm's personnel. (Ref: par. .A2–.A3)

Leadership Responsibilities for Quality Within the Firm

.19 The firm should establish policies and procedures designed to promote an internal culture based on the recognition that quality is essential in performing engagements. Such policies and procedures should require the firm's leadership (managing partner or board of managing partners, CEO, or equivalent) to assume ultimate responsibility for the firm's system of quality control. (Ref: par. .A4–.A5)

.20 The firm should establish policies and procedures designed to provide it with reasonable assurance that any person or persons assigned operational responsibility for the firm's system of quality control by the firm's leadership has sufficient and appropriate experience and ability, and the necessary authority, to assume that responsibility. (Ref: par. .A6)

Relevant Ethical Requirements

.21 The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements. (Ref: par. .A7–.A9)

Independence

.22 The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm; its personnel; and, when applicable, others subject to independence requirements (including network firm personnel) maintain independence when required by relevant ethical requirements. Such policies and procedures should enable the firm to

- a. communicate its independence requirements to its personnel and, when applicable, others subject to them and
- b. identify and evaluate circumstances and relationships that create threats to independence and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards or, if considered appropriate, to withdraw from the engagement when withdrawal is possible under applicable law or regulation.

.23 Such policies and procedures should require

- a. engagement partners to provide the firm with relevant information about client engagements, including the scope of services, to enable the firm to evaluate the overall effect, if any, on independence requirements;
- b. personnel to promptly notify the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken; and
- c. the accumulation and communication of relevant information to appropriate personnel so that
 - i. the firm and its personnel can readily determine whether they satisfy independence requirements,
 - ii. the firm can maintain and update information relating to independence, and
 - iii. the firm can take appropriate action regarding identified threats to independence that are not at an acceptable level.

.24 The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence

requirements and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for

- a. personnel to promptly notify the firm of independence breaches of which they become aware;
- b. the firm to promptly communicate identified breaches of these policies and procedures to
 - i. the engagement partner who, with the firm, needs to address the breach and
 - ii. other relevant personnel in the firm and, when appropriate, the network and those subject to the independence requirements who need to take appropriate action; and
- c. prompt communication to the firm, if necessary, by the engagement partner and the other individuals referred to in subparagraph (b)(ii) of the actions taken to resolve the matter so that the firm can determine whether it should take further action.

.25 At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent by the requirements set forth in the "Independence Rule" (ET sec. 1.200.001) and related interpretations of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. (Ref: par. .A10) [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.26 The firm should establish policies and procedures for all audit or attestation engagements for which regulatory or other authorities require the rotation of personnel after a specified period, in compliance with such requirements.

Acceptance and Continuance of Client Relationships and Specific Engagements

.27 The firm should establish policies and procedures for the acceptance and continuance of client relationships and specific engagements, designed to provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only when the firm

- a. is competent to perform the engagement and has the capabilities, including time and resources, to do so; (Ref: par. .A11)
- b. can comply with legal and relevant ethical requirements; and
- c. has considered the integrity of the client and does not have information that would lead it to conclude that the client lacks integrity. (Ref: par. .A12–.A13)

.28 Such policies and procedures should

- a. require the firm to obtain such information as it considers necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client. (Ref: par. .A14)
- b. require the firm to determine whether it is appropriate to accept the engagement if a potential conflict of interest is identified in accepting an engagement from a new or an existing client.

- c. if issues have been identified and the firm decides to accept or continue the client relationship or a specific engagement, require the firm to
 - i. consider whether ethical requirements that exist under the "Conflicts of Interest" interpretation (ET sec. 1.110.010) under the "Integrity and Objectivity Rule" (ET sec. 1.100.001) apply, and
 - ii. document how the issues were resolved.

[Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.29 To minimize the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed, the firm should establish policies and procedures that provide for obtaining an understanding with the client regarding those services. (Ref: par. .A15)

.30 The firm should establish policies and procedures on continuing an engagement and the client relationship that address the circumstances when the firm obtains information that would have caused it to decline the engagement had that information been available earlier. Such policies and procedures should include consideration of the following:

- a. The professional and legal responsibilities that apply to the circumstances, including whether there is a requirement for the firm to report to regulatory authorities
- b. The possibility of withdrawing from the engagement or from both the engagement and the client relationship (Ref: par. .A16)

Human Resources

.31 The firm should establish policies and procedures designed to provide it with reasonable assurance that it has sufficient personnel with the competence, capabilities, and commitment to ethical principles necessary to

- a. perform engagements in accordance with professional standards and applicable legal and regulatory requirements and
- b. enable the firm to issue reports that are appropriate in the circumstances. (Ref: par. .A17–.A24)

.32 The firm's policies and procedures should provide that personnel selected for advancement have the qualifications necessary for fulfillment of the responsibilities that they will be called on to assume.

Assignment of Engagement Teams

.33 The firm should assign responsibility for each engagement to an engagement partner and should establish policies and procedures requiring that

- a. the identity and role of the engagement partner are communicated to management and those charged with governance;
- b. the engagement partner has the appropriate competence, capabilities, and authority to perform the role; and (Ref: par. .A25–.A30)
- c. the responsibilities of the engagement partner are clearly defined and communicated to that individual.

.34 The firm should establish policies and procedures to assign appropriate personnel with the necessary competence and capabilities to

- a. perform engagements in accordance with professional standards and applicable legal and regulatory requirements and
- b. enable the firm to issue reports that are appropriate in the circumstances. (Ref: par. .A31)

Engagement Performance

.35 The firm should establish policies and procedures designed to provide it with reasonable assurance that engagements are performed in accordance with professional standards and applicable legal and regulatory requirements and that the firm issues reports that are appropriate in the circumstances. Such policies and procedures should include the following:

- a. Matters relevant to promoting consistency in the quality of engagement performance (Ref: par. .A32–.A33)
- b. Supervision responsibilities (Ref: par. .A34)
- c. Review responsibilities (Ref: par. .A35)

.36 The firm's review responsibility policies and procedures should be determined on the basis that suitably experienced engagement team members, which may include the engagement partner, review work performed by other engagement team members.

Consultation

.37 The firm should establish policies and procedures designed to provide it with reasonable assurance that

- a. appropriate consultation takes place on difficult or contentious issues;
- b. sufficient resources are available to enable appropriate consultation to take place;
- c. the nature and scope of such consultations are documented and are agreed upon by both the individual seeking consultation and the individual consulted; and
- d. the conclusions resulting from consultations are documented, understood by both the individual seeking consultation and the individual consulted, and implemented. (Ref: par. .A36–.A40)

Engagement Quality Control Review

.38 The firm should establish criteria against which all engagements covered by this section should be evaluated to determine whether an engagement quality control review should be performed. (Ref: par. .A41)

.39 The firm's policies and procedures should require that if an engagement meets the criteria established, an engagement quality control review should be performed for that engagement.

.40 The firm should establish policies and procedures setting out the nature, timing, and extent of an engagement quality control review. Such policies and procedures should require that the engagement quality control review be completed before the report is released. (Ref: par. .A42–.A44)

.41 The firm should establish policies and procedures to require the engagement quality control review to include

- a. discussion of significant findings and issues with the engagement partner;

- b. reading the financial statements or other subject matter information and the proposed report;
- c. review of selected engagement documentation relating to significant judgments that the engagement team made and the related conclusions it reached; and
- d. evaluation of the conclusions reached in formulating the report and consideration of whether the proposed report is appropriate. (Ref: par. .A45–.A47)

Criteria for the Eligibility of Engagement Quality Control Reviewers

.42 The firm should establish policies and procedures to address the appointment of engagement quality control reviewers and to establish their eligibility through

- a. the technical qualifications required to perform the role, including the necessary experience and authority, and (Ref: par. .A48)
- b. the degree to which an engagement quality control reviewer can be consulted on the engagement without compromising the reviewer's objectivity. (Ref: par. .A49)

.43 The firm should establish policies and procedures designed to maintain the objectivity of the engagement quality control reviewer. Such policies and procedures should provide that although the engagement quality control reviewer is not a member of the engagement team, the engagement quality control reviewer should satisfy the independence requirements relating to the engagements reviewed. Accordingly, such policies and procedures should provide that the engagement quality control reviewer

- a. when practicable, is not selected by the engagement partner.
- b. does not otherwise participate in the performance of the engagement during the period of review.
- c. does not make decisions for the engagement team.
- d. is not subject to other considerations that would threaten the reviewer's objectivity.

.44 The firm's policies and procedures should provide for the replacement of the engagement quality control reviewer when the reviewer's ability to perform an objective review is likely to have been impaired. (Ref: par. .A50)

Documentation of the Engagement Quality Control Review

.45 The firm should establish policies and procedures on documentation of the engagement quality control review, which require documentation that

- a. the procedures required by the firm's policies on engagement quality control review have been performed;
- b. the engagement quality control review has been completed before the report is released; and
- c. the reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments that the engagement team made and the conclusions it reached were not appropriate.

Differences of Opinion

.46 The firm should establish policies and procedures for addressing and resolving differences of opinion within the engagement team; with those consulted; and, when applicable, between the engagement partner and the engagement quality control reviewer. (Ref: par. .A51–.A52)

.47 Such policies and procedures should enable a member of the engagement team to document that member's disagreement with the conclusions reached after appropriate consultation.

.48 Such policies and procedures should require the following:

- a. Conclusions reached be documented and implemented
- b. The report not be released until the matter is resolved

Engagement Documentation

Completion of the Assembly of Final Engagement Files

.49 The firm should establish policies and procedures for engagement teams to complete the assembly of final engagement files on a timely basis after the engagement reports have been released. (Ref: par. .A53–.A54)

Confidentiality, Safe Custody, Integrity, Accessibility, and Retrievability of Engagement Documentation

.50 The firm should establish policies and procedures designed to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation. (Ref: par. .A55–.A58)

Retention of Engagement Documentation

.51 The firm should establish policies and procedures for the retention of engagement documentation for a period sufficient to meet the needs of the firm, professional standards, laws, and regulations. (Ref: par. .A59–.A62)

Monitoring

Monitoring the Firm's Quality Control Policies and Procedures

.52 The firm should establish a monitoring process designed to provide it with reasonable assurance that the policies and procedures relating to the system of quality control are relevant, adequate, and operating effectively. This process should

- a. include an ongoing consideration and evaluation of the firm's system of quality control, including inspection or a periodic review of engagement documentation, reports, and clients' financial statements for a selection of completed engagements;
- b. require responsibility for the monitoring process to be assigned to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility; and
- c. assign the performance of monitoring the firm's system of quality control to qualified individuals. (Ref: par. .A63–.A73)

Evaluating, Communicating, and Remedying Identified Deficiencies

.53 Any system of quality control has inherent limitations that can reduce its effectiveness. Deficiencies in individual engagements covered by this section do not, in and of themselves, indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards.

.54 The firm should evaluate the effect of deficiencies noted as a result of the monitoring process and determine whether they are either

- a. instances that do not necessarily indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that it complies with professional standards and applicable legal and regulatory requirements and that the reports issued by the firm are appropriate in the circumstances or
- b. systemic, repetitive, or other significant deficiencies that require prompt corrective action.

.55 The firm should communicate to relevant engagement partners, and other appropriate personnel, deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action. (Ref: par. .A74)

.56 Recommendations for appropriate remedial actions for deficiencies noted should include one or more of the following:

- a. Taking appropriate remedial action in relation to an individual engagement or member of personnel
- b. The communication of the findings to those responsible for training and professional development
- c. Changes to the quality control policies and procedures
- d. Disciplinary action against those who fail to comply with the policies and procedures of the firm, especially those who do so repeatedly

.57 The firm should establish policies and procedures to address cases when the results of the monitoring procedures indicate that a report may be inappropriate or that procedures were omitted during the performance of the engagement. Such policies and procedures should require the firm to

- a. determine what further action is appropriate to comply with relevant professional standards and legal and regulatory requirements and
- b. consider whether to obtain legal advice.

.58 The firm should communicate, at least annually, the results of the monitoring of its system of quality control to engagement partners and other appropriate individuals within the firm, including the firm's leadership. This communication should be sufficient to enable the firm and these individuals to take prompt and appropriate action, when necessary, in accordance with their defined roles and responsibilities to provide a basis for them to rely on the firm's system of quality control. Information communicated should include the following:

- a. A description of the monitoring procedures performed
- b. The conclusions drawn from the monitoring procedures
- c. When relevant, a description of systemic, repetitive, or other significant deficiencies and of the actions taken to resolve or amend those deficiencies

.59 Some firms operate as part of a network and, for consistency, may implement some of their monitoring procedures on a network basis. When firms within a network operate under common monitoring policies and procedures designed to comply with this section, and these firms place reliance on such a monitoring system, the firm's policies and procedures should require that

- a. at least annually, the network communicate the overall scope, extent, and results of the monitoring process to appropriate individuals within the network firms and

- b. the network communicate promptly any identified deficiencies in the quality control system to appropriate individuals within the relevant network firm or firms so that the necessary action can be taken in order that engagement partners in the network firms can rely on the results of the monitoring process implemented within the network, unless the firms or the network advise otherwise.

Complaints and Allegations

.60 The firm should establish policies and procedures designed to provide it with reasonable assurance that it deals appropriately with

- a. complaints and allegations that the work performed by the firm fails to comply with professional standards and applicable legal and regulatory requirements and
- b. allegations of noncompliance with the firm's system of quality control.

As part of this process, the firm should establish clearly defined channels for firm personnel to raise any concerns in a manner that enables them to come forward without fear of reprisals. (Ref: par. .A75)

.61 If, during the investigations into complaints and allegations, deficiencies in the design or operation of the firm's quality control policies and procedures, or instances of noncompliance with the firm's system of quality control by an individual or individuals are identified, the firm should take appropriate actions, as set out in paragraph .56. (Ref: par. .A76–.A77)

Documentation of the System of Quality Control

.62 The firm should establish policies and procedures requiring appropriate documentation to provide evidence of the operation of each element of its system of quality control. (Ref: par. .A78–.A80)

.63 The firm should establish policies and procedures that require retention of documentation for a period of time sufficient to permit those performing monitoring procedures and peer review of the firm to evaluate the firm's compliance with its system of quality control or for a longer period if required by law or regulation.²

.64 The firm should establish policies and procedures requiring documentation of complaints and allegations described in paragraph .60 and the responses to them.

Application and Other Explanatory Material

Applying and Complying With Relevant Requirements

Considerations Specific to Smaller Firms (Ref: par. .15)

.A1 This section does not call for compliance with requirements that are not relevant (for example, in the circumstances of a sole practitioner with no staff). Requirements in this section, such as those for policies and procedures for the assignment of appropriate personnel to the engagement team (see paragraph .34), for review responsibilities (see paragraph .36), and for the annual

² PR section 100, *Standards for Performing and Reporting on Peer Reviews*, is applicable to firms enrolled in the AICPA Peer Review Program.

communication of the results of monitoring to engagement partners within the firm (see paragraph .58) are not relevant in the absence of staff.

Elements of a System of Quality Control (Ref: par. .18)

.A2 In general, communication of quality control policies and procedures to firm personnel includes a description of the quality control policies and procedures and the objectives they are designed to achieve and the message that each individual has a personal responsibility for quality and is expected to comply with these policies and procedures. By encouraging firm personnel to communicate their views or concerns on quality control matters, the firm recognizes the importance of obtaining feedback on the firm's system of quality control. Although communication is enhanced if it is in writing, the communication of quality control policies and procedures is not required to be in writing.

Considerations Specific to Smaller Firms

.A3 Documentation and communication of policies and procedures for smaller firms may be less formal and extensive than for larger firms.

Leadership Responsibilities for Quality Within the Firm

Promoting an Internal Culture of Quality (Ref: par. .19)

.A4 The firm's leadership, and the examples it sets, significantly influences the internal culture of the firm. The promotion of a quality-oriented internal culture depends on clear, consistent, and frequent actions and messages from all levels of the firm's management that emphasize the firm's quality control policies and procedures and the requirement to

- a. perform work that complies with professional standards and applicable legal and regulatory requirements.
- b. issue reports that are appropriate in the circumstances.

Such actions and messages encourage a culture that recognizes and rewards quality work. These actions and messages may be communicated by, but are not limited to, training seminars, meetings, formal or informal dialogue, mission statements, newsletters, or briefing memoranda. They may be incorporated in partner and staff appraisal procedures and the firm's internal documentation and training materials, such that they will support and reinforce the firm's view on the importance of quality and how, practically, it is to be achieved.

.A5 Of particular importance in promoting an internal culture based on quality is the need for the firm's leadership to recognize that the firm's business strategy is subject to the overarching requirement for the firm to achieve the objectives of the system of quality control in all the engagements that the firm performs. Promoting such an internal culture includes the following:

- a. Establishment of policies and procedures that address performance evaluation, compensation, and advancement (including incentive systems) with regard to its personnel in order to demonstrate the firm's overarching commitment to quality
- b. Assignment of management responsibilities so that commercial considerations do not override the quality of the work performed
- c. Provision of sufficient and appropriate resources for the development, documentation, and support of its quality control policies and procedures

Assigning Operational Responsibility for the Firm's System of Quality Control (Ref: par. .20)

.A6 Sufficient and appropriate experience and ability enables the person or persons responsible for the firm's system of quality control to identify and understand quality control issues and to develop appropriate policies and procedures. Necessary authority enables the person or persons to implement those policies and procedures.

Relevant Ethical Requirements***Compliance With Relevant Ethical Requirements (Ref: par. .21)***

.A7 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include the following:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence
- Due care
- Scope and nature of services

.A8 Independence requirements are set forth in the "Independence Rule" and related interpretations of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence and safeguards to mitigate such threats involving matters that are not explicitly addressed in the Code of Professional Conduct are set forth in the "Conceptual Framework for Independence" (ET sec. 1.210.010). [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.A9 The fundamental principles are reinforced, in particular, by the following:

- The leadership of the firm
- Education and training
- Monitoring
- A process for dealing with noncompliance

Written Confirmation (Ref: par. .25)

.A10 Written confirmation may be in paper or electronic form. By obtaining confirmation and taking appropriate action on information indicating non-compliance, the firm demonstrates the importance that it attaches to independence and keeps the issue current for, and visible to, its personnel.

Acceptance and Continuance of Client Relationships and Specific Engagements***Competence, Capabilities, and Resources (Ref: par. .27a)***

.A11 Consideration of whether the firm has the competence, capabilities, and resources to undertake a new engagement from a new or an existing client involves reviewing the specific requirements of the engagement and the existing partner and staff profiles at all relevant levels, including whether

- firm personnel have knowledge of relevant industries or subject matters or the ability to effectively gain the necessary knowledge;
- firm personnel have experience with relevant regulatory or reporting requirements or the ability to effectively gain the necessary competencies;
- the firm has sufficient personnel with the necessary competence and capabilities;
- specialists are available, if needed;
- individuals meeting the criteria and eligibility requirements to perform an engagement quality control review are available, when applicable; and
- the firm is able to complete the engagement within the reporting deadline.

Integrity of a Client (Ref: par. .27c)

.A12 Matters to consider regarding the integrity of a client include, for example, the following:

- The identity and business reputation of the client's principal owners, key management, and those charged with governance
- The nature of the client's operations, including its business practices
- Information concerning the attitude of the client's principal owners, key management, and those charged with governance toward such matters as internal control or aggressive interpretation of accounting standards
- Indications of an inappropriate limitation in the scope of the work
- Indications that the client might be involved in money laundering or other criminal activities
- The reasons for the proposed appointment of the firm and non-reappointment of the previous firm

The extent of knowledge that a firm will have regarding the integrity of a client will generally grow within the context of an ongoing relationship with that client.

.A13 Sources of information on such matters obtained by the firm may include the following:

- Communications with existing or previous providers of professional accountancy services to the client, in accordance with relevant ethical requirements, and discussions with other third parties
- Inquiry of other firm personnel or third parties, such as bankers, legal counsel, and industry peers
- Background searches of relevant databases

Continuance of a Client Relationship (Ref: par. .28a)

.A14 Deciding whether to continue a client relationship includes consideration of significant issues that have arisen during the current or previous engagements and their implications for continuing the relationship. For example, a client may have started to expand its business operations into an area where the firm does not possess, and cannot obtain, the necessary expertise.

Obtaining an Understanding With the Client (Ref: par. .29)

.A15 Professional standards applicable to the engagement may contain requirements for obtaining a written understanding with the client.

Withdrawal (Ref: par. .30)

.A16 Policies and procedures on withdrawal from an engagement or from both the engagement and the client relationship may address issues that include the following:

- Discussing with the appropriate level of the client's management and those charged with governance the appropriate action that the firm might take based on the relevant facts and circumstances
- If the firm determines that it is appropriate to withdraw, discussing with the appropriate level of the client's management and those charged with governance withdrawal from the engagement or from both the engagement and the client relationship and the reasons for the withdrawal
- Considering whether there is a professional, legal, or regulatory requirement for the firm to remain in place or for the firm to report the withdrawal from the engagement or from both the engagement and the client relationship, together with the reasons for the withdrawal, to regulatory authorities
- Documenting significant matters, consultations, conclusions, and the basis for the conclusions

Human Resources (Ref: par. .31)

.A17 Personnel issues relevant to the firm's policies and procedures related to human resources include, for example, the following:

- Recruitment and hiring, if applicable
- Performance evaluation, compensation, and advancement
- Determining competencies and capabilities, including time to perform assignments
- Professional development
- The estimation of personnel needs

Effective recruitment processes and procedures help the firm select individuals of integrity who have the capacity to develop the competence and capabilities necessary to perform the firm's work and possess the appropriate characteristics to enable them to perform competently. Examples of such characteristics may include meeting minimum academic requirements established by the firm, maturity, integrity, and leadership traits.

.A18 *Competencies and capabilities* are the knowledge, skills, and abilities that qualify personnel to perform an engagement covered by this section. Competencies and capabilities are not measured by periods of time because such a quantitative measurement may not accurately reflect the kinds of experiences gained by personnel in any given time period. Accordingly, for purposes of this section, a measure of overall competency is qualitative rather than quantitative.

.A19 Competence can be developed through a variety of methods; these methods include, for example, the following:

- Professional education
- Continuing professional development, including training
- Work experience
- Mentoring by more experienced staff, such as other members of the engagement team
- Independence education for personnel who are required to be independent

.A20 The continuing competence of the firm's personnel depends, to a significant extent, on an appropriate level of continuing professional development so that personnel maintain their knowledge and capabilities. Effective policies and procedures emphasize the need for all levels of firm personnel to participate in general and industry-specific continuing professional education (CPE) and other professional development activities that enable them to fulfill responsibilities assigned and to satisfy applicable CPE requirements of the AICPA and regulatory agencies. Effective policies and procedures also place importance on passing the Uniform CPA Examination. The firm may provide the necessary training resources and assistance to enable personnel to develop and maintain the required competence and capabilities.

.A21 The firm may use a suitably qualified external person, for example, when internal technical and training resources are unavailable.

.A22 Effective performance evaluation, compensation, and advancement procedures give due recognition and reward to the development and maintenance of competence and commitment to ethical principles. Steps that a firm may take in developing and maintaining competence and commitment to ethical principles include the following:

- Making personnel aware of the firm's expectations regarding performance and ethical principles
- Providing personnel with an evaluation of, and counseling on, performance, progress, and career development
- Helping personnel understand that their compensation and advancement to positions of greater responsibility depend upon, among other things, performance quality and adherence to ethical principles and that failure to comply with the firm's policies and procedures may result in disciplinary action.

Considerations Specific to Smaller Firms

.A23 The size and circumstances of the firm are important considerations in determining the structure of the firm's performance evaluation process. Smaller firms, in particular, may employ less formal methods of evaluating the performance of their personnel.

The Relationship of the Competency Requirement of the Uniform Accountancy Act to the Human Resource Element of Quality Control

.A24 CPAs are required to follow the accountancy laws of the individual licensing jurisdictions in the United States that govern public practice. These jurisdictions may have adopted, in whole or in part, the Uniform Accountancy Act (UAA), which is a model legislative statute, including related administrative rules, designed by the AICPA and the National Association of State Boards

of Accountancy to provide a uniform approach to the regulation of the accounting profession. The UAA provides that "[a]ny individual licensee ... who is responsible for supervising attest or compilation services and signs or authorizes someone to sign the accountant's report on the financial statements on behalf of the firm, shall meet the competency requirements set out in the professional standards for such services." A firm's compliance with this section is intended to enable a practitioner who performs accounting and auditing services on the firm's behalf to meet the competency requirement referred to in the UAA. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

Assignment of Engagement Teams

Engagement Partners (Ref: par. .33)

.A25 In most cases, an engagement partner will have gained the necessary competencies through relevant and appropriate experience in engagements covered by this section. In some cases, however, an engagement partner may have obtained the necessary competencies through disciplines other than public practice, such as in relevant industry, governmental, and academic positions. When necessary, the experience of the engagement partner may be supplemented by CPE and consultation. The following are examples:

- An engagement partner whose recent experience has consisted primarily in providing tax services may acquire the competencies necessary in the circumstances to perform a compilation or review engagement by obtaining relevant CPE.
- An engagement partner whose experience consists of performing review and compilation engagements may be able to obtain the necessary competencies to perform an audit by becoming familiar with the industry in which the client operates, obtaining CPE relating to auditing, using consulting sources during the course of performing the audit engagement, or any combination of these.
- A person in academia might obtain the necessary competencies to perform engagements covered by this section by (a) obtaining specialized knowledge through teaching or authorship of research projects or similar papers and (b) performing a rigorous self-study program or by engaging a consultant to assist on such engagements.

[Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

.A26 The characteristics of a particular client, industry, and the kind of service being provided determine the nature and extent of competencies established by a firm that are expected of the engagement partner. For example

- the competencies expected of an engagement partner to compile financial statements would be different than those expected of a practitioner engaged to review or audit financial statements.
- supervising engagements and signing or authorizing others to sign reports for clients in certain industries or engagements, such as financial services, governmental, or employee benefit plan engagements, would require different competencies than those expected in performing attest services for clients in other industries.
- the engagement partner for an attestation engagement to examine the effectiveness of an entity's internal control over financial

reporting that is integrated with an audit of financial statements would be expected to have technical proficiency in understanding and evaluating the effectiveness of controls, whereas an engagement partner of an attestation engagement to examine investment performance statistics would be expected to have different competencies, including an understanding of the subject matter of the underlying assertion.

.A27 In practice, the competencies necessary for the engagement partner are broad and varied in both their nature and number. Competencies include the following, as well as other competencies as necessary in the circumstances:

- *Understanding of the role of a system of quality control and the Code of Professional Conduct.* An understanding of the role of a firm's system of quality control and the AICPA's Code of Professional Conduct, both of which play critical roles in assuring the integrity of the various kinds of reports.
- *Understanding of the service to be performed.* An understanding of the performance, supervision, and reporting aspects of the engagement. This understanding is usually gained through actual participation under appropriate supervision in that type of engagement.
- *Technical proficiency.* An understanding of the applicable professional standards, including those standards directly related to the industry in which a client operates, and the kinds of transactions in which a client engages.
- *Familiarity with the industry.* An understanding of the industry in which a client operates to the extent required by professional standards applicable to the kind of service being performed. In performing an audit or review of financial statements, this understanding would include an industry's organization and operating characteristics sufficient to identify areas of high or unusual risk associated with an engagement and to evaluate the reasonableness of industry-specific estimates.
- *Professional judgment.* Skills that indicate sound professional judgment. In performing engagements covered by this section, such skills would typically include the ability to exercise professional skepticism and identify areas requiring special consideration, including, for example, the evaluation of the reasonableness of estimates and representations made by management and the determination of the kind of report appropriate in the circumstances.
- *Understanding the organization's IT systems.* A sufficient understanding of how the organization is dependent on, or enabled by, information technologies and the manner in which the information systems are used to record and maintain financial information to determine when involvement of an IT professional is necessary for an audit engagement.

Interrelationship of Competencies and Other Elements of a Firm's System of Quality Control

.A28 The competencies previously listed are interrelated and gaining one particular competency may be related to achieving another. For example, familiarity with the client's industry interrelates with a practitioner's ability to make professional judgments relating to the client.

.A29 In establishing policies and procedures related to the nature of competencies needed by the engagement partner of an engagement, a firm may consider the requirements of policies and procedures established for other elements of quality control. For example, a firm might consider its requirements related to engagement performance in determining the nature of competency requirements that describe the degree of technical proficiency necessary in a given set of circumstances.

.A30 Policies and procedures may include systems to monitor the workload and availability of engagement partners so as to enable these individuals to have sufficient time to adequately discharge their responsibilities.

Engagement Teams (Ref: par. .34)

.A31 The firm's assignment of engagement teams and the determination of the level of supervision required include, for example, consideration of the engagement team's

- understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation;
- understanding of professional standards and legal and regulatory requirements;
- technical knowledge and expertise, including knowledge of relevant IT;
- knowledge of relevant industries in which the clients operate;
- ability to apply professional judgment; and
- understanding of the firm's quality control policies and procedures.

Generally, as the ability and experience levels of assigned staff increase, the need for direct supervision decreases.

Engagement Performance

Consistency in the Quality of Engagement Performance (Ref: par. .35a)

.A32 The firm promotes consistency in the quality of engagement performance through its policies and procedures. This is often accomplished through written or electronic manuals, software tools or other forms of standardized documentation, and industry or subject matter-specific guidance materials. Matters addressed may include the following:

- How engagement teams are briefed on the engagement to obtain an understanding of the objectives of their work
- Processes for complying with applicable engagement standards
- Processes of engagement supervision, staff training, and mentoring
- Methods of reviewing the work performed, the significant judgments made, and the type of report being issued
- Appropriate documentation of the work performed and of the timing and extent of the review
- Processes to keep all policies and procedures current

.A33 Appropriate teamwork and training assist less experienced members of the engagement team to clearly understand the objectives of the assigned work.

Supervision (Ref: par. .35b)

.A34 Engagement supervision includes the following:

- Tracking the progress of the engagement
- Considering the competence and capabilities of individual members of the engagement team, whether they have sufficient time to carry out their work, whether they understand their instructions, and whether the work is being carried out in accordance with the planned approach to the engagement
- Addressing significant findings and issues arising during the engagement, considering their significance, and modifying the planned approach appropriately
- Identifying matters for consultation or consideration by more experienced engagement team members during the engagement

Review (Ref: par. .35c)

.A35 A review consists of consideration of whether

- the work has been performed in accordance with professional standards and applicable legal and regulatory requirements;
- significant findings and issues have been raised for further consideration;
- appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- the nature, timing, and extent of the work performed is appropriate and without need for revision;
- the work performed supports the conclusions reached and is appropriately documented;
- the evidence obtained is sufficient and appropriate to support the report; and
- the objectives of the engagement procedures have been achieved.

Consultation (Ref: par. .37)

.A36 Consultation includes discussion at the appropriate professional level with individuals within or outside the firm who have relevant specialized expertise.

.A37 Consultation uses appropriate research resources, as well as the collective experience and technical expertise of the firm. Consultation helps promote quality and improves the application of professional judgment. Appropriate recognition of consultation in the firm's policies and procedures helps promote a culture in which consultation is recognized as a strength and personnel are encouraged to consult on difficult or contentious issues.

.A38 Effective consultation on significant technical, ethical, and other matters within the firm or, when applicable, outside the firm can be achieved when those consulted

- are given all the relevant facts that will enable them to provide informed advice and
- have appropriate knowledge, authority, and experience

and when conclusions resulting from consultations are appropriately documented and implemented.

.A39 Documentation that is sufficiently complete and detailed of consultations with other professionals that involve difficult or contentious matters contributes to an understanding of

- the issue on which consultation was sought and
- the results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented.

Considerations Specific to Smaller Firms

.A40 A firm needing to consult externally may take advantage of advisory services provided by the following:

- Other firms
- Professional and regulatory bodies
- Commercial organizations that provide relevant quality control services

Before contracting for such services, consideration of the competence and capabilities of the external provider helps the firm determine whether the external provider is suitably qualified for that purpose.

Engagement Quality Control Review

Criteria for an Engagement Quality Control Review (Ref: par. .38)

.A41 The structure and nature of the firm's practice are important considerations in establishing criteria for determining which engagements are to be subject to an engagement quality control review. Such criteria may include, for example, the following:

- The nature of the engagement, including the extent to which it involves a matter of public interest
- The identification of unusual circumstances or risks in an engagement or class of engagements
- Whether laws or regulations require an engagement quality control review

Nature, Timing, and Extent of the Engagement Quality Control Review (Ref: par. .40-.41)

.A42 An engagement quality control review may include consideration of the following:

- The engagement team's evaluation of the firm's independence in relation to the specific engagement
- Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters and the conclusions arising from those consultations
- Whether documentation selected for review reflects the work performed in relation to the significant judgments and supports the conclusions reached

.A43 If the engagement quality control review is completed after the report is dated and identifies instances where additional procedures are needed or additional evidence is required, the date of the report is changed to the date when the additional procedures have been satisfactorily completed or the additional

evidence has been obtained, in accordance with the professional standards applicable to the engagement.

.A44 Conducting the engagement quality control review in a timely manner at appropriate stages during the engagement allows significant issues to be promptly resolved to the engagement quality control reviewer's satisfaction before the report is released.

.A45 The extent of the engagement quality control review may depend upon, among other things, the complexity of the engagement and the risk that the report might not be appropriate in the circumstances. The performance of an engagement quality control review does not reduce the responsibilities of the engagement partner.

.A46 Other matters relevant to evaluating the significant judgments made by the engagement team that may be considered in an engagement quality control review for audits, as well as reviews of financial statements and other assurance and related services engagements, include the following:

- Significant risks identified during the engagement and the responses to those risks
- Judgments made, particularly with respect to materiality and significant risks
- The significance and disposition of corrected and uncorrected misstatements identified during the engagement
- The matters to be communicated to management and those charged with governance and, when applicable, other parties, such as regulatory bodies

.A47 When the engagement quality control reviewer makes recommendations that the engagement partner does not accept and the matter is not resolved to the reviewer's satisfaction, the firm's procedures for dealing with differences of opinion apply.

Criteria for the Eligibility of Engagement Quality Control Reviewers

Sufficient and Appropriate Technical Expertise, Experience, and Authority (Ref: par. .42a)

.A48 What constitutes sufficient and appropriate technical expertise, experience, and authority depends on the circumstances of the engagement.

Consultation With the Engagement Quality Control Reviewer (Ref: par. .42b)

.A49 The engagement partner may consult the engagement quality control reviewer at any stage during the engagement (for example, to establish that a judgment made by the engagement partner will be acceptable to the engagement quality control reviewer). Such consultation avoids identification of differences of opinion at a late stage of the engagement and does not necessarily impair the engagement quality control reviewer's eligibility to perform the role. When the nature and extent of the consultations become significant, the reviewer's objectivity may be impaired unless both the engagement team and the reviewer are careful to maintain the reviewer's objectivity. When this is not possible, another individual within the firm or a suitably qualified external person may be appointed to take on the role of either the engagement quality control reviewer or the person to be consulted on the engagement.

*Objectivity of the Engagement Quality Control Reviewer (Ref: par. .43–.44)**Considerations Specific to Smaller Firms*

.A50 Suitably qualified external persons may be contracted when sole practitioners or small firms identify engagements requiring engagement quality control reviews and no person in the firm meets the eligibility requirements for an engagement quality control reviewer. Alternatively, some sole practitioners or small firms may wish to use other firms to facilitate engagement quality control reviews. When the firm contracts suitably qualified external persons or other firms, the requirements in paragraphs .43–.44 and the guidance in paragraph .A49 apply.

Differences of Opinion (Ref: par. .46)

.A51 Effective procedures encourage identification of differences of opinion at an early stage, provide clear guidelines about the successive steps to be taken thereafter, and require documentation regarding the resolution of the differences and the implementation of the conclusions reached.

.A52 Procedures to resolve such differences may include consulting with another practitioner or firm or a professional or regulatory body.

*Engagement Documentation**Completion of the Assembly of Final Engagement Files (Ref: par. .49)*

.A53 Professional standards, law, or regulation may prescribe the time limits by which the assembly of final engagement files for specific types of engagements is to be completed. When no such time limits are prescribed, paragraph .49 requires the firm to establish time limits that reflect the need to complete the assembly of final engagement files on a timely basis.

.A54 When two or more different reports are issued regarding the same subject matter information of an entity, the firm's policies and procedures relating to time limits for the assembly of final engagement files address each report as if it were for a separate engagement. This may, for example, be the case when the firm issues an auditor's report on financial information prepared in accordance with generally accepted accounting principles and, at a subsequent date, an auditor's report on the same financial information prepared in accordance with a special purpose framework for regulatory purposes.

Confidentiality, Safe Custody, Integrity, Accessibility, and Retrievability of Engagement Documentation (Ref: par. .50)

.A55 Relevant ethical requirements establish an obligation for the firm's personnel to observe at all times the confidentiality of information contained in engagement documentation, unless specific client authority has been given to disclose information or a legal or professional duty exists to do so. Specific laws or regulations may impose additional obligations on the firm's personnel to maintain client confidentiality, particularly when data of a personal nature are concerned.

.A56 Whether engagement documentation is in paper, electronic, or other media, the integrity, accessibility, or retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the firm's knowledge or if it could be permanently lost or damaged. Accordingly, controls that the firm designs and implements to avoid unauthorized alteration or loss of engagement documentation may include those that

- enable the determination of when and by whom engagement documentation was prepared or reviewed;

- protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties via electronic means;
- prevent unauthorized changes to the engagement documentation; and
- allow access to the engagement documentation by the engagement team and other authorized parties, as necessary, to properly discharge their responsibilities.

.A57 Controls that the firm designs and implements to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation may include the following:

- The use of a password by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users
- Appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement
- Procedures for properly distributing engagement documentation to the team members at the start of the engagement, processing it during the engagement, and collating it at the end of the engagement
- Procedures for restricting access to, and enabling proper distribution and confidential storage of, hard copy engagement documentation

.A58 For practical reasons, original paper documentation may be electronically scanned or otherwise copied to another media for inclusion in engagement files. In such cases, the firm's procedures designed to maintain the integrity, accessibility, and retrievability of the documentation may include requiring the engagement teams to

- generate scanned copies that reflect the entire content of the original paper documentation, including manual signatures, cross-references, and annotations.
- integrate the scanned copies into the engagement files, including indexing and signing off on the scanned copies as necessary.
- enable the scanned copies to be retrieved and printed as necessary.

There may be legal, regulatory, or other reasons for a firm to retain original paper documentation.

Retention of Engagement Documentation (Ref: par. .51)

.A59 The needs of the firm for retention of engagement documentation and the period of such retention will vary with the nature of the engagement and the firm's circumstances (for example, whether the engagement documentation is needed to provide a record of matters of continuing significance to future engagements). The retention period may also depend on other factors, such as whether professional standards, law, or regulation prescribe specific retention periods for certain types of engagements or whether generally accepted retention periods exist in the absence of specific legal or regulatory requirements.

.A60 In the specific case of audit engagements, the retention period would be no shorter than five years from the report release date.³

.A61 Procedures that the firm may adopt for retention of engagement documentation include those that enable the requirements of paragraph .51 to be met during the retention period, such as, for example, procedures to

- enable the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation because the underlying technology may be upgraded or changed over time.
- provide, when necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed.
- enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

Ownership of Engagement Documentation

.A62 Unless otherwise specified by law or regulation, engagement documentation is the property of the firm. The firm may, at its discretion, make portions of, or extracts from, engagement documentation available to clients, provided that such disclosure does not undermine the validity of the work performed or, in the case of assurance engagements, the independence of the firm or its personnel.

Monitoring

Monitoring the Firm's Quality Control Policies and Procedures (Ref: par. .52)

.A63 The purpose of monitoring compliance with quality control policies and procedures is to assess, for the system of quality control as a whole, whether the firm is achieving the objective described in paragraph .12 through an evaluation of the following:

- Adherence to professional standards and applicable legal and regulatory requirements
- Whether the system of quality control has been appropriately designed and effectively implemented
- Whether the firm's quality control policies and procedures have been operating effectively so that reports that are issued by the firm are appropriate in the circumstances

The evaluation may identify circumstances that necessitate changes to, or improve compliance with, the firm's policies and procedures to provide the firm with reasonable assurance that its system of quality control is effective.

.A64 Ongoing consideration and evaluation of the system of quality control may include matters such as the following:

- Review of selected administrative and personnel records pertaining to the quality control elements
- Review of engagement documentation, reports, and clients' financial statements
- Discussions with the firm's personnel

³ Paragraph .17 of AU-C section 230, *Audit Documentation*. [Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

- Determination of corrective actions to be taken and improvements to be made in the system, including providing feedback into the firm's policies and procedures relating to education and training
- Communication to appropriate firm personnel of weaknesses identified in the system, in the level of understanding of the system, or compliance with the system
- Follow-up by appropriate firm personnel so that necessary modifications are promptly made to the quality control policies and procedures

.A65 Monitoring procedures also may include an assessment of the following:

- The appropriateness of the firm's guidance materials and any practice aids
- New developments in professional standards and legal and regulatory requirements and how they are reflected in the firm's policies and procedures, when appropriate
- Written confirmation of compliance with policies and procedures on independence
- The effectiveness of continuing professional development, including training
- Decisions related to acceptance and continuance of client relationships and specific engagements
- Firm personnel's understanding of the firm's quality control policies and procedures and implementation thereof

.A66 Some of the monitoring procedures discussed previously may be accomplished through the performance of the following:

- Engagement quality control review
- Review of engagement documentation, reports, and clients' financial statements for selected engagements after the report release date
- Inspection procedures

Reviews of the work or report when performed by engagement team members prior to the date of the report are not monitoring procedures.

.A67 The need for, and extent of, inspection procedures depends, in part, on the existence and effectiveness of the other monitoring procedures. The nature of inspection procedures varies based on the firm's quality control policies and procedures and the effectiveness and results of other monitoring procedures.

.A68 The inspection of a selection of completed engagements may be performed on a cyclical basis. For example, engagements selected for inspection may include at least one engagement for each engagement partner over an inspection cycle that spans three years. The manner in which the inspection cycle is organized, including the timing of selection of individual engagements, depends on many factors, such as the following:

- The size of the firm
- The number and geographical location of offices
- The results of previous monitoring procedures

- The degree of authority of both personnel and office (for example, whether individual offices are authorized to conduct their own inspections or whether only the head office may conduct them)
- The nature and complexity of the firm's practice and organization
- The risks associated with the firm's clients and specific engagements

.A69 Inspection procedures with respect to the engagement performance element of a quality control system are particularly appropriate in a firm with more than a limited number of management-level individuals responsible for the conduct of its accounting and auditing practice.

.A70 The inspection process involves the selection of individual engagements, some of which may be selected without prior notification to the engagement team. In determining the scope of the inspections, the firm may take into account the scope or conclusions of a peer review or regulatory inspections.

The Relationship of Peer Review to Monitoring

.A71 A peer review does not substitute for all monitoring procedures. However, because the objective of a peer review is similar to that of inspection procedures, a firm's quality control policies and procedures may provide that a peer review conducted under standards established by the AICPA may substitute for the inspection of engagement documentation, reports, and clients' financial statements for some or all engagements for the period covered by the peer review.

Considerations Specific to Smaller Firms

.A72 In small firms with a limited number of persons with sufficient and appropriate experience and authority in the firm, monitoring procedures may need to be performed by some of the same individuals who are responsible for compliance with the firm's quality control policies and procedures. This includes review of engagement working papers, reports, and clients' financial statements by the engagement partner or other qualified personnel after the report release date. To effectively monitor one's own compliance with the firm's policies and procedures, it is necessary that an individual be able to critically review his or her own performance, assess his or her own strengths and weaknesses, and maintain an attitude of continual improvement. Changes in conditions and the environment within the firm (such as obtaining clients in an industry not previously serviced or significantly changing the size of the firm) may indicate the need to have quality control policies and procedures monitored by another qualified individual.

.A73 Having an individual inspect his or her own compliance with a quality control system may be less effective than having such compliance inspected by another qualified individual. When one individual inspects his or her own compliance, the firm has a higher risk that noncompliance with policies and procedures will not be detected. Accordingly, a firm with a limited number of persons with sufficient and appropriate experience and authority in the firm may find it beneficial to engage a suitably qualified external person or another firm to perform engagement inspections and other monitoring procedures.

Communicating Deficiencies (Ref: par. .55)

.A74 The reporting of identified deficiencies to individuals other than the relevant engagement partners need not include an identification of the specific engagements concerned, unless such identification is necessary for the proper

discharge of the responsibilities of the individuals other than the engagement partners.

Complaints and Allegations

Source of Complaints and Allegations (Ref: par. .60)

.A75 Complaints and allegations of noncompliance with the firm's system of quality control (which do not include those that are clearly frivolous) may originate from within or outside the firm. They may be made by firm personnel, clients, state boards of accountancy, other regulators, or other third parties. They may be received by engagement team members or other firm personnel.

Investigation Policies and Procedures (Ref: par. .61)

.A76 Policies and procedures established for the investigation of complaints and allegations may include, for example, that the partner supervising the investigation

- has sufficient and appropriate experience,
- has authority within the firm, and
- is otherwise not involved in the engagement.

The partner supervising the investigation may involve legal counsel as necessary.

Considerations Specific to Smaller Firms

.A77 In the case of firms with few partners, it may not be practicable for the partner supervising the investigation not to be involved in the engagement. These small firms and sole practitioners may use the services of a suitably qualified external person or another firm to carry out the investigation into complaints and allegations.

Documentation of the System of Quality Control (Ref: par. .62)

.A78 The form and content of documentation evidencing the operation of each of the elements of the system of quality control is a matter of judgment and depends on a number of factors, including the following:

- The size of the firm and the number of offices
- The nature and complexity of the firm's practice and organization

For example, large firms may use electronic databases to document matters such as independence confirmations, performance evaluations, and the results of monitoring inspections.

.A79 Appropriate documentation relating to monitoring includes, for example, the following:

- Monitoring procedures, including the procedure for selecting completed engagements to be inspected
- A record of the evaluation of the following:
 - Adherence to professional standards and applicable legal and regulatory requirements
 - Whether the system of quality control has been appropriately designed and effectively implemented
 - Whether the firm's quality control policies and procedures have been appropriately applied so that the reports that

are issued by the firm are appropriate in the circumstances

- Identification of the deficiencies noted, an evaluation of their effect, and the basis for determining whether and what further action is necessary

Considerations Specific to Smaller Firms

.A80 Smaller firms may use more informal methods in the documentation of their systems of quality control, such as manual notes, checklists, and forms.

.A81

Exhibit—Comparison of Section 10, *A Firm's System of Quality Control*, and International Standard on Quality Control 1, *Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements*

This analysis was prepared by the AICPA Audit and Attest Standards staff to highlight substantive differences between section 10, *A Firm's System of Quality Control*, and International Standard on Quality Control (ISQC) 1, *Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements*, and the rationale therefore. This analysis is not authoritative and is prepared for informational purposes only. It has not been acted on or reviewed by the Auditing Standards Board (ASB).

Differences in Language

The ASB has made various changes to the language throughout section 10, as compared with ISQC 1. Such changes have been made to use terms applicable in the United States and to make section 10 easier to read and apply. The ASB believes that such changes will not create differences between the application of ISQC 1 and the application of section 10.

Requirements in Section 10 Not in ISQC 1

Section 10 requires firms to establish policies and procedures providing

- in paragraph .30, for obtaining an understanding with the client regarding the nature, scope, and limitations of the services to be performed.
- in paragraph .33, that personnel selected for advancement have the qualifications necessary for fulfillment of the responsibilities they will be called on to assume.
- in paragraph .44, that although the engagement quality control reviewer is not a member of the engagement team, the engagement quality control reviewer should satisfy the independence requirements relating to the engagements reviewed.
- in paragraph .48, that when differences of opinion exist, a member of the engagement team be able to document that member's disagreement with the conclusions reached, after appropriate consultation.

ISQC 1 does not have equivalent requirements.

Requirements in ISQC 1 Not in Section 10

Paragraph 25 of ISQC 1 requires the firm to establish policies and procedures setting out criteria for determining the need for safeguards to reduce the familiarity threat to an acceptable level when using the same senior personnel on an assurance engagement over a long period of time. The ASB believes that the familiarity threat should not be singled out among other threats to independence.

Paragraph 48(a) of ISQC 1 requires including, on a cyclical basis, inspection of at least one completed engagement for each engagement partner as a monitoring procedure. The ASB believes that this requirement is overly prescriptive and that a risk-based approach to inspections is more appropriate.

Requirements in ISQC 1 Revised in Section 10

Paragraph .41 of section 10 requires that when an engagement quality control review is performed, the engagement quality control review be completed before the report is released. Paragraph 36 of ISQC 1 requires that the quality control review be completed before the report is dated. The ASB believes that an engagement quality control review is an independent review of the engagement team's significant judgments, including the date selected by the engagement team to date the report. As noted in the application material to section 10, when the engagement quality control review results in additional procedures having to be performed, the date of the report would be changed.

Paragraph 48(c) of ISQC 1 requires that those performing the engagement or the engagement quality control review are not involved in inspecting the engagements. Paragraph .53c of section 10, consistent with the requirement in paragraph 100 of Statement on Quality Control Standards No. 7, *A Firm's System of Quality Control*, requires that performance of monitoring of the firm's system of quality control be assigned to qualified individuals. Paragraph .A72 of section 10 notes that in small firms with a limited number of persons with sufficient and appropriate experience and authority in the firm, monitoring procedures may need to be performed by some of the same individuals who are responsible for compliance with the firm's quality control policies and procedures. The ASB concluded that it was not necessary to change existing practice because in the United States, the peer review process provides a safeguard and provides evidence that the monitoring procedures are effective.

Paragraph A49 of ISQC 1 references the requirement in paragraph 40 of ISQC 1 to establish policies and procedures to maintain the objectivity of the engagement quality control reviewer and states, "Accordingly, such policies and procedures provide...." The ASB believes that notwithstanding its placement as application material, the language is indicative of a requirement and, accordingly, has included a requirement for the provision of these specific policies and procedures in paragraph .44 of section 10. The ASB believes this will not create a difference in the application of ISQC 1 and the application of section 10.

[Revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

QM Section 20

Engagement Quality Reviews

Source: SQMS No. 2.

Effective for audits or reviews of financial statements for periods beginning on or after December 15, 2025, and other engagements in the firm's accounting and auditing practice beginning on or after December 15, 2025.

Introduction

Scope of This Statement on Quality Management Standards

.01 This section addresses the following:

- a.* The appointment and eligibility of the engagement quality reviewer
- b.* The engagement quality reviewer's responsibilities relating to the performance and documentation of an engagement quality review

.02 This section applies to all engagements for which an engagement quality review is required to be performed in accordance with Statement on Quality Management Standards (SQMS) No. 1, *A Firm's System of Quality Management* (QM sec. 10), including when the firm has determined that an engagement quality review is an appropriate response to assessed quality risks.¹ This section is to be read in conjunction with the AICPA Code of Professional Conduct (AICPA code) and other relevant ethical requirements.

.03 An engagement quality review performed in accordance with this section is a specified response that is designed and implemented by the firm in accordance with SQMS No. 1.² The performance of an engagement quality review is undertaken at the engagement level by the engagement quality reviewer on behalf of the firm.

Scalability

.04 The nature, timing, and extent of the engagement quality reviewer's procedures required by this section vary depending on the nature and circumstances of the engagement or the entity. For example, for engagements involving fewer significant judgments made by the engagement team, the engagement quality reviewer's procedures would likely be less extensive.

The Firm's System of Quality Management and Role of Engagement Quality Reviews

.05 SQMS No. 1 establishes the firm's responsibilities for its system of quality management and requires the firm to design and implement responses to address the quality risks in a manner that is based on, and responsive to,

¹ Paragraph 35f of Statement on Quality Management Standards (SQMS) (previously Statement on Quality Control Standards) No. 1, *A Firm's System of Quality Management* (QM sec. 10).

² See footnote 1.

the reasons for the assessments given to the quality risks.³ The specified responses in SQMS No. 1⁴ include establishing policies or procedures addressing engagement quality reviews in accordance with this section.

.06 The firm is responsible for designing, implementing, and operating the system of quality management. Under SQMS No. 1, the objective of the firm is to design, implement, and operate a system of quality management for engagements performed by the firm in its accounting and auditing practice⁵ that provides the firm with reasonable assurance that

- a. the firm and its personnel fulfill their responsibilities in accordance with professional standards and applicable legal and regulatory requirements, and conduct engagements in accordance with such standards and requirements; and
- b. engagement reports issued by the firm or engagement partners are appropriate in the circumstances.⁶

.07 As explained in SQMS No. 1, the public interest is served by the consistent performance of quality engagements. Quality engagements are achieved through planning and performing engagements and reporting on them in accordance with professional standards and applicable legal and regulatory requirements. Achieving the objectives of those standards and complying with the requirements of applicable law or regulation involves exercising professional judgment and, when applicable to the type of engagement, maintaining professional skepticism.

.08 An engagement quality review is an objective evaluation of the significant judgments made by the engagement team and the conclusions reached thereon. The engagement quality reviewer's evaluation of significant judgments is performed in the context of professional standards and applicable legal and regulatory requirements. However, an engagement quality review is not intended to be an evaluation of whether the entire engagement complies with professional standards and applicable legal and regulatory requirements or with the firm's policies or procedures.

.09 The engagement quality reviewer is not a member of the engagement team. The performance of an engagement quality review does not change the responsibilities of the engagement partner for managing and achieving quality on the engagement or for the direction and supervision of the members of the engagement team and the review of their work. The engagement quality reviewer is not required to obtain evidence to support the opinion or conclusion on the engagement, but the engagement team may obtain further evidence in responding to matters raised during the engagement quality review.

Authority of This SQMS

.10 This section contains the objective for the firm in following this section and requirements designed to enable the firm and the engagement quality reviewer to meet that stated objective. In addition, it contains related guidance in the form of application and other explanatory material and introductory material that provides context relevant to a proper understanding of this section

³ Paragraph 25 of SQMS No. 1.

⁴ Paragraph 35f of SQMS No. 1.

⁵ The term *auditing and accounting practice* is defined in paragraph 17 of SQMS No. 1.

⁶ Paragraph 15 of SQMS No. 1.

and definitions. SQMS No. 1⁷ explains the terms *objective*, *requirements*, *application material* and *other explanatory material*, *introductory material*, and *definitions*.

Effective Date

.11 This section is effective for

- a. audits or reviews of financial statements for periods beginning on or after December 15, 2025, and
- b. other engagements in the firm's accounting and auditing practice beginning on or after December 15, 2025.

Objective

.12 The objective of the firm, through appointing an eligible engagement quality reviewer, is to perform an objective evaluation of the significant judgments made by the engagement team and the conclusions reached thereon.

Definitions

.13 For purposes of the SQMSs, the following terms have the meanings attributed as follows:

Engagement quality review. An objective evaluation of the significant judgments made by the engagement team, and the conclusions reached thereon, performed by the engagement quality reviewer and completed before the engagement report is released.

Engagement quality reviewer. A partner, other individual in the firm, or an external individual appointed by the firm to perform the engagement quality review.

Relevant ethical requirements. Principles of professional ethics and ethical requirements to which the engagement team and engagement quality reviewer, when undertaking an engagement quality review, are subject, which consist of the AICPA Code of Professional Conduct together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive. (Ref: par. .A11–.A14)

Requirements

Applying, and Complying With, Relevant Requirements

.14 The firm and the engagement quality reviewer should have an understanding of this section, including the application and other explanatory material, to understand the objective of this section and to properly apply the requirements relevant to them.

.15 The firm or the engagement quality reviewer, as applicable, should comply with each requirement of this section, unless the requirement is not relevant in the circumstances of the engagement.

⁷ Paragraphs 12 and A6–A9 of SQMS No. 1.

.16 The proper application of the requirements is expected to provide a sufficient basis for the achievement of the objective of this standard. However, if the firm or the engagement quality reviewer determines that the application of the relevant requirements does not provide a sufficient basis for the achievement of the objective of this standard, the firm or the engagement quality reviewer, as applicable, should take further actions to achieve the objective.

Appointment and Eligibility of Engagement Quality Reviewers

.17 The firm should establish policies or procedures that require the assignment of responsibility for the appointment of engagement quality reviewers to an individual or individuals with the competence, capabilities, and appropriate authority within the firm to fulfill the responsibility. Those policies or procedures should require such individual or individuals to appoint the engagement quality reviewer. (Ref: par. .A1–.A3)

.18 The firm should establish policies or procedures that set forth the criteria for eligibility to be appointed as an engagement quality reviewer. Those policies or procedures should require that the engagement quality reviewer (Ref: par. .A4)

- a. not be a member of the engagement team;
- b. have the competence and capabilities, including sufficient time, and the appropriate authority to perform the engagement quality review; (Ref: par. .A5–.A10)
- c. comply with relevant ethical requirements, including those addressing threats to the objectivity and independence of the engagement quality reviewer; and (Ref: par. .A11–.A13)
- d. comply with provisions of law and regulation, if any, that are relevant to the eligibility of the engagement quality reviewer. (Ref: par. .A14)

.19 The firm's policies or procedures established in accordance with paragraph .18c should also address threats to objectivity created by an individual being appointed as the engagement quality reviewer after previously serving as the engagement partner. (Ref: par. .A15–.A17)

.20 The firm should establish policies or procedures that set forth the criteria for eligibility of individuals who assist the engagement quality reviewer. Those policies or procedures should require that such individuals

- a. not be members of the engagement team;
- b. have the competence and capabilities, including sufficient time, to perform the duties assigned to them; and (Ref: par. .A18)
- c. comply with relevant ethical requirements, including addressing threats to their objectivity and independence and, if applicable, the provisions of law and regulation. (Ref: par. .A19–.A20)

.21 The firm should establish policies or procedures that

- a. require the engagement quality reviewer to take overall responsibility for the performance of the engagement quality review and
- b. address the engagement quality reviewer's responsibility for determining the nature, timing, and extent of the direction and supervision of individuals assisting in the engagement quality review and the review of their work. (Ref: par. .A21)

Impairment of the Engagement Quality Reviewer's Eligibility to Perform the Engagement Quality Review

.22 The firm should establish policies or procedures that address circumstances in which the engagement quality reviewer's eligibility to perform the engagement quality review is impaired and the appropriate actions to be taken by the firm, including the process for identifying and appointing a replacement in such circumstances. (Ref: par. .A22)

.23 When the engagement quality reviewer becomes aware of circumstances that impair the engagement quality reviewer's eligibility, the engagement quality reviewer should notify the appropriate individual or individuals in the firm and, (Ref: par. .A23)

- a. if the engagement quality review has not commenced, decline the appointment to perform the engagement quality review, or
- b. if the engagement quality review has commenced, discontinue the performance of the engagement quality review.

Performance of the Engagement Quality Review

.24 The firm should establish policies or procedures regarding the performance of the engagement quality review that address the following:

- a. The engagement quality reviewer's responsibilities to perform procedures in accordance with paragraphs .25–.26 at appropriate points in time during the engagement to provide an appropriate basis for an objective evaluation of the significant judgments made by the engagement team and the conclusions reached thereon
- b. The responsibilities of the engagement partner in relation to the engagement quality review, including that the engagement partner is precluded from releasing the engagement report until notification has been received from the engagement quality reviewer, in accordance with paragraph .27, that the engagement quality review is complete (Ref: par. .A24–.A26)
- c. Circumstances in which the nature and extent of engagement team discussions with the engagement quality reviewer about a significant judgment give rise to a threat to the objectivity of the engagement quality reviewer and appropriate actions to take in these circumstances (Ref: par. .A27)

.25 In performing the engagement quality review, the engagement quality reviewer should do the following: (Ref: par. .A28–.A33)

- a. Read, and obtain an understanding about, information communicated by (Ref: par. .A34)
 - i. the engagement team regarding the nature and circumstances of the engagement and the entity and
 - ii. the firm related to the firm's monitoring and remediation process, in particular, identified deficiencies that may relate to, or affect, the areas involving significant judgments made by the engagement team.
- b. Discuss with the engagement partner and, if applicable, other members of the engagement team, significant matters and significant judgments made in planning, performing, and reporting on the engagement. (Ref: par. .A35–.A38)

- c. Based on the information obtained in (a) and (b), review selected engagement documentation relating to significant judgments made by the engagement team and evaluate the following: (Ref: par. .A39–.A43)
 - i. The basis for making those significant judgments, including, when applicable to the type of engagement, the maintenance of professional skepticism by the engagement team
 - ii. Whether the engagement documentation supports the conclusions reached
 - iii. Whether the conclusions reached are appropriate
- d. Evaluate the basis for the engagement partner's determination that relevant ethical requirements relating to independence, when applicable, have been fulfilled. (Ref: par. .A44)
- e. Evaluate whether appropriate consultation has taken place on difficult or contentious matters or matters involving differences of opinion and the conclusions arising from those consultations. (Ref: par. .A45)
- f. For engagements conducted in accordance with generally accepted auditing standards, evaluate the basis for the engagement partner's determination that the engagement partner's involvement has been sufficient and appropriate throughout the engagement such that the engagement partner has the basis for determining that the significant judgments made and the conclusions reached are appropriate given the nature and circumstances of the engagement. (Ref: par. .A46–.A47)
- g. Review,
 - i. for audits of financial statements, the financial statements and the auditor's report thereon, including, if applicable, the description of the key audit matters; (Ref: par. .A48)
 - ii. for reviews of financial statements or financial information, the financial statements or financial information and the review report thereon; or (Ref: par. .A48)
 - iii. for other engagements, the engagement report, and when applicable, the subject matter information. (Ref: par. .A49)

.26 The engagement quality reviewer should notify the engagement partner if the engagement quality reviewer has concerns that the significant judgments made by the engagement team, including the appropriate maintenance of professional skepticism by the engagement team when applicable to the type of engagement, or the conclusions reached thereon, are not appropriate. If such concerns are not resolved to the engagement quality reviewer's satisfaction, the engagement quality reviewer should notify the appropriate individual or individuals in the firm that the engagement quality review cannot be completed. (Ref: par. .A50)

Completion of the Engagement Quality Review

.27 The engagement quality reviewer should determine whether the requirements in this section with respect to the performance of the engagement quality review have been fulfilled and whether the engagement quality review is complete. If so, the engagement quality reviewer should notify the engagement partner that the engagement quality review is complete.

Documentation

.28 The firm should establish policies or procedures that require the engagement quality reviewer to take responsibility for documentation of the engagement quality review. (Ref: par. .A51)

.29 The firm should establish policies or procedures that require documentation of the engagement quality review in accordance with paragraph .30 and require that such documentation be included with the engagement documentation.

.30 The engagement quality reviewer should determine that the documentation of the engagement quality review is sufficient to enable an experienced practitioner, having no previous connection with the engagement, to understand the nature, timing, and extent of the procedures performed by the engagement quality reviewer and, when applicable, individuals who assisted the reviewer and to understand the conclusions reached in performing the review. In doing so, the engagement quality reviewer should determine that the documentation of the engagement quality review includes the following: (Ref: par. .A52–.A54)

- a. The names of the engagement quality reviewer and any individuals who assisted with the engagement quality review
- b. An identification of the engagement documentation reviewed
- c. The basis for the engagement quality reviewer's determination in accordance with paragraph .27
- d. The notifications required in accordance with paragraphs .26–.27
- e. The date of completion of the engagement quality review

Application and Other Explanatory Material

Appointment and Eligibility of Engagement Quality Reviewers

Assignment of Responsibility for the Appointment of Engagement Quality Reviewers (Ref: par. .17)

.A1 Competence and capabilities that are relevant to an individual's ability to fulfill responsibility for the appointment of the engagement quality reviewer may include appropriate knowledge about the following:

- The responsibilities of an engagement quality reviewer
- The criteria in paragraphs .18–.19 regarding the eligibility of engagement quality reviewers
- The nature and circumstances of the engagement or the entity subject to an engagement quality review, including the composition of the engagement team

.A2 The firm's policies or procedures may specify that the individual responsible for the appointment of engagement quality reviewers not be a member of the engagement team for which an engagement quality review is to be performed. However, in certain circumstances (for example, in the case of a smaller firm or a sole practitioner), it may not be practicable for an individual other than a member of the engagement team to appoint the engagement quality reviewer.

.A3 The firm may assign more than one individual to be responsible for appointing engagement quality reviewers. For example, the firm's policies or procedures may specify a different process for appointing engagement quality reviewers for audits of financial statements than for attestation examination engagements or other engagements, with different individuals responsible for each process.

Eligibility of the Engagement Quality Reviewer (Ref: par. .18)

.A4 In some circumstances, for example, in the case of a smaller firm or a sole practitioner, there may not be a partner or other individual in the firm who is eligible to perform the engagement quality review. In these circumstances, the firm may contract with, or obtain the services of, individuals external to the firm to perform the engagement quality review. An individual external to the firm may be a partner or an employee of a network firm, a structure or organization within the firm's network, or a service provider. When using such an individual, the provisions in SQMS No. 1 addressing network requirements or network services or service providers apply.

Eligibility Criteria for the Engagement Quality Reviewer

Competence and Capabilities, Including Sufficient Time (Ref: par. .18a)

.A5 SQMS No. 1 describes characteristics related to competence, including the integration and application of technical competence, professional skills, and professional ethics, values, and attitudes.⁸ Characteristics that the firm may consider in determining that an individual has the necessary competence to perform an engagement quality review include, for example, the following:

- An understanding of professional standards and applicable legal and regulatory requirements and the firm's policies or procedures relevant to the engagement
- Knowledge of the entity's industry
- An understanding of, and experience relevant to, engagements of a similar nature and complexity
- An understanding of the responsibilities of the engagement quality reviewer in performing and documenting the engagement quality review, which may be attained or enhanced by receiving relevant training from the firm

.A6 The conditions, events, circumstances, actions, or inactions considered by the firm in determining that an engagement quality review is an appropriate response to address one or more quality risks⁹ may be important to the firm's determination of the competence and capabilities required to perform the engagement quality review for that engagement. Other considerations that the firm may take into account in determining whether the engagement quality reviewer has the competence and capabilities, including sufficient time, needed to evaluate the significant judgments made by the engagement team and the conclusions reached thereon include, for example, the following:

- The nature of the entity
- The specialization and complexity of the industry or regulatory environment in which the entity operates

⁸ Paragraph A92 of SQMS No. 1.

⁹ See footnote 8.

- The extent to which the engagement relates to matters requiring specialized expertise (for example, with respect to IT or specialized areas of accounting or auditing), or scientific and engineering expertise, which may be needed for certain assurance engagements (Also see paragraph .A19.)

.A7 In evaluating the competence and capabilities of an individual who may be appointed as an engagement quality reviewer, the findings arising from the firm's monitoring activities (for example, findings from the inspection of engagements for which the individual was an engagement team member or engagement quality reviewer) or the results of external inspections may also be relevant considerations.

.A8 A lack of appropriate competence or capabilities affects the ability of the engagement quality reviewer to exercise appropriate professional judgment in performing the review. For example, an engagement quality reviewer who lacks relevant industry experience may not possess the ability or confidence necessary to evaluate and, when appropriate, challenge significant judgments made and the maintenance of professional skepticism by the engagement team on a complex, industry-specific accounting or auditing matter.

Appropriate Authority (Ref: par. .18a)

.A9 Actions at the firm level help to establish the authority of the engagement quality reviewer. For example, when the firm has created a culture of respect for the role of the engagement quality reviewer, the engagement quality reviewer is less likely to experience pressure from the engagement partner or other personnel to inappropriately influence the outcome of the engagement quality review. In some cases, the engagement quality reviewer's authority may be enhanced by the firm's policies or procedures to address differences of opinion, which may include actions the engagement quality reviewer may take when a disagreement occurs between the engagement quality reviewer and the engagement team.

.A10 The authority of the engagement quality reviewer may be diminished when

- the culture within the firm promotes respect for authority only for personnel at a higher level of hierarchy within the firm.
- the engagement quality reviewer has a reporting line to the engagement partner, for example, when the engagement partner holds a leadership position in the firm or is responsible for determining the compensation of the engagement quality reviewer.

Relevant Ethical Requirements (Ref: par. .13 and .18c)

.A11 The relevant ethical requirements that are applicable when undertaking an engagement quality review may vary, depending on the nature and circumstances of the engagement or the entity. Various provisions of relevant ethical requirements may apply to an individual, such as an engagement quality reviewer, and not the firm itself. For example, if a firm uses an external provider to perform an engagement quality review, that individual may be subject to independence requirements; however, the independence requirements imposed on that individual as a result of performing the engagement quality review may not extend to the entire firm for which that individual works.

Threats to the Objectivity of the Engagement Quality Reviewer

.A12 Threats to the engagement quality reviewer's objectivity may be created by a broad range of facts and circumstances. Examples follow:

- A self-review threat may be created when the engagement quality reviewer previously was involved with significant judgments made by the engagement team, in particular, as the engagement partner or another engagement team member.
- A familiarity or self-interest threat may arise when the engagement quality reviewer is a close or immediate family member of the engagement partner or another member of the engagement team, or through close personal relationships with members of the engagement team.
- An intimidation threat may be created when actual or perceived pressure is exerted on the engagement quality reviewer (for example, when the engagement partner is an aggressive or dominant individual, or the engagement quality reviewer has a reporting line to the engagement partner).

.A13 Relevant ethical requirements may include requirements and guidance to identify, evaluate, and address threats to objectivity. They may also include provisions that address threats to independence created by long association with an audit or assurance client.

Law or Regulation Relevant to the Eligibility of the Engagement Quality Reviewer (Ref: par. .18d)

.A14 Law or regulation may prescribe additional requirements regarding the eligibility of the engagement quality reviewer. For example, the audit requirements of the FDIC regulations¹⁰ for certain financial institutions require the auditor (which includes the engagement quality reviewer) to be in compliance with the AICPA's Code of Professional Conduct and also meet the independence requirements and interpretations of the SEC and its staff.

Considerations Related to Assigning the Previous Engagement Partner as Engagement Quality Reviewer (Ref: par. .19)

.A15 In recurring engagements, the matters on which significant judgments are made often do not vary. Therefore, significant judgments made in prior periods may continue to affect judgments of the engagement team in subsequent periods. Therefore, the ability of an engagement quality reviewer to perform an objective evaluation of significant judgments is affected when the individual was previously involved with those judgments as the engagement partner. In such circumstances, it is important that appropriate safeguards are put in place to reduce threats to objectivity, in particular, the self-review threat, to an acceptable level. The following factors may be taken into consideration when designing policies or procedures to maintain the objectivity of an engagement quality reviewer who served as the engagement partner on the previous year's engagement:

- The extent of changes in the matters on which significant judgments are made and the facts and circumstances around those significant judgments compared to the period or periods in which the individual was the engagement partner. For example, if a business combination with a material effect on the financial statements has occurred, the significant judgments made in the current period may vary from those of the prior period to such an extent that an objective evaluation of those judgments could be made by the individual who served as the engagement partner in the previous period.

¹⁰ See Title 12, Chapter III, Subchapter B, Part 363.3(f) of the U.S. *Code of Federal Regulations*.

- The incentives and disincentives within the firm that may affect the objectivity of the engagement quality reviewer.

.A16 A firm may establish policies or procedures that limit the eligibility to be appointed as engagement quality reviewers of individuals who previously served as the engagement partner, for example, by establishing a specified cooling-off period during which the engagement partner is precluded from being appointed as the engagement quality reviewer. Determining a suitable cooling-off period depends on the facts and circumstances of the engagement.

.A17 The firm's policies or procedures may also address whether a cooling-off period is appropriate for an individual other than the engagement partner before becoming eligible to be appointed as the engagement quality reviewer on that engagement. In this regard, the firm may consider the nature of that individual's role and previous involvement with the significant judgments made on the engagement. For example, the firm may determine that an engagement partner responsible for the performance of audit procedures on the financial information of a component in a group audit engagement may not be eligible to be appointed as the group engagement quality reviewer because of that audit partner's involvement in the significant judgments affecting the group audit engagement.

Circumstances in Which the Engagement Quality Reviewer Uses Assistants (Ref: par. .20–.21)

.A18 In certain circumstances, it may be appropriate for the engagement quality reviewer to be assisted by an individual or team of individuals. For example, assistance from individuals with highly specialized knowledge, skills, or expertise may be useful for understanding certain transactions undertaken by the entity to help the engagement quality reviewer evaluate the significant judgments made by the engagement team related to those transactions.

.A19 The guidance in paragraph .A14 may be helpful to the firm when establishing policies or procedures that address threats to objectivity of individuals who assist the engagement quality reviewer.

.A20 When the engagement quality reviewer is assisted by an individual external to the firm, the assistant's responsibilities, including those related to compliance with relevant ethical requirements, may be set out in the contract or other agreement between the firm and the assistant.

.A21 The firm's policies or procedures may include responsibilities of the engagement quality reviewer to

- consider whether assistants understand their instructions and whether the work is being carried out in accordance with the planned approach to the engagement quality review and
- address matters raised by assistants, considering their significance and modifying the planned approach appropriately.

Impairment of the Engagement Quality Reviewer's Eligibility to Perform the Engagement Quality Review (Ref: par. .22–.23)

.A22 Factors that may be relevant to the firm in considering whether the eligibility of the engagement quality reviewer to perform the engagement quality review is impaired include the following:

- Whether changes in the circumstances of the engagement result in the engagement quality reviewer no longer having the appropriate competence and capabilities to perform the review

- Whether changes in the other responsibilities of the engagement quality reviewer indicate that the individual no longer has sufficient time to perform the review
- Notification from the engagement quality reviewer in accordance with paragraph .23

.A23 In circumstances in which the engagement quality reviewer's eligibility to perform the engagement quality review becomes impaired, the firm's policies or procedures may set out a process by which alternative eligible individuals are identified. The firm's policies or procedures may also address the responsibility of the individual appointed to replace the engagement quality reviewer to perform procedures sufficient to fulfill the requirements of this section with respect to the performance of the engagement quality review. Such policies or procedures may further address the need for consultation in such circumstances and may include, for example, the following:

- Evaluation of whether procedures performed by the previous engagement quality reviewer could be relied on by the newly assigned engagement quality reviewer or whether all work would need to be reperformed
- Consideration of the effect of an engagement quality review assistant on the transition, when such assistant has been involved in the engagement quality review prior to transition
- Procedures undertaken by the engagement team to inform the newly assigned engagement quality reviewer about planning meeting discussions that have already occurred and other matters in which the previous engagement quality reviewer had been involved
- Documentation of the circumstances necessitating the change

Performance of the Engagement Quality Review (Ref: par. .24–.27)

Engagement Partner Responsibilities in Relation to the Engagement Quality Review (Ref: par. .24b)

.A24 Statement on Auditing Standards (SAS) No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, (AU-C sec. 220)¹¹ establishes the requirements for the engagement partner in audit engagements for which an engagement quality review is required, including the following:

- Determining that an engagement quality reviewer has been appointed
- Cooperating with the engagement quality reviewer and informing other members of the engagement team of their responsibility to do so
- Discussing significant matters and significant judgments arising during the audit engagement, including those identified during the engagement quality review, with the engagement quality reviewer

¹¹ Paragraph .36 of Statement on Auditing Standards (SAS) No. 146, *Quality Management for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards* (AU-C sec. 220).

- Not releasing the auditor's report until the completion of the engagement quality review

.A25 Professional standards include requirements that address the engagement report date. When the engagement quality review is completed after the report date, there may be instances in which the date of the report is required to be changed because additional procedures are needed or additional evidence is required. In such instances, the report date is changed to the date when the additional procedures have been satisfactorily completed or the additional evidence has been obtained, in accordance with the professional standards applicable to the engagement. The need to change a report date may be indicative of a deficiency or deficiencies in the firm's system of quality management.

.A26 AT-C section 105, *Concepts Common to All Attestation Engagements*,¹² also establishes requirements for the engagement partner in relation to the engagement quality review.

Discussions Between the Engagement Quality Reviewer and the Engagement Team (Ref: par. .24c)

.A27 Frequent communication between the engagement team and engagement quality reviewer throughout the engagement may assist in facilitating an effective and timely engagement quality review. However, a threat to the objectivity of the engagement quality reviewer may be created depending on the timing and extent of the discussions with the engagement team about a significant judgment. The firm's policies or procedures may set out the actions to be taken by the engagement quality reviewer or the engagement team to avoid situations in which the engagement quality reviewer is, or may be perceived to be, making decisions on behalf of the engagement team. For example, in these circumstances, the firm may require consultation about such significant judgments with other relevant personnel in accordance with the firm's consultation policies or procedures.

Procedures Performed by the Engagement Quality Reviewer (Ref: par. .25-.27)

.A28 The firm's policies or procedures may specify the nature, timing, and extent of the procedures performed by the engagement quality reviewer and also may emphasize the importance of the engagement quality reviewer exercising professional judgment in performing the review.

.A29 The timing of the procedures performed by the engagement quality reviewer may depend on the nature and circumstances of the engagement or the entity, including the nature of the matters subject to the review. Timely review of the engagement documentation by the engagement quality reviewer throughout all stages of the engagement (for example, planning, performing, and reporting) allows matters to be promptly resolved to the engagement quality reviewer's satisfaction before the release of the engagement report. For example, the engagement quality reviewer may perform procedures in relation to the overall strategy and plan for the engagement at the completion of the planning phase. Timely performance of the engagement quality review may also reinforce the exercise of professional judgment and, when applicable to the type of engagement, maintenance of professional skepticism by the engagement team in planning and performing the engagement.

¹² Paragraph .45 of AT-C section 105, *Concepts Common to All Engagements*.

.A30 The nature and extent of the engagement quality reviewer's procedures for a specific engagement may depend on the following, among other factors:

- The reasons for the assessments given to quality risks,¹³ for example, engagements performed for entities in emerging industries or with complex transactions.
- Identified deficiencies, and the remedial actions to address the identified deficiencies, related to the firm's monitoring and remediation process and any related guidance issued by the firm, which may indicate areas where more extensive procedures need to be performed by the engagement quality reviewer.
- The complexity of the engagement.
- The nature and size of the entity, including whether the entity is a listed entity.
- Findings relevant to the engagement, such as the results of inspections undertaken by an external oversight authority in a prior period, or other concerns raised about the quality of the work of the engagement team.
- Information obtained from the firm's acceptance and continuance of client relationships and specific engagements.
- For assurance engagements, the engagement team's identification and assessment of, and responses to, risks of material misstatement in the engagement.
- Whether members of the engagement team have cooperated with the engagement quality reviewer. The firm's policies or procedures may address the actions the engagement quality reviewer takes in circumstances in which the engagement team has not cooperated with the engagement quality reviewer, for example, informing an appropriate individual in the firm so appropriate action can be taken to resolve the issue.

.A31 The nature, timing, and extent of the engagement quality reviewer's procedures may need to change based on circumstances encountered in performing the engagement quality review.

Group Audit Considerations

.A32 The performance of an engagement quality review for an audit of group financial statements may involve additional considerations for the individual appointed as the engagement quality reviewer for the group audit, depending on the size and complexity of the group. Paragraph .21a requires the firm's policies or procedures to require the engagement quality reviewer to take overall responsibility for the performance of the engagement quality review. In doing so, for larger and more complex group audits, the group engagement quality reviewer may need to discuss significant matters and significant judgments with key members of the engagement team other than the group engagement team (for example, those responsible for performing audit procedures on the financial information of a component). In these circumstances, the engagement quality reviewer may be assisted by individuals in accordance with paragraph .20. The guidance in paragraph .A22 may be helpful when the engagement quality reviewer for the group audit is using assistants.

¹³ Paragraph A49 of SQMS No. 1.

