- has the ability to pay its debts as they mature.

In the context of particular transactions, other terms are sometimes used or defined by the parties as equivalents of or substitutes for the preceding terms (for example, *fair salable value of assets exceeds liabilities*). These terms, and those matters listed previously, are hereinafter referred to as *matters relating to solvency*. The prohibition extends to providing assurance concerning all such terms.

.04 Section 105, *Concepts Common to All Attestation Engagements*, indicates that one of the preconditions for performing an attestation engagement is that the criteria to be applied in the preparation and evaluation of the subject matter are suitable and will be available to the intended users.⁴ Section 105 also indicates that suitable criteria exhibit all the following characteristics:⁵

- *Relevance*. Criteria are relevant to the subject matter.
- *Objectivity*. Criteria are free from bias.
- *Measurability*. Criteria permit reasonably consistent measurements, qualitative or quantitative, of subject matter.
- *Completeness*. Criteria are complete when subject matter prepared in accordance with them does not omit relevant factors that could reasonably be expected to affect decisions of the intended users made on the basis of the subject matter.

.05 The matters relating to solvency mentioned in paragraph .03 of this interpretation are subject to legal interpretation under, and varying legal definition in, the United States Bankruptcy Code and various state fraudulent conveyance and transfer statutes. Because these matters are not clearly defined in an accounting sense and, therefore, are subject to varying interpretations, they do not provide the practitioner with suitable criteria required to evaluate the subject matter or an assertion. In addition, lenders are concerned with legal issues on matters relating to solvency, and the practitioner is generally unable to evaluate or provide assurance on these matters of legal interpretation. Therefore, practitioners are precluded from giving any form of assurance on matters relating to solvency or any financial presentation of matters relating to solvency.

.06 Under existing AICPA standards, the practitioner may provide a client with various professional services that may be useful to the client in connection with a financing. These services include the following:

- Audit of historical financial statements
- Review of historical financial information (a review in accordance with AU-C section 930, *Interim Financial Information*, of interim financial information or in accordance with AR-C section 90A, *Review of Financial Statements*)
- Examination or review of pro forma financial information (section 310, *Reporting on Pro Forma Financial Information*).

⁴ Paragraph .25b(ii) of section 105, *Concepts Common to All Attestation Engagements*.

⁵ Paragraph .A42 of section 105.

- Examination of prospective financial information in accordance with section 305, *Prospective Financial Information*, or compilation of prospective financial information in accordance with AR-C section 80A, *Compilation Engagements*.⁶

.07 Although a practitioner may not provide an agreed-upon procedures report under section 215, *Agreed-Upon Procedures Engagements*, that addresses matters related to solvency, a practitioner may provide an agreed-upon procedures report that addresses other subject matter that can be useful to a client or lender in connection with a financing. For example, the practitioner may perform an agreed-upon procedures engagement in which the client and lender specify the procedures to be applied to various financial presentations, such as historical financial information, pro forma financial information, and prospective financial information, which can be useful to a client or lender in connection with a financing.

.08 The practitioner should be aware that certain of the services described in paragraph .06 require that the practitioner have an appropriate level of knowledge of the entity's accounting and financial reporting practices and its internal control. This has ordinarily been obtained by the practitioner auditing historical financial statements of the entity for the most recent annual period or by otherwise obtaining an equivalent knowledge base. When considering acceptance of an engagement relating to a financing, the practitioner should consider whether he or she can perform these services without an equivalent knowledge base.

.09 Section 215 indicates that the practitioner's agreed-upon procedures report should not express an opinion or conclusion about whether the subject matter is in accordance with (or based on) the criteria or whether the assertion is fairly stated.⁷ Accordingly, a report on agreed-upon procedures should not express an opinion or conclusion on matters relating to solvency or any financial presentation of matters relating to solvency (for example, fair salable value of assets less liabilities or fair salable value of assets less liabilities, contingent liabilities, and other commitments). A practitioner's report on the results of applying agreed-upon procedures should contain the report elements set forth in section 215 (or section 305 if applying agreed-upon procedures to prospective financial information).⁸ The practitioner's report on the results of applying agreed-upon procedures should state that

- the service has been requested in connection with a financing (no reference should be made to any solvency provisions in the financing agreement).
- no representations are provided regarding questions of legal interpretation.
- no assurance is provided concerning the borrower's
 - solvency,
 - adequacy of capital, or
 - ability to pay its debts.

⁶ Paragraph .01 of AR-C section 80A, *Compilation Engagements*. Section 305, *Prospective Financial Information*, does not address compilations of prospective financial information—a service that is included in AT section 301, *Financial Forecasts and Projections*. Paragraph .01 of AR-C section 80A states that AR-C section 80A (which is applicable to compilations of historical financial statements) also may be applied, adapted as necessary in the circumstances, to other historical or prospective financial information.

⁷ Paragraph .25 of section 215, *Agreed-Upon Procedures Engagements*.

⁸ Paragraph .35 of section 215 and paragraph .39 of section 305.

- the procedures should not be taken to supplant any additional inquiries and procedures that the lender should undertake in its consideration of the proposed financing.
- where applicable, an audit of recent historical financial statements has previously been performed and that no audit of any historical financial statements for a subsequent period has been performed. In addition, if any services have been performed pursuant to paragraph .06, they may be referred to.

.10 The financing agreement ordinarily specifies the date, often referred to as the *cut-off date*, to which the report is to relate (for example, a date three business days before the date of the report). The report should state that the inquiries and other procedures carried out in connection with the report did not cover the period from the cut-off date to the date of the report.

.11 The practitioner might consider furnishing the client with a draft of the agreed-upon procedures report. The draft report should deal with all matters expected to be covered in terms expected to be used in the final report. The draft report should be identified as a draft in order to avoid giving the impression that the procedures described therein have been performed. This practice of furnishing a draft report at an early point permits the practitioner to make clear to the client and lender what they may expect the accountant to furnish and gives them an opportunity to change the financing agreement or the agreed-upon procedures if they so desire. [Issue Date: May 1988; Amended: February 1993; Revised: January 2001; November 2006; Revised: December 2012; Revised: April 2016, effective for practitioners' reports dated on or after May 1, 2017.]

2. Applicability of Attestation Standards to Litigation Services

.12 Question—Does Interpretation No. 1, "Responding to Requests for Reports on Matters Relating to Solvency," of section 105 prohibit a practitioner from providing expert testimony, as described in section 105, before a trier of fact on matters relating to solvency?⁹

.13 Interpretation—No. Matters relating to solvency mentioned in paragraph .03 of Interpretation No. 1 are subject to legal interpretation under, and varying legal definition in, the United States Bankruptcy Code and various state fraudulent conveyance and transfer statutes. Because these matters are not clearly defined in an accounting sense and, therefore, subject to varying interpretations, they do not provide the practitioner with the suitable criteria required to evaluate the assertion. Thus, Interpretation No. 1 prohibits a practitioner from providing any form of assurance in reporting upon examination, review, or agreed-upon procedures engagements about matters relating to solvency (as defined in paragraph .03 of Interpretation No. 1).

.14 However, a practitioner who is involved with pending or potential formal legal or regulatory proceedings before a trier of fact in connection with the resolution of a dispute between two or more parties may provide an expert opinion or consulting advice about matters relating to solvency. The prohibition in Interpretation No. 1 does not apply in such engagements because as part of the legal or regulatory proceedings, each party to the dispute has the opportunity to analyze and challenge the legal definition and interpretation of the matters relating to solvency and the criteria the practitioner uses to evaluate matters

⁹ Paragraph .A2 of section 105.

related to solvency. Such services are not intended to be used by others who do not have the opportunity to analyze and challenge such definitions and interpretations. [Issue Date: July 1990; Revised: January 2001; Revised: April 2016, effective for practitioners' reports dated on or after May 1, 2017.]

3. Providing Access to or Copies of Engagement Documentation to a Regulator^{10, 11}

.15 Question—Section 105 states that "Because engagement documentation often contains confidential information, the practitioner should adopt reasonable procedures to maintain the confidentiality of that information."¹² However, practitioners are sometimes required by law, regulation, or contract¹³ to provide a regulator, or a duly appointed representative, access to engagement documentation. For example, a regulator may request access to the engagement documentation to fulfill a quality review requirement or to assist in establishing the scope of a regulatory examination. Furthermore, as part of the regulator's review of the engagement documentation, the regulator may request copies of all or selected portions of the engagement documentation during or after the review. The regulator may intend, or decide, to make copies (or information derived from the engagement documentation) available to others, including other governmental agencies, for their particular purposes, with or without the knowledge of the practitioner or the client. When a regulator requests the practitioner to provide access to (and possibly copies of) engagement documentation pursuant to law, regulation, or contract, what actions might the practitioner consider?

.16 Interpretation—When a regulator requests access to engagement documentation pursuant to law, regulation, or contract, the practitioner may take the following steps:

- a. Consider advising the client that the regulator has requested access to (and possibly copies of) the engagement documentation and that the practitioner intends to comply with such request.¹⁴

¹⁰ The term *regulator(s)* includes federal, state, and local government officials with legal oversight authority over the entity. Examples of regulators who may request access to engagement documentation include, but are not limited to, state insurance and utility regulators, various health care authorities, and federal agencies such as the Federal Deposit Insurance Corporation, the Department of Housing and Urban Development, the Department of Labor, and the Rural Electrification Administration.

¹¹ The guidance in this interpretation does not apply to requests from the IRS; firm practice-monitoring programs, to comply with AICPA or state professional requirements such as peer or quality reviews; proceedings relating to alleged ethics violations; or subpoenas.

¹² Paragraph .39 of section 105.

¹³ Paragraphs .26–.30 of this interpretation address situations in which the practitioner is not required by law, regulation, or contract to provide a regulator access to the engagement documentation.

¹⁴ The practitioner may wish (and, in some cases, may be required by law, regulation, or contract) to confirm in writing with the client that the practitioner may be required to provide a regulator access to the engagement documentation. Sample language that may be used follows:

The engagement documentation for this engagement is the property of [name of firm] and constitutes confidential information. However, we may be requested to make certain engagement documentation available to [name of regulator] pursuant to authority given to it by law or regulation. If requested, access to such engagement documentation will be provided under the supervision of [name of firm] personnel. Furthermore, upon request, we may provide copies of selected engagement documentation to [name of regulator]. The [name of regulator] may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies.

- b. Make appropriate arrangements with the regulator for the review.
- c. Maintain control over the engagement documentation, and
- d. Consider submitting the letter described in paragraph .19 of this interpretation to the regulator.

.17 Making appropriate arrangements with the regulator may include establishing the specific details, such as the date, time, and location of the review. The engagement documentation may be made available to a regulator at the offices of the client, the practitioner, or a mutually agreed-upon location. However, maintaining control of engagement documentation is necessary in order for the practitioner to maintain the integrity of the engagement documentation and the confidentiality of client information. For example, the practitioner (or the practitioner's representative) may be present when the engagement documentation is reviewed by the regulator.

.18 Ordinarily, the practitioner may not agree to transfer ownership of the engagement documentation to a regulator. Furthermore, the practitioner may not agree, without client authorization, that the information contained therein about the client may be communicated to or made available to any other party. In this regard, the action of a practitioner providing access to, or copies of, the engagement documentation shall not constitute transfer of ownership or authorization to make them available to any other party.

.19 An engagement performed in accordance with the attestation standards is not intended to, and does not, satisfy a regulator's oversight responsibilities. To avoid any misunderstanding, prior to allowing a regulator access to the engagement documentation, the practitioner may submit a letter to the regulator that

- a. sets forth the practitioner's understanding of the purpose for which access is being requested;
- b. describes the examination, review, or agreed-upon procedures process, as applicable, and the limitations inherent in the applicable attestation engagement;
- c. explains the purpose for which the engagement documentation was prepared, and that any individual conclusions or findings must be read in the context of the practitioner's report on the subject matter (or assertion);
- d. states, except when not applicable, that the engagement was not planned or conducted in contemplation of the purpose for which access is being granted or to assess the entity's compliance with laws and regulations;
- e. states that the examination, review, or agreed-upon procedures engagement, as applicable, and the engagement documentation should not supplant other inquiries and procedures that should be undertaken by the regulator for its purposes;
- f. requests confidential treatment under the Freedom of Information Act or similar laws and regulations,¹⁵ when a request for the engagement documentation is made, and that written notice be given to the practitioner before transmitting any information contained in the engagement documentation to others, including

¹⁵ The practitioner may need to consult the regulations of individual agencies and, if necessary, consult with legal counsel regarding the specific procedures and requirements necessary to gain confidential treatment.

other governmental agencies, except when such transfer is required by law or regulation; and

- g. states that if any copies are to be provided, they will be identified as "Confidential Treatment Requested by [name of firm, address, telephone number]."

The practitioner may obtain a signed acknowledgment copy of the letter as evidence of the regulator's receipt of the letter. The letter to a regulator should be tailored to meet the individual engagement characteristics or the purpose of the regulatory request, for example, a quality control review. Illustrative letters for an examination engagement performed in accordance with section 315, *Compliance Attestation*, and an agreed-upon procedures engagement performed in accordance with section 215 follow.