.A33 In some cases, an engagement quality reviewer may be appointed for an audit of an entity or business unit that is part of a group, for example, when such an audit is required by law, regulation, or for other reasons. In these circumstances, communication between the engagement quality reviewer for the group audit and the engagement quality reviewer for the audit of that entity or business unit may help the group engagement quality reviewer in fulfilling the responsibilities in accordance with paragraph .21a. For example, this may be the case when the entity or business unit has been identified as a component for purposes of the group audit and significant judgments related to the group audit have been made at the component level.

Information Communicated by the Engagement Team and the Firm (Ref: par. .25a)

.A34 Obtaining an understanding of information communicated by the engagement team and the firm in accordance with paragraph .25a may assist the engagement quality reviewer in understanding the significant judgments that may be expected for the engagement. Such an understanding may also provide the engagement quality reviewer with a basis for discussions with the engagement team about the significant matters and significant judgments made in planning, performing, and reporting on the engagement. For example, a deficiency identified by the firm may relate to significant judgments made by other engagement teams for certain accounting estimates for a particular industry. When this is the case, such information may be relevant to the significant judgments made on the engagement with respect to those accounting estimates and, therefore, may provide the engagement quality reviewer with a basis for discussions with the engagement team in accordance with paragraph .25b.

Significant Matters and Significant Judgments (Ref: par. .25b–c)

.A35 For audits of financial statements, SAS No. 146¹⁴ requires the engagement partner to review audit documentation relating to significant matters¹⁵ and significant judgments, including those relating to difficult or contentious matters identified during the engagement, and the conclusions reached.

.A36 For audits of financial statements, SAS No. 146¹⁶ provides examples of significant judgments that may be identified by the engagement partner related to the overall audit strategy and audit plan for undertaking the engagement, the execution of the engagement, and the overall conclusions reached by the engagement team.

.A37 For engagements other than audits of financial statements, the significant judgments made by the engagement team may depend on the nature and circumstances of the engagement or the entity. For example, in an attestation engagement performed in accordance with Statements on Standards for Attestation Engagements, the engagement team's determination of whether the criteria to be applied in the preparation of the subject matter information are suitable for the engagement may involve or require significant judgment.

.A38 In performing the engagement quality review, the engagement quality reviewer may become aware of other areas where significant judgments would have been expected to be made by the engagement team for which further information may be needed about the engagement team's procedures performed or the basis for conclusions reached. In those circumstances, discussions with

¹⁴ Paragraph .31 of SAS No. 146.

¹⁵ Paragraph .08c of AU-C section 230, *Audit Documentation*.

¹⁶ Paragraph .A93 of SAS No. 146.

the engagement quality reviewer may result in the engagement team concluding that additional procedures need to be performed.

.A39 The information obtained in accordance with paragraphs .25a–b, and the review of selected documentation, assists the engagement quality reviewer in evaluating the engagement team's basis for making the significant judgments. Other considerations that may be relevant to the engagement quality reviewer's evaluation include, for example, the following:

- Remaining alert to changes in the nature and circumstances of the engagement or the entity that may result in changes in the significant judgments made by the engagement team
- Applying an unbiased view in evaluating responses from the engagement team
- Following up on inconsistencies identified in reviewing engagement documentation or inconsistent responses by the engagement team to questions relating to the significant judgments made

.A40 The firm's policies or procedures may specify engagement documentation to be reviewed by the engagement quality reviewer. In addition, such policies or procedures may indicate that the engagement quality reviewer exercises professional judgment in selecting additional engagement documentation to be reviewed relating to significant judgments made by the engagement team.

.A41 Discussions about significant judgments with the engagement partner and, if applicable, other members of the engagement team, together with the engagement team's documentation, may assist the engagement quality reviewer in evaluating the maintenance of professional skepticism, when applicable to the engagement, by the engagement team in relation to those significant judgments.

.A42 For audits of financial statements, SAS No. 146¹⁷ provides examples of the impediments to the maintenance of professional skepticism at the engagement level, unconscious auditor biases that may impede the maintenance of professional skepticism, and possible actions that the engagement team may take to mitigate impediments to the maintenance of professional skepticism at the engagement level.

.A43 For audits of financial statements, the requirements and relevant application material in AU-C section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*;¹⁸ AU-C section 540, *Auditing Accounting Estimates and Related Disclosures*;¹⁹ and other AU-C sections also provide examples of areas in an audit where the auditor maintains professional skepticism or examples of where appropriate documentation may help provide evidence about how the auditor maintained professional skepticism. Such guidance may also assist the engagement quality reviewer in evaluating the maintenance of professional skepticism by the engagement team.

¹⁷ Paragraphs .A33–.A35 of SAS No. 146.

¹⁸ Paragraph .A255 of AU-C section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

¹⁹ Paragraph .A11 of AU-C section 540, *Auditing Accounting Estimates and Related Disclosures*.

Whether Relevant Ethical Requirements Relating to Independence Have Been Fulfilled (Ref: par. .25d)

.A44 SAS No. 146²⁰ requires the engagement partner, prior to dating the auditor's report, to take responsibility for determining whether relevant ethical requirements, including those related to independence, have been fulfilled.

Whether Consultation Has Taken Place on Difficult or Contentious Matters or Matters Involving Differences of Opinion (Ref: par. .25e)

.A45 SQMS No. 1²¹ addresses consultation on difficult or contentious matters and differences of opinion within the engagement team or between the engagement team and the engagement quality reviewer or individuals performing activities within the firm's system of quality management.

Sufficient and Appropriate Involvement of the Engagement Partner on the Engagement (Ref: par. .25f)

.A46 SAS No. 146²² requires the engagement partner to determine, prior to dating the auditor's report, that the engagement partner's involvement has been sufficient and appropriate throughout the audit engagement such that the engagement partner has the basis for determining that the significant judgments made and the conclusions reached are appropriate given the nature and circumstances of the engagement. SAS No. 146 also indicates that the documentation of the involvement of the engagement partner may be accomplished in different ways. Discussions with the engagement team, and review of such engagement documentation, may assist the engagement quality reviewer's evaluation of the basis for the engagement partner's determination that the engagement partner's involvement has been sufficient and appropriate.

.A47 SAS No. 146 is adapted, as necessary, to engagements performed in accordance with generally accepted auditing standards other than audits of financial statements. Accordingly, the requirement in paragraph .25f is applicable to those engagements.

Engagement Quality Reviewer's Review of Financial Statements and Engagement Reports (Ref: par. .25g)

.A48 For audits of financial statements, the engagement quality reviewer's review of the financial statements and auditor's report thereon is consistent with the engagement quality reviewer's understanding of those matters based on the review of selected engagement documentation and discussions with the engagement team. In reviewing the financial statements or financial information, the engagement quality reviewer may also become aware of other areas where significant judgments would have been expected to be made by the engagement team for which further information may be needed about the engagement team's procedures or conclusions. The guidance in this paragraph also applies to reviews of financial statements or financial information and the related engagement report.

.A49 For engagements other than audits or reviews of financial statements or financial information, the engagement quality reviewer's review of the engagement report and, when applicable, the subject matter information may include considerations similar to those described in paragraph .A46 (for example, whether the presentation or description of matters relating to the significant judgments made by the engagement team are consistent with the engagement

²² Paragraph .40a of SAS No. 146.

quality reviewer's understanding based on the procedures performed in connection with the engagement quality review).

Unresolved Concerns of the Engagement Quality Reviewer (Ref: par. .26)

.A50 The firm's policies or procedures may specify the individual or individuals in the firm to be notified if the engagement quality reviewer has unresolved concerns that the significant judgments made by the engagement team, or the conclusions reached thereon, are not appropriate. Such individuals may include the individual assigned the responsibility for the appointment of engagement quality reviewers. With respect to such unresolved concerns, the firm's policies or procedures may also require consultation within or outside the firm (for example, a professional or regulatory body).

Documentation (Ref: par. .28–.30)

.A51 Paragraphs 58–61 of SQMS No. 1 address the firm's documentation of its system of quality management, which includes the firm's policies and procedures addressing engagements that are required to be subject to engagement quality reviews. This section addresses additional documentation requirements related to such policies and procedures as well as documentation requirements related to the performance of engagement quality reviews undertaken at the engagement level.

.A52 The form, content, and extent of the documentation of the engagement quality review may depend on the following factors:

- The nature and complexity of the engagement
- The nature of the entity
- The nature and complexity of the matters subject to the engagement quality review
- The extent of the engagement documentation reviewed

.A53 The performance and notification of the completion of the engagement quality review may be documented in a number of ways. For example, the engagement quality reviewer may document the review of engagement documentation electronically in the IT application for the performance of the engagement. Alternatively, the engagement quality reviewer may document the review through means of a memorandum. The engagement quality reviewer's procedures may also be documented in other ways, for example, in the minutes of the engagement team's discussions when the engagement quality reviewer was present.

.A54 Paragraph .24*b* requires that the firm's policies or procedures preclude the engagement partner from releasing the engagement report until the completion of the engagement quality review, which includes resolving matters raised by the engagement quality reviewer. Provided that all requirements with respect to the performance of the engagement quality review have been fulfilled, the documentation of the review may be finalized after the release of the engagement report but before the assembly of the final engagement file.

PR-C Section 100

Concepts Common to All Peer Reviews

Effective for peer reviews commencing on or After May 1, 2022.

Introduction

Scope of This Section

.01 This section contains general principles and responsibilities for the AICPA Peer Review Program (the program) and applies to

- a.* firms and individuals (Ref: par. .45–.47) enrolled in the program (Ref: par. .A1),
- b.* firms and individuals who perform and report on peer reviews, and
- c.* administering entities (AEs) of peer reviews (Ref: par. .A2).

The AICPA Peer Review Board (board), among other responsibilities, determines program enrollment eligibility, peer reviewer qualifications, and who may administer the program.

.02 The AICPA Standards for Performing and Reporting on Peer Reviews (the standards) are not intended for peer reviews of

- a.* organizations that are not public accounting firms or
- b.* a firm's accounting and auditing practice applicable to engagements subject to PCAOB permanent inspection. (Ref: par. .A3)

Authorization of the Program

.03 AICPA bylaws and the AICPA Code of Professional Conduct require that members engaged in the practice of public accounting are practicing with a firm that is enrolled in an Institute-approved practice-monitoring program (AICPA Peer Review Program) if the firm

- a.* performs services within the scope of these standards and
- b.* issues reports purporting to be in accordance with AICPA professional standards.

These standards are applicable to firms and individuals engaged in the practice of public accounting in the United States or its territories. (Ref: par. .A4–.A6)

.04 These standards do not require firms that only perform preparation engagements under the Statements on Standards for Accounting and Review Services (SSARs) to enroll in the program. (Ref: par. .A7)

Relationship of Peer Review With Quality Control Standards

.05 Users of these standards should understand the quality control standards established by the AICPA. The firm's system of quality control may affect both the conduct of individual engagements and the conduct of a firm's accounting and auditing practice. However, deficiencies in or instances of noncompliance with a firm's system of quality control do not, in and of themselves, indicate

that an engagement was not performed in accordance with the requirements of the applicable professional standards. (Ref: par. .A8–.A9)

Effective Date

.06 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objective

.07 The overall objective of the program is to promote and enhance quality in the accounting and auditing services provided by the firms (and individuals) subject to the standards, in service of the public interest. (Ref: par. .A10)

.08 There are two types of peer reviews:

- a. *System reviews.* For guidance, see section 210, *General Principles and Responsibilities for Reviewers — System Reviews*, and section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*.
- b. *Engagement reviews.* For guidance, see section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*, and section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*.

.09 Firms that perform engagements under the Statements on Auditing Standards (SASs) or *Government Auditing Standards*, examinations under the Statements on Standards for Attestation Engagements (SSAEs), or engagements under PCAOB standards as their highest level of service must have system reviews. Firms that perform services under SSARSs or services under the SSAEs not included in system reviews as their highest level of service are eligible to have engagement reviews. (Ref: par. .A11)

.10 Engagements performed under international standards should be included in the scope of a peer review. Under U.S. professional standards, the engagement should comply with elements of both the international standards and U.S. professional standards. However, the peer reviewer should test compliance with only the U.S. professional standards. Testing of compliance with any international standards is not included in the scope of the review. The peer reviewer should consult with AICPA staff for further guidance, if necessary. (Ref: par. .A12)

Definitions

.11 For the purposes of all sections of these standards, the following terms have the meanings attributed as follows:

Acceptance date. A peer review is accepted on the date the peer review committee (the committee) or report acceptance body (RAB) concludes a peer review was performed and reported on in accordance with the standards or, for *pass with deficiencies* or *fail* reports, when the reviewed firm has agreed to perform required corrective actions, if any, as a condition of acceptance. (Ref: par. .A13–.A14)

Accounting and auditing practice. A practice that performs engagements under Statements on Auditing Standards (SASs), Statements on Standards for Accounting and Review Services (SSARSs), Statements on Standards for Attestation Engagements (SSAEs), *Government Auditing Standards* (the Yellow Book) issued by the

U.S. Government Accountability Office, or PCAOB standards. Engagements covered in the scope of the program are those included in the firm's accounting and auditing practice that are not subject to PCAOB permanent inspection.

Administering entity (AE). A state CPA society, group of state CPA societies, the National Peer Review Committee (National PRC), or other entity that is approved by the board to administer the AICPA Peer Review Program.

Allegation or investigation. A formal declaration, statement, or other similar assertion, the validity of which has not been established, indicating that there may be deficiencies in the reviewed firm, reviewer, or reviewing firm's compliance with a regulatory, monitoring, or enforcement body's (regulatory body's) rules (procedures, laws, professional standards, or practices). (Ref: par. .A15)

Association of CPA firms (association). Any group, affiliation, or alliance of accounting firms. The term also applies to two or more firms or a group of firms (whether a formal or informal group) that jointly market or sell services. Firms and other entities in the association cooperate with one another to enhance their capabilities to provide professional services. (Ref: par. .A54–.A56)

Captain. The reviewer that has the ultimate responsibility for the review, including the work performed by team members.

Closing meeting. A meeting between the captain and the reviewed firm held in advance of the exit conference to discuss the review team's observations, matters, findings, deficiencies, and significant deficiencies identified; the expected report rating; and the reviewed firm's responsibilities related to such matters.

Commencement date. The earlier date of when the reviewer begins the review of engagements or when the reviewer learns information that affects the results of the current review. (Ref: par. .A16)

Completion date. For *pass* reports, the completion date is the same as the acceptance date. For *pass with deficiencies* or *fail* reports, the completion date is the date the reviewed firm has completed all required corrective actions to the satisfaction of the committee (or its designee). (Ref: par. .A14)

Compliance matter. When a firm's properly designed quality control policy or procedure does not operate as designed, as evidenced by the failure of reviewed firm personnel to comply with such system.

Consent agenda. A list of reviews, corrective actions, implementation plans, and other items that allow RAB members to vote on all items at one time without discussion; however, any RAB member may extract any item from the consent agenda for discussion and a separate vote if necessary. The following minimum criteria must be met for a review to be accepted using a consent agenda: (Ref: par. .A17)

- A report rating of *pass*
- No matters for further consideration (MFCs)
- Without reviewer performance feedback

Items related to corrective actions and implementation plans should be accepted using a consent agenda only if

- there are clearly identifiable actions or procedures that could be accepted by the technical reviewer or CPA on staff (see paragraph .08 of section 420, *Corrective Actions and Implementation Plans*),
- requests to waive corrective actions or implementation plans are specific and easy to understand, or (Ref: par. .A18)
- there is no apparent reason that requests to extend due dates should not or would not be approved by the RAB. (Ref: par. .A19)

Other items may be approved using a consent agenda if there are clearly identifiable actions that do not require discussion, assessment, or a vote by the full peer review committee.

Control risk. The risk that an engagement will not be performed or reported on in conformity with the requirements of applicable professional standards in all material respects due to a failure in the reviewed firm's system of quality control.

Corrective actions. Remedial actions prescribed by the committee, RAB, or board that should be agreed to and completed by reviewed firms or peer reviewers: (Ref: par. .A20)

- *Peer reviewers.* A remedial action prescribed by the committee or board in a performance deficiency letter that describes deficiencies in the reviewer's performance. (Ref: section 200, *General Principles and Responsibilities for Reviewers*, section 210, *General Principles and Responsibilities for Reviewers — System Reviews*, and section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*)
- *Reviewed firms.* A remedial action prescribed by the committee, RAB, or board of a reviewed firm as a condition of acceptance of a *pass with deficiencies* or *fail* peer review report in response to a deficiency or significant deficiency. A peer review with corrective actions is considered accepted the date the firm acknowledges its responsibility to complete the corrective actions. (Ref: section 300, *General Principles and Responsibilities for Reviewed Firms*, section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*, and section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*)

CPA on staff. The CPA responsible for managing the program at the AE.

Deferred acceptance. When the RAB does not have sufficient information to conclude whether the review was performed or reported on in accordance with the standards. Deferred reviews are subsequently represented to the RAB after reasons for deferral have been resolved by the reviewer or reviewed firm. (Ref: par. .A14)

Deficiency (engagement reviews). One or more matters that the review captain concludes result in an engagement that is not performed or reported on in conformity with the requirements of applicable professional standards in all material respects. Deficiencies should be documented in a peer review report with a rating of *pass with deficiencies* or *fail*. (Ref: par. .A21)

Deficiency (system reviews). When evaluating the reviewed firm's system of quality control taken as a whole, one or more matters that

the team captain has concluded could create a situation in which the reviewed firm would not have reasonable assurance of performing or reporting in conformity with the requirements of applicable professional standards in one or more important respects. Deficiencies should be documented in a peer review report with a rating of *pass with deficiencies*.

Delayed acceptance. When the RAB has sufficient information to conclude that the peer review was performed and reported on in accordance with the standards but there are minor revisions that need to be addressed prior to publicizing the results of the peer review. (Ref: par. .A13–.A14)

Design matter. When the reviewed firm's system of quality control is missing a quality control policy or procedure or the reviewed firm's existing quality control policies and procedures, even if fully complied with, would likely result in engagements not performed or reported on in accordance with professional standards.

Detection risk. The risk that the reviewer will fail to detect deficiencies or significant deficiencies in the reviewed firm's system of quality control.

Due date. The date the peer review report and all required peer review materials are to be submitted to the AE or the date all supporting documentation for corrective actions and implementation plans is to be submitted to the AE.

Engagement partner. The partner or other person in the firm who is responsible for the engagement and its performance and for the report that is issued on behalf of the firm and who, when required, has the appropriate authority from a professional, legal, or regulatory body.

Exit conference. A meeting between the captain and the reviewed firm held to discuss a summary of the peer review results, the firm responses, and the report rating.

Fair procedures. Procedures related to the potential termination of a firm's enrollment in the AICPA Peer Review Program that provide for an orderly proceeding, achieve a fair result, and adequately safeguard the rights of firms and individuals.

Familiarity threat. A risk that due to a long-standing or close personal relationship with committees, RABs, technical reviewers, peer reviewers, firms subject to peer review, or others involved in the program, the evaluating party will not exercise a proper level of objectivity.

Finding (engagement reviews). One or more matters that the review captain concludes result in an engagement not performed or reported on in conformity with the requirements of applicable professional standards. A finding should be documented as a finding for further consideration (FFC) on an FFC form.

Finding (system reviews). One or more related matters that result from a condition in the reviewed firm's system of quality control or compliance with the system such that there is more than a remote possibility that the reviewed firm would not perform or report in conformity with the requirements of applicable professional standards. A finding

should be documented as a finding for further consideration (FFC) on an FFC form.

Highest-risk areas. The account or audit areas of most importance to an engagement based on a reviewer's judgment and experience.

Implementation plan. Actions required of a reviewed firm in response to a finding included on an FFC form. (Ref: par. .A20)

Ineligible. The term used to describe a reviewer who does not meet the required qualifications and, therefore, is not approved to schedule, commence, continue to perform, or participate in a peer review for any AE. (Ref: par. .06 of section 200 and .20–.22 and .A24 of section 430)

Inherent risk. In the absence of a system of quality control, the risk of a reviewed firm's engagement not being performed or reported on in conformity with the requirements of applicable professional standards in all material respects.

Initial engagement. The first accounting or auditing service performed for a client, in a particular industry, engagement, or as a level of service for a firm.

Isolated matter. An incident (or limited incidents) of noncompliance with professional standards or the firm's quality control policies and procedures on one or more engagements (or elements of the quality control system), but the same standards or policies and procedures were complied with on the remaining selected engagements or elements. (Ref: par. .A22)

Limitation or restriction. A corrective or disciplinary action or sanction imposed on a reviewer or reviewing firm by a regulatory body. (Ref: par. .A15)

Limited restriction. Prohibits an individual from performing peer reviews in a specific capacity such as limited to a specific industry or engagement (for example, an individual is prohibited from performing employee benefit plan audits).

Matter. One or more "no" answers to questions in peer review checklists identified during a system review or an engagement review.

- *Engagement reviews.* One or more "no" answers to questions in peer review checklists that were not resolved to the review captain's satisfaction. These are documented as matters for further consideration (MFCs) on an MFC form. (Ref: sections 220 and 320)
- *System reviews.* One or more "no" answers to questions in peer review checklists that a reviewer concludes warrant further consideration in the evaluation of a firm's system of quality control. A matter should be documented as a matter for further consideration (MFC) on an MFC form. (Ref: sections 210 and 310)

Must-cover. An engagement that does not have to be selected for review, but a team member must have recent experience in the industry or level of service to aid in the risk assessment process and to determine whether that engagement should be selected for review. Appendix C, "Additional Requirements for Must-Select and Must-Cover Engagements," of section 210 contains the engagements with this designation.

Must-select. An engagement that must be included in the sample of engagements selected for review. Appendix C of section 210 contains the industries or engagements with this designation.

Nonconforming engagement. An engagement identified as not performed or reported on in accordance with the requirements of applicable professional standards in all material respects.

Oversight Task Force (OTF). The standing task force of the board responsible for establishing oversight policies and procedures to ensure that AEs are complying with the administrative procedures established by the Peer Review Board, reviews are being conducted and reported on in accordance with the standards, and the results of the reviews are being evaluated on a consistent basis in all jurisdictions. (Ref: par. .A23)

Partner. Any individual with authority to bind the firm with respect to the performance of a professional services engagement. Partners may include employees with this authority who have not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority.

Peer Review Board (board). The AICPA senior technical committee that governs the Peer Review Program.

Peer review committee (committee). A group of individuals appointed by an AE to oversee the administration, acceptance, and completion of peer reviews and performance of peer reviewers.

Peer review contact. A partner of the firm designated as the liaison between the review team, AE, and the reviewed firm.

Peer reviewer (reviewer). An independent evaluator who conducts a peer review.

Peer review risk. The risk that the reviewer issues an inappropriate report on the firm's system of quality control. It is composed of inherent risk, control risk, and detection risk.

Performance deficiency. Occurs when a pattern of reviewer performance findings exists or the reviewer did not do either of the following: (Ref: par. .A24–.A25)

- a. Appropriately conclude on whether an engagement was performed or reported on in conformity with applicable professional standards in all material respects prior to technical review, oversight, or RAB consideration and did not demonstrate sufficient knowledge and experience required to review the engagement and identify issues prior to technical review, oversight, or RAB consideration
- b. Appropriately aggregate or evaluate matters noted on the review, such that the RAB determined a deficiency was present when the reviewer did not elevate the matter beyond an MFC, or the RAB determined a significant deficiency was present when the reviewer did not elevate the matter beyond an FFC

Performance deficiency letter. A letter issued to the reviewer by the committee (or its designated body) or board that requires the reviewer to complete one or more corrective actions that are intended to improve the reviewer's future performance. (Ref: par. .A25)

Performance feedback form. A form used to document reviewer performance deficiencies or findings on individual reviews. The form is issued by the committee or board to the reviewer to communicate specific areas of needed improvements based on performance that was not in accordance with program guidance. (Ref: par. .A24)

Performance finding. A situation in which the reviewer has not performed in accordance with program guidance but that does not rise to the level of a performance deficiency.

Period end. The point in time or period of time for which financial information is represented in accordance with a financial reporting framework.

Personnel. Partners and staff.

Piggyback review. The review team performs a review of one or more engagements contemporaneously with testing the reviewed firm's internal inspection procedures.

Professional judgment. The application of relevant training, knowledge, and experience, within the context provided by peer review and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of peer reviews.

Professional skepticism. An attitude that includes a questioning mind and a critical assessment of evidence.

Quality control function. Performing an engagement quality control review as part of the engagement performance element of a firm's system of quality control or supervising or performing an inspection as part of the monitoring element of a firm's system of quality control.

Reciprocal peer review. A firm performs a peer review for the firm that performed its most recent review; such reviews are not permitted.

Repeat finding, deficiency, or significant deficiency (system reviews). A finding, deficiency, or significant deficiency identified during the current review that has the same systemic cause identified in the prior review's FFC forms or report. (Ref: par. .A26)

Repeat finding or deficiency (engagement reviews). An engagement finding or deficiency that is the same as noted in the prior review. (Ref: par. .A27)

Report Acceptance Body (RAB). A group of individuals appointed by the committee who are delegated the report acceptance function on behalf of the committee.

Report ratings (engagement reviews). A peer review report can have one of three possible ratings: (Ref: par. .A28–A29)

Pass. A report with a peer review rating of *pass* is issued when the review captain concludes that nothing came to the captain's attention that caused the captain to believe that the engagements submitted for review were not performed and reported on in conformity with the requirements of applicable professional standards in all material respects.

Pass with deficiencies. A report with a peer review rating of *pass with deficiencies* is issued when the review captain concludes at least one but not all the engagements submitted for review were nonconforming.

Fail. A report with a peer review rating of *fail* is issued when the review captain concludes all the engagements submitted for review were nonconforming.

Report ratings (system reviews). A peer review report can have one of three possible ratings: (Ref: par. .A28–.A29)

Pass. The system of quality control for the accounting and auditing practice of the reviewed firm in effect for the year ended has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

Pass with deficiencies. Except for the deficiencies described, the system of quality control for the accounting and auditing practice of the reviewed firm in effect for the year ended has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

Fail. As a result of the significant deficiencies described, the system of quality control for the accounting and auditing practice of the reviewed firm in effect for the year ended was not suitably designed or complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

Scope limitation (system and engagement reviews). Exclusions of one or more engagements or other limitations that affect the performance of a peer review. A description of any such exclusion or limitation should be described in the peer reviewer's report. (Ref: par. .A28–.A29)

Significant deficiency. One or more matters in a system review that the reviewer has concluded create a situation in which the reviewed firm's system of quality control does not provide the reviewed firm with reasonable assurance of performing or reporting in conformity with the requirements of applicable professional standards in all material respects. Significant deficiencies should be documented in a peer review report with a rating of *fail*.

Staff. Professionals, other than partners, including any specialists that the firm employs.

Surprise engagement. The engagement selection provided to the firm to mitigate the risk that the firm has not complied with the firm's policies and procedures related to timely completion of the assembly of final engagement files by engagement teams.

Suspension. Sanction imposed by an AE, AICPA staff, or the board for not cooperating that may prohibit a reviewer from being scheduled or performing reviews.

Systemic cause (system reviews). A condition in the firm's system of quality control that allowed noncompliance to occur and remain undetected.

Requirements

Defining Professional Requirements in the Standards

.12 Each PR-C section uses the following two categories of requirements, identified by specific terms, to describe the degree of responsibility it imposes on reviewers, firms, and administrators of the program:

- a. *Unconditional requirements.* The user must comply with an unconditional requirement in all cases in which such a requirement is relevant. The word "must" is used to indicate an unconditional requirement.
- b. *Presumptively mandatory requirements.* The user must comply with a presumptively mandatory requirement in all cases in which such a requirement is relevant, except in rare circumstances discussed in paragraph .15. The word "should" is used to indicate a presumptively mandatory requirement.

Complying With Relevant Requirements

.13 Reviewers, firms, and administrators of the program should comply with all applicable sections of the standards. (Ref: par. .A30)

.14 Reviewers, firms, and administrators of the program should understand the entire text of a section of the standards, including its application and other explanatory material, to understand its objectives and apply its requirements properly.

Departure From a Relevant Requirement

.15 In rare circumstances, the user may judge it necessary to depart from a relevant presumptively mandatory requirement. In such circumstances, the user should perform alternative procedures to achieve the objective. The user should consult with AICPA staff or the AE prior to departing from a relevant requirement. (Ref: par. .A31)

Interpretive Peer Review Publications

.16 Reviewers, firms, and administrators of the program should consider applicable interpretive publications in the performance of peer reviews. (Ref: par. .A32)

Other Peer Review Publications

.17 In applying the peer review guidance included in an other peer review publication, the user should, exercising professional judgment, assess the relevance and appropriateness of such guidance to the circumstances of the peer review. (Ref: par. .A33)

Confidentiality

.18 A peer review should be conducted in compliance with the confidentiality requirements set forth in the "Confidential Client Information Rule" (ET sec. 1.700.001) and its interpretations.

.19 Confidential information should be disclosed only as required by law, or in accordance with sections 200 and 400, (Ref: par. .A34)

- a. to anyone not involved in performing the review,
- b. to anyone not administering or carrying out the program, or
- c. for use in any way not related to meeting the objectives of the standards.

Ethical Requirements Relating to Peer Review

.20 Enrolled firms, reviewing firms, and individual CPAs within the AEs should comply with relevant ethical requirements. If circumstances come to the firm or reviewer's attention that bring into question whether independence was impaired, the AE or AICPA staff should be consulted. (Ref: par. .A35–.A38)

Professional Skepticism and Professional Judgment

.21 Professional skepticism and professional judgment should be used throughout a peer review.

Timing of Peer Reviews

.22 Firms enrolled in the program, in accordance with paragraph .03, should have a peer review once every three years of their accounting and auditing practice that covers a one-year period (peer review year). (Ref: par. .A39–.A40)

.23 A firm should enroll in the program no later than the date the firm issues the report on its first engagement within the scope of the standards (enrollment date).

.24 The firm should consult with the peer reviewer to determine its initial peer review year. The AE should be consulted when the peer review year is not the 12-month period after the report date of the initial engagement. The following should be considered to determine the peer review year: (Ref: par. .A41)

- a. The firm's practice
- b. The period ends of the firm's engagements
- c. The report dates of the firm's engagements
- d. The number and type of engagements to be encompassed in the review
- e. The requirements by any other organization for the firm to have a peer review (Ref: par. .A42)

.25 The firm's initial peer review due date should be within 18 months after the firm issues the report on its first engagement within the scope of the standards.

.26 If the firm fails to enroll by the due date described in paragraph .25, the initial peer review due date should be 90 days from the date the firm enrolled in the program.

.27 The subsequent peer review due date should be no more than 42 months from the previous peer review year-end. (Ref: par. .A43)

.28 A firm should have prior approval by the AE to change its peer review year-end. A change in peer review year-end will be applicable to current and subsequent peer reviews. (Ref: par. .A44)

.29 A firm should have prior approval by the AE to extend its peer review due date and the extension should be applicable only to the current peer review. (Ref: par. .A45)

.30 A firm should ensure that any change in the review due date or year-end approved by the AE is communicated to and recognized by any other organizations requiring it to have a peer review. (Ref: par. .A42)

.31 If a firm, having previously represented that it has no engagements within the scope of the standards, is enrolled in the program and performs its first engagement within the scope of the standards, the due date should be 18 months from that engagement's period end (18 months from the report date if it is a financial forecast, projection, or agreed-upon procedures engagement).

.32 If a firm fails to immediately notify the AE when it performs an engagement that meets the requirements of paragraphs .18–.19 of section 320, then the firm should participate in a system review with a peer review year that covers the engagement.

.33 If a firm resigns or is dropped from the program and subsequently reenrolls in the program, the firm's due date is the later of the due date originally assigned or 90 days after reenrolling.

Administration

.34 All peer reviews intended to meet the requirements of the program should be carried out in conformity with these standards under the supervision of a state CPA society; group of state CPA societies; one of the board's committees, such as the National Peer Review Committee (National PRC); or other entity (collectively hereinafter referred to as an "administering entity" or "AE") approved by the board to administer peer reviews. (Ref: par. .A46)

.35 Firms are required to have their reviews administered by the National PRC if they meet any of the following criteria: (Ref: par. .A47)

- a. The firm performed or "played a substantial role in" (as defined by the PCAOB) an engagement under PCAOB standards with a period end during the peer review year.
- b. The firm is a provider of quality control materials (QCM) (or is affiliated with a provider of QCM) that are used by firms that it peer reviews.

Peer Review Documentation and Retention Policy

.36 The reviewer should prepare peer review documentation with enough detail to enable an experienced peer reviewer having no previous connection with the review to understand the following:

- a. The documentation's purpose, source, and the conclusions reached
- b. Evidence of the work performed
- c. That the reviewer complied with these standards
- d. That the basis for the reviewer's conclusions is supported

.37 Reviewers and technical reviewers should use the materials and checklists developed and issued by the board to meet the requirements of the program.

.38 If the reviewer determines additional materials and checklists not issued by the board are needed to complete a review, the other materials and checklists must

- a.* include the same elements and be more comprehensive than those versions issued by the board and
- b.* be approved by the AE prior to commencement of the review.

.39 Peer review documentation submitted to the AE should be in electronic format as prescribed by the AICPA.

.40 Peer review documentation should not be retained by the reviewer or AE for an extended period after the peer review's completion, except for certain documents that are retained until the subsequent peer review's acceptance and completion. Refer to section 200, *General Principles and Responsibilities for Reviewers*, and section 400, *General Principles and Administration Responsibilities*, for specific document-retention requirements for reviewers and administrators, respectively. (Ref: par. .A48–.A49)

Oversight

.41 Peer reviews, reviewed firms, and reviewers are subject to oversight by the AE and the board to ensure compliance with and consistent application of the standards. (Ref: par. .A50)

.42 AEs are subject to oversight by the board and other bodies agreed upon by the board.

Disagreements

.43 If a disagreement arises between any parties to a peer review that cannot be resolved through other means, the disagreeing parties should consult with their AE, and if necessary, request that a panel of the AE's peer review committee members resolve the disagreement. The panel must reach a decision to resolve the disagreement. (Ref: par. .06 of section 400)

.44 If any of the disagreeing parties believe a review of the panel's decision is warranted, they should request an appeal by writing to the board and explaining the reasons a review of the panel's decision is warranted. A panel formed by the board will review and consider the request and take further action pursuant to fair procedures that it has established.

Individual Enrollment When a Firm Is Without CPA-Majority Ownership

.45 An individual CPA should enroll if the CPA (Ref: par. .A5 and .A51)

- a.* practices in a firm not eligible to enroll (Ref: par. .A52) and
- b.* performs compilations of financial statements in accordance with the SSARS.

.46 An individual enrolled in the program should have an engagement review in accordance with these standards. Peer review documentation should be tailored to reflect that an individual, not a firm, is being peer reviewed. (Ref: par. .A53)

.47 If an individual enrolled in the program meets the reviewer qualifications in paragraph .05 of section 200, the individual would be the reviewer (not the firm ineligible to enroll) and that fact should be made evident throughout the review.

Associations of CPA Firms

.48 For a member firm of an association of CPA firms (association) to conduct peer reviews of another association member firm enrolled in the program, in addition to the peer review independence requirements, the association and its member firms must meet all the following independence criteria:

- a. The association, as distinct from its member firms, does not perform any professional services other than those it provides to its member firms or affiliates. (Ref: par. .A54)
- b. The association does not make representations regarding the quality of professional services performed by its member firms to assist member firms in obtaining engagements unless the representations are objective or quantifiable. (Ref: par. .A55)
- c. Referral or participating work among member firms is arranged directly by the firms involved.

.49 For a member firm of an association to conduct a peer review of another association member firm enrolled in the program, the association must submit an Association Information Form (AIF) to, and obtain approval from, the board or its designee prior to any aspect of the review being planned, scheduled, or performed. All review teams must still be approved by the AE. (Ref: par. .A56)

.50 In an association-formed review team, the captain should be from an association member firm.

.51 An association-formed review should be performed in accordance with these standards. Additionally, the peer review report should be issued on the letterhead of and signed by the captain's firm (not the association).

.52 An association of CPA firms cannot be a network, as defined by the "Network and Network Firms" interpretation (ET sec. 1.220.010) under the "Independence Rule," and conduct peer reviews of another association member firm. A network firm is not independent with respect to other firms in the same network.

.53 Whether an association is a network and whether an entity is a network firm should be applied consistently by all members of the association.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.02)

.A1 A reference to a *firm* or *firms* includes individuals enrolled in the program.

.A2 The program may not be administered by any entity without written permission from the board.

.A3 For purposes of the program, the board determines which engagements meet the criteria to be considered subject to PCAOB permanent inspection. Currently, this includes audits of SEC issuers and the audits and related compliance and exemption engagements for broker-dealers registered with the SEC or dually registered with both the SEC and Commodity Futures Trading Commission (CFTC). Securities Investor Protection Corporation (SIPC) agreed-upon procedures engagements for SEC registered broker-dealers and audits of broker-dealers only registered with the CFTC are in the scope of the program.

Authorization of the Program (Ref: par. .03–.04)

- .A4 A firm does not need to have any AICPA members to enroll in the program.
- .A5 If authorized by Council, an individual member may enroll in the program if the firm is not eligible to enroll in the program. A CPA practicing in such a firm may enroll in certain circumstances as outlined in paragraphs .45–.47.
- .A6 Specifically, these requirements are located in AICPA BL section 220, *Requirements for Admission to Membership*, and BL section 230, *Requirements for Retention of Membership*, (BL sec. 2.2.3 and 2.3.4, respectively) and the "Form of Organization and Name Rule" (ET sec. 1.800.001) of the AICPA Code of Professional Conduct.
- .A7 A firm that performs only preparation engagements under the SSARs may be required to enroll in the program by a regulatory body, for example, for licensing.

Relationship of Peer Review With Quality Control Standards (Ref: par. .05)

- .A8 Quality control systems, policies, and procedures are the responsibility of the firm in conducting its accounting and auditing practice. Under QM section 10A, *A Firm's System of Quality Control*, the firm has an obligation to establish and maintain a system of quality control to provide it with reasonable assurance that
- a. the firm and its personnel comply with professional standards and applicable legal and regulatory requirements and
 - b. reports issued by the firm are appropriate in the circumstances.
- .A9 The nature and extent of a firm's system of quality control depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations.

Objectives (Ref: par. .07–.10)

- .A10 The objective of the program is achieved through the performance of peer reviews involving procedures tailored to the size of the firm and the nature of its practice.
- .A11 The type of peer review is determined based on the engagements performed as the firm's highest level of service, as shown in the following chart:

<i>Engagements as the Firm's Highest Level of Service</i>	<i>System Review</i>	<i>Engagement Review</i>
Statements on Auditing Standards (SASs)		
Engagements	X	
Government Auditing Standards (GAS)		
Financial audits	X	
Attestation engagements (examination, review, or agreed-upon procedures under GAS)	X	
Performance audits	X	

(continued)

<i>Engagements as the Firm's Highest Level of Service</i>	<i>System Review</i>	<i>Engagement Review</i>
Statements on Standards for Attestation Engagements (SSAEs)		
Examination engagements	X	
Review engagements		X
Agreed-upon procedures engagements		X
PCAOB Standards		
Audits	X	
Statements on Standards for Accounting and Review Services (SSARSs)		
Reviews of financial statements		X
Compilation engagements		X
Preparation of financial statements engagements		X

If a firm is required to have a system review, all the engagements listed in the preceding table would be subject to selection for review based on periods ending during the year under review, except for financial forecasts, projections, and agreed-upon procedures engagements. Financial forecasts, projections, and agreed-upon procedures engagements with accountant's report dates during the year under review would be subject to selection.

.A12 The International Auditing and Assurance Standards Board (IAASB) is not currently recognized by AICPA Council to promulgate technical standards (nor is the International Public Sector Accounting Standards Board); therefore, compliance with auditing, review, or other assurance or related services standards issued by the IAASB, or any other audit or assurance standards outside of the United States, is not included in the scope of peer review.

Definitions (Ref: par. .11)

.A13 Implementation plans do not affect the acceptance or completion date of a review.

.A14 The committee or RAB may require revisions to peer review documents. In those situations, the review is not considered accepted until the revisions have been made to the satisfaction of the committee or RAB (or its designee).

.A15 Regulatory bodies may include, but are not limited to, the following:

- a. The AICPA or state CPA society ethics committees
- b. The AICPA Joint Trial Board
- c. State boards of accountancy
- d. The SEC
- e. The PCAOB
- f. The Department of Labor
- g. The Department of Health and Human Services
- h. Other governmental agencies or other organizations that have the authority to regulate accountants (in connection with engagements within the firm's accounting and auditing practice)

.A16 Indications of when a reviewer has learned information that affects the results of the review include, but are not limited to, the following examples:

- a. A reviewer identifies a design deficiency in the firm's system of quality control.
- b. A reviewer learns about the firm's noncompliance with state board of accountancy licensing requirements.

.A17 An AE may have more restrictive consent agenda criteria or may choose not to utilize a consent agenda.

.A18 Requests to waive corrective actions that are specific and easy to understand include, for example, when a firm is asked to join an Audit Quality Center but represents it has given up those engagements.

.A19 Requests to extend due dates where there is no reason to believe the extension should not or would not be approved by the RAB include situations such as a request for a 30-day extension after being granted a 90-day extension because the managing partner has been in the hospital.

.A20 Firm and outside parties may utilize guidance in section 420, appendix A, "Guidance for Outside Parties Engaged to Assist Firms in Completing Corrective Actions and Implementation Plans," to assist in completing corrective actions and implementation plans.

.A21 "In all material respects" is a matter of professional judgment and is entity-specific based on size or nature, or both. Materiality is described as follows: Misstatements, including omissions, are material if there is substantial likelihood that, individually or in the aggregate, they would influence the judgment of a reasonable user made based on the financial statements.

.A22 More than one incident of noncompliance may still be considered isolated if the reviewer is able to conclude there is no systemic cause and such instances of noncompliance are insignificant to the reviewer's evaluation of the firm's system of quality control.

.A23 The board may appoint subcommittees and task forces to assist the board in carrying out its responsibilities. The work of the subcommittees and task forces is subject to review by the board. For example, the OTF may be delegated the responsibility to issue reviewer performance deficiency letters and the evaluation of reviewer removal recommendations.

.A24 Refer to section 430, *Reviewer Monitoring and Performance*, for examples of reviewer performance findings and deficiencies that may be communicated to the reviewer on a performance feedback form.

.A25 A performance deficiency letter can be issued for a pattern of reviewer performance findings, reviewer performance deficiencies, egregious reviewer performance, or significant failures to timely submit documents when there is no evidence of improvement after the suspension for timeliness is lifted.

.A26 The words used to describe the systemic cause are not indicative of whether it is a repeat finding, deficiency, or significant deficiency, and professional judgment will be used to conclude whether the systemic cause is repeated.

.A27 As an example, omitting the exact same disclosure in an engagement selected in the previous peer review and in an engagement selected in the current peer review would constitute a repeat finding or deficiency. Omitting one disclosure in an engagement selected in the previous peer review and omitting an entirely different disclosure in an engagement selected in the current peer review would not constitute a repeat finding or deficiency.

.A28 In the event of a scope limitation, a report with the applicable peer review rating (with a scope limitation) is issued.

.A29 The review captain should not expand the scope beyond the original selection of engagements in an effort to change the conclusion from a peer review rating of *fail*.

Complying With Relevant Requirements (Ref: par. .13–.14)

.A30 The board may, at its discretion, modify the standards and related guidance without an exposure period if the circumstances warrant such action. In these circumstances, the board will discuss such modifications during meetings open to the public and will communicate any recommended courses of action to firms, reviewers, and AEs on a timely basis.

Departure From a Relevant Requirement (Ref: par. .15)

.A31 The need for a user to depart from a relevant, presumptively mandatory requirement is expected to arise only when the requirement is for a specific procedure to be performed and, in that specific circumstance, the required procedure would be ineffective in achieving the objective.

Interpretive Peer Review Publications (Ref: par. .16)

.A32 Interpretive publications are not standards. Interpretive publications are recommendations on the application of the standards in specific circumstances. An interpretive publication is issued under the authority of the board only after all members of the board have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the standards. Examples of interpretive publications are application and other explanatory material, appendixes, and exhibits to the standards, which are included within these PR-C sections.

Other Peer Review Publications (Ref: par. .17)

.A33 Other peer review publications, such as reviewer alert articles, are nonauthoritative; however, they may help the user understand and apply the standards.

Confidentiality (Ref: par. .18–.19)

.A34 Information concerning the reviewed firm or any of its clients or personnel that is obtained through the review is confidential.

Ethical Requirements Relating to Peer Review (Ref: par. .20)

.A35 Ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive.

.A36 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include the following:

- a. Responsibilities
- b. The public interest
- c. Integrity
- d. Objectivity and independence
- e. Due care
- f. Scope and nature of services

.A37 In the case of a peer review, it is in the public interest and, therefore, required by this section that the reviewer and any other individuals who participate on the peer review be independent of the reviewed firm. The concept of independence refers to both independence in fact and independence in appearance. *Independence* encompasses an impartiality that recognizes an obligation for fairness not only to the reviewed firm but also to those who may use the peer review report. *Integrity* requires the reviewer to be honest and candid within the constraints of the reviewed firm's confidentiality. Service and the public trust should not be subordinated to personal gain and advantage. *Objectivity* is a state of mind and a quality that lends value to a reviewer's services. The principle of objectivity imposes the obligation to be impartial, intellectually honest, and free of conflicts of interest. Guidance on threats to independence is set forth in the AICPA's "Conceptual Framework for Independence" (ET sec. 1.210.010).

.A38 Due care, as addressed by the "Due Care" principle (ET sec. 0.300.060), requires all those involved in carrying out the review to fulfill assigned responsibilities in a professional manner.

Timing of Peer Reviews (Ref: par. .22–.33)

.A39 The following timeline provides an example of various steps in the peer review process.

.A40 Ordinarily, a peer review is performed within three to five months following the peer review year-end.

.A41 Ordinarily, the initial peer review year is the 12-month period after the report date of the initial engagement performed by the firm within the scope of the standards.

.A42 Organizations that may require a peer review include, but are not limited to, state boards of accountancy, the Government Accountability Office, and other regulators.

.A43 Ordinarily, a firm should maintain the same peer review year-end for subsequent reviews.

.A44 AEs will consider factors including, but not limited to, those described in paragraph .24 when a firm has requested a change in its peer review year. AEs will not approve a change in peer review year that would have a public interest concern, such as when a must-select engagement would be excluded from the scope of the peer review.

.A45 An AE will ordinarily approve a review due date extension of three months or less. If a firm's peer review is subject to oversight, the AE may approve an extension of up to six months.

Administration (Ref: par. .34–.35)

.A46 AEs approved by the board are authorized to establish dues or registration fees within their individual jurisdictions to fund the administration of the program.

.A47 Firms that are not required to have their review administered by the National PRC may choose to do so.

Peer Review Documentation and Retention Policy (Ref: par. .36–.40)

.A48 The AICPA or an AE may retain peer review documentation beyond the retention requirements if such documentation is needed to comply with peer review standards and guidance. For example, the peer review report may be retained in order to track the number of consecutive non-pass peer review reports a firm has received.

.A49 The AICPA may retain data derived from peer review documentation beyond the retention requirements to monitor trends in peer reviews, facilitate research, and otherwise promote quality in the accounting and auditing services provided by CPA firms. Any such data provided to others will exclude firm-identifying information (for example, firm name, location, and employer identification number) that could link the data back to a firm, firm's client, review, or reviewer. This data may be provided to parties outside of the AICPA only with the firm's consent. The AICPA will describe the nature of the data that may be shared and the reason behind the request when asking for consent from firms.

Oversight (Ref: par. .41–.42)

.A50 The objectives of oversight are to enhance quality in accounting and auditing by providing reasonable assurance of compliance with and consistent application of the standards throughout the program. The board may appoint other individuals or bodies to perform oversight at its discretion.

Individual Enrollment When a Firm Is Without CPA-Majority Ownership (Ref: par. .45–.47)

.A51 An individual enrolled in the program is provided fair procedures related to hearings and appeals established by the board equivalent to those provided to enrolled firms.

.A52 A firm or organization without CPA-majority ownership (a non-CPA-owned entity) would not be eligible to enroll in the program. The characteristics of such a firm are discussed in appendix B, "Council Resolution Concerning the Form of Organization and Name Rule," of the Code of Professional Conduct.

.A53 An individual enrolled in the program may choose to have a system review.

Associations of CPA Firms (Ref: par. .48–.53)

.A54 For purposes of this requirement, *professional services* include accounting, tax, personal financial planning, litigation support, and professional services for which standards are promulgated by bodies designated by AICPA Council.

.A55 Member firms may independently publicize their membership in the association. In addition, an association may respond to inquiries and prepare promotional materials that firms may use to obtain professional engagements on their own behalf.

.A56 The AIF contains questions regarding general information about the association, independence matters, and whether the association requests to be approved to assist its members in the formation of review teams, provide technical assistance to such review teams, or do both. The National PRC is currently designated by the board to consider all AIFs for approval, regardless of whether an association has any firms whose peer reviews are administered by the National PRC.

PR-C Section 200

General Principles and Responsibilities for Reviewers

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains general principles and responsibilities for reviewers. The requirements and guidance in this section supplement the requirements and guidance in section 100, *Concepts Common to All Peer Reviews*.

Effective Date

.02 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objective

.03 The objective of the reviewer is to perform a peer review in accordance with the Standards for Performing and Reporting on Peer Reviews (the standards) established by the Peer Review Board (the board) of the American Institute of Certified Public Accountants to enhance the effectiveness of and contribute to the quality of our profession.

Definitions

.04 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Reviewer Qualifications

.05 To qualify as a reviewer, CPAs should consider whether their day-to-day involvement in their firm's accounting and auditing practice is sufficiently comprehensive to enable them to perform a peer review with professional expertise. At a minimum, a reviewer should meet the following qualifications: (Ref: par. .A1)

- a. Be a member of the AICPA in good standing, licensed to practice as a CPA, and employed by or an owner of a firm enrolled in the program. (Ref: par. .A2)
- b. Be in public practice as a partner, manager, or person with equivalent responsibilities in the accounting or auditing practice or carrying out a quality control function in the CPA's firm. (Ref: par. .A3)

- c. Have current practice experience by performing or supervising accounting or auditing engagements in the CPA's firm or carrying out a quality control function in the firm, with reports dated within the last 18 months. (Ref: par. .A4)
- d. Have spent the last five years in the practice of public accounting in the accounting or auditing function.
- e. Be employed by or be the owner of a firm that has received a report with a peer review rating of *pass* or *pass with scope limitations* for its most recent peer review. (The report should have been accepted timely.) (Ref: par. .A5–.A6)
- f. Possess current knowledge of professional standards and experience related to the kind of practice and the industries of the engagements to be reviewed. (Ref: par. .A7)
- g. Obtain at least 48 hours of AICPA-required continuing professional education (CPE) every 3 years in subjects relating to accounting, auditing, and quality control with a minimum of 8 hours in any 1 year.
- h. Be free of restrictions from regulatory or governmental bodies on the CPA's ability to practice public accounting. (Ref: par. .A8)
- i. Provide qualifications and experience via a reviewer resume.

.06 Reviewers should not commence, continue to perform, or participate in a peer review if they do not possess all necessary qualifications, and should refrain from these activities until it has been determined they are qualified according to paragraph .05. (Ref: par. .A9–.A10 and .A24 of section 430)

.07 Reviewers should notify their administering entity (AE) or AICPA staff when they do not meet the qualifications in paragraph .05. If an AE or AICPA staff contact the reviewer to validate the reviewer's qualifications, the reviewer should respond to the communication within the specified time. (Ref: par. .A11)

.08 In order to be qualified as captain for a peer review of a firm whose review is required to be administered by the National Peer Review Committee (PRC), a captain should currently be employed by or be an owner of a firm whose most recent review was administered by the National PRC. (Ref: par. .A12–.A13)

Reviewer Allegations, Investigations, Limitations, or Restrictions

.09 Reviewers and reviewing firms should notify the relevant AE of communications from regulatory, monitoring, or enforcement bodies in the conduct of engagements in a firm's accounting and auditing practice performed by the reviewer. Notification should happen prior to being scheduled to perform a peer review or immediately, if already scheduled to perform a peer review. (Ref: par. .A14–.A15)

.10 Reviewers and reviewing firms should notify AICPA staff and all relevant AEs of any limitations or restrictions on the reviewer's or reviewing firm's ability to practice or perform peer reviews. Notification should happen prior to being scheduled to perform a peer review or immediately, if already scheduled to perform a peer review. (Ref: par. .A16–.A18)

.11 A reviewer does not meet the required qualifications described in paragraph .05 if the reviewer's ability to practice public accounting or perform peer reviews has been restricted by a regulatory, monitoring, or enforcement body, beginning on the date that the reviewer is notified of the restriction and ending on the date that the restriction has been removed.

.12 If a limited restriction is imposed on a reviewer, the extent of the limited restriction should determine whether the reviewer still meets the qualifications. (Ref: par. .A19)

Reviewer Resume

.13 Reviewer resumes should be updated at least annually to accurately reflect reviewer qualifications and experience. (Ref: par. .A20)

.14 The reviewer's resume should provide the following information for the AE to determine if the reviewer has current or recent experience by level of service, engagement, and industry: (Ref: par. .A21–.A22)

- a. Whether the reviewer was performing, supervising, or carrying out a quality control function
- b. The date of the last report for the engagement the reviewer was involved in
- c. The approximate number of engagements the reviewer was involved in
- d. Whether the reviewer currently meets relevant industry-specific educational requirements
- e. Whether experience was obtained from the reviewer's firm or another firm (Ref: par. .A23)

.15 The reviewer resume should communicate if the reviewer, the reviewer's firm, or a firm the reviewer has obtained industry experience from has received communications relating to allegations or investigations or has been restricted.

Ethical Requirements Relating to a Peer Review

.16 The reviewer must be independent from the reviewed firm. The reviewer's independence would be considered impaired in the following circumstances:

- a. A reviewer or a reviewer's firm participates in a reciprocal peer review. (Ref: par. .A24)
- b. A reviewer who owns securities or has an interest in a reviewed firm's client reviews an engagement of that client.
- c. A reviewer who was directly involved in the development, maintenance, or distribution of the reviewed firm's quality control materials; reports to those who were directly responsible for the development, maintenance, or distribution of the materials; or receives more than a *de minimus* amount of revenues or other monies generated by the sale of the materials, reviews an engagement performed and reported on using those materials.
- d. Fees for any products or services provided or shared between firms are material to any party to the peer review. (Ref: par. .A25)
- e. Products or services provided to or shared by the reviewed firm are an integral part of the reviewed firm's system of quality control. (Ref: par. .A26–.A27)
- f. The reviewing firm performed the monitoring of the reviewed firm's accounting and auditing practice or pre- or post-issuance reviews of engagements with periods ending during (or, for financial forecasts, projections, or agreed-upon procedures engagements, report dates in) the year immediately preceding or during the peer review year.

.17 The effect on independence of family and other relationships and the possible resulting loss of the appearance of independence should be considered when assigning reviewers to engagements.

.18 Reviewers have no responsibility to detect illegal acts that have either a direct or indirect effect on the firm's ability to practice public accounting. If a reviewer comes across an illegal act during a review, the reviewer should consult with AICPA staff and should consider consulting with an attorney.

Performing a Peer Review

.19 Before agreeing to perform a peer review, a reviewer should do the following:

- a. Obtain and consider information about the firm to be reviewed, including size, nature of practice, industry specializations, and levels of service. (Ref: par. .A28)
- b. Assess the reviewer's own capability and availability to perform the peer review.
- c. Consider the review due date to account for adequate time to assess appropriate responses. (Ref: par. .A29)
- d. Consider the need for additional reviewers with appropriate levels of expertise and experience to perform the review.
- e. Consider the need for individuals with expertise in specialized areas to assist in a consulting capacity. (Ref: par. .A30)

.20 Reviewers should not have contact with any client of the reviewed firm in connection with the peer review without prior approval of the firm and client.

Reviewed Firm Acquisition or Divestiture

.21 If a firm has had an acquisition of another practice or a portion thereof or a divestiture of a significant portion of its practice during or subsequent to its peer review year, the reviewer or the reviewed firm should consult with the AE and AICPA staff prior to the commencement of the review to consider the appropriate scope of the review or other actions that should be taken. (Ref: par. .A31)

Creating a Review Team

.22 A captain should assemble a review team of one or more individuals depending on the size and nature of the reviewed firm's practice and other factors.

.23 A captain should ensure that all team members possess the necessary qualifications and competencies to perform assigned responsibilities and that team members are adequately supervised.

.24 All members of the review team should be approved by the AE prior to the commencement of the peer review. (Ref: par. .A32)

Obtaining Written Representations

.25 The captain should request written representations from members of management of the firm whom the captain believes are responsible for and knowledgeable about, directly or through others in the firm, the matters covered in the representations, the firm, and its system of quality control. (Ref: par. .A33–.A34)

.26 The written representations should be in the form of a representation letter on firm letterhead, addressed to the captain, and signed by a member of

management, as described in paragraph .25, as of the date of the peer review report. (Ref: par. .A35)

.27 If a representation made by management is contradicted by other information obtained, the captain should investigate the circumstances and consider the reliability of the representations made and any effect on the report.

Reviewer's Performance and Cooperation

.28 The captain should do the following:

- a. Supervise, perform, and report on the review in accordance with the standards.
- b. Accept responsibility for the work of team members, including specialists. (Ref: par. .A36–.A37)
- c. Communicate the review results to the reviewed firm and to the AE.
- d. Ensure that peer review documentation is complete and submitted to the AE on a timely basis. (Ref: par. .A38)

.29 If a reviewer does not cooperate by performing the review in a timely and professional manner in accordance with the requirements of the standards, the AE or AICPA staff should communicate the failure to the reviewer, and it may result in a suspension or removal from the list of qualified peer reviewers. The reviewer should respond to the communication within the specified time. (Ref: par. .A39–.A40)

.30 Peer review documentation should be retained by the review team until 120 days after the peer review is completed.

Reviewer Performance Findings and Deficiencies

.31 A reviewer's performance is evaluated by the committee or Report Acceptance Body (RAB), AICPA staff, and the board. If a reviewer's work exhibits performance findings or deficiencies, the reviewer should correct areas of non-compliance that are identified by the committee or RAB on a reviewer performance feedback form. (Ref: par. .A41)

.32 If a reviewer notifies an AE that performance findings or deficiencies are present on reviews that the reviewer submitted, and those reviews have not yet been subject to technical review, the reviewer should make the appropriate corrections on those reviews. If the reviewer corrects the noncompliance, then the reviewer should not receive a reviewer performance feedback form.

.33 If a reviewer exhibits a pattern of performance findings or has more than one reviewer performance deficiency, the committee (or its designated body) or board should consider whether it is appropriate to issue a performance deficiency letter requiring the reviewer to complete one or more corrective actions. Those actions are applicable to the reviewer's participation in the performance of any peer review and, therefore, are recognized by all AEs. (Ref: par. .A42)

.34 The committee (or its designated body) or board that issued the performance deficiency letter will determine when a corrective action is no longer required. To assist the committee (or its designated body) or board in making this determination, the reviewer should provide evidence that supports the reviewer's remediation of the related performance deficiency for each corrective action to the AE or board. (Ref: par. .A43)

.35 If a reviewer fails to correct reviewer performance deficiencies after a corrective action has been required, refuses to cooperate with the committee

(or its designated body) or board (for example, by not signing the performance deficiency letter within 30 days), or has committed egregious acts in the performance of a peer review, the committee (or its designated body) should recommend to the board that the reviewer be prohibited from performing peer reviews in the future. (Ref: par. .A41 and .A44–.A45)

Reviewer Appeals

.36 A reviewer should provide a written appeal to the board, within 30 days of receipt of the communication, explaining why the reviewer believes the deficiencies, actions, or decisions are unwarranted if the reviewer disagrees with any of the following: (Ref: par. .A41)

- a. Performance deficiencies communicated on a performance deficiency letter
- b. Corrective actions required by the committee (or its designated body) or board
- c. Decisions related to being deemed ineligible to perform reviews
- d. Other actions imposed on the reviewer by the committee (or its designated body) or board

.37 The corrective actions imposed by the committee (or its designated body) or board should remain in effect on the reviewer during the appeals process and should remain in effect until the committee (or its designated body) or board concludes otherwise.

.38 If a reviewer's firm has experienced a natural disaster or other catastrophic event that directly affects its ability to comply with requirements of the standards, the reviewing firm should communicate this information to the reviewed firm and AE as soon as possible. Contacting the reviewed firm and the AE is especially important when the peer review has commenced but the reviewing firm has doubts about its ability to complete the review. In response to natural disasters and other catastrophic events, the board will evaluate the facts and circumstances and communicate recommended courses of action to AEs. Refer to section 430, *Reviewer Monitoring and Performance*, for factors that the AE will consider when determining the best course of action.

Application and Other Explanatory Material

Reviewer Qualifications (Ref: par. .05–.08)

.A1 In rare circumstances, an exception may be approved by the AICPA prior to commencement of the peer review. The request must be made in writing and should thoroughly explain why the exception should be approved.

.A2 CPA license mobility may not be recognized for peer review purposes in certain states. Therefore, the reviewing firm and reviewers may be required to obtain applicable licenses in the state licensing jurisdiction of the reviewed firm.

.A3 A manager or person with equivalent responsibilities is a professional employee of the firm who has either a continuing responsibility for the overall planning and supervision of engagements for specified clients or authority to determine that an engagement is complete subject to final partner approval, if required.

.A4 A reviewer who becomes employed by or an owner of a newly formed firm (or a firm that has not had a peer review) may continue to serve in the same

capacity as a reviewer during an 18-month transition period, as long as the reviewer meets the other requirements in paragraph .05. The transition period begins with the earlier of the date of disassociation from the previous firm or the date the reviewer becomes employed by or an owner of a new firm. After the 18-month transition period, the reviewer's current experience is dependent on the practice composition of the new firm. A reviewer employed by or owner of a firm without any engagements subject to peer review, even if actively pursuing or with a signed engagement letter, does not meet current practice experience.

.A5 The requirement of having received a report with a peer review rating of *pass* or *pass with scope limitations* for its most recent peer review, that was accepted timely, is applicable to any firm through which a reviewer receives the necessary qualifications.

.A6 The AE will determine if the report has been accepted timely.

.A7 Current knowledge may be obtained from on-the-job training, training courses, or a combination of the two.

.A8 If a restriction is imposed on the reviewer's firm, the Oversight Task Force (OTF) will determine the impact to the individual's ability to qualify as a reviewer.

.A9 When a reviewer does not meet the required qualifications, the reviewer may not participate in the performance of peer reviews or serve as a PRC or RAB member.

.A10 If a reviewer performed a peer review while ineligible, the PRC of the AE may decide to perform oversight at the reviewer's expense or consider other appropriate measures. If the review has already been accepted, the committee may consider recalling the previously accepted peer review documents. This could put the reviewed firm in jeopardy of its practice unit or firm license in states where the firm is licensed.

.A11 The specified time may be different based on the circumstances of the request. Refer to section 400, *General Principles and Administration Responsibilities*, for details related to an AE's ineligibility process.

.A12 If a firm elects, but is not required, to have its peer review administered by the National PRC, the captain does not have to be employed by or be an owner of a firm whose most recent review was administered by the National PRC.

.A13 For other requirements for a captain in a system review, see section 210, *General Principles and Responsibilities for Reviewers — System Reviews*, and for other requirements of a captain in an engagement review, see section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*.

Reviewer Allegations, Investigations, Limitations, or Restrictions (Ref: par. .09-.12)

.A14 The receipt of communications relating to allegations or investigations does not automatically mean that a reviewer is ineligible to perform reviews. However, there may be situations in which the nature, significance, or pervasiveness of the alleged deficiencies or an existing preponderance of evidence would necessitate more immediate action in order to address the public interest. The AE's PRC will consider whether any action or oversight is appropriate. This decision may be appealed by the reviewer to the AE's PRC.

.A15 If a reviewer fails to notify the relevant parties of communications of allegations or investigations, limitations or restrictions, or both, within the

specified timing, the board may consider whether actions are warranted given the specific circumstances. Such actions may include, but are not limited to, the following:

- a. Oversight at the reviewer's expense
- b. Permanent removal from the list of qualified reviewers
- c. Referral of any AICPA members to the AICPA's Professional Ethics Division for violating the AICPA Code of Professional Conduct

.A16 Limitations or restrictions may include, but are not limited to, the following:

- a. Constraint of scope or volume of accounting and auditing engagements
- b. Required periodic reporting to the regulatory body
- c. Pre-issuance reviews of engagements
- d. Additional peer review or professional education requirements

.A17 If the restriction has been placed on the reviewer's firm or one or more of its offices, then the OTF will consider and investigate the specific circumstances, including how the restriction relates to the firm's accounting and auditing practice and personnel, to determine whether any of the individuals associated with the firm may serve as reviewers.

.A18 The reviewer, reviewing firm, the AE, or AICPA staff may receive notification or knowledge of a limitation or restriction on a reviewer or reviewing firm when a review is in different stages (scheduling, commencement, field-work, acceptance, or completion, within the working paper retention period or not). In these circumstances, the board will consider various factors in determining whether the review should be rescheduled or oversighted, other additional procedures should be performed, or a new review should be performed.

.A19 The OTF will assess whether the reviewer is qualified to perform any peer reviews or if the reviewer is restricted from reviewing specific industries or engagements.

Reviewer Resume (Ref: par. .13-.15)

.A20 To accurately reflect reviewer qualifications and experience, reviewers may need to update their reviewer resumes more frequently than annually. Situations that may warrant more frequent updates include, but are not limited to, the following:

- a. The renewal timing of a reviewer's license
- b. Issuance of reports in new levels of service, engagements, or industries
- c. A change in firm that the reviewer is employed by or owner of
- d. Peer review continuing education courses taken

.A21 Current experience is performing, supervising, or carrying out a quality control function on an engagement with a report date within the last 18 months.

.A22 Recent experience is having performed, supervised, or carried out a quality control function on an engagement in the reviewer's firm within the last five years.

.A23 A reviewer with current experience in an industry through a firm other than the firm the reviewer is employed by or is an owner of may be qualified to review engagements in that industry. At a minimum, the services

performed for another firm should include a review of the financial statements and involvement in or review of the significant judgments and conclusions of the engagement team.

Ethical Requirements Relating to a Peer Review (Ref: par. .16–.18)

.A24 A firm may not perform a reciprocal peer review, that is, a review of the firm that performed its most recent review. The prohibition against reciprocal peer reviews also means that a reviewer may not serve on a review team carrying out a review of a firm whose personnel participated in the most recent review of that reviewer's firm.

.A25 Examples of products or services include, but are not limited to,

- a. consultation;
- b. expenses, office facilities, or personnel; and
- c. quality control materials.

.A26 To evaluate whether products or services provided or shared are an integral part of a firm's system of quality control, the reviewer and reviewed firm consider the following factors:

- a. The size of the affected portion of the practice (Ref: par. .A27)
- b. The risk associated with the affected portion of the practice (for example, must-select industries)
- c. The degree of the reviewed firm's reliance on the product or service provided or shared
- d. The significance of the product or service provided or shared

If the products or services provided or shared are quality control materials (QCM) that are an integral part of a firm's system of quality control, a QCM review under the Standards for Performing and Reporting on Peer Reviews¹ or an examination under the Statements on Standards for Attestation Engagements² could be an appropriate safeguard to offset a potential independence impairment. However, the effectiveness of this safeguard will depend on the facts and circumstances of each peer review.

.A27 The size of the affected portion of the practice may be assessed by industry, level of service, or engagement hours.

Performing a Peer Review (Ref: par. .19–.20)

.A28 Although a reviewer is testing compliance only with U.S. professional standards, the reviewer may inquire of the firm regarding the firm's understanding of professional guidance for reporting on statements for international use to assist in planning the review.

.A29 Conducting the review 3–5 months after the firm's peer review year-end ordinarily allows adequate time (30 days prior to the due date) for the assessment and submission of the peer review documents.

.A30 If required by the nature of the reviewed firm's practice, individuals with expertise in specialized areas may assist the review team in a consulting

¹ A quality control materials (QCM) review is only available under the Standards for Performing and Reporting on Peer Reviews, effective for peer reviews commencing before May 1, 2022.

² The Statements on Standards for Attestation Engagements are codified in the AT-C sections.

capacity. For example, computer specialists, statistical sampling specialists, actuaries, or experts in CPE may participate in certain segments of the review.

Reviewed Firm Acquisition or Divestiture (Ref: par. .21)

.A31 A divestiture of a portion of the practice of a reviewed firm during the year under review may have to be reported as a scope limitation if the review team is unable to assess compliance with the system of quality control for reports issued under the firm's name during that year.

Creating a Review Team (Ref: par. .22–.24)

.A32 Various factors, including the industries of the engagements of the firm, its size, whether or not the review is administered by the National PRC, and other factors related to the knowledge and experience of the members of the review team will be considered to determine if the team has the appropriate qualifications and capability to perform the review.

Obtaining Written Representations (Ref: par. .25–.27)

.A33 Written representations are necessary information that describe matters significant to the peer review to assist in the planning, performance of, and reporting on the peer review. The specific representations are detailed in section 310, *General Principles and Responsibilities for Firms — System Reviews*, and section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*, as applicable.

.A34 Members of management responsible for and knowledgeable about the required representations normally include the managing partner and partner in charge of the firm's system of quality control.

.A35 The representation letter is addressed to the captain because the captain is concerned with events occurring during the peer review period and through the date of the peer review report that may require an adjustment to the report or other peer review documents.

Reviewer's Performance and Cooperation (Ref: par. .28–.30)

.A36 The captain will furnish instructions to the specialist regarding the manner in which materials and other notes relating to the review are to be accumulated to facilitate summarization of the reviewer's findings and conclusions. The specialist may be required to be available for or participate in the exit conference.

.A37 A specialist meeting criteria established by the AICPA, which are located on the AICPA website, may be approved as part of the review team, therefore assuming the responsibilities of a review team member.

.A38 Complete and timely peer review documentation relates to the initial submission of the report and review materials and to the timely completion of any additional actions necessary to complete the review. Additional actions may include completing any omitted documentation of the work performed on the review and resolving questions raised by the committee or technical reviewer accepting the review or by the board and AICPA staff.

.A39 A reviewer may be suspended in the jurisdiction of the reviewer's local AE for failing to do any of the following (this list is not all-inclusive):

- a. Submit required peer review documents to the AE within the required specified time.

- b. Respond to or resolve issues identified by the technical reviewer, committee, or RAB within the specified time, including responding to requests for additional procedures such as the expansion of scope on the review.
- c. Revise the report and finding for further consideration (FFC) forms, if applicable, as requested by the committee or RAB.
- d. Respond to requests for documents (in addition to those originally required to be submitted) or requests to complete documents.
- e. Submit peer review documents and other information for oversight.
- f. Update or verify a reviewer resume, as required.

.A40 Failure to update or verify a reviewer resume may result in a national suspension. The reviewer may also be referred to the board for removal if the reviewer fails to submit documentation to support the experience reflected on the reviewer's resume.

Reviewer Performance Findings and Deficiencies (Ref: par. .31–.35)

.A41 If a committee recommends to the board that a reviewer be prohibited from performing peer reviews in the future or a reviewer appeals to the board in accordance with paragraph .36, the board will review and consider the recommendation or appeal in accordance with the "AICPA Peer Review Board Rules of Procedures for Reviewers,"³ which are located on the AICPA website.

.A42 Corrective actions may include, but are not limited to, the following:

- a. Oversight (at the reviewer's expense) until evidence of performance improves
- b. Consulting with the AE to discuss the planning and performance of the next review
- c. Submitting all reports and appropriate documentation on all outstanding peer reviews before scheduling or performing another review
- d. Having pre-issuance reviews of the report and peer review documentation on future peer reviews by an individual acceptable to the committee
- e. Taking specified types of and amounts of CPE or training, or passing the related AICPA advanced certificate exam
- f. Removing or revising one or more resume codes until appropriate proof of experience and knowledge have been provided to the satisfaction of the committee

.A43 Supporting evidence may include, but is not limited to, CPE certificates or documentation of performance improvement that includes a letter or report from an individual acceptable to the committee on the results of oversight or pre-issuance review of a peer review.

.A44 Depending on the facts and circumstances, egregious acts by a reviewer include, but are not limited to, the following:

- a. Signing false documents
- b. Failure to perform a peer review board directive resulting from a hearing or review panel in a timely and professional manner

³ "AICPA Peer Review Board Rules of Procedures for Reviewers" governs the adjudication of all matters that may lead to the removal of a reviewer from the national list of qualified reviewers or to the imposition of other sanctions by the board.

- c. Continuing to schedule or perform reviews after receipt of a required corrective action letter or settlement agreement from the AICPA Professional Ethics Division that indicates the reviewer is restricted from performing reviews
- d. Failure to notify an AE when there has been a restriction placed by a regulatory, monitoring, or enforcement body on the reviewer's ability to perform audit and attest engagements, and the reviewer continues to perform peer reviews
- e. Knowingly providing advice to a firm that is contradictory to the standards, such as informing the firm that it may distribute the peer review report prior to committee acceptance or omitting engagements from the scope of the review without the appropriate scope limitations or approvals in compliance with the guidance
- f. Use of confidential material obtained during the peer review to enhance the reviewer's own firm (such as a client listing)
- g. Failure to maintain qualifications or otherwise cooperate with the program (for example, not meeting licensure or regulatory requirements), leading the AE or firm to find another reviewer to complete the review and causing the firm harm

.A45 The board may appoint a hearing panel to consider whether a reviewer should be prohibited from performing peer reviews in the future without recommendation from a committee.

PR-C Section 210

General Principles and Responsibilities for Reviewers — System Reviews

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains performance and reporting requirements and application guidance for reviewers engaged to perform a system review. The requirements and guidance in this section supplement the requirements and guidance in section 100, *Concepts Common to All Peer Reviews*, and section 200, *General Principles and Responsibilities for Reviewers*. Additionally, reviewers should familiarize themselves with the firm requirements in section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*.

Effective Date

.02 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objectives

.03 The objectives of the reviewer, in conducting a system review, are to do the following:

- a. Obtain reasonable assurance that the reviewed firm's system of quality control for its accounting and auditing practice has been designed and complied with to provide the firm with reasonable assurance of performing or reporting in conformity with the requirements of applicable professional standards in all material respects.
- b. Report on the reviewed firm's system of quality control and communicate as required by the Standards for Performing and Reporting on Peer Reviews (the standards) established by the Peer Review Board (the board) of the American Institute of Certified Public Accountants, in accordance with the reviewer's conclusions.

Definitions

.04 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Reviewer Qualifications for Team Captains

.05 In addition to meeting the requirements in section 200, a team captain must be a partner and complete initial and ongoing peer review training that meets the requirements established by the board. (Ref: par. .A1)

Reviewer Qualifications for Must-Select and Must-Cover Engagements

.06 In addition to the qualifications discussed in section 200, a reviewer of must-select engagements should meet the following criteria:

- a. Have completed additional training focused on must-select engagements that meets the requirements of the board. (Ref: par. .A2)
- b. Be presently involved in one of the following areas in the must-select engagements in the reviewer's firm:
 - i. Supervising or performing engagements
 - ii. Performing engagement quality control reviews on engagements
 - iii. Performing the inspection of must-select engagements as part of the firm's monitoring process
- c. Be employed by or be an owner of a firm that is a member of the respective audit quality center, if applicable.

.07 The additional training requirements in paragraphs .05 and .06 should be completed within one year prior to the commencement of the review of a must-select engagement.

.08 For must-select and must-cover engagements, a reviewer should have experience in and knowledge about rules and regulations appropriate to the level of service applicable to the industries of the engagements the individual will be reviewing.

Planning

.09 The reviewer should perform planning procedures before selecting engagements for review.

.10 The reviewer should obtain the following from the reviewed firm:

- a. Information regarding each engagement in the firm's accounting and auditing practice with a period end date (report date for financial forecasts, financial projections, and agreed-upon procedures engagements) during the peer review year and issued by the commencement date to allow the reviewer to be able to identify
 - i. the level of service,
 - ii. the number of audit or accounting hours (actual, if available, or estimated),
 - iii. the engagement partner,
 - iv. the industry,
 - v. whether an engagement was an initial engagement,

- vi. the office (if applicable), and
- vii. whether an engagement was a must-select or must-cover engagement (if applicable) (Ref: par. .A22)
- b. A list of firm personnel (Ref: par. .A3)
- c. Responses to inquiries about the areas to be addressed in the written representations
- d. The firm's prior
 - i. peer review report,
 - ii. letter of response (if applicable),
 - iii. letter of acceptance,
 - iv. findings for further consideration (FFCs) (if applicable), and
 - v. representation letter
- e. The firm's quality control documentation (Ref: par. .A4)

Understanding the Firm's Accounting and Auditing Practice and System of Quality Control

.11 The reviewer should obtain an understanding of the firm's accounting and auditing practice and system of quality control with respect to each of the quality control elements in accordance with quality control standards established by the AICPA.

.12 The understanding obtained by the reviewer should include knowledge about

- a. the firm's organization,
- b. the composition of its accounting and auditing practice, and
- c. the design of the reviewed firm's quality control policies and procedures in accordance with quality control standards established by the AICPA.

.13 To obtain an understanding of the firm's accounting and auditing practice and system of quality control, the reviewer should do the following:

- a. Inquire of appropriate management and other personnel.
- b. Review the firm's internal policies and procedures.
- c. Review the firm's quality control documentation.
- d. Inquire of the firm regarding elements of the system of quality control residing outside of the firm. (Ref: par. .A5)
- e. Complete the applicable quality control checklists.

.14 When obtaining an understanding of the firm's system of quality control, the reviewer should evaluate the design of the firm's quality control policies and procedures in relation to the size and nature of the firm's accounting and auditing practice and determine if the system of quality control is appropriately comprehensive and suitably designed.

Understanding and Assessing Peer Review Risk

.15 The reviewer should use the understanding of the firm's accounting and auditing practice and system of quality control to assess inherent and control risks. The assessment of risk is qualitative and not quantitative.

.16 To assess inherent risk, the reviewer should consider the following:

- a. Circumstances arising within the firm (Ref: par. .A6 and .A8–.A9)

- b. Circumstances outside the firm that affect the firm's accounting and auditing clients (Ref: par. .A7)

.17 To assess control risk, the reviewer should consider the results of the team captain's assessment of the firm's design of and compliance with quality control standards established by the AICPA. (Ref: par. .A10)

.18 The reviewer should determine an acceptable level of detection risk based on the assessment of inherent and control risk. There is an inverse relationship between the level of detection risk and the level of inherent and control risk. (Ref: par. .A11)

.19 The reviewer should document the assessment of peer review risk, which includes inherent risk, control risk, and detection risk, to provide a basis for engagement selections and the extent of procedures performed. (Ref: par. .A12).

Engagement Selection

.20 To obtain reasonable assurance that the firm is complying with its quality control policies and procedures and applicable professional standards, the reviewer should review a reasonable cross section of the firm's accounting and auditing engagements, with greater emphasis on those portions of the practice with higher combined assessed levels of inherent and control risk. (Ref: par. .A13–.A14 and .A16)

.21 There is a relationship between a reasonable cross section of the firm's accounting and auditing practice and a risk-based approach to engagement selections. The reviewer should document in the risk assessment key decisions made when the engagement selections do not include

- a. a level of service,
- b. public interest industries, (Ref: par. .A15)
- c. an engagement type within an industry, or
- d. industries where the firm performs a high volume of engagements. (Ref: par. .A16)

.22 To support the reviewer's selection of a reasonable cross section of the firm's accounting and auditing practice, the reviewer should document in the risk assessment the reviewer's consideration of industries that are represented in the firm's "other audits" category.

.23 If a reviewer significantly reduces the scope of procedures to be performed due to reliance on the firm's monitoring procedures, the reviewer should inform the administering entity (AE) and AICPA staff during review planning and document the reviewer's procedures in the Summary Review Memorandum. (Ref: par. .A17–.A18)

.24 Engagements subject to selection for review should be those with periods ending during the year under review, except financial forecasts or projections and agreed-upon procedures engagements. For engagements without period ends, engagements with report dates during the year under review would be subject to selection. (Ref: par. .A19–.A20)

.25 If an engagement selection has not been issued and there is not another engagement that can mitigate the risks associated with that engagement, the reviewer should assist the firm in determining if (Ref: par. .A21–.A22)

- a. the firm should request an extension in writing from the AE or
- b. the peer review should be performed, and the report should include a scope limitation as described in paragraph .29.

.26 If a U.S. firm has offices in foreign countries or other "foreign jurisdictions," the reviewer should consider whether those engagements should be subject to selection for review. If a report is issued on letterhead of an office in a foreign jurisdiction, the engagement should not be subject to selection for review. If the reviewer is unable to conclude whether an engagement should be subject to selection, the reviewer should consult with AICPA staff.

.27 Specific engagements should be selected in a system review (must select). Appendix C, "Additional Requirements for Must-Select and Must-Cover Engagements," contains the engagements included in these designations. (Ref: par. .A23)

.28 To provide the firm assembly time, the reviewer should provide the selection of engagements to be reviewed to the reviewed firm in advance, but no more than two weeks before the reviewer plans to begin reviewing the engagements. (Ref: par. .A24)

Scope Limitations

.29 It is presumed that all engagements and elements of the firm's system of quality control are subject to the peer review. In the rare situations in which there are exclusions or other limitations on the scope of the peer review, the reviewer should contact the AE and do the following:

- a. Assess the reasonableness of the reasons for exclusions
- b. Assess the effect on peer review risk assessments and scope
- c. Consider whether alternate procedures can be performed
- d. Determine the effect on the peer review and on the ability of the team captain to issue a peer review report

.30 In the event of an exclusion, the reasons for the exclusion and the considerations detailed in paragraph .29 should be documented in the peer review working papers, which will be evaluated by the peer review committee as part of the peer review acceptance process.

Procedures Performed in Response to Assessment of Peer Review Risk

.31 To test the firm's compliance with its system of quality control and applicable professional standards, the reviewer should do the following:

- a. Review and evaluate the highest-risk areas on selected engagements, including accounting and auditing documentation, and reports. (Ref: par. .A25)
- b. Interview firm personnel at various levels to assess their understanding of, and compliance with, the firm's system of quality control.
- c. Review evidence to determine whether the firm has complied with its policies and procedures for each element of its system of quality control, which may include evidence since the previous peer review. (Ref: par. .A26)
- d. Review other evidence as appropriate. (Ref: par. .A27–.A28)

.32 The reviewer should determine if the firm and its personnel are in compliance with licensure requirements of the state boards of accountancy in the states in which the firm and its personnel practice for the peer review year through the date of the peer review report by verifying the following: (Ref: par. .A29)

- a. The *practice unit* license (firm license) in the state in which the practice unit is domiciled (that is, where the main office is located)
- b. A sample of individual (personnel) licenses in the states in which the individuals primarily practice public accounting

.33 If the reviewer deems it appropriate to test out-of-state licenses, the reviewer should expect the firm to provide documentation supporting its compliance with, or approach to, out-of-state licensing requirements. AICPA online CPA mobility provisions may be used to assist the reviewer in evaluating the firm's approach to firm and individual out-of-state licensing. (Ref: par. A30)

.34 If a firm does not possess the required applicable licenses to issue accounting and auditing engagements at any time during the peer review year through the date of the peer review report, the reviewer must document this as a finding on an FFC form.

.35 If an individual with reporting responsibility does not have a current individual license to practice public accounting as required by the relevant state boards of accountancy, the reviewer should consider the engagements reported on by that individual as not performed or reported on in conformity with applicable professional standards in all material respects (nonconforming).

Evaluation of Engagements

.36 The reviewer should evaluate each engagement selected for review. The evaluation should include the following:

- a. Consideration of the financial statements or information and the related accountants' reports
- b. Review of accounting and audit documentation required by the applicable professional standards
- c. Consideration of information related to the engagement obtained through the peer review, including but not limited to engagement profile information, representations made by the firm, and other inquiries

.37 When evaluating an audit engagement, the reviewer's procedures should include determining whether the reviewed firm has appropriately done the following: (Ref: par. A31)

- a. Identified the significant risk areas on each audit engagement selected for the peer review
- b. Performed the necessary audit procedures related to the identified significant risk areas
- c. Documented the auditing procedures performed in these significant risk areas

.38 For each engagement reviewed, the reviewer should use peer review checklists and questionnaires to determine whether

- a. the financial statements are fairly presented in accordance with generally accepted accounting principles (GAAP) in all material respects (or when applicable, with a special purpose framework) and
- b. the firm has performed and reported on the engagement in accordance with the requirements of the applicable professional standards in all material respects.

.39 The reviewer should promptly inform the firm when an engagement is not performed or reported on in conformity with applicable professional standards in all material respects (the engagement is nonconforming) and remind

the firm of its obligation under professional standards to take appropriate actions. (Ref: par. .A32)

.40 Team captains or AEs should not require firms to perform omitted procedures, reissue accounting or auditing reports, or have previously issued financial statements revised and reissued because those are decisions for the firm and its client to make. The team captain should provide information about risks in the firm's system of quality control (as identified through the review and testing of quality control policies and procedures).

.41 At a minimum, a nonconforming engagement should be documented as a matter on a matter for further consideration (MFC) form.

Expansion of Scope

.42 If the reviewer concludes that one or more engagements are nonconforming or there is a matter in one or more elements of the firm's system of quality control, the reviewer should document the consideration of whether the application of additional peer review procedures — an expansion of scope — is necessary. (Ref: par. .A33–.A34)

Identifying, Aggregating, and Evaluating Matters, Findings, Deficiencies, and Significant Deficiencies

Identifying Matters, Findings, Deficiencies, and Significant Deficiencies

.43 The reviewer should document a matter on an MFC form when the reviewer identifies one or more "no" answers to questions on peer review checklists that the reviewer concludes warrant further consideration in the evaluation of a firm's system of quality control. Matters of a similar nature or systemic cause should be documented on one MFC form.

.44 The reviewer should determine the relative importance of matters noted during the peer review, individually and in the aggregate. To determine if a matter should be elevated to a finding, deficiency, or significant deficiency, the reviewer should consider the matter's relative importance to the firm's system of quality control, taking into consideration the nature, systemic cause, pattern, or pervasiveness of it. (Ref: par. .A35–.A36)

Determination of the Systemic Cause

.45 The reviewer should discuss and determine in concurrence with the firm the systemic cause of matters identified. (Ref: par. .A37–.A40)

.46 If the firm underwent regulatory or governmental oversight or inspection, and similar issues were raised in both the regulatory or governmental oversight and in the peer review, the reviewer should further understand the systemic causes identified by the reviewed firm and consider whether there may be a systemic issue related to the design of or compliance with the system of quality control.

.47 If the firm's response during the discussion and determination of the systemic cause of a matter is that the matter resulted from an "oversight" or was "isolated," the reviewer should investigate further. Refer to paragraphs. .48–.49 under "Isolated Matters" for additional procedures the reviewer should perform.

Isolated Matters

.48 If a matter is identified as isolated, the reviewer should follow the guidance in the sections "Expansion of Scope" and "Determination of the Systemic Cause." The reviewer should evaluate the pervasiveness of the issue, including expanding the scope if necessary, to provide evidence that the noncompliance with the firm's system of quality control was truly isolated. Reviewers should focus on the systemic cause of the matter when analyzing whether it is isolated. (Ref: par. .A41–.A42)

.49 Reviewers should document their considerations regarding an isolated matter, including, at a minimum,

- a. the details of the matter noted;
- b. how the reviewer expanded scope, if applicable; and
- c. why the reviewer concluded the matter was isolated.

The documentation should provide enough information for the AE's peer review committee to determine whether the conclusion is appropriate. (Ref: par. .A43)

Aggregating and Evaluating Matters

.50 To conclude on the results of a peer review, the reviewer should aggregate the matters documented during the peer review and determine whether the matters were the result of the design of the reviewed firm's system of quality control or the failure of its personnel to comply with the firm's quality control policies and procedures.

.51 To determine the relative importance of matters, both individually and in the aggregate, to the firm's system of quality control, the reviewer should consider each matter's

- a. nature (characteristics),
- b. systemic cause (what went wrong with the firm's system of quality control),
- c. pattern (repeated), and
- d. pervasiveness (whether it is found throughout the firm's system of quality control).

When the firm has responded to matters, the team captain should consider if the response is appropriate and if the response indicates additional impacts to the peer review conclusions. Additionally, the reviewer should evaluate each matter in the context of the firm's size, organizational structure, and the nature of its practice. The relative importance of peer review matters to the firm's system of quality control will determine the impact to the peer review conclusions. In rare circumstances in which it is not practicable to identify the systemic cause, the team captain should document the reason or reasons as part of the Summary Review Memorandum and on the related MFC form. (Ref: par. .A44–.A48)

.52 The reviewer should consider the interrelationships among the elements of quality control and weigh the matters against compensating policies and procedures to determine the impact to the peer review conclusions.

.53 The reviewer should document a finding on an FFC form when the reviewer concludes that one or more related matters result from a condition in the reviewed firm's system of quality control or compliance with it such that there is more than a remote possibility that the reviewed firm would not

perform or report in conformity with the requirements of applicable professional standards. Documentation of a finding should include the following:

- a. A description of the finding
- b. Reference to the applicable requirements of the Statements on Quality Control Standards
- c. The scenario that led to the finding
- d. Reference to nonconforming engagements as a result of the finding, if applicable

.54 The team captain should document a deficiency in the report when the reviewer has concluded the firm would not have reasonable assurance of performing or reporting in conformity with the requirements of applicable professional standards in one or more important respects due to the relative importance of the matter to the reviewed firm's system of quality control or compliance with it, taking into consideration the nature, systemic causes, pattern, or pervasiveness of the matter.

.55 The team captain should document a significant deficiency in the report when the captain has concluded the reviewed firm's system of quality control does not provide the reviewed firm with reasonable assurance of performing or reporting in conformity with applicable professional standards in all material respects due to the relative importance of the matter to the reviewed firm's system of quality control or compliance with it, taking into consideration the nature, systemic causes, pattern, or pervasiveness of the matter.

.56 The team captain should complete a disposition of matters for further consideration (DMFC) for all MFCs, indicating whether each MFC was

- a. discussed with the firm and deemed resolved or considered insignificant,
- b. included on a specific FFC form (individually or combined with other MFCs), or
- c. included as a deficiency or significant deficiency (individually or combined with other MFCs) in a report with a peer review rating of *pass with deficiencies* or *fail*, respectively.

Repeat Findings, Deficiencies, and Significant Deficiencies

.57 When the same systemic cause identified in the prior review is also identified in the current review, the reviewer should determine if a repeat finding, deficiency, or significant deficiency exists. To make this determination, the reviewer should review the results of the reviewer's planning procedures to determine if the firm implemented the planned actions documented in the prior review's FFC forms or letter of response, as applicable. If the actions were implemented, the reviewer should

- a. consider whether the actions taken were appropriate to remediate the weakness in the firm's system of quality control, and
- b. reconsider whether the same weakness from the prior review is causing the current finding, deficiency, or significant deficiency.

.58 If a repeat finding, deficiency, or significant deficiency is identified, it should be documented as such in the FFC form or report, as applicable. (Ref: par. .A27 of section 100)

Communication Requirements for Closing Meeting and Exit Conference

Closing Meeting Communication Requirements

.59 Prior to issuing the report or finalizing MFCs and FFCs, if applicable, the team captain should communicate the conclusions to the firm at a closing meeting. The team captain should discuss the following during the closing meeting: (Ref: par. .A49–.A50)

- a. Preliminary peer review results, including any matters, findings, deficiencies, or significant deficiencies, and the expected report rating if determinable at this point
- b. The firm's requirement to respond to the MFCs, FFCs, or deficiencies or significant deficiencies included in the peer review report
- c. The firm's required written representations
- d. Other suggestions and observations for the firm to consider (Ref: par. .A51)

.60 The closing meeting should be held within a reasonable time frame before the firm's due date to allow enough time for the firm to determine appropriate remediation with respect to findings, deficiencies, and significant deficiencies, if applicable. (Ref: par. .A52)

.61 The team captain should consider the need to have the team members participate or be available for consultation (in person or via teleconference) during the closing meeting or exit conference, especially when, in unusual circumstances, the team captain does not have the experience to review the industry of an engagement that was reviewed by a team member. (Ref: par. .A53)

Exit Conference Communication Requirements

.62 The team captain should review and evaluate the responses on the FFC forms and letter of response prior to the exit conference. The team captain should consider the following: (Ref: par. .A54–.A55)

- a. The firm's response should include
 - i. the firm's actions taken or planned to remediate the findings or deficiencies in the firm's system of quality control and nonconforming engagements, if applicable,
 - ii. timing of the remediation, and
 - iii. additional procedures to ensure the finding or deficiency is not repeated in the future.
- b. The action should be feasible, genuine, and comprehensive.
- c. If the firm has taken action, the reviewer should review documentation of actions taken and consider whether the action is appropriate. (Ref: par. .A56)

.63 After the firm has responded to the MFCs, FFCs, and deficiencies or significant deficiencies in the report and the team captain has assessed whether the responses are appropriate and has considered any additional impact to the peer review results, the team captain should communicate the results to the firm at an exit conference. The team captain should discuss the following during the exit conference:

- a. The peer review results to be submitted to the AE, including any changes to the information communicated at the closing meeting

after consideration of the firm's responses to MFCs, FFCs, and deficiencies and significant deficiencies in the report

- b. The appropriateness of the firm's response
- c. The firm's representation letter
- d. Potential implications of the peer review acceptance process and the impact to the acceptance and completion of the peer review and to the reviewed firm's enrollment in the program, including, but not limited to, the following:
 - i. Corrective actions for deficiencies and significant deficiencies and implementation plans for findings, if applicable
 - ii. Recommended report rating changes
 - iii. Oversight
- e. Peer review noncooperation implications of consecutive non-pass report ratings, if applicable

Written Representations

.64 The team captain should request management of the firm to provide written representations for the peer review year that are dated as of the date of the peer review report stating the following: (Ref: par. A57)

- a. Management has fulfilled its responsibility for the design of and compliance with a system of quality control for our accounting and auditing practice that provides us with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.
- b. Management acknowledges its responsibility for complying with the rules and regulations of state boards of accountancy and other regulations.
- c. Management has disclosed to the team captain all known instances of noncompliance or suspected noncompliance with the rules and regulations of state boards of accountancy or other regulatory bodies, including applicable firm and individual licensing requirements in each state in which the firm practices for the year under review. If there are known instances of noncompliance, management should summarize the instances and, if applicable, describe the remediation of the noncompliance.
- d. Management has discussed significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the team captain, if applicable.
- e. Management has fulfilled its responsibility to remediate nonconforming engagements as stated by the firm on the [*MFC form, FFC form, or letter of response*], if applicable.
- f. Management understands the intended uses and limitations of the quality control materials it has developed or adopted. Management has tailored and augmented the materials as appropriate such that the quality control materials encompass guidance that is sufficient to assist it in conforming with professional standards (including the Statements on Quality Control Standards) applicable to its accounting and auditing practice.
- g. Management has responded fully and truthfully to the team captain's inquiries.

- h.* Management has provided the team captain with all relevant information, which included
 - i.* all engagements with periods ending during (or, for financial forecasts or projections and agreed-upon procedures engagements, report dates in) the year under review and
 - ii.* all must-select engagements, as applicable.
- i.* Management has disclosed to the team captain if the firm performed must-select engagements for the period covered by the peer review, and, if so, at least one of each type of must-select engagement that was performed was selected and reviewed by the peer reviewer.
- j.* Management acknowledges that failure to properly include these engagements on the list could be deemed as failure to cooperate and may result in termination from the Peer Review Program and, if termination occurs, may result in an investigation of a possible violation by the appropriate regulatory, monitoring, or enforcement body.
- k.* Management has provided the team captain communications or summaries of communications from regulatory, monitoring, or enforcement bodies relating to allegations or investigations of deficiencies in the conduct of an accounting, audit, or attestation engagement performed and reported on by the firm, whether the matter relates to the firm or its personnel, within three years preceding the current peer review year-end.
- l.* Management has either disclosed that there are no known limitations or restrictions on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end, or management has included a summary of the limitations or restrictions on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end.

.65 If a firm fails to discuss significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the team captain, the team captain should immediately consult with the AE because this constitutes a failure to cooperate, and the firm would be subject to fair procedures that could result in the firm's enrollment in the program being terminated. (Ref: par. .A58)

.66 If, in addition to the representations required by paragraph .64, the team captain determines that it is necessary to obtain other representations based on the circumstances and nature of the peer review, the team captain should request such other written representations.

Reporting on System Reviews

.67 To determine the report rating, the team captain should use professional judgment and consider the understanding of the firm's system of quality control and the nature, systemic causes, pattern, and pervasiveness of matters and their relative importance to the firm's system of quality control taken as a whole, including limitations on the scope of the review. (Ref: par. .A59–.A62)

.68 The written report in a system review should (Ref: par. .A63)

- a.* be dated as of the exit conference date.

- b. be issued on letterhead of the firm performing the review.¹
- c. state at the top of the report the title "Report on the Firm's System of Quality Control."
- d. include headings for each of the following sections:
 - i. Firm's Responsibility
 - ii. Peer Reviewer's Responsibility
 - iii. Required Selections and Considerations
 - iv. Deficiency(ies) or Significant Deficiency(ies) Identified in the Firm's System of Quality Control (if applicable)
 - v. Scope Limitation (if applicable)
 - vi. Opinion
- e. state that the system of quality control for the accounting and auditing practice of the firm was reviewed and include the year-end covered by the peer review.
- f. state that the peer review was conducted in accordance with the standards.
- g. state that a summary of the nature, objectives, scope, limitations of, and procedures performed in a system review, as described in the standards, can be found on the AICPA website where the standards are summarized.
- h. include a URL reference to the AICPA website where the standards are located, and state that the summary includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.
- i. state that the firm is responsible for designing and complying with a system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with the requirements of applicable professional standards in all material respects and for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with the requirements of applicable professional standards, where appropriate, and for remediating weaknesses in its system of quality control, if any.
- j. state that the reviewer's responsibility is to express an opinion on the design of and compliance with the firm's system of quality control based on the review.
- k. identify engagements that are required to be selected and indicate whether single or multiple engagements (for example, an audit versus audits) were reviewed, when applicable.
- l. state that reviews by regulatory entities, as communicated by the firm, if applicable, were considered in determining the nature and extent of procedures.
- m. in the event of a scope limitation, include an additional paragraph before the opinion paragraph that describes the relationship of the excluded engagements or elements of the firm's system of quality control to the firm's practice as a whole, the highest level

¹ A report by a reviewer formed by an association of CPA firms should be issued on the letterhead of the firm of the team captain performing the review.

of service and industry concentration, if any, of the engagements excluded from potential selection, and the effect of the exclusion on the scope and results of the peer review. The reviewer should tailor the opinion, as appropriate, to address the scope limitation.

- n. identify the different peer review ratings that the firm could receive.
- o. in a report with a peer review rating of *pass*,
 - i. express an opinion that the system of quality control for the accounting and auditing practice of the reviewed firm in effect for the year ended has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.
 - ii. state that the firm has received a peer review rating of *pass*.
- p. in a report with a peer review rating of *pass with deficiencies*, (Ref: par. A64)
 - i. express an opinion that, except for the deficiencies previously described, the system of quality control for the accounting and auditing practice of the reviewed firm in effect for the year ended has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.
 - ii. state that the firm has received a peer review rating of *pass with deficiencies*.
- q. in a report with a peer review rating of *fail*,
 - i. express an opinion that, as a result of the significant deficiencies previously described, the system of quality control for the accounting and auditing practice of the reviewed firm in effect for the year ended was not suitably designed or complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.
 - ii. state the firm has received a peer review rating of *fail*.
- r. in a report with a peer review rating of *pass with deficiencies* or *fail*,
 - i. have numbered deficiencies or significant deficiencies that include
 - (1) a description,
 - (2) reference to the applicable requirements of the Statements on Quality Control Standards,
 - (3) the scenario that led to the deficiency or significant deficiency, and
 - (4) reference to nonconforming engagements as a result of the deficiency or significant deficiency, if applicable.
 - ii. if there are repeat deficiencies or significant deficiencies, state that the deficiency or significant deficiency was noted

in the firm's previous peer review. This should be determined based on the systemic cause of the deficiencies or significant deficiencies. (Ref: par. .A65)

- iii. identify the level of service for any deficiencies or significant deficiencies.
- iv. identify the applicable industry if a deficiency or significant deficiency is industry specific.
- v. identify any must-select engagement types in which non-conforming engagements were noted as a result of a deficiency or significant deficiency.

.69 If a firm that is not required to have a system review elects to have one in accordance with paragraph .A1 of section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*, the peer review report should be modified to include the following sentence: "[Firm name] has represented to us that the firm did not perform engagements that would require a system review."

Submission of Peer Review Documentation to the AE by the Team Captain

.70 Within 30 days of the exit conference date or by the firm's peer review due date, whichever date is earlier, the team captain should complete electronically and submit to the AE, as applicable, the following documents: (Ref: par. .A66)

- a. Report and letter of response, if applicable
- b. Summary Review Memorandum
- c. FFC forms, if applicable
- d. MFC forms, if applicable
- e. DMFC, if applicable
- f. Firm's representation letter
- g. Engagement profiles and supplemental checklists for reviews of engagements subject to the Single Audit Act and the Uniform Guidance, if applicable
- h. Explanation of "no" answers for quality control checklists

.71 For all reviews administered by the National Peer Review Committee, the team captain should submit the following documents in addition to those required by paragraph .70, as applicable: (Ref: par. .A66)

- a. All documents required to be submitted for system reviews
- b. Engagement questionnaires or checklists
- c. Quality control documents and related practice aids
- d. Staff and focus group interview forms
- e. Planning documents
- f. Any other documents considered relevant by the team captain

Application and Other Explanatory Material

Reviewer Qualifications for Team Captains (Ref: par. .05)

.A1 Peer review training courses designed to meet the requirement are located on the Peer Review page of the AICPA website.

Reviewer Qualifications for Must-Select and Must-Cover Engagements (Ref: par. .06–.08)

.A2 The must-select additional training courses designed to meet the requirement are described on the Peer Review page of the AICPA website.

Planning (Ref: par. .09–.10)

.A3 The personnel list assists reviewers in performing their risk assessment procedures. The reviewer may request that the list include

- a. name,
- b. position, and
- c. years of experience
 - i. with the firm and
 - ii. in total.

.A4 Quality control documentation will likely include the firm's quality control document, evidence of the performance of the firm's monitoring procedures, and CPE documentation, among other documents.

Understanding the Firm's Accounting and Auditing Practice and System of Quality Control (Ref: par. .11–.14)

.A5 Examples of elements that could reside outside of the firm include, but are not limited to, membership in associations, joint ventures, non-CPA-owned entities, alternative practice structures, arrangements with outside consultants, third-party quality control materials, or CPE.

Understanding and Assessing Peer Review Risk (Ref: par. .15–.19)

.A6 Circumstances within the firm may include the following:

- a. The relationship of the firm's audit hours to total accounting and auditing hours
- b. The size of the firm's major engagements relative to the firm's practice as a whole
- c. Initial engagements and their impact on the firm's practice
- d. The industries in which the firm's clients operate, especially the firm's industry concentrations
- e. The results of the prior peer review
- f. The actions of the firm in response to the prior report and FFC forms
- g. The results of any regulatory or governmental oversight or inspection procedures (Ref: par. .A8)
- h. The risk level of the engagements performed (Ref: par. .A9)
- i. The extent of nonaudit services
- j. Significant changes in the firm's practice

.A7 Circumstances outside the firm may include the following:

- a. New professional standards or those being applied initially for one or more clients
- b. Changes in regulatory requirements
- c. Adverse economic developments in an industry in which one or more of the firm's clients operate
- d. Significant developments in the client's organization

.A8 Regulatory or governmental oversight agencies may include, but are not limited to, the Department of Labor or the Department of Health and Human Services. Refer to the guidance in appendix A, "Consideration of the Results of Regulatory Oversight or Inspections in the Planning and Performance of a Peer Review."

.A9 Examples of higher-risk engagements include, but are not limited to, audits of employee benefit plans, entities subject to the Single Audit Act, entities subject to SEC complex independence requirements, and others with high-risk features or complex accounting or auditing applications.

.A10 Control risk factors may include, but are not limited to, the team captain's evaluation of the firm's policies and procedures related to the following:

- a. CPE
- b. The firm's professional library
- c. Engagement acceptance
- d. Engagement review and supervision
- e. Engagement quality control review (EQCR)
- f. Monitoring processes
- g. Recruitment and hiring
- h. Monitoring independence
- i. Timely completion of the assembly of final engagement files by engagement teams

.A11 The lower the inherent and control risk, the higher the tolerable detection risk, and vice versa.

.A12 The assessed levels of risk are the key considerations in deciding the number and types of engagements to review and, where necessary, offices to visit. Through the assessment of risk, the reviewer determines the coverage of the firm's accounting and auditing practice that will result in an acceptably low peer review risk.

Engagement Selection (Ref: par. .20–.28)

.A13 Risk factors that may influence a reviewer's decision to select engagements include, but are not limited to, the following:

- a. Engagement size, in terms of the hours required to plan and perform the engagement
- b. Engagements involving experienced personnel hired from other firms and partners who also have office, regional, or firm-wide management, administrative, or functional responsibilities
- c. Engagements in which work on segments has been referred to other firms, foreign offices, domestic or foreign affiliates, or correspondents

- d. Engagements in which one or more affiliated entities (for example, parent companies and subsidiaries or brother and sister companies) constitute a large portion of the firm's overall clientele
- e. Engagements identified in the firm's quality control system or guidance material as having a high degree of risk
- f. Engagements in which departures from professional standards and failure to comply with the firm's quality control policies and procedures were noted in the preceding year's monitoring procedures
- g. Engagements in industries where the firm has experienced high instances of litigation, proceedings, or investigations

.A14 Risk factors that may influence a reviewer's decision to visit or select engagements from a particular office include, but are not limited to, the following:

- a. The number, size, and geographic distribution of offices
- b. The degree of centralization of accounting and auditing practice control and supervision
- c. The reviewer's evaluation, if applicable, of the firm's monitoring procedures
- d. Recently merged or recently opened offices
- e. The significance of industry concentrations and of specialty engagements, such as governmental compliance audits or regulated industries, to the firm and to individual offices
- f. Extent of nonaudit services to audit clients

.A15 Public interest industries are those that benefit the general welfare of the public, such as those that have recent regulatory and legislative developments. Public interest industries will vary across firms.

.A16 In response to the reviewer's assessed levels of risk and to obtain a reasonable cross section of the firm's accounting and auditing practice, it may be more appropriate for the engagement selection to include more than one engagement from a particular industry or engagement type (including must-select engagements).

.A17 The reviewer may determine that the firm's current year's internal monitoring procedures could enable the reviewer to reduce, in a cost-beneficial manner, the extent of the peer review procedures. Refer to the guidance in appendix B, "Considering the Firm's Monitoring Procedures to Reduce a Reviewer's Testing Procedures."

.A18 Staff may recommend that a panel from the board or its task forces review a firm's internal inspection or peer review planning in advance. In addition, a firm or peer reviewer may request that the AE review the internal inspection or peer review planning in advance.

.A19 If an engagement from the peer review year has not yet been issued, and a comparable engagement issued within the peer review year is not available, the prior year's engagement may be reviewed.

.A20 If an engagement from the peer review year and the subsequent year's engagement have been issued, the reviewer may select the more recently issued engagement based on the reviewer's assessment of peer review risk factors including, but not limited to, the following:

- a. Whether the engagement was performed during the peer review year

- b. The number of subsequent engagements available and selected for review
- c. Significant changes in the applicable professional standards
- d. The differences in issues identified in the engagements

.A21 Examples of when a firm may request an extension, or a scope limitation may be reflected in its peer review report, include, but are not limited to, the following:

- a. A firm performing its first must-select engagement with a period end during the peer review year that has not been issued prior to the commencement of the review
- b. A firm performing an initial engagement for a client and there are no other initial engagements that have been issued during the peer review year, nor are there any for the prior period

.A22 Failure of the firm or reviewer to consider a complete population of engagements may be considered not cooperating with the program, which may result in the recall of peer review acceptance if an omission is subsequently discovered.

.A23 At least one from each must-select engagement should be reviewed according to paragraph .27. A must-cover engagement is not required to be reviewed but should be considered in the reviewer's peer review risk assessment. A member of the review team should have at least recent experience in the must-select and must-cover engagements performed by the reviewed firm.

.A24 The reviewer may request that the firm provide access to one of the reviewer's selections (a surprise engagement) as soon as practical. The selection is ordinarily an audit engagement.

Procedures Performed in Response to Assessment of Peer Review Risk (Ref: par. .31–.35)

.A25 Factors to consider in determining the highest-risk audit areas include the following:

- a. The highest-risk audit areas in the client's industry (for example, revenue recognition for construction companies; inventory and accounts receivable for manufacturing and retail concerns; policy reserves for insurance companies; or loan loss allowances for financial institutions)
- b. The highest-risk audit areas noted during the review of the financial statements and discussions with engagement personnel (for example, review of loan defaults or follow-up of litigation matters)
- c. The highest-risk audit areas identified by the firm in planning or conducting the engagement, including those areas identified in the engagement profile
- d. Recent accounting and auditing developments and pronouncements
- e. Weaknesses noted in other engagements reviewed
- f. Weaknesses noted by the firm through its monitoring procedures

.A26 If no events relative to an element of a firm's system of quality control occurred during the peer review year, it may be necessary for a team captain to review evidence from prior to the peer review year. For example, if there were no instances of accepting new clients in the peer review year, it is appropriate

to test compliance in prior years, assuming the design of the policies and procedures is the same. Another example would be when the team captain reviews the monitoring and inspection results from the intervening periods to determine appropriate design and compliance of monitoring procedures. Looking at the intervening periods allows the team captain to evaluate whether the firm is properly communicating and remediating engagement and systemic issues identified.

.A27 Examples of other evidence include, but are not limited to,

- a. selected administrative or personnel files,
- b. correspondence files documenting consultations on technical or ethical questions,
- c. files evidencing compliance with human resource requirements, and
- d. the firm's technical reference sources.

.A28 A firm may have requirements embedded in its quality control policies and procedures that do not directly contribute to the firm's compliance with the quality control standards established by the AICPA. For example, voluntary membership requirements that do not directly contribute to the firm's compliance would not be tested, addressed, or reported on in the peer review process.

.A29 Acceptable documentation includes an original or copy of the license, print-out from an online license-verification system, correspondence from the licensing authority, or other reasonable alternative documentation. The reviewer's judgment may be needed to determine what alternative documentation is reasonable.

.A30 A reviewer may verify an out-of-state practice unit license or an out-of-state individual license on an individual engagement basis, when that engagement is selected for review and was performed by the reviewed firm in another state requiring a firm or individual license. The decision to perform further testing is based on the reviewer's understanding of the firm's quality control procedures related to licensing and the related risk of noncompliance.

Evaluation of Engagements (Ref: par. .36–.41)

.A31 Audit engagement areas where risk may be significant include, but are not limited to, fraud considerations, use of estimates, emerging issues, and assertions that are difficult to audit.

.A32 Although it is ultimately the firm's responsibility, the team captain and firm may collaborate to determine the remediation.

Expansion of Scope (Ref: par. .42)

.A33 An expansion of scope may include the review of all or relevant portions of one or more engagements. Additional engagements may be

- a. in the same industry,
- b. supervised by the same individual, or
- c. have characteristics associated with the failure to perform or report in conformity with applicable professional standards.

.A34 An expansion of scope may be necessary to determine

- a. the pattern and pervasiveness of matters identified,
- b. the systemic cause of a matter,

- c. if a matter is isolated, or
- d. if a matter should be elevated to a finding, deficiency, or significant deficiency.

Identifying, Aggregating, and Evaluating Matters, Findings, Deficiencies, and Significant Deficiencies

Identifying Matters, Findings, Deficiencies, and Significant Deficiencies ***(Ref: par. .43–.44)***

.A35 Exhibit A shows a broad understanding of the peer review process, from the evaluation of the design of the system of quality control, to the tests of compliance, to the determination of a matter, finding, deficiency, or significant deficiency. It also illustrates the aggregation of these items, their documentation, and their potential impact to the report rating.

.A36 One or more matters may be elevated to a finding, deficiency, or significant deficiency.

Determination of the Systemic Cause (Ref: par. .45–.47)

.A37 Matters may be symptoms of weaknesses in the firm's system of quality control.

.A38 The "no" answers identified when completing peer review checklists for the review and testing of quality control policies and procedures are a helpful resource for reviewers to assess the systemic cause.

.A39 Separate matters that are exactly the same may result from different weaknesses in the firm's system of quality control. Likewise, separate matters that are different may result from the same weakness in the firm's system of quality control.

.A40 The following are some examples of systemic causes that could affect the peer review report rating. The examples cover a broad range of conditions that may not be relevant to every peer review and are not a complete list.

- a. The failure related to a specialized industry practice, and the firm had no experience in that industry and made no attempt to acquire training in the industry or to obtain appropriate consultation and assistance.
- b. The failure related to an issue covered by a recent professional pronouncement, and the firm had failed to identify, through professional development programs or appropriate supervision, the relevance of that pronouncement to its practice.
- c. The failure may have been detected if the firm's quality control policies and procedures had been followed.
- d. The failure may have been detected by the application of quality control policies and procedures commonly found in firms similar in size or nature of practice. That judgment can often be made by the reviewer based on personal experience or knowledge; in some cases, the reviewer will wish to consult with the AE before reaching such a conclusion.

Isolated Matters (Ref: par. .48–.49)

.A41 The reviewer's ability to conclude that a matter is isolated may be dependent on the reviewer's ability to expand the scope to engagements or elements that are classified by common characteristics such as, but not limited to, the industry, level of service, the practitioners in charge, or must-select engagements.

.A42 A matter is not isolated if there is only one instance available for the reviewer to evaluate. For example, if the matter relates to noncompliance with professional standards regarding employee benefit plans and the firm performs only one employee benefit plan engagement, then the matter would not be considered isolated.

.A43 Considerations of an isolated matter may be documented in the related MFC form, DMFC form, or Summary Review Memorandum.

Aggregating and Evaluating Matters (ref: par. .50–.56)

.A44 The more direct the relationship between a specific quality control policy and procedure and the application of professional standards, the greater the probability that the firm may not perform or report in conformity with applicable professional standards in all material respects when that policy or procedure is not complied with.

.A45 An isolated matter or instance of noncompliance with the firm's system of quality control may be elevated to a finding, deficiency, or significant deficiency when evaluated with the review's other matters (in the aggregate). For example, a single disclosure matter and a single documentation matter may be isolated when taken individually, but they may have resulted from the same systemic cause, or an isolated matter may be materially significant in amount or nature, or both.

.A46 There may be circumstances in which the reviewer identifies few findings in the work performed by the firm but may conclude that the firm's system of quality control would not be effective if complied with. For example, a firm that is growing rapidly and adding personnel and clients may not be giving appropriate attention to the policies and procedures necessary in areas such as human resources (hiring, assigning personnel to engagements, and advancement) and acceptance and continuance of clients and engagements. A reviewer may conclude that these conditions could create a situation in which the firm would not have reasonable assurance of performing or reporting in conformity with applicable professional standards in one or more important respects and may result in a deficiency or significant deficiency in a report with a peer review rating of *pass with deficiencies* or *fail*.

.A47 Variances in individual performance and professional interpretation may affect the degree of compliance with a firm's system of quality control. However, the degree of compliance with the firm's quality control policies and procedures needs to be adequate to provide the reviewed firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

.A48 A design or compliance matter, by itself, may result in a peer review rating of *pass with deficiencies* or *fail* when one or more conditions are present in the firm's system of quality control and the reviewer has concluded that the conditions could create a situation in which the firm would not have reasonable assurance of performing or reporting in conformity with applicable professional standards in one or more respects. Examples include, but are not limited to, the following:

- a. Failure to establish or comply with quality control policies and procedures designed to provide the firm with reasonable assurance that the internal culture is based on recognition that quality is essential in performing engagements. This may be evidenced by the lack of a quality control document, failure to appropriately respond to findings in a regulatory investigation, or failure to have a timely peer review.
- b. Failure to comply with relevant ethical requirements. This may be evidenced by failure to obtain independence confirmations from all personnel, failure to inform personnel on a timely basis of changes to the list of clients and related entities, or failure to address potential breaches of independence.
- c. Failure of the firm to undertake or continue relationships and engagements only when the firm is competent to perform the engagements. This may be evidenced by failure to have policies and procedures in place to require evaluation of the nature of the services to be provided, evaluation of the firm's resources to provide the services, or evaluation of the need to engage a third party to assist in new industries.
- d. Failure of the firm to have personnel with the competence, capabilities, and commitment to ethical principles necessary to

perform engagements in accordance with professional standards. This may be evidenced by failure to have policies and procedures requiring personnel to maintain a CPA license, comply with industry-specific CPE requirements, or ensure appropriate industry experience on engagement teams.

- e. Failure of the firm to comply with monitoring of the firm's system of quality control. This may be identified by lack of monitoring of appropriate CPE for all firm personnel, lack of monitoring of all elements of the firm's system of quality control in the firm's peer review year, or failing to appropriately respond to issues identified during engagement inspection.

Communication Requirements for Closing Meeting and Exit Conference

Closing Meeting Communication Requirements (Ref: par. .59–.61)

.A49 The closing meeting may also be attended by representatives of the AE, the board, AICPA staff, or other board-authorized organizations with oversight responsibilities.

.A50 The purpose of a separate closing meeting and exit conference is to provide the firm sufficient time to determine appropriate responses to the matters, findings, deficiencies, and significant deficiencies identified and to provide the team captain with sufficient time to assess the firm's responses prior to the report date (exit conference date). If these steps have been taken prior to the closing meeting or are not necessary, the closing meeting and exit conference may be combined.

.A51 Other suggestions and observations may include implications of upcoming changes in professional standards, operational or efficiency suggestions, and minor areas for improvement.

.A52 A reasonable time frame is typically 30 days.

.A53 If the engagement was reviewed by a specialist, it may be beneficial for the specialist to be available for or participate in the exit conference.

Exit Conference Communication Requirements (Ref: par. .62–.63)

.A54 The purpose of the firm's response on the FFC form or in the letter of response is for a firm to document the specific actions that will be taken to correct findings, deficiencies, and significant deficiencies noted by the reviewer.

.A55 The AE's peer review committee (committee) may require the firm to make and document appropriate considerations regarding nonconforming engagements as a condition of acceptance of the peer review. The firm response may affect other monitoring actions the committee may impose, including actions to verify that the firm adheres to the intentions indicated in its response.

.A56 Examples of firm actions that may be taken in response to nonconforming engagements include, but are not limited to, the following:

- a. Performing omitted procedures performed (including documentation)
- b. Reissuing reports and financial statements
- c. Notifying users to discontinue use of previously issued reports

Written Representations (Ref: par. .64–.66)

.A57 Exhibit A, "Illustrative Representation Letter," in section 310 provides an illustrative example of a firm's representation letter.

.A58 Examples of how a team captain may discover significant issues include the following:

- a. The AE provides the team captain with a referral specific to the firm or a professional within the firm.
- b. The team captain identifies information about significant issues within a firm from a news outlet or publicly available website (for example, via the PCAOB, state board of accountancy, and so on).

Reporting on System Reviews (Ref: par. .67–.69)

.A59 A report with a peer review rating of *pass* is issued when the team captain concludes that the firm's system of quality control for the accounting and auditing practice has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

.A60 A report with a peer review rating of *pass with deficiencies* is issued when the team captain concludes that the firm's system of quality control for the accounting and auditing practice has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects with the exception of a certain deficiency or deficiencies that are described in the report.

.A61 A report with a peer review rating of *fail* is issued when the team captain has identified significant deficiencies and concludes that the firm's system of quality control is not suitably designed to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects or the firm has not complied with its system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

.A62 In the event of a scope limitation, a report with the applicable peer review rating (*with a scope limitation*) is issued.

.A63 Exhibit B, "Illustrative Examples of the Reviewer's Report on the Firm's System of Quality Control," contains example reports that may be tailored by the reviewer to meet the requirements described in paragraph .69.

.A64 Reference to plural "deficiencies" could also apply to a singular item within the standards. For instance, there could be deficiencies or a deficiency. The wording in the peer review report should be tailored as necessary.

.A65 If there are repeat deficiencies that have occurred on prior consecutive reviews, the captain should state in the current report that "this deficiency was noted on previous reviews."

Submission of Peer Review Documentation to the AE by the Team Captain (Ref: par. .70–.71)

.A66 All peer reviews are subject to oversight and working papers may be requested by the AE or AICPA staff.

.A67

Appendix A — Consideration of the Results of Regulatory Oversight or Inspections in the Planning and Performance of a Peer Review (Ref: par. .A8)

.01 This appendix contains information related to team captain considerations when a reviewed firm has undergone oversight or inspection by regulatory or governmental bodies.

Oversight or Inspections by Regulatory or Governmental Entities

.02 Oversight or inspections by regulatory or governmental entities (for instance, the Department of Labor, the Department of Health and Human Services, or other local, state, or federal entities) performed on a firm are certainly relevant when assessing peer review risk. The goals of regulatory or governmental oversight, however, may differ from the purpose of a system review. Therefore, although it would be inappropriate for a team captain to place reliance on regulatory or governmental oversight results, it is appropriate for a team captain to consider the following factors when determining the impact of regulatory or governmental oversight and communications from regulatory or governmental bodies on peer review risk:

- a. *The impact of regulatory or governmental oversight on the scope of the peer review.* Both the inherent risk and control risk associated with a peer review may be affected if the engagements subject to regulatory or governmental oversight are also within the scope of engagements that can be selected for peer review. For example, the nature, systemic cause, pattern, or pervasiveness of issues identified by oversight may affect the assessed inherent risk as it relates to the firm's demonstrated expertise in performing the relevant engagements and the assessed control risk as it relates to how the system of quality control is designed to prevent issues in the relevant engagements and the effectiveness of those controls.

Although more substantive comments are more likely to affect the peer review engagement selections, a lack of comments from oversight or inspection does not necessarily indicate that the firm's system of quality control is operating effectively for the relevant industry practice. Ultimately, the impact to the peer review risk assessment (and thus the nature, timing, and extent of testing performed) will be based on the evaluation of the significance of the comments related to the firm's accounting and auditing practice performed by the team captain.

Finally, understanding the systemic causes of and firm responses to any deficiencies or indications of engagements that were not performed or reported on in conformity with applicable professional standards in all material respects identified by the oversight body is vital when determining the impact of oversight or inspection on the peer review risk assessment and engagement selection. Understanding these systemic causes and firm responses might also help the team captain identify the systemic causes of any similar matters that are identified as a result of the review team's review of engagements during the peer review.

- b. *The timing of the regulatory or governmental oversight results.* The time period covered by the regulatory oversight results is also relevant in determining the usefulness of the information when assessing peer review risk and determining the impact (if any) on the nature, timing, and extent of peer review procedures. For example, the oversight results from more recently completed oversight are likely to be more relevant than the results from older oversight. Any open or ongoing oversight, the status of that oversight, and the firm's preliminary remediation plans (if applicable) would also be relevant for a team captain's risk assessment.
- c. *The firm's responsiveness to regulatory or governmental oversight results.* The degree of the firm's responsiveness to oversight findings and other communications, as evidenced by the remediation planned or taken, is also an important aspect of the team captain's risk assessment. Remediation efforts by the firm may affect industries that are subject to peer review and may assist the team captain when considering the design of the firm's system of quality control or compliance with it.
- d. *The size of the firm relative to its specialized industry practices.* The relative significance of the specialized industry practices subject to regulatory oversight as compared to the firm's total practice is an important factor when determining the relevance of the oversight results to the peer review, as this may affect the reviewer's evaluation of the firm's design of and compliance with its system of quality control.

Inspections by the PCAOB

.03 Although PCAOB inspection reports cover only the portion of a firm's practice that is subject to permanent inspection, most firms typically have only one system of quality control. As a result, the PCAOB inspection report may contain information that could assist the reviewer in assessing peer review risk. The firm will have valuable insight on both the public and nonpublic portions (if made available) of either the most recently released PCAOB inspection reports or any ongoing PCAOB inspection. These insights will assist the team captain in identifying risks with the firm's system of quality control.

.04 Similarly to other oversight or inspections, the nature, relative importance, systemic cause, pattern, or pervasiveness of the findings contained in PCAOB inspection reports may affect the nature, timing, and extent of peer review procedures. By performing the following steps, a team captain can properly identify risks associated with the firm's system of quality control:

- a. Consider the information contained in public portions of recent PCAOB inspection reports.
- b. Consider the information in the nonpublic portions of the PCAOB inspection reports, if made available by the firm.
- c. Consider the information made available by the firm related to any ongoing PCAOB inspections.
- d. Perform further inquiry of the firm to determine the offices, and partners, related to findings detailed in the PCAOB report.
- e. Determine which PCAOB findings (if any) may be applicable to the portion of the firm's practice that was not subject to PCAOB inspection.
- f. Understand the systemic causes of the findings (as determined by the firm).

- g.* Understand how the firm remediated the findings for the most current inspection (or the firm's remediation plan).
- h.* Consider the firm's remediation history with respect to PCAOB inspection findings (if any).

.05 As a reminder, discussing PCAOB inspection findings does not permit the peer reviewer to request the nonpublic portions of the PCAOB inspection report.

.A68

Appendix B — Considering the Firm's Monitoring Procedures to Reduce a Reviewer's Testing Procedures (Ref: par. .23)

.01 This appendix contains information on the team captain's considerations of the firm's monitoring procedures when the team captain plans to reduce scope based on those procedures. If a firm and team captain work collaboratively and with an integrated approach, regardless of the size of the firm, the team captain could maximize the benefits of taking into account a firm's current-year internal inspection and other relevant factors (for example, regulatory oversight from the PCAOB or other regulatory or governmental entities, such as the Department of Labor [DOL], the Department of Health and Human Services [HHS], or local regulatory agencies) in determining inherent and control risk. However, given that the peer review covers a defined year, internal inspection procedures and results for a year outside the peer review year are not likely to be relevant.

.02 In making a judgment about the effects that the firm's current-year internal inspection procedures will have on the selection of offices and engagements to be reviewed, the team captain will likely need to consider the following:

- a. The firm's cooperation and willingness to share all relevant information
- b. Whether the firm's internal inspection procedures are robust
- c. Whether the firm's internal inspection includes all clients, even those not subject to the AICPA's peer review standards
- d. The potential biases of the firm's internal inspectors and the impact of those biases on the internal inspection results

.03 The team captain will also likely need to consider the extent of the review team's involvement in the internal inspection process, including the following:

- a. Level of involvement in internal inspection planning, such as inclusion in discussions or meetings, and the team captain's approval of internal inspectors' qualifications, the internal inspection's risk assessment, scopes, risk-based approach, and office or engagement selections.
- b. Coordination of peer review planning with internal inspection planning.
- c. The team captain's in-depth understanding of the firm's internal inspection process, including an assessment of its design and effectiveness.
- d. The level of contemporaneous testing of the firm's internal inspection procedures (commonly called "piggyback reviews" or "piggyback testing"). The less piggyback testing a review team performs, the more direct testing the review team would need to perform, and vice versa. In order to be effective, procedures for piggyback testing would need to be similar to those for direct testing. For example, engagement piggyback testing procedures could include a review of financial statements, working papers, and the engagement checklist being used by the internal inspector, as well as participation by the review team in discussions, meetings, or both between the internal inspector and the engagement partner or manager and related follow-up procedures. Although test-

ing of internal inspection procedures can be performed after the internal inspection procedures are completed, this type of testing will not provide the peer reviewer with the same level of understanding and insight into the internal inspection process as piggyback testing would. In addition to piggyback testing, a reviewer may perform supplant reviews, for which the reviewer becomes a member of the internal inspection team and participates in one or more reviews of engagements. Supplant reviews enable a reviewer to evaluate the internal inspection team's process and decision-making, and as with piggyback reviews, there is a correlation between the level of the reviewer's involvement in the internal inspection and direct testing.

- e.* Assessment of how the internal inspectors resolve open matters and deal with potential issues detected in their reviews.
- f.* The scopes and selections of the internal inspectors and the use of peer review to balance out the coverage.
- g.* The correlation between the findings of the reviewer and internal inspection, evaluated with regard to the peer review's scope.

.04 The results of these considerations assist the team captain in determining the appropriate amount of procedures to be performed by the review team. A team captain may be able to significantly reduce the scope of the procedures the review team directly performs. For example, a significant reduction would be permitted when the extent of the peer reviewer's involvement with the firm's internal inspection is so timely and significant that the peer review and internal inspection can be viewed as an integrated activity. In this example, the collaboration would result in a reallocation of effort and resources between the review team and the firm in such a way that the overall scope and the effort involved are not diminished and, if anything, are enhanced. The resulting peer review would remain as rigorous as a peer review in which there is no consideration of internal inspections or other inputs.

.05 Ultimately, if the reviewer plans to consider the current-year internal inspection procedures to reduce the scope of the peer review, the team captain would need to determine that the firm's internal inspection procedures

- a.* were applied properly in the reviews of individual practice offices and engagements.
- b.* were carried out conscientiously by competent persons with appropriate expertise and objectivity.
- c.* produced findings that are representative of the work performed by the firm and therefore can be considered by the review team to reach an overall conclusion regarding the firm's compliance with its quality control policies and procedures.

.06 As stated when discussing piggyback testing, testing performed by the review team in order to reach these conclusions can be performed contemporaneously or after internal inspection procedures have been completed.

.07 Examples of procedures a review team would perform when testing the effectiveness of the internal inspection procedures contemporaneously with the performance by the internal inspection team performing the procedures include the following:

- a.* Re-performing the review of a sample of engagements subjected to internal inspection procedures

- b. Re-performing the review of a sample of the quality control policies and procedures (functional elements) subjected to internal inspection procedures in the offices
- c. Comparing the review team's findings to the internal inspection team's findings and resolving any differences
- d. Attending discussions of engagement findings and the overall office findings, if applicable

.08 Examples of procedures a review team would perform when testing the effectiveness of the internal inspection procedures after the procedures have been completed include the following:

- a. Re-performing the review of a sample of engagements
- b. Re-performing the review of a sample of the quality control policies and procedures (functional elements) subjected to internal inspection procedures in the offices
- c. Comparing the review team's findings to the internal inspection team's findings and resolving any differences

Practical Examples Related to Relying on a Firm's Internal Inspection Procedures

.09 The following are example scenarios a team captain could encounter when considering whether or not to rely on a firm's internal inspection procedures. Of course, these examples cannot address all the different factors a team captain could consider, and thus, the team captain will need to use judgment in determining whether and to what extent the reviewer could reduce or modify scope.

Example 1: A firm has 800 employees, 10 offices, and a strong centralized quality control department; operates by industry segment; and has pre-issuance reviews and annual internal inspections. It is registered with the PCAOB, undergoes annual PCAOB inspection, and has one system of quality control for both SEC and non-SEC engagements. Based on various factors, the peer reviewers have assessed inherent and control risk as low. Prior peer reviews have been *pass* reports. Internal inspection appears robust, and beginning last year, the firm lowered the bar for "no" responses on checklists used for internal inspections. The peer reviewers were integrally involved in the internal inspection, approved the planning, and attended several office exit conferences. In addition, they performed piggybacks on 5% of the firm's internal inspection procedures, and those procedures confirmed other internal inspection results. The PCAOB was involved in the current year's internal inspection planning, and results of the prior year's PCAOB inspection mirrored prior internal inspection results. Results from a DOL audit that covered the peer review year raised an issue that was also highlighted during the current year's internal inspection. *The peer reviewers could consider maximum reliance on the internal inspection process and thus consider a reduction in scope or procedures.*

Example 2: A firm has 300 employees and 5 offices. The firm has undergone several mergers in the past two years. Engagements undergo pre-issuance review, and each office performs its own internal inspection that is then sent to the main office. The firm engaged new peer reviewers and asked them to implement the guidance contained in this document with the intent of reducing scope and procedures and thus costs. The peer reviewers participated in planning meetings and performed a number of piggybacks. However, the peer reviewers disagree with some of the judgments made by the internal inspectors and believe that the results from the offices are not being consolidated adequately. They are concerned that the integration of the firms has not been successful. The firm is registered with the PCAOB and underwent an inspection in the past

year. However, the report is not yet public, and the firm is unable or unwilling to communicate the results or its experiences with the peer reviewers. *The peer reviewer would not be able to place significant reliance on internal inspection to reduce scope or procedures in this example.*

Example 3: A firm has 60 employees and 2 offices. It performs pre-issuance reviews and annual internal inspections. The peer reviewers have assessed inherent and control risk as moderate. Prior peer reviews have been *pass* reports with a few findings for further consideration. The firm has a very experienced and highly regarded quality control director who is assisted by several of the firm's more technical partners each year in performing the internal inspection. They approach the internal inspection seriously. The peer reviewers were integrally involved in the internal inspection, approved the planning, and attended several office exit conferences. In addition, they performed piggybacks on 7% of the firm's internal inspection procedures, and those procedures confirmed other internal inspection results, even though they revealed several issues that might lead to findings. The firm is registered with the PCAOB and underwent an inspection in the prior year. The quality control director shared the PCAOB's matter sheets with the peer reviewers. The PCAOB had noted that staff was not adequately documenting considerations related to fraud on the SEC engagements. The internal inspectors paid particular attention to this matter and agreed that it was a problem for one of the offices. *The peer reviewers could consider moderate reliance on the internal inspection process and, thus, some reduction in scope or procedures.*

Example 4: A firm has 20 employees and 1 office. It has no SEC engagements and is not registered with the PCAOB. Its last peer review was *pass* with no findings. The firm performs pre-issuance reviews and annual internal inspections. The partner that performs the internal inspection is also the pre-issuance reviewer or engagement partner on many of the firm's audit engagements. The firm's annual internal inspection is performed in the spring, but, due to scheduling conflicts, its peer reviewers, who come from out of state, are only available in the fall. The two peer reviewers typically review four audits and four reviews or compilations, within a two- or three-day time frame. *Cost-benefit and other considerations would most likely lead the firm and the peer reviewers to conclude that there should be no reliance on the internal inspection to reduce scope or procedures.*

.A69

Appendix C — Additional Requirements for Must-Select and Must-Cover Engagements (Ref: par. .27)

.01 This appendix contains the engagements identified as must select and must cover.

Must-Select Engagements

.02 The following paragraphs discuss must-select engagements. One or more engagements should be reviewed from each must-select engagement type, taking into consideration requirements related to assessing peer review risk and engagement selection. (Ref: par. .20–.21, .23–.25, and .28)

Engagements Under Government Auditing Standards

.03 *Government Auditing Standards* (GAS), issued by the U.S. Government Accountability Office, requires auditors conducting engagements in accordance with those standards to have a peer review that includes the review of at least one engagement conducted in accordance with those standards. Additionally, if the firm performs engagements of entities subject to the Single Audit Act, the reviewer must evaluate a compliance audit.

.04 Inclusion of a must-select engagement should not supersede the reviewer's consideration of engagements and industries that have a significant public interest, such as state and local governments, school districts, and Department of Housing and Urban Development (HUD) engagements. For example, if for-profit HUD multifamily housing project audit engagements constitute a significant percentage of a firm's practice, one would expect the reviewer to select at least one such engagement for review. However, if the firm also performed an audit of an engagement subject to the Single Audit Act, such as a local government or not-for-profit organization, one such engagement must also be selected to perform an evaluation of the firm's single audit compliance. Peer reviewers should also consider audit firm experience such as how many governmental audits the firm performs, the number of years' experience in performing these engagements, the number of team members with experience, whether the team members have undergone CPE or specialized training, and reasonableness of hours spent on GAS engagements. Further consideration should be given to communications from regulatory agencies.

Audits of Employee Benefit Plans Under ERISA

.05 Regulatory and legislative developments have made it clear that there is a significant public interest in, and a higher risk associated with, audits conducted pursuant to the Employee Retirement Income Security Act of 1974 (ERISA).

.06 For employee benefit plans under ERISA, the peer reviewer should consider whether the engagement selection process has adequately addressed the risks involved in ERISA Section 103(a)(3)(C) audits (formerly called "limited-scope" audits) versus non-ERISA 103(a)(3)(C) audits (formerly called "full-scope" audits) and in different types of benefit plans such as defined benefit, defined contribution, and voluntary health and welfare plans. If a firm has more than one of the preceding types of plans, a selection from each type of plan is not required; however, the reviewer must consider the unique risks associated with those types of plans and document how these risks were addressed in the risk assessment. Peer reviewers should also consider audit firm experience such as how many ERISA audits the firm performs, the number of years' experience in

performing these engagements, the number of team members with experience, whether the team members have undergone CPE or specialized training, and reasonableness of hours spent on ERISA engagements. Consideration should also be given to communications from regulatory agencies.

Audits Under FDICIA

.07 The 1993 Federal Deposit Insurance Corporation guidelines implementing the Federal Deposit Insurance Corporation Improvement Act (FDICIA) require auditors of federally insured depository institutions having total assets of \$500 million or more at the beginning of the fiscal year to have a peer review that includes the review of at least one audit of an insured depository institution subject to the FDICIA.

.08 For FDICIA engagements, peer reviewers should take into consideration the amount of total assets held by the federally insured depository institution (less than \$500 million, more than \$500 million, more than \$1 billion). Peer reviewers should also consider audit firm experience, such as how many FDICIA audits the firm performs, the length of experience in performing these engagements, the number of team members with experience, whether the team members have undergone CPE or specialized training, and reasonableness of hours spent on FDICIA engagements. Further consideration should be given to the risks of the audited company, such as the level of reporting the institution complies with (the holding company level or the bank subsidiary level, and the regulatory issues associated with each), the balance of the lending portfolio (the industries and concentration percentage of the portfolio), any regulatory correspondence and examination results, capital ratios, financial institution management experience, economic environment and geographic location of the institution, number of branches, and experience and longevity of the board of directors and audit committee.

Examinations of Service Organizations

.09 Due to the reliance of user entities on system and organization control (SOC) reports, particularly SOC 1® and SOC 2® reports,² there is a significant public interest in examinations of service organizations relevant to user entities. If a firm performs an examination of one or more service organizations and issues a SOC 1 or SOC 2 report, at least one examination should be reviewed. If a firm performs both SOC 1 and SOC 2 engagements and a proper risk assessment determined that only one SOC engagement should be selected, a SOC 1 engagement should be reviewed due to the reliance on the report by other auditors.

.10 The peer reviewer should consider whether the engagement selection process has adequately addressed the risks involved in different types of SOC engagements (SOC 1 and SOC 2 engagements). If a firm performs more than one of the preceding types of SOC engagements, the reviewer must consider the unique risks associated with each engagement and document how these risks were addressed in the risk assessment. Peer reviewers should also consider audit firm experience, such as how many SOC engagements the firm performs, the length of experience in performing these engagements, the number of team members with experience, whether the team members have undergone CPE or specialized training, whether the firm utilizes a group that specializes in

² In 2017, the AICPA introduced the term *system and organization controls* (SOC) to refer to the suite of services practitioners may provide relating to system-level controls of a service organization and system- or entity-level controls of other organizations. Formerly, SOC referred to service organization controls. By redefining that acronym, the AICPA enables the introduction of new internal control examinations that may be performed (a) for other types of organizations, in addition to service organizations, and (b) on either system-level or entity-level controls of such organizations.

internal controls for completing its SOC engagements, and reasonableness of hours spent on SOC engagements. Additional consideration should be given to whether the firm performs SOC engagements with significant subservice organizations identified in the auditor's opinion (the inclusive method is higher risk than the carve-out method). Further consideration should be given to communications from regulatory agencies. Although SOC 1 and SOC 2 engagements are different, noncompliance for one type may be indicative of noncompliance in the other. SOC 3® engagements are not must-select engagements, but when considering the pervasiveness of a systemic cause and the portion of the firm's practice that may be affected by matters identified with other SOC engagements, the reviewer should also consider SOC 3 engagements.

Must-Cover Engagements

.11 The board periodically assesses engagements that may currently have the most significant public interest and deems them must-cover engagements. These engagements, in addition to the must-select engagement types described previously, are must-cover engagements for all firms.

.12 The following are must-cover engagements: (Ref: par. .11 of section 100)

- a. Internal control reports issued under the FDICIA when total assets exceed \$1 billion
- b. State and local governments
- c. Any industry that has a 10% or more concentration of the firm's audit practice

.A70

Exhibit B — Illustrative Examples of the Reviewer's Report on the Firm's System of Quality Control

This exhibit contains various illustrations of a peer reviewer's report on a firm's system of quality control (system reviews).

Report on the Firm's System of Quality Control

[Exit Conference Date]

To the Partners of *[or other appropriate terminology]* XYZ & Co. and the Peer Review Committee of the *[insert the name of the applicable administering entity]*,¹

We² have reviewed the system of quality control for the accounting and auditing practice of XYZ & Co. (the firm)³ in effect for the year ended June 30, 20XX. Our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

A summary of the nature, objectives, scope, limitations of, and the procedures performed in a system review as described in the Standards may be found at

¹ The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of *[or appropriate terminology]* XYZ & Co. and the National Peer Review Committee"

² The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

³ The report of a firm who is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

www.aicpa.org/prsummary. The summary also includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.

Firm's Responsibility

The firm is responsible for designing and complying with a system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with the requirements of applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with the requirements of applicable professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to express an opinion on the design of and compliance with the firm's system of quality control based on our review.

Required Selections and Considerations

Engagements selected for review included engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of employee benefit plans; audits performed under FDICIA; and examinations of service organizations (SOC 1® and SOC 2® engagements).⁴

As a part of our peer review, we considered reviews by regulatory entities as communicated by the firm, if applicable, in determining the nature and extent of our procedures.

Opinion

In our opinion, the system of quality control for the accounting and auditing practice of XYZ & Co.⁵ in effect for the year ended June 30, 20XX, has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *pass*.

[Name of team captain's firm]

⁴ If the firm performs audits of employee benefit plans; engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of depository institutions with total assets of \$500 million or more at the beginning of the institution's fiscal year; examinations of service organizations (SOC 1® and SOC 2® engagements); or other engagements required to be selected by the board, the engagement(s) selected for review should be identified in the report using this paragraph, tailored as applicable. If the reviewer selected an engagement under *Government Auditing Standards* (excluding engagements subject to the Single Audit Act) and also selected an engagement solely to evaluate a compliance audit under the Single Audit Act, this portion of the sentence should read as follows: "*Government Auditing Standards*, compliance audits under the Single Audit Act," and so on. For SOC engagements, the paragraph should be tailored to reflect the type(s) selected for review. The paragraph should be tailored to indicate if single or multiple engagements were selected for review (for example, an audit versus audits). If the firm does not perform such engagements, this paragraph is not applicable and not included in the report.

⁵ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

Illustration 2 — A Reviewer's Report on the Firm's System of Quality Control With a Peer Review Rating of Pass With a Scope Limitation

[Firm letterhead for a firm-on-firm review; team captain's firm letterhead for an association-formed review team]

Report on the Firm's System of Quality Control

[Exit Conference Date]

To the Partners of *[or other appropriate terminology]* XYZ & Co. and the Peer Review Committee of the *[insert the name of the applicable administering entity]*,¹

We² have reviewed the system of quality control for the accounting and auditing practice of XYZ & Co. (the firm)³ in effect for the year ended June 30, 20XX. Our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

The nature, objectives, scope, limitations of, and the procedures performed in a system review as described in the Standards may be found at www.aicpa.org/prsummary. The summary also includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.

Firm's Responsibility

The firm is responsible for designing and complying with a system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with the requirements of applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with the requirements of the applicable professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to express an opinion on the design of and compliance with the firm's system of quality control based on our review.

Required Selections and Considerations

Engagements selected for review included engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of employee benefit plans; audits performed under FDICIA; and examinations of service organizations (SOC 1[®] and SOC 2[®] engagements).⁴

¹ The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of *[or appropriate terminology]* XYZ & Co. and the National Peer Review Committee".

² The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

³ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

⁴ If the firm performs audits of employee benefit plans, engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of depository institutions with total assets of \$500 million or more at the beginning of the institution's fiscal year; examinations of service organizations (SOC 1[®] and SOC 2[®] engagements); or other engagements required to be selected by the board, the engagement(s) selected for review should be identified

(continued)

As a part of our peer review, we considered reviews by regulatory entities as communicated by the firm, if applicable, in determining the nature and extent of our procedures.

Scope Limitation⁵

In performing our review, the firm notified us that we would be unable to review the engagements performed by one of its former partners who left the firm during the peer review year. Accordingly, we were unable to include in our engagement selection any of the divested engagements. That partner's responsibility was concentrated in the construction industry. The engagements excluded from our engagement selection process included audit engagements and comprised approximately 15% of the firm's audit and accounting practice during the peer review year.

Opinion

In our opinion, except for any deficiencies or significant deficiencies that might have come to our attention had we been able to review divested engagements, as previously described, the system of quality control for the accounting and auditing practice of XYZ & Co.⁶ in effect for the year ended June 30, 20XX, has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *pass (with a scope limitation)*.

Report on the Firm's System of Quality Control

[Exit Conference Date]

To the Partners of [or other appropriate terminology] XYZ & Co. and the Peer Review Committee of the [insert the name of the applicable administering entity],¹

(footnote continued)

in the report using this paragraph, tailored as applicable. If the reviewer selected an engagement under *Government Auditing Standards* (excluding engagements subject to the Single Audit Act) and also selected an engagement solely to evaluate a compliance audit under the Single Audit Act, this portion of the sentence should read as follows "*Government Auditing Standards*, compliance audits under the Single Audit Act," and so on. For SOC engagements, the paragraph should be tailored to reflect the type(s) selected for review. The paragraph should be tailored to indicate if single or multiple engagements were selected for review (for example, an audit versus audits). If the firm does not perform such engagements, this paragraph is not applicable and not included in the report.

⁵ The scope limitation paragraph provided is an example for illustrative purposes only.

⁶ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

¹ The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of [or appropriate terminology] XYZ & Co. and the National Peer Review Committee."

We² have reviewed the system of quality control for the accounting and auditing practice of XYZ & Co. (the firm)³ in effect for the year ended June 30, 20XX. Our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

A summary of the nature, objectives, scope, limitations of, and the procedures performed in a system review as described in the Standards may be found at www.aicpa.org/prsummary. The summary also includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.

Firm's Responsibility

The firm is responsible for designing and complying with a system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with the requirements of applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with the requirements of the applicable professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to express an opinion on the design of and compliance with the firm's system of quality control based on our review.

Required Selections and Considerations

Engagements selected for review included engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of employee benefit plans; audits performed under FDICIA; and examinations of service organizations (SOC 1® and SOC 2® engagements).⁴

As a part of our peer review, we considered reviews by regulatory entities as communicated by the firm, if applicable, in determining the nature and extent of our procedures.

Deficiencies⁵ Identified in the Firm's System of Quality Control

We noted the following deficiencies⁶ during our review:

² The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

³ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

⁴ If the firm performs audits of employee benefit plans; engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of depository institutions with total assets of \$500 million or more at the beginning of the institution's fiscal year; examinations of service organizations (SOC 1® and SOC 2® engagements); or other engagements required to be selected by the board, the engagement(s) selected for review should be identified in the report using this paragraph, tailored as applicable. If the reviewer selected an engagement under *Government Auditing Standards* (excluding engagements subject to the Single Audit Act) and also selected an engagement solely to evaluate a compliance audit under the Single Audit Act, this portion of the sentence should read as follows "Government Auditing Standards, compliance audits under the Single Audit Act," and so on. For SOC engagements, the paragraph should be tailored to reflect the type(s) selected for review. The paragraph should be tailored to indicate if single or multiple engagements were selected for review (for example, an audit versus audits). If the firm does not perform such engagements, this paragraph is not applicable and not included in the report.

⁵ This should be tailored to indicate a single deficiency, when applicable.

⁶ The deficiencies provided are examples for illustrative purposes only.

1. The firm's quality control policies and procedures addressing continuing professional education (CPE) are not suitably designed or complied with to provide reasonable assurance that its personnel will have the competence necessary to perform engagements in accordance with professional and regulatory requirements. Although the firm's policies require that personnel attain a minimum of 40 hours of CPE courses annually and comply with CPE requirements of the applicable external bodies, the firm lacks appropriate procedures to determine whether the personnel are in compliance with these requirements. During our review, we noted several personnel who did not comply with CPE requirements of *Government Auditing Standards*. In our opinion, this contributed to audit engagements performed under *Government Auditing Standards* that did not conform to professional standards in all material respects.
2. The firm's quality control policies and procedures regarding engagement performance have not been suitably designed or complied with to provide reasonable assurance that audit engagements are consistently performed in accordance with professional standards. The firm requires the use of a non-industry-specific audit program but does not require that program to be tailored to cover requirements of specialized industries or those subject to regulatory bodies. During our review, we noted procedures were not performed to determine if a banking institution met its minimum capital requirements. In our opinion, this contributed to audit engagements in the banking industry that did not conform to professional standards in all material respects.

Opinion

In our opinion, except for the deficiencies previously described, the system of quality control for the accounting and auditing practice of XYZ & Co.⁷ in effect for the year ended June 30, 20XX, has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *pass with deficiencies*.

[Name of team captain's firm]

Illustration 4 — A Reviewer's Report on the Firm's System of Quality Control With a Peer Review Rating of Pass With Deficiencies With a Scope Limitation

[Firm letterhead for a firm-on-firm review; team captain's firm letterhead for an association-formed review team]

Report on the Firm's System of Quality Control

[Exit Conference Date]

To the Partners of [or other appropriate terminology] XYZ & Co. and the Peer Review Committee of the [insert the name of the applicable administering entity],¹

⁷ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

¹ The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of [or appropriate terminology] XYZ & Co. and the National Peer Review Committee"

We² have reviewed the system of quality control for the accounting and auditing practice of XYZ & Co. (the firm)³ in effect for the year ended June 30, 20XX. Except as subsequently described, our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

A summary of the nature, objectives, scope, limitations of, and the procedures performed in a system review as described in the Standards may be found at www.aicpa.org/prsummary. The summary also includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.

Firm's Responsibility

The firm is responsible for designing and complying with a system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with the requirements of the applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with the requirements of the applicable professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to express an opinion on the design of and compliance with the firm's system of quality control based on our review.

Required Selections and Considerations

Engagements selected for review included audits of employee benefit plans; audits performed under FDICIA; and examinations of service organizations (SOC 1[®] and SOC 2[®] engagements).⁴

As a part of our peer review, we considered reviews by regulatory entities as communicated by the firm, if applicable, in determining the nature and extent of our procedures.

Deficiency⁵ Identified in the Firm's System of Quality Control

We noted the following deficiency⁶ during our review:

² The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

³ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

⁴ If the firm performs audits of employee benefit plans; engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of depository institutions with total assets of \$500 million or more at the beginning of the institution's fiscal year; examinations of service organizations (SOC 1[®] and SOC 2[®] engagements); or other engagements required to be selected by the board, the engagement(s) selected for review should be identified in the report using this paragraph, tailored as applicable. If the reviewer selected an engagement under *Government Auditing Standards* (excluding engagements subject to the Single Audit Act) and also selected an engagement solely to evaluate a compliance audit under the Single Audit Act, this portion of the sentence should read as follows "Government Auditing Standards, compliance audits under the Single Audit Act," and so on. For SOC engagements, the paragraph should be tailored to reflect the type(s) selected for review. The paragraph should be tailored to indicate if single or multiple engagements were selected for review (for example, an audit versus audits). If the firm does not perform such engagements, this paragraph is not applicable and not included in the report.

⁵ This language should be tailored to indicate multiple deficiencies, when applicable.

⁶ The deficiency provided is an example for illustrative purposes only.

1. The firm's quality control policies and procedures regarding engagement performance have not been suitably designed or complied with to provide reasonable assurance that audit engagements are consistently performed in accordance with applicable regulatory requirements. As noted in the following text, we were unable to select the firm's only audit subject to *Government Auditing Standards* (the Yellow Book). As a result, the firm was not in compliance with the Yellow Book peer review engagement selection requirements.

Scope Limitation⁷

In performing our review, the firm notified us that we would be unable to select its only audit subject to *Government Auditing Standards* (the Yellow Book). As a result, we were unable to review all the engagements required to be selected by the standards established by the Peer Review Board of the AICPA.

Opinion

In our opinion, except for the effects of the deficiency previously described and any additional deficiencies or significant deficiencies that might have come to our attention had we been able to review the engagement as previously described, the system of quality control for the accounting and auditing practice of XYZ & Co.⁸ in effect for the year ended June 30, 20XX, has been suitably designed and complied with to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *pass with deficiency (with a scope limitation)*.

and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

A summary of the nature, objectives, scope, limitations of, and the procedures performed in a system review as described in the Standards may be found at www.aicpa.org/prsummary. The summary also includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.

Firm's Responsibility

The firm is responsible for designing and complying with a system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with the requirements of the applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with the requirements of the applicable professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to express an opinion on the design of and compliance with the firm's system of quality control and the firm's compliance therewith based on our review.

Required Selections and Considerations

Engagements selected for review included engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of employee benefit plans; audits performed under FDICIA; and examinations of service organizations (SOC 1® and SOC 2® engagements).⁴

As a part of our peer review, we considered reviews by regulatory entities as communicated by the firm, if applicable, in determining the nature and extent of our procedures.

Significant Deficiencies⁵ Identified in the Firm's System of Quality Control

We noted the following significant deficiencies⁶ during our review:

1. The firm's quality control policies and procedures do not provide reasonable assurance that the firm will comply with applicable professional standards and will issue reports that are appropriate in the circumstances, as a result of the following significant deficiencies:

⁴ If the firm performs audits of employee benefit plans; engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of depository institutions with total assets of \$500 million or more at the beginning of the institution's fiscal year; examinations of service organizations (SOC 1® and SOC 2® engagements); or other engagements required to be selected by the board, the engagement(s) selected for review should be identified in the report using this paragraph, tailored as applicable. If the reviewer selected an engagement under *Government Auditing Standards* (excluding engagements subject to the Single Audit Act) and also selected an engagement solely to evaluate a compliance audit under the Single Audit Act, this portion of the sentence should read as follows "Government Auditing Standards, compliance audits under the Single Audit Act," and so on. For SOC engagements, the paragraph should be tailored to reflect the type(s) selected for review. The paragraph should be tailored to indicate if single or multiple engagements were selected for review (for example, an audit versus audits). If the firm does not perform such engagements, this paragraph is not applicable and not included in the report.

⁵ This language should be tailored to indicate a single significant deficiency, when applicable.

⁶ When considered together, the deficiencies rise to the level of significant deficiencies. The significant deficiencies provided are examples for illustrative purposes only.

- a. The firm lacks policies and procedures addressing new engagement acceptance to reasonably ensure it only undertakes engagements that it has the capabilities, resources, and professional competence to complete in accordance with applicable professional standards.
- b. The firm lacks policies and procedures addressing continuing professional education (CPE) to require its personnel to obtain relevant training to prepare for engagements in new industries or service areas.
- c. Firm leadership has not implemented policies and procedures to provide clear, consistent, and frequent actions and messages from all levels of the firm's management that emphasize the firm's commitment to quality.

In our opinion, the significant deficiencies described previously contributed to an employee benefit plan audit that did not conform to professional standards in all material respects. During our review, we discovered that the firm had undertaken an employee benefit plan audit without performing appropriate acceptance procedures, including the engagement partner obtaining relevant CPE or otherwise obtaining sufficient knowledge to conduct the audit.

2. The firm's quality control policies and procedures addressing continuing professional education (CPE) are not sufficient to provide reasonable assurance that its personnel will have the competence necessary to perform engagements in accordance with professional and regulatory requirements. The courses taken by firm personnel did not provide them with sufficient information about current developments in accounting and auditing matters. In our opinion, this led to firm personnel being unable to appropriately address recent pronouncements and new disclosure requirements and failure to consider new auditing standards and other required communications. This contributed to audit engagements performed under *Government Auditing Standards*, and audits in other industries, that did not conform to professional standards in all material respects.
3. The firm's quality control policies and procedures regarding monitoring do not provide it with reasonable assurance that the policies and procedures relating to the system of quality control are relevant, adequate, and operating effectively. The firm's quality control policies and procedures do not
 - a. include an ongoing consideration and evaluation of the firm's system of quality control, including inspection or a periodic review of engagement documentation, reports, and clients' financial statements for a selection of completed engagements.
 - b. require responsibility for the monitoring process to be assigned to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility.
 - c. assign the performance of monitoring the firm's system of quality control to qualified individuals.

Opinion

In our opinion, as a result of the significant deficiencies previously described, the system of quality control for the accounting and auditing practice of XYZ & Co.⁷ in effect for the year ended June 30, 20XX, was not suitably designed or complied with to provide the firm with reasonable assurance of performing or reporting in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *fail*.

[Name of team captain's firm]

Illustration 6 — A Reviewer's Report on the Firm's System of Quality Control With a Peer Review Rating of Fail With a Scope Limitation

[Firm letterhead for a firm-on-firm review; team captain's firm letterhead for an association-formed review team]

Report on the Firm's System of Quality Control

[Exit Conference Date]

To the Partners of *[or other appropriate terminology]* XYZ & Co. and the Peer Review Committee of the *[insert the name of the applicable administering entity]*,¹

We² have reviewed the system of quality control for the accounting and auditing practice of XYZ & Co. (the firm)³ in effect for the year ended June 30, 20XX. Our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

A summary of the nature, objectives, scope, limitations of, and the procedures performed in a system review as described in the Standards may be found at www.aicpa.org/prsummary. The summary also includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.

Firm's Responsibility

The firm is responsible for designing and complying with a system of quality control to provide the firm with reasonable assurance of performing and reporting in conformity with the requirements of the applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with the requirements of the applicable professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

⁷ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

¹ The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of *[or appropriate terminology]* XYZ & Co. and the National Peer Review Committee."

² The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

³ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

Peer Reviewer's Responsibility

Our responsibility is to express an opinion on the design of and compliance with the firm's system of quality control based on our review.

Required Selections and Considerations

Engagements selected for review included engagements performed under *Government Auditing Standards*; audits of employee benefit plans, audits performed under FDICIA, and examinations of service organizations (SOC 1® and SOC 2® engagements).⁴

As a part of our peer review, we considered reviews by regulatory entities as communicated by the firm, if applicable, in determining the nature and extent of our procedures.

Significant Deficiencies⁵ Identified in the Firm's System of Quality Control

In addition, we noted the following significant deficiencies⁶ during our review:

1. The firm's quality control policies and procedures provide reasonable assurance that the firm and its personnel will comply with relevant ethical requirements. The firm's quality control policies and procedures require that written independence representations be obtained annually from all partners and personnel and then be reviewed by a partner in the firm assigned overall responsibility for such matters. During our review, we noted that the responsible partner left the firm in the early part of the year and her responsibilities in this area had not been reassigned. In our opinion, this contributed to several of the firm's personnel failing to sign such a representation. Written independence representations were subsequently obtained but there were instances where the firm was not independent with respect to the financial statements on which it reported, which caused the engagements to not conform to professional standards in all material respects.
2. The firm's policies and procedures regarding acceptance and continuance of clients are not complied with to provide it with reasonable assurance that its personnel are competent to perform the engagement and have the capabilities to do so. The firm accepted an audit in a specialized industry in which it had no experience or expertise and did not take steps to obtain competency prior to issuing the audit report. In our opinion, this contributed to an employee benefit plan audit that was not performed in accordance with professional standards in all material respects.