.20 Illustrative letter for an examination engagement:

Illustrative Letter to Regulator¹⁶

[Date]

[Name and Address of Regulatory Agency]

Your representatives have requested access to our engagement documentation in connection with our engagement to examine XYZ Company's compliance with [identify the specified requirements] during the period [date] to [date] [or management's assertion about its compliance with (identify the specified requirements) during the period (date) to (date)]. It is our understanding that the purpose of your request is [state purpose: for example, "to facilitate your regulatory examination"]¹⁷

Our examination was conducted in accordance with attestation standards¹⁸ established by the American Institute of Certified Public Accountants, the objective of which is to obtain reasonable assurance about whether XYZ Company complied with [identify the specified requirements] during the period [date] to [date], in all material respects, and to express an opinion in a written report about whether XYZ Company complied with [identify the specified requirements] during the period [date] to [date] [or whether management's assertion about its compliance with (identify the specified requirements) during the period (date) to (date) is fairly stated], in all material respects, based on our examination. Under these standards, we have the responsibility to plan and perform our examination to provide a reasonable basis for our opinion and to exercise due professional care in the performance of our examination. Our examination is subject to the inherent risk that material noncompliance, if it exists, would not be detected. In addition, our examination does not address the possibility that material noncompliance may occur in the future. Also, our use of

¹⁶ The letter may be modified appropriately when the engagement has been conducted in accordance with Statements on Standards for Attestation Engagements (SSAEs) and also in accordance with additional attestation requirements specified by a regulatory agency (for example, the requirements specified in *Government Auditing Standards* issued by the Comptroller General of the United States).

¹⁷ See footnote 13. Also, if the practitioner is not required by law, regulation, or contract to provide a regulator access to the engagement documentation but otherwise intends to provide such access, the letter should include a statement that "Management of [name of entity] has authorized us to provide you access to our attest documentation for [state purpose]." [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126. Revised: April 2016, effective for practitioners' reports dated on or after May 1, 2017.]

¹⁸ See footnote 16.

professional judgment and the assessments of attestation risk and materiality for the purpose of our examination means that matters may have existed that would have been assessed differently by you. Our examination does not provide a legal determination on *[name of entity]*'s compliance with specified requirements.

The engagement documentation was prepared for the purpose of providing a sufficient and appropriate record of the basis of our opinion on *[name of entity]*'s compliance and to aid in the performance and supervision of our examination. The engagement documentation is the principal record of attestation procedures performed, relevant evidence obtained, and conclusions reached by the practitioner in the examination. The procedures that we performed were limited to those we considered necessary under attestation standards¹⁹ established by the American Institute of Certified Public Accountants to provide us with reasonable basis for our opinion. Accordingly, we make no representation as to the sufficiency or appropriateness, for your purposes, of either the procedures or information in our engagement documentation. In addition, any notations, comments, and individual conclusions appearing on any of the engagement documentation do not stand alone and should not be read as an opinion on any part of management's assertion or the related subject matter.

Our examination was conducted for the purpose stated above and was not planned or performed in contemplation of your *[state purpose: for example, "regulatory examination"]*. Therefore, items of possible interest to you may not have been specifically addressed. Accordingly, our examination, and the engagement documentation prepared in connection therewith, should not supplant other inquiries and procedures that should be undertaken by the *[name of regulatory agency]* for the purpose of monitoring and regulating *[name of entity]*. In addition, we have not performed any procedures since the date of our report with respect to the subject matter *[or management's assertion related thereto]*, and significant events or circumstances may have occurred since that date.

The engagement documentation constitutes and reflects work performed or information obtained by us in the course of our examination. The documents contain trade secrets and confidential commercial and financial information of our firm and *[name of entity]* that is privileged and confidential, and we expressly reserve all rights with respect to disclosures to third parties. Accordingly, we request confidential treatment under the Freedom of Information Act or similar laws and regulations²⁰ when requests are made for the engagement documentation or information contained therein or any documents created by the *[name of regulatory agency]* containing information derived therefrom. We further request that written notice be given to our firm before distribution of the information in the engagement documentation (or copies thereof) to others, including other governmental agencies, except when such distribution is required by law or regulation.

[If it is expected that copies will be requested, add the following:]

Any copies of our engagement documentation we agree to provide you will contain a legend "Confidential Treatment Requested by *(name of firm, address, telephone number)*."

[Firm signature]

¹⁹ See footnote 16.

²⁰ This illustrative paragraph may not, in and of itself, be sufficient to gain confidential treatment under the rules and regulations of certain regulatory agencies. The practitioner should consider tailoring this paragraph to the circumstances after consulting the regulations of each applicable regulatory agency and, if necessary, consult with legal counsel regarding the specific procedures and requirements necessary to gain confidential treatment.

.21 The following is an illustrative letter for an agreed-upon procedures engagements:

Illustrative Letter to Regulator²¹

[Date]

[Name and Address of Regulatory Agency]

Your representatives have requested access to our engagement documentation in connection with our engagement to perform agreed-upon procedures on *[identify the subject matter or management's assertion]*. It is our understanding that the purpose of your request is *[state purpose]*: for example, "to facilitate your regulatory examinations."²²

Our agreed-upon procedures engagement was conducted in accordance with attestation standards²³ established by the American Institute of Certified Public Accountants. Under these standards, we have the responsibility to perform the agreed-upon procedures to provide a reasonable basis for the findings expressed in our report. We were not engaged to, and did not, perform an examination, the objective of which would be to form an opinion on *[identify the subject matter or management's assertion]*. Our engagement is subject to the inherent risk that material misstatement of *[identify the subject matter or management's assertion]*, if it exists, would not be detected. *[The practitioner may add the following: "In addition, our engagement does not address the possibility that material misstatement of (identify the subject matter or management's assertion) may occur in the future."]* The procedures that we performed were limited to those agreed to by the specified users, and the sufficiency of these procedures is solely the responsibility of the specified users of the report. Further, our engagement does not provide a legal determination on *[name of entity]*'s compliance with specified requirements.

The engagement documentation was prepared to document agreed-upon procedures applied, information obtained, and related findings in the engagement. Accordingly, we make no representation, for your purposes, as to the sufficiency or appropriateness of the information in our engagement documentation. In addition, any notations, comments, and individual findings appearing on any of the engagement documentation should not be read as an opinion on *[identify the subject matter or management's assertion]*, or any part thereof.

Our engagement was performed for the purpose stated above and was not performed in contemplation of your *[state purpose]*: for example, "regulatory examination". Therefore, items of possible interest to you may not have been specifically addressed. Accordingly, our engagement, and the engagement documentation prepared in connection therewith, should not supplant other inquiries and procedures that should be undertaken by the *[name of regulatory agency]* for the purpose of monitoring and regulating *[name of client]*. In addition, we have not performed any procedures since the date of our report with respect to the subject matter or management's assertion related thereto, and significant events or circumstances may have occurred since that date.

The engagement documentation constitutes and reflects procedures performed or information obtained by us in the course of our engagement. The documents contain trade secrets and confidential commercial and financial information of

²¹ See footnote 16.

²² See footnotes 13 and 17. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126. Revised, April 2016.]

²³ See footnote 16.

our firm and [name of client] that is privileged and confidential, and we expressly reserve all rights with respect to disclosures to third parties. Accordingly, we request confidential treatment under the Freedom of Information Act or similar laws and regulations when requests are made for the engagement documentation or information contained therein or any documents created by the [name of regulatory agency] containing information derived therefrom. We further request that written notice be given to our firm before distribution of the information in the engagement documentation (or copies thereof) to others, including other governmental agencies, except when such distribution is required by law or regulation.²⁴

[If it is expected that copies will be requested, add the following:]

Any copies of our engagement documentation we agree to provide you will contain a legend "Confidential Treatment Requested by (name of firm, address, telephone number)."

[Firm signature]

[Issue Date: May 1996; Revised: January 2001; January 2002; Revised: December 2012; Revised: April 2016, effective for practitioners' reports dated on or after May 1, 2017.]

.22 Question—A regulator may request access to the engagement documentation before the attestation engagement has been completed and the report released. May the practitioner allow access in such circumstances?

.23 Interpretation—When the engagement has not been completed, the engagement documentation is necessarily incomplete because (a) additional information may be added as a result of further tests and review by supervisory personnel, and (b) any results of the engagement and conclusions reflected in the incomplete engagement documentation may change. Accordingly, it is preferable that access be delayed until all attestation procedures have been completed and all internal reviews have been performed. If access is provided prior to completion of the engagement, the practitioner may issue the letter referred to in paragraph .19 of this interpretation, modified appropriately. The following is an example of additional language that may be included in the letter:

We have been engaged to examine, in accordance with attestation standards established by the American Institute of Certified Public Accountants, XYZ Company's compliance with [identify the specified requirements] during the period [date] to [date] (or management's assertion about its compliance during the period [date] to [date]), but have not yet completed our examination. Accordingly, at this time, we do not express any opinion on XYZ Company's compliance with [identify the specified requirements] during the period [date] to [date] (or management's assertion about its compliance during the period [date] to [date]). Furthermore, the contents of the engagement documentation may change as a result of additional attestation procedures and review of the engagement documentation by supervisory personnel of our firm. Accordingly, our engagement documentation is incomplete.

Because the engagement documentation may change prior to completion of the engagement, it is preferable that the practitioner not provide copies of the engagement documentation until the engagement has been completed.

.24 Question—Some regulators may engage an independent party, such as another independent public accountant, to perform the engagement documentation review on behalf of the regulatory agency. Are there any special precautions the practitioner may observe in these circumstances?

²⁴ See footnote 20.

.25 Interpretation—The practitioner may obtain acknowledgment, preferably in writing, from the regulator stating that the third party is acting on behalf of the regulator and agreement from the third party that he or she is subject to the same restrictions on disclosure and use of engagement documentation and the information contained therein as the regulator.

.26 Question—When a regulator requests the practitioner to provide access to (and possibly copies of) engagement documentation and the practitioner is not otherwise required by law, regulation, or contract to provide such access, what steps may the practitioner take?

.27 Interpretation—The practitioner may obtain an understanding of the reasons for the regulator's request for access to the engagement documentation and may consider consulting with legal counsel regarding the request. If the practitioner decides to provide such access, reasonable procedures to maintain the confidentiality of client information include obtaining the client's consent, preferably in writing, to provide the regulator access to the engagement documentation.

.28 Following is an example of language that may be used in the written communication to the client:

The engagement documentation for this engagement is the property of *[name of firm]* and constitutes confidential information. However, we have been requested to make certain engagement documentation available to *[name of regulator]* for *[describe the regulator's basis for its request]*. Access to such engagement documentation will be provided under the supervision of *[name of firm]* personnel. Furthermore, upon request, we may provide copies of selected engagement documentation to *[name of regulator]*.

You have authorized *[name of firm]* to allow *[name of regulator]* access to the engagement documentation in the manner discussed above. Please confirm your agreement to the above by signing below and returning to *[name of firm, address]*.

[Firm signature]

Agreed and acknowledged:

[Name and title]

[Date]

.29 If the client requests to review the engagement documentation before allowing the regulator access, the practitioner may provide the client with the opportunity to obtain an understanding of the nature of the information about the subject matter contained in the engagement documentation that is being made available to the regulator. When a client reviews the engagement documentation, the need to maintain control of the engagement documentation is as discussed in paragraph .17 of this interpretation.

.30 The guidance in paragraphs .17–.25 of this interpretation, which provide guidance on making arrangements with the regulator for access to the engagement documentation, maintaining control over the engagement documentation, and submitting a letter describing various matters to the regulator, is also applicable. [Issue Date: July, 1994; Revised: June, 1996; Revised: October, 2000; Revised: January, 2002; Revised: December, 2005; Revised: October, 2011, effective for audits of financial statements for periods ending on or after December 15, 2012; Revised: April 2016, effective for practitioners' reports dated on or after May 1, 2017.]

4. Performing and Reporting on an Attestation Engagement Under Two Sets of Attestation Standards

.31 Question—Do the AICPA attestation standards permit the performance of, and reporting on, an attestation engagement in which the practitioner follows both the AICPA attestation standards and another set of attestation standards, such as those issued by the International Auditing and Assurance Standards Board or the PCAOB?

.32 Interpretation—Yes, a practitioner may perform and report on an attestation engagement in accordance with AICPA attestation standards in addition to another set of attestation standards, as long as both sets of attestation standards are followed in their entirety.

.33 Question—If a practitioner performs an attestation engagement in accordance with the AICPA attestation standards and the PCAOB interim attestation standards, how would the practitioner reference both sets of attestation standards if the practitioner chooses to do so in the attestation report?

.34 Interpretation—If the practitioner performs an attestation engagement in accordance with both AICPA attestation standards and the PCAOB interim attestation standards, and the report references both sets of attestation standards, the statement that the attestation engagement was conducted in accordance with attestation standards established by the AICPA would be amended to add that the engagement was also conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."²⁵ A reference to "the standards" of the PCAOB indicates that the practitioner has complied not only with the PCAOB interim attestation standards, but also with the related professional practice standards of the PCAOB, which include the relevant independence rules. If the practitioner is required to comply only with the PCAOB interim attestation standards rather than all the PCAOB standards, the practitioner may include the word "attestation" in the reference to the standards of the PCAOB.²⁶ A practitioner performing an attestation engagement in these circumstances may, nevertheless, be responsible for complying with certain or all of the independence and other related professional practice standards of the PCAOB, for example, when the attestation engagement is subject to regulatory oversight that requires compliance with those rules. Whether the practitioner conducts an attestation engagement in accordance with the standards of the PCAOB or in accordance with the attestation standards of the PCAOB depends on the circumstances of the engagement.

.35 Following are illustrative reports with examples of additional language (in ***bold italics***) that a practitioner may include in attestation reports to indicate that the engagement was conducted in accordance with the AICPA attestation standards and the PCAOB interim attestation standards:

²⁵ PCAOB Release No. 2015-002, *Reorganization of PCAOB Auditing Standards and Related Amendments to PCAOB Standards and Rules*, states, in part, "...whenever the practitioner is required to make reference in a report to attestation standards established by the American Institute of Certified Public Accountants, the practitioner must instead refer to "the standards of the Public Company Accounting Oversight Board (United States)."