⁴ If the firm performs audits of employee benefit plans; engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act; audits of depository institutions with total assets of \$500 million or more at the beginning of the institution's fiscal year; examinations of service organizations (SOC 1® and SOC 2® engagements); or other engagements required to be selected by the board, the engagement(s) selected for review should be identified in the report using this paragraph, tailored as applicable. If the reviewer selected an engagement under *Government Auditing Standards* (excluding engagements subject to the Single Audit Act) and also selected an engagement solely to evaluate a compliance audit under the Single Audit Act, this portion of the sentence should read as follows "Government Auditing Standards, compliance audits under the Single Audit Act," and so on. For SOC engagements, the paragraph should be tailored to reflect the type(s) selected for review. The paragraph should be tailored to indicate if single or multiple engagements were selected for review (for example, an audit versus audits). If the firm does not perform such engagements, this paragraph is not applicable and not included in the report.

⁵ This language should be tailored to indicate a single significant deficiency, when applicable.

⁶ When considered together, the deficiencies rise to the level of significant deficiencies. The significant deficiencies provided are examples for illustrative purposes only.

3. The firm's use of the standardized planning forms required by its quality control policies and procedures for engagement performance are not consistently complied with to provide reasonable assurance that audit engagements are performed in accordance with professional standards. Despite such forms including audit planning steps for considering preliminary judgments about materiality levels, fraud risk factors, planned assessed level of control risk, analytical review procedures, and conditions that may require an extension of or a modification of tests, we noted several engagements that lacked sufficient evidence of such considerations. In our opinion, this contributed to audits of employee benefit plans and audit engagements in other industries that did not conform to professional standards in all material respects.

Scope Limitation⁷

In performing our review, the firm notified us that we would be unable to review the engagements performed by one of the firm's four offices that divested from the firm during the peer review year. As a result, we were unable to include within our engagement selection any engagements issued by that office. The engagements excluded from our engagement selection process included audit engagements and composed approximately 20% of the firm's audit and accounting hours during the peer review year.

Opinion

In our opinion, as a result of the significant deficiencies previously described, and any additional significant deficiencies that might have come to our attention had we been able to review engagements from the divested office as previously described, the system of quality control for the accounting and auditing practice of XYZ & Co.⁸ in effect for the year ended June 30, 20XX, was not suitably designed or complied with to provide the firm with reasonable assurance of performing or reporting in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *fail (with a scope limitation)*.

[Name of team captain's firm]

⁷ The scope limitation paragraph provided is an example for illustrative purposes only.

⁸ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

PR-C Section 220

General Principles and Responsibilities for Reviewers — Engagement Reviews

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains performance and reporting requirements and application guidance for reviewers engaged to perform an engagement review. The requirements and guidance in this section supplement the requirements and guidance in section 100, *Concepts Common to All Peer Reviews*, and section 200, *General Principles and Responsibilities for Reviewers*. Additionally, the review captain should be familiar with the firm requirements in section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*.

.02 Engagement reviews are available to firms that perform engagements under the Statements on Standards for Accounting and Review Services (SSARSs) and engagements under the Statements on Standards for Attestation Engagements (SSAEs) other than examinations as their highest levels of service. (Ref: par. .A1)

Effective Date

.03 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objectives

.04 In performing an engagement review, the objectives of the review captain are to

- a. evaluate whether the engagements submitted for review are performed and reported on in conformity with applicable professional standards in all material respects and
- b. report on the evaluation of selected engagements.

Definitions

.05 Terms applicable to this section are defined in paragraph .11 in section 100.

Requirements

Planning

.06 The reviewer should perform planning procedures before selecting engagements for review.

.07 The review captain should obtain from the reviewed firm the following:

- a. The number of engagements performed by level of service and industry for each engagement partner
- b. Responses to inquiries about the areas to be addressed in the written representations
- c. The firm's prior
 - i. peer review report,
 - ii. letter of response (if applicable),
 - iii. letter of acceptance,
 - iv. findings for further consideration (FFCs) (if applicable), and
 - v. representation letter

.08 The review captain should determine if the firm and its personnel are in compliance with licensure requirements of the state boards of accountancy in which the firm and its personnel practice for the peer review year through the issuance dates of the reviewed engagements by verifying the following: (Ref: par. .A2)

- a. The practice unit license (firm license) in the state in which the practice unit is domiciled (main office is located)
- b. Individual (personnel) licenses in the state in which the individual primarily practices public accounting for appropriate personnel on engagements selected

.09 If the review captain deems it appropriate to test out-of-state licenses, the review captain should expect the firm to provide documentation supporting its compliance with, or approach to, out-of-state licensing requirements. AICPA online CPA mobility provisions may be used to assist the review captain in evaluating the firm's approach to firm and individual out-of-state licensing. (Ref: par. .A3)

.10 If a firm does not possess the required applicable licenses to perform accounting and auditing engagements anytime during the peer review year through the issuance dates of the reviewed engagements, the review captain must document this on an FFC.

.11 If an individual with reporting responsibility does not have a current individual license to practice public accounting as required by state boards of accountancy, the review captain should consider the engagements reported on by that individual as not performed or reported on in conformity with applicable professional standards in all material respects (nonconforming).

Engagement Selection

.12 The review captain should select the following: (Ref: par. .A4–.A5)

- a. One engagement from each of the following levels of service performed by the firm:
 - i. Reviews of financial statements (performed under SSARSs)
 - ii. Compilations of financial statements with disclosures (performed under SSARSs)
 - iii. Compilations of financial statements that omit substantially all disclosures (performed under SSARSs)

- iv. Engagements performed under the SSAEs other than examinations
 - b. One engagement from each engagement partner responsible for the issuance of reports listed in item (a).
 - c. At least two engagements, unless only one is performed
- .13** The review captain should select a preparation engagement only in the following instances:
- a. It is the only level of service performed by an engagement partner.
 - b. It is the only engagement performed with disclosures.
 - c. It is the only engagement performed without disclosures.
 - d. Doing so is necessary to meet the minimum requirement of two engagements selected for review.
- .14** The review captain should select only the number of engagements needed to meet the requirements in paragraphs .12–.13.

Scope Limitations

.15 It is presumed that all engagements subject to the peer review will be included in the scope of the review. In the rare situations in which there are exclusions or other limitations on the scope of the review, a review captain should carefully consider the implications of such exclusions. This includes communicating with the firm and the administering entity (AE) the effect on the review and on the ability of the review captain to issue a peer review report.

Evaluation of Engagements

.16 The review captain should evaluate each engagement submitted for review. The evaluation should include the following:

- a. Consideration of the financial statements or information and the related accountant's reports on the engagements performed under the SSARSs and SSAEs
 - b. Review of all other documentation required by applicable professional standards on the engagements
 - c. Consideration of the information related to the engagement obtained through the peer review including, but not limited to, engagement profile information and other inquiries
- .17** For each engagement reviewed, the review captain should use peer review checklists and questionnaires to determine if
- a. the financial statements are fairly presented in accordance with generally accepted accounting principles in all material respects (or when applicable, with a special purpose framework) and
 - b. the firm has performed and reported on the engagement in accordance with the SSARSs or SSAEs in all material respects.

.18 The review captain should promptly inform the firm when an engagement is not performed or reported on in conformity with applicable professional standards in all material respects and remind the firm of any related obligations under professional standards to take appropriate actions. (Ref: par. .A6)

.19 Review captains or AEs should not require firms to perform omitted procedures, reissue accounting reports, or have previously issued financial statements revised and reissued because those are decisions for the firm and its client to make.

Identifying, Evaluating, and Aggregating Matters, Findings, and Deficiencies

.20 The review captain should determine the relative importance of matters noted during the review, individually and in the aggregate. To assist the review captain in determining the relative importance of matters, the reviewer should consult appendix A, "Examples of Noncompliance With Applicable Professional Standards." (Ref: par. .A7–.A8 and .A29)

.21 The review captain should document a matter on a matter for further consideration (MFC) form when the review captain identifies one or more "no" answers on peer review engagement checklists that were not resolved to the review captain's satisfaction.

.22 The review captain should document a finding on a finding for further consideration (FFC) form when the review captain concludes the submitted engagement was not performed or reported on in conformity with the requirements of the applicable standards.

.23 The review captain should document a deficiency in the report when the review captain concludes at least one engagement submitted for review was not performed or reported on in conformity with the requirements of the applicable standards in all material respects.

.24 The review captain should complete a Disposition of Matter for Further Consideration (DMFC) for all MFCs, indicating whether each one was

- a. included on a specific FFC form (individually or combined with other MFCs) or
- b. included as a deficiency (individually or combined with other MFCs) in a report with a peer review rating of *pass with deficiencies* or *fail*.

Communication Requirements for Closing Meeting and Exit Conference

.25 Prior to issuing the report or finalizing MFCs and FFCs, if applicable, the review captain should communicate the conclusions to the firm at a closing meeting. The review captain should discuss the following during the closing meeting: (Ref: par. .A9–.A11)

- a. Preliminary peer review results, including any matters, findings, or deficiencies, and the expected report rating
- b. The firm's requirement to respond to the MFCs, FFCs, or deficiencies included in the peer review report
- c. The firm's required written representations
- d. Other suggestions and observations for the firm to consider (Ref: par. .A12)

.26 The closing meeting should be held within a reasonable time frame before the firm's due date to allow enough time for the firm to determine appropriate remediation with respect to findings and deficiencies, if applicable. (Ref: par. .A13)

.27 The review captain should review and evaluate the responses on the FFCs and letter of response prior to the exit conference. The review captain should consider the following: (Ref: par. .A14–.A15)

- a. The firm's response should include the firm's actions taken or planned to remediate the findings or deficiencies, including timing of the remediation, and additional procedures to ensure the findings or deficiencies are not repeated in the future.
- b. The firm's actions should be feasible, genuine, and comprehensive.
- c. If the firm has acted, the review captain should review documentation of actions taken and consider whether the actions are appropriate. (Ref: par. .A16)

.28 After the firm has responded to the MFCs, FFCs, and deficiencies in the report and the review captain has assessed whether the responses are appropriate and has considered any additional impact to the peer review results, the review captain should communicate the results to the firm at an exit conference. The review captain should discuss the following during the exit conference:

- a. The peer review results to be submitted to the AE, including any changes to the information communicated at the closing meeting after consideration of the firm's responses to MFCs, FFCs, and deficiencies in the report
- b. The appropriateness of the firm's response
- c. The firm's representation letter
- d. Potential implications of the peer review acceptance process and their impact on the acceptance and completion of the peer review and on the reviewed firm's enrollment in the program including, but not limited to,
 - i. corrective actions for deficiencies and implementation plans for findings, if applicable;
 - ii. recommended report rating changes; and
 - iii. oversight
- e. Peer review noncooperation implications of consecutive non-pass report ratings, if applicable

Written Representations

.29 The review captain should request management of the firm to provide written representations for the peer review year that are dated as of the date of the peer review report stating the following: (Ref: par. .A17)

- a. Management has fulfilled its responsibility for the design of and compliance with a system of quality control for our accounting practice that provides us with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.
- b. Management acknowledges its responsibility for complying with the rules and regulations of state boards of accountancy and other regulations.
- c. Management has disclosed to the review captain all known instances of noncompliance or suspected noncompliance with the rules and regulations of state boards of accountancy or other regulatory bodies, including applicable firm and individual licensing requirements in each state in which it practices for the year under review. (If there are known instances of noncompliance, management should summarize the instances and, if applicable, describe its remediation of the noncompliance.)

- d. Management has discussed significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the team captain, if applicable.
- e. Management has fulfilled its responsibility to remediate nonconforming engagements, as stated by the firm in the letter of response, if applicable.
- f. Management understands the intended uses and limitations of the quality control materials it has developed or adopted. Management has tailored and augmented the materials as appropriate such that the quality control materials encompass guidance that is sufficient to assist it in conforming with professional standards (including the Statements on Quality Control Standards) applicable to its accounting and auditing practice.
- g. Management has responded fully and truthfully to the review captain's inquiries.
- h. Management has provided the review captain with all relevant information including all engagements with periods ending during (or, for financial forecasts or projections and agreed-upon procedures engagements, report dates in) the year under review.
- i. Management has disclosed to the review captain that the firm did not perform any engagements under the Statements on Auditing Standards (SASs) or *Government Auditing Standards*, examinations under the Statements on Standards for Attestation Engagements (SSAEs), or engagements under the Public Company Accounting Oversight Board (PCAOB) standards that are not subject to PCAOB permanent inspection.
- j. Management acknowledges that failure to properly include the engagements listed in (i) could be deemed a failure to cooperate and may result in termination from the Peer Review Program and, if termination occurs, may result in an investigation of a possible violation by the appropriate regulatory, monitoring, or enforcement body.
- k. Management has provided the review captain communications or summaries of communications from regulatory, monitoring, or enforcement bodies relating to allegations or investigations of deficiencies in the conduct of an accounting or attestation engagement performed and reported on by the firm, whether the matter relates to the firm or its personnel, within three years preceding the current peer review year-end.
- l. Management has disclosed that there are no known limitations or restrictions on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end, or management should include a summary of the limitations or restrictions on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end.

.30 If a firm fails to discuss significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the review captain, the review captain should immediately consult with the relevant AE because this constitutes a failure to cooperate, and the firm would be subject to fair procedures that could result in the firm's enrollment in the program being terminated. (Ref: par. .A18)

.31 If, in addition to the representations required by paragraph .29, the review captain determines that it is necessary to obtain other representations based on the circumstances and nature of the peer review, the review captain should request such other written representations.

Reporting on Engagement Reviews

.32 To determine the report rating, the review captain should use the results of the evaluation of engagements reviewed. (Ref: par. .A19–.A23)

.33 The written report in an engagement review should (Ref: par. .A24)

- a. be dated as of the exit conference date.
- b. be issued on letterhead of the firm performing the review.
- c. state at the top of the report the title "Report on the Firm's Conformity With Professional Standards on Engagements Reviewed."
- d. include headings for each of the following sections:
 - i. Firm's Responsibility
 - ii. Peer Reviewer's Responsibility
 - iii. Deficiency(ies) Identified in the Firm's Conformity With Professional Standards on Engagements Reviewed (if applicable)
 - iv. Scope Limitation (if applicable)
 - v. Conclusion
- e. state that the review captain reviewed selected accounting engagements of the firm and include the year-end covered by the peer review.
- f. state that the peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews (the standards) established by the Peer Review Board of the American Institute of Certified Public Accountants.
- g. state that the nature, objectives, scope, limitations of, and procedures performed in an engagement review as described in the standards can be found on the AICPA website where the standards are summarized.
- h. include a URL reference to the AICPA website where the standards are located and state that the summary includes an explanation of how engagements identified as not performed or reported on in conformity with applicable professional standards, if any, are evaluated by a peer reviewer to determine a peer review rating.
- i. state that the firm is responsible for designing a system of quality control and complying with it to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects and for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.
- j. state that the peer reviewer's responsibility is to evaluate whether the engagements submitted for review were performed and reported on in conformity with applicable professional standards in all material respects.

- k. state that an engagement review does not include reviewing the firm's system of quality control and compliance therewith and, accordingly, the review captain expresses no opinion or any form of assurance on that system. (Ref: par. .A25)
- l. in the event of a scope limitation, include an additional paragraph before the last paragraph that describes the relationship of the excluded engagements to the firm's practice, the highest level of service and industry concentration, if any, of the engagements excluded from the potential selection, and the effect of the exclusion on the scope and results of the peer review. Tailor the conclusion, as appropriate, to address the scope limitation.
- m. identify the different peer review ratings that the firm could receive.
- n. in a report with a peer review rating of *pass*, state
 - i. that nothing came to the review captain's attention that caused the review captain to believe that the engagements submitted for review were not performed and reported on in conformity with applicable professional standards in all material respects.
 - ii. that the firm has received a peer review rating of *pass*.
- o. in a report with a peer review rating of *pass with deficiencies*, state
 - i. that because of the deficiencies previously described, the review captain believes that at least one but not all the engagements submitted for review were not performed and reported on in conformity with applicable professional standards in all material respects.
 - ii. that the firm has received a peer review rating of *pass with deficiencies*.
- p. in a report with a peer review rating of *fail*, state
 - i. that because of the deficiencies previously described, the review captain believes that all the engagements submitted for review were not performed or reported on in conformity with applicable professional standards in all material respects.
 - ii. that the firm has received a peer review rating of *fail*.
- q. in a report with a peer review rating of *pass with deficiencies or fail*,
 - i. include descriptions of the deficiencies (each of these should be numbered).
 - ii. if there are any repeat deficiencies, state that the deficiency was noted in the firm's previous peer review. (Ref: par. .A26–.A27)
 - iii. identify the level of service for any deficiencies. If the deficiency is industry specific, also identify the industry.

Submission of Peer Review Documentation to the AE by the Review Captain

.34 Within 30 days of the exit conference date or by the firm's peer review due date, whichever date is earlier, the review captain should submit to the

AE or complete electronically, as applicable, the following documents: (Ref: par. .A28)

- a. Report and letter of response, if applicable
- b. Review Captain Summary
- c. Review summary
- d. FFC forms, if applicable
- e. MFC forms, if applicable
- f. DMFC, if applicable
- g. Firm's representation letter

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.02)

.A1 Firms eligible to have an engagement review may elect to have a system review. Refer to section 210, *General Principles and Responsibilities for Reviewers — System Reviews*, for the requirements of a system review.

Planning (Ref: par. .06–.11)

.A2 Acceptable documentation includes an original or copy of the license, print-out from an online license verification system, correspondence from the licensing authority, or other reasonable alternative documentation. The review captain's judgment may be needed to determine what alternative documentation is reasonable.

.A3 The review captain may verify an out-of-state practice unit license or an out-of-state individual license on an individual engagement basis when that engagement is selected for review and was performed by the reviewed firm in another state requiring a firm or individual license. The decision to perform further testing is based on the reviewer's evaluation of the firm's responses to inquiries.

Engagement Selection (Ref: par. .12–.14)

.A4 The objective of the engagement selection requirements is to select one engagement from each engagement partner and one engagement from each level of service listed in paragraph .12a for the firm.

.A5 Engagement selection may also include consideration of industries.

Evaluation of Engagements (Ref: par. .16–.19)

.A6 Although it is ultimately the firm's responsibility, the review captain and firm may collaborate to determine what remediation is necessary in the circumstances.

Identifying, Evaluating, and Aggregating Matters, Findings, and Deficiencies (Ref: par. .20–.24)

.A7 Exhibit A shows a broad understanding of the peer review process, from the review of submitted engagements to the determination of a matter, finding, or deficiency. It also illustrates the aggregation of these items, their documentation, and their potential impact on the report rating.

Exhibit A

.A8 One or more matters may be elevated to a finding or deficiency. To determine if a matter should be elevated, the review captain should consider the matter's nature and relative importance, if the matter is material to the understanding of the report or financial statements, or if the matter represents the omission of a critical procedure including documentation.

Communication Requirements for Closing Meeting and Exit Conference (Ref: par. .25–.28)

.A9 The closing meeting and exit conference may be attended by representatives of the AE, the board, AICPA staff, or other board-authorized organizations with oversight responsibilities.

.A10 The purpose of a separate closing meeting and exit conference is to provide the firm with sufficient time to determine appropriate responses to the matters, findings, or deficiencies identified and to provide the review captain with sufficient time to assess the firm's responses prior to the report date (exit conference date). If these steps have been taken prior to the closing meeting or are not necessary, the closing meeting and exit conference may be combined.

.A11 Team members or specialists may participate in or be available for the closing meeting and exit conference. This may be useful when the review captain does not have the experience to review the industry of an engagement that was reviewed by a team member.

.A12 Examples of other suggestions and observations include implications of upcoming changes in professional standards, operational or efficiency suggestions, and minor areas for improvement.

.A13 A reasonable time frame is typically 30 days.

.A14 The purpose of the firm's response on the FFC or in the letter of response is for a firm to document the specific actions that will be taken to correct findings or deficiencies noted by the review captain.

.A15 The AE's peer review committee (committee) may require the firm to make and document appropriate considerations regarding nonconforming engagements as a condition of acceptance of the peer review. The firm's response may affect other monitoring actions the committee may impose, including actions to verify that the firm adheres to the intentions indicated in its response.

.A16 Examples of firm actions taken in response to nonconforming engagements may include, but are not limited to,

- a. omitted procedures performed (including documentation),
- b. reissued report and financial statements, or
- c. notification to users to discontinue use of previously issued reports.

Written Representations (Ref: par. .29–.31)

.A17 Exhibit A, "Illustrative Representation Letter," in section 320 provides an illustrative example of a firm's representation letter.

.A18 Examples of how a review captain may discover significant issues include the following:

- a. The AE provides the review captain with a referral specific to the firm or a professional within the firm.

- b. The review captain identifies information about significant issues within a firm from a news outlet or publicly available website (for example, via the PCAOB).

Reporting on Engagement Reviews (Ref: par. .32–.33)

.A19 A report with a peer review rating of *pass* is issued when the review captain concludes that the engagements submitted for review were performed and reported on in conformity with the requirements of applicable professional standards in all material respects.

.A20 A report with a peer review rating of *pass with deficiencies* is issued when the review captain concludes that at least one but not all the engagements submitted for review contain a deficiency.

.A21 A report with a peer review rating of *fail* is issued when the review captain concludes all the engagements submitted for review contain a deficiency.

.A22 The review captain should not expand the scope beyond the original selection of engagements in an effort to change the conclusion from a peer review rating of *fail* in these circumstances.

.A23 In the event of a scope limitation, a report with the applicable peer review rating (*with a scope limitation*) is issued.

.A24 Exhibit B, "Illustrative Examples of a Reviewer's Report on the Firm's Conformity With Professional Standards on Engagements Reviewed," contains example reports that may be tailored by the reviewer to meet the requirements described in paragraph .33.

.A25 Review of a firm's documentation or procedures related to its system of quality control is outside the scope of an engagement review. An engagement review does not include tests of the firm's administrative or personnel files, interviews of selected firm personnel, or other procedures performed in a system review. Therefore, an engagement review does not provide the review captain with a basis for expressing any form of assurance on the firm's system of quality control for its accounting practice.

.A26 The following is an example of a repeat deficiency: a review captain documented a disclosure deficiency or finding in the prior review, and the same disclosure deficiency is documented in the current review.

.A27 If a repeat deficiency has occurred on two or more prior reviews, the review captain should state in the current report that "this deficiency was noted on previous reviews."

Submission of Peer Review Documentation to the AE by the Review Captain (Ref: par. .34)

.A28 All peer reviews are subject to oversight and working papers may be requested by the AE or AICPA staff.

.A29

Appendix A — Examples of Noncompliance With Applicable Professional Standards

The following is a list of examples of noncompliance with applicable professional standards. This is not an all-inclusive list, and the reviewer should decide if the noncompliance is a matter, finding, or deficiency as described in paragraphs .20–.24 and by using the following guidance. (Ref: par. .20–.24 and .A7)

List of Matters and Findings That Generally Would Not Result in a Deficiency

Reports

- Omission of phrases or use of phrases not in conformity with the applicable professional standards for the report issued
- Compilation reports that failed to include the paragraph regarding the omission of supplemental information, as applicable in the circumstances
- Reports that reflected financial statement titles and terminology not in accordance with applicable professional standards
- Failure to explain the degree of responsibility the accountant is taking with respect to supplementary information

Financial Statement Measurement

- Types of revenues and expenses not presented and disclosed in accordance with applicable professional standards (for example, freight revenue and related shipping and handling expenses)
- Financial statements prepared on a basis of accounting other than generally accepted accounting principles (GAAP) that are properly reported on but contain inconsistencies between the report and the financial statements, where the actual basis is readily determinable

Presentation and Disclosure

- Supplementary information not clearly segregated or marked as supplementary and departures from standard report presentation with respect to supplementary information
- Reviewed financial statement presentation that is inappropriate for the type of not-for-profit organization being reported on
- Compiled financial statements prepared using a special purpose framework reflecting titles normally associated with financial statements prepared under GAAP when the applicable financial reporting framework is not clearly identified
- Failure to disclose the accounting policy related to advertising costs in the notes to the financial statements
- Omission of the disclosure of the method of income recognition as required by applicable professional standards
- Misclassification of items on the statement of cash flows

- Omitted or inadequate disclosures related to account balances or transactions (for example, disclosure deficiencies relating to accounting policies, inventory, valuation allowances, long-term debt, related-party transactions, or concentrations of credit risk)
- Bank overdrafts not properly presented on the balance sheet, failure to accrue income taxes where the accrual and provision are not expected to be significant to the financial statements taken as a whole, and missing insignificant disclosures in the financial statements
- Financial statement titles that were inconsistent with the accountant's report

**Statements on Standards for Accounting and Review Services
Procedures (Including Documentation)**

- The written communication of the understanding with management regarding the services to be performed (for example, an engagement letter) exists but fails to address the requirements of the applicable professional standards

List of Matters and Findings That Generally Would Result in a Deficiency

Reports

- Issuance of a review report when the accountant is not independent
- Inappropriate references to GAAP in the accountant's report when the financial statements were prepared using a special purpose framework
- Failure to disclose the lack of independence in a compilation report
- Failure to appropriately modify a report for a scope limitation or significant departure from the basis of accounting used for the financial statements
- Failure to adopt current applicable professional standards, or the accountant's report does not contain the critical elements of the current applicable professional standards
- Failure to disclose, in the accountant's report, significant departures from professional standards (examples include omission of significant income tax provisions on interim financial statements, omission of significant disclosures related to defined employee benefit plans, or omission of required supplemental information for a common-interest realty association)
- Failure to indicate on the accountant's report the periods covered by the report, and they cannot be determined from reading the financial statements
- Failure to include a separate paragraph for departures from the financial reporting framework, including dollar amounts or a statement that the impact was not determined
- A compilation report that fails to include all the reasons why the accountant is not independent when such reasons are presented (for example, the report provides only one of three reasons)

- A review report on financial statements that omits disclosures required by GAAP and that is not appropriately modified for the omissions
- For a compilation engagement, failure to disclose the omission of substantially all disclosures or the statement of cash flows (if applicable) required by the applicable financial reporting framework
- For a compilation or review engagement performed in accordance with Statements on Standards for Accounting and Review Services (SSARSs), failure to appropriately modify the report in accordance with professional standards, when the financial statements are prepared in accordance with a special purpose framework
- For preparation engagements, failure to issue a disclaimer report, when the accountant is unable to include a statement on each page of the financial statements indicating, at a minimum, that "no assurance is provided"

Financial Statement Measurement

- Investments in marketable securities presented at cost and not fair market value, resulting in a material misstatement to the balance sheet
- Inclusion of material balances that are not appropriate for the basis of accounting used
- Failure to include material amounts or balances necessary for the basis of accounting used (examples include omission of accruals, failure to amortize a significant intangible asset, failure to provide for losses or doubtful accounts, or failure to provide for deferred income taxes)
- Improper accounting of a transaction (for example, recording a capital lease as an operating lease)
- Use of an inappropriate method of revenue recognition

Presentation and Disclosure

- Disclosure of omission of substantially all disclosures (in a compilation without disclosures) when, in fact, substantially all disclosures have been included
- Misclassification of transactions or balances and omission of significant required disclosures related to financial statement balances on transactions
- Failure to disclose that compiled financial statements that omit substantially all disclosures were prepared using a special purpose framework and the basis of accounting is not readily determinable from reading the accountant's compilation report
- For a preparation engagement, failure to include, either on the face of the financial statements or in a note to the financial statements, a description of the financial reporting framework when the financial statements have been prepared in accordance with a special purpose framework
- For a preparation engagement, failure to disclose the omission of substantially all disclosures or the statement of cash flows (if applicable) required by the applicable financial reporting framework

- For a preparation engagement, failure to disclose a material misstatement in the financial statements when the accountant prepares financial statements that contain a known departure or departures from the applicable financial reporting framework
- Significant departures from the financial statement formats prescribed by industry accounting and audit guides
- Omission of disclosures related to significant accounting policies applied (GAAP or special purpose framework)
- Failure to include a summary of significant assumptions in a financial forecast or projection
- Failure to segregate the statement of cash flows into the components of operating, investing, and financing
- Failure to disclose the cumulative effect of a change in accounting principles
- Failure to disclose significant related-party transactions
- Omission of actual financial statements that are referred to in the report
- Failure to include one or more statements of cash flows when comparative results of operations are presented in financial statements prepared in accordance with GAAP

SSARSs Procedures (Including Documentation)

- Failure to establish an understanding with management regarding the services to be performed through a written communication (for example, an engagement letter)
- Failure to document significant findings or issues
- Failure to document communications to the appropriate level of management regarding fraud or illegal acts that come to the accountant's attention
- For review engagements, failure to perform or document analytical and inquiry procedures, including the matters covered, and the development of and basis for the accountant's expectations
- For review engagements, failure to document significant unusual matters and their disposition
- For review engagements, failure to obtain a client management representation letter
- Failure to obtain all required signatures on the engagement letter (or other suitable written agreement)

.A30

Exhibit B — Illustrative Examples of a Reviewer's Report on the Firm's Conformity With Professional Standards on Engagements Reviewed

This exhibit contains various illustrations of a peer reviewer's report on the reviewed firm's conformity with professional standards on engagements reviewed.

Illustration 1 — A Reviewer's Report on the Firm's Conformity With Professional Standards on Engagements Reviewed With a Peer Review Rating of Pass

Illustration 2 — A Reviewer's Report on the Firm's Conformity With Professional Standards on Engagements Reviewed With a Peer Review Rating of Pass With Deficiencies

Report on the Firm's Conformity With Professional Standards on Engagements Reviewed¹

[Exit Conference Date]

To the Partners of *[or other appropriate terminology]* XYZ & Co. and the Peer Review Committee of the *[insert the name of the applicable administering entity]*.²

We³ have reviewed selected accounting engagements of XYZ & Co. (the firm)⁴ issued with periods ending during the year ended June 30, 20XX. Our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

¹ The report title and body should be tailored as appropriate when a single engagement is reviewed. The title should be changed to "Report on the Firm's Conformity With Professional Standards on an Engagement Reviewed."

² The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of *[or appropriate terminology]* XYZ & Co. and the National Peer Review Committee."

³ The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

⁴ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

A summary of the nature, objectives, scope, limitations of, and the procedures performed in an engagement review as described in the Standards may be found at www.aicpa.org/prsummary.

Firm's Responsibility

The firm is responsible for designing a system of quality control and complying with it to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to evaluate whether the engagements submitted for review were performed and reported on in conformity with applicable professional standards in all material respects.

An engagement review does not include reviewing the firm's system of quality control and compliance therewith and, accordingly, we express no opinion or any form of assurance on that system.

Conclusion

Based on our review, nothing came to our attention that caused us to believe that the engagements submitted for review by XYZ & Co.⁵ issued with periods ending during the year ended June 30, 20XX, were not performed and reported on in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *pass*.

Report on the Firm's Conformity With Professional Standards on Engagements Reviewed¹

[Exit Conference Date]

To the Partners of *[or other appropriate terminology]* XYZ & Co. and the Peer Review Committee of the *[insert the name of the applicable administering entity]*:²

⁵ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

¹ The report title and body should be tailored as appropriate when a single engagement is reviewed. The title should be changed to "Report on the Firm's Conformity With Professional Standards on an Engagement Reviewed."

² The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of *[or appropriate terminology]* XYZ & Co. and the National Peer Review Committee."

We³ have reviewed selected accounting engagements of XYZ & Co. (the firm)⁴ issued with periods ending during the year ended June 30, 20XX. Our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

A summary of the nature, objectives, scope, limitations of, and the procedures performed in an engagement review as described in the Standards may be found at www.aicpa.org/prsummary.

Firm's Responsibility

The firm is responsible for designing a system of quality control and complying with it to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to evaluate whether the engagements submitted for review were performed and reported on in conformity with applicable professional standards in all material respects.

An engagement review does not include reviewing the firm's system of quality control and compliance therewith and, accordingly, we express no opinion or any form of assurance on that system.

Deficiencies⁵ Identified in the Firm's Conformity With Professional Standards on Engagements Reviewed⁶

We noted the following deficiencies⁷ during our review:

1. On one review engagement of a manufacturing client, we noted that the accompanying accountant's report was not appropriately modified when the financial statements did not appropriately present or disclose matters in accordance with industry standards.
2. On a review engagement, we noted that the firm failed to obtain a management representation letter, and its working papers failed to document the matters covered in the accountant's inquiry and analytical procedures. These deficiencies were identified on the firm's previous review.

Conclusion

Because of the deficiencies previously described, we concluded that at least one but not all of the engagements submitted for review by XYZ & Co.⁸ issued with periods ending during the year ended June 30, 20XX, were not performed and reported on in conformity with applicable professional standards in all material

³ The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

⁴ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

⁵ The wording should be tailored to indicate a single deficiency, when applicable.

⁶ The wording should be tailored to indicate a single engagement reviewed, when applicable.

⁷ The deficiencies provided are examples for illustrative purposes only.

⁸ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *pass with deficiencies*.

Report on the Firm's Conformity With Professional Standards on Engagements Reviewed¹

[Exit Conference Date]

To the Partners of [or other appropriate terminology] XYZ & Co. and the Peer Review Committee of the [insert the name of the applicable administering entity]²

We³ have reviewed selected accounting engagements of XYZ & Co. (the firm)⁴ issued with periods ending during the year ended June 30, 20XX. Our peer review was conducted in accordance with the Standards for Performing and Reporting on Peer Reviews established by the Peer Review Board of the American Institute of Certified Public Accountants (Standards).

A summary of the nature, objectives, scope, limitations of, and the procedures performed in an engagement review as described in the Standards may be found at www.aicpa.org/prsummary.

Firm's Responsibility

The firm is responsible for designing a system of quality control and complying with it to provide the firm with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. The firm is also responsible for evaluating actions to promptly remediate engagements deemed as not performed or reported on in conformity with professional standards, when appropriate, and for remediating weaknesses in its system of quality control, if any.

Peer Reviewer's Responsibility

Our responsibility is to evaluate whether the engagements submitted for review were performed and reported on in conformity with applicable professional standards in all material respects.

¹ The report title and body should be tailored as appropriate when a single engagement is reviewed. The title should be changed to "Report on the Firm's Conformity With Professional Standards on an Engagement Reviewed."

² The report of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the Partners of [or appropriate terminology] XYZ & Co. and the National Peer Review Committee."

³ The report should use the plural *we*, *us*, and *our* even if the review team consists of only one person. The singular *I*, *me*, and *my* are appropriate only if the reviewed firm has engaged another firm to perform its review and the reviewing firm is a sole practitioner.

⁴ The report of a firm that is required to be registered with and inspected by the PCAOB should be tailored here to add "applicable to engagements not subject to PCAOB permanent inspection."

An engagement review does not include reviewing the firm's system of quality control and compliance therewith and, accordingly, we express no opinion or any form of assurance on that system.

Deficiencies⁵ Identified in the Firm's Conformity With Professional Standards on Engagements Reviewed⁶

We noted the following deficiencies⁷ during our review:

1. Our review disclosed several failures to adhere to applicable professional standards in reporting on material departures from generally accepted accounting principles (GAAP) and in conforming to standards for accounting and review services. Specifically, the firm did not disclose in certain compilation and review reports failures to conform with GAAP in accounting for leases, in accounting for revenue from construction contracts, and in disclosures made in the financial statements or the notes thereto concerning various matters important to an understanding of those statements. The compilation and review engagements were in the construction and manufacturing industries, respectively. In addition, the firm did not obtain management representation letters on review engagements.
2. During our review, we noted the firm did not modify its compilation reports on financial statements when neither the financial statements nor the footnotes noted that the statements were presented using a special purpose framework. This deficiency was noted in the firm's previous peer reviews.
3. In the construction industry compilation engagements that we reviewed, disclosures of material lease obligations as required by GAAP were not included in the financial statements, and the omissions were not disclosed in the accountant's reports.
4. During our review of the firm's engagements to prepare financial statements, we noted the firm did not issue a disclaimer that made clear no assurance was provided on the financial statements and also did not indicate that no assurance was provided on each page of the financial statements.

Conclusion

Because of the deficiencies previously described, we concluded that all the engagements submitted for review by XYZ & Co.⁸ issued with periods ending during the year ended June 30, 20XX, were not performed and reported on in conformity with applicable professional standards in all material respects. Firms can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. XYZ & Co. has received a peer review rating of *fail*.

PR-C Section 300

General Principles and Responsibilities for Reviewed Firms

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains general principles and responsibilities for reviewed firms. The requirements and guidance in this section supplement the requirements and guidance in section 100, *Concepts Common to All Peer Reviews*.

Effective Date

.02 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objective

.03 The objective of the reviewed firm is to enhance its effectiveness and contribute to the quality of our profession by undergoing a peer review performed in accordance with the Standards for Performing and Reporting on Peer Reviews (the standards) established by the Peer Review Board (the board) of the American Institute of Certified Public Accountants.

Definitions

.04 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Ethical Requirements Relating to a Peer Review

.05 A reviewed firm should maintain independence in fact and appearance from the reviewing firm or firms, reviewers, and any other individuals who participate in or are associated with the peer review.

Preparing for a Peer Review

Engage a Reviewer

.06 The firm should timely engage a reviewer to perform the peer review in accordance with the standards. The firm and the captain should agree on the commencement and anticipated exit conference dates. (Ref: par. .A1–.A2)

.07 The firm should consider whether the qualifications of the captain and team members, if applicable, are commensurate with the nature of the firm's practice.

.08 The firm should designate a partner from the firm as the peer review contact. The peer review contact should be knowledgeable about the nature of the firm's practice and is accountable for providing complete and accurate information to the peer review team and the administering entity (AE).

Licensure

.09 It is the reviewed firm's responsibility to understand and comply with its licensing requirements. Therefore, it should be prepared to respond to the reviewer's inquiries and requests for documentation. This is also important for out-of-state firm and individual licenses when licensing requirements may be more difficult to identify and understand.

Written Representations

.10 Written representations should be provided to the captain on firm letterhead from members of management of the firm whom the captain or AE believes are responsible for and knowledgeable about, directly or through others in the firm, the matters covered in the representations, the firm, and its system of quality control. (Ref: par. .A3–.A4)

.11 The written representations should be in the form of a representation letter on firm letterhead, addressed to the captain, and signed by a member of management described in paragraph .10, as of the date of the peer review report. (Ref: par. .A5)

Cooperating and Complying With the Requirements of the Program

.12 A firm should cooperate with the reviewer, AE, and the board in all matters related to the program. (Ref: par. .A6–.A7)

.13 A firm should ensure its peer review is submitted in compliance with the requirements of the program.

- a. A firm is considered not cooperating and its enrollment is subject to termination from the program for reasons including, but not limited to, the following: (Ref: par. .A7)
 - i. Once the review has commenced, not responding to inquiries or providing information necessary to ensure the review is accepted and completed
 - ii. Not providing documentation including the representation letter, quality control documents, engagement working papers, and all elements of the firm's system of quality control
 - iii. Not responding to matters for further consideration (MFCs) or findings for further consideration (FFCs) timely
 - iv. Limiting access to offices, personnel, or other once the review has commenced
 - v. Not facilitating the arrangement for the exit conference on a timely basis
 - vi. Failing to timely file a letter of response, if applicable
 - vii. Failing to cooperate during oversight

- viii. Failing to timely agree to and complete required corrective actions or implementation plans
- ix. Failing to ensure that the firm's peer review is submitted to the AE timely
- b. A firm is considered not complying with the requirements of the program and its enrollment is subject to termination from the program for reasons including, but not limited to, the following:
 - i. Withholding information significant to the peer review (Ref: par. .A8)
 - ii. Failing to correct deficiencies or significant deficiencies after consecutive non-pass (*pass with deficiencies* or *fail*) peer review reports (Ref: par. .A9)
 - iii. Failing to correct deficiencies or significant deficiencies after consecutive corrective actions required by the committee on the same peer review
 - iv. Receiving a peer review report with deficiencies or significant deficiencies that indicate the firm is so seriously deficient in its performance that the committee believes educational and remedial corrective actions or implementation plans would not be adequate
 - v. Failing to provide the AE with a substantive response, and the firm does not revise its response or provides additional responses that are not substantive as determined by the AE (Ref: par. .A10)
 - vi. Failing to provide substantive responses during the AE's process of determining if information provided by a firm was erroneous or omitted, which results in a significant change in the planning, performance, evaluation of results, or peer review report (Ref: par. .A11)
 - vii. Failing to timely notify the AE that it is performing a type of engagement or engagement in an industry that the firm had previously represented by written communication to the AE that it was no longer performing and had no plans to perform, in response to a related corrective action or implementation plan and the corrective action or implementation plan was eliminated by the AE based on that representation

.14 If a firm is deemed not cooperating or not complying with the requirements of the program due to the reasons described in paragraph .13, it should be notified by a delivery method providing proof of delivery (including electronic means) that the board will appoint a hearing panel to consider whether the firm's enrollment in the program should be terminated in accordance with fair procedures established by the board.

.15 If a firm has AICPA members, the fact that the firm's enrollment in the program has been terminated, whether with or without a hearing, should be published in such form and manner as AICPA Council may prescribe.

Reenrollment in the Program

.16 To reenroll in the program, a firm should submit a request to reenroll in the program through an AE. If the firm was dropped or terminated from the program, the firm should address and remediate the circumstances that caused the firm to be dropped or terminated to be considered for reenrollment in the

program. Common criteria for reenrollment include, but are not limited to, submitting evidence to the AE or hearing panel that demonstrates the following: (Ref: par. .A12–.A14)

- a. Completion of the requested action in compliance with the requirements of the program
- b. Changes in the firm's system of quality control (such as personnel changes or procedural changes, methodologies to identify the complete population of engagements performed, access to technical resources or membership in quality centers, and voluntary changes in the practice or types of industries or engagements performed)
- c. Competency through completion of relevant CPE, training, or competency assessments
- d. Assessment of quality in the performance of engagements through internal or external monitoring results (such as pre-issuance reviews, post-issuance reviews, and internal inspections that reflect that engagements are materially performed and reported on in conformity with applicable professional standards)

.17 If reenrollment is approved and the firm is past its next peer review due date, the firm should complete its subsequent peer review

- a. within 90 days of reenrolling if the firm's most recent peer review is completed,
- b. within 90 days of the AE's report acceptance body (RAB) determining that actions taken are satisfactory to complete a commenced peer review, or
- c. by a later date set by the hearing panel or the AE.

Publicizing Peer Review Information

.18 The firm should not publicize the results of the review or distribute copies of the peer review report to its personnel, clients, or others until the date of acceptance. (Ref: par. .A15–.A20)

Acquisitions and Divestitures

.19 If a firm has had an acquisition of another practice or a portion thereof or a divestiture of a significant portion of its practice during or subsequent to its peer review year, the reviewed firm or the reviewer should consult with the relevant AE and AICPA staff prior to the commencement of the review to consider the appropriate scope of the review or other actions that should be taken. (Ref: par. .A21–.A22)

Resigning From the Program

.20 A firm may resign from the program when it is no longer performing engagements that require the firm to undergo a peer review. To resign from the program, a firm should submit a written request to the AE before the firm's peer review has commenced. A firm should consult with its state board of accountancy to determine if there are rules that require enrollment in the program even if the firm does not perform services that include issuing reports or when it is no longer performing engagements that require a firm to undergo a peer review.

.21 A firm enrolled in the program that has been notified that it is the subject of a hearing should not resign until the matter causing the hearing has been resolved.

.22 To resign from the program once a firm's peer review has commenced but has not been completed, a firm should submit a letter pleading guilty, acknowledging it has not cooperated with the program, waiving its right to a hearing, and for firms with AICPA members, agreeing to allow the AICPA to publish, in such form and manner as the AICPA Council may prescribe, the fact that the firm has resigned from the program before completion of its peer review, evidencing that it has not cooperated with the program. In addition, if (a) the firm has been notified of the reviewer's or AE's intent to issue or require a report with a peer review rating of *pass with deficiencies* or *fail* or (b) the reviewer or AE has knowledge of the discovery of an engagement that was not conducted in accordance with professional standards on which the firm must take, or would likely be required to take, action in accordance with professional standards, then the fact that the situation in item (a) or (b) existed would also be published for firms with AICPA members. If the firm does not sign the letter pleading guilty and waiving its right to a hearing, the firm will be referred to a board hearing panel. The panel will consider terminating the firm's enrollment due to not cooperating with the program. (Ref: par. .A23)

Natural Disasters and Other Catastrophic Events

.23 If a firm experiences a natural disaster or other catastrophic event that affects its ability to comply with the requirements of the standards, the firm should consult with its AE.

.24 If the situation affected both the firm's operations and its ability to comply with peer review requirements, the firm should discuss the following with the AE:

- a. The firm's current peer review year-end and due date
- b. The extent of damage to the firm's offices and the working papers subject to peer review, if applicable (This would include off-site storage or data-retention facilities that house working papers subject to peer review.)
- c. The availability, or lack thereof, of personnel that performed engagements subject to peer review
- d. The firm's ability to continue operating and performing engagements subject to peer review
- e. If known, whether the firm's scheduled peer reviewer was also affected
- f. The amount of time the firm deems necessary before it would be ready to undergo a peer review

The AE should assist in determining whether there could be a possible scope limitation due to the exclusion of any affected engagements or offices, the need for a change in year-end or an extension of due date, and the effect on the firm's continuing peer review cycle. These situations will be considered on a case-by-case basis.

.25 If the firm's scheduled reviewer was directly affected by a natural disaster or other catastrophic event and may no longer be able to perform the review, the firm should consult with its AE. The AE will assist the firm in determining whether it is appropriate to extend the peer review due date or if the firm should engage another reviewer to perform its peer review. (Ref: par. .A24)

Application and Other Explanatory Material

Preparing for a Peer Review

Engage a Reviewer (Ref: par. .06–.08)

.A1 *Timely* ordinarily means performing the review within three to five months after the peer review year-end; the firm may need to contact its reviewer in advance to meet this time frame. The review should be planned to provide the review team with sufficient time to perform the review and to provide the firm with sufficient time prior to the exit conference to determine appropriate responses to matters, findings, deficiencies, and significant deficiencies identified during the review.

.A2 The terms and conditions of the peer review may be summarized in an engagement letter between the reviewed firm and the reviewing firm.

Written Representations (Ref: par. .10–.11)

.A3 Written representations are necessary information that describe matters significant to the peer review to assist in the planning, performance of, and reporting on the peer review. The specific representations are detailed in section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*, and section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*, as applicable.

.A4 Members of management responsible for and knowledgeable about the required representations normally include the managing partner and partner in charge of the firm's system of quality control.

.A5 The representation letter is addressed to the captain because the captain is concerned with events occurring during the peer review period and through the date of the peer review report that may require an adjustment to the report or other peer review documents.

Cooperating and Complying With the Requirements of the Program (Ref: par. .12–.15)

.A6 Cooperation includes completing actions timely and in compliance with the requirements of the program.

.A7 A firm is considered not cooperating and is subject to being dropped from the program by the board for reasons including, but not limited to, failing to do the following:

- a. Timely file requested information with the AE, prior to the commencement of the peer review.
- b. Timely submit requested information to the reviewer that is necessary to plan or perform the firm's peer review, prior to the commencement of the peer review.
- c. Have a peer review by the due date.
- d. Accurately represent its accounting and auditing practice, as defined by the program, after notifying its AE that it does not perform engagements that require the firm to have a peer review.
- e. Timely pay in full the fees and expenses of the review team formed by an AE, or timely pay all fees related to the administration of

the program that have been authorized by the governing body of an AE and the AICPA.

If a firm is deemed not cooperating as a result of any of the failures described, it will be notified by a delivery method providing proof of delivery (including electronic means) that its enrollment will be dropped after 30 days if the firm does not cooperate. The board may drop a firm's enrollment with or without holding a hearing. A firm whose enrollment has been dropped or terminated from the program may appeal within 30 calendar days of notification pursuant to fair procedures established by the board. If a firm's enrollment is dropped or terminated for not accurately representing its accounting and auditing practice, or for subsequent failure to submit a peer review by a required due date, this may result in an investigation of a possible violation by a regulatory, monitoring, or enforcement body.

.A8 Information significant to the peer review may include, but is not limited to, the following:

- a. Failing to discuss communications received by the reviewed firm relating to allegations or investigations in the conduct of accounting, auditing, or attestation engagements from regulatory, monitoring, or enforcement bodies
- b. Omission or misrepresentation of information relating to the reviewed firm's accounting and auditing practice as defined by the standards, including, but not limited to, engagements performed under *Government Auditing Standards*, audits of employee benefit plans, audits performed under FDICIA, and examinations of service organizations (SOC 1® and SOC 2® engagements)

.A9 A firm should be notified after receiving a non-pass (*pass with deficiencies or fail*) peer review report of its responsibility to correct the deficiencies or significant deficiencies. This notification will be via a delivery method providing proof of delivery (including electronic means).

.A10 The AE has the authority to determine if a firm's response is substantive.

.A11 The AE has the authority to determine if erroneously provided or omitted information by a firm that results in a significant change in the planning, performance, evaluation of results, or peer review report is a matter of not cooperating with the program.

Reenrollment in the Program (Ref: par. .16-.17)

.A12 Reenrollment in the program is subject to evaluation by either the AE or a hearing panel of the board. The hearing panel or AE's peer review committee may also require other actions as a condition of reenrollment.

.A13 Determination of final acceptance or completion of a review is subject to the AE's RAB.

.A14 Reenrollment decisions subject to approval by a hearing panel of the board include, but are not limited to, the following:

- a. Drops for
 - i. not accurately representing the reviewed firm's accounting and auditing practice as defined by the standards
 - ii. failing to submit the reviewed firm's peer review by a required due date after being dropped for the preceding reason and subsequently being allowed to reenroll

- b. Terminations for
 - i. omitting or misrepresenting information related to the reviewed firm's accounting and auditing practice as defined by the standards
 - ii. failing to receive a *pass* report rating subsequent to receiving notification via certified mail, or other delivery method providing proof of delivery (including electronic means), after a peer review rating of *pass with deficiencies* or *fail*
 - iii. failing to correct deficiencies or significant deficiencies after consecutive corrective actions required by the committee on the reviewed firm's most recent peer review

Publicizing Peer Review Information (Ref: par. .18)

.A15 The firm's AE and AICPA staff may disclose to third parties the following information:

- a. The firm's name and address
- b. Whether the firm is enrolled in the program
- c. The date of acceptance and period covered by the firm's most recently accepted peer review
- d. The most recent date that the firm's enrollment in the program has been dropped or terminated, if applicable

This information is available in the AICPA public file for all firms enrolled in the program.

.A16 The firm may authorize its AE or AICPA staff to make its peer review results available to the public or to state boards of accountancy. Peer review results include, as applicable, the following:

- a. Peer review report
- b. Letter of response
- c. Acceptance letter
- d. Letters signed by the reviewed firm indicating that the peer review documents have been accepted with the understanding that the reviewed firm agrees to take certain actions
- e. Letter signed by the AE notifying the reviewed firm that certain required actions have been completed

The authorization ordinarily occurs during the firm's peer review scheduling process when the firm may choose not to opt out of the program's process for voluntary disclosure through Facilitated State Board Access (FSBA).

.A17 A firm may voluntarily become a member of one of the AICPA's audit quality centers or sections that require, as a condition of membership, making the firm's peer review results (described in paragraph .A16) open to public inspection.

.A18 When the firm's peer review is ongoing, the firm may give the AE or AICPA staff written authorization to provide specific information to third parties (in addition to the information in paragraph .A15). The following (or similar) types of objective information about the review may be provided, if known:

- a. The date the review is or was scheduled to take place
- b. The name of the reviewing firm, team captain, or review captain
- c. If the fieldwork on the peer review has commenced

- d.* The date the exit conference was expected to or did occur
- e.* A copy of any extension approval letters
- f.* Whether the peer review working papers have been received by the AE
- g.* Whether a must-select engagement was included in the scope as required by the standards
- h.* If a technical review is in process
- i.* Whether the review has been presented for acceptance
- j.* The date the review is expected to be presented for acceptance
- k.* The specific overdue letters (such as, but not limited to, scheduling the peer review or completion of remedial actions) requested by third parties

.A19 When there is evidence of an open ethics investigation and the firm knowingly makes an informed, voluntary, written waiver of the right to confidentiality, in those circumstances, AICPA Peer Review staff may provide information to the AICPA Professional Ethics Division. Information available for disclosure about the firm includes, but is not limited to, the following:

- a.* Fieldwork commencement date
- b.* Exit conference date
- c.* Review acceptance date
- d.* Levels of service and industries included in the firm's peer review information for prior or current peer reviews
- e.* Levels of service and industries included in prior or current peer reviews and those determined not to be in conformity with professional standards in all material respects
- f.* Signed confirmations by a firm representative that the enrolled firm did not perform any services or issue reports that would require the firm to undergo a peer review
- g.* Other similar information related to a prior or current peer review

.A20 The firm may give the AE or AICPA staff other written requests to provide information or documents to a third party, which will be considered on a case-by-case basis by the AE or the AICPA. However, neither the AE nor the AICPA will provide information that is subjective (due to different definitions or interpretations by third parties), even with firm authorization, such as the following:

- a.* Stating solely that the review is "in process" or responding to an inquiry solely regarding what the "general status" of a peer review is
- b.* The peer review report rating prior to the peer review's acceptance
- c.* Whether there are indications that the firm, reviewing firm, team captain, or review captain are cooperating (or not cooperating) with the AICPA or AE
- d.* An indication of the quality or completeness of peer review working papers received by the AE
- e.* Reasons why peer review working papers, implementation plans, or corrective actions are late
- f.* Whether a firm is close to submitting documents or completing implementation plans or corrective actions

- g.* Reasons for or the likely outcome if the firm is going through fair procedures to determine whether it is cooperating with the AICPA or the AE

Acquisitions and Divestitures (Ref: par. .19)

.A21 A divestiture of a portion of the practice of a reviewed firm during the year under review may have to be reported as a scope limitation if the review team is unable to assess compliance with the system of quality control for reports issued under the firm's name during that year.

.A22 Submission of the "Firm Structure Change" form may be considered a consultation with the AE and AICPA staff.

Resigning From the Program (Ref: par. .20–22)

.A23 The submission by the firm of a request to resign from the program once its peer review has commenced but has not been completed is considered not cooperating with the AE and may lead to the termination of the firm's enrollment in the program by a hearing panel of the board.

Natural Disasters and Other Catastrophic Events (Ref: par. .23–.25)

.A24 If a reviewer was affected by a natural disaster or other catastrophic event and is not able to complete a scheduled review, the AE will consider the following:

- a.* The firm's peer review year-end and the timing of when engagements falling within the peer review year are performed
 - b.* The length of time between when the situation arose and the firm's due date
 - c.* The amount of time that the currently scheduled peer reviewer or review team would need before being able to perform the peer review
 - d.* Whether the firm has very specialized industries or engagements
-

PR-C Section 310

General Principles and Responsibilities for Reviewed Firms — System Reviews

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains requirements and application material for firms undergoing a system review. The requirements and guidance in this section supplement the requirements and application guidance in section 100, *Concepts Common to All Peer Reviews*, and section 300, *General Principles and Responsibilities for Reviewed Firms*.

.02 Firms that perform engagements under the Statements on Auditing Standards (SASs) or *Government Auditing Standards*, examinations under the Statements on Standards for Attestation Engagements (SSAEs), or engagements under PCAOB standards must have a system review. (Ref: par. .A1–.A2)

Effective Date

.03 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objective

.04 The objective of the reviewed firm is to enhance its effectiveness and contribute to the quality of our profession by undergoing a system review performed in accordance with the Standards for Performing and Reporting on Peer Reviews (the standards) established by the Peer Review Board (the board) of the American Institute of Certified Public Accountants. (Ref: par. .A3)

Definitions

.05 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Planning

.06 The firm should make the following information available to the reviewer:

- a. Information regarding the firm's audit and accounting practice for each engagement with a period end date during the peer review year (or each financial forecast, financial projection, or agreed-upon procedures engagement with a report dated during the peer

review year) and that was issued by the commencement date of the review to allow the reviewer to be able to identify

- i. the level of service,
 - ii. the number of audit or accounting hours (actual, if available, or estimated),
 - iii. the engagement partner,
 - iv. the industry,
 - v. whether an engagement was an initial engagement,
 - vi. the office (if applicable), and
 - vii. whether an engagement was a must-select or must-cover engagement (if applicable) (Ref: par. .A4)
- b. A list of firm personnel (Ref: par. .A5)
 - c. Responses to inquiries about the areas to be addressed in the written representations
 - d. The firm's prior
 - i. peer review report,
 - ii. letter of response (if applicable),
 - iii. letter of acceptance,
 - iv. findings for further consideration (FFCs) (if applicable), and
 - v. representation letter
 - e. The firm's quality control documentation (Ref: par. .A6)

.07 The firm should assist the reviewer in meeting the objectives of performing a system review. The peer review contact should meet with the review team at the beginning of the review to orient them to firm policies and procedures and introduce them to appropriate personnel. (Ref: par. .A7–.A8)

Engagement Selection

.08 For each engagement selected for review, the reviewed firm should submit (masking client identity if it desires) the following: (Ref: par. .A9)

- a. The appropriate financial statements or information
- b. The accountant's or auditor's report, if applicable
- c. Engagement profile
- d. The documentation required by applicable professional standards for each engagement

Scope Limitations

.09 The firm should notify the team captain and the AE, prior to the commencement of the review, if it intends to exclude an engagement or elements of the firm's system of quality control. This notification should indicate

- a. its plans to exclude one or more engagements or aspects of functional areas from the peer review selection process,
- b. the reasons for the exclusion, and
- c. that it is requesting a waiver from the AE for the exclusion.

Testing Compliance With the Firm's System of Quality Control

.10 The firm should promptly respond to reviewer questions during the review. (Ref: par. .A10–.A12)

Responding to Matters, Findings, Deficiencies, and Significant Deficiencies

.11 The firm should discuss preliminary peer review results, including matters, findings, deficiencies, and significant deficiencies, with the reviewer. Ordinarily, this discussion occurs during the closing meeting. If the firm disagrees with one or more of the matters, findings, or deficiencies, and the firm and reviewer can't come to a resolution, the firm should contact the AE for assistance and follow the guidance in section 100 to resolve the disagreement. (Ref: par. .A13)

.12 The firm should respond to

- a.* matters via the matter for further consideration (MFC) form,
- b.* findings via the FFC form, and
- c.* deficiencies or significant deficiencies via a letter of response.

.13 Responses to matters, findings, deficiencies, or significant deficiencies should include an assessment of the systemic cause, which should provide enough detail for the reviewer to understand how the firm arrived at its conclusion.

.14 The firm's responses to findings, deficiencies, or significant deficiencies should (Ref: par. .A14–.A19)

- a.* include the firm's actions taken or planned to remediate the findings or deficiencies in the firm's system of quality control and non-conforming engagements, if applicable, including
 - i.* timing of the remediation and
 - ii.* additional procedures to ensure the finding or deficiency is not repeated in the future.
- b.* be feasible, genuine, and comprehensive.
- c.* be addressed to the AE's peer review committee (committee) in a letter of response, if applicable.
- d.* be dated as of the exit conference date in a letter of response, if applicable.
- e.* be on firm letterhead in a letter of response, if applicable.

The reviewer should review documentation of any action taken by the firm and consider whether the action is appropriate.

.15 The firm's draft responses should be provided to the team captain as soon as possible after the closing meeting to allow the team captain enough time to assess the firm's responses prior to the exit conference. (Ref: par. .A20–.A21)

Written Representations

.16 The firm should provide to the team captain written representations on firm letterhead for the peer review year, dated as of the date of the peer review report, that state the following: (Ref: par. .A22–.A23)

- a.* Management has fulfilled its responsibility for the design of and compliance with a system of quality control for our accounting and auditing practice that provides us with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

- b. Management acknowledges its responsibility for complying with the rules and regulations of state boards of accountancy and other regulations.
- c. Management has disclosed to the team captain all known instances of noncompliance or suspected noncompliance with the rules and regulations of state boards of accountancy or other regulatory bodies, including applicable firm and individual licensing requirements in each state in which the firm practices, for the year under review. If there are known instances of noncompliance, management should summarize the instances and, if applicable, describe its remediation of the noncompliance.
- d. Management has discussed significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the team captain, if applicable.
- e. Management has fulfilled its responsibility to remediate nonconforming engagements as stated by the firm on the [*Matter for Further Consideration Form, Finding for Further Consideration Form, or Letter of Response*], if applicable.
- f. Management understands the intended uses and limitations of the quality control materials it has developed or adopted. Management has tailored and augmented the materials as appropriate such that the quality control materials encompass guidance that is sufficient to assist it in conforming with professional standards (including the Statements on Quality Control Standards) applicable to its accounting and auditing practice.
- g. Management has responded fully and truthfully to all of the team captain's inquiries.
- h. Management has provided the team captain with all relevant information, which included
 - i. all engagements with periods ending during (or, for financial forecasts or projections and agreed-upon procedures engagements, report dates in) the year under review.
 - ii. all must-select engagements, as applicable.
- i. Management has disclosed to the team captain if the firm performed must-select engagements for the period covered by the peer review, and, if so, at least one of each must-select engagement that was performed was selected and reviewed by the peer reviewer.
- j. Management acknowledges that failure to properly include these engagements on the list could be deemed as failure to cooperate and may result in termination from the Peer Review Program and, if termination occurs, may result in an investigation of a possible violation by the appropriate regulatory, monitoring, or enforcement body.
- k. Management has provided to the team captain communications or summaries of communications from regulatory, monitoring, or enforcement bodies relating to allegations or investigations of deficiencies in the conduct of an accounting, audit, or attestation engagement performed and reported on by the firm, whether the matter relates to the firm or its personnel, within three years preceding the current peer review year-end.
- l. Management has disclosed that there are no known limitations or restrictions on the firm's or its personnel's ability to practice

public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end, or management has included a summary of the limitations or restrictions on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end.

.17 If, in addition to the representations required by paragraph .16, the team captain determines that it is necessary to obtain other representations based on the circumstances and nature of the peer review, the team captain should request such other written representations.

Subsequent Events

.18 If a firm performs a must-select engagement in an industry not subject to the current review after the year-end and before the due date of its system review, the reviewed firm should (Ref: par. .A24–.A25)

- a. immediately notify the AE and
- b. determine if the due date should be extended to include the must-select engagement.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.02)

.A1 Firms eligible to have an engagement review may elect to have a system review.

.A2 Joint ventures formed specifically to perform certain engagements are not required to have a peer review provided that

- a. each of the firms that sign the joint venture report is required to have system reviews and agree to list the joint venture on its client rosters during its peer reviews.
- b. the joint venture is not operating and structured as a separate firm. (Joint ventures do not include part-time work arrangements, when only one firm issues the report.) If the letterhead used for the joint venture does not identify the separate firms that joined together to perform the engagement, then the joint venture is operating as a separate firm.

Objective (Ref: par. .04)

.A3 The reviewed firm may benefit from knowing the reviewer's objectives in conducting a system review, which are to do the following:

- a. Obtain reasonable assurance that the reviewed firm's system of quality control for its accounting and auditing practice has been designed and complied with to provide the firm with reasonable assurance of performing or reporting in conformity with the requirements of applicable professional standards in all material respects.
- b. Report on the reviewed firm's system of quality control and communicate as required by the standards established by the board, in accordance with the reviewer's conclusions.

Planning (Ref: par. .06–.07)

.A4 For more information regarding engagements that must be selected or that fall into the "must-cover" category, refer to section 210, *General Principles and Responsibilities for Reviewers — System Reviews*, appendix C, "Additional Requirements for Must-Select and Must-Cover Engagements."

.A5 The personnel list assists reviewers in performing their risk assessment procedures. The reviewer may request that the list include

- a. name,
- b. position, and
- c. years of experience
 - i. with the firm and
 - ii. in total.

.A6 Quality control documentation will likely include the firm's quality control document, evidence of the performance of the firm's monitoring procedures, and CPE documentation, among other documents. Upon reviewing such documentation, the reviewer may determine that the firm's current-year internal monitoring procedures could enable the reviewer to reduce the extent of the peer review procedures.

.A7 To obtain an understanding of the firm's accounting and auditing practice and system of quality control, the reviewer will do the following:

- a. Inquire of appropriate management and other personnel
- b. Review the firm's internal policies and procedures
- c. Review the firm's quality control documentation
- d. Inquire of the firm regarding elements of the system of quality control residing outside of the firm (Ref: par. .A11)
- e. Complete the applicable quality control checklists

.A8 Examples of elements that could reside outside of the firm include, but are not limited to, membership in associations, joint ventures, non-CPA-owned entities, alternative practice structures, arrangements with outside consultants, third-party quality control materials, or CPE.

Engagement Selection (Ref: par. .08)

.A9 To obtain reasonable assurance that the firm is complying with its quality control policies and procedures and applicable professional standards, the reviewer will review a reasonable cross section of the firm's accounting and auditing engagements, with greater emphasis on those portions of the practice with higher combined assessed levels of inherent and control risk.

Testing Compliance With the Firm's System of Quality Control (Ref: par. .10)

.A10 To test the firm's compliance with its system of quality control and applicable professional standards, the reviewer will do the following:

- a. Review and evaluate highest-risk areas on selected engagements, including accounting and auditing documentation, and reports.
- b. Interview firm personnel at various levels to assess their understanding of, and compliance with, the firm's system of quality control.

- c. Review evidence to determine whether the firm has complied with its policies and procedures for each element of its system of quality control, which may include evidence since the previous peer review. (Ref: par. .A27 of section 210)
- d. Review other evidence as appropriate. (Ref: par. .A28–.A29 of section 210)
- e. Complete the applicable quality control checklists.

.A11 The reviewer's evaluation of each engagement submitted for review will include the following:

- a. Consideration of the financial statements or information and the related accountants' reports
- b. Review of accounting and audit documentation required by the applicable professional standards
- c. Consideration of the information related to the engagement obtained through the peer review including, but not limited to, engagement profile information, representations made by the firm, and other inquiries

.A12 When evaluating an audit engagement, the reviewer's procedures should include determining whether the reviewed firm has appropriately

- a. identified the significant risk areas on each audit engagement selected for the peer review,
- b. performed the necessary audit procedures related to the identified significant risk areas, and
- c. documented the auditing procedures performed in these significant risk areas.

Responding to Matters, Findings, Deficiencies, and Significant Deficiencies (Ref: par. .11–.15)

.A13 The closing meeting is designed to provide sufficient time for the firm to determine the appropriate responses to peer review results and for the reviewer to evaluate the firm's responses. The following are discussed during the closing meeting:

- a. Preliminary peer review results, including any matters, findings, deficiencies, or significant deficiencies, and the expected report rating if determinable at this point
- b. The firm's requirement to respond to the MFCs, FFCs, or deficiencies or significant deficiencies included in the peer review report
- c. The firm's required written representations
- d. Other suggestions and observations for the firm to consider

.A14 The purpose of the firm's response on the FFC form or in the letter of response is for a firm to document the specific actions that will be taken to correct findings, deficiencies, or significant deficiencies identified by the reviewer and to enhance the firm's current system of quality control.

.A15 If the firm's response is not deemed to be feasible, genuine, and comprehensive, the AE's technical reviewer or committee will request a revised response. If pervasive nonconformity has been identified by the reviewer, the firm's response may state that it has reviewed other engagements with similar attributes to determine if similar remediation is warranted on other engagements that were not selected by the reviewer.

.A16 Although it is ultimately the firm's responsibility, firms are encouraged to work with the team captain to develop remedial actions and responses that both parties believe will be effective in correcting the matters, findings, and deficiencies or significant deficiencies identified during the peer review. Improvement is more likely to occur when the responses describe specific actions to be taken. Firms are discouraged from defaulting to a response of "we'll fix it on the next engagement" unless the firm is able to articulate why that is the appropriate response. As required by paragraph .40 of section 210, team captains or AEs should not dictate specific remediation to nonconforming engagements because those are decisions for the firm and its client to make.

.A17 The committee may require the firm to make and document appropriate considerations regarding nonconforming engagements as a condition of acceptance of the peer review. The firm response may affect monitoring actions the committee may impose, including actions to verify that the firm adheres to the intentions indicated in its response.

.A18 Examples of actions a firm may take in response to nonconforming engagements include, but are not limited to, the following:

- a. Omitted procedures performed (including documentation)
- b. Reissued report and financial statements
- c. Notification to users to discontinue use of previously issued reports

.A19 Illustrations of letters of response are presented in exhibit B, "Illustrative Examples of a Firm's Letter of Response."

.A20 If the firm is unable to determine appropriate remediation of weaknesses in its system of quality control and nonconforming engagements, if applicable, prior to the exit conference, the firm's response may indicate interim steps that have been taken and confirm its intent to remediate when an appropriate response is determined. In these situations, the RAB considering the review will ordinarily assign an implementation plan or corrective action for the firm to provide its final remediation.

.A21 After the firm has responded to the MFCs, FFCs, and deficiencies or significant deficiencies in the report and the team captain has assessed whether the responses are appropriate and has considered any additional impact to the peer review results, the team captain should communicate the results to the firm at an exit conference. The following is discussed during the exit conference:

- a. Final peer review results, including any changes to the information communicated at the closing meeting after consideration of the firm's responses to MFCs, FFCs, and deficiencies or significant deficiencies in the report
- b. The appropriateness of the firm's response
- c. The firm's representation letter
- d. Potential implications of the RAB acceptance process and their impact to the acceptance and completion of the peer review, and the reviewed firm's enrollment in the program, including, but not limited to,
 - i. corrective actions for deficiencies or significant deficiencies and implementation plans for findings, if applicable;
 - ii. recommended report rating changes;
 - iii. oversight
- e. Peer review noncooperation implications of consecutive non-pass report ratings, if applicable

Written Representations (Ref: par. .16–.17)

.A22 The reviewed firm is not prohibited from making additional representations and may tailor the representation letter as it deems appropriate, as long as the minimum applicable representations are made to the team captain.

.A23 An illustrative example of a firm's written representation letter is provided in exhibit A, "Illustrative Representation Letter."

Subsequent Events (Ref: par. .18)

.A24 Before requesting a due date extension, the firm would need to consider the effect of the extension on any state boards of accountancy requirements or other regulatory peer review requirements.

.A25 If the circumstances described in paragraph .18 represent a long-term change in the nature of the firm's business, the firm may consult with its AE and consider requesting a change in peer review year-end.

.A26

Exhibit A — Illustrative Representation Letter

The following illustrative letter includes written representations that are required by paragraphs .16–.17 of this section. The firm may tailor the language in this illustration and refer to attachments to the letter as long as adequate representations pertaining to the matters previously discussed, as applicable, are included to the satisfaction of the team captain.

[Entity Letterhead]

[Date]

To [Name of Team Captain]:

We are providing this letter in connection with the peer review of the system of quality control for the accounting and auditing practice of [name of firm] [applicable to engagements not subject to PCAOB permanent inspection (if applicable)] as of the date of this letter and for the year ended June 30, 20XX.

Management has fulfilled its responsibility for the design of and compliance with a system of quality control for our accounting and auditing practice that provides us with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

We understand that we are responsible for complying with the rules and regulations of state boards of accountancy and other regulators. We have [no knowledge of][disclosed to you all known] situations in which [name of firm] or its personnel have not complied with the rules and regulations of state board(s) of accountancy or other regulatory bodies, including applicable firm and individual licensing requirements in each state in which it practices for the year under review.

We have provided to the team captain a list of all engagements with periods ending during (or, for financial forecasts or projections and agreed-upon procedures engagements, report dates in) the year under review, regardless of whether issued as of the date of this letter. This list appropriately identified and included, but was not limited to, all engagements performed under *Government Auditing Standards*, including compliance audits under the Single Audit Act, audits of employee benefit plans, audits performed under FDICIA, and examinations of service organizations (SOC 1® and SOC 2® engagements), as applicable. We understand that failure to properly include engagements subject to the scope of the peer review could be deemed as failure to cooperate. We also understand this may result in termination from the Peer Review Program and, if termination occurs, may result in an investigation of a possible violation by the appropriate regulatory, monitoring, and enforcement body.

We have completed the following must-select engagements and issued their respective reports. To the best of our knowledge and belief, the peer review team has selected and reviewed at least one of each category:

1. Engagements performed under *Government Auditing Standards*
2. Compliance audits under the Single Audit Act
3. Audits of employee benefit plans
4. Audits performed under FDICIA
5. Examinations of service organizations (SOC 1 and SOC 2 engagements)]

[We confirm that it is our responsibility to remediate nonconforming engagements as stated by the firm in the [Matter for Further Consideration, Finding for Further Consideration, or Letter of Response (as applicable)]].

We have discussed significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the team captain, if applicable. We have also provided the team captain with any other information requested, including communications or summaries of communications from regulatory, monitoring, or enforcement bodies relating to allegations or investigations of deficiencies in the conduct of an accounting, audit, or attestation engagement performed and reported on by the firm, whether the matter relates to the firm or its personnel, within three years preceding the current peer review year-end. We confirm, to the best of our knowledge and belief, that there are no known restrictions or limitations on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end.

We understand the intended uses and limitations of the quality control materials we have developed or adopted. We have tailored and augmented the materials as appropriate such that the quality control materials encompass guidance that is sufficient to assist us in conforming with professional standards (including the Statements on Quality Control Standards) applicable to our accounting and auditing practice in all material respects.

Sincerely,

*[Name of Reviewed Firm Representative(s)]*¹

¹ Firm representatives are members of management, as described in paragraph .10 in section 300, *General Principles and Responsibilities for Reviewed Firms*.

Exhibit B — Illustrative Examples of a Firm’s Letter of Response

This exhibit contains various illustrations of a firm's letter of response to a peer review report rating of pass with deficiencies or *fail* (system reviews).

Illustration 1 — A Firm's Letter of Response to a Report on the Firm's System of Quality Control With a Peer Review Rating of Pass With Deficiencies

Illustration 2 — A Firm's Letter of Response to a Report on the Firm's System of Quality Control With a Peer Review Rating of Pass With Deficiencies With a Scope Limitation

Illustration 3 — A Firm's Letter of Response to a Report on the Firm's System of Quality Control With a Peer Review Rating of Fail

Illustration 4 — A Firm's Letter of Response to a Report on the Firm's System of Quality Control With a Peer Review Rating of Fail With a Scope Limitation

Illustration 1 — A Firm’s Letter of Response to a Report on the Firm’s System of Quality Control With a Peer Review Rating of Pass With Deficiencies

[Reviewed firm's letterhead]

[Date of the report]

*[Addressed to the peer review committee of the administering entity]*¹

Ladies and Gentlemen:

This letter represents our² response to the report issued in connection with the peer review of the firm's system of quality control for the accounting and auditing practice in effect for the year ended *[peer review year-end date]*. The remedial actions discussed in this letter will be monitored to ensure that they are effectively implemented as part of our system of quality control.

- 1.³ The firm modified its quality control policies and procedures to include monitoring of firm personnel's compliance with regulatory and organization membership requirements. The importance of meeting these CPE requirements was discussed in a recent training session held in connection with a recent firm-wide staff meeting. Additionally, the training session included sufficient Yellow Book CPE such that all firm personnel have met the regulatory requirements. The impact to the Yellow Book audits of failure to take sufficient CPE timely is currently being discussed with the Government Accountability Office (GAO) and the firm will remediate as necessary based on that discussion.

¹ The response of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the National Peer Review Committee."

² The response should use the singular *I*, *me*, and *my* only when the reviewed firm is a sole practitioner.

³ The numbering of responses to coincide with the numbered comments in the report is optional.

2. In addition, at that training session, the importance of proper use of the firm's checklists appropriate to the industry of the engagement being performed was discussed. We discussed the proper resolution of points or topics unfamiliar to the individual completing the checklist or those reviewing its completion. The firm's CPE plan for partners and managers now includes annual updates on industry-specific issues. The omitted procedures have been performed.

These remedial actions will also be emphasized in our monitoring procedures and internal inspection.

We believe these actions are responsive to the deficiencies noted on the review.

Sincerely,

*[Name(s) of reviewed firm representative(s)]*⁴

Illustration 2 — A Firm's Letter of Response to a Report on the Firm's System of Quality Control With a Peer Review Rating of Pass With Deficiencies With a Scope Limitation

[Reviewed firm's letterhead]

[Date of the report]

*[Addressed to the peer review committee of the administering entity]*¹

Ladies and Gentlemen:

This letter represents our² response to the report issued in connection with the peer review of the firm's system of quality control for the accounting and auditing practice in effect for the year ended *[peer review year-end date]*.

- 1.³ Due to circumstances that we deemed appropriate, we notified the peer reviewer that he would be unable to select our only audit subject to *Government Auditing Standards* in the peer review. This was an initial engagement and an engagement performed under *Government Auditing Standards*, so there were no previous audits for the reviewer to select. We have considered the consequences of noncompliance related to this matter. We understand that, until our firm's most recently completed peer review includes selection of an engagement performed under *Government Auditing Standards*, our audit reports for such engagements will need to include an exception regarding our lack of compliance with peer review requirements.

We believe these actions are responsive to the deficiencies noted on the review.

Sincerely,

*[Name(s) of reviewed firm representative(s)]*⁴

⁴ These are members of management as described in paragraph .25 of section 200, *General Principles and Responsibilities for Reviewers*.

¹ The response of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the National Peer Review Committee."

² The response should use the singular *I*, *me*, and *my* only when the reviewed firm is a sole practitioner.

³ The numbering of responses to coincide with the numbered comments in the report is optional.

⁴ These are members of management as described in paragraph .25 of section 200.

Illustration 3 — A Firm's Letter of Response to a Report on the Firm's System of Quality Control With a Peer Review Rating of Fail

[Reviewed firm's letterhead]

[Date of the report]

[Addressed to the peer review committee of the administering entity]¹

Ladies and Gentlemen:

This letter represents our² response to the report issued in connection with the peer review of the firm's system of quality control for the accounting and auditing practice in effect for the year ended [peer review year-end date]. The firm is committed to providing clear, consistent, and frequent actions and messages from all levels of the firm's management to emphasize the firm's commitment to quality. The remedial actions discussed in this letter will be monitored to ensure that they are effectively implemented as part of our system of quality control.

- 1.³ The firm modified its quality control policies and procedures to require the following:
 - a. Use of practice aids to document procedures performed to assess competency for undertaking new engagements. The practice aid is designed to ensure that the firm (1) is competent to perform the engagement and has the capabilities, including time and resources, to do so; (2) can comply with legal and relevant ethical requirements; and (3) has considered the integrity of the client.
 - b. Inclusion of a CPE plan for obtaining relevant training to prepare for engagements in new industries or service areas in the client acceptance file.
2. The firm has recalled the audit report for the employee benefit plan audit and has hired a third party to perform a pre-issuance review prior to reissuing our report.
3. We have joined the AICPA Governmental Audit Quality Center and Employee Benefit Plan Audit Quality Center. The firm modified its quality control policies and procedures to require personnel that perform engagements in these specialized areas to attend at least eight hours of CPE annually in the specialized areas. We are committed to promptly completing our evaluation of the audit engagements, including whether audited financial statements should be recalled and reissued to include the omitted disclosures. The omitted procedures will be performed and documentation will be added in a memo to the engagement files of the audit performed under *Government Auditing Standards* and the audits in other industries identified as not in conformity with professional standards.
4. The firm's system of quality control was modified to include monitoring procedures to provide it with reasonable assurance that the firm's policies and procedures relating to the system of quality

¹ The response of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the National Peer Review Committee."

² The response should use the singular *I*, *me*, and *my* only when the reviewed firm is a sole practitioner.

³ The numbering of responses to coincide with the numbered comments in the report is optional.

control are relevant, adequate, and operating effectively. Specifically, the firm will monitor compliance with all functional areas of the system and will perform annual inspections on a sample of engagements. We intend to hire a Quality Control Director who will be responsible for developing and implementing our monitoring and inspection procedures.

The results of our peer review will be discussed in a firm-wide meeting to be held on *[date of meeting]*, and an emphasis on quality will be reinforced with all engagement partners and their teams.

We believe these actions are responsive to the deficiencies noted on the review.

Sincerely,

*[Name(s) of reviewed firm representative(s)]*⁴

Illustration 4 — A Firm's Letter of Response to a Report on the Firm's System of Quality Control With a Peer Review Rating of Fail With a Scope Limitation

[Reviewed firm's letterhead]

[Date of the report]

*[Addressed to the peer review committee of the administering entity]*¹

Ladies and Gentlemen:

This letter represents our² response to the report issued in connection with the peer review of the firm's system of quality control for the accounting and auditing practice in effect for the year ended *[peer review year-end date]*.

We notified our peer reviewer that he would be unable to review the engagements performed by one of our firm's four offices that divested from our firm during the peer review year. We have considered the consequences of this scope limitation on the results of our peer review.

- 1.³ The firm's monitoring procedures were modified to provide it with reasonable assurance that the firm's policies and procedures are relevant, adequate, and operating effectively. Specifically, the firm will monitor compliance with relevant ethical considerations and perform annual testing of a sample of personnel independence confirmations. We have contacted our attorney, clients, and applicable regulatory bodies to discuss the impact of the independence violations and will remediate the engagements as required by professional standards.
2. The firm has contacted two other accounting firms with expertise in Employee Retirement Income Security Act (ERISA) audits. We have implemented a plan for consultation with these firms for guidance in situations with which we are unfamiliar. We have also joined the AICPA Employee Benefit Plan Audit Quality Center. The omitted procedures will be performed and documentation will be added in a memo to the engagement file. We will engage one of the accounting firms to review the engagement working papers

⁴ These are members of management as described in paragraph .25 of section 200.

¹ The response of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the National Peer Review Committee."

² The response should use the singular *I*, *me*, and *my* only when the reviewed firm is a sole practitioner.

³ The numbering of responses to coincide with the numbered comments in the report is optional.

prior to finalizing the memo and to perform engagement quality control reviews of future employee benefit plan audits.

3. We have purchased practice aids that are specific to the industries of our clients and have instructed staff and partners on their use. At our next staff meeting on [date of meeting], we will emphasize the importance of proper use of the firm's practice aids. We will also discuss the proper resolution of points or topics unfamiliar to the individual completing the checklist or those reviewing its completion. The firm's CPE plan for partners and managers now includes annual updates on the firm's expectations for performing and documenting audit planning considerations.

The firm is committed to strengthening its monitoring policies and procedures. We have acquired quality control materials to guide the firm, and supervision of the monitoring process has been assigned to a partner. Additionally, outside assistance (as previously mentioned) has been sought, and these individuals will be available for consultation and guidance.

We believe these actions are responsive to the deficiencies noted on the review.

Sincerely,

[Name(s) of reviewed firm representative(s)]⁴

⁴ These are members of management as described in paragraph .25 of section 200.

PR-C Section 320

General Principles and Responsibilities for Reviewed Firms — Engagement Reviews

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains requirements and application material for firms engaged to have an engagement review. The requirements and guidance in this section supplement the requirements and application guidance in section 100, *Concepts Common to All Peer Reviews*, and section 300, *General Principles and Responsibilities for Reviewed Firms*.

.02 Firms that perform only engagements under the Statements on Standards for Accounting and Review Services (SSARs) or engagements under the Statements on Standards for Attestation Engagements (SSAEs) other than examinations are eligible to have engagement reviews. (Ref: par. .A1)

Effective Date

.03 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objective

.04 The objective of the reviewed firm is to enhance its effectiveness and contribute to the quality of our profession by undergoing an engagement review performed in accordance with the Standards for Performing and Reporting on Peer Reviews (the standards) established by the Peer Review Board (the board) of the American Institute of Certified Public Accountants. (Ref: par. .A2)

Definitions

.05 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Planning

.06 The firm should make the following information available to the review captain:

- a.* The number of engagements performed by level of service and industry for each engagement partner

- b. Responses to inquiries about the areas to be addressed in the written representations
- c. The firm's prior
 - i. peer review report,
 - ii. letter of response (if applicable),
 - iii. letter of acceptance,
 - iv. findings for further consideration (FFCs) (if applicable), and
 - v. representation letter

Engagement Selection

.07 The firm should submit the engagements that meet the criteria of the review captain's selections. (Ref: par. .08 and .A3–.A7)

.08 For each engagement selected for review, the reviewed firm should submit the following (masking client identity if it desires):

- a. The appropriate financial statements or information
- b. The accountant's report, if applicable
- c. The engagement profile
- d. The firm's documentation required by applicable professional standards for each engagement

Scope Limitations

.09 The firm should notify the review captain and the administering entity (AE), prior to the commencement of the review, if it intends to exclude an engagement. This notification should indicate

- a. its plans to exclude one or more engagements from the peer review selection process,
- b. the reasons for the exclusion, and
- c. that it is requesting a waiver for the exclusion.

Evaluation of Engagements

.10 The firm should promptly respond to review captain questions during the review. (Ref: par. .A8)

Responding to Matters, Findings, and Deficiencies

.11 The firm should discuss matters, findings, and deficiencies with the review captain. Ordinarily, this discussion occurs during the closing meeting. If the firm disagrees with one or more of the findings or deficiencies, and the firm and reviewer can't come to a resolution, the firm should contact the AE for assistance and follow the guidance in section 100 to resolve the disagreement. (Ref: par. .A9)

.12 The firm should identify the appropriate remediation of findings and deficiencies. (Ref: par. .A10)

.13 The firm should respond to

- a. matters via the matter for further consideration (MFC) form,
- b. findings via the FFC form, and
- c. deficiencies via a letter of response.

.14 The firm's responses on the FFCs and letter of response should (Ref: par. .A11–.A14)

- a. include the firm's actions taken or planned to remediate the findings or deficiencies, including
 - i. timing of the remediation and
 - ii. additional procedures to ensure the finding or deficiency is not repeated in the future.
- b. be feasible, genuine, and comprehensive.
- c. be addressed to the AE's peer review committee (committee) in a letter of response, if applicable.
- d. be dated as of the exit conference in a letter of response, if applicable.
- e. be on firm letterhead in a letter of response, if applicable.

The review captain should review documentation of any action taken by the firm and consider whether the action is appropriate.

.15 The firm's draft responses should be provided to the review captain as soon as possible after the closing meeting to allow the review captain enough time to assess the firm's response prior to the exit conference. (Ref: par. .A15)

Written Representations

.16 The firm should provide to the review captain written representations on firm letterhead for the peer review year, dated as of the date of the peer review report, that state the following: (Ref: par. .A16–.A18)

- a. Management has fulfilled its responsibility for the design of and compliance with a system of quality control for our accounting practice that provides us with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.
- b. Management acknowledges its responsibility for complying with the rules and regulations of state boards of accountancy and other regulations.
- c. Management has disclosed to the review captain all known instances of noncompliance or suspected noncompliance with the rules and regulations of state boards of accountancy or other regulatory bodies, including applicable firm and individual licensing requirements in each state in which the firm practices for the year under review. If there are known instances of noncompliance, management should summarize the instances and, if applicable, describe its remediation of the noncompliance.
- d. Management has discussed significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the team captain, if applicable.
- e. Management has fulfilled its responsibility to remediate nonconforming engagements as stated by the firm on the relevant form, if applicable.
- f. Management understands the intended uses and limitations of the quality control materials it has developed or adopted. Management has tailored and augmented the materials as appropriate such that the quality control materials encompass guidance

that is sufficient to assist it in conforming with professional standards (including the Statements on Quality Control Standards) applicable to its accounting and auditing practice.

- g. Management has responded fully and truthfully to the review captain's inquiries.
- h. Management has provided the review captain with all relevant information including all engagements with periods ending during (or, for financial forecasts or projections and agreed-upon procedures engagements, report dates in) the year under review.
- i. Management has disclosed to the review captain that the firm did not perform any engagements under the Statements on Auditing Standards or *Government Auditing Standards*, examinations under the SSAEs, or engagements under the PCAOB standards that are not subject to PCAOB permanent inspection.
- j. Management acknowledges that failure to properly include these engagements on the list could be deemed as failure to cooperate and may result in termination from the Peer Review Program and, if termination occurs, may result in an investigation of a possible violation by the appropriate regulatory, monitoring, or enforcement body.
- k. Management has provided to the review captain communications or summaries of communications from regulatory, monitoring, or enforcement bodies relating to allegations or investigations of deficiencies in the conduct of an accounting or attestation engagement performed and reported on by the firm, whether the matter relates to the firm or its personnel, within three years preceding the current peer review year-end.
- l. Management has disclosed that there are no known limitations or restrictions on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end, or management has included a summary of the limitations or restrictions on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end.

.17 If, in addition to the representations required by paragraph .16, the review captain determines that it is necessary to obtain other representations based on the circumstances and nature of the peer review, the review captain should request such other written representations.

Subsequent Events

.18 If, after the year-end of its engagement review, a firm performs an engagement requiring a system review, the reviewed firm should

- a. immediately notify the AE and
- b. undergo a system review.

The system review is due the earlier of 18 months from the year-end of the engagement (or, for financial forecasts and projections, 18 months from the date of the report) requiring a system review or by the firm's next scheduled due date.

.19 If the firm fails to immediately notify the AE of the performance of an engagement described in paragraph .18, the firm should participate in a system review with a peer review year-end that covers that engagement.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.02)

.A1 Firms eligible to have an engagement review may elect to have a system review. See section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*, for the firm requirements of a system review.

Objective (Ref: par. .04)

.A2 The reviewed firm may benefit from knowing the review captain's objectives when performing an engagement review, which are to

- a. evaluate whether the engagements submitted for review are performed and reported on in conformity with applicable professional standards in all material respects and
- b. report on the evaluation of selected engagements.

Engagement Selection (Ref: par. .07–.08)

.A3 The review captain will make selections based on the following criteria:

- a. One engagement from each of the following levels of service performed by the firm:
 - i. Review of financial statements (performed under SSARSs)
 - ii. Compilation of financial statements with disclosures (performed under SSARSs)
 - iii. Compilation of financial statements that omits substantially all disclosures (performed under SSARSs)
 - iv. Engagements performed under the SSAEs other than examinations
- b. One engagement from each engagement partner responsible for the issuance of reports listed in item (a)
- c. At least two engagements, unless only one is performed

.A4 The review captain will select a preparation engagement only in one of the following instances:

- a. It is the only level of service performed by an engagement partner.
- b. It is the only engagement performed with disclosures.
- c. It is the only engagement performed without disclosures.
- d. The selection is needed to meet the minimum requirement that two engagements are selected for review.

.A5 The objective of the engagement-selection requirements is to select one engagement for each engagement partner and one engagement from each level of service listed in paragraph .A3a for the firm. Review captains will not select more engagements than necessary to meet this objective.

.A6 Engagement selection may also include consideration of industries.

.A7 As an example, a firm may have indicated that engagement partner A issues review reports on 4 construction contractors, 2 retailers, and 10 manufacturers, but engagement partner B issues compilation reports on 30 medical practices and review reports on 5 restaurants. The firm may be asked to submit one of engagement partner A's review reports on a construction contractor and

one of engagement partner B's compilation reports on a medical practice. The firm will choose the engagements based on those selections.

Evaluation of Engagements (Ref: par. .10)

.A8 The review captain's evaluation of each engagement submitted for review will include the following:

- a. Consideration of the financial statements or information and the related accountant's report on the engagements performed under the SSARSs and SSAEs
- b. Review of all other documentation required by applicable professional standards on the engagements
- c. Consideration of the information related to the engagement obtained through the peer review including, but not limited to, engagement profile information and other inquiries

Responding to Matters, Findings, and Deficiencies (Ref: par. .11–.15)

.A9 The closing meeting is designed to provide sufficient time for the firm to determine the appropriate responses to peer review results and for the reviewer to evaluate the firm's responses. The following are discussed during the closing meeting:

- a. Preliminary peer review results, including any matters, findings, or deficiencies, and the expected report rating, if determinable at this point
- b. The firm's requirement to respond to any MFCs, FFCs, or deficiencies included in the peer review report
- c. The firm's required written representations
- d. Other suggestions and observations for the firm to consider

.A10 Although it is ultimately the firm's responsibility, the review captain and firm may collaborate to determine the remediation. As required by paragraph .19 of section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*, review captains or AEs should not require firms to perform omitted procedures, reissue accounting reports, or have previously issued financial statements revised and reissued because those are decisions for the firm and its client to make.

.A11 The purpose of the firm's response on the FFC or in the letter of response is for a firm to document the specific actions that will be taken to correct findings and deficiencies noted by the review captain.

.A12 The committee may require the firm to make and document appropriate considerations regarding nonconforming engagements as a condition of acceptance of the peer review. The firm's response may affect other monitoring actions the committee may impose, including actions to verify that the firm adheres to the intentions indicated in its response.

.A13 Examples of actions a firm may take in response to nonconforming engagements include, but are not limited to, the following:

- a. Omitted procedures performed (including documentation)
- b. Reissued report and financial statements
- c. Notification to users to discontinue use of previously issued reports

.A14 Illustrative letters of response are presented in exhibit B, "Illustrative Examples of a Firm's Letter of Response."

.A15 After the firm has responded to the MFCs, FFCs, and deficiencies in the report and the review captain has assessed whether the responses are appropriate and has considered any additional impact to the peer review results, the review captain should communicate the results to the firm at an exit conference. The following are discussed during the exit conference:

- a. Final peer review results, including any changes to the information communicated at the closing meeting after consideration of the firm's responses to MFCs, FFCs, and deficiencies in the report
- b. The appropriateness of the firm's response
- c. The firm's representation letter
- d. Potential implications of the RAB acceptance process and their impact on the acceptance and completion of the peer review and on the reviewed firm's enrollment in the program, including
 - i. corrective actions for deficiencies and implementation plans for findings, if applicable;
 - ii. recommended report rating changes; and
 - iii. oversight
- e. Peer review noncooperation implications of consecutive non-pass report ratings, if applicable

Written Representations (Ref: par. .16–.17)

.A16 The reviewed firm is not prohibited from making additional representations and may tailor the representation letter as it deems appropriate, as long as the minimum applicable representations are made to the review captain. For example, the list of engagements in paragraph .16I is a minimum required representation, and therefore, these engagements should not be removed if the firm does not perform any such engagements.

.A17 An illustrative example of a firm's written representation letter is provided in exhibit A, "Illustrative Representation Letter."

.A18 On committee-appointed review team reviews, the representation letter may be addressed "To the Review Captain."

.A19

Exhibit A — Illustrative Representation Letter

The following illustrative letter includes written representations that are required by paragraphs .16–.17 of this section. The firm may tailor the language in this illustration and refer to attachments to the letter as long as adequate representations pertaining to the matters previously discussed, as applicable, are included to the satisfaction of the review captain.

[*Entity Letterhead*]

[*Date of the Report*]

To [*Name of Review Captain*]:

We are providing this letter in connection with the peer review of [*name of firm*] as of the date of this letter and for the year ended June 30, 20XX.

Management has fulfilled its responsibility for the design of and compliance with a system of quality control for our accounting practice that provides us with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects.

We understand that we are responsible for complying with the rules and regulations of state boards of accountancy and other regulators. We have [*no knowledge of*][*disclosed to you all known*] situations in which [*name of firm*] or its personnel have not complied with the rules and regulations of state board(s) of accountancy or other regulatory bodies, including applicable firm and individual licensing requirements through the issuance dates of the reviewed engagements in each state in which it practices for the year under review.

We have provided to the review captain a list of all engagements with periods ending during (or, for financial forecasts or projections and agreed-upon procedures engagements, report dates in) the year under review, regardless of whether issued. This list included, but was not limited to, all engagements performed under *Government Auditing Standards*, audits of employee benefit plans, audits performed under FDICIA, and examinations of service organizations (SOC 1® and SOC 2® engagements), as applicable. The firm does not perform engagements under the Statements on Auditing Standards (SASs) or *Government Auditing Standards*, examinations under the Statements on Standards for Attestation Engagements (SSAEs), or engagements under Public Company Accounting Oversight Board (PCAOB) standards that are not subject to permanent inspection by the PCAOB. We understand that failure to properly include these engagements on the list could be deemed as failure to cooperate. We also understand this may result in termination from the Peer Review Program and, if termination occurs, may result in an investigation of a possible violation by the appropriate regulatory, monitoring, and enforcement body.

[*We confirm that it is our responsibility to remediate nonconforming engagements as stated by the firm in the Letter of Response* (if applicable).]

We have discussed significant issues from reports and communications from regulatory, monitoring, and enforcement bodies with the review captain, if applicable. We have also provided the review captain with any other information requested, including communications or summaries of communications from regulatory, monitoring, or enforcement bodies relating to allegations or investigations of deficiencies in the conduct of an accounting, audit, or attestation engagement performed and reported on by the firm, whether the matter relates to the firm or its personnel, within three years preceding the current peer review year-end. We confirm that, to the best of our knowledge and belief, there

are no known restrictions or limitations on the firm's or its personnel's ability to practice public accounting by regulatory, monitoring, or enforcement bodies within three years preceding the current peer review year-end.

We understand the intended uses and limitations of the quality control materials we have developed or adopted. We have tailored and augmented the materials as appropriate such that the quality control materials encompass guidance that is sufficient to assist us in conforming with professional standards (including the Statements on Quality Control Standards) applicable to our accounting practice in all material respects.

Sincerely,

*[Name of Reviewed Firm Representative(s)]*¹

¹ Firm representatives are members of management as described in paragraph .10 of section 300, *General Principles and Responsibilities for Reviewed Firms*.

.A20

Exhibit B — Illustrative Example of a Firm's Letter of Response

This exhibit contains an illustration of a firm's letter of response to a peer review report rating of *pass with deficiencies* or *fail* (engagement reviews).

Illustration — A Firm's Letter of Response to a Report on the Firm's Conformity With Professional Standards on Engagements Reviewed With a Peer Review Rating of Pass With Deficiencies or Fail

[Reviewed firm's letterhead]

[Date of the report]

[Addressed to the peer review committee of the administering entity]¹

Ladies and Gentlemen:

This letter represents our² response to the report on the engagement review of our firm's accounting practice for engagements submitted for review with periods ending during the year ended [peer review year-end date].

- 1.³ We have recalled and reissued the review report. The entire staff has participated in continuing professional education related to reporting and disclosures, with a particular focus on areas specific to the industries that we are engaged in. We will be performing a pre-issuance review by a partner not associated with the engagement to make sure that the accountant's report is appropriately modified when the financial statements depart from applicable professional standards.
2. We subsequently obtained a management representation letter and documented the matters covered in our inquiry and analytical procedures. Management representation letters will be obtained for all future review engagements issued by the firm. The firm has required that a manager review each engagement to ensure that the management representation letter is obtained and that all the required documentation, including the matters covered in the accountant's inquiry and analytical procedures, is included in the working papers.

We believe these actions are responsive to the deficiencies noted on the review.

Sincerely,

[Name(s) of reviewed firm representative(s)]⁴

¹ The response of a firm whose review is administered by the National Peer Review Committee should be addressed as follows: "To the National Peer Review Committee."

² The response should use the singular *I*, *me*, and *my* only when the reviewed firm is a sole practitioner.

³ The numbering of responses to coincide with the numbered comments in the report is optional.

⁴ These are members of management as described in paragraph .25 of section 200, *General Principles and Responsibilities for Reviewers*.

PR-C Section 400

General Principles and Administration Responsibilities

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains performance requirements and application material for administration of the AICPA Peer Review Program (the program). The requirements and guidance in this section supplement the requirements and guidance in the following PR-C sections:

- a. Section 100, *Concepts Common to All Peer Reviews*
- b. Section 410, *The Report Acceptance Process*
- c. Section 420, *Corrective Actions and Implementation Plans*
- d. Section 430, *Reviewer Monitoring and Performance*

.02 In addition to the sections described by paragraph .01, individuals involved in the administration of the program should be familiar with reviewer and firm requirements in the following PR-C sections: (Ref: par. .A1)

- a. Section 210, *General Principles and Responsibilities for Reviewers — System Reviews*
- b. Section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*
- c. Section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*
- d. Section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*

Effective Date

.03 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objective

.04 The objective of the administering entity (AE) is to carry out the program in accordance with the AICPA Standards for Performing and Reporting on Peer Reviews (the standards). The peer review committee (committee) assists the AE in its objectives by overseeing the administration, acceptance, and completion of peer reviews.

Definitions

.05 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Obligations of an Administering Entity

.06 In electing to administer the program, an AE agrees to do the following:

- a.* Comply with the standards.
- b.* Cooperate with the board in all matters related to the administration of the program. (Ref: par. .A2)
- c.* Engage an experienced CPA on staff to lead and manage the program. (Ref: par. .A3)
- d.* Appoint a peer review committee of at least six members to oversee the administration of the program. (Ref: par. .A4–.A5)
- e.* Comply with AICPA system security guidelines.
- f.* Establish a backup plan for key individuals involved in the administration of the program.
- g.* Establish familiarity threat policies and procedures that identify, evaluate the significance of, and apply safeguards to mitigate those threats. (Ref: par. .A6)
- h.* Annually submit a comprehensive and written oversight program that meets minimum requirements established by the board and ensures the program is performed in accordance with the standards. (Ref: par. .A7)
- i.* Establish policies and procedures to address disagreements that arise between parties to a peer review. (See appendix B, "Disagreements.")
- j.* Establish procedures to ensure consistent application of the standards.
- k.* Monitor reviewer performance. (See section 430.)
- l.* Perform procedures to verify that reviewer resumes accurately reflect the reviewer qualifications.
- m.* Monitor firms enrolled in the program within its jurisdiction.
- n.* Evaluate the qualifications and competencies of technical reviewers at least annually.
- o.* Ensure reviews are presented for evaluation to a report acceptance body (RAB) or accepted by the technical reviewer in a timely manner as follows: (Ref: par. .A8)
 - i.* Reviews required to be presented to a RAB are presented within 120 days of the receipt of the working papers from the captain.
 - ii.* Engagement reviews meeting the criteria to be accepted by a technical reviewer are accepted by the technical reviewer or presented to a RAB within 60 days of the receipt of the working papers from the captain.
 - iii.* Meeting materials are provided to RAB members at least seven days in advance of the date of the RAB meeting.

Document Retention

.07 The AE should retain peer review documentation at least 120 days, but no more than 150 days, after the peer review completion date, except for the following, as applicable: (Ref: par. .A9–.A10)

- a.* Peer review report
- b.* Letter of response
- c.* Firm representation letter
- d.* Findings for further consideration (FFCs)
- e.* Letter notifying the firm that its peer review has been accepted
- f.* Letters requesting the firm's completion of implementation plans and corrective actions
- g.* Letters requesting the firm's completion of additional implementation plans and corrective actions
- h.* Letters notifying the firm that implementation plans have been completed
- i.* Supporting documents evidencing completion of corrective actions and implementation plans, including documentation regarding the decision to waive, replace, or extend the due date
- j.* Committee-appointed review team (CART) engagement letter
- k.* Letters relating to peer review document recall considerations (See appendix C, "Considerations for the Recall of Peer Review Documents.")

If a firm is enrolled in the program but has not undergone a peer review in the last 3 years and 6 months since the year-end date of its last peer review, all other peer review documents should be retained at least 42 months, but no more than 43 months, after the peer review completion date.

Publicizing Peer Review Information

.08 Except as authorized by the reviewed firm, individuals involved in the administration of the program should disclose only the following information regarding a reviewed firm: (Ref: par. .A1 and .A11–.A13)

- a.* The firm's name and address
- b.* Whether the firm is enrolled in the program
- c.* The date of acceptance and the period covered by the firm's most recently accepted peer review
- d.* The most recent date the firm's enrollment in the program has been dropped or terminated, if applicable

.09 Individuals involved in the administration of the program should not provide subjective information about a firm's peer review, even with firm authorization. (Ref: par. .A14)

Ethical Requirements Relating to a Peer Review

.10 Individuals involved in the administration of the program should do the following:

- a.* Maintain objectivity in discharging their responsibilities.
- b.* Be free of bias, conflicts of interest, or undue influence of others that overrides professional judgment.

- c. Annually sign a confidentiality and conflict-of-interest agreement. (Ref: par. .A15)
- d. Not commence nor plan to commence any enforcement-related work, if applicable, as an employee, consultant, volunteer (or other similar arrangement) of the AICPA or state CPA society ethics committee, the AICPA Joint Trial Board, or a state board of accountancy (or other regulatory agencies, governmental bodies, or similar groups or subgroups). (Ref: par. .A16)

.11 Individuals associated with the AE that lack independence or have a conflict of interest with a reviewing firm, reviewer, or reviewed firm should recuse themselves from any discussion regarding the reviewed firm's peer review. Circumstances that would cause an individual to experience a conflict of interest include, but are not limited to, the following:

- a. The individual's firm performed the most recent or immediately preceding peer review of the affected firm.
- b. The individual served on the review team that performed the most recent or immediately preceding peer review of the affected firm.
- c. The individual served on a disagreement panel involving the firm's current review.
- d. The individual believes that the individual could not be impartial or objective.
- e. The individual's independence is impaired as a result of situations such as those described in paragraph .16 of section 200, *General Principles and Responsibilities for Reviewers*.

.12 Individuals associated with the AE who perform oversight on a peer review may participate in discussions related to the firm subject to oversight but should not vote on any motions related to the firm or firm's review.

.13 Individuals associated with the AE who are reviewers are also required to comply with the reviewer qualification requirements in section 200.

.14 Individuals associated with the AE should notify the relevant AE of any allegations against or investigations into them. Notification should occur prior to participating in the peer review process (such as performing technical reviews or participating in any committee or RAB meetings). The AE should monitor and consider the role that the individuals fill in the peer review process when determining the proper actions to take. (Ref: par. .A17)

CPA on Staff

Qualifications

.15 The CPA on staff should

- a. be licensed to practice as a CPA.
- b. be knowledgeable about the standards, administrative requirements, and processes.
- c. possess relevant audit experience and current knowledge of professional standards applicable to the reviews being administered.
- d. understand the significance of technical issues and the impact on reviews.

- e.* obtain at least 48 hours of CPE every 3 years in subjects relating to accounting, auditing, and quality control with a minimum of 8 hours in any 1 year.
 - f.* complete CPA-on-staff training that meets the requirements established by the board.
 - g.* be proficient with technology to effectively manage the program.
 - h.* agree to confidentiality and conflict-of-interest requirements of the program.
- .16** The CPA on staff should not
 - a.* be a member of the committee or a RAB.
 - b.* perform peer reviews within the AE's jurisdiction.
 - c.* be a full-time technical reviewer for the AE at which the CPA is employed. (Ref: par. .A18)

Peer Review Committee

Composition and Qualifications

.17 A majority of the committee members and the chairperson charged with the overall responsibility for administering the program should possess the qualifications required of a team captain in a system review, as addressed in paragraphs .05–.15 of section 200 and paragraph .32 of section 210. (Ref: par. .A19–.A20)

.18 Committee members should be members of the AICPA in good standing.

.19 A committee member does not meet the required qualifications of a committee member if the member's ability to practice public accounting or perform peer reviews has been restricted by a regulatory, monitoring, or enforcement body beginning on the date the member is notified of the restriction and ending on the date that the restriction has been removed. (Ref: par. .A21)

Responsibilities

- .20** The committee should do the following: (Ref: par. .A4 and .A22)
- a.* Carry out its activities in accordance with administrative procedures and guidance issued by the board.
 - b.* Oversee the administration, acceptance, and completion of peer reviews it has agreed to administer.
 - c.* Evaluate the adequacy of the policies and procedures required to be established by the AE per items *(f)–(i)* of paragraph .06.
 - d.* Monitor the performance of reviewers within its jurisdiction and, when appropriate, prescribe effective corrective actions or recommend to the board that a reviewer be prohibited from performing peer reviews in the future.
 - e.* Monitor firms that are not cooperating or not complying with the requirements of the program. (See appendix A, "Failure to Cooperate or Comply With the Requirements of the Program Referral Responsibilities.")

Report Acceptance Body

Qualifications

.21 A RAB member should

- a. be a member of the AICPA in good standing, licensed to practice as a CPA.
- b. be presently involved in public practice as a partner, manager, or person with equivalent responsibilities in the accounting or auditing practice or carrying out a quality control function in the member's firm. (Ref: par. .A23)
- c. have spent the last five years in the practice of public accounting in the accounting or auditing function.
- d. be employed by or be an owner of a firm that has received a report with a peer review rating of *pass* or *pass with scope limitations* for its most recent peer review. The report should have been accepted timely. (Ref: par. .A24)
- e. complete RAB member training that meets the requirements established by the board.
- f. agree to confidentiality and conflict-of-interest requirements of the program.

.22 A RAB member does not meet the required qualifications if the member's ability to practice public accounting or perform peer reviews has been restricted by a regulatory, monitoring, or enforcement body. The period that the member is not qualified begins on the date the member is notified of the restriction and ends on the date that the restriction has been removed. (Ref: par. .A25)

Report Acceptance Body Composition

.23 A minimum of three RAB members who are independent and free from any conflicts of interest should evaluate each peer review that requires RAB consideration. To accept any motions related to a peer review, a majority of the RAB members should agree to carry the motion.

.24 For the acceptance of system reviews (including corrective actions or implementation plans related to a system review),

- a. the chairperson of the RAB should possess the qualifications required of a system review team captain.
- b. a majority of the RAB members should possess the qualifications required of a system review team captain.
- c. at least one RAB member should have current experience in the must-select engagements included in the review. (Ref: par. .A26–.A27)

.25 If a RAB meeting includes a third party to meet the requirement for must-select experience discussed in paragraph .24, that individual should meet the following qualifications:

- a. Be a member of the AICPA in good standing, licensed to practice as a CPA, and employed by or an owner of a firm enrolled in the program.
- b. Be presently involved in public practice in the must-select engagements as a partner, manager, or person with equivalent

supervisory responsibilities or carrying out a quality control function in the individual's firm.

- c. Be employed by or an owner of a firm that has received a report with a peer review rating of *pass* or *pass with scope limitations* for its most recent system review. The report should have been accepted timely.
- d. Agree to confidentiality and conflict-of-interest requirements of the program.

Peer Review Evaluation

.26 The RAB should evaluate each peer review presented for acceptance to determine whether the review was performed and reported on in accordance with the standards. After the evaluation of the peer review documents, the RAB should vote on acceptance, deferral, or delayed acceptance of the review. Specific criteria for evaluating peer reviews are discussed in paragraphs .11–.15 of section 410.

.27 The RAB should require a reviewed firm to perform corrective actions for *pass with deficiencies* and *fail* reports. Determining when and what type of corrective actions to require is further discussed in paragraph .07 of section 420. (Ref: par. .A28–.A29)

.28 The RAB should consider an implementation plan only for

- a. repeat findings,
- b. findings that identify at least one must-select nonconforming engagement in a system review, or
- c. a finding related to the reviewed firm's licensure.

(See paragraphs .07–.08 of section 420.)

.29 The RAB should establish a due date for required corrective actions and implementation plans. The due date should be as soon as reasonably possible considering all known information, including, but not limited to, the following:

- a. The anticipated completion date of subsequent engagements
- b. The timing of CPE program presentations or availability
- c. The timing of the reviewed firm's monitoring procedures

Evaluating the Results of Corrective Actions and Implementation Plans

.30 The RAB should evaluate the results of corrective actions and implementation plans to determine if they have been completed as required and whether the reviewed firm should be required to perform additional actions. (See paragraphs .09–.10 of section 420.)

.31 When considering replacing or waiving corrective actions or implementation plans, the RAB should do the following:

- a. Review the facts and circumstances surrounding the deficiencies or findings.
- b. Consider the reasons for the original action.
- c. Consider replacing an action prior to waiving an action, if applicable. (See paragraph .12 of section 420.)

.32 If the reviewed firm requests a replacement or waiver of an action because it will no longer perform engagements in the industry or level of service related to the action, the RAB should replace or waive the action and require the firm to provide a written representation that

- a. states the firm is no longer performing or has plans to perform engagements in that industry or level of service.
- b. includes a listing of such engagements that were issued since the last peer review year-end.
- c. is signed by the appropriate member of management.
- d. is included in the letter of response if the firm represents it will no longer perform certain engagements or engagements in a specific industry prior to the review being submitted for acceptance.

.33 If the RAB waived corrective actions because a reviewed firm represented that it would no longer perform the engagements that were the source of deficiencies and the firm subsequently notifies the AE that the firm has accepted such an engagement, the RAB should evaluate whether the firm should perform any actions related to the recently accepted engagement.

Firm Cooperating and Complying With the Requirements of the Program

.34 The RAB should evaluate whether a reviewed firm is not cooperating or not complying with the requirements of the program due to reasons described in paragraphs .12–.13 of section 300, *General Principles and Responsibilities for Reviewed Firms*. (See appendix A.)

.35 For a reviewed firm that receives three consecutive non-pass (*pass with deficiencies* or *fail*) peer review reports, the RAB should assess whether the firm should be referred for failing to comply with the requirements of the program when the RAB evaluates the firm's most recent review for acceptance. For a reviewed firm that receives consecutive non-pass peer review reports (two total), the RAB should assess whether the firm should be referred for failing to comply with the requirements of the program after the firm has submitted the results of assigned corrective actions in its current review. (Ref: par. .A30–.A33)

.36 After a firm receives consecutive non-pass reports, the RAB or the committee should evaluate whether to refer the firm for potential termination. The evaluation of the firm's attempted improvement should include reviewing the previous peer review documents, including the reports, letters of response, and results from related corrective actions, and evaluating the following: (Ref: par. .A32–.A33)

- a. Whether the prescribed corrective actions were appropriate to address the cause of the deficiencies and gave the firm an opportunity to demonstrate the effectiveness of implemented changes
- b. Whether the firm was given an appropriate amount of time to improve
- c. Whether the firm implemented actions outside of required corrective actions to resolve deficiencies
- d. Whether actions taken by the firm appear genuine
- e. Whether there was improvement relative to the deficiencies identified
- f. Whether deficiencies were repetitive or substantially the same on the current review
- g. Whether deficiencies in the prior review were replaced with different deficiencies
- h. Whether deficiencies in the current year were of the same nature and severity as compared to the prior review deficiencies
- i. Other facts and circumstances as deemed necessary

.37 After evaluation, the firm should be referred to the committee or board if any of the following apply:

- a. It is evident the firm did not implement the actions in its letters of response or complete corrective actions required to date.
- b. Deficiencies in previous peer reviews are repeated in the current peer review.
- c. The firm has not made attempts to appropriately design or comply with its system of quality control.

(See appendix A.)

.38 The AE should maintain documentation of the RAB's and committee's evaluations of potential referrals to the board for termination for receiving consecutive non-pass reports.

.39 Referral of a firm to the board should include all supporting documentation. (Ref: par. .A34–.A35)

Considerations for the Recall of Peer Review Documents

.40 If, subsequent to the date of peer review acceptance, information becomes known that existed as of the date of the peer review report or acceptance that might have affected the performance or acceptance of the peer review, the RAB should evaluate the facts and circumstances and determine whether the acceptance letter should be recalled. In such cases, only the reviewed firm's most recently accepted peer review should be recalled. (Ref: par. .A36)

.41 Recall should not be considered as a result of (Ref: par. .A37)

- a. fee disputes,
- b. disagreements that occur after acceptance by the RAB,
- c. situations outside of the scope of peer review,
- d. situations not addressed in the standards, or
- e. other situations that did not have a direct impact on the underlying peer review period, procedures performed, or peer review documents.

.42 When peer review documents are being considered for recall,

- a. AICPA staff should be notified and consulted early in the process.
- b. all parties involved should cooperate with efforts to determine the impact any additional information may have on a review.
- c. all parties should continue to adhere to the confidentiality guidelines in paragraphs .19–.20 of section 100.
- d. peer review documentation should be retained after notification of potential recall until the matter is resolved.
- e. recall considerations should be documented and retained until the firm's subsequent review has been completed.

Reviewer Performance

.43 During the review acceptance process, the RAB should evaluate the captain's and review team's performance. (See paragraphs .01–.17 of section 430.)

Other RAB Responsibilities

.44 The RAB should periodically (at least annually) review a list of engagement reviews accepted by the technical reviewer.

Technical Reviewer

Qualifications

.45 A technical reviewer should

- a. be a member of the AICPA in good standing, licensed to practice as a CPA.
- b. complete initial and ongoing peer review captain training that meets the requirements established by the board within 12 months preceding the commencement of the technical review. (Ref: par. .A38)
- c. have an appropriate level of accounting and auditing knowledge and experience suitable for the work performed. (Ref: par. .A39)
- d. complete initial technical reviewer training that meets the requirements established by the board within 12 months before serving as a technical reviewer and complete or attend one of the following every calendar year thereafter:
 - i. a technical reviewer update training course developed by the AICPA
 - ii. the annual AICPA peer review conference
- e. obtain at least 48 hours of AICPA-required CPE every 3 years in subjects relating to accounting, auditing, and quality control, with a minimum of 8 hours in any 1 year.
- f. obtain at least 8 hours of CPE every 2 years in subjects related to single audits, if performing the technical review of a peer review that includes single audit engagements. The required CPE hours should include completion of technical reviewer training for single audits, which should be completed prior to performing the technical reviewer's first technical review of documents for a single audit engagement. (Ref: par. .A40)
- g. annually participate in a peer review that is equivalent to the highest level of technical review performed. Participation includes the following:
 - i. Reviewing and discussing the planning and scope of the peer review with the captain
 - ii. Reviewing the engagement checklists completed by the review team
 - iii. Attending meetings or participating in conference calls between the reviewer and reviewed firm to discuss issues encountered during the peer review
 - iv. Attending the closing meeting and the exit conference

.46 Technical reviewers who are not also peer reviewers should notify the relevant AE of any limitations or restrictions on their or their firm's ability to practice. Notification should happen prior to performing a technical review. (Ref: par. .A41)

Evaluating Peer Review Documentation

.47 Technical reviews are required to be performed on all peer reviews. The technical reviewer should review peer review documents, evaluate whether the peer review documentation provides satisfactory evidence of compliance with

the standards and supports the conclusions reached, and complete the technical reviewer's checklist. (See paragraphs .05–.10 of section 410.)

.48 For reviews that require RAB evaluation, the technical reviewer should provide the RAB with necessary information to properly evaluate the review. The required technical review working papers should be submitted to the AE in a timely manner to assist the AE in ensuring reviews are presented to a RAB within 120 days of receipt of the working papers from the captain and meeting materials are provided to RAB members at least 7 days in advance of the date of the RAB meeting. (See paragraphs .07 and .10 of section 410.)

.49 When engagement reviews meet the criteria to be accepted by the technical reviewer and such authority has been granted by the committee or RAB, the technical reviewer should accept the review on behalf of the RAB within 60 days of receipt of the working papers from the review captain. The technical reviewer should accept engagement reviews on the RAB's behalf only if such authority has been granted and the review meets the following minimum criteria:

- a. No matters (matters for further consideration [MFCs]) are noted.
- b. The review was not subjected to oversight.
- c. The technical reviewer did not identify any reviewer performance feedback.
- d. There are no other issues associated with the peer review warranting committee consideration or action that could affect the results of the peer review.

Evaluating Corrective Actions and Implementation Plans

.50 The technical reviewer should evaluate the results of corrective actions or implementation plans to determine if they meet the requirements imposed by the RAB. If no significant outstanding issues exist, the technical reviewer should do one of the following:

- a. Accept the results on behalf of the RAB, if such authority has been granted.
- b. Present the results to the RAB for acceptance.

(See paragraphs .09–.11 of section 420.)

.51 If results of corrective actions or implementation plans show there are significant outstanding issues, the technical reviewer should not accept the corrective actions or implementation plans. Instead, the technical reviewer should

- a. recommend the RAB require additional corrective actions or implementation plans and
- b. consider and recommend whether the reviewed firm should be referred to a hearing panel for not cooperating with the requirements of the program.

.52 The technical reviewer should evaluate due date extension requests for corrective actions and implementation plans and

- a. approve the extension request, if such authority has been granted (see paragraph .11 of section 420), or
- b. submit the request to the AE for RAB evaluation.

.53 The technical reviewer should evaluate requests to waive or replace corrective actions and implementation plans and submit the requests to the AE for RAB evaluation. (Ref: par. .A42)

Other Technical Reviewer Requirements

.54 Technical reviewers should be available to the RAB for questions or clarifications regarding their reviews being presented to the RAB. However, technical reviewers should not (Ref: par. .A43)

- a. actively present reviews to the RAB,
- b. make decisions on reviews on behalf of the RAB, or
- c. vote on acceptance of reviews.

Application and Other Explanatory Material**Scope of This Section (Ref: par. .01–.02)**

.A1 Individuals involved in the administration of the program include, but are not limited to,

- a. the CPA on staff,
- b. technical reviewers,
- c. administrators,
- d. committee members, and
- e. RAB members.

Obligations of an Administering Entity (Ref: par. .06)

.A2 If an AE fails to comply with the requirements of the program, refuses to cooperate, or is found to be deficient in administering the program in compliance with these standards, the board may (pursuant to fair procedures) take appropriate remedial actions.

.A3 The CPA on staff is responsible for evaluating whether technical reviewers are in compliance with the requirements outlined in paragraph .45, determining whether a technical reviewer's knowledge and experience are sufficient to perform technical reviews or oversight, and managing the performance of administrators and technical reviewers, including having the appropriate authority to manage and address any performance concerns of those individuals.

.A4 The committee may appoint individuals to serve on subcommittees and task forces as necessary to carry out its functions.

.A5 It is recommended that the AE document its committee and RAB structure and relationship.

.A6 Exhibit A, "Example Familiarity Threat Policies and Procedures," provides examples of familiarity threats and potential safeguards to assist AEs in creating their policies and procedures.

.A7 The *AICPA Peer Review Program Oversight Handbook* contains a detailed discussion of the minimum oversight requirements and the oversight process.

.A8 Circumstances in which it may be acceptable that a review is not presented or accepted in a timely manner include, but are not limited to, the following:

- a. Determination during technical review that oversight should be performed

- b. Submitted peer review documentation requires significant revisions or there are significant delays in receiving revised documents or responses to technical reviewer questions
- c. Enhanced oversight procedures
- d. Disagreements among the reviewer, reviewed firm, technical reviewer, or the AE

Document Retention (Ref: par. .07)

.A9 AEs may rely on the electronic peer review system to retain peer review documentation in accordance with the requirements if the documents are appropriately uploaded into the system. If any peer review documents are outside of the electronic peer review system, the AE retains those documents as follows:

Most Recently Completed Peer Review Documents (as Applicable)	Retention Period	
	<i>Enrolled Firms</i>	<i>Unenrolled Firms¹</i>
• FFCs • Firm representation letter • Letters requesting the reviewed firm's completion of an implementation plan • Supporting documents evidencing completion of corrective actions and implementation plans • CART review engagement letter • Letters relating to peer review document recall considerations	At least 120 days, but no more than 150 days, after completion of subsequent review	At least 42 months, but no more than 43 months, after the resignation, drop, or termination date
<i>When a firm receives a report with a pass rating:</i> • Peer review report • Letter notifying the firm that its peer review has been accepted • Letters notifying the firm that the implementation plan has been completed	At least 120 days, but no more than 150 days, after completion of subsequent pass review	At least 42 months, but no more than 43 months, after the resignation, drop, or termination date

(continued)

¹ Unenrolled firms, for purposes of document retention, are firms that resigned or were dropped or terminated from the program.

Most Recently Completed Peer Review Documents (as Applicable)	Retention Period	
	<i>Enrolled Firms</i>	<i>Unenrolled Firms</i>
<i>When a firm receives a report with a non-pass rating:</i> • Peer review report • Letter of response • Letter notifying the firm that its peer review has been accepted • Letters indicating that the peer review documents have been accepted with the understanding that the firm agrees to take certain actions • Letters notifying the firm the implementation plans have been completed • Letters notifying the firm that required actions have been completed	At least 120 days, but no more than 150 days, after completion of a subsequent review with a pass report, not to exceed 3 peer reviews	At least 42 months, but no more than 43 months, after the resignation, drop, or termination date
• All other documents (for example, the Summary Review Memorandum or MFCs)	<i>Completion date for the review:</i> • At least 120 days, but no more than 150 days, after completion of the review	<i>Completion date for the review:</i> • At least 120 days, but no more than 150 days, after completion of the review
<i>When a firm's peer review is not completed (for example, when a firm is terminated and does not reenroll):</i> • All peer review documents	N/A	• At least 42 months, but no more than 43 months, after the resignation, drop, or termination date

.A10 The AICPA or the AE's committee may require any or all peer review documentation for specific reviews to be retained for a longer period than specified in paragraph .07 if there are regulatory investigations, pending litigation, or other appropriate circumstances.

Publicizing Peer Review Information (Ref: par. .08–.09)

.A11 A firm may be a voluntary member of one of the AICPA's audit quality centers or sections that requires, as a condition of membership, that certain peer review documents be open to public inspection. Other firms may voluntarily instruct their AEs to make the peer review results available to certain other state boards of accountancy. In these cases, the firm permits the AEs to make its peer review results available to the public or to state boards of accountancy. Peer review results include, as applicable, the following:

- a. Peer review report
- b. Letter of response
- c. Acceptance letter
- d. Letters acknowledged by the reviewed firm indicating that the peer review documents have been accepted with the understanding that the reviewed firm agrees to take certain actions
- e. Letters notifying the reviewed firm that certain required actions have been completed

.A12 When there is evidence of an open ethics investigation and the firm makes an informed and voluntary waiver of confidentiality in writing, AICPA Peer Review Program staff may provide information to the AICPA Professional Ethics Division. Information available for disclosure about the firm includes, but is not limited to, the following:

- a. Fieldwork commencement date
- b. Exit conference date
- c. Review acceptance dates
- d. Levels of service and industries included in the firm's peer review information for prior or current peer reviews
- e. Levels of service and industries included in prior or current peer reviews and those determined not to be in conformity with professional standards in all material respects
- f. Signed confirmations by a firm representative that the enrolled firm did not perform any services or issue reports that would require the firm to undergo a peer review
- g. Other similar information related to a prior or current peer review

.A13 If a firm has authorized the AE in writing to provide specific information (in addition to the information in paragraph .08) to third parties, the following (or similar) types of objective information about the review may be provided, if known:

- a. The date the review is or was scheduled to take place
- b. The name of the reviewing firm, team captain, or review captain
- c. If the fieldwork on the peer review has commenced
- d. The date the exit conference was expected to or did occur
- e. A copy of any extension approval letters
- f. Whether the peer review working papers have been received by the AE
- g. Whether a must-select engagement was included in the scope, as required by the standards
- h. If a technical review is in process

- i.* Whether the review has been presented to a RAB
- j.* The date the review is expected to be presented to a RAB
- k.* The specific overdue letters (such as, but not limited to, scheduling the peer review or completion of remedial actions) requested by third parties

.A14 Subjective information includes, but is not limited to, the following:

- a.* A statement indicating only that the review is "in process," or a response to an inquiry regarding the "general status" of a peer review
- b.* The peer review report rating prior to the peer review's acceptance
- c.* Whether there are indications that the firm, reviewing firm, team captain, or review captain are cooperating (or not cooperating) with the AICPA or AE
- d.* An indication of the quality or completeness of peer review working papers received by the AE
- e.* Reasons why peer review working papers, implementation plans, or corrective actions are late
- f.* Whether a firm is close to submitting documents or completing implementation plans or corrective actions
- g.* Reasons for, or the likely outcome of, fair procedures to determine whether the firm is cooperating with the AICPA or the AE

Ethical Requirements Relating to a Peer Review **(Ref: par. .10–.14)**

.A15 Templates for confidentiality and conflict-of-interest agreements are updated periodically by the board.

.A16 Individuals involved in administration of the program are described in paragraph .A1; however, the requirement in paragraph .10*d* is limited to individuals serving as committee members, RAB members, or technical reviewers.

.A17 Depending on the circumstances, and taking into consideration the need to serve the public interest, possible actions are oversight of the individuals' peer reviews or having them recuse themselves from the report acceptance process (in its entirety or just from the report acceptance process for reviews with engagements in the industry or other classification addressed by the allegation or investigation).

CPA on Staff

Qualifications (Ref: par. .15–.16)

.A18 The CPA on staff may perform technical reviews on a short-term basis such as when technical reviewers are unavailable for extended periods or there is a high volume of reviews. The CPA on staff may also perform technical reviews for another AE's jurisdiction.

Peer Review Committee

Composition and Qualifications (Ref: par. .17-.19)

.A19 In rare circumstances, an exception may be approved by the AICPA when a request is submitted in writing that thoroughly explains why the exception should be approved for an individual who does not meet the required qualifications described in paragraph .17.

.A20 When a committee member is not team captain-qualified but is practicing with a firm that has a non-pass rating in its most recent peer review report, the AE may consult with AICPA staff and establish safeguards to address the roles of such committee members.

.A21 Restrictions by regulatory, monitoring, or enforcement bodies that are outside of the program may disqualify a committee member. When such a restriction relates only to the committee member's firm, the AE may consider the nature and circumstances of partial or limited restrictions to determine whether the committee member no longer meets the required qualifications.

Responsibilities (Ref: par. .20)

.A22 In the event of a disagreement between the AE and either the reviewer or the reviewed firm that cannot be resolved by ordinary good-faith efforts, the AE may request that the matter be referred to the board for final resolution. The AE's committee is responsible for determining whether a disagreement exists that should be referred, and if so, may refer the matter to the board for resolution. In these circumstances, the board may consult with representatives of other AICPA committees or with appropriate AICPA staff.

Report Acceptance Body

Qualifications (Ref: par. .21-.22)

.A23 A manager or person with equivalent responsibilities is a professional employee of the firm who has either a continuing responsibility for the overall planning and supervision of engagements for specified clients or authority to determine that an engagement is complete subject to final partner approval, if required.

.A24 The AE will determine if the report has been accepted timely, which is ordinarily within three years and six months of the most recently accepted review's acceptance date. Considerations regarding timely acceptance are discussed in paragraph .A8.

.A25 Restrictions by regulatory, monitoring, or enforcement bodies that are outside of the program may disqualify a RAB member. When such a restriction relates to the RAB member's firm, the AE may consider the nature and circumstances of partial or limited restrictions to determine whether the RAB member no longer meets the required qualifications.

Report Acceptance Body Composition (Ref: par. .23-.25)

.A26 Current experience is described in paragraph .A22 of section 200.

.A27 The appropriate must-select experience may come from a member of the RAB, another AE's RAB member, or an individual from a list of consultants maintained by the AICPA. The AE will determine if the RAB will not have the

appropriate must-select experience and assign an individual with such experience prior to assigning the review to a RAB. The assigned individual with the appropriate must-select experience

- a. participates as a consultant,
- b. is not eligible to vote on acceptance of a review, and
- c. may attend the RAB meeting via teleconference.

Peer Review Evaluation (Ref: par. .26–.29)

.A28 The RAB may accept a *pass with deficiencies* or *fail* report without requiring corrective actions in certain circumstances including, but not limited to, the following:

- a. If the firm documented in its letter of response that it will no longer perform engagements in the industry or at the level of service related to the deficiencies or significant deficiencies
- b. If the firm's remediation described in its letter of response was completed and the team captain was able to review and was satisfied with the firm's action before the review was considered by the RAB

.A29 Guidance to assist outside third parties engaged to issue reports for corrective actions or implementation plans as a result of a peer review is discussed in appendix A, "Guidance for Outside Parties Engaged to Assist Firms in Completing Corrective Actions and Implementation Plans," of section 420.

Firm Cooperating and Complying With the Requirements of the Program (Ref: par. .34–.39)

.A30 After a firm receives a non-pass (*pass with deficiencies* or *fail*) peer review report, the firm is notified via a delivery method providing proof of delivery, such as via the electronic peer review system. If the firm fails to receive a pass report rating on its next peer review, it may be referred to the board for potential termination for failing to comply with the requirements of the program.

.A31 Referral for three or more consecutive non-pass peer review reports is presumptively mandatory but that presumption may be overcome.

.A32 When a firm has demonstrated improvement from the last peer review but other deficiencies were noted, causing a consecutive *pass with deficiencies* or *fail* report, referral to the board for failing to comply with the requirements of the program may not be necessary. In such circumstances, the firm took actions that corrected the prior deficiencies, but in doing so, may have created new deficiencies. Because the firm took remedial actions to correct the original deficiencies, the firm is deemed to have complied with the requirements of the program. Instead of referring the firm to the committee or board, the RAB may require additional corrective actions that will allow the firm to rectify the new deficiencies.

.A33 Reasons a RAB may decide not to refer a firm for failing to comply with the requirements of the program include, but are not limited to, the following:

- a. The firm has demonstrated genuine, significant improvement from the last peer review.
- b. The firm corrected deficiencies or significant deficiencies from the prior review, but in doing so, created new deficiencies or significant deficiencies.

- c. The RAB anticipates a pass report on the firm's next peer review due to aggressive actions taken by the firm to correct the deficiencies or significant deficiencies such as a firm that incorporates outside-party pre-issuance reviews of the engagements that led to the deficiencies or significant deficiencies.
- d. The RAB believes that, due to the nature and significance of the deficiencies or significant deficiencies, more targeted corrective actions can assist the firm in remediation.
- e. The firm voluntarily elects to cease performing certain engagements or engagements in certain industries specifically related to the deficiencies or significant deficiencies.

.A34 Documentation supporting referral of a firm to the board for potential termination includes, but is not limited to, the following:

- a. Warning letters issued to the firm
- b. Evidence of other correspondence whether verbal or written
- c. Notes or assessments from RAB or committee meetings (if applicable)
- d. A timeline outlining the various communications

.A35 Upon referral, the board will appoint a hearing panel to consider whether the firm's enrollment in the AICPA Peer Review Program should be terminated or whether some other action should be taken. Firms whose enrollment in the AICPA Peer Review Program is terminated have the right to appeal pursuant to fair procedures established by the board.

Considerations for the Recall of Peer Review Documents (Ref: par. .40–.42)

.A36 Appendix C provides additional guidance and considerations for evaluating the potential recall of a peer review report.

.A37 If a report was accepted more than three years and six months prior to the discovery of the information that may have affected the performance or acceptance of the peer review had it been known, recall considerations may not be necessary.

Technical Reviewer

Qualifications (Ref: par. .45–.46)

.A38 Peer review captain training courses are located on the Peer Review page of the AICPA website.

.A39 An appropriate level of accounting and auditing knowledge and experience may be obtained from on-the-job training, training courses, or a combination of both.

.A40 Technical reviewer training for single audits may be completed by taking the on-demand course developed by the AICPA or an alternative course approved by the board.

.A41 Examples of limitations or restrictions are included in paragraph .A14 of section 200. Although that paragraph refers specifically to peer reviewers, it is also applicable to technical reviewers who are not peer reviewers.

Evaluating Corrective Actions and Implementation Plans (Ref: par. .50–.53)

.A42 The technical reviewer may provide recommendations to the RAB regarding waiving or replacing corrective actions or implementation plans, taking into consideration the guidance in paragraphs .12–.13 of section 420.

Other Technical Reviewer Requirements (Ref: par. .54)

.A43 During RAB meetings, the technical reviewer may

- a. present matters of an administrative nature, such as due date extensions;
- b. present matters requiring consultation; and
- c. respond to questions from the RAB.

.A44

Exhibit A — Example Familiarity Threat Policies and Procedures

This exhibit includes examples of familiarity threats and potential safeguards used to mitigate the threats. These examples are not all-inclusive. In some instances, a safeguard could mitigate more than one threat; in other instances, however, depending on the significance of a threat, more than one safeguard may be necessary to properly mitigate it.

<i>Familiarity Threat</i>	<i>Safeguards to Mitigate the Threat</i>
.01 The peer reviews of the technical reviewers' and committee or report acceptance body (RAB) members' firms are presented for acceptance.	• The technical reviewers' and committee or RAB members' peer reviews will be accepted by a different administering entity (AE). We have partnered with AE "A" and have attached the agreement as addendum B. • The AE is split in more than one district, for example, east and west. The committee or RAB accepts reviews from a district other than its own. • The CPA on staff monitors the RAB process and reports preferential treatment or inconsistencies in the process. • The AE will designate a committee member (or other qualified individual) as an observer of RAB meetings to monitor the RAB process and report preferential treatment or inconsistencies in the process.
.02 Overreliance is placed on committee or RAB members, which leads to other members not reading the RAB package in its entirety.	• Arranging for RAB members from other AEs to participate in RABs • Having multiple committees or RABs that change composition regularly • Having RAB members acknowledge that they have read reviews before starting the meeting • Having the CPA on staff evaluate committee or RAB member performance

(continued)

<i>Familiarity Threat</i>	<i>Safeguards to Mitigate the Threat</i>
.03 The committee or RAB members have a long-standing relationship with the technical reviewers, which leads to overreliance on the technical reviewers' procedures and conclusions. For instance, it may not be apparent if an issue or a non-conforming engagement has been addressed, yet the committee or RAB decide not to investigate because members believe the technical reviewer would not have missed the issue.	● Engaging qualified individuals from another state to perform all technical reviews ● Arranging for RAB members from other AEs to participate in RABs ● Engaging a second technical reviewer to perform a selection of secondary technical reviews of high-risk reviewers, firms, and random samples
.04 The committee or RAB members have long-standing relationships with some reviewers, particularly those who perform a high volume of reviews.	● Arranging for another AE to accept an AE's high-volume reviewers' reviews ● Annually requesting committee or RAB members to identify conflicts of interest with reviewers and reviewed firms
.05 Technical reviewers have long-standing relationships with some reviewers, particularly those who perform a high volume of reviews.	● Engaging qualified individuals from another state to perform all technical reviews ● Arranging for another AE to accept reviews performed by a high-volume reviewer ● Annually requesting technical reviewers to identify conflicts of interest with reviewers and reviewed firms
.06 AEs are hesitant to provide feedback or consider deficiency letters for a variety of reasons including, but not limited to, the following: a. RAB members know the reviewer. b. The reviewer preforms a high volume of reviews in the state and the RAB is afraid to offend him or her. c. The reviewer is a RAB member (current or former) or is a technical reviewer.	● Engaging qualified individuals from another state to perform all technical reviews ● Arranging for RAB members from other AEs to participate in RABs ● Annually requesting committee or RAB members to identify conflicts of interest with reviewers and reviewed firms

<i>Familiarity Threat</i>	<i>Safeguards to Mitigate the Threat</i>
d. The reviewer teaches for the state CPA society or has some other society relationship that leads to a belief that the individual knows what the individual is doing.	
.07 A committee member is given informal feedback on reviews the committee member performed but a different reviewer is issued written feedback for the same issue.	• Arranging for RAB members from other AEs to participate in RABs • Having the CPA on staff monitor the RAB process and report preferential treatment or inconsistencies in the process • Having the AE designate a committee member (or other qualified individual) as an observer of RAB meetings to monitor the RAB process and report preferential treatment or inconsistencies in the process
.08 Following an enhanced oversight, the RAB has allowed the peer reviewer or reviewed firm to provide documentation not provided to the subject matter expert during the enhanced oversight (such documentation should have been provided at that time). This gives the appearance that reviewers or reviewed firms familiar to the RAB are being allowed to create working papers.	• Arranging for specialists from other states to participate in RABs • Arranging for RAB members from other AEs to participate in RABs • Having the CPA on staff monitor the RAB process and report preferential treatment or inconsistencies in the process
.09 RAB members mention a firm's reputation regarding a specific industry concentration when presented with issues (generally documentation issues), implying that because issues were not identified previously, it is unlikely issues exist now despite evidence to the contrary.	• Arranging for specialists from other states to participate in RABs

.A45

Appendix A — Failure to Cooperate or Comply With the Requirements of the Program Referral Responsibilities

This appendix describes the responsibilities of the peer review committee (committee) and report acceptance body (RAB) when a firm fails to cooperate or comply with the requirements of the program. Additional information regarding cooperating and complying with the requirements of the program is included in paragraphs .12–.17 of section 300, *General Principles and Responsibilities for Reviewed Firms*.

<i>Failure of a Firm to Comply With the Requirements of the Program</i>	<i>Report Acceptance Body Responsibility</i>	<i>Peer Review Committee Responsibility</i>
.01 Once the review has commenced, not responding to inquiries or not providing any information necessary to ensure the review is accepted and completed	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.02 Withholding information significant to the peer review	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.03 Not providing documentation including but not limited to the representation letter, quality control documents, engagement working papers, and all elements of the firm's system of quality control	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.04 Not responding to matters for further consideration or findings for further consideration timely	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.05 Limiting access to offices, personnel, or others once the review has commenced	Referral to board hearing panel must be supported by simple majority vote.	No action required.

<i>Failure of a Firm to Comply With the Requirements of the Program</i>	<i>Report Acceptance Body Responsibility</i>	<i>Peer Review Committee Responsibility</i>
.06 Not facilitating the arrangement for the exit conference on a timely basis	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.07 Failing to timely file a letter of response, if applicable	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.08 Failing to cooperate during oversight	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.09 Failing to timely acknowledge and complete required corrective actions or implementation plans	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.10 Failing to ensure that its peer review is submitted to the administering entity timely	Referral to board hearing panel must be supported by simple majority vote.	No action required.
.11 Failing to correct deficiencies or significant deficiencies after consecutive corrective actions required by the committee on the same peer review	Recommendation to full peer review committee must be supported by RAB simple majority vote.	Referral to board hearing panel must be supported by two-thirds vote of full peer review committee.
.12 Failing to provide the administering entity a substantive response, and the firm does not revise its response or provides additional responses that are not substantive as determined by the administering entity	Recommendation to full peer review committee must be supported by RAB simple majority vote.	Referral to board hearing panel must be supported by two-thirds vote of full peer review committee.

(continued)

<i>Failure of a Firm to Comply With the Requirements of the Program</i>	<i>Report Acceptance Body Responsibility</i>	<i>Peer Review Committee Responsibility</i>
.13 Failing to provide substantive responses during the administering entity's process of determining if erroneously provided or omitted information by a firm that results in a significant change in the planning, performance, evaluation of results, or peer review report is a matter of noncooperation	Recommendation to full peer review committee must be supported by RAB simple majority vote.	Referral to board hearing panel must be supported by two-thirds vote of full peer review committee.
.14 Failing to timely notify the administering entity that the firm is performing a type of engagement or engagements in an industry in which the firm had previously represented by written communication to the administering entity that it was no longer performing and had no plans to perform, in response to a related corrective action or implementation plan wherein the corrective action or implementation plan was eliminated by the administering entity based on the representation	Recommendation to full peer review committee must be supported by RAB simple majority vote.	Referral to board hearing panel must be supported by two-thirds vote of full peer review committee.
.15 Deficiencies or significant deficiencies indicate the firm is so seriously deficient in its performance that educational and remedial corrective actions or implementation plans would not be adequate	Recommendation to full peer review committee must be supported by RAB simple majority vote.	Referral to board hearing panel must be supported by two-thirds vote of full peer review committee.
.16 Other instances of noncooperation for which determination of sufficiency or appropriateness of firm actions warrant consideration by the administering entity's peer review committee	Recommendation to full peer review committee must be supported by RAB simple majority vote.	Referral to board hearing panel must be supported by two-thirds vote of full peer review committee.

<i>Failure of a Firm to Comply With the Requirements of the Program</i>	<i>Report Acceptance Body Responsibility</i>	<i>Peer Review Committee Responsibility</i>
.17 Receiving consecutive non-pass peer review reports and the second report is a <i>pass with deficiencies</i>	Assessment by the RAB after corrective actions related to the second non-pass review are submitted. Recommendation to the full peer review committee must be supported by RAB simple majority vote.	Assessment by the committee; referral to board hearing panel must be supported by two-thirds vote of full peer review committee.
.18 Receiving consecutive non-pass peer review reports and the second report is a <i>fail</i>	Assessment by the RAB after corrective actions related to the second non-pass review are submitted. Referral to the board is presumptively mandatory and must be supported by RAB simple majority vote.	Assessment by the committee; referral to board hearing panel must be supported by two-thirds vote of full peer review committee.
.19 Receiving a third consecutive non-pass peer review report.	Assessment by the RAB. Referral to the board is presumptively mandatory and must be supported by RAB simple majority vote.	No action required.

.A46

Appendix B — Disagreements

Disagreements

.01 Professional judgment is part of the peer review process and individuals have the right to challenge one another on an issue. As such, disagreements may arise between parties to a peer review regarding topics including, but not limited to, the following:

- a. The peer review report rating to be issued
- b. The application of professional standards related to the review of an engagement
- c. The systemic cause of a deficiency or issues related to a design or compliance deficiency
- d. Whether the performance or reporting (or both) on an engagement results in a nonconforming engagement
- e. Whether actions planned or taken by the firm to address findings or deficiencies or to remediate nonconforming engagements, if any, are appropriate
- f. After acceptance of a peer review, whether peer review documents should be recalled (See paragraphs .40–.42.)

.02 Reviewers and reviewed firms may consult the administering entity (AE) for assistance in resolving disagreements and, if necessary, request that the AE form a disagreement panel to resolve the disagreements. A disagreement panel may be requested by any disagreeing party.

AE Considerations When Establishing Policies and Procedures Related to Disagreements

.03 Policies and procedures for handling disagreements between any parties to a peer review include, but are not limited to, the following:

- a. If a reviewed firm disagrees with one or more of its review team's conclusions, either party may consult with the AE. The AE attempts to resolve the disagreement, which may include discussions with the technical reviewer or the performance of oversight procedures. Additional matters may be identified in this process and may result in findings or deficiencies.
- b. After consultation with the AE, if the reviewed firm still disagrees with one or more of the review team's conclusions, the reviewed firm may
 - i. describe the reasons for the disagreement in the matters for further consideration, findings for further consideration, or the letter of response or
 - ii. request that the disagreement be referred to a disagreement panel prior to presentation to the report acceptance body (RAB).
- c. If the reviewed firm requests that the disagreement be referred to a panel of committee members (disagreement panel) for consideration, the AE follows procedures in the "Disagreement Panels" section of this appendix.
- d. Once the disagreement panel has reached a decision, even if the firm or reviewer still disagrees, the issue is considered resolved by

the AE. A decision letter containing the actions required by each party to cooperate with the committee will be sent to the firm and review team.

- e. Any of the disagreeing parties may request an appeal of the decision of a disagreement panel relating to a deficiency or significant deficiency (report-level issues, including corrective actions) by writing the board within 30 days of the decision. (See the section "Appeals of Disagreement Panel Decisions.")

Disagreement Panels

.04 The objective of a disagreement panel is to assist the disagreeing parties in resolving issues. A disagreement panel may be requested by any disagreeing party.

.05 Requests for a disagreement panel

- a. are submitted in writing to the AE via a method providing proof of delivery (including electronic means).
- b. provide details of the basis for the disagreeing parties' positions including, at a minimum,
 - i. the issue or issues to be resolved,
 - ii. reference to applicable professional standards, and
 - iii. a chronology of events with references to supporting documents (including relevant peer review documents).
- c. include any supporting documentation.

.06 Supporting documents may include, but are not limited to,

- a. peer review documents,
- b. team or review captain working papers,
- c. administrative and technical reviewer checklists, and
- d. oversight reports.

.07 The disagreement panel

- a. occurs within 60 days of receipt of the request for the disagreement panel.
- b. consists of at least three committee members who are independent of the disagreeing parties and not involved in the acceptance of the review.
- c. includes members with practice experience commensurate with the area or industry reviewed.
- d. may include independent committee members from another AICPA-approved AE.
- e. is led by one member of the panel serving as the chair.

.08 A notice informing the panel members and disagreeing parties of the date, time, and conference call information is sent at least 30 days in advance of the date of the panel. The notice includes the basis for the panel request and any supporting documentation submitted by the disagreeing parties.

.09 If new information relevant to the disagreement becomes available after the original submission of supporting documentation, such documentation is to be sent to the panel members only if the documentation can be provided for panel consideration at least 14 days prior to the panel date.

.10 In addition to providing written comments to the panel members for consideration, each disagreeing party has the right to participate in the panel. Participation includes the opportunity to make a presentation to the panel, respond

to questions, or both. If either party is unable or chooses not to participate, the panel will consider that party's position based on written correspondence received prior to the panel.

.11 At the discretion of the panel, AICPA staff may participate to provide guidance related to peer review standards.

.12 During the panel, the panel members discuss the disagreement, including the supporting documentation submitted by the disagreeing parties; the basis for the disagreement; and how the panel should resolve the disagreement. The panel may ask any questions and request additional information from the disagreeing parties, the AE, or AICPA staff to assist it in making its decision.

.13 The panel (and, at the discretion of the panel, AICPA staff) then discuss the issue or issues in an executive session without the disagreeing parties present. The panel may

- a. recommend performing oversight on the peer review or engagement, allowing the results of the oversight to assist it in resolving the disagreement.
- b. identify additional matters that may result in findings or deficiencies.
- c. adjourn to a later date, as determined by the panel, to enable it to reach a decision.

.14 The decision of the panel is provided to all parties immediately following the panel's decision. A written communication of the panel's decision is sent to all parties within three business days of the panel's decision.

Appeals of Disagreement Panel Decisions

.15 Any of the disagreeing parties may request an appeal of the decision of a disagreement panel relating to a deficiency or significant deficiency (report-level matters) by writing to the board and explaining why the party believes a review of the panel's decision is warranted. The request includes the disagreement panel decision letter, all documents provided to the disagreement panel, and any additional evidence supporting the appeal.

.16 An AICPA disagreement review panel will review and consider the appeal or request for review and take further action pursuant to fair procedures established by the board.

.17 The objective of the AICPA disagreement review panel is to assess the facts to determine whether the decision relating to a deficiency or significant deficiency (report-level issues, including corrective actions) of the earlier disagreement panel was appropriate and to provide procedural fairness by acting as an appeal mechanism.

.18 Decisions by the AICPA disagreement review panel are final.

.A47

Appendix C — Considerations for the Recall of Peer Review Documents

Overview

.01 AICPA staff are notified and consulted when peer review documents are being considered for recall. (Ref: par. .42a)

.02 After the date of acceptance, neither the administering entity (AE) nor the reviewer have any obligation or expectation to perform any other peer review procedures with respect to the peer review report, acceptance letter, or letter of response, if applicable (referred to hereafter in this section as *peer review documents*), unless information that may affect an accepted peer review comes to either party's attention. Such information may come from various sources such as

- a. the AE,
- b. publicly available information,
- c. reviewers,
- d. AICPA staff, or
- e. other substantiated and reliable sources.

.03 The committee's decision to recall an acceptance letter invalidates the related peer review report and letter of response, if applicable, because it creates a situation in which the reviewed firm's peer review documents are no longer accepted by the AE. The committee may delegate the recall of a peer review acceptance letter to the RAB.

.04 The reviewer's decision to recall the peer review report necessitates recall of the related acceptance letter because such acceptance is not effective without the underlying report.

.05 If peer review documents are recalled, responsibilities of the parties involved include the following:

- a. The AE notifies applicable state boards of accountancy via letter, in jurisdictions where peer review is mandatory and state boards are not prohibited from accessing peer review documents, to inform them that the date of acceptance and period covered by the firm's most recently accepted peer review have changed and to contact the firm for further information. If a replacement review is allowed, the AE sends a similar communication in accordance with paragraph .08 when that review is accepted.
- b. The firm removes the recalled peer review documents from publicly available sources (such as the firm's website) and notifies all parties that might be relying on those documents to discontinue reliance.
- c. The reviewer follows guidance for replacement reviews as addressed in paragraphs .17–.20, if applicable.

Potential Reasons for Recall of Peer Review Documents

.06 AICPA and AE staff may assist the committee in investigating whether the recall of peer review documents is appropriate. Recalling previously accepted peer review documents is considered in situations including, but not limited to, the following:

- a. *Errors or omissions — Material departures directly affecting the peer review report* (See paragraph .08.)
 - i. The firm had an engagement review and failed to inform the AE or reviewer that the firm performed an engagement for the period covered by the peer review that would have required the firm to undergo a system review had the information been known to the AE or reviewer.
 - ii. The firm performed an engagement in a must-select category during the period covered by the peer review, and the reviewer did not consider or select a comparable must-select engagement during the system review.
- b. *Errors or omissions — Other departures that may affect the peer review report* (See paragraphs .09–.11.)
 - i. The firm had an engagement review and failed to inform the AE or reviewer that the firm performed a particular level of service required to be selected in an engagement review, and the reviewer did not consider or select a comparable engagement during the engagement review. For instance, compilations with disclosures were included in the engagement review, but compilations without disclosures performed by the firm were not considered in the engagement review.
 - ii. The firm omitted or misrepresented information relating to its accounting and auditing practice, other than instances covered under item (a).
 - iii. The firm failed to inform the reviewer of communications or summaries of communications from regulatory, monitoring, or enforcement bodies relating to allegations or investigations of deficiencies in the conduct of an accounting, auditing, or attestation engagement performed and reported on by the firm or limitations or restrictions on the firm's ability to practice public accounting related to the firm or its personnel within the three years preceding the firm's current peer review year-end and through the date of the exit conference.
 - iv. The firm provided erroneous information in response to inquiries from the AE, staff, or reviewer in relation to the peer review.
- c. *Reviewer disqualifications* (See paragraphs .12–.16.)
 - i. The reviewer or reviewing firm was not qualified (was ineligible) to perform the peer review or issue the peer review report because certain peer reviewer qualifications were not met at the time of the review, and this was not made known to staff or the AE during the scheduling, performance, or acceptance of the review.
 - ii. The reviewer or reviewing firm failed to inform staff or the AE about limitations or restrictions on the reviewer or reviewing firm's ability to practice public accounting. Considerations for recalling peer review documents are not necessary if there are allegations or investigations of deficiencies in the conduct of an accounting, auditing, or attestation engagement performed and reported on by the reviewer or reviewing firm that are discovered subsequent

to the acceptance of the peer review but that have not resulted in limitations or restrictions on the reviewer's or reviewing firm's ability to practice public accounting.

Voluntary Correction Program

.07 Firms that voluntarily notify the AE of an omission or misrepresentation resulting in a material departure will not be subject to a hearing panel. This notification from the firm must be prior to the AICPA or AE being otherwise notified of or discovering the omission or misrepresentation and prior to the firm receiving notification from another regulatory or monitoring agency. The peer review acceptance letter will be recalled and the firm will be required to undergo a replacement review due approximately 90 days after the firm's notification to the AE.

Material Departures

.08 For errors or omissions directly affecting the peer review report (the type of peer review, period covered, or must-select engagements), the committee is not required to deliberate whether to recall the acceptance letter. In such situations, responsibilities are as follows:

- a. *AE to contact the firm and reviewer.* After the information and evidence are confirmed as factual and reliable, the AE documents the situation in a notification that is sent to the firm by a means that provides proof of delivery (including electronic means) and is copied to the reviewer and AICPA staff. This notification
 - i. includes evidence supporting the error or omission,
 - ii. provides the firm the opportunity to dispute the evidence,
 - iii. indicates that the acceptance letter will be recalled,
 - iv. informs the firm it will be subject to a hearing panel of the board to consider whether to terminate the firm's enrollment in the program, and
 - v. informs the firm that if its enrollment in the program is not terminated, it will be required to undergo a replacement review due approximately 60 days from the date of the hearing panel's decisions and that the panel may also indicate other sanctions or specific criteria for the replacement review.
- vi. is followed by recall of the peer review documents when
 - (1) the firm acknowledges the notification and does not dispute the evidence, or
 - (2) the AE has proof of delivery of the notification (including via electronic means) and the firm has not disputed the evidence or acknowledged the notification timely.
- b. *Reviewer to consider recall.* The reviewer considers the aforementioned notification from the AE and responds in writing (this may include electronic means) with the reviewer's decision about whether to recall the peer review report. When a reviewer considers recall of peer review documents,
 - i. unless the reviewer recalls the peer review report, the reviewer will not be allowed to revise the peer review report or perform the firm's replacement review.
 - ii. if the notification regarding the material departure occurs within 120 days of the peer review completion date, the

reviewer continues to retain the working papers for the recalled review until completion of the revised or replacement review. The hearing panel may allow the reviewer to perform additional procedures and issue a revised report.

Other Departures That May Affect the Peer Review Report

.09 For errors or omissions that may affect the peer review report (the type of peer review, period covered, or must-select categories), the reviewer and committee independently consider the potential impact of the information on the results of the peer review. The peer review documents are recalled if the nature and effect of the matter are such that the reviewer or committee believes

- a. the peer review procedures, report, or both would have been affected if the information had been known to the reviewer as of the date of the report and
- b. persons who may attach importance to the omission or error are currently relying, or are likely to rely, on the peer review report.

.10 The following are examples of situations in which recall of the peer review documents is not necessary:

- a. The new information relates to one specific partner, the working papers are within the retention period, and a similar engagement from that partner was included within the peer review.
- b. In an engagement review, the reviewer becomes aware that the firm performed a review engagement that was not included in the firm's population of engagements and was therefore not subject to selection. The reviewer reviews the engagement and concludes that the inclusion of such engagement within the scope of the review would not have changed the peer review report.

.11 The reviewer communicates the decision of whether to recall the peer review report in writing (this may include electronic means) to the committee. If the committee has substantial reason to question the reviewer's decision not to recall the report, the committee consults AICPA staff and may undertake further measures.

Reviewer Disqualification

.12 When it comes to the attention of AICPA staff that a reviewer does not meet the qualifications to perform peer reviews, staff will notify the reviewer and applicable AEs. Staff will perform an analysis to determine if there are reviews that have been accepted that may have been performed when the reviewer was not qualified and notify affected AEs.

.13 The reviewer and committee independently consider the potential impact on the results of reviews performed when the reviewer was ineligible. The peer review documents are recalled if the reviewer disqualification would have caused a significant change in the planning, performance, evaluation of results, or peer review documents.

.14 The reviewer considers whether to voluntarily recall peer review reports issued when the reviewer was not qualified and inform the AE of the decision prior to informing the affected firms. The reviewer summarizes the basis for whether to recall each report and provides the summary to the AE promptly, but no later than 30 days from being notified of the issue.

.15 The committee (or the AE on behalf of the committee) contacts AICPA staff to discuss the impact the missing qualifications may have on reviews performed by the reviewer. This may result in

- a. additional procedures by an individual acceptable to the committee, possibly at the disqualified reviewer's expense;
- b. partial or full additional procedures regarding working papers, covering all related documents underlying the peer review or limited to certain aspects affected by the disqualified reviewer; or
- c. other procedures to determine the impact of the missing qualifications.

.16 Any additional procedures performed due to the missing qualifications

- a. occur within 30 days following the reviewer's decision not to recall the report and
- b. are fully reported on to the committee.

Replacement Review Considerations

.17 For a replacement review related to a material departure, the reviewer

- a. evaluates the systemic cause of the error or omission;
- b. prepares a matter for further consideration (MFC), at minimum; and
- c. ensures the replacement peer review report does not reference a previously issued and recalled report.