²⁶ By analogy to Staff Question and Answer No. 2, *Audits of Financial Statements of Non-Issuers Performed Pursuant to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.01), dated June 30, 2004.

Examination Engagement**Independent Accountant's Report**

[Same first paragraph as the standard report]

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants **and in accordance with the standards of the Public Company Accounting Oversight Board (United States)**. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the schedule of investment returns]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of *[identify the subject matter, for example, the schedule of investment returns]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Review Engagement**Independent Accountant's Report**

[Same first paragraph as the standard report]

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants **and in accordance with the standards of the Public Company Accounting Oversight Board (United States)**. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to *[identify the subject matter, for example, the schedule of investment returns]* in order for it to be in accordance with (or based on) the criteria. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is in accordance with (or based on) the criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. We believe that our review provides a reasonable basis for our conclusion.

Agreed-Upon Procedures Engagement**Independent Accountant's Report**

[Same first paragraph as the standard report]

[Include paragraphs to enumerate procedures and findings]

This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants **and in accordance with the standards of the Public Company Accounting Oversight Board (United States)**. We were not engaged to and did not conduct an examination or review, the objective of which would be the expression of an opinion or conclusion, respectively, on *[identify the subject matter, for example, the accompanying Statement of Investment Performance Statistics of XYZ Fund for the year ended December 31, 20X1]*. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

.36 A practitioner performing an attestation engagement for a nonissuer may be required by law or regulation, or may otherwise determine it is more appropriate to use the form of attestation report included in the PCAOB Interim Attestation Standards adjusted to reflect that the engagement was also performed in accordance with AICPA attestation standards. In these circumstances a practitioner may use the reports illustrated in paragraph .37.

.37 Following are illustrative attestation reports based on the illustrative reports in the PCAOB interim attestation standards.²⁷ The reports are marked to conform with the incremental reporting requirements in AT-C section 205, *Examination Engagements*, AT-C section 210, *Review Engagements*, and AT-C section 215, *Agreed-Upon Procedures Engagements*,²⁸ respectively. Additions to the reports are shown in **bold italics** and deletions are shown in ~~strike through~~. Such edits are intended to illustrate an attestation report that complies with the reporting requirements of both AICPA attestation standards and the PCAOB interim attestation standards.

Examination Engagement

Independent Accountant's Report²⁹

[Appropriate Addressee]

We have examined the *[identify the subject matter—for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for **presenting** the schedule of investment returns **in accordance with (or based on) [identify criteria—for example, the ABC criteria set forth in Note 1]**. Our responsibility is to express an opinion **on the schedule of investment returns** based on our examination.

Our examination was conducted in accordance with ***the standards of the Public Company Accounting Oversight Board (United States) and in accordance with*** attestation standards established by the American Institute of Certified Public Accountants. ***Those standards require that we plan and perform the examination to obtain reasonable assurance about whether [identify the subject matter, for example, the schedule of investment returns] is in accordance with (or based on) the criteria, in all material respects,*** and, accordingly, included examining, on a test basis, evidence supporting *[identify the subject matter—for example, XYZ Company's schedule of investment returns]* and performing such other procedures as we considered necessary in the circumstances. We believe that the evidence we obtained in our examination ***is sufficient and appropriate to provide*** a reasonable basis for our opinion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

²⁷ The illustrative attestation reports include the examination report in example 1 of appendix A, "Examination Reports," of AT section 101, *Attest Engagements* (AICPA, *PCAOB Standards and Related Rules*), the review report in example 1 of appendix B, "Review Reports," of AT section 101, and the agreed-upon procedures report in paragraph .32 of AT section 201, *Agreed-Upon Procedures Engagements* (AICPA, *PCAOB Standards and Related Rules*).

²⁸ All AT-C sections can be found in AICPA *Professional Standards*.

²⁹ A firm registered with the PCAOB may use the title "Report of Independent Registered Public Accounting Firm," or another appropriate title that includes the word "independent."

In our opinion, the schedule referred to above presents, in all material respects, *[identify the subject matter—for example, the investment returns of XYZ Company for the year ended December 31, 20XX]* **in accordance with (or based on)** *[identify criteria—for example, the ABC criteria set forth in Note 1].*

[Practitioner's city and state]

[Date of practitioner's report]

Review Engagement

Independent Accountant's Report³⁰

[Appropriate Addressee]

We have reviewed the *[identify the subject matter—for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for **presenting** the schedule of investment returns **in accordance with (or based on)** *[identify criteria—for example, the ABC criteria set forth in Note 1]*. **Our responsibility is to express a conclusion on the schedule of investment returns based on our review.**

Our review was conducted in accordance with ***the standards of the Public Company Accounting Oversight Board (United States) and in accordance with*** attestation standards established by the American Institute of Certified Public Accountants. ***Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to [identify the subject matter—for example, the schedule of investment returns] in order for it to be in accordance with (or based on) the criteria.*** A review is substantially less in scope than an examination, the objective of which is ***to obtain reasonable assurance about whether [identify the subject matter—for example, XYZ Company's schedule of investment returns] is in accordance with (or based on) the criteria, in all material respects and*** the expression of an opinion on *[identify the subject matter—for example, XYZ Company's schedule of investment returns]* and ~~to obtain reasonable assurance about whether [identify the subject matter—for example, XYZ Company's schedule of investment returns] is in accordance with (or based on) the criteria, in all material respects.~~ Accordingly, we do not express such an opinion. ***We believe that our review provides a reasonable basis for our conclusion.***

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Based on our review, ~~nothing came to our attention that caused us to believe that the~~ ***we are not aware of any material modifications that should be made to [identify the subject matter—for example, schedule of investment returns of XYZ Company for the year ended December 31, 20XX] is in order for it to be in accordance with (or based on)*** ~~not presented, in all material~~

³⁰ See footnote 29.

~~respects, in conformity with~~ [identify the criteria—for example, the ABC criteria set forth in Note 1].

Agreed-Upon Procedures Engagement

Independent Accountant's Report³¹

[Appropriate Addressee]:

We have performed the procedures enumerated below, which were agreed to by the audit committees and managements of ABC Inc. and XYZ Fund, solely to assist you in evaluating the accompanying Statement of Investment Performance Statistics of XYZ Fund (prepared in accordance with the criteria specified therein) for the year ended December 31, 20X1. XYZ Fund's management is responsible for the statement of investment performance statistics. This agreed-upon procedures engagement was conducted in accordance with **the standards of the Public Company Accounting Oversight Board (United States) and in accordance with** attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of those parties specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

[Include paragraphs to enumerate procedures and findings.]

We were not engaged to and did not conduct an examination **or a review engagement**, the objective of which would be the expression of an opinion **or conclusion, respectively**, on the accompanying Statement of Investment Performance Statistics of XYZ Fund **for the year ended December 31, 20XX**. Accordingly, we do not express such an opinion **or conclusion**. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of the audit committees and managements of ABC Inc. and XYZ Fund, and is not intended to be and should not be used by anyone other than these specified parties.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

[Issue Date: May 2017; Revised: February 2018.]

AT-C Section 205

Assertion-Based Examination Engagements

(Supersedes SSAE No. 18 section 205)

Source: SSAE No. 21.

See section 9205 for interpretations of this section.

Effective for practitioners' assertion-based examination reports dated on or after June 15, 2022.

Introduction

.01 This section contains performance and reporting requirements and application guidance for assertion-based examination engagements. The requirements and guidance in this section supplement the requirements and guidance in section 105, *Concepts Common to All Attestation Engagements*. For purposes of applying this section, the term *subject matter* encompasses the terms *underlying subject matter* and *subject matter information*, as defined in section 105. If only one of these terms is applicable, that term is used.

Effective Date

.02 This section is effective for practitioners' assertion-based examination reports dated on or after June 15, 2022.

Objectives

.03 In conducting an assertion-based examination engagement, the objectives of the practitioner are to do the following:

- a. Obtain reasonable assurance about whether the subject matter as measured or evaluated against the criteria is free from material misstatement
- b. Express an opinion in a written report about whether
 - i. the subject matter is in accordance with (or based on) the criteria, in all material respects, or
 - ii. the responsible party's assertion is fairly stated, in all material respects.
- c. Communicate further as required by relevant AT-C sections.

Definitions

.04 For purposes of this section, the following terms have the meanings attributed as follows:

Appropriateness of evidence. The measure of the quality of evidence, that is, its relevancy and reliability in providing support for the practitioner's opinion.

Modified opinion. A qualified opinion, an adverse opinion, or a disclaimer of opinion.

Risk of material misstatement. The risk that the subject matter is not in accordance with (or based on) the criteria in all material respects or that the assertion is not fairly stated, in all material respects.

Sufficiency of evidence. The measure of the quantity of evidence. The quantity of the evidence needed is affected by the risks of material misstatement and also by the quality of such evidence.

Test of controls. A procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements in the subject matter.

Requirements

Conduct of an Assertion-Based Examination Engagement

.05 In performing an assertion-based examination engagement, the practitioner should comply with this section, section 105, and any subject-matter AT-C section that is relevant to the engagement. A subject-matter AT-C section is relevant to the engagement when it is in effect, and the circumstances addressed by the AT-C section exist. (Ref: par. .A1)

Preconditions for an Assertion-Based Examination Engagement

.06 Section 105 indicates that a practitioner must be independent when performing an attestation engagement in accordance with the attestation standards, unless the practitioner is required by law or regulation to accept the engagement.¹ When the practitioner is not independent but is required by law or regulation to accept the engagement, the practitioner should disclaim an opinion and should specifically state that the practitioner is not independent. The practitioner is neither required to provide, nor precluded from providing, the reasons for the lack of independence; however, if the practitioner chooses to provide the reasons for the lack of independence, the practitioner should include all the reasons therefor.

Agreeing on the Terms of the Engagement

.07 The practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. (Ref: par. .A2)

.08 The agreed-upon terms of the engagement should include the following:

- a. The objective and scope of the engagement
- b. The responsibilities of the practitioner (Ref: par. .A3)
- c. A statement that the engagement will be conducted in accordance with attestation standards established by the AICPA
- d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different (Ref: par. .A4–.A5)
- e. A statement about the inherent limitations of an examination engagement (Ref: par. .A6)

¹ Paragraph .26 of section 105, *Concepts Common to All Attestation Engagements*.

- f.* Identification of the criteria for the measurement, evaluation, or disclosure of the subject matter
- g.* An acknowledgment that the engaging party agrees to provide the practitioner with a representation letter at the conclusion of the engagement

.09 Although an engagement may recur, each engagement is considered a separate engagement. The practitioner should assess whether circumstances require revision to the terms of a preceding engagement. If the practitioner concludes that the terms of the preceding engagement need not be revised for the current engagement, the practitioner should remind the engaging party of the terms of the current engagement, and the reminder should be documented.

Requesting a Written Assertion

.10 The practitioner should request from the responsible party a written assertion about the measurement or evaluation of the underlying subject matter against the criteria. The practitioner should use professional judgment in determining whether management has a reasonable basis for making its assertion. When the engaging party is the responsible party and refuses to provide a written assertion, paragraph .84 requires the practitioner to withdraw from the engagement when withdrawal is possible under applicable law or regulation. When the engaging party is not the responsible party, and the responsible party refuses to provide a written assertion, the practitioner need not withdraw from the engagement. In that case, paragraph .86 requires the practitioner to disclose that refusal in the practitioner's report and restrict the use of the report to the engaging party. (Ref: par. .A7–.A12 and .A107)

Planning and Performing the Engagement

.11 The practitioner should establish an overall engagement strategy that sets the scope, timing, and direction of the engagement and guides the development of the engagement plan. (Ref: par. .A13–.A16)

.12 In establishing the overall engagement strategy, the practitioner should do the following:

- a.* Identify the characteristics of the engagement that define its scope and ascertain the reporting objectives of the engagement in order to plan the timing of the engagement and the nature of the communications required
- b.* Consider the factors that, in the practitioner's professional judgment, are significant in directing the engagement team's efforts
- c.* Consider the results of preliminary engagement activities, such as client acceptance, and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant
- d.* Ascertain the nature, timing, and extent of resources necessary to perform the engagement

.13 The practitioner should develop a plan that includes a description of the following items:

- a.* The nature, timing, and extent of planned risk assessment procedures
- b.* The nature, timing, and extent of planned further procedures (see paragraph .22)

- c. Other planned procedures that are required to be carried out so that the engagement complies with the attestation standards

Risk Assessment Procedures

.14 The practitioner should obtain an understanding of the subject matter and other engagement circumstances sufficient to do the following: (Ref: par. .A17–.A18)

- a. Enable the practitioner to identify and assess the risks of material misstatement in the subject matter information
- b. Provide a basis for designing and performing procedures to respond to the assessed risks and to obtain reasonable assurance to support the practitioner's opinion

.15 In obtaining an understanding of the subject matter in accordance with paragraph .14, the practitioner should obtain an understanding of internal control over the preparation of the subject matter relevant to the engagement. This includes evaluating the design of those controls relevant to the subject matter and determining whether they have been implemented by performing procedures in addition to inquiry of the personnel responsible for the subject matter.

.16 The practitioner should make inquiries of the responsible party regarding whether the responsible party has

- a. an internal audit function. If the responsible party has an internal audit function, the practitioner should make further inquiries to obtain an understanding of the activities and main findings of the internal audit function with respect to the subject matter.
- b. used any specialists in the preparation of the subject matter.

Materiality in Planning and Performing the Engagement

.17 The practitioner should consider materiality when establishing the overall engagement strategy; determining the nature, timing, and extent of procedures; and evaluating whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or the assertion is fairly stated, in all material respects. (Ref: par. .A19–.A25)

.18 The practitioner should reconsider materiality for the subject matter if the practitioner becomes aware of information during the engagement that would have caused the practitioner to have initially determined a different materiality.