.18 If the peer review completion date was within 120 days of notification of the material departure and the original reviewer is allowed to perform additional procedures and issue a revised report, the reviewer submits any additional documentation and any documentation that significantly changed as a result of the additional procedures, including, at a minimum, the following:

- a. A revised Summary Review Memorandum or other memo addressing the omission or error in detail and fully explaining the impact and conclusion on significant peer review aspects, including changes in risk assessment, engagement selection, procedures, evaluation and elevation of matters, recommendations, or report rating
- b. A signed representation letter from the firm, specifically addressing the circumstances regarding information previously omitted or provided in error
- c. A revised report that is dated the date the reviewer obtained enough evidence to conclude on the results of the review with consideration of the newly discovered information and communicated those results to the firm (new exit conference date)

.19 If the peer review completion date is more than 120 days beyond the notification of the material departure, or the hearing panel requires a new review to be performed, the hearing panel may specify the period the replacement review covers. If the panel does not specify a period, the firm and approved reviewer

- a. consider whether it is appropriate for the replacement review to cover the same period or a subsequent period to include the previously omitted engagements, taking into consideration such factors as
 - i. the significance of and risks related to the omitted information or engagements or subsequently completed engagements,
 - ii. time elapsed,
 - iii. regulatory requirements, and
 - iv. the established due date of the firm's replacement review.

- b. may consult with the AE to determine an appropriate period for the replacement review to cover.

.20 The following examples can assist when determining the period to be covered by the replacement review:

Example 1: *Firm no longer performs similar engagements (Discovery within 12 months of review year-end; replacement review of same period)*

A firm failed to inform the AE or reviewer that it performed a particular level of service requiring a system review (engagement year-end June 30, 20X1) for the period under review (January 1, 20X1, to December 31, 20X1), and the firm no longer performs that level of service after the period covered by the recalled review. If 12 months or less have elapsed between the period covered by the recalled review and the notification of the material departure (notification made prior to December 31, 20X2), another peer review of the original period (January 1, 20X1, to December 31, 20X1) that includes the level of service that caused the replacement review would be appropriate. If reviewing a subsequent 12-month period would not include the level of service or engagements in question, then a replacement review of a subsequent period may not be appropriate.

Example 2: *Firm no longer performs similar engagements (Discovery more than 12 months after recalled review year-end; replacement review of subsequent period)*

A firm failed to inform the AE or reviewer that it performed must-select engagements (engagement year-end June 30, 20X1) for the period under review (January 1, 20X1, to December 31, 20X1), and the firm no longer performs engagements in the same must-select category after the period covered by the recalled review. If more than 12 months have elapsed between the period covered by the recalled review and the notification of the material departure (discovery communicated after December 31, 20X2), a replacement review of a subsequent period that includes the previously omitted engagements within scope would be appropriate. The greater the number of prior-year engagements considered, the greater the risk that the results of the review are not reflective of the peer review year covered by the report and the related peer review results. If several engagements were previously omitted, this may prompt re-performance of the peer review of the original period.

Example 3: *Firm continues to perform similar engagements*

A firm failed to inform the AE or reviewer that a particular level of service requiring a system review was performed or neglected to disclose that it performed a must-select engagement (engagement year-end June 30, 20X1) for the period under review (January 1, 20X1, to December 31, 20X1), and the firm has or will continue to perform similar engagements. The replacement review should include the most recently completed engagement similar to those previously omitted. The period covered should consider the time elapsed between the period covered by the previous peer review and the notification of the material departure.

In all the preceding examples, the firm's next peer review will have a due date of three years and six months from the year-end of the replacement review.

PR-C Section 410

The Report Acceptance Process

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains requirements and application material for the administering entity (AE), peer review committee (committee), report acceptance body (RAB), and technical reviewers regarding the evaluation and acceptance of all reviews. For purposes of this section, it is assumed that the committee has delegated the report acceptance function to the RAB, whose members may be, but are not required to be, members of the committee. The requirements and guidance in this section supplement the requirements and guidance in section 100, *Concepts Common to All Peer Reviews*, and section 400, *General Principles and Administration Responsibilities*. Additionally, individuals involved in the administration of the program should be familiar with reviewer and firm requirements in the following PR-C sections:

- a. Section 210, *General Principles and Responsibilities for Reviewers — System Reviews*
- b. Section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*
- c. Section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*
- d. Section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*

Effective Date

.02 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objective

.03 The objective of the report acceptance process is to outline the committee's responsibility to ensure that it considers the results of peer reviews it administers that are undertaken to meet the requirements of the program.

Definitions

.04 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Technical Reviewer's Evaluation of System Reviews

.05 The evaluation of a system review should include consideration of the following (as applicable):

- a. Peer review report and letter of response
- b. Firm representation letter
- c. Summary Review Memorandum
- d. Scope and results of engagements selected for review
- e. Matters for further consideration (MFCs)
- f. Findings for further consideration (FFCs)
- g. Disposition of Matters for Further Consideration (DMFC)
- h. Oversight report
- i. The engagement profile and the supplemental peer review checklist for single audits, which includes the explanation of "no" answers and other comments (Ref: par. .A1)
- j. Explanation of "no" answers for quality control checklists
- k. The firm's prior
 - i. peer review report and letter of response,
 - ii. FFCs,
 - iii. firm representation letter, and
 - iv. letters detailing required corrective actions or implementation plans
- l. Any other information that may affect the evaluation or results of the review
- m. In addition to consideration of (a)–(l), for reviews administered by the National Peer Review Committee,
 - i. engagement checklists,
 - ii. quality control checklists, and
 - iii. staff or focus group interviews

.06 The evaluation of whether system review documentation provides satisfactory evidence of compliance with the standards and supports the conclusions reached should include considering the following (as applicable):

- a. If an appropriate risk analysis was documented
- b. If the reviewer used a systemic approach
- c. If the peer review documents support any FFCs, deficiencies, significant deficiencies, and the report rating
- d. If the firm's responses on FFCs or the letter of response are in accordance with standards
- e. If the firm's actions, planned or taken, to remediate nonconforming engagements appear appropriate and in accordance with professional standards
- f. If the DMFC addresses all MFCs and appears appropriate
- g. If past reviewer performance feedback has an impact on the current review

- h.* If the review meets consent agenda criteria as defined in paragraph .11 of section 100, if applicable

.07 For system reviews that require RAB evaluation, the technical reviewer should provide the RAB with the necessary information to properly evaluate the review. (Ref: par. .A2)

Technical Reviewer's Evaluation of Engagement Reviews

.08 The evaluation of an engagement review should include consideration of the following (as applicable):

- a.* Peer review report and letter of response
- b.* Firm representation letter
- c.* Review Captain Summary
- d.* Scope and results of engagements selected for review
- e.* MFCs
- f.* FFCs
- g.* DMFC
- h.* Oversight report
- i.* The firm's prior
 - i.* peer review report and letter of response,
 - ii.* FFCs,
 - iii.* firm representation letter, and
 - iv.* letters detailing required corrective actions or implementation plans
- j.* For reviews with a committee-appointed review team, all peer review working papers
- k.* Any other information that may affect the evaluation or results of the review

.09 The evaluation of whether engagement review documentation provides satisfactory evidence of compliance with the standards and supports the conclusions reached should include considering the following (as applicable):

- a.* If the engagements selected for review conform to standards
- b.* If the report, FFCs, and letter of response are in accordance with standards
- c.* If the firm's actions, planned or taken, to remediate nonconforming engagements appear appropriate and in accordance with professional standards
- d.* If the DMFC addresses all MFCs and appears appropriate
- e.* If past reviewer performance feedback has an impact on the current review
- f.* If the review should be presented to the RAB or accepted by the technical reviewer on behalf of the RAB (see paragraph .11)
- g.* If the review meets consent agenda criteria as defined in paragraph .11 of section 100, if applicable

.10 For engagement reviews that require RAB evaluation, the technical reviewer should provide the RAB with necessary information to properly evaluate the review. (Ref: par. .A3)

RAB Peer Review Evaluation

.11 The AE should provide meeting materials to RAB members at least seven days in advance of the date of the RAB meeting in order to allow every RAB member adequate time to read the documents and be prepared to discuss the reviews being considered for acceptance. At a minimum, the following documents, if applicable, should be included to assist the RAB in its evaluation: (Ref: par. .A4–.A5)

- a. Peer review report and letter of response
- b. Firm representation letter
- c. Summary Review Memorandum or Review Captain Summary (for system or engagement reviews, respectively)
- d. Scope and results of engagements selected for review
- e. MFCs
- f. FFCs
- g. DMFC
- h. Oversight report
- i. The technical reviewer's summary and recommendations (which may be documented in the technical reviewer's checklist)
- j. The firm's prior
 - i. peer review report and letter of response,
 - ii. FFCs,
 - iii. firm representation letter, and
 - iv. letters detailing required corrective actions or implementation plans

.12 The RAB's evaluation of each peer review presented for acceptance, including those on the consent agenda, includes consideration of the technical reviewer's recommendations and the following: (Ref: par. .A6–.A7)

- a. Whether the review was performed and reported in accordance with the standards (See section 210 or section 220 for specific requirements.)
- b. Whether the reviewed firm's plan to remediate nonconforming engagements is in accordance with professional standards and, for system reviews, consideration of other weaknesses in the firm's system of quality control if the firm's remediation plan is not in accordance with professional standards
- c. Whether matters have been appropriately evaluated in accordance with the standards
- d. Whether FFCs, the report, the firm's representation letter, and the firm's letter of response, if applicable, are in accordance with the standards
- e. Whether corrective actions related to deficiencies or significant deficiencies in the report should be required (See paragraphs .07–.08 of section 420, *Corrective Actions and Implementation Plans*.)
- f. Whether an implementation plan related to findings on FFCs should be required (See paragraphs .07–.08 of section 420.)
- g. Whether reviewer performance feedback should be issued (See paragraphs .01–.17 of section 430, *Reviewer Monitoring and Performance*.)

Criteria for Delayed or Deferred Acceptance

.13 The RAB should use professional judgment in determining whether it is appropriate to accept or delay or defer acceptance of a peer review.

Delayed Acceptance

.14 The RAB should delay acceptance of a peer review for minor revisions in the following situations (this list is not all-inclusive): (Ref: par. .A8–.A10)

- a. When peer review reports and letters of response
 - i. do not indicate that a deficiency or significant deficiency is repeated from the prior peer review,
 - ii. have misleading grammar or excessively ambiguous language,
 - iii. include misquoted professional literature,
 - iv. reference professional standards unrelated to the subject matter, or
 - v. for system reviews, do not identify the industry and level of service for any deficiencies or significant deficiencies that are industry specific or related to a nonconforming must-select engagement
- b. When FFCs
 - i. have incorrect or missing references to the applicable professional standards;
 - ii. do not identify the MFC that led to the finding;
 - iii. incorrectly identify the type of matter;
 - iv. do not correctly identify whether the finding is a repeat;
 - v. do not describe the scenario that led to the finding;
 - vi. do not provide reference to the specific industry or engagement related to a nonconforming engagement, if applicable;
 - vii. do not have a clear description of the finding from the reviewer;
 - viii. are not signed by an authorized representative of the firm; or
 - ix. for system reviews, have incorrect or missing references to the applicable requirements of the Statements on Quality Control Standards
- c. When MFCs
 - i. are not completed properly or fully or
 - ii. contain firm or client references

Deferred Acceptance

.15 The RAB should defer acceptance of a review if there are unresolved questions significant enough that no decision can be made until further information is received and for significant revisions in the following situations (this list is not all-inclusive): (Ref: par. .A11–.A13)

- a. When peer review reports or letters of response
 - i. have significant departures from the standard report formats;

- ii. have an incorrect report rating or omitted deficiencies or significant deficiencies;
 - iii. have deficiencies or significant deficiencies that appear to set standards higher than those mandated by professional standards;
 - iv. for system reviews, have deficiencies or significant deficiencies that are not written systemically, or the systemic causes are not clear;
 - v. do not have responses that appropriately address deficiencies or significant deficiencies identified in the peer review report; or
 - vi. have responses that do not appropriately address nonconforming engagements, including responses that are unacceptably noncommittal, vague, or otherwise unclear or not responsive
- b. When FFCs
 - i. do not have a clear description of the finding from the reviewer and, on system reviews, do not include the systemic cause of the finding or
 - ii. include a response from the reviewed firm that does not appear comprehensive, genuine, and feasible
- c. When any other peer review documents need revision for the RAB to conclude whether the review was performed and reported on in accordance with the standards

Application and Other Explanatory Material

Technical Reviewer's Evaluation of System Reviews (Ref: par. .05–.07)

.A1 The RAB may delegate the review of the engagement profile and the supplemental peer review checklist for single audits to the technical reviewer if the technical reviewer has completed CPE as required by paragraph .45e of section 400. The technical reviewer may request that a member of the RAB perform the technical review of such documents when the technical reviewer has not obtained the required CPE.

.A2 The technical reviewer may provide information about the following, as applicable, to the RAB to assist it in evaluating a system review (this list is not all-inclusive):

- a. Administrative compliance issues such as
 - i. year-end changes,
 - ii. due date extensions,
 - iii. significant delays in presentation,
 - iv. team member qualifications and approvals,
 - v. reviewed firm or reviewer referral database entries, and
 - vi. significant reviewer performance issues
- b. The overall effect of matters, findings, deficiencies, or significant deficiencies on the review results

- c. The reviewer's assessment of peer review risk (including inherent, control, and detection risk) to provide a basis for engagement selections and the extent and location of procedures performed
- d. Whether the reviewer identified all matters and appropriately elevated them to findings, deficiencies, or significant deficiencies
- e. Whether the reviewer identified the appropriate systemic causes for any findings, deficiencies, or significant deficiencies
- f. The effect of nonconforming engagements on the review, including
 - i. potential reporting implications,
 - ii. the reviewer's consideration of expansion of scope,
 - iii. the firm's planned or taken remediation, and
 - iv. whether the reviewer adequately considered implications of an unresponsive firm
- g. Recommendations regarding
 - i. acceptance of the review (see paragraphs .13–.15, which address reasons for delayed or deferred acceptance),
 - ii. corrective actions and implementation plans (see paragraphs .07–.08 of section 420),
 - iii. captain or review team feedback (see paragraphs .01–.17 of section 430),
 - iv. any oversight procedures,
 - v. expansion of scope, and
 - vi. any other issues the technical reviewer believes warrant RAB evaluation
- h. Firms whose current review and two most recently accepted reviews resulted in non-pass reports (*pass with deficiencies* or *fail*) that may be referred to a hearing panel for failing to comply with the requirements of the program (see paragraphs .35–.39 of section 400)
- i. Whether there are any unresolved issues or disagreements that could affect the peer review results
- j. Significant issues identified in electronic data, such as
 - i. the firm's scheduling information and
 - ii. specific risks identified in the firm's practice such as a new must-select industry

Technical Reviewer's Evaluation of Engagement Reviews (Ref: par. .08–.10)

.A3 The technical reviewer may provide information about the following, as applicable, to the RAB to assist it in evaluating an engagement review (this list is not all-inclusive):

- a. Administrative compliance issues such as
 - i. year-end changes,
 - ii. due date extensions,
 - iii. significant delays in presentation,
 - iv. team member qualifications and approvals,
 - v. reviewed firm or reviewer referral database entries, and
 - vi. significant reviewer performance issues

- b. The overall effect of matters, findings, and deficiencies on the review results
- c. The scope of engagements selected for review
- d. Whether the reviewer identified all matters and appropriately elevated them to findings or deficiencies
- e. Nonconforming engagements and the firm's planned or taken remediation
- f. Recommendations regarding
 - i. acceptance of the review (see paragraphs .15–.23, which address reasons for delayed or deferred acceptance),
 - ii. corrective actions and implementation plans (see paragraphs .07–.08 of section 420),
 - iii. captain or review team feedback (see paragraphs .01–.25 of section 430),
 - iv. any oversight procedures, and
 - v. any other issues the technical reviewer believes warrant RAB evaluation
- g. Firms whose current review and two most recently accepted reviews resulted in non-pass reports (*pass with deficiencies* or *fail*) that may be referred to a hearing panel for failing to comply with the requirements of the program (see appendix A, "Failure to Cooperate or Comply With the Requirements of the Program Referral Responsibilities," of section 400)
- h. Whether there are any unresolved issues or disagreements that could affect the peer review results

RAB Peer Review Evaluation (Ref: par. .11–.12)

.A4 The meeting may be conducted in person or via conference call.

.A5 To further assist with its evaluation, the RAB may request that the engagement profile and the supplemental checklist for single audits, including the explanation of "no" answers and other comments, be included with the materials required by paragraph .11.

.A6 The RAB is authorized to make inquiries or request additional actions it considers necessary in the circumstances to properly evaluate the review. Such inquiries or actions include, but are not limited to, requesting

- a. an expansion of scope,
- b. corrections or clarifications to peer review documents,
- c. all peer review documentation from the team or review captain not previously provided, and
- d. oversight of engagements or peer review documents.

.A7 The RAB may refer difficult or problem reviews to the committee for acceptance or concurrence, or both.

Criteria for Delayed or Deferred Acceptance

Delayed Acceptance (Ref: par. .14)

.A8 The responsibility to approve revised peer review documents may be delegated to the technical reviewer or an individual member of the RAB.

.A9 Requesting revisions to the peer review report is not necessary in the following circumstances:

- a. System review report deficiencies or significant deficiencies contain a reference to the specific number of engagements where the matters were noted rather than using general terms such as *few* or *some*.
- b. Multiple deficiencies or significant deficiencies could have been combined.
- c. There are deficiencies or significant deficiencies where the reviewed firm understands the substance and responds appropriately but the deficiency or significant deficiency is not written clearly.

.A10 If the RAB delays acceptance of a review, a letter is sent to the captain and firm to request that the applicable parties revise the identified documents before the peer review can be accepted. The letter also advises the firm that once the RAB is satisfied, the RAB will submit an acceptance letter that may outline certain additional corrective actions, which the firm will be required to acknowledge prior to the review being accepted.

Deferred Acceptance (Ref: par. .15)

.A11 The RAB may also defer acceptance of a review to perform additional procedures to overcome significant concerns regarding the review or reviewer or to request revisions to other documents such as, but not limited to, the following:

- a. Summary Review Memorandum
- b. MFCs
- c. Engagement checklists
- d. Quality control checklists

.A12 When acceptance of a review is deferred, the RAB may also recommend that the report date be revised in circumstances including, but not limited to, the following:

- a. The report rating changed.
- b. FFCs were added.
- c. Substantive additional work was performed.

.A13 If the RAB defers acceptance of a review, a letter is sent to the firm and reviewer informing the parties that the RAB has deferred acceptance of the review because of unresolved issues related to the report and that, once the issues have been resolved, the review will be sent back to a RAB for further consideration.

PR-C Section 420

Corrective Actions and Implementation Plans

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains requirements and application material for technical reviewers and report acceptance bodies (RABs) when evaluating the types of corrective actions and implementation plans to recommend and require firms to complete and when evaluating the results of those actions. The requirements and guidance in this section supplement the requirements and guidance in section 100, *Concepts Common to All Peer Reviews*, and section 400, *General Principles and Administration Responsibilities*. Additionally, individuals involved in the administration of the program should be familiar with reviewer and firm requirements in the following PR-C sections:

- a. Section 210, *General Principles and Responsibilities for Reviewers — System Reviews*
- b. Section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*
- c. Section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*
- d. Section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*

Effective Date

.02 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objectives

.03 The objectives of corrective actions and implementation plans are to

- a. offer education and remediation guidance to firms,
- b. provide a mechanism for RABs to monitor firms' remedial actions in response to deficiencies and findings, and
- c. assist in meeting the program's objective of serving the public interest.

Definitions

.04 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Approving Due Date Extension Requests for Corrective Actions or Implementation Plans by Technical Reviewers or the CPA on Staff

.05 Technical reviewers and the CPA on staff should accept due date changes for corrective actions or implementation plans only if (Ref: par. .A1–.A2)

- a. such authority has been granted by the committee,
- b. the firm requested the due date change before the due date, and
- c. the new due date is three months or less from the original due date.

Approving Outside Parties to Perform Corrective Actions or Implementation Plans

.06 The RAB (or its designee) should evaluate whether outside parties should be approved to perform corrective actions and implementation plans based on considerations such as, but not limited to, the following: (Ref: par. .A3)

- a. The significance of the issues identified in the peer review resulting in corrective actions or implementation plans
- b. The nature of the corrective actions and implementation plans
- c. Whether the outside party's firm's most recently accepted peer review report was a pass report
- d. The extent of the outside party's experience
- e. If the outside party is a qualified reviewer, whether the outside party has relevant experience or any performance issues specific to the corrective actions or implementation plan

Determining When and What Type of Corrective Actions or Implementation Plans to Require

.07 The decision to require corrective actions or implementation plans should include

- a. considering the nature and significance of the findings, deficiencies, or significant deficiencies;
- b. evaluating whether the firm's actions taken or planned to remediate nonconforming engagements, if applicable, appear comprehensive, genuine, and feasible; and
- c. considering any actions the reviewed firm has already taken that were reviewed by the reviewer prior to RAB evaluation.

.08 If a finding, deficiency, or significant deficiency relates to an area where prevalent nonconformity has been identified through the AICPA Enhancing Audit Quality Initiative, then specific CPE to address the common areas of noncompliance should be required by the RAB. Either an AICPA course or an alternative course with substantially the same content as the AICPA course should be required by the RAB. (Ref: par. .A4)

.09 In situations in which the RAB concludes a firm should be required to complete corrective actions because of deficiencies or significant deficiencies,

determining the nature of corrective actions should include the following: (Ref: par. .A5)

- a. Considering the potential corrective actions in exhibit B, "Suggested Corrective Actions: Engagement Reviews," and exhibit D, "Suggested Corrective Actions: System Reviews," based on the applicable facts and circumstances
- b. For repeat findings, deficiencies, or significant deficiencies, evaluating whether the firm made a genuine effort to correct the prior issue and considering whether a more rigorous or targeted requirement is appropriate (Ref: par. .A6)
- c. For system reviews,
 - i. considering the systemic causes, pattern, pervasiveness, and relative importance to the system of quality control and whether the firm's actions taken or planned to remediate the firm's system of quality control appear comprehensive, genuine, and feasible; and
 - ii. considering prescribing actions that give the firm an opportunity to demonstrate the effectiveness of changes implemented or improvements made (Ref: par. .A7)
- d. For engagement reviews, considering whether the reviewed firm has a sufficient understanding of relevant accounting or reporting matters (or both)

.10 In situations in which the RAB concludes a firm should be required to complete an implementation plan because of findings, determining the nature of the implementation plan should include the following:

- a. Assigning only the allowable implementation plans in exhibit A, "Allowable Implementation Plans: Engagement Reviews," or exhibit C, "Allowable Implementation Plans: System Reviews," based on the applicable facts and circumstances
- b. For repeat findings, evaluating whether the firm made a genuine effort to correct the prior issue and considering whether a more rigorous or targeted implementation plan is appropriate (Ref: par. .A6)
- c. For system reviews, considering the systemic causes, pattern, pervasiveness, and relative importance of findings to the system of quality control and whether the firm's actions taken or planned to remediate the firm's system of quality control appear comprehensive, genuine, and feasible
- d. For engagement reviews, considering whether the reviewed firm has a sufficient understanding of relevant accounting or reporting matters (or both)

.11 If the RAB believes more extensive actions, beyond the allowable implementation plans in exhibits C and D, are necessary (such as submitting documents to an outside party), the RAB needs to consider whether the findings should have been elevated to deficiencies in the report.

Evaluating the Results of Corrective Actions and Implementation Plans

.12 The RAB's (and technical reviewer's) evaluation of the results of corrective actions and implementation plans should include considering the following: (Ref: par. .A8)

- a. Whether such actions have been completed as required
- b. Whether the results indicate additional remediation is in the firm's or the public's best interest
- c. If the actions have not been completed as required, whether this is a failure to cooperate that warrants referral to a board hearing panel for potential termination from the program

.13 The RAB's (and technical reviewer's) evaluation of whether the firm should be required to complete additional actions includes the following: (Ref: par. .A9)

- a. The amount of improvements made by the firm
- b. Whether the firm can continue to make improvements on its own
- c. The reason that improvement was not made as expected
- d. The significance of current issues
- e. The nature and size of the firm's practice, including the number of engagements and personnel and the engagements performed
- f. Whether actions were appropriate to remediate findings, deficiencies, or significant deficiencies
- g. Whether the firm had sufficient time to remediate findings, deficiencies, or significant deficiencies

Accepting Certain Corrective Actions and Implementation Plans by the CPA on Staff or Technical Reviewer

.14 The CPA on staff or technical reviewers should accept corrective actions or implementation plans on the committee's behalf only if such authority has been granted and there are clearly identifiable actions or procedures requested of the firm. (Ref: par. .A10)

When Corrective Actions or Implementation Plans Are Replaced, Waived, or Extended

.15 For requests to waive corrective actions or implementation plans, the RAB should first consider replacement options. Corrective actions or implementation plans should not be waived solely because the firm cannot meet the due date or has an upcoming review. (Ref: par. .A11–.A13)

Application and Other Explanatory Material

Approving Due Date Extension Requests for Corrective Actions or Implementation Plans by Technical Reviewers or the CPA on Staff (Ref: par. .05)

.A1 The committee, based on the nature of corrective actions or implementation plans and the background and experience of technical reviewers and the CPA on staff, may authorize those individuals to approve due date changes of corrective actions or implementation plans.

.A2 Technical reviewers and the CPA on staff may submit requests meeting the criteria in paragraph .05 to the RAB for approval based on professional skepticism, taking into consideration experience from the technical review process and the firm's history.

Approving Outside Parties to Perform Corrective Actions or Implementation Plans (Ref: par. .06)

.A3 The committee, based on the nature of corrective actions or implementation plans and the background and experience of technical reviewers and the CPA on staff, may authorize those individuals to approve outside parties to perform corrective actions and implementation plans.

Determining When and What Type of Corrective Actions or Implementation Plans to Require (Ref: par. .07–.11)

.A4 The AICPA courses located on the Peer Review page of the AICPA website provide the content intended to meet this requirement.

.A5 The potential corrective actions in exhibits B and D may be tailored to address deficiencies or significant deficiencies.

.A6 For repeat findings, deficiencies, and significant deficiencies, the RAB may determine that more than 8 hours of CPE is necessary and may require 24 hours, change the nature of the required courses, or require the firm to complete CPE and hire an outside party to review its internal monitoring or inspection report.

.A7 Requiring a firm to take CPE is a common required corrective action; however, the submission of CPE certificates alone does not necessarily give a firm an opportunity to demonstrate the effectiveness of changes implemented or improvements that may reduce the risk the firm will have repeat deficiencies or significant deficiencies. Additionally, for firms with a second consecutive non-pass report (but not a third), the RAB evaluates whether to refer the firm for potential termination based on the results of corrective actions. In such a situation, it may be appropriate to require the firm to take specified types and amounts of CPE and subsequently engage a third party to perform a pre-issuance or post-issuance review of a specific engagement to demonstrate improvement.

Evaluating the Results of Corrective Actions and Implementation Plans (Ref: par. .12–.13)

.A8 The RAB and administering entity (AE) may recommend to a firm that it request a change in the year-end of its subsequent peer review in situations including, but not limited to, the following:

- a. Significant portions of the firm's practice that would be subject to the firm's subsequent peer review without a year-end change were reviewed by an outside party as part of corrective actions or implementation plans.
- b. The review being evaluated is significantly overdue and there is concern that the firm would not have sufficient time to remediate issues on engagements issued that would be subject to the firm's subsequent peer review without a year-end change.
- c. Due to the nature of the firm's practice, a significant portion of the firm's engagements are not completed and available for review based on the firm's current peer review year-end.

.A9 The results from completed actions may provide more current information to the RAB regarding additional actions that may be more effective in correcting the issues identified in the firm's review.

Accepting Certain Corrective Actions and Implementation Plans by the CPA on Staff or Technical Reviewer (Ref: par. .14)

.A10 Identifiable actions or procedures that may be accepted by the CPA on staff or technical reviewers include, but are not limited to, the following:

- a. Submit proof of CPE taken.
- b. Submit proof of purchase of third-party-provided materials.
- c. Submit proof of licensure.
- d. Submit proof of a specific correction to a nonconforming engagement.
- e. Submit a report by an outside party approved by the RAB on the results of actions specified by the RAB where the outside party reports the firm's actions were favorable and additional corrective actions or implementation plans are not considered necessary.

When Corrective Actions or Implementation Plans Are Replaced, Waived, or Extended (Ref: par. .15)

.A11 The RAB may request corrective actions or implementation plans that are industry or engagement-type specific but address a firm's noncompliance with its system of quality control policies and procedures. If the firm represents it will no longer perform engagements in a specific industry, the RAB may replace the original request with a new corrective action or implementation plan. For example, if the RAB required a firm to have a pre-issuance review of a for-profit entity subject to the U.S. Department of Housing and Urban Development's uniform financial reporting standards but the firm will no longer perform such engagements, the RAB may require the firm to obtain a pre-issuance review of a single audit.

.A12 The RAB may permit a reviewed firm to undergo an accelerated peer review in lieu of completing corrective actions or implementation plans if the following apply:

- a. The firm has had sufficient opportunity to implement remedial actions prior to the anticipated commencement date of the accelerated review.
- b. The reviewed firm elects, in writing, to have an accelerated review.
- c. The corrective action or implementation plan is
 - i. an outside party's post-issuance review of certain types or portions of engagements,
 - ii. an outside party's review of the firm's remedial actions outlined in its letter of response or the appropriateness of alternative actions, or
 - iii. an outside party's review of the firm's internal inspection or monitoring report.

.A13 Situations in which it may be appropriate to waive corrective actions or implementation plans include, but are not limited to, the following:

- a. The firm represents it is no longer performing the engagements that were the source of the findings or deficiencies, and the systemic cause did not extend to other aspects of the firm's practice.
- b. The firm has given up its auditing and accounting practice and represents it has no plans to perform audit or accounting engagements in the future.

- c.* A partner leaves the firm, and that partner was the sole source of the engagement or systemic findings or deficiencies.
- d.* The firm has been sold and is no longer practicing and is not licensed to practice. This does not include mergers or situations in which a firm is no longer in existence and the partners have taken their respective clients to another firm.

.A14

Exhibit A — Allowable Implementation Plans:
Engagement Reviews

<i>Finding</i>	<i>Allowable Implementation Plan</i>
Engagements indicate the following: • Repeat findings	• Require members of the firm to take specified types and amounts of CPE.
• Failure to possess applicable firm licenses	• Require the firm to submit proof of its valid firm licenses.

.A15

Exhibit B — Suggested Corrective Actions: Engagement Reviews

<i>Deficiency</i>	<i>Suggested Actions to Be Performed as Soon as Reasonably Possible</i>
Deficiency	• Require members of the firm to take specified types and amounts of CPE. • Require the firm to hire an outside party approved by the report acceptance body (RAB) to perform a pre-issuance or post-issuance review of certain types or portions of engagements. • Require the firm to hire an outside party approved by the RAB to review the firm's remediation of nonconforming engagements. • Require the firm to engage an outside party approved by the RAB to review the firm's completion of its intended remedial actions as outlined in its letter of response or to evaluate the appropriateness of alternative actions. Though not required, this is commonly performed by the review captain. • Require the relevant members of the firm to submit proof of their valid individual licenses.

.A16

Exhibit C — Allowable Implementation Plans:
System Reviews

<i>Finding</i>	<i>Allowable Implementation Plan</i>
Nonconforming engagements and - initial findings on a must-select industry or - repeat findings for any industry	- Require members of the firm to take specified types and amounts of CPE. - Require the firm to hire an outside party approved by the report acceptance body (RAB) to perform a pre-issuance or post-issuance review of certain types or portions of engagements. - Require the firm to hire an outside party approved by the RAB to review the firm's remediation of nonconforming engagements. - Require the firm to hire an outside party approved by the RAB to review the firm's completion of its intended remedial actions outlined in its response on the finding for further consideration (FFC) form or to evaluate the appropriateness of alternative actions. - Require the firm to hire an outside party approved by the RAB to review the firm's internal monitoring or inspection report.
Engagements indicate repeat findings	- Require members of the firm to take specified types and amounts of CPE. - Require the firm to hire an outside party approved by the RAB to review the firm's internal monitoring or inspection report.
Failure to possess applicable firm licenses	Require the firm to submit proof of its valid firm licenses.

.A17

Exhibit D — Suggested Corrective Actions: System Reviews

<i>Deficiency or Significant Deficiency</i>	<i>Suggested Actions to Be Performed as Soon as Reasonably Possible</i>
Deficiency or significant deficiency related to engagement performance	• Require members of the firm to take specified types and amounts of CPE. • Allow firm members responsible for the applicable nonconforming engagements to pass the related AICPA advanced certificate exam, if applicable, in lieu of CPE. This option is applicable only for firms that have nonconforming engagements in certain industries that were identified in the peer review and for which a related AICPA advanced certificate exists. • Require the firm to hire an outside party approved by the report acceptance body (RAB) to perform a pre-issuance or post-issuance review of certain types or portions of engagements. • Require the firm to hire an outside party approved by the RAB to review the firm's remediation of nonconforming engagements. • Require the firm to hire an outside party approved by the RAB to review the firm's completion of its intended remedial actions as outlined in its letter of response or to evaluate the appropriateness of alternative actions. Though not required, this is commonly performed by the team captain of the peer review. • Require the firm to join an AICPA audit quality center applicable to the nonconforming engagements.
Deficiency or significant deficiency related to design of or noncompliance with another element of the quality control system	• Require the firm to hire an outside party approved by the RAB to review the firm's internal monitoring or inspection report. • Require the firm to hire an outside party approved by the RAB to perform a pre-issuance review of certain types or portions of engagements. • Require the relevant members of the firm to submit proof of their valid individual licenses.

.A18

Appendix A — Guidance for Outside Parties Engaged to Assist Firms in Completing Corrective Actions and Implementation Plans

This appendix contains guidance for outside parties engaged to assist firms in completing corrective actions or implementation plans required as a condition of acceptance of the firm's peer review.

Objectives

.01 The objectives of the outside party assisting a firm in the completion of corrective actions or implementation plans are to

- a. objectively determine whether the firm took one or more actions the firm represented it would perform in its letter of response or response to findings for further consideration (FFCs),
- b. evaluate the reviewed firm's compliance with the corrective actions or implementation plan, and
- c. issue a letter that describes the procedures performed and the conclusions reached as a result of those procedures, to enable the report acceptance body (RAB) to conclude on the adequacy of the reviewed firm's corrective actions or implementation plans.

Planning

.02 The outside party should first gain an understanding of the corrective actions or implementation plans agreed to by the firm and the procedures that need to be performed by obtaining and reading

- a. the acceptance letter describing the corrective actions or implementation plans required by the RAB;
- b. the firm's most recent peer review report;
- c. the firm's letter of response, if applicable; and
- d. the FFC forms, if applicable.

.03 The outside party may confirm the appropriateness of the procedures to be performed by contacting the administering entity's (AE's) peer review committee, its RAB, or the technical reviewer. If unsure who to contact, the outside party may contact the AICPA.

Procedures

.04 The outside party should perform procedures outlined in the acceptance letter while considering the elements required to be reported, which are outlined in the subsequent section.

.05 The outside party should discuss the procedures performed and conclusions reached as a result of those procedures with the reviewed firm. During those discussions, the outside party should ask whether the firm plans to implement further corrective actions to address any deficiencies or significant deficiencies or take additional steps to address any findings noted during the outside party's procedures because they will likely be mentioned in the outside party's letter or report.

Reporting

.06 The outside party should draft a letter or report to the RAB describing the procedures performed and conclusions reached. The letter or report should

- a. be issued on the letterhead of the outside party's firm,
- b. be addressed to the AE's RAB with a copy to the reviewed firm, and
- c. include the following elements:
 - i. A description of the corrective actions or implementation plans required by the RAB
 - ii. A description of the representations made by the reviewed firm regarding the changes made by the firm since its most recent peer review
 - iii. A description of the procedures performed by the outside party
 - iv. A summary of the results of the outside party's procedures, including a description of any representations made by the reviewed firm regarding further planned actions and the outside party's comments on the appropriateness of those actions
 - v. A statement that the letter or report is intended for limited distribution to the RAB and the reviewed firm and is not intended as a substitute or replacement for the peer review documents issued on the firm's peer review
 - vi. Information enabling the RAB to evaluate whether the firm has improved
 - vii. For system reviews, recommendations of additional actions if the outside party believes the results reveal continued weaknesses in the reviewed firm's system of quality control

Illustrative Letters

.07 The following letters are for illustrative purposes only. It is recommended, but not required, that the outside party adopt the form of these letters and tailor them to describe the conclusions reached based on the specific procedures performed.

SAMPLE LETTER ON AN OUTSIDE PARTY'S REVIEW OF A FIRM'S REMEDIAL ACTIONS — CORRECTIVE ACTIONS

[Outside Party's Firm Letterhead]

May 15, 20XX

[Name and Address of the Report Acceptance Body]

Dear Committee Members:

This letter is written to assist [reviewed firm's name] in complying with certain actions the firm voluntarily agreed to take in connection with the [name of the report acceptance body]'s consideration of acceptance of its 20XX peer review report and response thereto.

The [name of the administering entity's peer review committee or its report acceptance body] accepted the firm's 20XX peer review documents with the understanding that the firm agreed to permit an outside party, acceptable to the Committee chair, to:

- a. Review the planning for the firm's 20XX inspection program in advance.
- b. Review the results (with emphasis on those items noted in the 20XX peer review) and the corrective actions taken on the deficiencies or significant deficiencies noted.

- c. Provide a written communication on the firm's inspection to the Committee by September 30, 20XX.

Prior to the firm performing its 20XX inspection, I performed the following procedures:

- a. Reviewed a copy of the firm's 20XX peer review report, finding for further consideration (FFC) forms (if applicable), the firm's letter of response, and the acceptance letter describing the required corrective actions.
- b. Reviewed the firm's inspection planning documentation.

On April 19th, 20XX, after the completion of the firm's 20XX inspection, I performed the following procedures:

- a. Discussed the corrective actions described in its letter of response with the firm to determine if the actions had been fully implemented.
- b. Reviewed the firm's inspection report and underlying documentation of its performance, including the engagement review checklists prepared during the inspection.
- c. Reviewed the working papers of selected engagements with periods ending June 30, 20XX, that were included in the inspection and any changes in the firm's quality control materials to evaluate the effectiveness of the inspection and the corrective actions implemented by the firm as a result of its 20XX peer review.
- d. Discussed the inspection results and corrective action plan with the firm and evaluated the feasibility of the firm achieving its plan.

Discussed in the following sections are the results of the procedures I performed and a description of the firm's representations regarding planned corrective actions.

Procedures on the Audit of an Employee Benefit Plan Audit

The firm performed an audit of a defined benefit pension plan subject to ERISA requirements. The firm failed to test participant data and did not obtain a representation letter from its client or the plan administrator. The firm subsequently obtained the missing representation letter and performed the necessary tests. I reviewed this documentation before the firm's peer review documents were presented to the Committee. The firm's letter of response indicated it would obtain an industry-specific audit program and update its library to include AICPA Audit and Accounting Guide *Employee Benefit Plans*.

Results of the Firm's Remedial Actions Related to the Employee Benefit Plan Audit

The firm did not obtain a copy of the AICPA Audit and Accounting Guide and my review of a recently completed employee benefit plan audit subject to ERISA showed an industry-specific audit program was not obtained and used by the firm on the audit. In addition, some key confirmations relating to investment balances were not obtained, and alternative procedures were not performed. The partner with responsibility for the engagement indicated that the firm obtained a large new client that took up a lot of time, and as a result, the staff rushed through the ERISA audit using the prior year's working papers.

Planned Corrective Actions Related to Employee Benefit Plan Audits

The firm represented that the AICPA Audit and Accounting Guide and industry-specific practice aids that include model audit programs have been ordered. The firm has subsequently obtained confirmations and/or performed

alternative procedures to substantiate the investment balances. I reviewed the additional procedures performed and they are appropriate. In addition, the firm represented that it plans to send its audit staff responsible for conducting employee benefit plan audits to 8 hours of CPE audits of employee benefit plans.

Performance of Audits Subject to Government Auditing Standards and the Single Audit Act

The firm performed several audits subject to the Single Audit Act. The firm failed to issue the required reports on internal controls and compliance with laws and regulations, did not document its consideration and testing of the internal control structure, and did not perform the necessary procedures to test compliance with laws and regulations. In addition, the partner responsible for the engagement was not in compliance with the Yellow Book CPE requirement. The firm performed the omitted audit procedures and issued the missing reports, which I reviewed before the firm's peer review documents were presented to the Committee. The firm's letter of response stated that the partner would take the necessary CPE.

Results of the Firm's Remedial Actions Related to Audits Subject to Government Auditing Standards and the Single Audit Act

My review of a single audit performed subsequent to the firm's peer review noted that all required reports were issued on the engagement and that the owner participated in the necessary CPE. However, I was unable to determine the extent of the testing for compliance with laws and regulations because of significant documentation deficiencies. In addition, documentation deficiencies continued to exist with respect to considering and testing the entity's internal control structure and testing for compliance with the requirements applicable to the federal financial assistance programs.

Planned Corrective Actions Related to Audits Subject to Government Auditing Standards and the Single Audit Act

The firm represented that it plans to conduct a training session for partners and staff during the next month on documentation of audit procedures performed. In addition, the firm represented that it will instruct partners to focus on documentation during their review process and will amend the partner review checklist to add this focus.

Reports on Compiled Interim Financial Statements

The deficiency related to the firm's failure to issue accountants' compilation reports on monthly computer-generated financial statements. The firm's letter of response stated that the firm would revise its quality control policies and procedures to require the issuance of compilation reports with the accompanying financial statements.

Results of the Remedial Actions Related to Compiled Interim Financial Statements

The firm adopted a policy requiring the partners to ensure that an accountant's report accompanies compiled financial statements when those statements are issued to the client. The inspection results indicated that compilation reports were issued with monthly compiled financial statements. However, some of the reports did not disclose that the financial statements were presented using a special purpose framework (cash basis). This reporting error occurred because the firm obtained a copy of the standard compilation report from the reviewer and used it on all of its compiled financial statements. The firm was not familiar with cash basis reporting on Statements on Standards for Accounting and Review Services (SSARS) engagements and did not have any third-party reference material. In addition, the firm's accounting personnel had not taken any recent CPE courses relating to SSARS engagements.

Planned Corrective Actions Related to Compiled Interim Financial Statements

The firm implemented a reviewer checklist to provide assurance that the proper type of compilation report will be issued and its policies and procedures were revised to require completion of this checklist. In addition, the firm represented that all personnel involved in preparing and/or reviewing compilation engagements will take 8 hours of CPE on SSARS engagements within the next month. To assess the effectiveness of using the new checklist, the firm represented that it plans to review a sample of compilation reports issued subsequent to the implementation of the checklist.

Summary

The firm's inspection appears to have been comprehensive, suitably designed, and adequately documented, and the results appear to have been effectively communicated to professional personnel. However, the firm's inspection failed to identify the issues previously discussed. As a result, I believe the Committee should further monitor the firm's corrective actions because the results revealed that the firm has failed to adequately implement the corrective actions described in its letter of response. I recommend that the Committee consider requiring the firm to hire an outside third party sufficiently experienced in the industries in which the firm's clients operate to perform a pre-issuance review of the firm's employee benefit plan audits and those subject to *Government Auditing Standards* and the Single Audit Act.

This letter is intended solely for the information and use of the [name of the administering entity's peer review committee or its report acceptance body] and the owners of [reviewed firm's name] and is not intended as a substitute or replacement for the peer review documents issued on the firm's 20XX peer review.

Sincerely,

[Outside Party's Signature]

cc: [Reviewed Firm's Name]

**SAMPLE LETTER ON AN OUTSIDE PARTY'S REVIEW OF A
SUBSEQUENT ENGAGEMENT — CORRECTIVE ACTIONS**

[Outside Party's Firm Letterhead]

October 6, 20XX

[Name and Address of the Report Acceptance Body]

Dear Committee Members:

This letter is written to assist [reviewed firm's name] in complying with certain actions the firm voluntarily agreed to take in connection with the [name of the report acceptance body]'s consideration of acceptance of its 20XX peer review report and response thereto.

The [name of the administering entity's peer review committee or its report acceptance body] accepted the firm's 20XX peer review documents with the understanding that the firm agreed to permit an outside party, acceptable to the Committee chair, to review the report, financial statements, and working papers of an audit engagement issued subsequent to the firm's peer review and communicate to the Committee in writing on the results of that review by July 31, 20XX.

I performed the following procedures:

- a. Reviewed a copy of the firm's 20XX peer review report, finding for further consideration (FFC) forms (if applicable), and the firm's

letter of response, and the acceptance letter describing the required corrective actions.

- b. Reviewed the report, financial statements, and working papers for a not-for-profit audit engagement for the period ended June 30, 20XX, issued subsequent to the peer review to determine whether the engagement was performed in accordance with professional standards in all material respects. I documented my review using the AICPA "Not-for-Profit Audit Engagement Checklist."
- c. Discussed with the firm the review results and the corrective action plan and evaluated the feasibility of the firm achieving its plan.

While performing the procedures, I found some minor incomplete disclosures in the areas of promises to give and collections. The firm represented that it will conduct a "refresher" training session on disclosures for all owners and professional staff and will also instruct owners to focus on disclosures during their review process.

Because only minor matters were found on the engagement I reviewed, I believe no further monitoring of the firm by the *[name of the administering entity's peer review committee or its report acceptance body]* is necessary at this time.

This letter is intended solely for the information and use of the *[name of the administering entity's peer review committee or its report acceptance body]* and the owners of *[reviewed firm's name]* and is not intended as a substitute or replacement for the peer review documents issued on the firm's 20XX peer review.

Sincerely,

[Outside Party's Signature]

cc: *[Reviewed Firm's Name]*

PR-C Section 430

Reviewer Monitoring and Performance

Effective for peer reviews commencing on or after May 1, 2022.

Introduction

Scope of This Section

.01 This section contains requirements and application material for the administering entity (AE), peer review committee (committee), report acceptance body (RAB), and technical reviewer regarding monitoring reviewer performance. For purposes of this section, it is assumed that the committee has delegated reviewer monitoring responsibilities to the RAB (or other designee) whose members may be, but are not required to be, members of the committee. The requirements and guidance in this section supplement the requirements and guidance in section 100, *Concepts Common to All Peer Reviews*, and section 400, *General Principles and Administration Responsibilities*. Additionally, individuals involved in the administration of the program should be familiar with reviewer and firm requirements in the following PR-C sections:

- a. Section 210, *General Principles and Responsibilities for Reviewers — System Reviews*
- b. Section 220, *General Principles and Responsibilities for Reviewers — Engagement Reviews*
- c. Section 310, *General Principles and Responsibilities for Reviewed Firms — System Reviews*
- d. Section 320, *General Principles and Responsibilities for Reviewed Firms — Engagement Reviews*

Effective Date

.02 The effective date for this standard is for peer reviews commencing on or after May 1, 2022.

Objectives

- .03 The objectives of reviewer performance feedback are to
- a. aid reviewers in their performance by documenting specific areas of improvement and
 - b. help the AE and AICPA staff in monitoring the performance of the reviewer, including whether there is a pattern of reviewer performance findings.

Definitions

.04 Terms applicable to this section are defined in paragraph .11 of section 100.

Requirements

Reviewer Performance

.05 Reviewer performance findings and performance deficiencies should (Ref: par. .A1–.A5)

- a. be documented on a reviewer performance feedback form.
- b. be substantiated by peer review guidance.
- c. include sufficient explanation to ensure the reviewer understands the feedback.
- d. be signed and dated by the RAB, the committee, or a committee member.
- e. be approved by the RAB in conjunction with acceptance of the underlying peer review.
- f. be issued to the reviewer no later than the date the reviewer is notified that the underlying peer review was accepted.
- g. be issued regardless of whether the reviewer cooperated in revising documents or responding to questions and regardless of the status of the reviewer, including reviewers currently suspended or subject to other corrective actions, suspensions, or limited restrictions.

Performance Deficiency Letters

.06 Performance deficiency letters (PDLs) are issued to improve reviewer performance and assist the committee in ensuring reviewers are fulfilling all reviewer responsibilities in the performance of reviews. PDLs should be issued when there is (Ref: par. .A6–.A8)

- a. a pattern of reviewer performance findings by a reviewer or
- b. more than one reviewer performance deficiency on one review (regardless of whether a pattern is present).

.07 A PDL should do the following: (Ref: par. .A9)

- a. State that improvements are needed in the performance of the reviewer.
- b. Include an explanation of the performance deficiencies.
- c. Indicate that the individual must agree to comply with one or more corrective actions or restrictions in order to continue performing reviews, such as, but not limited to, the following:
 - i. Oversight (at the reviewer's expense) until performance improves
 - ii. Consulting with the AE to discuss the planning and performance of the next review until performance improves
 - iii. Submitting all reports and appropriate documentation on all outstanding peer reviews before scheduling or performing another review
 - iv. Having pre-issuance reviews of the report and peer review documentation on future peer reviews by an individual acceptable to the RAB (at the reviewer's expense)
 - v. Submitting evidence of completion of specified types of and amounts of CPE or training, or passing the related AICPA advanced certificate exam

- vi. Removing or revising certain peer reviewer resume items until appropriate proof of experience and knowledge have been provided to the satisfaction of the RAB
- d. Specify whether any corrective actions or restrictions are specific to the individual's performance as a captain or team member, if applicable.
- e. Indicate that other AEs will impose the preceding corrective actions or restrictions on the reviewer.
- f. Indicate that the committee may request that the board remove the individual's name from the list of qualified reviewers if improvements are not noted in the performance of the reviewer on subsequent reviews or the reviewer refuses to cooperate, such as by failing to return a signed acknowledgment copy of the letter within 30 days from the date of the letter.
- g. Indicate that the reviewer will be suspended from scheduling reviews and performing reviews that are scheduled but not commenced by all AEs if the reviewer has not acknowledged the letter within 30 days from the date of the letter.
- h. Give the reviewer an opportunity to appeal the decision before a hearing panel of the board, via telephone conference or in writing. (Ref: par. .A9)
- i. Indicate that a request for appeal must be made within 30 days of receipt of the letter and that the actions or restrictions outlined in the letter will remain in effect for all reviews that the reviewer commences, pending the appeal results.
- j. Be copied and sent to the managing partner of the reviewer's firm if the reviewer is not a sole practitioner and be sent to all AEs for which the reviewer is scheduled to perform reviews or has performed a review in the past year.

.08 The entity issuing a PDL should document its communication (either through discussion or email) with the reviewer to ensure the reviewer is knowledgeable about the evidence supporting the PDL. (Ref: par. .A10)

.09 Corrective actions or restrictions included in a PDL should be adhered to by all AEs and applied to the individual's participation in the performance of any peer review unless the condition is specific to the individual's service as a team captain, review captain, or team member. Corrective actions or restrictions included in a PDL should remain in effect for reviews that the reviewer commences after acknowledging receipt of the PDL until either

- a. the corrective actions and restrictions are withdrawn or
- b. the reviewer has appealed the PDL and the hearing panel determines that the corrective actions or restrictions should be removed or revised.

Withdrawal of Actions or Restrictions in a PDL

.10 Only the entity that issued the PDL should withdraw corrective actions or restrictions included in the PDL. The corrective actions or restrictions should be withdrawn once there is evidence supporting fulfillment of any obligations placed upon the reviewer or supporting why the action or restriction is no longer required. If no improvement or a lack of cooperation is evident, the reviewer should be referred to the board for reviewer removal (see paragraphs .13–.17).

Reviewer Removal

.11 The committee should issue a letter to the board recommending that a reviewer be removed from the list of qualified reviewers if the reviewer (Ref: par. .A11–.A14)

- a. refuses to cooperate with the committee or board (for example, by not acknowledging or appealing a PDL within 30 days).
- b. fails to correct performance deficiencies or findings after a corrective action has been required and the reviewer has had sufficient time and opportunity to correct the deficiencies or findings.
- c. has committed an egregious act in the performance of a peer review. (See paragraph .A44 of section 200, *General Principles and Responsibilities for Reviewers*.)

.12 Prior to referring a reviewer to the board for potential removal from the list of qualified reviewers, the AE should ensure the reviewer is fully knowledgeable about the evidence supporting the referral to the board. Such communication (either through discussion or email) should be documented. One objective of this communication is to determine if there is a disagreement between the reviewer and AE. If there is a disagreement, the committee should follow the guidance in appendix B, "Disagreements," of section 400.

.13 Referrals to the board to request removal of an individual from the list of qualified reviewers should be supported by an affirmative vote by a majority of the committee and include all supporting documentation. (Ref: par. .A15)

.14 The letter recommending that a reviewer be removed from the list of qualified reviewers should be sent by a delivery method providing proof of delivery (including electronic means) and should indicate the following:

- a. That the reviewer refuses to cooperate with the committee or board, failed to correct performance deficiencies or findings after a corrective action was imposed, failed to comply with peer review standards and guidance such that reviewer performance deficiencies were noted, or committed egregious acts in the performance of a review
- b. That the board is requested to consider whether the reviewer should be prohibited from performing reviews or whether some other action should be taken
- c. That the board is also requested to suspend the reviewer's ability to schedule future reviews until this matter is resolved

.15 The request to remove the reviewer from the list of qualified reviewers should include all supporting documentation. (Ref: par. .A15)

Considerations When a Reviewer Is Issued a PDL

.16 Because reviews will be in different stages of completion when a reviewer is issued a PDL, the AE should evaluate the situation and ensure appropriate actions are taken, if any, due to the PDL. (Ref: par. .A16)

Considerations When a Reviewer Is Removed From the List of Qualified Reviewers

.17 Because reviews performed by a reviewer will be in different stages of completion when the board removes the reviewer from the list of qualified reviewers, the AE should evaluate the situation and ensure appropriate actions are taken, if any, due to reviewer removal. (Ref: par. .A17)

Performing in a Timely and Professional Manner

.18 If a reviewer fails to timely and professionally submit peer review documentation (see paragraphs .A39–.A41 of section 200), the AE should suspend the reviewer from scheduling peer reviews within its jurisdiction. Prior to starting the suspension process, the AE should first confirm that it is the reviewer, not the reviewed firm that is failing to perform in a timely and professional manner. If there is a disagreement between the reviewer and reviewed firm, procedures in appendix B of section 400 are followed to resolve the disagreement. (Ref: par. .A18–.A19)

.19 Reviewer suspensions should not preclude the reviewer from

- a. performing already approved and scheduled reviews;
- b. receiving reviewer performance feedback or other communications, if warranted; or
- c. being suspended for failing to timely and professionally submit peer review documentation related to another review.

Reviewer Qualifications

.20 The AE should inform AICPA staff if the AE becomes aware that a reviewer no longer possesses one or more qualifications of a reviewer. (Ref: par. .A20–.A21)

.21 If the AE contacts a firm because its reviewer no longer meets qualifications and the reviewer has not contacted the firm (or team captain) to inform the firm that the reviewer will not be able to perform or continue to perform the firm's peer review, the AE should not provide details or explanation of the reason to the firm. It should be at the reviewer's discretion to discuss details with the firm if the reviewer chooses to do so. (Ref: par. .A22–.A23)

Considerations When a Reviewer Is Ineligible to Schedule or Perform Reviews

.22 Because reviews performed by a reviewer will be in different stages of completion when the reviewer is determined to be ineligible to schedule or perform reviews, the AE should consider the situation and ensure appropriate actions are taken, if any, due to reviewer ineligibility. (Ref: par. .A24)

Allegations or Investigations

.23 The AE and RAB should consider and investigate, as deemed necessary, whether any actions (such as oversight) on the reviewer or reviewing firm are appropriate to overcome any concerns due to the allegations or investigations. (Ref: par. .A25)

Limitations or Restrictions

.24 The AE should comply with any actions placed on reviewers and firms due to limitations or restrictions. (Ref: par. .A26–.A29)

.25 Because reviews performed by a reviewer will be in different stages of completion when a reviewer or reviewing firm becomes restricted or limited, the AE should evaluate the situation and ensure appropriate actions are taken, if any, due to limitations or restrictions. (Ref: par. .A30)

Reviewers That Consider Withdrawing From a Peer Review After the Commencement of the Review

.26 When a reviewer withdraws from a peer review after the review has commenced (based on the definition of *commencement* in section 100), the AE should evaluate whether the situation is a matter of firm noncooperation or reviewer performance and take appropriate action. (Ref: par. .A31–.A32)

Application and Other Explanatory Material

Reviewer Performance (Ref: par. .05)

.A1 Recommendations for reviewer performance feedback may be made by the technical reviewer, the board, or staff via the technical review process or other means such as oversight.

.A2 Examples of reviewer performance findings that may be documented on a reviewer performance feedback form include, but are not limited to, the following:

- a. Related to planning, the reviewer did not
 - i. obtain team member approval timely.
 - ii. obtain a sufficient understanding of the firm's accounting and auditing practice or system of quality control, resulting in the need to perform additional work after the working papers were submitted to the AE.
 - iii. address significant differences between the background information provided to the AE during scheduling and the information that the firm provided to the reviewer that would have affected peer review planning or procedures.
 - iv. adequately document a comprehensive risk assessment for the system review and additional clarification was necessary after working papers were submitted to the AE.
- b. Related to engagement selection and review, the reviewer
 - i. did not select a sufficient or appropriate scope of engagements for review; this includes selecting too many engagements on an engagement review.
 - ii. did not properly select the "surprise" engagement.
 - iii. did not provide sufficient documentation of reasoning for the surprise selection.
 - iv. identified all significant issues in an engagement but did not appropriately conclude on whether an engagement was nonconforming prior to technical review, oversight, or RAB consideration.
- c. Related to the assessment and disposition of matters, the reviewer did not
 - i. appropriately identify matters, findings, deficiencies, or significant deficiencies that would rise to the level of performance deficiencies.
 - ii. appropriately dispose of matters noted on the review.
 - iii. properly consider or document the need to expand scope to other engagements or functional areas.

- iv. appropriately aggregate or evaluate matters noted on the review.
- d. Related to the completion of findings for further consideration (FFCs), the reviewer did not
 - i. write findings systemically in a system review.
 - ii. sufficiently complete or write FFCs or evaluate the firm's response.
 - iii. properly identify a repeat finding.
- e. Related to reporting, the reviewer did not
 - i. provide sufficient working papers or documentation to support the report rating.
 - ii. present the report in standard form in accordance with peer review guidance, or significant revisions to the report were needed.
 - iii. properly review and evaluate the reviewed firm's letter of response prior to its submission to the AE.
 - iv. properly identify a repeat deficiency.
- f. Related to completion and submission of working papers, significant revisions to the working papers were needed or the reviewer did not
 - i. comprehensively complete peer review documentation.
 - ii. properly report engagement statistics.
 - iii. properly discuss consideration of a nonconforming engagement including consideration of the reviewed firm's response.
 - iv. use appropriate practice aids that follow current templates, materials, and checklists.

.A3 Examples of reviewer performance deficiencies that may be documented on a reviewer performance feedback form include, but are not limited to, the following:

- a. Related to engagement selection and review, the reviewer did not
 - i. appropriately identify a nonconforming engagement prior to technical review, oversight, or RAB consideration.
 - ii. demonstrate sufficient knowledge and experience required to review the engagement and identify issues prior to technical review, oversight, or RAB consideration.
- b. Related to assessment and disposition of matters, the reviewer did not appropriately aggregate or evaluate matters noted on the review such that the RAB determined
 - i. a deficiency was present but the reviewer did not elevate the matter beyond a matter for further consideration (MFC) or
 - ii. a significant deficiency (or a *fail* report rating on an engagement review) was present but the reviewer did not elevate the matter beyond an FFC.

.A4 Less critical reviewer performance matters may be provided informally, such as in an email or a call from the technical reviewer; however, the aggregation of less critical performance matters may warrant the issuance of a reviewer performance feedback form. Less critical matters include, but are not limited to,

- a. a checklist was not signed by the team captain,
- b. a reviewer's handwriting was difficult to read, or
- c. the peer review documents needed one minor revision.

.A5 Team member feedback may affect the team captain. For example, if the team member receiving performance feedback did not identify the matters on the checklist that would have informed the team captain to consider the issues, feedback for the team captain is not necessary. However, if the team member identified significant "no" answers on the checklists but did not properly conclude on the engagement, and the team captain did not question the conclusion, reviewer performance feedback for both individuals would be appropriate.

Performance Deficiency Letters (Ref: par. .06–.09)

.A6 If a reviewer's performance on a review is considered egregious, a PDL may be issued or the reviewer may be referred to the board for potential removal from the list of qualified reviewers. (See the section "Reviewer Removal.")

.A7 Determining whether there is a pattern of reviewer performance findings that warrants a PDL is a matter of professional judgment. The assessment includes considering the recentness, nature, and pervasiveness of the issues, factoring in the volume of reviews performed by the reviewer. For example,

- a. a pattern of performance findings may be present when a low-volume reviewer performs three reviews each peer review cycle and reviewer performance findings were noted for all three in that cycle.
- b. a pattern of performance findings may not be present when a high-volume reviewer performs over 100 reviews each peer review cycle and reviewer performance findings were noted on 3 of the reviews in that cycle.

.A8 If AICPA staff become aware of a pattern of reviewer performance findings or reviewer performance deficiencies (regardless of whether a pattern is present) by a particular reviewer, staff will consult with the affected AEs to determine whether a PDL is being drafted. If no PDL is being drafted or will be drafted, staff may refer the reviewer performance issue to the board. The board's process for issuing the PDL is consistent with the process at the AE level.

.A9 Details of the appeal process are covered in the "AICPA Peer Review Board Rules of Procedures for Reviewers," which are located on the AICPA website.

.A10 Evidence supporting the issuance of a PDL may include, but is not limited to,

- a. suspensions for failure to perform in a timely and professional manner,
- b. reviewer performance feedback forms,
- c. other PDLs, and
- d. results of oversight.

Reviewer Removal (Ref: par. .11–.15)

.A11 The committee may also recommend that a reviewer be removed from the list of qualified reviewers if the reviewer

- a. fails to comply with peer review standards and guidance such that reviewer performance deficiencies or a pattern of reviewer performance findings is noted.
- b. fails to submit documentation to support the experience reflected on the reviewer's resume.
- c. fails to perform in a timely and professional manner, resulting in suspension.

.A12 The board may remove the reviewer's name from the list of qualified reviewers or require some other actions based on the facts and circumstances presented.

.A13 AICPA staff will consult with the affected AEs to determine whether a letter requesting the reviewer be removed from the list of qualified reviewers is being drafted if AICPA staff become aware that a reviewer

- a. refuses to cooperate with the committee or board.
- b. failed to correct performance deficiencies or findings after a corrective action had been imposed.
- c. failed to comply with peer review standards such that reviewer performance deficiencies or a pattern of reviewer performance findings is noted.
- d. committed egregious acts in the performance of a review.

If no letter is being drafted or will be drafted by the AE, staff may refer the matter to the Oversight Task Force (OTF), which will consider the need to refer the reviewer to the board for potential removal from the list of qualified reviewers. The process for the OTF is consistent with the process at the AE level.

.A14 A reviewer may apply for reinstatement as a reviewer by writing a letter to the board. Reinstatement may be granted at the discretion of the board chair (or designee) no sooner than three years after the date the reviewer was removed from the list of qualified reviewers. If approved for reinstatement, the reviewer will be sent a letter indicating that the reviewer is able to schedule and perform reviews. It is expected that those reviewers who are granted reinstatement will be required to undergo corrective actions and may be subject to restrictions to be determined by the board chair (or designee). Those required actions or restrictions will also be detailed in the letter.

.A15 Documentation supporting removal from the list of qualified reviewers includes, but is not limited to,

- a. reviewer performance feedback forms issued,
- b. deficiency letters,
- c. results of oversight,
- d. information from other communications (whether verbal or written),
- e. notes from committee and RAB meetings, and
- f. a timeline outlining the various communications.

Considerations When a Reviewer Is Issued a PDL (Ref: par. .16)**.A16**

<i>Considerations When a Reviewer Has Restrictions or Corrective Actions Imposed via a PDL Not Acknowledged by the Reviewer</i>	
<u>Situation</u>	<u>Action</u>
The PDL has not been acknowledged or appealed within 30 days of the date of the letter (or an agreed-upon extended due date).	The reviewer is restricted from scheduling and performing reviews that have been scheduled but not commenced.
The PDL has not been acknowledged or appealed and the review has commenced.	Because the corrective actions cannot be imposed prior to acknowledgment or appeal from the reviewer, consider oversight on the review. If oversight is not performed, consider a full technical review of all working papers related to the peer review.
<i>Considerations When a Reviewer Has Restrictions or Corrective Actions Imposed via a PDL Acknowledged by the Reviewer</i>	
<u>Situation</u>	<u>Action</u>
The PDL requires oversight or a pre-issuance review and the technical reviewer has not submitted the review for RAB consideration.	The action in the PDL is adhered to by all AEs. Notify the firm if fieldwork has been completed and the action will delay the acceptance of the review.
The PDL requires oversight or a pre-issuance review but the technical reviewer has already submitted the review for RAB consideration.	Consider deferring acceptance of the review until oversight procedures can be performed. If oversight is not performed, consider a full technical review of all working papers related to the peer review. Based on the circumstances, the firm may be contacted to discuss the situation.
The PDL requires oversight or a pre-issuance review and the review has already been accepted but the acceptance letter has not been sent.	Consider delaying sending the acceptance letter until oversight or a full technical review of all working papers can be performed. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of the results. Based on the circumstances, the firm may be contacted to discuss the situation.
The PDL requires oversight or a pre-issuance review but the review has already been accepted, the acceptance letter has been sent, and the working papers are within the document-retention period.	Consider oversight or a full technical review of all working papers related to the peer review. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of the results.
The PDL requires oversight or a pre-issuance review and the review has already been accepted and the acceptance letter has been sent, but the working papers are not within the document-retention period.	Contact AICPA staff to discuss the impact on reviews performed by the reviewer.

Considerations When a Reviewer Is Removed From the List of Qualified Reviewers (Ref: par. .17)

.A17

<i>Considerations When a Reviewer Is Removed From the List of Qualified Reviewers</i>	
Situation	Action
The review has not commenced.	If the reviewer fails to contact the reviewed firm to withdraw from the review within five business days of being notified of removal, the AE may contact the firm to inform it that the reviewer will not be able to perform the firm's review. Only the reviewer is authorized to provide details or explanation of the reasons why the reviewer is unable to perform the review.
The review has commenced but fieldwork is not complete.	The reviewer is not eligible to complete the review. The firm needs to reschedule the review.
Fieldwork is complete but the technical reviewer has not submitted the review for RAB consideration.	Consider whether any oversight procedures should be performed. If oversight is not performed, consider a full technical review of all working papers related to the peer review. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The technical reviewer has submitted the review for RAB consideration.	Consider deferring acceptance of the review until oversight procedures can be performed. If oversight is not performed, consider a full technical review of all working papers related to the peer review. Based on the circumstances, the firm may be contacted to discuss the situation. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The review has been accepted but the acceptance letter has not been sent.	Consider delaying sending the acceptance letter until oversight or a full technical review of all working papers can be performed. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of the results. Based on the circumstances, the firm may be contacted to discuss the situation. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The review has been accepted, the acceptance letter has been sent, and the working papers are within the document-retention period.	Consider oversight or a full technical review of all working papers related to the peer review. Based on the results of any procedures, consider contacting AICPA staff (who may consult legal counsel) regarding the impact of the results. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The review has been accepted and the acceptance letter has been sent, but the working papers are not within the document-retention period.	Contact AICPA staff (who may contact legal counsel) to discuss the impact on reviews performed by the reviewer.

Performing in a Timely and Professional Manner (Ref: par. .18–.19)

.A18 The AE or AICPA staff may refer the reviewer to the board for national suspension. The technical director of the program (or designee) will determine if it is appropriate to form a hearing panel to consider the suspension.

.A19 A reviewer may appeal a suspension; however, the appeal does not lift nor delay the suspension. If the reviewer appeals a suspension, the technical director of the program (or designee) will determine if it is appropriate to form a hearing panel to consider the suspension appeal.

Reviewer Qualifications (Ref: par. .20–.21)

.A20 When it comes to the attention of AICPA staff that a reviewer may not meet all qualifications required by the standards, staff will contact the reviewer to validate the qualifications that the reviewer may no longer possess. The reviewer is expected to respond to such communication within the requested time and may be able to continue to schedule and perform reviews if the reviewer can provide proof of meeting the qualifications and in certain other situations. Situations in which it may be determined that the reviewer should still be eligible to schedule and perform reviews include, but are not limited to, the following:

- a. The reviewer's firm has not had its most recent peer review completed by the due date; however, the peer review working papers have been submitted and the peer review is scheduled to be presented for acceptance.
- b. An engagement within the reviewer's firm's peer review has been selected for oversight.
- c. The firm's records or offices have been severely damaged or destroyed because of a natural disaster or catastrophe.
- d. The firm was granted an extension so a major engagement can be completed and be subject to review.
- e. The firm was granted an extension to complete an initial engagement where there is no comparable engagement to review (such as a new must-select engagement).

.A21 If AICPA staff confirm the individual does not currently possess all reviewer qualifications, the individual is notified that the individual is prohibited from scheduling or performing reviews nationally. The individual remains ineligible until either

- a. AICPA staff or the board approves documented evidence that the reviewer possesses all the qualifications required of a reviewer or
- b. the reviewer appeals the ineligibility letter and a hearing panel determines that the reviewer possesses all reviewer qualifications.

.A22 Once AICPA staff receive evidence of compliance with reviewer qualifications, staff will

- a. approve reinstatement for certain ineligibility reasons or
- b. send evidence to three board members requesting approval to allow the reviewer to continue performing reviews.

.A23 AICPA staff may approve reinstatement if evidence is received that the following ineligibility reasons have been rectified:

- a. The reviewer's AICPA membership had lapsed or was suspended.

- b. The reviewer's firm's peer review was not accepted within the last three years and six months.
- c. The reviewer's firm's most recently accepted peer review resulted in a report rating of *pass with deficiencies* or *fail*.

Considerations When a Reviewer Is Ineligible to Schedule or Perform Reviews (Ref: par. .22)

.A24

Considerations When a Reviewer Is Deemed Ineligible to Schedule or Perform Reviews	
Situation	Action
The review has not commenced.	The reviewer is not eligible to perform the review. If the reviewer fails to contact the reviewed firm to reschedule or withdraw from the review, the AE may contact the firm to inform the firm that the reviewer will not be able to perform the firm's review. For instance, if a reviewer is notified that the reviewer is not qualified to schedule or perform peer reviews on May 1 and a review scheduled to commence on May 15 is not rescheduled by May 7, the AE may inform the firm that "its reviewer cannot perform the review at this time, and if further information is required, please contact your peer reviewer." Only the reviewer is authorized to provide details or explanation of the reasons why the reviewer is unable to perform the review.
The reviewer commenced the review after being deemed ineligible.	The reviewer is referred to the board for removal from the list of qualified reviewers (see paragraphs .20–.24).
The review has commenced but fieldwork is not complete.	Consider whether the remaining fieldwork needs to be performed by an eligible reviewer or whether any oversight procedures need to be performed.
Fieldwork is complete but the technical reviewer has not submitted the review for RAB consideration.	Consider whether any oversight procedures need to be performed. If oversight is not performed, consider a full technical review of all working papers related to the peer review. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The technical reviewer has submitted the review for RAB consideration.	Consider deferring acceptance of the review to perform oversight or a full technical review of all working papers. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of results. Based on the circumstances, the firm may be contacted to discuss the situation. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.

(continued)

<i>Considerations When a Reviewer Is Deemed Ineligible to Schedule or Perform Reviews</i>	
<u>Situation</u>	<u>Action</u>
The review has been accepted but the acceptance letter has not been sent.	Consider delaying sending the acceptance letter to perform oversight or a full technical review of all working papers. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of results. Consider contacting the firm to discuss the situation. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The review has been accepted, the acceptance letter has been sent, and the working papers are within the document-retention period.	Consider performing oversight or a full technical review of all working papers. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of results. Do not destroy the working papers until all procedures have been performed and a resolution has been reached. Based on the circumstances, the firm may be contacted to discuss the situation.
The review has been accepted and the acceptance letter has been sent, but the working papers are not within the document-retention period.	Contact AICPA staff to discuss the impact the missing qualifications may have on reviews performed by the reviewer.
A reviewer is suspended for failing to verify resume information.	Consider performing oversight procedures on reviews that have been submitted to the AE. For reviews that have been accepted within the document-retention period, consider performing oversight. Discuss the results with the reviewer if the results of the oversight indicate that the reviewer had performance issues. If the reviewer is unable to justify the reviewer's conclusions by citing professional standards, this may indicate reviewer performance deficiencies or findings. If there is concern about the reviewer's performance, contact AICPA staff to discuss the situation. Consider contacting the firm to discuss the situation.

Allegations or Investigations (Ref: par. .23)

.A25 Allegations or investigations do not automatically mean a reviewer is ineligible to perform reviews; however, there may be situations in which the AE or RAB conclude that the nature, significance, or pervasiveness of the alleged deficiencies or an already-existing preponderance of evidence necessitate immediate action to overcome any concerns.

Limitations or Restrictions (Ref: par. .24–.25)

.A26 Reviewers and firms may be subject to limitations or restrictions by a regulatory body that affect their ability to practice or perform peer reviews. Examples include

- a.* constraint of scope or volume of accounting and auditing engagements,
- b.* required periodic reporting to the regulatory body,
- c.* pre-issuance reviews of engagements, or
- d.* additional peer review or professional education requirements.

.A27 If a limitation is placed on a reviewer or reviewer's firm that limits the reviewer's ability to practice public accounting, the board will evaluate whether the reviewer is qualified to perform peer reviews or should be restricted from reviewing specific industries or engagements. The evaluation will include the status of any reviews that the reviewer and firm are or were associated with since the date of the notification by a government or regulatory authority.

.A28 Because reviews performed by a reviewer may be in different stages of completion when AICPA staff receive notification or knowledge of a limitation or restriction on a reviewer or reviewing firm, the board will consider various factors in determining if any reviews need to be

- a.* rescheduled,
- b.* subject to oversight or other additional procedures, or
- c.* if a new review should be performed.

.A29 Factors that the board will consider include, but are not limited to, the following:

- a.* The type of peer review and the role of the peer reviewer for each preceding review
- b.* The date of notification to the reviewer and reviewing firm by a government or regulatory authority of the limitation or restriction in comparison with the date of notification from the reviewer and firm to the AICPA staff
- c.* Whether the reviewer and firm appropriately and timely notified AICPA staff of the limitation or restriction
- d.* Whether the reviewer and firm scheduled reviews without notifying AICPA staff of such limitations or restrictions
- e.* Whether the limitation or restriction is related to a particular type of service (tax versus audit and attest or audits, reviews, or compilations); industry oversight; regulatory oversight, such as engagements falling under the purview of a particular regulator; or state board of accountancy oversight
- f.* Whether the limitation or restriction is permanent or indefinite in duration (that is, the reviewing firm is restricted from performing audits until the firm complies with some requirement, but the firm has chosen to no longer perform audits, so the limitation or restriction will always be there)
- g.* Whether the limitation or restriction is temporary
- h.* The history of qualification, performance, and noncooperation matters and any other information relevant to these matters

- i. Any documents that describe violations of professional standards as well as the reviewer's peer review history

.A30

<i>Considerations When a Reviewer or Reviewer’s Firm Becomes Restricted or Limited</i>	
<u>Situation</u>	<u>Action</u>
The review has not commenced — Total restriction	The reviewer is not eligible to perform the review because of the total restriction. If the reviewer fails to contact the reviewed firm to withdraw from the review, the AE may contact the firm to inform the firm that the reviewer will not be able to perform the firm's review. Only the reviewer is authorized to provide details or explanation of the reasons why the reviewer is unable to perform the review.
The review has not commenced — Limited restriction	Ensure the review team is reconfigured to comply with the limited restriction, if applicable. For example, if a reviewer's limited restriction is that the reviewer is restricted from reviewing employee benefit plans, a team member with appropriate qualifications may be added to review that engagement, if applicable.
The review has commenced but fieldwork is not complete.	Consider whether any oversight procedures should be performed. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
Fieldwork is complete but the technical reviewer has not submitted the review for RAB consideration.	Consider deferring acceptance of the review until oversight procedures can be performed. If oversight is not performed, consider a full technical review of all working papers related to the peer review. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The technical reviewer has submitted the review for RAB consideration.	Consider whether oversight procedures need to be performed. If oversight is not performed, consider a full technical review of all working papers related to the peer review. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of the results. Based on the circumstances, the firm may be contacted to discuss the situation. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.

<i>Considerations When a Reviewer or Reviewer's Firm Becomes Restricted or Limited</i>	
Situation	Action
The review has been accepted but the acceptance letter has not been sent.	Consider delaying sending the acceptance letter until oversight or a full technical review of all working papers can be performed. Based on the results of any procedures, consider contacting AICPA staff (who may consult legal counsel) to discuss the impact of the results. Based on the circumstances, the firm may be contacted to discuss the situation. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The review has been accepted, the acceptance letter has been sent, and the working papers are within the document-retention period.	Consider oversight or a full technical review of all working papers related to the peer review. Based on the results of any procedures, consider contacting AICPA staff to discuss the impact of the results. Do not destroy the working papers until all procedures have been performed and a resolution has been reached.
The review has been accepted and the acceptance letter has been sent, but the working papers are not within the document-retention period.	Contact AICPA staff to discuss the impact the limitation or restriction may have on reviews performed by the reviewer.

Reviewers That Consider Withdrawing From a Peer Review After the Commencement of the Review (Ref: par. .26)

.A31 Reasons a reviewer may withdraw from the peer review include, but are not limited to,

- a. poor health,
- b. not receiving the required documents from the reviewed firm within a reasonable time frame (or other lack of cooperation),
- c. personality conflicts with the reviewed firm that cannot be overcome,
- d. not meeting the requirements to be a peer reviewer after the field-work on a peer review has commenced.

.A32 Withdrawing may lead to some issues that will need to be resolved solely by the peer reviewer and firm. Other issues (based on the validity and types of reasons) may relate to firm noncooperation or reviewer performance. Appropriate actions include, but are not limited to, the following:

- a. Evaluating reviewer performance in accordance with paragraphs .05–.17 and acting accordingly, if applicable
- b. Evaluating reviewer cooperation with paragraphs .28–.38 of section 200 and acting accordingly, if applicable

- c. Evaluating the firm's compliance with paragraphs .12–.17 of section 300, *General Principles and Responsibilities for Reviewed Firms*, and acting according to appendix A, "Failure to Cooperate or Comply With the Requirements of the Program Referral Responsibilities," of section 400, if applicable

TAX SERVICES

STATEMENTS ON
STANDARDS FOR TAX SERVICES

The Statements on Standards for Tax Services (SSTSs) and interpretations, promulgated by the Tax Executive Committee, reflect the AICPA's standards of tax practice and delineate members' responsibilities to taxpayers, the public, the government, and the profession. The statements are intended to be part of an ongoing process that may require changes to and interpretations of current SSTSs in recognition of the accelerating rate of change in tax laws and the continued importance of tax practice to members. *Interpretation No. 1-2* was approved by the Tax Executive Committee on August 21, 2003; its effective date is December 31, 2003.

The SSTSs have been written in as simple and objective a manner as possible. However, by their nature, ethical standards provide for an appropriate range of behavior that recognizes the need for interpretations to meet a broad range of personal and professional situations. The SSTSs recognize this need by, in some sections, providing relatively subjective rules and by leaving certain items undefined. These terms and concepts are generally rooted in tax concepts, and therefore should be readily understood by tax practitioners. It is, therefore, recognized that the enforcement of these rules, as part of the AICPA's Code of Professional Conduct Rule 201, *General Standards* (ET sec. 201 par. .01), and Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), will be undertaken with flexibility in mind and handled on a case-by-case basis. Members are expected to comply with them.