Identifying Risks of Material Misstatement

.19 The practitioner should identify and assess risks of material misstatement as the basis for designing and performing further procedures whose nature, timing, and extent (Ref: par. .A26–.A27)

- a. are responsive to assessed risks of material misstatement and
- b. allow the practitioner to obtain reasonable assurance to support the practitioner's opinion.

Responding to Assessed Risks and Obtaining Evidence

.20 To obtain reasonable assurance, the practitioner should obtain sufficient appropriate evidence to reduce attestation risk to an acceptably low level

and thereby enable the practitioner to draw reasonable conclusions on which to base the practitioner's opinion.

.21 The practitioner should design and implement overall responses to address the assessed risks of material misstatement for the subject matter or assertion. (Ref: par. .A28–.A29)

Further Procedures

.22 The practitioner should design and perform further procedures whose nature, timing, and extent are based on, and responsive to, the assessed risks of material misstatement.

.23 In designing and performing further procedures in accordance with paragraph .22, the practitioner should do the following:

- a. Consider the reasons for the assessment given to the risk of material misstatement, including
 - i. the likelihood of material misstatement due to the particular characteristics of the subject matter and
 - ii. whether the practitioner intends to rely on the operating effectiveness of controls in determining the nature, timing, and extent of other procedures
- b. Obtain more persuasive evidence the higher the practitioner's assessment of risk

.24 When designing and performing procedures, the practitioner should consider the relevance and reliability of the information to be used as evidence. If

- a. evidence obtained from one source is inconsistent with that obtained from another,
- b. the practitioner has doubts about the reliability of information to be used as evidence, or
- c. responses to inquiries of the responsible party or others are inconsistent or otherwise unsatisfactory (for example, vague or implausible), then the practitioner should determine what modifications or additions to procedures are necessary to resolve the matter and should consider the effect of the matter, if any, on other aspects of the engagement.

Tests of Controls

.25 The practitioner should design and perform tests of controls to obtain sufficient appropriate evidence about the operating effectiveness of relevant controls if any of the following apply:

- a. The practitioner intends to rely on the operating effectiveness of controls in determining the nature, timing, and extent of other procedures.
- b. Procedures other than tests of controls cannot alone provide sufficient appropriate evidence.
- c. The subject matter is internal control.

.26 If the practitioner designed and performed tests of controls to rely on their operating effectiveness and identified deviations in those controls, the practitioner should make specific inquiries and perform other procedures as necessary to understand these matters and their potential consequences. The practitioner also should determine whether

- a. the tests of controls that have been performed provide an appropriate basis for reliance on the controls,
- b. additional tests of controls are necessary, or
- c. the potential risks of misstatement need to be addressed using other procedures.

Procedures Other Than Tests of Controls

.27 Irrespective of the assessed risks of material misstatement, the practitioner should design and perform tests of details or analytical procedures related to the subject matter, except when the subject matter is internal control.

Analytical Procedures Performed in Response to Assessed Risks

.28 When designing and performing analytical procedures in response to assessed risks, the practitioner should do the following: (Ref: par. .A30–.A31)

- a. Determine the suitability of particular analytical procedures for the subject matter, taking into account the assessed risks of material misstatement and any related tests of details;
- b. Evaluate the reliability of data from which the practitioner's expectation is developed, taking into account the source, comparability, nature, and relevance of information available, and controls over their preparation
- c. Develop an expectation that is sufficiently precise to identify possible material misstatements (taking into account whether analytical procedures are to be performed alone or in combination with tests of details).

.29 If analytical procedures identify fluctuations or relationships that are inconsistent with other relevant information or that differ significantly from expected amounts or ratios, the practitioner should investigate such differences by doing the following:

- a. Inquiring of the responsible party and obtaining additional evidence relevant to its responses
- b. Performing other procedures as necessary in the circumstances.

Procedures Regarding Estimates

.30 Based on the assessed risks of material misstatement, the practitioner should evaluate the following:

- a. Whether the responsible party has appropriately applied the requirements of the criteria relevant to any estimated amounts
- b. Whether the methods for making estimates are appropriate and have been applied consistently and whether changes, if any, in reported estimates or in the method for making them from the prior period, if applicable, are appropriate in the circumstances

.31 When responding to an assessed risk of material misstatement related to an estimate, the practitioner should undertake one or more of the following, taking into account the nature of the estimates:

- a. Determine whether events occurring up to the date of the practitioner's report provide evidence regarding the estimate.
- b. Test how the responsible party made the estimate and the data on which it is based. In doing so, the practitioner should evaluate whether the

- i. method of measurement used is appropriate in the circumstances,
 - ii. assumptions used by the responsible party are reasonable, and
 - iii. data on which the estimate is based are sufficiently reliable for the practitioner's purposes.
- c. Test the operating effectiveness of the controls over how the responsible party made the estimate, together with other appropriate further procedures.
- d. Develop a point estimate or a range to evaluate the responsible party's estimate. For this purpose, if the practitioner
 - i. uses assumptions or methods that differ from those of the responsible party, the practitioner should obtain an understanding of the responsible party's assumptions or methods sufficient to establish that the practitioner's point estimate or range takes into account relevant variables and to evaluate any significant differences from the responsible party's point estimate.
 - ii. concludes that it is appropriate to use a range, the practitioner should narrow the range, based on evidence available, until all outcomes within the range are considered reasonable.

Sampling

.32 If sampling is used, the practitioner should, when designing the sample, consider the purpose of the procedure and the characteristics of the population from which the sample will be drawn. Sampling involves the following: (Ref: par. .A32)

- a. Determining a sample size sufficient to reduce sampling risk to an acceptably low level
- b. Selecting items for the sample in such a way that the practitioner can reasonably expect the sample to be representative of the relevant population and likely to provide the practitioner with a reasonable basis for conclusions about the population
- c. Treating a selected item to which the practitioner is unable to apply the designed procedures or suitable alternative procedures as a deviation from the prescribed control in the case of tests of controls or a misstatement in the case of tests of details
- d. Investigating the nature and cause of deviations or misstatements identified and evaluating their possible effect on the purpose of the procedure and on other areas of the engagement
- e. Evaluating the results of the sample, including sampling risk and projecting misstatements found in the sample to the population
- f. Evaluating whether the use of sampling has provided an appropriate basis for conclusions about the population that has been tested

Fraud, Laws, and Regulations

.33 The practitioner should do the following:

- a. Consider whether risk assessment procedures and other procedures related to understanding the subject matter indicate risk of

material misstatement due to fraud or noncompliance with laws or regulations

- b. Make inquiries of the appropriate party to determine whether the party has knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter
- c. Evaluate whether there are unusual or unexpected relationships within the subject matter, or between the subject matter and other related information, that indicate risks of material misstatement due to fraud or noncompliance with laws or regulations
- d. Evaluate whether other information obtained indicates risk of material misstatement due to fraud or noncompliance with laws or regulations

.34 The practitioner should respond appropriately to fraud or suspected fraud and noncompliance or suspected noncompliance with laws or regulations affecting the subject matter that is identified during the engagement. (Ref: par. .A33–.A34)

Revision of Risk Assessment

.35 The practitioner's assessment of the risks of material misstatement may change during the course of the engagement as additional evidence is obtained. In circumstances in which the practitioner obtains evidence from performing further procedures, or if new information is obtained, either of which is inconsistent with the evidence on which the practitioner originally based the assessment, the practitioner should revise the assessment and modify the planned procedures accordingly. (Ref: par. .A35–.A36)

Evaluating the Reliability of Information Produced by the Entity

.36 When using information produced by the entity, the practitioner should evaluate whether the information is sufficiently reliable for the practitioner's purposes, including, as necessary, the following: (Ref: par. .A37–.A38)

- a. Obtaining evidence about the accuracy and completeness of the information
- b. Evaluating whether the information is sufficiently precise and detailed for the practitioner's purposes

Using the Work of a Practitioner's Specialist

.37 When the practitioner expects to use the work of a practitioner's specialist, the practitioner should do the following:

- a. Evaluate whether the practitioner's specialist has the necessary competence, capabilities, and objectivity for the practitioner's purposes. In the case of a practitioner's external specialist, the evaluation of objectivity should include inquiry regarding interests and relationships that may create a threat to the objectivity of the practitioner's specialist. (Ref: par. .A39–.A42)
- b. Obtain a sufficient understanding of the field of expertise of a practitioner's specialist to enable the practitioner to (Ref: par. .A43)
 - i. determine the nature, scope, and objectives of that specialist's work for the practitioner's purposes and

- ii. evaluate the adequacy of that work for the practitioner's purposes.
- c. Agree with the practitioner's specialist regarding (Ref: par. .A44)
 - i. the nature, scope, and objectives of that practitioner's specialist's work;
 - ii. the respective roles and responsibilities of the practitioner and that specialist;
 - iii. the nature, timing, and extent of communication between the practitioner and that specialist, including the form of any report or documentation to be provided by that specialist; and
 - iv. the need for the practitioner's specialist to observe confidentiality requirements.
- d. Evaluate the adequacy of the work of the practitioner's specialist for the practitioner's purposes, including
 - i. the relevance and reasonableness of the findings and conclusions of the practitioner's specialist and their consistency with other evidence;
 - ii. if the work of the practitioner's specialist involves the use of significant assumptions and methods
 - (1) obtaining an understanding of those assumptions and methods and
 - (2) evaluating the relevance and reasonableness of those assumptions and methods in the circumstances, giving consideration to the rationale and support provided by the practitioner's specialist, and in relation to the practitioner's other findings and conclusions; and
 - iii. if the work of the practitioner's specialist involves the use of source data that are significant to the work of the practitioner's specialist, the relevance, completeness, and accuracy of that source data.

.38 If the practitioner determines that the work of the practitioner's specialist is not adequate for the practitioner's purposes, the practitioner should

- a. agree with the practitioner's specialist on the nature and extent of further work to be performed by the practitioner's specialist or
- b. perform additional procedures appropriate to the circumstances.

.39 The nature, timing, and extent of the procedures a practitioner performs when the practitioner expects to use the work of a practitioner's specialist will vary depending on the circumstances. In determining the nature, timing, and extent of those procedures, the practitioner should consider the following: (See section 105.)²

- a. The significance of that specialist's work in the context of the engagement (See also paragraphs .A45–.A46)
- b. The nature of the matter to which that specialist's work relates
- c. The risks of material misstatement in the matter to which that specialist's work relates

² Paragraph .34 of section 105.

- d. The practitioner's knowledge of, and experience with, previous work performed by that specialist
- e. Whether that specialist is subject to the practitioner's firm's quality control policies and procedures (see also paragraph .A47)

Using the Work of Internal Auditors

.40 When the practitioner expects to use the work of the internal audit function in obtaining evidence or to use internal auditors to provide direct assistance, the practitioner should determine whether the work can be used for purposes of the assertion-based examination by evaluating the following: (Ref: par. .A48–.A50)

- a. The level of competence of the internal audit function or the individual internal auditors providing direct assistance
- b. The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal audit function or for internal auditors providing direct assistance, the existence of threats to the objectivity of those internal auditors and the related safeguards applied to reduce or eliminate those threats
- c. When using the work of the internal audit function, the application by the internal audit function of a systematic and disciplined approach, including quality control

.41 When using the work of the internal audit function, the practitioner should perform sufficient procedures on the body of work of the internal audit function as a whole that the practitioner plans to use to determine its adequacy for the purpose of the assertion-based examination engagement. This includes reperforming some of the body of work of the internal audit function that the practitioner intends to use in obtaining evidence.

.42 Prior to using internal auditors to provide direct assistance, the practitioner should obtain written acknowledgment from the responsible party that internal auditors providing direct assistance to the practitioner will be allowed to follow the practitioner's instructions, and that the responsible party will not intervene in the work the internal auditor performs for the practitioner.

.43 When using internal auditors to provide direct assistance to the practitioner, the practitioner should direct, supervise, and review the work of the internal auditors.

.44 Because the practitioner has sole responsibility for the opinion expressed, the practitioner should make all significant judgments in the assertion-based examination engagement, including when to use the work of the internal audit function in obtaining evidence. To prevent undue use of the internal audit function in obtaining evidence, the external auditor should plan to use less of the work of the function and perform more of the work directly in the following circumstances:

- a. The more judgment is involved in
 - i. planning and performing relevant procedures or
 - ii. evaluating the evidence obtained
- b. the higher the assessed risk of material misstatement;

- c. the less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors
- d. the lower the level of competence of the internal audit function.

.45 Before the conclusion of the engagement, the practitioner should evaluate whether the use of the work of the internal audit function or the use of internal auditors to provide direct assistance results in the practitioner still being sufficiently involved in the assertion-based examination given the practitioner's sole responsibility for the opinion expressed.

Evaluating the Results of Procedures

.46 The practitioner should accumulate misstatements identified during the engagement other than those that are clearly trivial. (Ref: par. .A51–.A52)

.47 The practitioner should evaluate the sufficiency and appropriateness of the evidence obtained in the context of the engagement and, if necessary, attempt to obtain further evidence. The practitioner should consider all relevant evidence, regardless of whether it appears to corroborate or contradict the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A53–.A57)

.48 If the practitioner is unable to obtain sufficient appropriate evidence, a scope limitation exists and the practitioner should express a qualified opinion, disclaim an opinion, or withdraw from the engagement, when withdrawal is possible under applicable law or regulation. The practitioner should apply the requirements in paragraphs .70–.86 when a scope limitation exists and the practitioner is determining the type of opinion to be issued.