Preface

Standards are the foundation of a profession. The AICPA aids its members in fulfilling their ethical responsibilities by instituting and maintaining standards against which their professional performance can be measured. Compliance with professional standards of tax practice also reaffirms the public's awareness of the professionalism that is associated with CPAs as well as the AICPA.

This publication sets forth enforceable tax practice standards for members of the AICPA, Statements on Standards for Tax Services (SSTSs or statements) (sections 100–700). These statements apply to all members providing tax services regardless of the jurisdictions in which they practice. Interpretations of these statements may be issued as guidance to assist in understanding and applying the statements. The SSTSs and their interpretations are intended to complement other standards of tax practice, such as Treasury Department Circular No. 230, *Regulations Governing the Practice of Attorneys, Certified Public Accountants, Enrolled Agents, Enrolled Actuaries, Enrolled Retirement Plan Agents, and Appraisers before the Internal Revenue Service*; penalty provisions of the Internal Revenue Code; and state boards of accountancy rules.

The SSTSs are written in as simple and objective a manner as possible. However, by their nature, practice standards provide for an appropriate range of behavior and need to be interpreted to address a broad range of personal and professional situations. The SSTSs recognize this need by, in some sections, providing relatively subjective rules and by leaving certain terms undefined. These terms are generally rooted in tax concepts and, therefore, should be readily understood by tax practitioners. Accordingly, enforcement of these rules, as part of the AICPA's Code of Professional Conduct Rule 201, *General Standards* (ET sec. 201 par. .01), and Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), will be undertaken on a case-by-case basis. Members are expected to comply with them.

History

The SSTSs have their origin in the Statements on Responsibilities in Tax Practice (SRTPs), which provided a body of advisory opinions on good tax practice. The guidelines as originally set forth in the SRTPs became more important than many members had anticipated when the guidelines were issued. The courts, the IRS, state accountancy boards, and other professional organizations recognized and relied on the SRTPs as the appropriate articulation of professional conduct in a CPA's tax practice. The SRTPs became *de facto* enforceable standards of professional practice, because state disciplinary organizations and courts regularly held CPAs accountable for failure to follow the guidelines set forth in the SRTPs.

The AICPA's Tax Executive Committee concluded it was appropriate to issue tax practice standards that would become a part of the AICPA's *Professional Standards*. At its July 1999 meeting, the AICPA Board of Directors approved support of the executive committee's initiative and placed the matter on the agenda of the October 1999 meeting of the AICPA's governing Council. On October 19, 1999, Council approved designating the Tax Executive Committee as a standard-setting body, thus authorizing that committee to promulgate standards of tax practice. As a result, the original SSTSs, largely mirroring the SRTPs, were issued in August 2000.

The SRTPs were originally issued between 1964 and 1977. The first nine SRTPs and the introduction were promulgated in 1976; the tenth SRTP was issued in 1977. The original SRTPs concerning the CPA's responsibility to sign

the tax return (SRTP No. 1, *Signature of Preparers*, and No. 2, *Signature of Reviewer: Assumption of Preparer's Responsibility*) were withdrawn in 1982 after Treasury Department regulations were issued adopting substantially the same standards for all tax return preparers. The sixth and seventh SRTPs, concerning the responsibility of a CPA who becomes aware of an error, were revised in 1991. The first interpretation of the SRTPs, Interpretation No. 1-1, "Realistic Possibility Standard," was approved in December 1990. The SSTSs and Interpretation No. 1-1, "Realistic Possibility Standard," of SSTS No. 1, *Tax Return Positions* (sec. 100), superseded and replaced the SRTPs and their Interpretation No. 1-1, effective October 31, 2000. Although the number and names of the SSTSs, and the substance of the rules contained in each of them, remained the same as in the SRTPs, the language was revised to both clarify and reflect the enforceable nature of the SSTSs. In addition, because the applicability of these standards is not limited to federal income tax practice (as was the case with the SRTPs), the language was changed to indicate the broader scope. In 2003, in connection with the tax shelter debate, SSTS Interpretation No. 1-2, "Tax Planning," of SSTS No. 1 (sec. 100) was issued to clarify a member's responsibilities in connection with tax planning; that interpretation became effective December 31, 2003.

When the original SSTSs were issued, an effort was made to keep to a minimum any changes in the language of the SSTSs from that of the predecessor SRTPs. This was done to alleviate concerns regarding the enforceability of standards that differed from the SRTPs under which members had been practicing. Since the issuance of the original SSTSs, members have asked for clarification on certain matters, such as the duplication of the language in SSTS No. 6, *Knowledge of Error: Return Preparation*, and No. 7, *Knowledge of Error: Administrative Proceedings*. Also, certain changes in federal and state tax laws have raised concerns regarding the need to revise SSTS No. 1 (sec. 100). As a result, in 2008, the original SSTS Nos. 1–8 (sections 100–800) were updated, effective January 1, 2010. The original SSTS Nos. 6–7 were combined into the revised SSTS No. 6, *Knowledge of Error: Return Preparation and Administrative Proceedings* (sec. 600). The original SSTS No. 8, *Form and Content of Advice to Taxpayers*, was renumbered SSTS No. 7 (sec. 700). In addition, various revisions were made to the language of the original SSTSs.

Ongoing Process

The following SSTSs and any interpretations issued thereunder reflect the AICPA's standards of tax practice and delineate members' responsibilities to taxpayers, the public, the government, and the profession. The statements are intended to be part of an ongoing process of articulating standards of tax practice for members. These standards are subject to change as necessary or appropriate to address changes in the tax law or other developments in the tax practice environment.

Members are encouraged to assess the adequacy of their practices and procedures for providing tax services in conformity with these standards. This process will vary according to the size of the practice and the nature of tax services performed.

The Tax Executive Committee promulgates the SSTSs and their interpretations. Acknowledgment is also due to the many members who have devoted their time and efforts over the years to developing and revising the AICPA's standards.

TS Section 100

Tax Return Positions

Source: SSTs No. 1

Effective date, unless
otherwise indicated:
January 2010

Introduction

.01 This statement sets forth the applicable standards for members when recommending tax return positions, or preparing or signing tax returns (including amended returns, claims for refund, and information returns) filed with any taxing authority. For purposes of these standards

- a. a *tax return position* is (i) a position reflected on a tax return on which a member has specifically advised a taxpayer or (ii) a position about which a member has knowledge of all material facts and, on the basis of those facts, has concluded whether the position is appropriate.
- b. a *taxpayer* is a client, a member's employer, or any other third-party recipient of tax services.

.02 This statement also addresses a member's obligation to advise a taxpayer of relevant tax return disclosure responsibilities and potential penalties.

.03 In addition to the AICPA, various taxing authorities, at the federal, state, and local levels, may impose specific reporting and disclosure standards with regard to recommending tax return positions or preparing or signing tax returns.¹ These standards can vary between taxing authorities and by type of tax.

Statement

.04 A member should determine and comply with the standards, if any, that are imposed by the applicable taxing authority with respect to recommending a tax return position, or preparing or signing a tax return.

.05 If the applicable taxing authority has no written standards with respect to recommending a tax return position or preparing or signing a tax return, or if its standards are lower than the standards set forth in this paragraph, the following standards will apply:

- a. A member should not recommend a tax return position or prepare or sign a tax return taking a position unless the member has a good-faith belief that the position has at least a realistic possibility of being sustained administratively or judicially on its merits if challenged.

¹ A member should refer to the current version of Internal Revenue Code Section 6694, *Understatement of taxpayer's liability by tax return preparer*, and other relevant federal, state, and jurisdictional authorities to determine the reporting and disclosure standards that are applicable to preparers of tax returns.

- b. Notwithstanding paragraph .05(a), a member may *recommend a tax return position* if the member (i) concludes that there is a reasonable basis for the position and (ii) advises the taxpayer to appropriately disclose that position. Notwithstanding paragraph .05(a), a member may *prepare or sign a tax return* that reflects a position if (i) the member concludes there is a reasonable basis for the position and (ii) the position is appropriately disclosed.

.06 When recommending a tax return position or when preparing or signing a tax return on which a position is taken, a member should, when relevant, advise the taxpayer regarding potential penalty consequences of such tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.07 A member should not recommend a tax return position or prepare or sign a tax return reflecting a position that the member knows

- a. exploits the audit selection process of a taxing authority, or
- b. serves as a mere arguing position advanced solely to obtain leverage in a negotiation with a taxing authority.

.08 When recommending a tax return position, a member has both the right and the responsibility to be an advocate for the taxpayer with respect to any position satisfying the aforementioned standards.

Explanation

.09 The AICPA and various taxing authorities impose specific reporting and disclosure standards with respect to tax return positions and preparing or signing tax returns. In a given situation, the standards, if any, imposed by the applicable taxing authority may be higher or lower than the standards set forth in paragraph .05. A member is to comply with the standards, if any, of the applicable taxing authority; if the applicable taxing authority has no standards or if its standards are lower than the standards set forth in paragraph .05, the standards set forth in paragraph .05 will apply.

.10 Our self-assessment tax system can function effectively only if taxpayers file tax returns that are true, correct, and complete. A tax return is prepared based on a taxpayer's representation of facts, and the taxpayer has the final responsibility for positions taken on the return. The standards that apply to a taxpayer may differ from those that apply to a member.

.11 In addition to a duty to the taxpayer, a member has a duty to the tax system. However, it is well established that the taxpayer has no obligation to pay more taxes than are legally owed, and a member has a duty to the taxpayer to assist in achieving that result. The standards contained in paragraphs .04–.08 recognize a member's responsibilities to both the taxpayer and the tax system.

.12 In reaching a conclusion concerning whether a given standard in paragraph .04 has been satisfied, a member may consider a well-reasoned construction of the applicable statute, well-reasoned articles or treatises, or pronouncements issued by the applicable taxing authority, regardless of whether such sources would be treated as *authority* under Internal Revenue Code Section 6662, *Imposition of accuracy-related penalty on underpayments*, and the regulations thereunder. A position would not fail to meet these standards merely because it is later abandoned for practical or procedural considerations during an administrative hearing or in the litigation process.

.13 If a member has a good-faith belief that more than one tax return position meets the standards set forth in paragraphs .04–.05, a member's advice concerning alternative acceptable positions may include a discussion of

the likelihood that each such position might or might not cause the taxpayer's tax return to be examined and whether the position would be challenged in an examination. In such circumstances, such advice is not a violation of paragraph .07.

.14 A member's determination of whether information is appropriately disclosed by the taxpayer should be based on the facts and circumstances of the particular case and the disclosure requirements of the applicable taxing authority. If a member recommending a position, but not engaged to prepare or sign the related tax return, advises the taxpayer concerning appropriate disclosure of the position, then the member shall be deemed to meet the disclosure requirements of these standards.

.15 If particular facts and circumstances lead a member to believe that a taxpayer penalty might be asserted, the member should so advise the taxpayer and should discuss with the taxpayer the opportunity, if any, to avoid such penalty by disclosing the position on the tax return. Although a member should advise the taxpayer with respect to disclosure, it is the taxpayer's responsibility to decide whether and how to disclose.

.16 For purposes of this statement, preparation of a tax return includes giving advice on events that have occurred at the time the advice is given if the advice is directly relevant to determining the existence, character, or amount of a schedule, entry, or other portion of a tax return.

TS Section 9100

Tax Return Positions: Tax Services Interpretations of Section 100

Notice to Readers

The Statements on Standards for Tax Services (SSTSs) and interpretations, promulgated by the AICPA Tax Executive Committee (TEC), reflect the AICPA's standards of tax practice and delineate members' responsibilities to taxpayers, the public, the government, and the profession. The SSTSs are intended to be part of an ongoing process that may require changes to, and interpretations of, current SSTSs in recognition of the accelerating rate of change in tax laws and the continued importance of tax practice to members. The original Interpretations No. 1-1, "Realistic Possibility of Success," and No. 1-2, "Tax Planning," were adopted in 2000 and 2003, respectively, and updated in 2010. The TEC adopted the updated Interpretations No. 1-1, "Reporting and Disclosure Standards," and No. 1-2, "Tax Planning," on August 15, 2011, effective on January 31, 2012.¹

The SSTSs have been written in as simple and objective a manner as possible. However, by their nature, ethical standards provide for an appropriate range of behavior that recognizes the need for interpretations to satisfy a broad range of personal and professional situations. The SSTSs recognize this need by, in some sections, providing relatively subjective rules and leaving certain terms undefined. These terms and concepts are generally rooted in tax concepts and, therefore, they should be readily understood by tax practitioners. It is, therefore, recognized that the enforcement of these rules, as part of the AICPA Code of Professional Conduct, Rule 201, *General Standards* (ET sec. 201 par. .01), and Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), will be undertaken with flexibility in mind and handled on a case-by-case basis. Members are expected to comply with them.

Preface

SSTS No. 1, *Tax Return Positions* (sec. 100), provides that a member should not recommend a tax return position or take a position on a tax return that the member prepares unless that position satisfies applicable reporting and disclosure standards. The tax laws of various taxing jurisdictions contain similar limitations on the ability to recommend or take certain tax return positions. This preface provides an overview of the most common tax return reporting

¹ These interpretations do not consider any impact of Section 1409 of the Health Care and Education Reconciliation Act of 2010, P.L. 111-152 (Codification of Economic Substance Doctrine and Penalties). Under Section 7701(o) of the Internal Revenue Code (IRC), in the case of any transaction to which the economic substance doctrine is relevant, the transaction shall be treated as having economic substance only if the transaction changes in a meaningful way (apart from federal income tax effects) the taxpayer's economic position, and the taxpayer has a substantial purpose (apart from federal income tax effects) for entering into such transaction. Understatements of tax attributable to a failure to satisfy the economic substance doctrine, where relevant, can result in substantial taxpayer penalties.

standards and issues to be considered in determining if the applicable reporting standards and disclosure requirements have been satisfied.

Description of Various Reporting Standards

A brief description of the most common tax return reporting standards follows.²

More likely than not. The more likely than not standard generally is satisfied if it is reasonable to conclude in good faith that there is a greater than 50 percent likelihood that the position will be upheld on its merits if it is challenged.³

Substantial authority. The substantial authority standard is an objective standard and is satisfied if the weight of the authorities supporting the position is substantial in relation to the weight of authorities supporting a contrary treatment.⁴ In practice, the substantial authority standard generally is interpreted as requiring approximately a 40 percent likelihood that the position will be upheld on its merits if it is challenged.⁵

Realistic possibility of success. The realistic possibility of success standard generally is satisfied if there is approximately a 1-in-3 (33 percent) likelihood that the position will be upheld on its merits if it is challenged.⁶

Reasonable basis. The reasonable basis standard is satisfied if the position is reasonably based on one or more authorities, taking into account the relevance and persuasiveness of those authorities. The reasonable basis standard is lower than the realistic possibility of success standard but is "significantly higher than not frivolous or not patently improper . . . [and] is not satisfied by a return position that is merely arguable or that is merely a colorable claim."⁷ In practice, the reasonable basis standard generally is interpreted as requiring that there be approximately a 20 percent likelihood that the position will be upheld on its merits if it is challenged.⁸

Nature of the Analysis

The analysis used in determining if a reporting standard has been satisfied should involve a well-reasoned application of the relevant authorities to all pertinent facts and circumstances. The weight to be given to a particular authority depends on its relevance and persuasiveness. For example, all else being

² In some cases, the taxing authority may require that more than one standard be satisfied with respect to a return position. For example, in the case of a listed transaction or other reportable transaction with a significant tax avoidance purpose, a taxpayer penalty may apply under IRC Section 6662A unless the taxpayer reasonably believed the position satisfied the more likely than not standard, and the position does or did, in fact, satisfy the substantial authority standard.

⁴ Treasury Regulation Section 1.6662-4(d).

⁵ Joint Committee on Taxation, *Study of Present-Law Penalty and Interest Provisions as Required by Section 3801 of the Internal Revenue Service Restructuring And Reform Act of 1998 (Including Provisions Relating to Corporate Tax Shelters)* (JCS-3-99) (July 22, 1999), 1:152.

⁶ Treasury Regulation Section 1.6694-2(b) (prior to the revisions made by T.D. 9436, which became effective December 22, 2008).

⁷ Treasury Regulation Section 1.6662-3(b)(3).

⁸ Joint Committee on Taxation, *supra* at 152, assigns a 20 percent likelihood of success for the reasonable basis standard.

equal, more weight is given to a case or ruling that has facts similar to those at issue than to a case or ruling that has distinguishable facts. Similarly, more weight may be given to a case or ruling that provides an analysis of the facts and law, as opposed to one that merely states a conclusion. Assuming the same or similar issues, the type of authority also is significant; for example, more weight is given to a case or revenue ruling than to a private letter ruling issued to a third party, and more weight is given to an appellate court decision than to a lower court decision. For additional examples, see Treasury Regulation Section 1.6662-4(d)(3), which deals with the analysis used to determine if the substantial authority standard is satisfied for purposes of the federal taxpayer substantial understatement penalty.⁹

Note also that what constitutes an "authority" for purposes of the analysis can vary. For example, in determining if the realistic possibility of success standard and the reasonable basis standard of paragraph 5 of SSTS No. 1 have been satisfied, a member may rely on well-reasoned treatises, articles in recognized professional tax publications, and other reference tools and sources of analysis commonly used by tax advisers and return preparers. In contrast, these authorities cannot be relied upon in determining if the substantial authority or more likely than not standards have been satisfied for purposes of Internal Revenue Code (IRC) Section 6662 (or 6694).

Appropriate Disclosure

In some instances, a member can satisfy the reporting and disclosure requirements of the applicable taxing authority or of SSTS No. 1 only if the particular tax position at issue is appropriately disclosed. The laws and regulations of the applicable taxing authority should be followed to ensure that pertinent disclosure provisions are satisfied. A member should consider all the facts and circumstances in evaluating whether a position is appropriately disclosed. SSTS No. 1 notes that, in the case of a nonsigning preparer, the adequate disclosure requirement is satisfied if the member advises the taxpayer regarding appropriate disclosure.

For purposes of the federal tax return preparer penalty provisions of IRC Section 6694(a), in general, a signing preparer satisfies the disclosure requirement if one of the following actions is taken:

1. The position is disclosed on Form 8275, "Disclosure Statement," or Form 8275-R, "Regulation Disclosure Statement," as appropriate, or in accordance with the requirements set forth in the annual revenue procedure regarding disclosure.
2. The preparer provides the taxpayer with a return that includes the appropriate disclosure.

Similarly, a nonsigning preparer who provides advice to a taxpayer satisfies the disclosure requirement for IRC Section 6694 purposes by (1) advising the taxpayer of any opportunity to avoid accuracy-related penalties that could apply with respect to the position and of the requirements for any applicable disclosure, and (2) contemporaneously documenting that advice in the files.¹⁰

⁹ Treasury Regulation Section 1.6694-2(b) incorporates this analysis in applying preparer standards for federal income tax purposes.

¹⁰ Treasury Regulation Section 1.6694-2(d)(3).

Interpretation No. 1-1, "Reporting and Disclosure Standards," of Statement on Standards for Tax Services No. 1, *Tax Return Positions*

Background

.01 SSTS No. 1 contains the standards a member should follow when recommending tax return positions or preparing or signing tax returns.

.02 A member should determine and comply with the reporting and disclosure standards, if any, that are imposed by the applicable taxing authority with respect to recommending a tax return position or preparing or signing a tax return.

If the applicable taxing authority has no written standards that apply with respect to recommending a tax return position or preparing or signing a tax return or if its standards are lower than the standards set forth in this paragraph, the following standards will apply:

- a. A member should not recommend a tax return position or prepare or sign a tax return taking a position unless the member has a good-faith belief that the position has at least a realistic possibility of being sustained administratively or judicially on its merits, if challenged (commonly referred to as the *realistic possibility of success* standard).
- b. Notwithstanding paragraph .02a, a member may *recommend a tax return position* if the member (i) concludes that there is a reasonable basis for the position, and (ii) advises the taxpayer to appropriately disclose that position. Notwithstanding paragraph .02a, a member may *prepare or sign a tax return* that reflects a position if (i) the member concludes there is a reasonable basis for the position, and (ii) the position is appropriately disclosed.

.03 Federal, state, local, and other taxing authorities may impose specific reporting and disclosure standards with respect to recommending tax return positions or preparing or signing tax returns that apply in addition to the AICPA standards. These standards vary among taxing jurisdictions and by type of tax. A member should refer to the current version of IRC Section 6694, "Understatement of Taxpayer's Liability by Tax Return Preparer," and the regulations thereunder to determine the reporting and disclosure standards applicable to preparers of federal tax returns.

.04 When recommending a tax return position, or when preparing or signing a tax return on which a position is taken, a member should, when relevant, advise the taxpayer regarding the potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.05 A member should not recommend a tax return position or prepare or sign a tax return reflecting a position that the member knows exploits the audit selection process of a taxing authority or serves as a mere arguing position advanced solely to obtain leverage in a negotiation with a taxing authority.

.06 When recommending a tax return position, a member has both the right and the responsibility to be an advocate for the taxpayer with respect to any position satisfying the aforementioned standards.

.07 A member also should consider SSTS No. 3, *Certain Procedural Aspects of Preparing Returns* (sec. 300), regarding the obligation to examine or verify certain supporting data or consider information related to another taxpayer, when preparing a taxpayer's tax return.

General Interpretation

.08 As described in the preface, the realistic possibility of success standard is a lower standard than the substantial authority standard and the more likely than not standard, but it is a higher standard than the reasonable basis standard. Therefore, if the standard of the applicable taxing authority is, for example, substantial authority, more likely than not, or some other standard that is higher than the realistic possibility of success standard, then the member should comply with that higher standard. In that case, the member is held to a standard higher than realistic possibility of success.

If the standard of the applicable taxing authority is lower than the realistic possibility of success standard, then the member should comply with the realistic possibility of success standard, which is reflected in paragraph .02a of this interpretation, or the reasonable basis standard with appropriate disclosure, which is reflected in paragraph .02b of this interpretation.

For purposes of this interpretation, the reporting and disclosure standards that apply in a given situation in accordance with SSTS No. 1 and this interpretation will be referred to as the *required reporting and disclosure standards*.

.09 A member should determine and comply with the rules of the applicable taxing authority regarding reliance on authorities (cases, rulings, regulations, treatises, and so forth). However, notwithstanding the rules of the applicable taxing authority, in determining whether a tax return position satisfies the realistic possibility of success standard or the reasonable basis standard with appropriate disclosure for purposes of paragraph .02a–b of this interpretation, a member may rely on authorities in addition to those evaluated when determining whether substantial authority exists for a return position or whether a position is more likely than not to prevail under IRC Section 6662. For purposes of paragraph .02a–b of this interpretation, a member may rely on well-reasoned treatises, articles in recognized professional tax publications, and other reference tools and sources of tax analyses commonly used by tax advisers and preparers of returns. A member should exercise caution in relying on materials, such as treatises, that may not be accepted as authorities in all situations, such as under federal tax law.

.10 If particular facts and circumstances lead a member to believe that a taxpayer penalty could be asserted, then the member should so advise the taxpayer and should discuss with the taxpayer the opportunity, if any, to avoid such penalty by disclosing the position on the tax return. Although a member should so advise the taxpayer with respect to disclosure, it is the taxpayer's responsibility to decide whether and how to disclose.

.11 In determining if the required reporting and disclosure standards have been satisfied, a member should do all of the following:

- Establish the relevant background facts.
- Consider the reasonableness of the assumptions and representations.
- Consider applicable regulations and standards regarding reliance on information and advice received from a third party.

- Apply the pertinent authorities to the relevant facts.
- Consider the business purpose and economic substance of the transaction, if relevant to the tax consequences of the transaction. (Mere reliance on a representation that there is a business purpose or economic substance generally is insufficient.)
- Consider whether the issue involves a listed transaction or a reportable transaction (or their equivalents) as defined by the applicable taxing authority.¹¹
- Arrive at a conclusion supported by the authorities.

.12 A member should consider the weight of each authority to determine whether the required reporting and disclosure standards have been satisfied. In determining the weight of an authority, a member should consider its source, relevance, and persuasiveness. Therefore, the type of authority is a significant factor. Other important factors include whether the facts stated by the authority are distinguishable from those of the taxpayer's situation and whether the authority contains an analysis of the issue or merely states a conclusion.

.13 A standard may be satisfied despite the absence of certain types of authority. For example, a member may conclude that the substantial authority standard has been satisfied when the position is supported only by a well-reasoned construction of the applicable statutory provision.

.14 In determining whether the required reporting and disclosure standards have been satisfied, the extent of research required is left to the professional judgment of the member, given the facts and circumstances known to the member. A member may conclude that more than one position satisfies a given reporting standard, such as the substantial authority standard.

Specific Illustrations

.15 The following illustrations address general fact patterns only. Accordingly, the application of guidance, as discussed in the previous section, "General Interpretation," to variations in such general fact patterns or to particular facts or circumstances may lead to different conclusions. In each illustration, no authority exists other than that which is indicated. A decision regarding what are the required reporting and disclosure standards for tax return positions should be consistent with the provisions of SSTS No. 1, as explained in the previous section, "Background."

Determination of the Standards

.16 *Illustration 1.* A member is preparing a U.S. income tax return at a time when the federal reporting standard is substantial authority for undisclosed positions and reasonable basis for disclosed positions.¹² One of the issues the member needs to address in preparing the return is the deductibility of a particular expenditure.

.17 *Conclusion.* The federal standard of substantial authority is higher than the realistic possibility of success standard; therefore, the member is required to comply with the federal standard of substantial authority for undisclosed positions on the return. If the member analyzes the law and applicable authorities regarding whether the expenditure is deductible and concludes that

¹¹ See, for example, Treasury Regulation Section 1.6011-4(b).

¹² See the preface for a description of the various reporting standards.

there is not substantial authority to support taking a deduction for the expenditure, the member should not prepare the return taking the deduction as an undisclosed position.

If the member concludes that there is sufficient authority to provide a reasonable basis for claiming the deduction, the member may prepare the return claiming the deduction if that position is appropriately disclosed.

.18 *Illustration 2.* A member is preparing a state inheritance tax return and needs to address the deductibility of a particular expenditure. The state does not have specific tax return reporting standards that apply.

.19 *Conclusion.* Because the applicable taxing authority (the state) does not have written tax return reporting standards that apply, the realistic possibility of success standard for an undisclosed position and the reasonable basis standard for an appropriately disclosed position apply. The member can prepare the return claiming the deduction if either of these is satisfied.

.20 *Illustration 3.* A taxpayer wants to take a position that a member has determined does not satisfy the reasonable basis standard. The taxpayer maintains that even if the taxing authority examines the return, the issue will not be raised.

.21 *Conclusion.* The member should not consider the likelihood of the issue being raised on examination when determining whether any reporting or disclosure standard has been satisfied. The member should not prepare or sign a return that contains a position that does not satisfy the reasonable basis standard, even if the position is disclosed.

.22 *Illustration 4.* A taxpayer wants to take a position on a federal tax return without disclosure; the member concludes that the position satisfies the substantial authority standard provided an assumption regarding an underlying nontax legal issue is appropriate. The member recommends that the taxpayer seek advice from its legal counsel, and the taxpayer's attorney gives an opinion on the nontax legal issue that is consistent with the assumption.

.23 *Conclusion.* A member may, in general, rely on a legal opinion on a nontax legal issue. A member should use professional judgment when relying on a legal opinion. If, on its face, the opinion of the taxpayer's attorney appears to be unreasonable, unsubstantiated, or unwarranted, the member, with appropriate consents from the taxpayer, should consult the member's attorney before relying on the opinion. A member should also refer to the illustrations in Interpretation No. 1-2, "Tax Planning," of SSTS No. 1 (sec. 9100 par. .50-.99), regarding the circumstances in which it is appropriate to rely on an opinion of legal counsel.

.24 *Illustration 5.* A taxpayer has obtained from its attorney an opinion on the tax treatment of an item and requests that a member rely on the opinion.

.25 *Conclusion.* If a member is satisfied about the source (for example, the knowledge and expertise of the issuer), relevance, and persuasiveness of the legal opinion, then the member may rely on that opinion when determining whether the required reporting and disclosure standards have been satisfied. The member should also refer to the illustrations in Interpretation No. 1-2 of SSTS No. 1 regarding the circumstances in which it is appropriate to rely on an opinion of legal counsel.

Application of the Taxing Authority's Standards

.26 As noted previously, SSTS No. 1 requires a member to determine and comply with the required reporting and disclosure standards, if any, that are imposed by the applicable taxing authority with respect to recommending a tax return position or preparing or signing a tax return. These standards, and the

methods in which they are to be applied, vary among taxing authorities based on the laws and regulations of the relevant jurisdictions; therefore, illustrating all specific taxing authority standards is beyond the scope of this interpretation. To assist members in their analysis of whether the standards of an applicable taxing authority have been satisfied, the preface contains a description of the most common tax return reporting standards, the nature of the analysis to be applied, and the common requirements for appropriate disclosure.

Application of the Realistic Possibility of Success and the Reasonable Basis Standards

.27 If the applicable taxing authority has no written tax return reporting or disclosure standards that apply or if its standards are lower than the realistic possibility of success standard for undisclosed positions or the reasonable basis standard for appropriately disclosed positions, SSTS No. 1 requires a member to comply with these latter standards, as stated in paragraph .02a–b of this interpretation.

The following illustrations pertain to situations in which a member is required to comply with these standards because the applicable taxing authority either has no written standards that apply or has standards that are lower than those described in paragraph .02a–b of this interpretation.

.28 Illustration 6. A taxpayer has engaged in a transaction that is adversely affected by a new statutory provision. Prior law supports a position favorable to the taxpayer. The taxpayer believes, and the member concurs, that the new statute is inequitable as applied to the taxpayer's situation. The statute is constitutional, clearly drafted, and unambiguous. The legislative history discussing the new statute contains general comments that do not specifically address the taxpayer's situation.

.29 Conclusion. The member cannot recommend the return position that is contrary to the new statute. A position contrary to a constitutional, clear, and unambiguous statute would ordinarily be considered a frivolous position and, even if appropriately disclosed, would not satisfy the reasonable basis standard.

.30 Illustration 7. The facts are the same as in illustration 6 except that the legislative history discussing the new statute specifically addresses the taxpayer's situation and supports a position favorable to the taxpayer.

.31 Conclusion. In a case in which the statute is clearly and unambiguously against the taxpayer's position but a contrary position exists based on legislative history specifically addressing the taxpayer's situation, a return position based either on the statutory language or on the legislative history satisfies the realistic possibility of success standard. (It also may satisfy the substantial authority standard.) A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.32 Illustration 8. The facts are the same as in illustration 6 except that the legislative history can be interpreted to provide some evidence or authority in support of the taxpayer's position; however, the legislative history does not specifically address the taxpayer's situation.

.33 Conclusion. In a case in which the statute is clear and unambiguous, a contrary position based on an interpretation of the legislative history that does not explicitly address the taxpayer's situation does not satisfy the realistic possibility of success standard. However, because the legislative history

provides some support or evidence for the taxpayer's position, a member may recommend the position to the taxpayer if the member determines that there is a reasonable basis for the position and advises the taxpayer to appropriately disclose the position. Also, a member may prepare a return for the taxpayer taking such a position if the member determines that there is a reasonable basis for the position, and the position is appropriately disclosed. A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.34 Illustration 9. A taxpayer is faced with an issue involving the interpretation of a new statute. Following its passage, the statute was widely recognized to contain a drafting error, and a technical correction proposal has been introduced. The taxing authority issues a pronouncement indicating how it will administer the provision. The pronouncement interprets the statute in accordance with the proposed technical correction.

.35 Conclusion. A return position based on either the existing statutory language or the taxing authority's pronouncement satisfies the realistic possibility of success standard. (It also may satisfy the substantial authority standard.) A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.36 Illustration 10. The facts are the same as in illustration 9 except that no taxing authority pronouncement has been issued.

.37 Conclusion. In the absence of a taxing authority pronouncement interpreting the statute in accordance with the proposed technical correction, only a return position based on the existing statutory language will satisfy the realistic possibility of success standard. A member may recommend the position to the taxpayer if, based on the facts and circumstances, the member determines that a reasonable basis exists for the position and advises the taxpayer to appropriately disclose the position. Also, a member may prepare a return for the taxpayer taking such a position if, based on the facts and circumstances, the member determines that there is a reasonable basis for the position, and the position is appropriately disclosed. A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.38 Illustration 11. A taxpayer is seeking advice from a member regarding a recently amended statute. The member has reviewed the statute, the legislative history that specifically addresses the issue, and a recently published notice issued by the taxing authority. No cases, rulings, or other pronouncements exist regarding the statute. The member has concluded in good faith that, based on the statute and the legislative history, the taxing authority's position as stated in the notice does not reflect legislative intent.

.39 Conclusion. A return position supported by the statute and the legislative history satisfies the realistic possibility of success standard. (It also may satisfy the substantial authority standard.) A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.40 Illustration 12. The facts are the same as in illustration 11 except that the taxing authority's pronouncement is a temporary regulation.

.41 Conclusion. In determining whether a tax return position satisfies the realistic possibility of success standard, a member should determine the weight to be given the temporary regulation by analyzing factors, such as whether the

regulation is legislative or interpretative and if it is consistent with the statute. If the member concludes that the position does not satisfy the realistic possibility of success standard, the member may still recommend the position if the member determines that it satisfies the reasonable basis standard, and the member advises the taxpayer to appropriately disclose the position. The member may prepare a return for the taxpayer taking that position if the member determines that the position satisfies the reasonable basis standard, and the position is adequately disclosed. A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.42 Illustration 13. A statute is passed requiring the capitalization of certain expenditures. The taxpayer believes, and the member concurs, that to comply fully, the taxpayer will have to acquire new computer hardware and software and implement a number of new accounting procedures. The taxpayer and member agree that the costs of full compliance will be significantly greater than the resulting increase in tax due under the new provision. Because of these cost considerations, the taxpayer makes no effort to comply. The taxpayer wants the member to prepare and sign a return on which the new requirement is simply ignored.

.43 Conclusion. The return position desired by the taxpayer is frivolous, a standard below reasonable basis. The member should not prepare or sign the return.

.44 Illustration 14. The facts are the same as in illustration 13 except that the taxpayer has made a good-faith effort to comply with the law by calculating an estimate of expenditures to be capitalized under the new provision.

.45 Conclusion. In this situation, assuming the taxpayer complied with the statutory and regulatory provisions classifying expenditures to be capitalized and those to be expensed and made a good-faith effort to determine the appropriate amounts to be capitalized and expensed, the realistic possibility of success standard would be satisfied for the return positions. (The substantial authority standard also may be satisfied.) When using estimates in the preparation of a return, a member should refer to SSTS No. 4, *Use of Estimates* (sec. 400). A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.46 Illustration 15. On a given issue, a member has located and weighed two authorities concerning the treatment of a particular expenditure. The taxing authority has issued an administrative ruling that requires the expenditure to be capitalized and amortized over several years. On the other hand, a court opinion permits the current deduction of the expenditure. The member has concluded that these are the relevant authorities, considered the source of both authorities, and concluded that both are persuasive and relevant.

.47 Conclusion. The realistic possibility of success standard is met by either position. (Either or both also may satisfy the substantial authority standard.) A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

.48 Illustration 16. A tax statute is silent on the treatment of an item. However, the legislative history explaining the statute directs the taxing authority to issue regulations that will require a specific treatment of the item. No regulations have been issued at the time the member must recommend a position on the tax treatment of the item.

.49 Conclusion. The position supported by the legislative history satisfies the realistic possibility of success standard. A member should, when relevant, advise the taxpayer regarding potential penalty consequences of the tax return position and the opportunity, if any, to avoid such penalties through disclosure.

Interpretation No. 1-2, "Tax Planning," of Statement on Standards for Tax Services No. 1, *Tax Return Positions*

Background

.50 SSTs are enforceable standards that govern the conduct of AICPA members in tax practice. A significant area of many members' tax practices involves assisting taxpayers in tax planning. Two of the seven SSTs issued as of the date of this interpretation's release (that is, the revised SSTs that became effective on January 1, 2010) directly set forth standards that affect the most common activities in tax planning. Several other SSTs set forth standards related to specific factual situations that may arise while a member is assisting a taxpayer in tax planning. The two SSTs that are most typically relevant to tax planning are SSTs No. 1, including Interpretation No. 1-1, "Reporting and Disclosure Standards," of SSTs No. 1 (sec. 9100 par. .01–.49), and SSTs No. 7, *Form and Content of Advice to Taxpayers* (sec. 700).

.51 Taxing authorities, courts, the AICPA, and other professional organizations have struggled with defining and regulating *tax shelters* and *abusive transactions*. Crucial to the debate is the difficulty of clearly distinguishing between transactions that are abusive and transactions that are aggressive and legitimate. At the same time, it must be recognized that taxpayers have a legitimate interest in arranging their affairs so that they pay no more than the taxes they owe. Tax professionals, including AICPA members, have a role to play in advancing these efforts.

.52 This interpretation is part of the AICPA's continuing efforts at self-regulation of its members in tax practice. It has its origins in the AICPA's desire to provide adequate guidance to its members with respect to providing services in connection with tax planning. This interpretation does not change or elevate any level of conduct prescribed by any standard. Its goal is to clarify existing standards, recognizing the compelling need for a comprehensive interpretation of a member's responsibilities in connection with *tax planning*. This guidance is intended to clarify how those standards would apply across the spectrum of tax planning, including those situations involving *tax shelters*, regardless of how that term is defined.

General Interpretation

.53 *Tax planning* encompasses a wide variety of situations. It includes situations in which the member provides advice on prospective or completed transactions, whether or not the advice reflects favorable or unfavorable treatment to the taxpayer. When providing professional services that include tax planning, a member should determine and comply with any applicable standards for reporting and disclosing tax return positions or for providing written tax advice. See SSTs No. 1 and Interpretation No. 1-1; SSTs No. 7; U.S. Treasury Department Circular 230, *Regulations Governing the Practice of Attorneys, Certified Public Accountants, Enrolled Agents, Enrolled Actuaries, Enrolled Retirement Plan Agents, and Appraisers before the Internal Revenue Service*,¹³ and

¹³ Title 31, *Money and Finance: Treasury* of U.S. Code of Federal Regulations.

any other standards that may apply. A member may still recommend a position that does not satisfy the realistic possibility standard if (a) a reasonable basis exists for the position, (b) the member recommends appropriate disclosure, and (c) a higher standard is not required under applicable taxing authority rules. For purposes of this interpretation, the reporting and disclosure standards that apply in a given situation in accordance with SSTS No. 1 and Interpretation No. 1-1 will be referred to as the *required reporting and disclosure standards*.

.54 For purposes of this interpretation, *tax planning* includes, both with respect to prospective and completed transactions, recommending or expressing an opinion (whether written or oral) on (a) a tax return position or (b) a specific tax plan developed by the member, the taxpayer, or a third party. For tax planning with respect to a completed transaction, the member may be considered a nonsigning tax return preparer with respect to the items for which the tax planning is undertaken that subsequently are reflected on the taxpayer's tax return. The member should comply with tax return preparer standards promulgated by the applicable taxing authority.

.55 When issuing an opinion to reflect the results of the tax planning service, a member should do all of the following:

- Establish the relevant background facts.
- Consider the reasonableness of the assumptions and representations.
- Consider applicable regulations and standards regarding reliance on information and advice received from a third party.
- Apply the pertinent authorities to the relevant facts.
- Consider the business purpose and economic substance of the transaction, if relevant to the tax consequences of the transaction. (Mere reliance on a representation that there is a business purpose or economic substance generally is insufficient.)
- Consider whether the issue involves a *listed transaction* or a *reportable transaction* (or their equivalents) as defined by the applicable taxing authority.¹⁴
- Consider other regulations and standards applicable to written tax advice promulgated by the applicable taxing authority.
- Arrive at a conclusion supported by the authorities.

The member also should consider SSTS No. 1, SSTS No. 7, Treasury Department Circular 230, and any other standards that may apply.

.56 In assisting a taxpayer in a tax planning transaction in which the taxpayer has obtained an opinion from a third party and is looking to the member for an evaluation of the opinion, the member should be satisfied about the source (for example, the knowledge and expertise of the issuer), relevance, and persuasiveness of the opinion, which would include considering whether the opinion indicates the third party did all of the following:

- Established the relevant background facts.
- Considered the reasonableness of the assumptions and representations.
- Considered applicable regulations and standards.

¹⁴ See, for example, Treasury Regulation Section 1.6011-4(b).

- Applied the pertinent authorities to the relevant facts.
- Considered the business purpose and economic substance of the transaction, if relevant to the tax consequences of the transaction. (Mere reliance on a representation that a business purpose or economic substance exists generally is insufficient.)
- Considered whether the issue involves a listed transaction or a reportable transaction (or their equivalents) as defined by the applicable taxing authority.¹⁵
- Arrived at a conclusion supported by the authorities.

.57 In conducting the due diligence necessary to establish the relevant background facts, the member should consider whether it is appropriate to rely on an assumption concerning facts in lieu of either (a) other procedures to support the advice, or (b) a representation from the taxpayer or another person. A member should also consider whether the member's tax advice might be communicated to third parties, particularly if those third parties may not be knowledgeable or may not be receiving independent tax advice with respect to a transaction.

.58 In tax planning, members often rely on assumptions and representations. Although such reliance is often necessary, the member should take care to assess whether such assumptions and representations are reasonable. In deciding whether an assumption or representation is reasonable, the member should consider its source (for example, the knowledge and expertise of the issuer), and consistency with other information known to the member. For example, depending on the circumstances, it may be reasonable for a member to rely on a representation made by the taxpayer but not on a representation made by a person who is selling, or otherwise promoting, the transaction to the taxpayer.

.59 When engaged in tax planning, the member should understand the business purpose and economic substance of the transaction when relevant to the tax consequences. If a transaction has been proposed by a party other than the taxpayer, the member should consider whether the assumptions made by the third party are consistent with the facts of the taxpayer's situation. If written advice is to be rendered concerning a transaction, the business purpose for the transaction generally should be described. If the business reasons are relevant to the tax consequences, it is not sufficient to assume merely that a transaction is entered into for valid business reasons without specifying what those reasons are. Similarly, if economic substance is relevant to the tax consequences, it is insufficient to assume merely that a transaction has economic substance without specifying the basis for making that determination. In providing written advice on these issues, the member should consider the written advice regulations and standards, if any, promulgated by the applicable taxing authority. The member also should consider SSTS No. 1, SSTS No. 7, Treasury Department Circular 230, and any other standards that may apply.

.60 The scope of the engagement should be appropriately determined, and the member should consider the necessity for an engagement letter. The member should be diligent in applying such procedures as are appropriate under the circumstances to understand and evaluate the entire transaction. The specific procedures to be performed in this regard will vary with the circumstances and the scope of the engagement.

¹⁵ See footnote 2.

Specific Illustrations

.61 The following illustrations address general fact patterns. Accordingly, the application of the guidance that is discussed in the previous section, "General Interpretation," to variations in such general fact patterns or to particular facts or circumstances, may lead to different conclusions. In each illustration, no authority exists other than that which is indicated.

.62 *Illustration 1.* The relevant tax code imposes penalties on taxpayers for substantial underpayments that are not associated with *tax shelters* as defined in such code, unless the positions resulting in the underpayments are supported by substantial authority.

.63 *Conclusion.* In assisting the taxpayer in tax planning in which any associated underpayment would be considered substantial, the member should inform the taxpayer of the penalty risks associated with the tax return position recommended with respect to any plan under consideration if that position does not satisfy the substantial authority standard. The member also should inform the taxpayer of the opportunities, if any, to avoid such penalties through appropriate disclosure. In such a situation, applicable standards may prohibit the member from preparing the tax return without appropriate disclosure.

.64 *Illustration 2.* The relevant tax code imposes penalties on taxpayers for underpayments attributable to *tax shelters* as defined in such code unless the taxpayer concludes that a position taken on a tax return associated with such a tax shelter is more likely than not the correct position.

.65 *Conclusion.* In assisting the taxpayer in tax planning, the member should inform the taxpayer of the penalty risks associated with the tax return position recommended with respect to any plan under consideration if that position satisfies the substantial authority standard but does not satisfy the more likely than not standard. This would also include advice regarding whether penalties can be avoided through disclosure by the taxpayer.¹⁶ In such a situation, applicable standards may prohibit the member from preparing the tax return without appropriate disclosure.

.66 *Illustration 3.* The relevant tax code imposes penalties on tax return preparers advising on return positions attributable to potentially abusive arrangements that are designated as listed transactions or reportable transactions with a significant purpose of avoidance or evasion of income tax, if there is a related understatement of income tax. The penalty does not apply if the preparer concludes that the position is more likely than not the correct position. The member advising the taxpayer in planning a transaction is later retained to prepare and sign the taxpayer's income tax return for the period that includes the taxpayer's participation in the transaction.

.67 *Conclusion.* A member engaged to prepare a return reflecting a transaction that the member assisted in planning should reevaluate the need to satisfy the more likely than not standard to avoid penalties (including potential sanction or discipline) as a preparer and whether potential penalties may be avoided through appropriate disclosure. The member also should consider whether a separate disclosure is required to avoid penalties under other statutory provisions (in addition to penalties applicable to understatement of tax). The member should inform the taxpayer of the taxpayer's penalty risks, as described in illustrations 1 and 2 of this interpretation. The member also should consider SSTS No. 1 and Interpretation No. 1-1.

¹⁶ The IRC Section 6662 substantial understatement penalty cannot be avoided by disclosure in the context of a tax shelter.

.68 Illustration 4. The relevant tax regulation provides that the details of (or certain information regarding) a specific transaction are required to be attached to the tax return, regardless of the level of authority supporting the associated tax return position (for example, even if there is substantial authority or a higher level of confidence for the position). While preparing the taxpayer's return for the year, the member is aware that an attachment is required.

.69 Conclusion. In general, if the taxpayer agrees to include the attachment required by the regulation, the member may sign the return if the member concludes the associated tax return position satisfies the required reporting and disclosure standards. However, if the taxpayer refuses to include the attachment, the member should not sign the return unless the member concludes the associated tax return position satisfies the required reporting and disclosure standards, and reasonable grounds exist for the taxpayer's position with respect to the attachment. In this regard, the member should consider SSTS No. 2, *Answers to Questions on Returns* (sec. 200), which provides that the term *questions*, as used in the standard, "includes requests for information on the return, in the instructions, or in the regulations, whether or not stated in the form of a question," and that a "member should not omit an answer merely because it might prove disadvantageous to a taxpayer." The member also should consider SSTS No. 1 and Interpretation No. 1-1.

.70 Illustration 5. The relevant tax regulations provide that the details of certain potentially abusive transactions that are designated as listed transactions are required to be disclosed in attachments to tax returns (enhanced disclosure), regardless of the support for the associated tax return position (for example, even if the applicable taxing authority's standard is satisfied). Under the regulations, if the enhanced disclosure requirements for a listed transaction are not satisfied, the taxpayer will have additional penalty risks, including the possibility of a nonrescindable penalty. While researching the tax consequences of a proposed transaction, a member concludes that the transaction is a listed transaction.

.71 Conclusion. Notwithstanding the member's conclusion that the transaction is a listed transaction, the member may still recommend a tax return position with respect to the transaction if he or she concludes that the position satisfies the required reporting and disclosure standards (other than the enhanced disclosure). However, the member should inform the taxpayer of the enhanced disclosure requirements of listed transactions and the additional penalty risks for noncompliance, including the potential for enhanced or nonrescindable penalties or both.

.72 Illustration 6. The same regulations apply as in illustration 5. The member first becomes aware that a taxpayer entered into a transaction while preparing the taxpayer's return for the year of the transaction. While researching the tax consequences of the transaction, the member concludes that the taxpayer's transaction is a listed transaction.

.73 Conclusion. The member should inform the taxpayer of the enhanced disclosure requirements and the additional penalty risks for noncompliance. If the taxpayer agrees to make the enhanced disclosure required by the regulation, the member may sign the return if the member concludes the associated tax return position also satisfies the required reporting and disclosure standards. The member should not sign the return if the enhanced disclosure requirements are not satisfied. If the member is a nonsigning preparer of the return, the member should recommend that the taxpayer comply with the enhanced disclosure requirements regarding the transaction.

.74 Illustration 7. The same regulations apply as in illustration 5. The member first becomes aware that a taxpayer entered into a transaction while preparing the taxpayer's return for the year of the transaction. While researching the tax consequences of the transaction, the member concludes that there is uncertainty about whether the taxpayer's transaction is a listed transaction.

.75 Conclusion. The member should inform the taxpayer of the enhanced disclosure requirements and the additional penalty risks for noncompliance. If the taxpayer agrees to make the enhanced disclosure required by the relevant regulations, the member may sign the return if the member concludes the associated tax return position also satisfies the required reporting and disclosure standards. If the taxpayer does not want to provide the enhanced disclosure of the transaction because of the uncertainty about whether it is a listed transaction, the member may sign the return if the member concludes the associated tax return position satisfies the required reporting and disclosure standards (other than the enhanced disclosure requirements), and reasonable grounds exist for the taxpayer's position with regard to not providing enhanced disclosure of the transaction. In this regard, the member should consider SSTS No. 2, which indicates that the degree of uncertainty regarding the meaning of a question on a return may affect whether reasonable grounds exist for not responding to the question.

.76 Illustration 8. A member advises a taxpayer concerning the tax consequences of a proposed transaction involving a loan from a U.S. bank. In the process of reviewing documents associated with the proposed transaction, the member uncovers a reference to a deposit the taxpayer will make with an overseas branch of the U.S. bank. The transaction documents appear to indicate that this deposit is linked to the U.S. bank's issuance of the loan.

.77 Conclusion. The member should consider the effect, if any, of the deposit in advising the taxpayer about the tax consequences of the proposed transaction and with respect to other tax compliance matters reasonably likely to be at issue (for example, foreign bank account reporting).

.78 Illustration 9. Under the relevant tax law, the tax consequences of a leasing transaction depend on whether the property to be leased is reasonably expected to have a residual value of 15 percent of its value at the beginning of the lease. The member has relied on a taxpayer's instruction to use a particular assumption concerning the residual value.

.79 Conclusion. Such reliance on the taxpayer's instructions may be appropriate if the assumption is supported by the expertise of the taxpayer, by the member's review of information provided by the taxpayer or a third party, or through the member's own knowledge or analysis.

.80 Illustration 10. A member is assisting a taxpayer with evaluating a proposed equipment leasing transaction in which the estimated residual value of the equipment at the end of the lease term is critical to the tax consequences of the lease. The broker arranging the leasing transaction has prepared an analysis that sets out an explicit assumption concerning the equipment's estimated residual value.

.81 Conclusion. The member should consider whether it is appropriate to rely on the broker's assumption concerning the estimated residual value of the equipment instead of obtaining a representation from the broker concerning estimated residual value or performing other procedures to validate the amount to be used as an estimate of residual value in connection with the member's advice. In evaluating the appropriateness of the broker's assumption, the member should consider, for example, factors such as the broker's experience in the area,

the broker's methodology, and whether alternative sources of information are reasonably available.

.82 Illustration 11. The tax consequences of a particular reorganization depend, in part, on the majority shareholder of a corporation not disposing of stock received in the reorganization in a manner that would prevent the transaction from qualifying as a reorganization.

.83 Conclusion. The member should consider whether it is appropriate in rendering tax advice to assume that such a disposition will not occur or whether, under the circumstances, it is appropriate to request written representations regarding the intent of the shareholder and any other parties to the reorganization concerning this requirement, as a condition to issuing an opinion on the reorganization.

.84 Illustration 12. A taxpayer is considering a proposed transaction. The taxpayer and the taxpayer's attorney advise the member that the member is responsible for advising the taxpayer on the tax consequences of the transaction.

.85 Conclusion. In addition to complying with the requirements of paragraph .55 of this interpretation, the member generally should review all relevant draft transaction documents in formulating the member's tax advice relating to the transaction.

.86 Illustration 13. A member is responsible for advising a taxpayer on the tax consequences of the taxpayer's estate plan.

.87 Conclusion. Under the circumstances, the member should review the will and all other relevant documents to assess whether there appear to be any tax issues raised by the formulation or implementation of the estate plan.

.88 Illustration 14. A member is assisting a taxpayer in connection with a proposed transaction that has been recommended by an investment bank. To support its recommendation, the investment bank offers a law firm's opinion on the tax consequences. The member reads the opinion and notes that it is based on a hypothetical statement of facts rather than the taxpayer's facts.

.89 Conclusion. The member may rely on the law firm's opinion when determining whether the required reporting and disclosure standards have been satisfied with respect to the tax consequences of the hypothetical transaction if the member is satisfied about the source (for example, the knowledge and expertise of the issuer), relevance, and persuasiveness of the opinion. However, the member should be diligent in taking such steps as are appropriate under the circumstances to understand and evaluate the transaction as it applies to the taxpayer's specific situation. See paragraph .56 of this interpretation.

.90 Illustration 15. A member is assisting a taxpayer in connection with a proposed transaction that has been recommended by an investment bank. To support that recommendation, the investment bank offers a law firm's opinion about the tax consequences. The member reads the opinion and notes that unlike the opinion described in illustration 14, it is carefully tailored to the taxpayer's facts.

.91 Conclusion. The member may rely on the opinion when determining whether the required reporting and disclosure standards have been satisfied with respect to the taxpayer's participation in the transaction if the member is satisfied about the source (for example, the knowledge and expertise of the issuer), relevance, and persuasiveness of the opinion. In making that determination, the member should consider whether the opinion indicates the law firm performed the steps listed in paragraph .56 of this interpretation.

.92 Illustration 16. A member is assisting a taxpayer with year-end planning in connection with the taxpayer's proposed contribution of stock in a closely held corporation to a charitable organization. The taxpayer instructs the member to calculate the anticipated tax savings assuming a contribution of 500 shares to a tax-exempt organization and assuming the stock has a fair market value of \$100 per share. The member is aware that on the taxpayer's gift tax returns for the prior year, the taxpayer reported that her stock in the corporation, gifted to her daughter, was worth \$50 per share.

.93 Conclusion. The member's calculation of the anticipated tax savings is subject to the general interpretations described in paragraphs .57 and .58 of this interpretation. Accordingly, even though this potentially may be a case in which the value of the stock substantially appreciated during the year, the member should consider the reasonableness of the assumption and consistency with other information known to the member in connection with preparing the projection. The member should consider whether to document discussions concerning the increase in value of the stock with the taxpayer. The member also should consider the applicability of the SSTs.

.94 Illustration 17. The tax consequences to Target Corporation's shareholders of an acquisition turn, in part, on Acquiring Corporation's continuance of the trade or business of Target Corporation for some time after the acquisition. The member is preparing a tax opinion addressed to Target's shareholders. The opinion is based on a written representation from Acquiring Corporation that Acquiring Corporation will continue Target's business for two years following the acquisition.

.95 Conclusion. In conducting the due diligence necessary to establish the relevant background facts, the member should consider the reasonableness of the representation before determining that it is appropriate to rely on the representation from Acquiring Corporation.

.96 Illustration 18. The member receives a telephone call from a taxpayer who is the sole shareholder of a corporation. The taxpayer indicates that he is thinking about exchanging his stock in the corporation for stock in a publicly traded business. During the call, the member explains how the transaction could be structured so it will qualify as a tax-free acquisition.

.97 Conclusion. Although oral advice may serve a taxpayer's needs appropriately in routine matters or in well-defined areas, written communications are recommended in important, unusual, substantial dollar-value, or complicated transactions. The member should use professional judgment about the need to document oral advice. (See SSTs No. 7.)

.98 Illustration 19. The member receives a telephone call from a taxpayer who wants to know whether he or she should lease or purchase a car. During the call, the member explains how the arrangement should be structured so that it helps achieve the taxpayer's objectives.

.99 Conclusion. In this situation, the member's response is in conformity with this interpretation in view of the routine nature of the inquiry and the well-defined tax issues. However, the member should evaluate whether other considerations, such as avoiding misunderstanding with the taxpayer, suggest that the conversation should be documented.

TS Section 200

Answers to Questions on Returns

Source: SSTS No. 2

Effective date, unless
otherwise indicated:
January 2010

Introduction

.01 This statement sets forth the applicable standards for members when signing the preparer's declaration on a tax return if one or more questions on the return have not been answered. The term *questions* includes requests for information on the return, in the instructions, or in the regulations, whether or not stated in the form of a question.

Statement

.02 A member should make a reasonable effort to obtain from the taxpayer the information necessary to provide appropriate answers to all questions on a tax return before signing as preparer.

Explanation

.03 It is recognized that the questions on tax returns are not of uniform importance, and often they are not applicable to the particular taxpayer. Nevertheless, there are at least three reasons why a member should be satisfied that a reasonable effort has been made to obtain information to provide appropriate answers to the questions on the return that are applicable to a taxpayer:

- a. A question may be of importance in determining taxable income or loss, or the tax liability shown on the return, in which circumstance an omission may detract from the quality of the return.
- b. A request for information may require a disclosure necessary for a complete return or to avoid penalties.
- c. A member often must sign a preparer's declaration stating that the return is true, correct, and complete.

.04 Reasonable grounds may exist for omitting an answer to a question applicable to a taxpayer. For example, reasonable grounds may include the following:

- a. The information is not readily available and the answer is not significant in terms of taxable income or loss, or the tax liability shown on the return.
- b. Genuine uncertainty exists regarding the meaning of the question in relation to the particular return.
- c. The answer to the question is voluminous; in such cases, a statement should be made on the return that the data will be supplied upon examination.

.05 A member should not omit an answer merely because it might prove disadvantageous to a taxpayer.

.06 A member should consider whether the omission of an answer to a question may cause the return to be deemed incomplete or result in penalties.

.07 If reasonable grounds exist for omission of an answer to an applicable question, a taxpayer is not required to provide on the return an explanation of the reason for the omission.

TS Section 300***Certain Procedural Aspects of
Preparing Returns*****Source: SSTS No. 3****Effective date, unless
otherwise indicated:
January 2010****Introduction**

.01 This statement sets forth the applicable standards for members concerning the obligation to examine or verify certain supporting data or to consider information related to another taxpayer when preparing a taxpayer's tax return.

Statement

.02 In preparing or signing a return, a member may in good faith rely, without verification, on information furnished by the taxpayer or by third parties. However, a member should not ignore the implications of information furnished and should make reasonable inquiries if the information furnished appears to be incorrect, incomplete, or inconsistent either on its face or on the basis of other facts known to the member. Further, a member should refer to the taxpayer's returns for one or more prior years whenever feasible.

.03 If the tax law or regulations impose a condition with respect to deductibility or other tax treatment of an item, such as taxpayer maintenance of books and records or substantiating documentation to support the reported deduction or tax treatment, a member should make appropriate inquiries to determine to the member's satisfaction whether such condition has been met.

.04 When preparing a tax return, a member should consider information actually known to that member from the tax return of another taxpayer if the information is relevant to that tax return and its consideration is necessary to properly prepare that tax return. In using such information, a member should consider any limitations imposed by any law or rule relating to confidentiality.

Explanation

.05 The preparer's declaration on a tax return often states that the information contained therein is true, correct, and complete to the best of the preparer's knowledge and belief based on all information known by the preparer. This type of reference should be understood to include information furnished by the taxpayer or by third parties to a member in connection with the preparation of the return.

.06 The preparer's declaration does not require a member to examine or verify supporting data; a member may rely on information furnished by the taxpayer unless it appears to be incorrect, incomplete, or inconsistent. However, there is a need to determine by inquiry that a specifically required condition,

such as maintaining books and records or substantiating documentation, has been satisfied and to obtain information when the material furnished appears to be incorrect, incomplete, or inconsistent. Although a member has certain responsibilities in exercising due diligence in preparing a return, the taxpayer has the ultimate responsibility for the contents of the return. Thus, if the taxpayer presents unsupported data in the form of lists of tax information, such as dividends and interest received, charitable contributions, and medical expenses, such information may be used in the preparation of a tax return without verification unless it appears to be incorrect, incomplete, or inconsistent either on its face or on the basis of other facts known to a member.

.07 Even though there is no requirement to examine underlying documentation, a member should encourage the taxpayer to provide supporting data where appropriate. For example, a member should encourage the taxpayer to submit underlying documents for use in tax return preparation to permit full consideration of income and deductions arising from security transactions and from pass-through entities, such as estates, trusts, partnerships, and S corporations.

.08 The source of information provided to a member by a taxpayer for use in preparing the return is often a pass-through entity, such as a limited partnership, in which the taxpayer has an interest but is not involved in management. A member may accept the information provided by the pass-through entity without further inquiry, unless there is reason to believe it is incorrect, incomplete, or inconsistent, either on its face or on the basis of other facts known to the member. In some instances, it may be appropriate for a member to advise the taxpayer to ascertain the nature and amount of possible exposure to tax deficiencies, interest, and penalties by taxpayer contact with management of the pass-through entity.

.09 A member should make use of a taxpayer's returns for one or more prior years in preparing the current return whenever feasible. Reference to prior returns and discussion of prior-year tax determinations with the taxpayer should provide information to determine the taxpayer's general tax status, avoid the omission or duplication of items, and afford a basis for the treatment of similar or related transactions. As with the examination of information supplied for the current year's return, the extent of comparison of the details of income and deduction between years depends on the particular circumstances.

TS Section 400

Use of Estimates

Source: SSTs No. 4

Effective date, unless
otherwise indicated:
January 2010

Introduction

.01 This statement sets forth the applicable standards for members when using the taxpayer's estimates in the preparation of a tax return. A member may advise on estimates used in the preparation of a tax return, but the taxpayer has the responsibility to provide the estimated data. Appraisals or valuations are not considered estimates for purposes of this statement.

Statement

.02 Unless prohibited by statute or by rule, a member may use the taxpayer's estimates in the preparation of a tax return if it is not practical to obtain exact data and if the member determines that the estimates are reasonable based on the facts and circumstances known to the member. The taxpayer's estimates should be presented in a manner that does not imply greater accuracy than exists.

Explanation

.03 Accounting requires the exercise of professional judgment and, in many instances, the use of approximations based on judgment. The application of such accounting judgments, as long as not in conflict with methods set forth by a taxing authority, is acceptable. These judgments are not estimates within the purview of this statement. For example, a federal income tax regulation provides that if all other conditions for accrual are met, the exact amount of income or expense need not be known or ascertained at year end if the amount can be determined with reasonable accuracy.

.04 When the taxpayer's records do not accurately reflect information related to small expenditures, accuracy in recording some data may be difficult to achieve. Therefore, the use of estimates by a taxpayer in determining the amount to be deducted for such items may be appropriate.

.05 When records are missing or precise information about a transaction is not available at the time the return must be filed, a member may prepare a tax return using a taxpayer's estimates of the missing data.

.06 Estimated amounts should not be presented in a manner that provides a misleading impression about the degree of factual accuracy.

.07 Specific disclosure that an estimate is used for an item in the return is not generally required; however, such disclosure should be made in unusual circumstances where nondisclosure might mislead the taxing authority regarding

the degree of accuracy of the return as a whole. Some examples of unusual circumstances include the following:

- a.* A taxpayer has died or is ill at the time the return must be filed.
 - b.* A taxpayer has not received a Schedule K-1 for a pass-through entity at the time the tax return is to be filed.
 - c.* There is litigation pending (for example, a bankruptcy proceeding) that bears on the return.
 - d.* Fire, computer failure, or natural disaster has destroyed the relevant records.
-

TS Section 500

Departure From a Position Previously Concluded in an Administrative Proceeding or Court Decision

Source: SSTS No. 5

Effective date, unless
otherwise indicated:
January 2010

Introduction

.01 This statement sets forth the applicable standards for members in recommending a tax return position that departs from the position determined in an administrative proceeding or in a court decision with respect to the taxpayer's prior return.

.02 For purposes of this statement, *administrative proceeding* includes an examination by a taxing authority or an appeals conference relating to a return or a claim for refund.

.03 For purposes of this statement, *court decision* means a decision by any court having jurisdiction over tax matters.

Statement

.04 The tax return position with respect to an item as determined in an administrative proceeding or court decision does not restrict a member from recommending a different tax position in a later year's return, unless the taxpayer is bound to a specified treatment in the later year, such as by a formal closing agreement. Therefore, the member may recommend a tax return position or prepare or sign a tax return that departs from the treatment of an item as concluded in an administrative proceeding or court decision with respect to a prior return of the taxpayer provided the requirements of TS section 100, *Tax Return Positions*, are satisfied.

Explanation

.05 If an administrative proceeding or court decision has resulted in a determination concerning a specific tax treatment of an item in a prior year's return, a member will usually recommend this same tax treatment in subsequent years. However, departures from consistent treatment may be justified under such circumstances as the following:

- a.* Taxing authorities tend to act consistently in the disposition of an item that was the subject of a prior administrative proceeding but generally are not bound to do so. Similarly, a taxpayer is not bound to follow the tax treatment of an item as consented to in an earlier administrative proceeding.

- b.* The determination in the administrative proceeding or the court's decision may have been caused by a lack of documentation. Supporting data for the later year may be appropriate.
- c.* A taxpayer may have yielded in the administrative proceeding for settlement purposes or not appealed the court decision, even though the position met the standards in TS section 100.
- d.* Court decisions, rulings, or other authorities that are more favorable to a taxpayer's current position may have developed since the prior administrative proceeding was concluded or the prior court decision was rendered.

.06 The consent in an earlier administrative proceeding and the existence of an unfavorable court decision are factors that the member should consider in evaluating whether the standards in TS section 100 are met.

TS Section 600

Knowledge of Error: Return Preparation and Administrative Proceedings

Source: SSTs No. 6

Effective date, unless
otherwise indicated:
January 2010

Introduction

.01 This statement sets forth the applicable standards for a member who becomes aware of (a) an error in a taxpayer's previously filed tax return; (b) an error in a return that is the subject of an administrative proceeding, such as an examination by a taxing authority or an appeals conference; or (c) a taxpayer's failure to file a required tax return. As used herein, the term *error* includes any position, omission, or method of accounting that, at the time the return is filed, fails to meet the standards set out in TS section 100, *Tax Return Positions*. The term *error* also includes a position taken on a prior year's return that no longer meets these standards due to legislation, judicial decisions, or administrative pronouncements having retroactive effect. However, an error does not include an item that has an insignificant effect on the taxpayer's tax liability. The term *administrative proceeding* does not include a criminal proceeding.

.02 This statement applies whether or not the member prepared or signed the return that contains the error.

.03 Special considerations may apply when a member has been engaged by legal counsel to provide assistance in a matter relating to the counsel's client.

Statement

.04 A member should inform the taxpayer promptly upon becoming aware of an error in a previously filed return, an error in a return that is the subject of an administrative proceeding, or a taxpayer's failure to file a required return. A member also should advise the taxpayer of the potential consequences of the error and recommend the corrective measures to be taken. Such advice and recommendation may be given orally. The member is not allowed to inform the taxing authority without the taxpayer's permission, except when required by law.

.05 If a member is requested to prepare the current year's return and the taxpayer has not taken appropriate action to correct an error in a prior year's return, the member should consider whether to withdraw from preparing the return and whether to continue a professional or employment relationship with the taxpayer. If the member does prepare such current year's return, the member should take reasonable steps to ensure that the error is not repeated.

.06 If a member is representing a taxpayer in an administrative proceeding with respect to a return that contains an error of which the member is aware, the member should request the taxpayer's agreement to disclose the error to

the taxing authority. Lacking such agreement, the member should consider whether to withdraw from representing the taxpayer in the administrative proceeding and whether to continue a professional or employment relationship with the taxpayer.

Explanation

.07 While performing services for a taxpayer, a member may become aware of an error in a previously filed return or may become aware that the taxpayer failed to file a required return. The member should advise the taxpayer of the error and the potential consequences, and recommend the measures to be taken. Similarly, when representing the taxpayer before a taxing authority in an administrative proceeding with respect to a return containing an error of which the member is aware, the member should advise the taxpayer to disclose the error to the taxing authority and of the potential consequences of not disclosing the error. Such advice and recommendation may be given orally.

.08 It is the taxpayer's responsibility to decide whether to correct the error. If the taxpayer does not correct an error, a member should consider whether to withdraw from the engagement and whether to continue a professional or employment relationship with the taxpayer. Although recognizing that the taxpayer may not be required by statute to correct an error by filing an amended return, a member should consider whether a taxpayer's decision not to file an amended return or otherwise correct an error may predict future behavior that might require termination of the relationship.

.09 Once the member has obtained the taxpayer's consent to disclose an error in an administrative proceeding, the disclosure should not be delayed to such a degree that the taxpayer or member might be considered to have failed to act in good faith or to have, in effect, provided misleading information. In any event, disclosure should be made before the conclusion of the administrative proceeding.

.10 A conflict between the member's interests and those of the taxpayer may be created by, for example, the potential for violating Code of Professional Conduct Rule 301, *Confidential Client Information* (ET sec. 301 par. .01) (relating to the member's confidential client relationship); the tax law and regulations; or laws on privileged communications, as well as by the potential adverse impact on a taxpayer of a member's withdrawal. Therefore, a member should consider consulting with his or her own legal counsel before deciding upon recommendations to the taxpayer and whether to continue a professional or employment relationship with the taxpayer.

.11 If a member believes that a taxpayer may face possible exposure to allegations of fraud or other criminal misconduct, the member should advise the taxpayer to consult with an attorney before the taxpayer takes any action.

.12 If a member decides to continue a professional or employment relationship with the taxpayer and is requested to prepare a tax return for a year subsequent to that in which the error occurred, the member should take reasonable steps to ensure that the error is not repeated. If the subsequent year's tax return cannot be prepared without perpetuating the error, the member should consider withdrawal from the return preparation. If a member learns that the taxpayer is using an erroneous method of accounting and it is past the due date to request permission to change to a method meeting the standards of TS section 100, the member may sign a tax return for the current year, providing the tax return includes appropriate disclosure of the use of the erroneous method.

.13 Whether an error has no more than an insignificant effect on the taxpayer's tax liability is left to the professional judgment of the member based on all the facts and circumstances known to the member. In judging whether an erroneous method of accounting has more than an insignificant effect, a member should consider the method's cumulative effect, as well as its effect on the current year's tax return or the tax return that is the subject of the administrative proceeding.

.14 If a member becomes aware of the error while performing services for a taxpayer that do not involve tax return preparation or representation in an administrative proceeding, the member's responsibility is to advise the taxpayer of the existence of the error and to recommend that the error be discussed with the taxpayer's tax return preparer. Such recommendation may be given orally.

TS Section 700

Form and Content of Advice to Taxpayers

Source: SSTS No. 7

Effective date, unless
otherwise indicated:
January 2010

Introduction

.01 This statement sets forth the applicable standards for members concerning certain aspects of providing advice to a taxpayer and considers the circumstances in which a member has a responsibility to communicate with a taxpayer when subsequent developments affect advice previously provided. The statement does not, however, cover a member's responsibilities when the expectation is that the advice rendered is likely to be relied on by parties other than the taxpayer.

Statement

.02 A member should use professional judgment to ensure that tax advice provided to a taxpayer reflects competence and appropriately serves the taxpayer's needs. When communicating tax advice to a taxpayer in writing, a member should comply with relevant taxing authorities' standards, if any, applicable to written tax advice. A member should use professional judgment about any need to document oral advice. A member is not required to follow a standard format when communicating or documenting oral advice.

.03 A member should assume that tax advice provided to a taxpayer will affect the manner in which the matters or transactions considered would be reported or disclosed on the taxpayer's tax returns. Therefore, for tax advice given to a taxpayer, a member should consider, when relevant (a) return reporting and disclosure standards applicable to the related tax return position and (b) the potential penalty consequences of the return position. In ascertaining applicable return reporting and disclosure standards, a member should follow the standards in TS section 100, *Tax Return Positions*.

.04 A member has no obligation to communicate with a taxpayer when subsequent developments affect advice previously provided with respect to significant matters, except while assisting a taxpayer in implementing procedures or plans associated with the advice provided or when a member undertakes this obligation by specific agreement.

Explanation

.05 Tax advice is recognized as a valuable service provided by members. The form of advice may be oral or written and the subject matter may range from routine to complex. Because the range of advice is so extensive and because advice should meet the specific needs of a taxpayer, neither a standard format nor guidelines for communicating or documenting advice to the taxpayer can be established to cover all situations.

.06 Although oral advice may serve a taxpayer's needs appropriately in routine matters or in well-defined areas, written communications are recommended in important, unusual, substantial dollar value, or complicated transactions. The member may use professional judgment about whether, subsequently, to document oral advice.

.07 In deciding on the form of advice provided to a taxpayer, a member should exercise professional judgment and should consider such factors as the following:

- a.* The importance of the transaction and amounts involved
- b.* The specific or general nature of the taxpayer's inquiry
- c.* The time available for development and submission of the advice
- d.* The technical complexity involved
- e.* The existence of authorities and precedents
- f.* The tax sophistication of the taxpayer
- g.* The need to seek other professional advice
- h.* The type of transaction and whether it is subject to heightened reporting or disclosure requirements
- i.* The potential penalty consequences of the tax return position for which the advice is rendered
- j.* Whether any potential applicable penalties can be avoided through disclosure
- k.* Whether the member intends for the taxpayer to rely upon the advice to avoid potential penalties

.08 A member may assist a taxpayer in implementing procedures or plans associated with the advice offered. When providing such assistance, the member should review and revise such advice as warranted by new developments and factors affecting the transaction.

.09 Sometimes a member is requested to provide tax advice but does not assist in implementing the plans adopted. Although such developments as legislative or administrative changes or future judicial interpretations may affect the advice previously provided, a member cannot be expected to communicate subsequent developments that affect such advice unless the member undertakes this obligation by specific agreement with the taxpayer.

.10 Taxpayers should be informed that (*a*) the advice reflects professional judgment based upon the member's understanding of the facts, and the law existing as of the date the advice is rendered and (*b*) subsequent developments could affect previously rendered professional advice. Members may use precautionary language to the effect that their advice is based on facts as stated and authorities that are subject to change.

.11 In providing tax advice, a member should be cognizant of applicable confidentiality privileges.

Foreword

The Personal Financial Planning Executive Committee (PFP EC) has issued Statement on Standards in Personal Financial Planning Services No. 1 (the statement) to provide guidance to members and a framework for delivering PFP services with the highest levels of integrity, professionalism, objectivity, and competence so that a CPA financial planner can serve the best interests of

his or her clients and the public. The PFP EC is the senior committee of the AICPA designated to promulgate enforceable standards of PFP practice.¹

The statement applies to all members providing PFP services regardless of the jurisdictions in which they practice. Interpretations of the statement may be issued by the PFP EC as guidance to assist in understanding and applying the statement. The PFP EC interpretations are recommendations on the application of the statement. The statement and its interpretations are intended to complement other laws, regulations, and professional standards of PFP practice.

The statement is written in as simple and objective a manner as possible. However, by their nature, practice standards provide for an appropriate range of behaviors and need to be interpreted to address a broad range of personal and professional situations. Accordingly, enforcement of these rules, as part of the AICPA's Code of Professional Conduct "General Standards Rule" (ET sec. 1.300.001 and 2.300.001) and "Compliance with Standards Rule" (ET sec. 1.310.001 and 2.310.001) as well as paragraphs .02–.05 of the "Application of the AICPA Code" (ET sec. 0.200.020), will be undertaken on a case-by-case basis.

¹ Per AICPA Bylaw Section 360R, *Implementing Resolutions Under Section 3.6 Committees*, the Personal Financial Planning Executive Committee (PFP EC) is an AICPA senior committee. The PFP EC is designated as a body that may promulgate technical standards under the "General Standards Rule" (ET sec. 1.300.001 and 2.300.001) and the "Compliance with Standards Rule" (ET sec. 1.310.001 and 2.310.001).

PFP Section 100

Statement on Standards in Personal Financial Planning Services

(Supersedes the *Statement on Responsibilities in Personal Financial Planning Practice*.)

Source: Statement on Standards in Personal Financial Planning Services No. 1.

January 2014; revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.

Scope

.01 Statement on Standards in Personal Financial Planning Services No. 1 (the statement) addresses the responsibilities of AICPA members (members) who are described in paragraph .04 that follows. The statement applies when personal financial planning (PFP) services are provided, even if part of another engagement.

.02 The statement establishes the applicable standards for members with regard to PFP engagements. (Ref: par. .A1)

Nature of PFP Services

.03 PFP is the process of identifying personal financial goals and resources, designing financial strategies, and making personalized recommendations (Ref: par. .12) (whether written or oral) that, when implemented, assist the client in achieving these goals. This process may include implementation of recommendations or monitoring or updating the engagement. PFP services encompass one or more of the following activities:

- a.* Cash flow planning
- b.* Risk management and insurance planning
- c.* Retirement planning
- d.* Investment planning
- e.* Estate, gift, and wealth transfer planning
- f.* Elder planning
- g.* Charitable planning
- h.* Education planning
- i.* Tax planning

Applicability

.04 The statement applies when a member provides PFP services as defined in paragraph .12, and (Ref: par. .A2)

- a.* represents to the public or clients that the member provides PFP services,

- b. engages in activities that would require registration as an investment adviser under federal or state law,¹ or
- c. sells a product as a result of an engagement.

.05 The statement does not supersede other applicable AICPA professional standards, such as (Ref: par. .A2–.A3, .A11)

- a. the Statement on Standards for Accounting and Review Services (SSARS) No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AR sec. 600), with regard to the compilation of personal financial statements;
- b. the Statements on Standards for Tax Services (SSTSs) with regard to tax services; and
- c. the Statement on Standards for Valuation Services (SSVS) No. 1, *Valuation of a Business, Business Ownership Interest, Security, or Intangible Asset* (VS sec. 100), with regard to valuation services.

Objective

.06 The statement provides authoritative guidance and establishes enforceable standards for members who provide PFP services to assist them in fulfilling their professional responsibilities.

Authority of the Statement

.07 The statement contains requirements designed to enable the member to meet the stated objective. It also includes related guidance in the form of application and other explanatory material that provides context relevant to a proper understanding of the statement and definitions.

.08 The requirements of the statement are expressed using the word *should*. If a standard provides that a member "should" perform an action, then unless prevailing facts and circumstances dictate otherwise, this action is required. If a standard provides that a procedure or action is one that the member "should consider," the consideration of the procedure or action is required, whereas carrying out the specified procedure or action is not. The professional requirements of the statement are to be understood and applied in the context of the explanatory material that provides guidance for their application.

.09 The "Application Material" section and other explanatory material provide further explanation of the requirements and guidance for carrying them out.

.10 The words *may*, *might*, and *could*, among others, are used to describe actions and procedures that are recommended but not required. Although such guidance does not, in itself, impose a requirement, it is relevant to the proper application of the requirements.

.11 The statement includes, under the heading "Definitions," a description of the meanings attributed to certain terms for purposes of the statement. These are provided to assist with the consistent application and interpretation of the statement and are not intended to override definitions that may be established for other purposes, whether by law or regulation.

¹ Reference The CPA's Guide to Investment Advisory Business Models published by AICPA.

Definitions

.12 For purposes of the statement, the following terms have the meanings attributed:

Personal financial planning services. The process of identifying personal financial goals and resources, designing financial strategies, and making personalized recommendations that, when implemented, assist the client in achieving these goals. (Ref: par. .03)

Personal financial planning engagement. An engagement in which a member provides PFP services and the statement applies. (Ref: par. .03–.04)

Implementation engagement. A PFP engagement that involves assisting the client in taking action on recommendations developed during the PFP engagement.

Monitoring engagement. A PFP engagement that involves tracking and communicating the client's progress in achieving established PFP goals.

Updating engagement. A PFP engagement that involves revising the client's existing financial plan and financial planning recommendations as the member and client agree upon.