Considering Subsequent Events and Subsequently Discovered Facts

.49 The practitioner should inquire whether the responsible party, and if different, the engaging party, is aware of any events subsequent to the period (or point in time) covered by the assertion-based examination engagement up to the date of the practitioner's report that could have a significant effect on the subject matter or assertion. If so, the practitioner should apply other appropriate procedures to obtain evidence regarding such events. If the practitioner becomes aware, through inquiry or otherwise, of such an event, or any other event that is of such a nature and significance that its disclosure is necessary to prevent users of the report from being misled, and information about that event is not adequately disclosed by the responsible party in the subject matter or in its assertion, the practitioner should take appropriate action. (Ref: par. .A58–.A60)

.50 The practitioner has no responsibility to perform any procedures regarding the subject matter or assertion after the date of the practitioner's report. Nevertheless, the practitioner should respond appropriately to facts that become known to the practitioner after the date of the report that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. (Ref: par. .A61–.A62)

Written Representations

.51 The practitioner should request from the responsible party written representations in the form of a letter addressed to the practitioner. The representations should do the following: (Ref: par. .A63–.A66)

- a. Include the responsible party's assertion about the subject matter based on the criteria. (Ref: par. .A107)
- b. State that all relevant matters are reflected in the measurement or evaluation of the subject matter or assertion.
- c. State that all known matters contradicting the subject matter or assertion and any communication from regulatory agencies or others affecting the subject matter or assertion have been disclosed to the practitioner, including communications received between the end of the period addressed in the written assertion and the date of the practitioner's report.
- d. Acknowledge responsibility for
 - i. the subject matter and the responsible party's assertion;
 - ii. selecting the criteria, when applicable; and
 - iii. determining that such criteria are suitable, will be available to the intended users, and appropriate for the purpose of the engagement.
- e. State that the responsible party has disclosed to the practitioner
 - i. all deficiencies in internal control relevant to the engagement of which the responsible party is aware;
 - ii. its knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter; and
 - iii. other matters as the practitioner deems appropriate.
- f. State that any known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion have been disclosed to the practitioner. (Ref: par. .A65)
- g. State that it has provided the practitioner with all relevant information and access, as agreed upon in the terms of the engagement.
- h. If applicable, state that the responsible party believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the subject matter. (Ref: par. .A66)
- i. If applicable, state that significant assumptions used in making any material estimates are reasonable.

.52 When the engaging party is not the responsible party, and the responsible party refuses to provide the representations in paragraph .51 in writing, the practitioner should make inquiries of the responsible party about, and seek oral responses to, the matters in paragraph .51 (Ref: par. .A67)

.53 When the engaging party is not the responsible party, the practitioner should request written representations from the engaging party in addition to those requested from the responsible party in the form of a letter addressed to the practitioner. The representations should do the following:

- a. Acknowledge that the responsible party is responsible for the subject matter being in accordance with the criteria and for its assertion

- b. Acknowledge the engaging party's responsibility for selecting the criteria
- c. Acknowledge the engaging party's responsibility for determining that such criteria are suitable, will be available to the intended users, and are appropriate for the purpose of the engagement
- d. State that the engaging party is not aware of any material misstatements in the subject matter information or assertion
- e. State that the engaging party has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion. (Ref: par. .A65)
- f. Address other matters as the practitioner deems appropriate

.54 When written representations are directly related to matters that are material to the subject matter, the practitioner should

- a. evaluate their reasonableness and consistency with other evidence obtained, including other representations (oral or written) and
- b. consider whether those making the representations can be expected to be well informed on the particular matters.

.55 The date of the written representations should be as of the date of the practitioner's report. The written representations should address the subject matter and periods covered by the practitioner's opinion.

Requested Written Representations Not Provided or Not Reliable

.56 When the engaging party is the responsible party, and one or more of the requested written representations are not provided, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should do the following: (Ref: par. .A68–.A70)

- a. Discuss the matter with the appropriate party
- b. Reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general
- c. If any of the matters are not resolved to the practitioner's satisfaction, take appropriate action, including determining the possible effect on the opinion in the practitioner's report

.57 When the engaging party is not the responsible party

- a. if one or more of the requested representations are not provided in writing by the responsible party, but the practitioner receives satisfactory oral responses to the practitioner's inquiries performed in accordance with paragraph .52 sufficient to enable the practitioner to conclude that the practitioner has sufficient appropriate evidence to form an opinion about the subject matter, the practitioner's report should contain a separate paragraph that restricts the use of the report to the engaging party. (Paragraphs .64–.66 contain requirements for the contents of such a paragraph.) (Ref: par. .A72)

- b. if one or more of the requested representations are provided neither in writing nor orally from the responsible party in accordance with paragraph .52, a scope limitation exists, and the practitioner should determine the effect on the report, or the practitioner should withdraw from the engagement. (Ref: par. .A72)

Other Information

.58 If prior to or after the release of the practitioner's report on subject matter or an assertion the practitioner is willing to permit the inclusion of the report in a document that contains the subject matter or assertion and other information, the practitioner should read the other information to identify material inconsistencies, if any, with the subject matter, assertion, or report. If upon reading the other information, in the practitioner's professional judgment either of the following applies, the practitioner should discuss the matter with the appropriate party and take further action as appropriate: (Ref: par. .A73–.A74)

- a. A material inconsistency between the other information and the subject matter, assertion, or the report exists
- b. A material misstatement of fact exists in the other information, the subject matter, assertion, or report

Description of Criteria

.59 The practitioner should evaluate whether the written description of the subject matter or assertion adequately refers to or describes the criteria. (Ref: par. .A75–.A76)

Forming the Opinion

.60 The practitioner should form an opinion about whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or the assertion is fairly stated, in all material respects. In forming that opinion, the practitioner should evaluate

- a. the practitioner's conclusion regarding the sufficiency and appropriateness of evidence obtained and (Ref: par. .A77)
- b. whether uncorrected misstatements are material, individually or in the aggregate. (Ref: par. .A78)

.61 The practitioner should evaluate, based on the evidence obtained, whether the presentation of the subject matter or assertion is misleading within the context of the engagement. (Ref: par. .A79–.A80)

Preparing the Practitioner's Report

.62 The practitioner's report should be in writing. (Ref: par. .A81–.A84)

Content of the Practitioner's Report

.63 The practitioner's report should include the following, unless the practitioner is disclaiming an opinion, in which case, items .63g and .63h should be omitted:

- a. A title that includes the word *independent*. (Ref: par. .A85)
- b. An appropriate addressee as required by the circumstances of the engagement.

- c.* An identification or description of the subject matter or assertion being reported on, including the point in time or period of time to which the measurement or evaluation of the subject matter or assertion relates.
- d.* An identification of the criteria against which the subject matter was measured or evaluated. (Ref: par. .A86)
- e.* A statement that identifies the responsible party and its responsibility for the subject matter being in accordance with (or based on) the criteria or for its assertion. (Ref: par. .A87)
- f.* A statement that the practitioner's responsibility is to express an opinion on the subject matter or assertion, based on the practitioner's examination. (Ref: par. .A88)
- g.* A statement that
 - i.* the practitioner's examination was conducted in accordance with attestation standards established by the AICPA. (Ref: par. .A89)
 - ii.* those standards require that the practitioner plan and perform the examination to obtain reasonable assurance about whether
 - (1) the subject matter is in accordance with (or based on) the criteria, in all material respects (or equivalent language regarding the subject matter and criteria, such as the language used in the examples in paragraph. A90) or
 - (2) the responsible party's assertion is fairly stated, in all material respects.
 - iii.* the practitioner believes the evidence the practitioner obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.
- h.* A description of the nature of an assertion-based examination engagement. (Ref: par. .A91–.A93)
- i.* A statement that the practitioner is required to be independent and to meet the practitioner's other ethical responsibilities in accordance with relevant ethical requirements related to the examination engagement. (Ref: par. .A94–.A95)
- j.* A statement that describes significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A96)
- k.* The practitioner's opinion about whether (Ref: par. .A97–.A100)
 - i.* the subject matter is in accordance with (or based on) the criteria, in all material respects or
 - ii.* the responsible party's assertion is fairly stated, in all material respects
- l.* The manual or printed signature of the practitioner's firm.
- m.* The city and state where the practitioner's report is issued. (Ref: par. .A101)
- n.* The date of the report. (The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate evidence on which to base the practitioner's opinion, including evidence that
 - i.* the attestation documentation has been reviewed,

- ii. if applicable, the written presentation of the subject matter has been prepared, and
- iii. the responsible party has provided a written assertion or, in the circumstances described in paragraph .A72, an oral assertion.) (Ref: par. .A102–.A103)

Restricted-Use Paragraph

.64 In the following circumstances, the practitioner's report should include an alert, in a separate paragraph, that restricts the use of the report: (Ref: par. .A104–.A106)

- a. The practitioner determines that the criteria used to evaluate the subject matter are appropriate only for a limited number of parties who either participated in their establishment or can be presumed to have an adequate understanding of the criteria.
- b. The criteria used to evaluate the subject matter are available only to specified parties.
- c. The engaging party is not the responsible party, and the responsible party does not provide the written representations required by paragraph .51 but does provide oral responses to the practitioner's inquiries about the matters in paragraph .51, as provided for in paragraph .52 and .57a. In this case, the use of the practitioner's report should be restricted to the engaging party. (Ref: par. .A107)

.65 The alert should

- a. state that the practitioner's report is intended solely for the information and use of the specified parties,
- b. identify the specified parties for whom use is intended, and (Ref: par. .A108)
- c. state that the report is not intended to be, and should not be, used by anyone other than the specified parties. (Ref: par. .A109–.A111)

.66 When the engagement is also performed in accordance with *Government Auditing Standards*, the alert that restricts the use of the practitioner's report should include the following information, rather than the information required by paragraph .65:

- a. A description of the purpose of the report
- b. A statement that the report is not suitable for any other purpose

.67 A practitioner should report on a written assertion or directly on the subject matter. If the opinion is modified because of a material misstatement, the practitioner should report directly on the subject matter, even when the assertion acknowledges the misstatement.

.68 If the practitioner is reporting on the assertion, the assertion should be bound with or accompany the practitioner's report, or the assertion should be clearly stated in the report.

Reference to the Practitioner's Specialist

.69 The practitioner should not refer to the work of a practitioner's specialist in the practitioner's report containing an unmodified opinion. (Ref: par. .A112)

Modified Opinions

.70 The practitioner should modify the opinion when either of the following circumstances exist and, in the practitioner's professional judgment, the effect of the matter is or may be material: (Ref: par. .A113–.A114)

- a.* The practitioner is unable to obtain sufficient appropriate evidence to conclude that the subject matter is in accordance with (or based on) the criteria, in all material respects.
- b.* The practitioner concludes, based on evidence obtained, that the subject matter is not in accordance with (or based on) the criteria, in all material respects.

.71 When the practitioner modifies the opinion, the practitioner should include a separate paragraph in the practitioner's report that provides a description of the matter giving rise to the modification.

.72 The practitioner should express a qualified opinion when either of the following applies: (Ref: par. .A115–.A119)

- a.* The practitioner, having obtained sufficient appropriate evidence, concludes that misstatements, individually or in the aggregate, are material, but not pervasive to the subject matter.
- b.* The practitioner is unable to obtain sufficient appropriate evidence on which to base the opinion, but the practitioner concludes that the possible effects on the subject matter of undetected misstatements, if any, could be material but not pervasive.

.73 When the practitioner expresses a qualified opinion due to a material misstatement of the subject matter, the practitioner should state that, in the practitioner's opinion, except for the effects of the matter or matters giving rise to the modification, the subject matter is in accordance with (or based on) the criteria, in all material respects. When the modification arises from an inability to obtain sufficient appropriate evidence, the practitioner should use the corresponding phrase "except for the possible effects of the matter(s) ..." for the modified opinion.

.74 The practitioner should express an adverse opinion when the practitioner, having obtained sufficient appropriate evidence, concludes that misstatements, individually or in the aggregate, are both material and pervasive to the subject matter.

.75 When the practitioner expresses an adverse opinion, the practitioner should state that, in the practitioner's opinion, because of the significance of the matter or matters giving rise to the modification, the subject matter is not in accordance with (or based on) the criteria, in all material respects.

.76 If the practitioner has concluded that conditions exist that, individually or in combination, result in one or more material misstatements based on the criteria, the practitioner should modify the opinion and express a qualified or adverse opinion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement.

.77 The practitioner should disclaim an opinion when the practitioner is unable to obtain sufficient appropriate evidence on which to base the opinion, and the practitioner concludes that the possible effects on the subject matter of undetected misstatements, if any, could be both material and pervasive. (Ref: par. .A120)

.78 When the practitioner disclaims an opinion due to an inability to obtain sufficient appropriate evidence, the practitioner's report should state the following:

- a. Because of the significance of the matter or matters giving rise to the modification, the practitioner has not been able to obtain sufficient appropriate evidence to provide a basis for an examination opinion.
- b. Accordingly, the practitioner does not express an opinion on the subject matter.

Description of the Practitioner's Responsibility When the Practitioner Expresses a Qualified or an Adverse Opinion

.79 When the practitioner expresses a qualified or an adverse opinion, the practitioner should amend the description of the practitioner's responsibility to state that the practitioner believes that the evidence the practitioner has obtained is sufficient and appropriate to provide a basis for the practitioner's modified opinion.