Personalized recommendation. Financial advice directing a client to take action based on the client's personal financial information disclosed to the member. (Ref: par. .03)

Requirements

General Professional Responsibilities

.13 The member should read the entire statement, including its application and other explanatory material, to understand its objective and apply its requirements properly.

.14 The proper application of the requirements established by the statement is expected to provide a sufficient basis for the achievement of the objective. However, because circumstances vary widely and all such circumstances cannot be anticipated, the member should consider whether, due to the existence of particular matters or circumstances, procedures in addition to those required by the statement are needed to meet the stated objective.

.15 The member must comply with each requirement of the statement unless,

- a. in the circumstances of the engagement, the requirement is not relevant because it is conditional, and the condition does not exist.
- b. the member judges it necessary to depart from a requirement. In such circumstances, the member should perform alternative procedures to achieve the intent of that requirement and document the justification for that departure.

.16 The member should consider applicable interpretive publications when providing PFP services. (Ref: par. .A5)

Independence and PFP Services

.17 If PFP services are performed for a client for which the member or member's firm also performs an *attest engagement* (ET sec. 0.400.04), the member should meet the requirements of the "Nonattest Services" subtopic

(ET sec. 1.295) under the "Independence Rule" (ET sec. 1.200.001) so as not to impair the member's independence with respect to the client.

Responsibilities of Members in PFP Engagements (Ref: par. .A6–.A13)

.18 The member should comply with relevant ethical requirements. (Ref: par. .A7)

.19 The member should possess a level of knowledge of PFP principles and theory, and a level of skill in the application of such principles, that will enable him or her to (Ref: par. .A8)

- a. identify client goals and objectives;
- b. gather and analyze relevant information;
- c. consider and apply appropriate planning approaches and methods; and
- d. use professional judgment when developing financial recommendations.

.20 The member should evaluate whether any conflicts of interest exist with regard to the engagement as follows: (Ref: par. .A9–.A10)

- a. If the member determines conflicts of interest exist, the member should determine whether the engagement can be performed objectively.
- b. If the member determines the engagement can be performed objectively, the member should disclose all known conflicts of interest and obtain consent as required under the "Conflicts of Interest" interpretations (ET sec. 1.110.010 and 2.110.010) under the "Integrity and Objectivity Rule" (ET sec. 1.100.001 and 2.100.001).
- c. If the member determines that the engagement cannot be performed objectively, the engagement should be terminated.

.21 The member should comply with applicable federal, state, and other laws and regulations. The member should comply with professional standards applicable to the PFP engagement unless superseded by laws or regulations. When there is a conflict between the statement and laws or regulations, the laws or regulations will prevail unless less stringent than the statement. (Ref: par. .A11–.A12)

.22 Prior to beginning the engagement, and throughout the engagement as circumstances dictate, the member should disclose in writing all compensation the member and the member's firm or affiliates will receive for services rendered or products sold (Ref: par. .A6, .A13). The disclosure should include

- a. the method of compensation, including the impact of indirect compensation;
- b. the amount of compensation;
- c. the time period over which compensation will be received; and
- d. the compensation, including noncash benefits, received by the member for referrals to other providers.

.23 If compensation alternatives are offered, the member should disclose the differences in these alternatives in writing.

Planning the PFP Engagement (Ref: par. .A14–.A15)

.24 The member should document and communicate to the client the scope and nature of services to be provided and disclose the member's agreed upon compensation for such services. This communication should be documented in the file and include descriptions of the following when applicable to the engagement:

- a.* Engagement objectives
- b.* Scope of services to be provided
- c.* Roles and responsibilities of the member, client, and other service providers
- d.* Timing of the engagement
- e.* Scope limitations and other constraints
- f.* Conflicts of interest (Ref: par. .20)
- g.* Responsibility, or lack thereof, for helping the client implement planning decisions
- h.* Responsibility, or lack thereof, for monitoring the client's progress in achieving goals
- i.* Responsibility, or lack thereof, for updating the plan and proposing new action

.25 The member should evaluate the appropriateness of the original engagement as the engagement proceeds and document and communicate needed changes to the client.

.26 If the member is aware of a service needed to complete the engagement and does not, or will not, provide that service, the member should limit the scope of the engagement accordingly and recommend that the client engage another service provider for that service in writing.

.27 If the client declines to engage another service provider for services identified in paragraph .26, the member should consider whether this limitation impairs the ability to provide PFP services:

- a.* If the member determines that the ability to meet the standards established by the statement is impaired, the member should terminate the engagement in writing.
- b.* If the member determines that the ability to meet the standards established by the statement is not impaired, the member should communicate in writing that this limitation could affect the conclusions and recommendations developed in the engagement.

Obtaining and Analyzing Information

.28 The member should use professional judgment when obtaining and analyzing relevant information necessary to develop recommendations based on the stated engagement objectives.

.29 If the member is unable to collect sufficient relevant information to establish a reasonable basis for recommendations, the engagement scope may be restricted to those matters for which sufficient information is available. This scope limitation should be communicated to the client in writing, including that this limitation should be taken into account in the assessment of conclusions and recommendations developed. (Ref: par. .A16)

.30 If sufficient information does not exist to proceed as agreed, the member should terminate or modify the engagement through mutual agreement

with the client. This engagement modification or termination should be communicated in writing.

.31 When analyzing information obtained while performing the engagement, the member should

- a. evaluate the reasonableness of estimates and assumptions that are significant to the plan;
- b. use assumptions that are appropriate and consistent with each other; and
- c. consider the interrelationship of various PFP activities (Ref: par. .03).

Developing and Communicating Recommendations (Ref: par. .A16–.A20)

.32 The member should establish a reasonable basis for PFP recommendations.

.33 The member should develop recommendations derived from analyses of relevant information, client goals, and the client's overall financial circumstances. Even when an engagement addresses a limited number of personal financial goals, the member should consider the client's overall known financial circumstances.

.34 The nature and extent of analyses and other procedures performed when establishing a basis for recommendations are affected by the scope and objectives of the engagement and should be documented.

.35 The member should communicate to the client the assumptions and estimates that are significant to the recommendations. This should be documented and include the following:

- a. A summary of the client's goals
- b. Significant assumptions
- c. Estimates
- d. Recommendations
- e. A description of limitations on the work performed
- f. The recommendations in the engagement should contain qualifications to the recommendations if the effects of certain planning areas on the client's overall financial picture were not considered

Implementation Engagements (Ref: par. .A21–.A24)

.36 The member should document his or her understanding of the implementation engagement, including the roles and responsibilities of the member, the client, and other service providers. This documentation should include the following:

- a. A summary of the planning decisions being implemented
- b. A summary of recommended actions to be taken
- c. A description of limitations on the work performed in the implementation engagement

.37 The member should communicate in writing the level of responsibility, if any, for the following:

- a. Selecting and acquiring products

- b. Selecting service providers
- c. Establishing selection criteria
- d. Coordinating or reviewing the delivery of services or products by other service providers

.38 A member who is engaged to establish selection criteria should

- a. identify those criteria that are required to accomplish the client's objectives, subject to any constraints that result from the client's circumstances or as identified by the client.
- b. assist the client in evaluating the relative importance of criteria so that available alternatives can be compared.

.39 A member who is engaged to participate in recommending products should

- a. gather information that establishes a reasonable basis for determining whether a product meets the selection criteria.
- b. communicate this evaluation in writing, along with product recommendations.
- c. disclose in writing any compensation received for recommending products.

.40 A member who is engaged to assist the client in taking action on planning decisions developed in a PFP engagement in which the member did not participate should obtain an understanding of the planning decisions made.

.41 All other relevant guidance under the statement relating to providing PFP services should be followed in an implementation engagement.

Monitoring and Updating Engagements (Ref: par. .A25–.A28)

.42 In a monitoring engagement, the member should document the nature and extent of the member's services, including

- a. the frequency and time period of measuring the client's progress toward reaching the stated goals.
- b. utilization of monitoring criteria that are appropriate to, and consistent with, the criteria used to establish the goals being monitored.
- c. the criteria that are important to the achievement of the financial planning goals being monitored.
- d. the member's evaluation of progress toward achieving the client's financial planning goals, including whether the client's existing financial plan and specific financial planning recommendations should be updated.

.43 In an updating engagement, the member should document the nature and extent of the member's services, including

- a. the determination of whether the goals, objectives, information, and assumptions used as a basis for existing planning recommendations are still valid.
- b. the evaluation of the impact of revising recommendations on the client's ability to achieve other financial planning goals.

.44 All other relevant guidance under the statement relating to providing PFP services should be followed in a monitoring or an updating engagement.

Working With Other Service Providers

- .45** When referring another service provider to a client, the member should
- consider the professional qualifications of another service provider before referring the client to that service provider;
 - disclose, in writing, any compensation received for making such referrals; and
 - communicate, in writing, the extent to which the member will or will not evaluate the work performed by the service provider.

Using Advice Provided By Other Service Providers

.46 When the member uses the advice of another service provider when carrying out the PFP engagement, the member should understand the impact of the service provider's advice.

.47 If the member has evaluated the advice of the other service provider, and

- if the member concurs with the other service provider's advice, the member need not communicate this concurrence to the client because concurrence is implied by its use, or
- if the member does not concur with the other service provider's advice, the member should communicate this non-concurrence to the client in writing.

Application Material

Scope

.A1 The "Compliance With Standards Rule" (ET sec. 1.310.001 and 2.310.001) requires an AICPA member who performs a PFP engagement to comply with standards promulgated by the Personal Financial Planning Executive Committee (PFP EC). The PFP EC develops and issues standards in the form of statements through a process that includes deliberation in meetings open to the public, public exposure of statements, and a formal vote. The statements are codified in AICPA *Professional Standards*. (Ref: par. .02)

Applicability (Ref: par. .03–.05)

.A2 If any of the activities listed in paragraph .03 are provided as part of a PFP engagement, the activity is covered by the statement and should be considered in conjunction with the requirements set forth in the "Applicability" section (Ref: par. .04). In addition, depending on the nature of the service, other standards may apply (Ref: par. .05). For example, any personal income tax services provided as part of a PFP engagement are covered by the statement and are subject to the SSTs.

.A3 Examples of activities not covered by the statement include the following: (Ref: par. .03–.05)

- Tax advice: Advising a client regarding his or her income tax matters or gift and estate tax matters when PFP services as defined in paragraph .03 are not provided. These services are, however, subject to the SSTs.

- b. Valuation services: Any engagement that would be considered a valuation service under SSVS No. 1 when PFP services as defined in paragraph .03 are not provided. These services are, however, subject to SSVS No. 1.
- c. Business succession planning
 - i. Planning to prepare for a vacancy in a key position resulting from a sudden departure, disability, or death and no advice is given to an individual.
 - ii. Planning to prepare for the sale to another firm and no advice is given to an individual.
- d. Educational discussions or presentations covering PFP
 - i. A workshop presented to a group of company employees on a PFP activity (Ref: par. .03) that does not include personalized recommendations.
 - ii. A discussion with an individual that covers one or more PFP activities (Ref: par. .03) that does not result in a personalized recommendation.
- e. Mechanical computations
 - i. Computation of the current income tax deduction for a client's contribution of assets to a charitable remainder trust.
 - ii. Computation of the current yield on a client's investment portfolio.
 - iii. Computation of the gift tax on a transfer of an asset.

.A4 A member may identify and create an analysis of historical spending and income activity for a client as a purely mechanical computation, which would not be considered PFP services. However, extension of this analysis to future periods based on the judgment of the member that entails the use of assumptions and personalized recommendations regarding investing would be considered PFP services.

General Professional Responsibilities

.A5 Interpretive publications are not standards on PFP practice. Interpretive publications are recommendations on the application of the statement in specific circumstances. An interpretive publication is issued under the authority of the PFP EC after all members have been provided an opportunity to consider and comment on whether the interpretive publication is consistent with the statement. (Ref: par. .16)

Responsibilities of Members in PFP Engagements (Ref: par. .18-.23)

.A6 The member is required to comply with the "Commissions and Referral Fees Rule" (ET sec. 1.520.001). (Ref: par. .22)

.A7 The member is subject to relevant ethical requirements relating to PFP engagements (Ref: par. .18). Ethical requirements consist of the AICPA Code of Professional Conduct, rules of state boards of accountancy from which the member holds a license, and applicable regulatory agencies that are more stringent. The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include the following:

- a. Responsibilities
- b. The public interest
- c. Integrity
- d. Objectivity and independence
- e. Due care
- f. Scope and nature of services

.A8 The "General Standards Rule" (ET sec. 1.300.001 and 2.300.001) explains that professional competence means that a member shall "undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence." (Ref: par. .19)

.A9 The "Objectivity and Independence" principle (ET sec. 0.300.050) states that objectivity is a state of mind. The principle of objectivity imposes the obligation to be impartial, intellectually honest, and free from conflicts of interest. (Ref: par. .20)

.A10 The member is required to comply with AICPA's Code of Professional Conduct "Conflicts of Interest" interpretations (ET sec. 1.110.010 and 2.110.010). (Ref: par. .20)

.A11 Laws, regulations, and professional standards applicable to engagements to perform PFP services include, but are not necessarily limited to, the following: (Ref: par. .21, .A5)

- a. Investment Advisers Act of 1940; see Securities and Exchange Commission Interpretive Release IA-1092
- b. Treasury Department Circular No. 230
- c. State boards of accountancy
- d. AICPA Code of Professional Conduct
- e. Statements on Standards for Tax Services (SSTSs)
- f. Statement on Standards for Valuation Services (SSVS) No. 1
- g. Statement on Standards for Consulting Services No. 1
- h. Statements on Standards for Accounting and Review Services (SSARS) No. 6
- i. Maintaining adequate data protection safeguards regarding a client's nonpublic personal information
- j. Maintaining client confidentiality in accordance with the applicable rules of professional conduct and federal and state laws and regulations

.A12 Compliance with the AICPA Code of Professional Conduct depends primarily on the member's understanding and voluntary actions, secondarily on reinforcement by peers and public opinion, and ultimately on disciplinary proceedings, when necessary, against members who fail to comply with the rules. (Ref: par. .21)

.A13 The member is not required to follow a standard format when communicating or documenting communication.

Planning the Engagement (Ref: par. .24–.27)

.A14 An understanding of the client may include understanding matters such as the client's family situation, commitment to the planning process, current cash flow and assets available, personal preferences, and relationships

with other professionals. This understanding may be obtained through comprehensive information gathering or may result from knowledge gained during a long-term relationship with the client.

.A15 Additional services that require understanding and agreement by the client include the following:

- a. Implementing plan recommendations
- b. Monitoring the client's progress in achieving goals
- c. Updating recommendations

Developing and Communicating Recommendations (Ref: par. .32–.35)

.A16 Developing a reasonable basis for recommendations involves the following (Ref: par. .29):

- a. Collecting relevant quantitative and qualitative information. The nature and amount of information will depend on the scope and complexity of the engagement. This information may include, but is not limited to
 - i. the client's goals, existing financial situation, and available resources;
 - ii. nonfinancial factors, such as client attitudes, risk tolerance, family considerations, age, health, and life expectancy;
 - iii. external factors, such as estimates of inflation, taxes, economic conditions, legislative activity, investment markets, and interest rates; and
 - iv. reasonable estimates, projections, and assumptions furnished by the client, provided by other service providers, or developed by the member.
- b. Analyzing the client's current situation as it relates to the client's goals and objectives and identifying strengths and weaknesses of the existing financial situation.
- c. Formulating, evaluating, and recommending appropriate strategies for achieving the client's goals after due consideration of appropriate alternatives.

.A17 The member's knowledge and experience also contribute to the basis for recommendations.

.A18 PFP recommendations are suggested actions developed to help the client achieve personal financial goals.

.A19 Recommendations are based on analyses and other procedures conducted prior to, and in preparation for, developing suggested actions.

.A20 The member should help the client prioritize recommended tasks that are essential to enabling the client to act on planning decisions.

Implementation Engagements (Ref: par. .36–.41)

.A21 Implementation may include such activities as assisting the client in selecting other advisors, restructuring debt, obtaining new or updated estate documents, establishing cash reserves, preparing budgets, and selecting and acquiring specific investments and insurance products.

.A22 In those situations in which the member may be functioning in a fiduciary or agency relationship, state law will control.

.A23 The member may be engaged to assist the client in taking action on planning decisions, which may include the member doing one or more of the following:

- a. Taking responsibility for the selection and acquisition of products²
- b. Taking responsibility for the selection of service providers
- c. Establishing selection criteria
- d. Coordinating or reviewing the delivery of services or products by other service providers

.A24 Implementation is typically completed when products are acquired or services are rendered based on the recommendations developed during the PFP engagement.

Monitoring and Updating Engagements (Ref: par. .42–.44)

.A25 A member may be engaged to assist the client in tracking progress in achieving established PFP goals or revising an existing personal financial plan, or both.

.A26 The member may be specifically engaged by a client to provide monitoring services, updating services, or both. The member would typically have informed the client during a PFP engagement, in which planning recommendations are developed, that monitoring and updating are important elements of the financial planning process and that the member is not responsible for undertaking these services except by specific agreement with the client.

.A27 Monitoring and updating engagements are typically undertaken after implementation of actions and recommendations developed during a PFP engagement. Monitoring and updating engagements may be either separate or combined engagements.

.A28 Monitoring engagements vary in complexity, scope, and the nature and extent of assistance to be provided by the member. In other words, the member may undertake some or all of the monitoring services, coordinate or review monitoring services performed by other service providers, or monitor progress toward goals in a financial plan developed by other service providers.

² Members advising clients on the selection or acquisition of products (such as investments or insurance policies) should determine whether they meet the qualifications and licensing requirements established by applicable federal and state laws.

CPE Section

CONTINUING PROFESSIONAL EDUCATION

These standards have been approved by the joint AICPA/NASBA CPE Standards Committee and the Board of Directors of both the AICPA and NASBA.

Unless otherwise established by state licensing bodies or other professional organizations, these standards are to be effective on December 31, 2019.

Continuing professional education (CPE) is required for CPAs to maintain or improve their professional competence and provide quality professional services. CPAs are responsible for complying with all applicable CPE requirements, rules and regulations of boards of accountancy, as well as those of membership associations and other professional organizations.

The Statement on Standards for CPE Programs (Standards) is published jointly by the AICPA and the National Association of State Boards of Accountancy (NASBA) to provide a framework for the development, presentation, measurement, and reporting of CPE programs. The Standards were last revised in 2016.

The Standards are periodically reviewed in their entirety by the CPE Standards Working Group (Working Group). The Working Group comprises 13 members representing the various stakeholders in the CPE arena, including boards of accountancy, state societies, educators, CPE providers, and the AICPA. If the Working Group determines that revisions or modifications are required, then the Working Group will make its recommendations to NASBA's CPE Committee (CPE Committee), which, in turn, makes recommendations to the Joint AICPA/NASBA CPE Standards Committee (Joint Committee). The Joint Committee will then make its recommendation to the respective AICPA and NASBA Boards of Directors. Any revisions or modifications to the Standards will be posted to the AICPA and NASBA websites for comment.

The Standards are intended to be an "evergreen" document. As questions arise related to implementation and application of the Standards, the questions will be presented to the Working Group. NASBA will communicate the findings of the Working Group to the specific CPE program sponsor. Authoritative interpretations will only be issued by the CPE Committee in limited cases in which the matter is not addressed in the Standards, cannot be addressed specifically with the CPE program sponsor, or cannot be addressed in the "Best Practices" web pages. All interpretations issued by the CPE Committee will be reviewed and considered by the Joint Committee upon the next revision of the Standards.

CPE Section 100

Preamble

Revised, December 2019.

.01 The right to use the title "Certified Public Accountant" (CPA) is regulated by each state's board of accountancy in the public interest and imposes a duty to maintain public confidence by enhancing current professional competence, as defined in the Standards, in all areas in which they provide services. CPAs must accept and fulfill their ethical responsibilities to the public and the profession regardless of their fields of employment.¹

.02 The profession of accountancy is characterized by an explosion of relevant knowledge, ongoing changes and expansion, and increasing complexity. Advancing technology, globalization of commerce, increasing specialization, proliferating regulations, and the complex nature of business transactions have created a dynamic environment that requires CPAs to continuously maintain or improve their professional competence.

.03 The continuing development of professional competence involves a program of lifelong educational activities. *Continuing professional education (CPE)* is the term used in these Standards to describe the educational activities that assist CPAs in achieving and maintaining quality in professional services.

.04 The following Standards have been broadly stated in recognition of the diversity of practice and experience among CPAs. They establish a framework for the development, presentation, measurement, and reporting of CPE programs and thereby help to ensure that CPAs receive the quality CPE necessary to satisfy their obligations to serve the public interest. The spirit of the Standards is to encourage high quality learning with measurable objectives by providing baseline requirements. These Standards may also apply to other professionals by virtue of employment or membership. Boards of accountancy have final authority on the acceptance of individual courses for CPE credit.

.05 Advances in technology, delivery and workplace arrangements may lead to innovative learning techniques. Learning theory is evolving to include more emphasis on outcome based learning. These Standards anticipate innovation in CPE in response to these advances. Sponsors must ensure innovative learning techniques are in compliance with the Standards. CPE program sponsors are encouraged to consult with the National Association of State Boards of Accountancy (NASBA) regarding questions related to compliance with the Standards when using innovative techniques.

.06 These Standards create a basic foundation for sound educational programs. Sponsors may wish to provide enhanced educational and evaluative techniques to all programs.

¹ The term *CPAs* is used in these Standards to identify all persons who are licensed or regulated by boards of accountancy.

CPE Section 200

General Guidelines for CPAs

Revised, December 2019.

Professional Competence

.01 All CPAs should participate in learning activities that maintain or improve their professional competence.¹

.02 Selection of learning activities should be a thoughtful, reflective process addressing the individual CPA's current and future professional plans, current knowledge and skills level, and desired or needed additional competence to meet future opportunities or professional responsibilities or both.

.03 CPAs' fields of employment do not limit the need for Continuing Professional Education (CPE). CPAs performing professional services need to have a broad range of professional competence. Thus, the concept of professional competence may be interpreted broadly. Accordingly, acceptable continuing education encompasses programs contributing to the development and maintenance of professional skills.

.04 The fields of study, as published on NASBA's website, www.nasbaregistry.org, represent the primary knowledge and skill areas needed by CPAs to perform professional services in all fields of employment.

.05 To help guide their professional development, CPAs may find it useful to develop a learning plan. Learning plans are structured processes that help CPAs guide their professional development. They are dynamic instruments used to evaluate and document learning and professional competence development. They may be reviewed regularly and modified as CPAs' professional competence needs change. Plans include a self-assessment of the gap between current and needed professional competence; a set of learning objectives arising from this assessment; and learning activities to be undertaken to fulfill the learning plan.

CPE Compliance

.06 CPAs must comply with all applicable CPE requirements.

.07 CPAs are responsible for compliance with all applicable CPE requirements, rules, and regulations of state licensing bodies, other governmental entities, membership associations, and other professional organizations or bodies. CPAs should contact each appropriate entity to which they report to determine

¹ The terms *should* and *must* are intended to convey specific meanings within the context of this joint AICPA/NASBA *Statement on Standards for Continuing Professional Education Programs*. The term *must* is used in the Standards applying to CPAs and Continuing Professional Education (CPE) program sponsors to convey that CPAs and CPE program sponsors are not permitted any departure from those specific Standards. The term *should* is used in the Standards applying to both CPAs and CPE program sponsors and is intended to convey that CPAs and CPE program sponsors are encouraged to follow such Standards as written. The term *may* is used in the Standards applying to both CPAs and CPE program sponsors and is intended to convey that CPAs and CPE program sponsors are permitted to follow such Standards as written.

its specific requirements or any exceptions it may have to the standards presented herein.

.08 Periodically, CPAs participate in learning activities which do not comply with all applicable CPE requirements, for example specialized industry programs offered through industry sponsors. If CPAs propose to claim credit for such learning activities, they must retain all relevant information regarding the program to provide documentation to state licensing bodies or all other professional organizations or bodies that the learning activity is equivalent to one which meets all these standards.

CPE Credits Record Documentation

.09 CPAs are responsible for accurate reporting of the appropriate number of CPE credits earned and must retain appropriate documentation of their participation in learning activities.

.10 To protect the public interest, regulators require CPAs to document maintenance or improvement of professional competence through periodic reporting of CPE. For convenience, measurement is expressed in CPE credits. However, the objective of CPE must always be maintenance or improvement of professional competence, not attainment of credits. Compliance with regulatory and other requirements mandates that CPAs keep documentation of their participation in activities designed to maintain or improve professional competence. In the absence of legal or other requirements, a reasonable policy is to retain documentation for a minimum of five years from the end of the year in which the learning activities were completed.

.11 Participants must document their claims of CPE credit. Examples of acceptable evidence of completion include the following:

- For group, blended learning, and independent study programs, a certificate or other verification supplied by the CPE program sponsor
- For self study and nano learning programs, a certificate supplied by the CPE program sponsor after satisfactory completion of a qualified assessment
- For instruction or content review credit, appropriate supporting documentation that complies with the requirements of the respective state boards subject to the guidelines in Standard No. 20 in the "Standards for CPE Program Measurement" section of the Standards
- For a university or college course that is successfully completed for credit, a record or transcript of the grade the participant received
- For university or college noncredit courses, a certificate of attendance issued by a representative of the university or college
- For published articles, books, or CPE programs:
 - a copy of the publication (or in the case of a CPE program, course development documentation) that names the CPA as author or contributor
 - a statement from the writer supporting the number of CPE hours claimed
 - the name and contact information of the content reviewer(s) or publisher

Reporting CPE Credits

.12 CPAs who complete sponsored learning activities that maintain or improve their professional competence must claim no more than the CPE credits recommended by CPE program sponsors subject to state board regulations.

.13 CPAs may participate in a variety of sponsored learning activities. While CPE program sponsors determine credits, CPAs must claim credit only for activities through which they maintained or improved their professional competence. CPAs who participate in only part of a program must claim CPE credit only for the portion they attended or completed.

Independent Study

.14 CPAs may engage in independent study under the direction of a CPE program sponsor who has met the applicable standards for CPE program sponsors when the subject matter and level of study maintain or improve the CPA's professional competence.

.15 Independent study is an educational process designed to permit a participant to learn a given subject under the guidance of a CPE program sponsor. Participants in an independent study program must

- a. enter into a written learning contract with a CPE program sponsor that must comply with the applicable standards for CPE program sponsors. A learning contract
 - i. specifies the nature of the independent study program and the time frame over which it is to be completed, not to exceed 15 weeks.
 - ii. specifies that the output must be in the form of
 - (1) a written report that will be reviewed by the CPE program sponsor or a qualified person selected by the CPE program sponsor or
 - (2) a written certification by the CPE program sponsor that the participant has demonstrated application of learning objectives through
 - (a) successful completion of tasks or
 - (b) performance of a live demonstration, oral examination, or presentation to a subject matter expert.
 - iii. outlines the maximum CPE credit that will be awarded for the independent study program, but limits credit to actual time spent.
- b. accept the written recommendation of the CPE program sponsor regarding the number of credits to be earned upon successful completion of the proposed learning activities. CPE credits will be awarded only if
 - i. all the requirements of the independent study as outlined in the learning contract are met;
 - ii. the CPE program sponsor reviews and signs the participant's report;
 - iii. the CPE program sponsor reports to the participant the actual credits earned; and

- iv. the CPE program sponsor provides the participant with contact information.

The maximum credits to be recommended by an independent study CPE program sponsor must be agreed upon in advance and must be equated to the effort expended to maintain or improve professional competence. The credits cannot exceed the time devoted to the learning activities and may be less than the actual time involved.

- c. retain the necessary documentation to satisfy regulatory requirements as to the content, inputs, and outcomes of the independent study.
-

CPE Section 300

Standards for CPE Program Sponsors

Revised, December 2019.

General Standards

.01 Standard No. 1. Continuing Professional Education (CPE) program sponsors are responsible for compliance with all applicable Standards and other CPE requirements.

.02 S1-01. CPE requirements of licensing bodies and others. CPE program sponsors may have to meet specific CPE requirements of state licensing bodies, other governmental entities, membership associations, or other professional organizations or bodies. Professional guidance for CPE program sponsors is available from the National Association of State Boards of Accountancy (NASBA); state-specific guidance is available from the boards of accountancy. CPE program sponsors should contact the appropriate entity to determine requirements.

Standards for CPE Program Development

.03 Standard No. 2. Sponsored learning activities must be based on relevant learning objectives and outcomes that clearly articulate the professional competence that should be achieved by participants in the learning activities.

.04 S2-01. Program knowledge level. Learning activities provided by CPE program sponsors for the benefit of CPAs must specify the knowledge level, content, and learning objectives so that potential participants can determine whether the learning outcomes are appropriate to their professional competence development needs. Knowledge levels consist of basic, intermediate, advanced, update, and overview.

.05 Standard No. 3. CPE program sponsors must develop and execute learning activities in a manner consistent with the prerequisite education, experience, or advance preparation of participants.

.06 S3-01. Prerequisite education and experience. To the extent it is possible to do so, CPE program sponsors should make every attempt to equate program content and level with the backgrounds of intended participants. All programs identified as Intermediate, Advanced or Update must clearly identify prerequisite education, experience, and advance preparation in precise language so that potential participants can readily ascertain whether they qualify for the program. For courses with a program knowledge level of Basic and Overview, prerequisite education or experience and advance preparation, if any, must be noted, otherwise, state "none" in the course announcement or descriptive materials.

.07 Standard No. 4. CPE program sponsors must employ activities, materials, and delivery systems that are current, accurate, and effectively designed. Course documentation must contain the most recent publication, revision or review date. Courses must be revised as soon as feasible following changes to relative codes, laws, rulings, decisions,

interpretations, and the like. Courses in subjects that undergo frequent changes must be reviewed by a subject matter expert at least once a year to verify the currency of the content. Other courses must be reviewed at least every two years.

.08 S4-01. Developed by subject matter expert(s). Learning activities must be developed by subject matter expert(s).

.09 Standard No. 5. CPE program sponsors of group, self study, nano learning, and blended learning programs must ensure learning activities are reviewed by content reviewers other than those who developed the programs to assure that the program is accurate and current and addresses the stated learning objectives. These reviews must occur before the first presentation of these materials and again after each significant revision of the CPE programs.

The participation of at least one licensed CPA (in good standing and holding an active license or the equivalent of an "active" CPA license in a U.S. jurisdiction) is required in the development of every program in accounting and auditing. The participation of at least one licensed CPA, tax attorney, or IRS enrolled agent (in good standing and holding an active CPA license or the equivalent of an "active" license in a U.S. jurisdiction) is required in the development of each program in the field of study of taxes. In the case of the subject matter of international taxes, the participation of the equivalent of an "active" licensed CPA for the international jurisdiction involved is permitted. As long as this requirement is met at some point during the development process, a program would be in compliance. Whether to have this individual involved during the development or the review process is at the CPE program sponsor's discretion.

.10 S5-01. Qualifications of content reviewers. Individuals or teams qualified in the subject matter must review programs. When it is impractical to review certain programs in advance, such as lectures given only once, greater reliance should be placed on the recognized professional competence of the instructor or presenter.

.11 S5-02. Review responsibilities if content is purchased from another entity. CPE program sponsors may purchase course content from other entities and developers. The organization that issues the certificate of completion under its name to the participants of the program is responsible for compliance with all Standards and other CPE requirements.

If a CPE program sponsor plans to issue certificates of completion under its name, then the CPE program sponsor must first consider whether the content was purchased from an entity registered with NASBA on the National Registry of CPE Sponsors.

- If the content is purchased from a sponsor registered with NASBA on the National Registry of CPE Sponsors, then the CPE program sponsor may maintain the author/developer and content reviewer documentation from that sponsor to satisfy the content development requirements of the Standards. The documentation should be maintained as prescribed in Standard No. 24.
- If the content is purchased from an entity not registered with NASBA on the National Registry of CPE Sponsors, then the CPE program sponsor must independently review the purchased content to ensure compliance with the Standards. If the CPE program sponsor does not have the subject matter expertise on staff, then

the CPE program sponsor must contract with a content reviewer to conduct the review. The CPE program sponsor must maintain the appropriate documentation regarding the credentials and experience of both the course author/developer(s) and content reviewer(s) as prescribed in Standard No. 24.

.12 Standard No. 6. CPE program sponsors of independent study learning activities must be qualified in the subject matter.

.13 S6-01. Requirements of independent study sponsor. A CPE program sponsor of independent study learning activities must have expertise in the specific subject area related to the independent study. The CPE program sponsor must also

- review, evaluate, approve, and sign the proposed independent study learning contract, including agreeing in advance on the number of credits to be recommended upon successful completion.
- evidence program completion by at least one of the following:
 - reviewing and signing the written report developed by the participant in independent study.
 - certifying in writing that the applicant has demonstrated application of learning objectives through successful completion of tasks.
 - certifying in writing that the applicant has performed a live demonstration, oral examination or presentation to a subject matter expert.
- retain the necessary documentation as included in Standard No. 24 to satisfy regulatory requirements as to the content, inputs, and outcomes of the independent study.

.14 Standard No. 7. Group live programs must employ instructional strategies that clearly define learning objectives, guide the participant through a program of learning and include elements of engagement within the program.

Whether a program is classified as group live or group internet based is determined by how the participant consumes the learning (in a group setting or on an individual basis) and not by the technology used in program delivery. Group live examples include but are not limited to: classroom setting with a real time instructor; participants in a group setting and calling in to a teleconference; and participants in a group setting and watching a rebroadcast of a program with a real time subject matter expert facilitator.

.15 S7-01. Required elements of engagement. A group live program must include at least one element of engagement related to course content during each full credit of CPE (for example: group discussion, polling questions, instructor-posed question with time for participant reflection, or use of a case study with different engagement elements throughout the program). In certain limited circumstances, for example, a high-profile keynote session, an element of engagement may not be appropriate. In such cases, the sponsor should document the justification.

.16 S7-02. Real time instructor during program presentation. Group live programs must have a real time instructor while the program is being presented. Program participants must be able to interact with the real time instructor while the course is in progress (including the opportunity to ask questions and receive answers during the presentation). Once a group live program is recorded for future presentation, it will continue to be considered a

group live program only where a real time subject matter expert facilitates the recorded presentation. CPE credit for a recorded group live program facilitated by a real time subject matter expert will be equal to the CPE credit awarded to the original presentation.

.17 S7-03. No real time instructor during recorded program presentation. A group live program that is recorded for future presentation that does not include a real time subject matter facilitator is no longer a group live program and will only be classified as a self study program if it meets all self study delivery method requirements with the exception of the basis for CPE credit. CPE credit for a recorded group live program not facilitated by a real time subject matter expert will be equal to the CPE credit awarded to the original presentation or it may be determined by either of the two self study credit determination methodologies described in Standard No. 17: pilot testing or the prescribed word count formula, at the sponsor's discretion.

.18 Standard No. 8. Group Internet based programs must employ instructional strategies that clearly define learning objectives, guide the participant through a program of learning, and provide evidence of a participant's satisfactory completion of the program.

Whether a program is classified as group live or group Internet based is determined by how the participant consumes the learning (in a group setting or on an individual basis) and not by the technology used in program delivery. Group Internet based examples include but are not limited to: participation in a webcast individually; participating in a broadcast of a group live presentation on an individual basis; and participants calling in to a conference call on an individual basis.

.19 S8-01. Real time instructor during program presentation. Group Internet based programs must have a real time instructor while the program is being presented. Program participants must be able to interact with the real time instructor while the course is in progress (including the opportunity to ask questions and receive answers during the presentation). Once a group Internet based program is recorded for future presentation, it will continue to be considered a group Internet based program only where a real time subject matter expert facilitates the recorded presentation. CPE credit for a recorded group Internet based program, facilitated by a real time subject matter expert, will be equal to the CPE credit awarded to the original presentation.

.20 S8-02. No real time instructor during recorded program presentation. A group Internet based program that is recorded for future presentation that does not include a real time subject matter facilitator is no longer a group Internet based program and will only be classified as a self study program if it meets all self study delivery method requirements with the exception of the basis for CPE credit. CPE credit for a recorded group Internet based program not facilitated by a real time subject matter expert will be equal to the CPE credit awarded to the original presentation or it may be determined by either of the two self study credit determination methodologies described in Standard No. 17: pilot testing or the prescribed word count formula, at the sponsor's discretion.

.21 Standard No. 9. Self study programs must employ instructional strategies that clearly define learning objectives, guide the participant through a program of learning, and provide evidence of a participant's satisfactory completion of the program.

.22 S9-01. Guide participant through a program of learning. To guide participants through a program of learning, CPE program sponsors of self study programs must elicit participant responses to test for understanding

of the material. Appropriate feedback must be provided. Satisfactory completion of the program must be confirmed during or after the program through a qualified assessment.

.23 S9-02. Use of review questions or other content reinforcement tools. Review questions or other content reinforcement tools must be placed throughout the program in sufficient intervals to allow the participant the opportunity to evaluate the material that needs to be re-studied. At least three review questions or other content reinforcement tools with score responses per CPE credit must be included. If the program is marketed for one-half CPE credits, then two review questions or other content reinforcement tools with scored responses must be included. Other content reinforcement tools with scored responses, such as simulations, that guide participants through structured decisions can be used in lieu of review questions.

After the first full credit and the minimum of three review questions or other content reinforcement tools with scored responses, additional review questions or other content reinforcement tools with scored responses are required based on the additional credit measurement amount of the program as follows:

Additional Credit	Additional Review Questions or Other Content Reinforcement Tools
0.2	0
0.4	1
0.5	2
0.6	2
0.8	3
Next full credit	3

.24 S9-03. Evaluative and reinforcement feedback on review questions or other content reinforcement tools. When review questions, such as the multiple choice method are used, evaluative feedback for each incorrect response must explain specifically why each response is wrong, and reinforcement feedback must be provided for correct responses, even when the minimum number of review questions or other content reinforcement tools requirement has otherwise been exceeded. When other content reinforcement tools, such as drag-and-drop, rank order, or matching activities, are used, then it is permissible to provide single feedback to explain the correct response. Other content reinforcement tools, such as simulations, that guide participants through structured decisions could provide feedback at irregular intervals or at the end of the learning experience. In those situations, single feedback would be permissible. "True or false" questions do not count toward the number of required review questions per CPE credit. Sponsors that elect to include "true or false" questions must provide evaluative and reinforcement feedback. Forced choice questions other than "true or false" questions, when used as part of an overall learning strategy, are allowed as review questions and can be counted in the number of review questions required per CPE credit. There is no minimum passing rate required for review questions or other content reinforcement tools.

.25 S9-04. Qualified assessment requirements. To provide evidence of satisfactory completion of the course, CPE program sponsors of self study programs must require participants to successfully complete a qualified assessment during or after the program with a cumulative minimum passing grade of at least 70 percent before issuing CPE credit for the course. Assessments

may contain questions of varying format (for example, multiple choice, essay, and simulations). At least 5 questions and scored responses per CPE credit must be included on the qualified assessment or 3 assessment questions and scored responses if the program is marketed for one-half CPE credits. For example, the qualified assessment for a 5-credit course must include at least 25 questions and scored responses. Alternatively, a 5 1/2 credit course must include at least 28 questions and scored responses. Except in courses in which recall of information is the learning strategy, duplicate review and qualified assessment questions are not allowed. "True or false" questions are not permissible on the qualified assessment.

After the first full credit and the minimum of 5 questions and scored responses per CPE credit, additional qualified assessment questions and scored responses are required based on the additional credit measurement amount of the program as follows:

Additional Credit	Additional Questions/ Scored Responses
0.2	1
0.4	2
0.5	3
0.6	3
0.8	4
Next full credit	5

If a pre-program assessment is used in the course, then the pre-program assessment cannot be included in the determination of the recommended CPE credits for the course. If a pre-program assessment is used and feedback is provided, then duplicate pre-program assessment and qualified assessment questions are not permitted. If a pre-program assessment is used and feedback is not provided, then duplicate pre-program assessment and qualified assessment questions are permissible. Feedback may comply with the feedback for review questions as described in S9-03 or take the form of identifying correct and incorrect answers.

A qualified assessment must measure a representative number of the learning objectives for the program. A representative number of the learning objectives is 75 percent or more of the learning objectives for the program. The representative number of the learning objectives can be less than 75 percent of the learning objectives for the program only if a randomized question generator is used and the test bank used in the creation of the assessment includes at least 75 percent of the learning objectives for the program. Assessment items must be written to test the achievement of the stated learning objectives of the course.

.26 S9-05. Feedback on qualified assessment. Providing feedback on the qualified assessment is at the discretion of the CPE program sponsor. If the CPE program sponsor chooses to provide feedback and

- uses a test bank, then the CPE program sponsor must ensure that the question test bank is of sufficient size to minimize overlap of questions on the qualified assessment for the typical repeat test taker. Feedback may comply with the feedback for review questions as described in S9-03, or take the form of identifying correct and incorrect answers.

- does not use a test bank, whether or not feedback can be given depends on whether the participant passes the qualified assessment, then
 - on a failed assessment, the CPE program sponsor may not provide feedback to the test taker.
 - on assessments passed successfully, CPE program sponsors may choose to provide participants with feedback. This feedback may comply with the type of feedback for review questions as described in S9-03 or take the form of identifying correct and incorrect answers.

.27 S9-06. Program or course expiration date. Course documentation must include an expiration date (the time by which the participant must complete the qualified assessment). For individual courses, the expiration date is no longer than one year from the date of purchase or enrollment. For a series of courses to achieve an integrated learning plan, the expiration date may be longer.

.28 S9-07. Based on materials developed for instructional use. Self study programs must be based on materials specifically developed for instructional use and not on third party materials. Self study programs requiring only the reading of general professional literature, IRS publications, or reference manuals followed by a test will not be acceptable. However, the use of the publications and reference materials in self study programs as supplements to the instructional materials could qualify if the self study program complies with each of the CPE standards.

Instructional materials for self study include teaching materials which are developed for instructional educational purposes. These materials must demonstrate the expertise of the author(s). At a minimum, instructional materials must include the following items:

1. An overview of topics
2. The ability to find information quickly (for example, an index, a detailed menu or key word search function)
3. The definition of key terms (for example, a glossary or a search function that takes a participant to the definition of a key word)
4. Instructions to participants regarding navigation through the course, course components, and course completion
5. Review questions with feedback
6. Qualified assessment

.29 Standard No. 10. Nano learning programs must employ instructional strategies that clearly define a minimum of one learning objective, guide the participant through a program of learning and provide evidence of a participant's satisfactory completion of the program. Satisfactory completion of the program must be confirmed at the conclusion of the program through a qualified assessment. Review questions or other content reinforcement tools that comply with S9-03 may be included in a nano learning program.

.30 S10-01. Qualified assessment requirements. To provide evidence of satisfactory completion of the course, CPE program sponsors of nano learning programs must require participants to successfully complete a qualified assessment with a passing grade of 100 percent before issuing CPE credit for the course. Assessments may contain questions of varying format (for example, multiple choice, rank order, and matching). Only two questions must be

included on the qualified assessment. "True or false" questions are not permissible on the qualified assessment. If the participant fails the qualified assessment, then the participant must re-take the nano learning program. The number of re-takes permitted a participant is at the sponsor's discretion.

.31 S10-02. Feedback on qualified assessment. Providing feedback on the qualified assessment is at the discretion of the CPE program sponsor. If the CPE program sponsor chooses to provide feedback and

- uses a test bank, then the CPE program sponsor must ensure that the question test bank is of sufficient size for no overlap of questions on the qualified assessment for the typical repeat test taker. If the multiple choice method is used, evaluative feedback for each incorrect response must explain specifically why each response is wrong and reinforcement feedback must be provided for correct responses. If rank order or matching questions are used, then it is permissible to provide single feedback to explain the correct response. Feedback may also take the form of identifying correct and incorrect answers.
- does not use a test bank, whether or not feedback can be given depends on whether the participant passes the qualified assessment, then
 - on a failed assessment, the CPE program sponsor may not provide feedback to the test taker.
 - on assessments passed successfully, CPE program sponsors may choose to provide participants with feedback. This feedback may comply with the type of feedback described in the preceding paragraph or take the form of identifying correct and incorrect answers.

.32 S10-03. Program or course expiration date. Course documentation must include an expiration date. The expiration date is no longer than one year from the date of purchase or enrollment.

.33 S10-04. Based on materials developed for instructional use. Nano learning programs must be based on materials specifically developed for instructional use and not on third party materials. Nano learning programs requiring only the reading of general professional literature, IRS publications or reference manuals followed by an assessment will not be acceptable.

Acceptable instructional materials for a nano learning program include intentional, engaged learning activities developed for focused content delivery. Nano learning programs may incorporate techniques such as visuals, slide reinforcements, role play, demonstrations, or use of a white board. The intent of a nano learning program is to transfer knowledge that is interactive—seeking to teach by example—to supply information to understand a specific concept, complete a certain task or computation, or to problem-solve or make decisions through role play or demonstration. At a minimum, nano learning programs must include the following items:

1. The learning objective(s) of the program
2. Any instructions that participants need to navigate through the program
3. A qualified assessment

.34 Standard No. 11. Blended learning programs must employ instructional strategies that clearly define learning objectives and guide

the participant through a program of learning. Pre-program, post-program, and homework assignments should enhance the learning program experience and must relate to the defined learning objectives of the program.

.35 S11-01. Guide participant through a program of learning. The blended learning program includes both asynchronous and synchronous learning; different instructional strategies (for example, lectures, discussion, guided practice, reading, games, case studies, and simulation); different instructional delivery methods (group live, group Internet based, nano learning, or self study); or different levels of guidance (for example, a program led by an individual, instructor or subject matter expert, or group and social learning). To guide participants through the learning process, CPE program sponsors must provide clear instructions and information to participants that summarize the different components of the program and what must be completed or achieved during each component in order to qualify for CPE credits. The CPE program sponsor must document the process and components of the course progression and completion of components by the participants.

.36 S11-02. Primary components of blended learning program are synchronous learning activities. If the primary components of the blended learning program are synchronous learning activities, then CPE credits for pre-program, post-program, and homework assignments cannot constitute more than 25 percent of the total CPE credits available for the blended learning program.

.37 S11-03. Primary components of blended learning program are asynchronous learning activities. If the primary components of the blended learning program are asynchronous learning activities, then the blended learning program must incorporate a qualified assessment in which participants demonstrate achievement of the learning objectives of the program.

.38 S11-03.1. Qualified assessment requirements. A qualified assessment must measure a representative number of learning objectives for the program. A representative number of the learning objectives is 75 percent or more of the learning objectives for the program. The qualified assessment must be completed during or after the program with a cumulative minimum passing grade of at least 70 percent before issuing CPE credit for the course.

.39 S11-04. A course for credit from an accredited university or college. A course from an accredited university or college that is successfully completed for credit will be considered to be a blended learning program. CPE program sponsors should refer to respective state board of accountancy requirements for definition of an accredited university or college.

Standards for CPE Program Presentation

.40 Standard No. 12. CPE program sponsors must provide descriptive materials that enable CPAs to assess the appropriateness of learning activities. For CPE program sponsors whose courses are developed for sale or for external audiences (that is, not internal training), CPE program sponsors must make the following information available in advance:

- Learning objectives
- Instructional delivery methods
- Recommended CPE credit and recommended field of study
- Prerequisites

- **Program knowledge level**
- **Advance preparation**
- **Program description**
- **Course registration and, where applicable, attendance requirements**
- **Refund policy for courses sold for a fee or cancellation policy**
- **Complaint resolution policy**
- **Official NASBA sponsor statement, if an approved NASBA sponsor (explaining final authority of acceptance of CPE credits)**

For CPE program sponsors whose courses are purchased or developed for internal training only, CPE program sponsors must make the following information available in advance:

- **Learning objectives**
- **Instructional delivery methods**
- **Recommended CPE credit and recommended field of study**
- **Prerequisites**
- **Advance preparation**
- **Program knowledge level (for optional internal courses only)**
- **Program description (for optional internal course only)**

.41 S12-01. Disclose significant features of program in advance. For potential participants to effectively plan their CPE, the program sponsor must disclose the significant features of the program in advance (such as through the use of brochures, website, electronic notices, invitations, direct mail, or other announcements). When CPE programs are offered in conjunction with non-educational activities, or when several CPE programs are offered concurrently, participants must receive an appropriate schedule of events indicating those components that are recommended for CPE credit. The CPE program sponsor's registration and attendance policies and procedures must be formalized, published, and made available to participants and include refund and cancellation policies as well as complaint resolution policies.

.42 S12-02. Disclose advance preparation and prerequisites. CPE program sponsors must distribute program materials in a timely manner and encourage participants to complete any advance preparation requirements. All programs must clearly identify prerequisite education, experience, and advance preparation requirements, if any, in the descriptive materials. Prerequisites, if any, must be written in precise language so that potential participants can readily ascertain whether they qualify for the program.

.43 Standard No. 13. CPE program sponsors must ensure instructors are qualified with respect to both program content and instructional strategies used.

.44 S13-01. Qualifications of instructors. Instructors are key ingredients in the learning process for any group or blended learning program. Therefore, it is imperative that CPE program sponsors exercise great care in selecting qualified instructors for all group or blended learning programs. Qualified instructors are those who are capable, through training, education, or experience

of communicating effectively and providing an environment conducive to learning. They must be competent and current in the subject matter, skilled in the use of the appropriate instructional strategies and technology, strive to engage participants and prepared in advance.

.45 S13-02. Evaluation of instructor's performance. CPE program sponsors should evaluate the instructor's performance at the conclusion of each program to determine the instructor's suitability to serve in the future.

.46 Standard No. 14. CPE program sponsors must employ an effective means for evaluating learning activity quality with respect to content and presentation, as well as provide a mechanism for participants to assess whether learning objectives were met.

.47 S14-01. Required elements of evaluation. The objectives of evaluation are to assess participant and instructor satisfaction with specific programs and to increase subsequent program effectiveness. Evaluations, whether written or electronic, must be solicited from participants and instructors for the overall program, including self study and nano learning programs. Sponsors may elect to solicit evaluations for each session within an overall program. Evaluations determine, among other things, whether

- stated learning objectives were met.
- stated prerequisite requirements were appropriate and sufficient.
- program materials, including the qualified assessment, if any, were relevant and contributed to the achievement of the learning objectives.
- time allotted to the learning activity was appropriate.
- instructors were effective. (Note: This topic does not need to be included in evaluations for self study and nano learning programs.)

If the instructor is actively involved in the development of the program materials, then it is not necessary to solicit an evaluation from the instructor.

.48 S14-02. Evaluation results. CPE program sponsors must periodically review evaluation results to assess program effectiveness and should inform developers and instructors of evaluation results.

.49 Standard No. 15. CPE program sponsors must ensure instructional strategies employed are appropriate for the learning activities.

.50 S15-01. Assess instructional strategy in context of program presentation. CPE program sponsors must assess the instructional strategies employed for the learning activities to determine whether the delivery is appropriate and effective.

.51 S15-02. Facilities and technology appropriateness. Learning activities must be presented in a manner consistent with the program materials provided. Integral aspects of the learning environment that should be carefully monitored include the number of participants and the facilities and technologies employed in the delivery of the learning activity.

Standards for CPE Program Measurement

.52 Standard No. 16. Sponsored learning activities are measured by actual program length, with one 50-minute period equal to one CPE credit. Sponsors may recommend CPE credits under the following scenarios:

- **Group programs, independent study, and blended learning programs**—A minimum of one full credit must be awarded initially, but after the first credit has been earned, credits may be awarded in one-fifth increments or in one-half increments (1.0, x.2, x.4, x.5, x.6, x.8, and so on).
- **Self study**—A minimum of one-half credit must be awarded initially, but after the first full credit has been earned, credits may be awarded in one-fifth increments or in one-half increments (0.5, 1.0, x.2, x.4, x.5, x.6, x.8, and so on).
- **Nano learning**—Credits must be awarded only as one-fifth credit (0.2 credit). A 20-minute program would have to be produced as two stand-alone nano learning programs.

CPE Program	Minimum initial credit that must be earned	After first credit has been earned, credit may be earned in these increments, in addition to one whole credit
Group	One	One-fifth or one-half
Independent study	One	One-fifth or one-half
Blended learning	One	One-fifth or one-half
Self study	One-half	One-fifth or one-half
Nano learning	One-fifth	Not applicable (single nano learning program is one-fifth credit)

Sponsors may round down CPE credits awarded to the nearest one-fifth, one-half, or whole credit, at their discretion and as appropriate for the instructional delivery method; however, the CPA claiming CPE credits should refer to respective state board requirements regarding acceptability of one-fifth and one-half CPE credits.

Only learning content portions of programs (including pre-program, post-program, and homework assignments, when incorporated into a blended learning program) qualify toward eligible credit amounts. Time for activities outside of actual learning content including, for example, excessive welcome and introductions, housekeeping instructions, and breaks, is not accepted toward credit.

.53 S16-01. Learning activities with individual segments. For learning activities in which individual segments are less than 50 minutes, the sum of the segments would be considered one total program. For example, five 30-minute presentations would equal 150 minutes and would be counted as three CPE credits. When the total minutes of a sponsored learning activity are greater than 50, but not equally divisible by 50, the CPE credits granted must be rounded down to the nearest credit basis depending on the instructional delivery method of the program. For example, a group live program must be rounded down to the nearest one-fifth, one-half, or whole credit. Thus, learning activities with segments totaling 140 minutes would be granted two and four-fifths CPE credits if using one-fifth increments and two and one-half credits if using one-half increments.

For learning activities in which segments are classified in multiple fields of study, the CPE credits granted should first be computed based on the content time of the total program. Next, the CPE credits granted should be allocated

to the fields of study based on the field of study content time. If the sum of the individual segments by field of study content time does not equal the CPE credits computed based on the content time for the total program, then the difference should be allocated to the primary field of study for the program.

.54 S16-02. Responsibility to monitor attendance. Although it is the participant's responsibility to report the appropriate number of credits earned, CPE program sponsors must maintain a process to monitor individual attendance at group programs to assign the correct number of CPE credits. A participant's self-certification of attendance alone is not sufficient.

.55 S16-03. Monitoring mechanism for group Internet based programs. In addition to meeting all other applicable group program standards and requirements, group Internet based programs must employ some type of real time monitoring mechanism to verify that participants are participating during the course. The monitoring mechanism must be of sufficient frequency and lack predictability to ensure that participants have been engaged throughout the program. The monitoring mechanism must employ at least three instances of interactivity completed by the participant per CPE credit. CPE program sponsors should verify with respective boards of accountancy on specific interactivity requirements. Additional monitoring mechanisms are required based on the additional credit amount of the program as follows:

Additional Credit	Additional Monitoring Mechanisms
0.2	0
0.4	1
0.5	2
0.6	2
0.8	3
Next full credit	3

.56 S16-04. Small group viewing of group Internet based programs. In situations where small groups view a group Internet based program such that one person logs into the program and asks questions on behalf of the group, documentation of attendance is required in order to award CPE credits to the group of participants. Participation in the group must be documented and verified by the small group facilitator or administrator in order to authenticate attendance for program duration.

.57 S16-05. University or college credit course. For university or college credit courses that meet these CPE Standards, each unit of college credit shall equal the following CPE credits:

- Semester System 15 credits
- Quarter System 10 credits

.58 S16-06. University or college noncredit course. For university or college noncredit courses that meet these CPE standards, CPE credit shall be awarded only for the actual classroom time spent in the noncredit course.

.59 S16-07. Participant preparation time. Credit is not granted to participants for preparation time, unless the program meets the criteria for blended learning in Standard No. 11.

.60 S16-08. Committee or staff meetings qualification for CPE credits. Only the portions of committee or staff meetings that are designed as programs of learning and comply with these Standards qualify for CPE credit.

.61 Standard No. 17. CPE credit for self study learning activities must be based on one of the following educationally sound and defensible methods:

Method 1: Pilot test of the representative completion time.

Method 2: Computation using the prescribed word count formula.

If a pre-program assessment is used, the pre-program assessment is not included in the CPE credit computation.

.62 S17-01. Method 1—Sample group of pilot testers. A sample of intended professional participants must be selected to test program materials in an environment and manner similar to that in which the program is to be presented. The sample group must consist of at least three qualified individuals who are independent of the program development group.

- For those courses whose target audience includes CPAs, the sample group must be licensed CPAs in good standing, hold an active CPA license or the equivalent of an "active" CPA license in a U.S. jurisdiction, and possess the appropriate level of knowledge before taking the program.
- For those sponsors who are subject to various regulatory requirements that mandate a minimum number of CPE credits and offer courses to non-CPAs, those courses do not have to be pilot tested by licensed CPAs.
- For those courses whose target audience includes CPAs and non-CPAs, the sample group must be representative of the target audience and contain both CPAs, as defined previously, and non-CPAs.

.63 S17-02. Method 1—CPE credit based on representative completion time. The sample does not have to ensure statistical validity; however, if the results of pilot testing are inconsistent, then the sample must be expanded or, if the inconsistent results are outliers, the inconsistent results must be eliminated. CPE credit must be recommended based on the representative completion time for the sample. Completion time includes the time spent taking the final examination and does not include the time spent completing the course evaluation or pre-program assessment. Pilot testers must not be informed about the length of time the program is expected to take to complete. If substantive changes are subsequently made to program materials, whether in one year or over a period of years, further pilot tests of the revised program materials must be conducted to affirm or amend, as appropriate, the representative completion time.

.64 S17-03. Method 1—Requirement for re-pilot testing. If, subsequent to course release, actual participant completion time warrants a change in CPE credit hours, re-pilot testing is required to substantiate a change in CPE credit prospectively.

.65 S17-04. Method 1—Pilot testing when course is purchased from vendor or other developer. CPE program sponsors may purchase courses from other vendors or course developers. For purchased courses where pilot tests were conducted and provided, CPE program sponsors must review results of the course developer's pilot test results to ensure that the results are appropriate. For purchased courses where no pilot tests were conducted or provided, CPE program sponsors must conduct pilot testing or perform the word count formula as prescribed in method 2 in S17-05.

.66 S17-05. Method 2—Basis for prescribed word count formula. The prescribed word count formula begins with a word count of the number

of words contained in the text of the required reading of the self study program and should exclude any material not critical to the achievement of the stated learning objectives for the program. Examples of information material that is not critical and, therefore, *excluded* from the word count are course introduction, instructions to the participant, author/course developer biographies, table of contents, glossary, pre-program assessment, and appendixes containing supplementary reference materials.

Again, only course content text that is critical to the achievement of stated learning objectives should be included in the word count formula. If an author/course developer determines, for example, that including the entire accounting rule or tax regulation is beneficial to the participant, the accounting rule or tax regulation should be included as an appendix to the course as supplementary reference material and excluded from the word count formula. Only pertinent paragraphs or sections of the accounting rule or tax regulation required for the achievement of stated learning objectives should be included in the actual text of the course and therefore included in the word count formula.

Review questions, exercises, and qualified assessment questions are considered separately in the calculation and should not be included in the word count.

.67 S17-06. Method 2—Calculation of CPE credit using the prescribed word count formula. The word count for the text of the required reading of the program is divided by 180, the average reading speed of adults. The total number of review questions (including those above the minimum requirements), exercises and qualified assessment questions is multiplied by 1.85, which is the estimated average completion time per question. These two numbers plus actual audio/video duration time (not narration of the text), if any, are then added together and the result divided by 50 to calculate the CPE credit for the self study program. When the total minutes of a self study program are not equally divisible by 50, the CPE credits granted must be rounded down to the nearest one-half credit, one-fifth credit or whole credit using the guidelines of Standard No. 16.

$$[(\# \text{ of words}/180) + \text{actual audio/video duration time} + (\# \text{ of questions} \times 1.85)] / 50 = \text{CPE credit}$$

.68 S17-07. Method 2—Consideration of audio and video segments in word count formula. If audio and video segments of a self study program constitute additional learning for the participant (that is, not narration of the text), then the actual audio/video duration time may be added to the time calculation as provided in the prescribed word count formula. If the entire self study program constitutes a video, then the prescribed word count formula in S17-06 would consist of the actual video time plus the total number of review questions (including those above the minimum requirements), exercises, and qualified assessment questions multiplied by 1.85, divided by 50 (that is, there would be no word count for text used in the formula).

$$[\text{actual audio/video duration time} + (\# \text{ of questions} \times 1.85)] / 50 = \text{CPE credit}$$

.69 S17-08. Method 2—Word count formula when course is purchased from vendor or other developer. CPE program sponsors may purchase courses from other vendors or course developers. For purchased courses where the word count formula was calculated, CPE program sponsors must review the results of the course developer's word count formula calculation to ensure that results are appropriate. For purchased courses where the word count formula calculation was not performed or provided, CPE program sponsors must perform the word count formula calculation or conduct pilot testing as described in method 1 in S17-01 and S17-02.

.70 S17-09. CPE credit calculation for an adaptive learning self study program. CPE credit for an adaptive learning self study program must be based on one of the following educationally sound and defensible methods:

- Adaptive Learning Method 1: Pilot test of the representative completion time
- Adaptive Learning Method 2: Computation using the prescribed word count formula

.71 S17-10. Adaptive Learning Method 1—Sample group of pilot testers. A sample of intended professional participants must be selected to test program materials in an environment and manner similar to that in which the program is to be presented. The sample group must consist of at least seven qualified individuals who are independent of the program development group.

- For those courses whose target audience includes CPAs, the sample group must be licensed CPAs in good standing, hold an active CPA license or the equivalent of an "active" CPA license in a U.S. jurisdiction, and possess the appropriate level of knowledge before taking the program.
- For those sponsors who are subject to various regulatory requirements that mandate a minimum number of CPE70 credits and offer courses to non-CPAs, those courses do not have to be pilot tested by licensed CPAs.
- For those courses whose target audience includes CPAs and non-CPAs, the sample group must be representative of the target audience and contain both CPAs, as defined previously, and non-CPAs.

.72 S17-11. Adaptive learning self study Method 1—CPE credit based on representative completion time. The sample does not have to ensure statistical validity; however, if the results of pilot testing are inconsistent, then the sample must be expanded or, if the inconsistent results are outliers, the inconsistent results must be eliminated. CPE credit must be recommended based on the representative completion time for the sample. Completion time includes the time spent taking the qualified assessment. Pilot testers must not be informed about the length of time the program is expected to take to complete. If substantive changes are subsequently made to program materials, whether in one year or over a period of years, further pilot tests of the revised program materials must be conducted to affirm or amend, as appropriate, the representative completion time.

.73 S17-12. Adaptive learning self study Method 1—Requirement for re-pilot testing. If, subsequent to course release, actual participant completion time warrants a change in CPE credit hours, re-pilot testing is required to substantiate a change in CPE credit prospectively.

.74 S17-13. Adaptive learning self study Method 1—Pilot testing when course is purchased from vendor or other developer. CPE program sponsors may purchase courses from other vendors or course developers. For purchased courses in which pilot tests were conducted and provided, CPE program sponsors must review results of the course developer's pilot test results to ensure that the results are appropriate. For purchased courses in which no pilot tests were conducted or provided, CPE program sponsors must conduct pilot testing as prescribed in S17-10 and S17-11.

.75 S17-14. Adaptive learning self study Method 2—Computation using the prescribed word count formula. For adaptive learning self study programs, the CPE credit issued must be based on the average word count formula calculation of each potential path the learner could take to complete the

program using the prescribed word count formula as described in S17-16. All potential paths must be documented. For example, if the adaptive learning self study program has nine potential paths a learner could take to complete the program, then the word count formula must be calculated for each of the nine potential paths, with the sum of the results divided by nine.

.76 S17-15. Adaptive learning self study Method 2—Basis for prescribed word count formula. The prescribed word count formula begins with a word count of the number of words contained in the text of the required reading of the adaptive learning self study program and should exclude any material not critical to the achievement of the stated learning objectives for the program. Examples of information material that is not critical and, therefore, excluded from the word count are course introduction, instructions to the participant, author/course developer biographies, table of contents, glossary, pre-program assessment, and appendixes containing supplementary reference materials.

Again, only course content text that is critical to the achievement of stated learning objectives should be included in the word count formula. If an author/course developer determines, for example, that including the entire accounting rule of tax regulation is beneficial to the participant, the accounting rule or tax regulation should be included as an appendix to the course as supplementary reference material and excluded from the word count formula. Only pertinent paragraphs or sections of the accounting rule or tax regulation required for achievement of the stated learning objectives should be included in the actual text of the course and, therefore, included in the word count formula.

Review questions, exercises, and qualified assessment questions are considered separately in the calculation and should not be included in the word count.

.77 S17-16. Adaptive learning self study Method 2—Calculation of CPE credit for each potential learning path using the prescribed word count formula. The word count for the text of the required reading of the program is divided by 180, the average reading speed of adults. The total number of review questions (including those above the minimum requirements), exercises, and qualified assessment questions is multiplied by 1.85, which is the estimated average completion time per question. These two numbers plus actual audio/video duration time (not narration of the text), if any, are then added together and the result divided by 50 to calculate the CPE credit for the adaptive learning self study program. When the total minutes of an adaptive learning self study program are not equally divisible by 50, the CPE credits granted must be rounded down to the nearest one-half credit, one-fifth credit, or whole credit using the guidelines of Standard No. 16.

$$\left[\left(\frac{\text{\# of words}}{180} \right) + \text{actual audio/video duration time} + (\text{\# of questions} \times 1.85) \right] / 50 = \text{CPE credit}$$

.78 S17-17. Adaptive learning self study Method 2—Word count formula when course is purchased from vendor or other developer. CPE program sponsors may purchase from other vendors or course developers. For purchased courses in which the word count formula was calculated, CPE program sponsors must review the results of the course developer's word count formula calculation to ensure that results are appropriate. For purchased courses in which the word count formula calculation was not performed or provided, CPE program sponsors must perform the word count formula calculation or conduct pilot testing as described in method 1.

.79 Standard No. 18. CPE credit for nano learning programs must be based on the duration of the program including review questions or other content reinforcement tools plus the qualified assessment,

which, when combined, should be a minimum of 10 minutes. The maximum credit to be awarded for a single nano learning program is one-fifth (0.2) credit. Sponsors must use Method 2 in S17-07 to confirm that the nano learning program is a minimum of 10 minutes and less than 20 minutes.

.80 Standard No. 19. CPE credit for blended learning programs must equal the sum of the CPE credit determinations for the various completed components of the program. CPE credits could be determined by actual duration time (for example, audio/video duration time or learning content delivery time in a group program) or by a pilot test of the representative completion time as prescribed in S17-01 or word count formula as prescribed in S17-06 (for example, reading, games, case studies, simulations).

.81 Standard No. 20. Instructors and discussion leaders of learning activities may receive CPE credit for their preparation, review, and presentation time to the extent the activities maintain or improve their professional competence and meet the requirements of these Standards. Content reviewers of learning activities may receive CPE credit for actual review time up to the actual number of CPE credits for the programs, subject to the regulations and maximums established by boards of accountancy.

.82 S20-01. Instructor CPE credit parameters. Instructors, discussion leaders, or speakers who present a learning activity for the first time may receive CPE credit for actual preparation time up to 2 times the number of CPE credits to which participants would be entitled, in addition to the time for presentation, subject to regulations and maximums established by the state boards. For example, for learning activities in which participants could receive 8 CPE credits, instructors may receive up to 24 CPE credits (16 for preparation plus 8 for presentation). For repeat presentations, CPE credit can be claimed only if it can be demonstrated that the learning activity content was substantially changed and such change required significant additional study or research.

.83 S20-02. Presenting a program. The CPA claiming CPE credits should refer to respective state board requirements.

.84 S20-03. Content reviewer CPE credit parameters. Content reviewers who review a learning activity for the first time may receive CPE credit for actual review time up to the actual number of CPE credits for the program, subject to regulations and maximums established by state boards. For repeat content reviews, CPE credit can be claimed only if it can be demonstrated that the learning activity content was substantially changed and such change required significant additional study or research.

.85 Standard No. 21. Writers of published articles, books, or CPE programs may receive CPE credit for their research and writing time to the extent it maintains or improves their professional competence.

.86 S21-01. Requirement for content review. Writing articles, books, or CPE programs for publication is a structured activity that involves a process of learning. For the writer to receive CPE credit, the article, book, or CPE program must be formally reviewed by a content reviewer other than the writer. CPE credits should be claimed only upon publication.

.87 S21-02. Authoring a program. As a general rule, receiving CPE credits for authoring and presenting the same program should not be allowed. The CPA claiming CPE credits should refer to respective state board requirements.

.88 Standard No. 22. CPE credits recommended by a CPE program sponsor of independent study must not exceed the time the participant devoted to complete the learning activities specified in the learning contract.

.89 S22-01. CPE credits agreed to in advance. The maximum credits to be recommended by an independent study CPE program sponsor must be agreed upon in advance and must be equated to the effort expended to improve professional competence. The credits cannot exceed the time devoted to the learning activities and may be less than the actual time involved.

Standards for CPE Program Reporting

.90 Standard No. 23. CPE program sponsors must provide program participants with documentation (electronic or paper) of their participation (certificate of completion), which includes the following:

- CPE program sponsor name and contact information
- Participant's name
- Course title
- Date offered or completed
- If applicable, location
- Type of instructional and delivery method used
- Amount of CPE credit recommended by field(s) of study
- Verification by CPE program sponsor representative
- Sponsor identification number or registration number, if required by the state boards
- NASBA time statement stating that CPE credits have been granted on a 50-minute hour
- Any other statements required by board of accountancy

The documentation should be provided as soon as possible and should not exceed 60 days (so that participants can report their earned CPE credits in a timely manner).

.91 S23-01. Entity to award CPE credits and acceptable documentation. The CPE program sponsor is the individual or organization responsible for issuing the certificate of completion and maintaining the documentation required by these Standards. The entity whose name appears on the certificate of completion is responsible for validating the CPE credits claimed by a participant. CPE program sponsors must provide participants with documentation (electronic or paper) to support their claims of CPE credit. Acceptable evidence of completion includes the following:

- For group, blended learning, and independent study programs, a certificate or other verification supplied by the CPE program sponsor
- For self study and nano learning programs, a certificate supplied by the CPE program sponsor after satisfactory completion of a qualified assessment

- For instruction or content review credit, appropriate supporting documentation that complies with the requirements of the respective state boards subject to the guidelines in Standard No. 20 in "Standards for CPE Program Measurement"
- For a university or college course that is successfully completed for credit, a record or transcript of the grade the participant received
- For university or college noncredit courses, a certificate of attendance issued by a representative of the university or college
- For published articles, books, or CPE programs:
 - A copy of the publication (or in the case of a CPE program, course development documentation) that names the CPA as author or contributor
 - A statement from the writer supporting the number of CPE hours claimed
 - The name and contact information of the content reviewer(s) or publisher

.92 S23-02. Certificate issuance for simultaneous delivery of a group live and group Internet based program. In circumstances where the CPE program sponsor is providing simultaneous delivery of a group live and group Internet based program, the CPE program sponsor, at its discretion, may issue the certificate of completion to all program participants by awarding CPE credits under the instructional delivery method attended by the majority of the participants. The delivery and attendance monitoring requirements of the respective instructional delivery methods still apply.

.93 Standard No. 24. CPE program sponsors must retain adequate documentation (electronic or paper) for a minimum of five years to support their compliance with these standards and the reports that may be required of participants.

.94 S24-01. Required documentation elements. Evidence of compliance with responsibilities set forth under these standards that is to be retained by CPE program sponsors includes the following:

- Records of participation.
- Dates and locations.
- Author/instructor, author/developer, and content reviewer, as applicable, names and credentials. For the CPA and tax attorney acting as an author/instructor, author/developer, and content reviewer for accounting, auditing, or tax program(s), the state of licensure, license number, and status of license should be maintained. For the enrolled agent acting in such capacity for tax program(s), information regarding the enrolled agent number should be maintained.
- Number of CPE credits earned by participants.
- Results of program evaluations.
- Program descriptive materials (course announcement information).

Information to be retained by CPE program sponsors includes copies of program materials, evidence that the program materials were developed and reviewed by qualified parties, and a record of how CPE credits were determined.

.95 S24-02. Maintenance of documentation as basis for CPE credit for self study programs. For CPE program sponsors using method 1 (pilot tests) as the basis for CPE credit for self study programs, as well as adoptive learning self study programs, appropriate pilot test records must be retained regarding the following:

- When the pilot test was conducted
- The intended participant population
- How the sample of pilot testers was selected
- Names and credentials and relevant experience of sample pilot test participants
- For CPA pilot testers, the state of licensure, license number, and status of license should be maintained.
- A summary of pilot test participants' actual completion time
- Statement from each pilot tester to confirm that the pilot tester is independent from the course development group and that the pilot tester was not informed in advance of the expected completion time

For CPE program sponsors using method 2 (word count formula) as the basis for CPE credit for self study programs, the word count formula calculation, as well as the supporting documentation for the data used in the word count formula (for example, word count; number of review questions, exercises, and final examination questions; duration of audio or video segments, or both, if applicable; and actual calculation), must be retained. For adaptive learning self study programs, all potential paths that a learner could take to complete the program must be documented and retained.

.96 S24-03. Maintenance of documentation of element of engagement for group live programs. In addition to the requirements in S24-01, group live CPE program sponsors must retain the program outline, agenda, speaker notes or other documentation that evidences the element of engagement related to course content during each credit of CPE planned for the group live program. As noted in S7-01, in certain limited circumstances, such as a high-profile keynote session, an element of engagement may not be appropriate. In such cases, the sponsor should document the reasons for justification.

.97 S24-04. Maintenance of documentation of instructions and information to participants regarding the components that comprise a blended learning program. In addition to the requirements of S24-01, blended learning CPE program sponsors must retain clear instructions and information that summarizes the different components of the blended learning program and what must be completed or achieved during each component in order to qualify for CPE credits. The CPE program sponsor must also retain documentation of the course progression and what CPE credits were earned by participants upon the completion of the components.

.98 S24-05. Maintenance of documentation of an independent study program. The CPE program sponsor of independent study learning activities must retain the approved, signed independent study learning contract. The CPE program sponsor must also retain the documentation to evidence program completion, such as the written report developed by the participant, a certification that the participant has demonstrated the application of learning

objectives, or a certification that the participant has performed a live demonstration, oral examination, or presentation to a subject matter expert.

Effective Date

.99 Unless otherwise established by state licensing bodies or other professional organizations, these standards are to be effective on December 31, 2019.

CPE Section 400

Glossary

Revised, December 2019.

.01 Adaptive learning self study program. A self study program that uses a computer algorithm, other predictive analytics tools, or learner-driven selections to orchestrate interaction with the learner and deliver customized learning activities to assist the learner in meeting the course's stated learning objectives. CPE credit for an adaptive learning self study program must be determined based on the methodologies detailed in S17-09 through S17-17.

.02 Advanced. Program knowledge level most useful for individuals with mastery of the particular topic. This level focuses on the development of in-depth knowledge, a variety of skills, or a broader range of applications. Advanced level programs are often appropriate for seasoned professionals within organizations; however, they may also be beneficial for other professionals with specialized knowledge in a subject area.

.03 Asynchronous. A learning activity in which the participant has control over time, place or pace of learning.

.04 Basic. Program knowledge level most beneficial to CPAs new to a skill or an attribute. These individuals are often at the staff or entry level in organizations, although such programs may also benefit a seasoned professional with limited exposure to the area.

.05 Blended learning program. An educational program that includes both asynchronous and synchronous learning activities, and incorporates different instructional delivery methods or instructional strategies, or different levels of guidance.

.06 Content reinforcement tools. Tools used within the overall learning activity to reinforce learning and influence behavior change throughout the learning or at the end of the learning. Examples include but are not limited to simulations, drag-and-drop, rank order, or matching activities.

.07 Content reviewer. Individuals or teams qualified in the subject matter other than those who developed the content.

.08 Continuing professional education (CPE). An integral part of the lifelong learning required to provide competent service to the public. The set of activities that enables CPAs to maintain or improve their professional competence.

.09 CPE credit. Fifty minutes of participation in a program of learning equals one CPE credit.

.10 CPE program sponsor. The individual or organization responsible for issuing the certificate of completion, and maintaining the documentation required by the Statement on Standards for CPE Programs.

.11 Elements of engagement. Tools within the overall learning activity of a group live program to encourage the participation of learners within the program. Examples include but are not limited to group discussion, polling questions, instructor-posed question with time for participant reflection, role play, demonstration or use of a case study with different engagement elements throughout the program.

.12 Evaluative feedback. Specific response to incorrect answers to questions in self study programs.

.13 Group Internet based program. Individual participation in synchronous learning with real-time interaction of an instructor or subject matter expert and built-in processes for attendance and interactivity.

.14 Group live program. Synchronous learning in a group environment with real time interaction of an instructor or subject matter expert that provides the required elements of attendance monitoring and engagement.

.15 Group program. Any group live or group Internet based programs.

.16 Independent study. An educational process designed to permit a participant to learn a given subject under a learning contract with a CPE program sponsor.

.17 Instructional delivery methods. Delivery formats used for CPE programs as defined within these Standards: group live, group Internet based, self study, nano learning, and blended learning.

.18 Instructional strategies. Strategies such as but not limited to case studies, computer-assisted learning, lectures, group interaction, programmed instruction, and use of audiovisual aids employed within the instructional delivery methods of group, self study, or independent study programs or other innovative programs.

.19 Intermediate. Program knowledge level that builds on a basic program and is most appropriate for CPAs with detailed knowledge in a particular topic. Such persons are often at a mid-level within the organization, with operational or supervisory responsibilities.

.20 Learning activity. An educational endeavor that maintains or improves professional competence.

.21 Learning contract. A written contract signed by an independent study participant and a qualified CPE program sponsor prior to the commencement of the independent study.

.22 Learning objectives. Measurable outcomes that participants should accomplish upon completion of a learning activity. Learning objectives are useful to program developers in deciding appropriate instructional strategies and allocating time to various subjects.

.23 Nano learning program. A program designed to permit a participant to learn a given subject in a minimum of 10 minutes and less than 20 minutes through the use of electronic media (including technology applications and processes and computer-based or web-based technology) and without interaction with a real-time instructor. A nano learning program differs from a self study program in that it is typically focused on a single learning objective and is not paper-based. A nano learning program is not a group program. Nano learning is not a substitute for comprehensive programs addressing complex issues.

.24 Overview. Program knowledge level that provides a general review of a subject area from a broad perspective. These programs may be appropriate for professionals at all organizational levels.

.25 Pilot test. A method to determine the recommended CPE credit for self study programs that involves sampling of individuals who are independent of the development team and are representative of the intended participants to measure the representative completion time.

.26 Pre-program assessment. A method of measuring prior knowledge that is given before the participant has access to the course content of the program.

.27 Professional competence. Having requisite technical competence, professional skills, values, ethics and attitudes to provide quality services as defined by the technical and ethical standards of the profession. The expertise needed to undertake professional responsibilities and to serve the public interest.

.28 Program of learning. A collection of learning activities that are designed and intended as continuing education and that comply with these Standards.

.29 Qualified assessment. A method of measuring the achievement of a representative number of the learning objectives for the learning activity.

.30 Reinforcement feedback. Specific responses to correct answers to questions in self study programs.

.31 Self study program. An educational program completed individually without the assistance or interaction of a real-time instructor.

.32 Social learning. Learning from one's peers in a community of practice through observation, modeling, and application.

.33 Subject matter expert. A person who has expertise in a particular area or topic. Expertise may be demonstrated through practical experience or education, or both.

.34 Synchronous. A group program in which participants engage simultaneously in learning activities.

.35 Word count formula. A method, detailed under S17-05 method 2, to determine the recommended CPE credit for self study programs that uses a formula including word count of learning material, number of questions and exercises, and duration of audio and video segments.

.36 Update. Program knowledge level that provides a general review of new developments. This level is for participants with a background in the subject area who desire to keep current.