Description of the Practitioner's Responsibility When the Practitioner Disclaims an Opinion

.80 When the practitioner disclaims an opinion due to an inability to obtain sufficient appropriate evidence, the practitioner should amend the practitioner's report to state that the practitioner was engaged to examine the subject matter or assertion. The practitioner should also amend the description of the practitioner's responsibility and the description of an assertion-based examination to state only the following:

Our responsibility is to express an opinion on the subject matter or assertion based on conducting the examination in accordance with attestation standards established by the AICPA. Because of the limitation on the scope of our examination discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on whether the subject matter is in accordance with (or based on) the criteria, in all material respects.

.81 If the practitioner expresses a modified opinion because of a scope limitation but is also aware of a matter that causes the subject matter to be materially misstated, the practitioner should include in the practitioner's report a clear description of both the scope limitation and the matter that causes the subject matter to be materially misstated.

.82 The practitioner's opinion on the subject matter or assertion should be clearly separated from any paragraphs emphasizing matters related to the subject matter or any other reporting responsibilities. Any paragraphs emphasizing matters related to the subject matter or any other reporting responsibilities should be phrased in a manner that makes it clear that these paragraphs are not intended to detract from that opinion.

.83 When the opinion is modified, reference to an external specialist is permitted when such reference is relevant to an understanding of the modification to the practitioner's opinion. The practitioner should indicate in the practitioner's report that such reference does not reduce the practitioner's responsibility for that opinion.

Responsible Party Refuses to Provide a Written Assertion

.84 If the engaging party is the responsible party and refuses to provide the practitioner with a written assertion as required by paragraph .10, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation.

.85 If law or regulation does not allow the practitioner to withdraw from the engagement, the practitioner should disclaim an opinion.

.86 When the engaging party is not the responsible party and the responsible party refuses to provide the practitioner with a written assertion, the practitioner may report on the subject matter but should disclose in the practitioner's report the responsible party's refusal to provide a written assertion and should restrict the use of the practitioner's report to the engaging party. (Ref: par. .A121–.A123)

Communication Responsibilities

.87 The practitioner should communicate to the responsible party known and suspected fraud and noncompliance with laws or regulations, uncorrected misstatements, and, when relevant to the subject matter, internal control deficiencies identified during the engagement. When the engaging party is not the responsible party, the practitioner should also communicate this information to the engaging party. (Ref: par. .A124)

.88 In the event the practitioner encounters known or suspected fraud or noncompliance with laws or regulations in connection with the engagement, the practitioner should consider responsibilities under the AICPA Code of Professional Conduct and applicable law prior to communicating such information either to the responsible party or the engaging party. (Ref: par. .A125–.A126)

Documentation

.89 The practitioner should prepare engagement documentation that is sufficient to determine the following: (Ref: par. .A127–.A130)

- a. The nature, timing, and extent of the procedures performed to comply with relevant AT-C sections and applicable legal and regulatory requirements, including the following:
 - i. The identifying characteristics of the specific items or matters tested
 - ii. Who performed the engagement work and the date such work was completed
 - iii. The discussions with the responsible party or others about findings or issues that, in the practitioner's professional judgment, are significant, including the nature of the significant findings or issues discussed, and when and with whom the discussions took place
 - iv. When the engaging party is the responsible party and the responsible party will not provide one or more of the requested written representations or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations or that the written

representations are otherwise not reliable, the matters in paragraph .56

- v. When the engaging party is not the responsible party and the responsible party will not provide the written representations regarding the matters in paragraph .51, the oral responses from the responsible party to the practitioner's inquiries regarding the matters in paragraph .51, in accordance with paragraph .52
 - vi. Who reviewed the engagement work performed and the date and extent of such review
 - vii. If the practitioner identified information that is inconsistent with the practitioner's final opinion regarding a significant matter, how the practitioner addressed the inconsistency
- b. The results of the procedures performed and the evidence obtained

.90 If, in circumstances such as those described in paragraph .50, the practitioner performs new or additional procedures or draws new conclusions after the date of the practitioner's report, the practitioner should document the following:

- a. The circumstances encountered
- b. The new or additional procedures performed, evidence obtained, and conclusions reached, and their effect on the report
- c. When and by whom the resulting changes to the documentation were made and reviewed

Application and Other Explanatory Material

Conduct of an Assertion-Based Examination Engagement (Ref: par. .05)

.A1 For example, if a practitioner were examining prospective financial information, section 105, this section, and section 305, *Prospective Financial Information*, would be relevant.

Agreeing on the Terms of the Engagement (Ref: par. .07, .08b, .08d, and .08e)

.A2 It is in the interests of both the engaging party and the practitioner to document the agreed-upon terms of the engagement before the commencement of the engagement to help avoid misunderstandings. The form and content of the engagement letter or other suitable form of written agreement will vary with the engagement circumstances.

.A3 A practitioner may further describe the responsibilities of the practitioner by adding the following items to the engagement letter or other suitable form of written agreement:

- a. A statement that an examination is designed to obtain reasonable assurance about whether the subject matter as measured or evaluated against the criteria is free from material misstatement
- b. A statement that the objective of an examination is the expression of an opinion in a written practitioner's report about whether the

subject matter is in accordance with (or based on) the criteria, in all material respects, or whether the responsible party's assertion is fairly stated, in all material respects

.A4 Situations may exist in which the responsible party is not the engaging party and, as such, the responsibilities of each party may differ. For example, when the responsible party is not the engaging party, the engaging party, rather than the responsible party, may be responsible for selecting the criteria.

.A5 The engaging party may request that the practitioner recommend, develop, or assist in developing the criteria for the engagement. Regardless of whether the practitioner recommends, develops, or assists in developing or selecting the criteria for the engagement, the engaging party is required to take responsibility for the criteria.

.A6 If relevant, a statement about the inherent limitations of an examination engagement may indicate that "because of the inherent limitations of an examination engagement, together with the inherent limitations of internal control, an unavoidable risk exists that some material misstatements may not be detected, even though the examination is properly planned and performed in accordance with the attestation standards."

Requesting a Written Assertion (Ref: par. .10)

.A7 What constitutes a reasonable basis for the responsible party's assertion depends on the nature of the subject matter and other engagement circumstances. In some cases, a formal process with extensive internal control may be needed to provide the responsible party with a reasonable basis for making its assertion. The fact that the practitioner will report on the subject matter is not a substitute for the responsible party's own processes to have a reasonable basis for its assertion.

.A8 The language of the responsible party's written assertion in paragraph .10 may need to be tailored to reflect the nature of the underlying subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .10 include the following:

- The subject matter is presented in accordance with (or based on) the criteria.
- The subject matter achieved the objectives, for example, when the objectives are the criteria.
- The subject matter is presented fairly, based on the criteria.

.A9 Situations may arise in which the current responsible party was not present during some or all of the period covered by the practitioner's report. Such persons may contend that they are not in a position to provide a written assertion that covers the entire period because they were not in place during some or all of the period. This fact, however, does not diminish such persons' responsibilities for the subject matter as a whole. Accordingly, the requirement for the practitioner to request a written assertion from the responsible party that covers the entire relevant period or periods still applies.

.A10 Paragraph .51a requires the practitioner to request a written representation from the responsible party that is the same as the responsible party's assertion. If the responsible party provides the practitioner with the written representation in paragraph .51a, the practitioner need not request a separate written assertion unless a separate written assertion is called for by the engagement circumstances.

.A11 A practitioner may also be engaged to assist the responsible party in measuring or evaluating the subject matter against the criteria in connection with the responsible party providing a written assertion.

.A12 Regardless of the procedures performed by the practitioner, the responsible party is required to accept responsibility for its assertion and the subject matter. An assertion based solely on the practitioner's procedures would not be considered a reasonable basis for the assertion.³

Planning and Performing the Engagement (Ref: par. .11)

.A13 Planning involves the engagement partner and other key members of the engagement team and may involve the practitioner's specialists in developing

- an overall strategy for the scope, timing, and conduct of the engagement and
- an engagement plan, consisting of a detailed approach for the nature, timing, and extent of procedures to be performed.

Adequate planning helps the practitioner devote appropriate attention to important areas of the engagement, identify potential problems on a timely basis, and properly organize and manage the engagement for it to be performed in an effective and efficient manner.

Adequate planning also assists the practitioner in properly assigning work to engagement team members and facilitates the direction, supervision, and review of their work. Further, it assists, when applicable, the coordination of work performed by other practitioners and practitioner's specialists. The nature and extent of planning activities will vary with the engagement circumstances, for example, the complexity of the assessment or evaluation of the subject matter and the practitioner's previous experience with it. Examples of relevant matters that may be considered include the following:

- The characteristics of the engagement that define its scope, including the terms of the engagement, the characteristics of the subject matter, and the criteria
- The expected timing and the nature of the communications required
- The results of preliminary engagement activities, such as client acceptance, and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the appropriate party is relevant
- The engagement process, including possible sources of evidence, and choices among alternative measurement or evaluation methods
- The practitioner's understanding of the appropriate party and its environment, including the risks that the subject matter or assertion may be materially misstated
- Identification of intended users and their information needs and consideration of materiality and the components of attestation risk

³ The "Nonattest Services" subtopic (ET sec. 1.295) of the AICPA Code of Professional Conduct addresses the practitioner's provision of nonattest services for an attest client.

All ET sections can be found in AICPA *Professional Standards*.

- The risk of fraud relevant to the engagement
- The effect on the engagement of using the internal audit function

.A14 The practitioner may decide to discuss elements of planning with the appropriate party to facilitate the conduct and management of the engagement (for example, to coordinate some of the planned procedures with the work of the responsible party's personnel). Although these discussions often occur, the overall engagement strategy and the engagement plan remain the practitioner's responsibility. When discussing matters included in the overall engagement strategy or engagement plan, care is needed to avoid compromising the effectiveness of the engagement. For example, discussing the nature and timing of detailed procedures with the responsible party may compromise the effectiveness of the engagement by making the procedures too predictable.

.A15 Planning is not a discrete phase but, rather, a cumulative and iterative process throughout the engagement. Because of unexpected events, changes in conditions, or evidence obtained, the practitioner may need to revise the overall strategy and engagement plan and, thereby, the resulting nature, timing, and extent of planned procedures.

.A16 In smaller or less complex engagements, the entire engagement may be conducted by a very small engagement team, possibly involving the engagement partner (who may be a sole practitioner) working without any other engagement team members. With a smaller team, coordination of and communication among team members is easier. In such cases, establishing the overall engagement strategy need not be a complex or time-consuming exercise; it varies according to the size of the entity, complexity of the engagement, and size of the engagement team.

Risk Assessment Procedures (Ref: par. .14)

.A17 Obtaining an understanding of the subject matter and other engagement circumstances provides the practitioner with a frame of reference for exercising professional judgment throughout the engagement, for example, when doing the following:

- Considering the characteristics of the subject matter
- Assessing the suitability of criteria
- Considering the factors that, in the practitioner's professional judgment, are significant in directing the engagement team's efforts, including situations in which special consideration may be necessary (for example, when there is a need for specialized skills or the work of a specialist)
- Establishing and evaluating the continued appropriateness of quantitative materiality levels (when appropriate) and considering qualitative materiality factors
- Developing expectations when performing analytical procedures
- Designing and performing procedures
- Evaluating evidence, including the reasonableness of the written representations received by the practitioner

.A18 In assessing inherent risk, the practitioner may consider factors relevant to assertion-based examination engagements, such as the following:

- The complexity of the subject matter or assertion

- The length of time during which the entity has had experience with the subject matter or assertion
- Prior experience with the entity's assessment of the subject matter or assertion

Materiality in Planning and Performing the Engagement (Ref: par. .17–.18)

.A19 Materiality is considered in the context of qualitative factors and, when applicable, quantitative factors. The relative importance of qualitative factors and quantitative factors when considering materiality in a particular engagement is a matter for the practitioner's professional judgment.

.A20 Professional judgments about materiality are made considering surrounding circumstances, but they are not affected by the level of assurance, that is, for the same intended users, materiality for an assertion-based examination engagement is the same as it is for a review engagement because materiality is based on the information needs of intended users and not the level of assurance.

.A21 In general, misstatements, including omissions, are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by intended users based on the subject matter. The practitioner's consideration of materiality is a matter of professional judgment and is affected by the practitioner's perception of the common information needs of intended users as a group. For purposes of determining materiality, the practitioner may assume that intended users

- a. have a reasonable knowledge of the subject matter and a willingness to study the subject matter with reasonable diligence.
- b. understand that the subject matter is measured or evaluated and subjected to procedures using appropriate levels of materiality and that they have an understanding of any materiality concepts included in the criteria.
- c. understand any inherent uncertainties involved in measuring or evaluating the subject matter.
- d. make reasonable judgments based on the subject matter.

Unless the engagement has been designed to meet the particular information needs of specific users, the possible effect of misstatements on specific users, whose information needs may vary widely, is not ordinarily considered.

.A22 Qualitative factors may include the following:

- The interaction between, and relative importance of, various aspects of the subject matter, such as numerous performance indicators
- The wording chosen with respect to subject matter that is expressed in narrative form, for example, the wording chosen does not omit or distort the information
- The characteristics of the presentation adopted for the subject matter when the criteria allow for variations in that presentation
- The nature of a misstatement, for example, the nature of observed deviations in the operation of a control when the responsible party asserts that the control is effective
- Whether a misstatement affects compliance with laws or regulations

- In the case of periodic reporting on a subject matter, whether the effect of an adjustment affects past or current information about the subject matter or is likely to affect future information about the subject matter
- Whether a misstatement is the result of an intentional act or is unintentional
- Whether a misstatement is significant with regard to the practitioner's understanding of known previous communications to users, for example, in relation to the expected outcome of the measurement or evaluation of the subject matter
- Whether a misstatement relates to the relationship between the responsible party, and if different, the engaging party or its relationship with other parties

.A23 Quantitative factors relate to the magnitude of misstatements relative to reported amounts for those aspects of the subject matter, if any, that are

- expressed numerically or
- otherwise related to numerical values, for example, the number of observed deviations in the operation of a control when the assertion-based examination involves the effectiveness of the control.

.A24 When quantitative factors are applicable, planning the engagement solely to detect individually material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the subject matter to be materially misstated. Applying materiality to elements of the subject matter ordinarily is not a simple mechanical calculation but involves the exercise of professional judgment. It is affected by the practitioner's understanding of the subject matter and the responsible party, updated during the performance of the risk assessment procedures, and consideration of the nature and extent of misstatements identified in previous attestation engagements.

.A25 The criteria may discuss the concept of materiality in the context of the preparation and presentation of the subject matter and thereby provide a frame of reference for the practitioner in considering materiality for the engagement. Although criteria may discuss materiality in different terms, the concept of materiality generally includes the matters discussed in paragraphs .A19–.A24. If the criteria do not include a discussion of the concept of materiality, these paragraphs provide the practitioner with a frame of reference.

Identifying Risks of Material Misstatement (Ref: par. .19)

.A26 Most of the practitioner's work in forming an opinion consists of obtaining and evaluating evidence. Procedures to obtain evidence can include inspection, observation, confirmation, recalculation, reperformance, and analytical procedures, often in some combination, in addition to inquiry.

.A27 In some cases, a subject-matter-specific section may include requirements that affect the nature, timing, and extent of procedures. For example, a subject-matter-specific section may describe the nature or extent of particular procedures to be performed in a particular type of engagement. Even in such cases, determining the exact nature, timing, and extent of procedures is a matter of professional judgment and will vary from one engagement to the next.

Responding to Assessed Risks and Obtaining Evidence (Ref: par. .21)

.A28 Overall responses to address the assessed risks of material misstatement of the subject matter or assertion may include the following:

- Emphasizing to the engagement team the need to maintain professional skepticism
- Assigning more experienced staff or those with specialized skills or using specialists
- Providing more supervision
- Incorporating additional elements of unpredictability in the selection of further procedures to be performed
- Making changes to the nature, timing, or extent of procedures (for example, performing procedures at period-end instead of at an interim date or modifying the nature of procedures to obtain more persuasive evidence)

.A29 The assessment of the risks of material misstatement of the subject matter or assertion is affected by the practitioner's understanding of the control environment. An effective control environment may allow the practitioner to have more confidence in internal control and the reliability of evidence generated internally within the entity and, thus, for example, may allow the practitioner to conduct some procedures at an interim date, rather than at the period-end. Deficiencies in the control environment, however, have the opposite effect. For example, the practitioner may respond to an ineffective control environment by doing the following:

- Conducting more procedures as of the period-end, rather than at an interim date
- Obtaining more extensive evidence from procedures other than tests of controls
- Increasing the number of locations to be included in the scope of the assertion-based examination

Analytical Procedures Performed in Response to Assessed Risks (Ref: par. .28)

.A30 An understanding of the purposes of analytical procedures and the limitations of those procedures is important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires professional judgment by the practitioner.

.A31 Analytical procedures involve comparisons of expectations developed by the practitioner to recorded amounts or ratios developed from recorded amounts. The practitioner develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the practitioner's understanding of the subject matter; the practices used by the responsible party to measure, recognize, and record the subject matter; and, if applicable, the industry in which the entity operates.

Sampling (Ref: par. .32)

.A32 The AICPA Audit Guide *Audit Sampling* provides guidance that may be useful to a practitioner who has decided to use sampling in performing attestation procedures.

Fraud, Laws, and Regulations (Ref: par. .34)

.A33 In responding to fraud or suspected fraud identified during the engagement, it may be appropriate, unless prohibited by law, regulation, or ethics standards, for the practitioner to, for example, do the following:

- Discuss the matter with the appropriate party
- Request that the responsible party consult with an appropriately qualified third party, such as the entity's legal counsel or a regulator
- Consider the implications of the matter in relation to other aspects of the engagement, including the practitioner's risk assessment and the reliability of written representations from the responsible party
- Obtain legal advice about the consequences of different courses of action
- Communicate with third parties (for example, a regulator)
- Withdraw from the engagement

.A34 The actions noted in paragraph .A33 may also be appropriate in responding to noncompliance or suspected noncompliance with laws or regulations identified during the engagement. It may be appropriate to describe the matter in a separate paragraph in the practitioner's report, unless either of the following apply:

- a. The practitioner is precluded by the responsible party from obtaining sufficient appropriate evidence to evaluate whether noncompliance that may be material to the subject matter has, or is likely to have, occurred, in which case, paragraphs .70a and .77 apply.
- b. The practitioner concludes that the noncompliance results in a material misstatement of the subject matter, in which case, paragraphs .70b and .76 apply.

Revision of Risk Assessment (Ref: par. .35)

.A35 Information may come to the practitioner's attention that differs significantly from that on which the determination of planned procedures was based. As the practitioner performs planned procedures, the evidence obtained may cause the practitioner to perform additional procedures. Such procedures may include asking the responsible party to examine the matter identified by the practitioner and to make adjustments to the subject matter, if appropriate.

.A36 The practitioner may become aware of a matter that causes the practitioner to believe the subject matter may be materially misstated, for example, when performing analytical procedures, the practitioner identifies a fluctuation or relationship that is inconsistent with other relevant information or that differs significantly from expectations.

Evaluating the Reliability of Information Produced by the Entity (Ref: par. .36)

.A37 Reliable information is sufficiently accurate and complete.

.A38 Obtaining evidence about the accuracy and completeness of information produced by the entity may be accomplished concurrently with the actual

procedure applied to the information when obtaining such evidence is an integral part of the procedure itself. In other situations, the practitioner may have obtained evidence of the accuracy and completeness of such information by testing controls over the preparation and maintenance of the information. In some situations, however, the practitioner may determine that additional procedures are needed.

Using the Work of a Practitioner's Specialist

The Competence, Capabilities, and Objectivity of a Practitioner's Specialist (Ref: par. .37a)

.A39 Information regarding the competence, capabilities, and objectivity of a practitioner's specialist may come from a variety of sources, such as the following:

- Personal experience with previous work of that specialist
- Discussions with that specialist
- Discussions with other practitioners or others who are familiar with that specialist's work
- Knowledge of that specialist's qualifications, membership of a professional body or industry association, license to practice, or other forms of external recognition
- Published papers or books written by that specialist
- The firm's quality control policies and procedures

.A40 Although a practitioner's specialist does not require the same proficiency as the practitioner in performing all aspects of an assertion-based examination engagement, a practitioner's specialist whose work is used may need a sufficient understanding of relevant AT-C sections to enable that specialist to relate the work assigned to that specialist to the engagement objective.

.A41 The evaluation of the significance of threats to objectivity and whether there is a need for safeguards may depend upon the role of the practitioner's specialist and the significance of the specialist's work in the context of the engagement. There may be some circumstances in which safeguards cannot reduce threats to an acceptable level, for example, if in an assertion-based examination engagement a practitioner's specialist is an individual who has played a significant role in measuring, evaluating, or disclosing the subject matter.

.A42 When evaluating the objectivity of a practitioner's external specialist, it may be relevant to do the following:

- Inquire of the appropriate party about any known interests or relationships that the appropriate party has with the practitioner's external specialist that may affect that specialist's objectivity
- Discuss with that specialist any applicable safeguards, including any professional requirements that apply to that specialist, and evaluate whether the safeguards are adequate to reduce threats to an acceptable level. Interests and relationships that may be relevant to discuss with the practitioner's specialist include
 - financial interests.
 - business and personal relationships.

- provision of other services by the specialist, including by the organization in the case of an external specialist that is an organization.

In some cases, it may also be appropriate for the practitioner to obtain a written representation from the practitioner's external specialist about any interests or relationships with the appropriate party of which that specialist is aware.

Obtaining an Understanding of the Field of Expertise of a Practitioner's Specialist (Ref: par. .37b)

.A43 Aspects of a practitioner's specialist's field of expertise relevant to the practitioner's understanding may include the following:

- Whether that specialist's field has areas of specialty within it that are relevant to the engagement
- Whether any professional or other standards and regulatory or legal requirements apply
- What assumptions and methods, including models, when applicable, are used by the practitioner's specialist and whether they are generally accepted within that specialist's field and appropriate in the circumstances of the engagement
- The nature of internal and external data or information the practitioner's specialist uses

Agreement With a Practitioner's Specialist (Ref: par. .37c)

.A44 The matters noted in paragraph .A46 may affect the level of detail and formality of the agreement between the practitioner and the practitioner's specialist, including whether it is appropriate that the agreement be in writing. The agreement between the practitioner and a practitioner's external specialist is often in the form of an engagement letter.

Integrating the Work of a Practitioner's Specialist (Ref: par. .39a)

.A45 Assertion-based examination engagements may be performed on a wide range of subject matters that require specialized skills and knowledge beyond those possessed by the practitioner and for which the work of a practitioner's specialist is used. In some situations, the practitioner's specialist will be consulted to provide advice on an individual matter, but the greater the significance of the work of the practitioner's specialist in the context of the engagement, the more likely it is that the specialist will work as part of a multidisciplinary team comprising subject-matter specialists and other attestation personnel. The more that specialist's work is integrated in nature, timing, and extent with the overall work effort, the more important effective two-way communication is between the practitioner's specialist and other attestation personnel. Effective two-way communication facilitates the proper integration of the specialist's work with the work of others on the engagement.

.A46 When the work of a practitioner's specialist is to be used, it may be appropriate to perform some of the procedures required by paragraph .37 at the engagement acceptance or continuance stage. In particular, this is appropriate when the work of the practitioner's specialist is to be used in the early stages of the engagement, for example, during initial planning and risk assessment.

The Practitioner's Firm's Quality Control Policies and Procedures (Ref: par. .39e)

.A47 Engagement teams are entitled to rely on their own firm's system of quality control, unless information provided by the firm or other parties suggests otherwise. The extent of that reliance will vary with the circumstances and may affect the nature, timing, and extent of the practitioner's procedures with respect to matters, such as the following:

- The practitioner's evaluation of the objectivity of the practitioner's internal specialist. (The practitioner's internal specialists are subject to relevant ethical requirements, including those pertaining to independence.)
- The practitioner's evaluation of the adequacy of the practitioner's internal specialist's work. (For example, the firm's training programs may provide the practitioner's internal specialists with an appropriate understanding of the interrelationship of their expertise with the evidence-gathering process. Reliance on such training and other firm processes, such as protocols for scoping the work of the practitioner's internal specialists, may affect the nature, timing, and extent of the practitioner's procedures to evaluate the adequacy of the practitioner's specialist's work.)
- Adherence to regulatory and legal requirements through monitoring processes.
- Agreement with the practitioner's specialist.

Such reliance does not reduce the practitioner's responsibility to meet the requirements of this section.

Using the Work of Internal Auditors (Ref: par. .40)

.A48 Activities similar to those performed by an internal audit function may be conducted by functions with other titles within an entity. Some or all of the activities of an internal audit function may also be outsourced to a third-party service provider. Neither the title of the function nor whether it is performed by the entity or a third-party service provider are sole determinants of whether the practitioner can use the work of internal auditors. Rather, it is the nature of the activities, the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors, the competence of the internal auditors, and the systematic and disciplined approach of the function that are relevant. References in this section to the work of the internal audit function include relevant activities of other functions or third-party providers that have these characteristics.

.A49 A practitioner planning to use the work of the internal audit function to obtain evidence may find it effective and efficient to discuss the planned use of the work with the internal audit function as a basis for coordinating activities.

.A50 The practitioner has sole responsibility for the opinion expressed, and that responsibility is not reduced by the practitioner's use of the work of internal auditors on the engagement. The objectivity and competence of internal auditors are important in determining whether to use their work and, if the practitioner decides to use their work, the nature and extent of the use of their work. However, a high degree of objectivity cannot compensate for a low degree of competence, nor can a high degree of competence compensate for a low degree of objectivity. Additionally, neither a high level of competence nor strong

support for the objectivity of the internal auditors compensates for the lack of a systematic and disciplined approach when using the work of the internal audit function.

Evaluating the Results of Procedures (Ref: par. .46–.47)

.A51 Uncorrected misstatements are accumulated during the engagement for the purpose of evaluating whether, individually or in aggregate, they are material when forming the practitioner's opinion. (See also paragraph .60b)

.A52 "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a wholly different (smaller) order of magnitude than materiality and will be matters that are clearly inconsequential, whether taken individually or in the aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the matter is considered not to be clearly trivial.

.A53 Sufficient appropriate evidence is necessary to support the practitioner's opinion and report. It is cumulative in nature and is primarily obtained from procedures performed during the course of the engagement. It may, however, also include information obtained from other sources such as previous engagements (provided the practitioner has determined whether changes have occurred since the previous engagement that may affect its relevance to the current engagement) or a firm's quality control procedures for client acceptance and continuance. Evidence may come from sources inside and outside the appropriate party. Also, information that may be used as evidence may have been prepared by a specialist employed or engaged by the appropriate party. *Evidence* comprises both information that supports and corroborates aspects of the subject matter and any information that contradicts aspects of the subject matter. In addition, in some cases, the absence of information (for example, refusal by the appropriate party to provide a requested representation) is considered by the practitioner and, therefore, also constitutes evidence.

.A54 The sufficiency and appropriateness of evidence are interrelated. *Sufficiency of evidence* is the measure of the quantity of evidence. The quantity of the evidence needed is affected by the risks of material misstatement and also by the quality of such evidence.

.A55 *Appropriateness of evidence* is the measure of the quality of evidence, that is, its relevance and reliability in providing support for the practitioner's opinion. The reliability of evidence is influenced by its source and nature and is dependent on the individual circumstances under which it is obtained. Generalizations about the reliability of various kinds of evidence can be made; however, such generalizations are subject to important exceptions. Even when evidence is obtained from sources external to the responsible party, circumstances may exist that could affect its reliability. For example, evidence obtained from an independent external source may not be reliable if the source is not knowledgeable. Recognizing that exceptions may exist, the following generalizations about the reliability of evidence may be useful:

- Evidence is more reliable when it is obtained from independent sources outside the appropriate party.
- Evidence that is generated internally is more reliable when the related controls are effective.
- Evidence obtained directly by the practitioner (for example, observation of the application of a control) is more reliable than

evidence obtained indirectly or by inference (for example, inquiry about the application of a control).

- Evidence is more reliable when it exists in documentary form, whether paper, electronic, or other media (for example, a contemporaneously written record of a meeting is ordinarily more reliable than a subsequent oral representation of what was discussed).
- Evidence provided by original documents is more reliable than evidence provided by photocopies, facsimiles, or documents that have been filmed, digitized, or otherwise transformed into electronic form, the reliability of which may depend on the controls over their preparation and maintenance.

.A56 Evidence obtained from different sources or of a different nature ordinarily provides more assurance than evidence from items considered individually. In addition, obtaining evidence from different sources or of a different nature may indicate that an individual item of evidence is not reliable. For example, corroborating information obtained from a source independent of the responsible party may increase the assurance the practitioner obtains from a representation from the responsible party. Conversely, when evidence obtained from one source is inconsistent with that obtained from another, the practitioner determines what additional procedures are necessary to resolve the inconsistency.

.A57 Whether sufficient appropriate evidence has been obtained on which to base the practitioner's opinion is a matter of professional judgment.

Considering Subsequent Events and Subsequently Discovered Facts (Ref: par. .49–.50)

.A58 For certain subject-matter AT-C sections, specific subsequent events requirements and related application guidance have been developed for engagement performance and reporting.

.A59 Procedures that a practitioner may perform to identify subsequent events include inquiring about and considering information

- contained in relevant reports issued during the subsequent period by internal auditors, other practitioners, or regulatory agencies.
- obtained through other professional engagements for that entity.

.A60 If the responsible party refuses to disclose a subsequent event for which disclosure is necessary to prevent users of the practitioner's report from being misled, appropriate actions the practitioner may take include the following:

- Disclosing the event in the practitioner's report and modifying the practitioner's opinion
- Withdrawing from the engagement

.A61 Subsequent to the date of the practitioner's report, the practitioner may become aware of facts that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. In such circumstances, the practitioner undertakes to determine if the facts existed at the date of the report and, if so, whether persons who would attach importance to these facts are currently using, or are likely to use, the report and related subject matter or assertion. This may include discussing the matter with the appropriate party and requesting the appropriate party's cooperation in whatever investigation or further action that may be necessary. The specific actions

to be taken in a particular case by the appropriate party and the practitioner may vary with the circumstances. Consideration may be given to, among other things, the time elapsed since the date of the report and whether issuance of a subsequent report is imminent. The practitioner may need to perform additional procedures deemed necessary to determine whether the subject matter or assertion needs revision and whether the previously issued report continues to be appropriate.

.A62 Depending on the circumstances, the practitioner may determine that notification of the situation by the appropriate party to persons who would attach importance to the facts and who are currently using, or are likely to use, the practitioner's report is necessary. This may be the case, for example, when

- a. the report is not to be relied upon because the subject matter or assertion needs revision or the practitioner is unable to determine whether revision is necessary, and
- b. issuance of a subsequent report is not imminent.

If the appropriate party failed to take the necessary steps to prevent reliance on the report, the practitioner's course of action depends upon the practitioner's legal and ethical rights and obligations. Consequently, the practitioner may consider it appropriate to seek legal advice prior to making any disclosure of the situation. Disclosure of the situation directly by the practitioner may include a description of the nature of the matter and its effect on the subject matter or assertion and the report, avoiding comments concerning the conduct or motives of any person.

Written Representations (Ref: par. .51–.52, .53e, and .57a)

.A63 Written confirmation of oral representations reduces the possibility of misunderstandings between the practitioner and the responsible party. The person from whom the practitioner requests written representations is ordinarily a member of senior management or those charged with governance depending on, for example, the management and governance structure of the responsible party, which may vary by entity, reflecting influences such as size and ownership characteristics.

.A64 Representations by the responsible party cannot replace other evidence the practitioner could reasonably expect to be available. Although written representations provide evidence, they do not provide sufficient appropriate evidence on their own about any of the matters with which they deal. Furthermore, the fact that the practitioner has received reliable written representations does not affect the nature or extent of other evidence that the practitioner obtains.

.A65 A discussion of what is considered a material effect on the subject matter or assertion may be included explicitly in the representation letter in qualitative or quantitative terms.

.A66 A summary of uncorrected misstatements ordinarily is included in or attached to the written representation.

.A67 Certain subject-matter AT-C sections do not permit the practitioner to perform the alternative procedures described in paragraphs .52 and .57a (making inquiries of the responsible party and restricting the use of the practitioner's report).

Requested Written Representations Not Provided or Not Reliable (Ref: par. .56–.57)

.A68 The engaging party's refusal to furnish written representations constitutes a limitation on the scope of the assertion-based examination. Such refusal is often sufficient to preclude an unmodified opinion and, particularly with respect to the representations in paragraph .53, may cause a practitioner to disclaim an opinion or withdraw from the engagement when withdrawal is possible under applicable law or regulation. However, based on the nature of the representations not obtained or the circumstances of the refusal, the practitioner may conclude that a qualified opinion is appropriate.

.A69 Circumstances in which the practitioner may be unable to obtain one or more requested written representations from a responsible party that is not the engaging party include, for example, the following:

- When the engaging party does not have a relationship with the responsible party
- When the assertion-based examination is undertaken against the wishes of the responsible party, for example, when required by law or regulation

In these or other circumstances, the practitioner may need to reconsider whether the responsible party is able or willing to take responsibility for the subject matter. Additionally, the practitioner may not have access to the evidence to support a conclusion that the responsible party has taken responsibility for the subject matter. (Ref: par. .48, .72*b*, and .77)

.A70 After performing the procedures in items (a)–(b) of paragraph .56 the practitioner may determine that an oral representation may provide evidence needed with respect to the matter addressed by the representation, for example, when the engaging party is not the responsible party.

.A71 Even when the responsible party provides oral responses to the matters in paragraph .51, the practitioner may find it appropriate to consider whether there are significant concerns about the competence, integrity, ethical values, or diligence of those providing the oral responses or whether the oral responses are otherwise not reliable and the potential effect, if any, on the practitioner's report.

.A72 Paragraph .10 provides an exception to the requirement for a written assertion when the engaging party is not the responsible party. Nonetheless, because the assertion is the representation called for by paragraph .51*a*, application of paragraph .57*a* requires the practitioner to obtain an oral assertion when a written assertion is not obtained. Paragraph .57*b* applies when the responsible party provides neither a written nor an oral assertion.

Other Information (Ref: par. .58)

.A73 Further actions that may be appropriate if the practitioner identifies a material inconsistency or becomes aware of a material misstatement of fact include, for example, the following:

- Requesting the appropriate party to consult with a qualified third party, such as the appropriate party's legal counsel
- Obtaining legal advice about the consequences of different courses of action

- If required or permissible, communicating with third parties (for example, a regulator)
- Describing the material inconsistency in the practitioner's report
- Withdrawing from the engagement, when withdrawal is possible under applicable laws and regulations.

.A74 Other information does not include information contained on the appropriate party's website. Websites are a means of distributing information and are not, themselves, documents for the purposes of paragraph .58.

Description of Criteria (Ref: par. .59)

.A75 The description of the criteria on which the subject matter or assertion is based is particularly important when there are significant differences among various criteria regarding how particular matters may be treated in the subject matter.

.A76 A description of the criteria that states that the subject matter is prepared in accordance with (or based on) particular criteria is appropriate only if the subject matter complies with all relevant requirements of those criteria that are effective.

Forming the Opinion (Ref: par. .60–.61)

.A77 The practitioner's professional judgment regarding what constitutes sufficient appropriate evidence is influenced by such factors as the following:

- The significance of a potential misstatement and the likelihood that it will have a material effect, individually or aggregated with other potential misstatements, on the subject matter or assertion
- The effectiveness of the responsible party's responses to address the known risks
- The experience gained during previous examination or review engagements with respect to similar potential misstatements
- The results of procedures performed, including whether such procedures identified specific misstatements
- The source and reliability of the available information
- The persuasiveness of the evidence
- The practitioner's understanding of the responsible party and its environment

.A78 An assertion-based examination engagement is a cumulative and iterative process. As the practitioner performs planned procedures, the evidence obtained may cause the practitioner to change the nature, timing, or extent of other planned procedures. Information that differs significantly from the information on which the risk assessments and planned procedures were based may come to the practitioner's attention. Examples of such information include the following:

- The extent of the misstatements that the practitioner detects is greater than expected. (This may alter the practitioner's professional judgment about the reliability of particular sources of information.)
- The practitioner may become aware of discrepancies in relevant information or conflicting or missing evidence.

- Procedures performed toward the end of the engagement may indicate a previously unrecognized risk of material misstatement. In such circumstances, the practitioner may need to reevaluate the planned procedures.

.A79 In making the evaluation required by paragraph .61, the practitioner may consider whether additional disclosures are necessary to describe the subject matter, assertion, or criteria. Additional disclosures may, for example, include the following:

- The measurement or evaluation methods used when the criteria allow for choice among methods
- Significant interpretations made in applying the criteria in the engagement circumstances
- Subsequent events, depending on their nature and significance
- Whether there have been any changes in the measurement or evaluation methods used

.A80 Paragraph .61 does not require the practitioner to determine whether the presentation discloses all matters related to the subject matter, assertion, or criteria or all matters intended users may consider in making decisions based on the presentation.

Preparing the Practitioner's Report (Ref: par. .62)

.A81 Oral and other forms of expressing an opinion can be misunderstood without the support of a written practitioner's report. For this reason, the practitioner may not report orally or by use of symbols (such as a web seal) under the attestation standards without also providing a written report that is readily available whenever the oral report is provided or the symbol is used. For example, a symbol could be hyperlinked to a written report on the internet.

.A82 This section does not require a standardized format for reporting on all assertion-based examination engagements. Instead, it identifies the basic elements that the practitioner's report is to include. The report is tailored to the specific engagement circumstances. The practitioner may use headings, separate paragraphs, paragraph numbers, typographical devices (for example, the bolding of text), and other mechanisms to enhance the clarity and readability of the report.

.A83 The practitioner may choose to issue a report that contains only the minimum reporting elements included in paragraphs .63–.64 of this section or may issue a report that expands on or supplements those elements. In addition to the basic elements, the report may include information or explanations that are not intended to affect the practitioner's opinion, for example, detail about the terms of the engagement, the applicable criteria being used, findings relating to particular aspects of the engagement, details of the qualifications and experience of the practitioner and others involved with the engagement, a description of the procedures the practitioner performed, and, in some cases, recommendations. The practitioner may find it helpful to consider the importance of providing such information to the information needs of the intended users. As required by paragraph .82, additional information, such as recommendations, is clearly separated from the practitioner's opinion and phrased in a manner that makes clear that it is not intended to detract from the opinion.

.A84 All of the following reporting options are available to a practitioner, except when the circumstances described in paragraph .76 exist:

<i>The practitioner's report may state that the practitioner examined</i>	<i>and</i>	<i>expresses an opinion on</i>
the subject matter		the subject matter
the responsible party's assertion		the responsible party's assertion
the responsible party's assertion		the subject matter

Content of the Practitioner's Report

Title (Ref: par. .63a)

.A85 A title indicating that the practitioner's report is the report of an independent practitioner (for example, "Independent Practitioner's Report," "Report of Independent Certified Public Accountant," or "Independent Accountant's Report") affirms that the practitioner has met all the relevant ethical requirements regarding independence and, therefore, distinguishes the independent practitioner's report from reports issued by others.

Criteria (Ref: par. .63d)

.A86 The practitioner's report may include the criteria or refer to them if they are included in the subject matter presentation, in the assertion, or are otherwise readily available. It may be relevant in the circumstances to disclose the source of the criteria or the relevant matters discussed in paragraph .A79.

Relevant Responsibilities (Ref: par. .63e–f)

.A87 Identifying relative responsibilities informs the intended users that the responsible party is responsible for the subject matter, and the practitioner's role is to independently express an opinion about it.

.A88 The practitioner may wish to expand the discussion of the responsible party's responsibility, for example, to indicate that the responsible party is responsible for the preparation and presentation of the subject matter in accordance with (or based on) the criteria, including the design, implementation, and maintenance of internal control to prevent, or detect and correct, misstatement of the subject matter, due to fraud or error.

Statement About the Subject Matter and the Criteria (Ref: par. .63g(ii)(1))

.A89 In identifying the standards under which the engagement was performed, the practitioner may specify the AT-C section under which the engagement was performed, for example, section 320, *Reporting on an Examination of Controls Relevant to User Entities' Internal Control Over Financial Reporting*, of the attestation standards established by the AICPA.

.A90 The language in paragraph .63g(ii)(1) may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .63g(ii)(1) include, "to obtain reasonable assurance about whether

- the subject matter is presented in accordance with (or based on) the criteria, in all material respects."
- the subject matter achieves the objectives, in all material respects." (For example, when the objectives are the criteria)

- the subject matter is presented fairly, in all material respects, based on the criteria." (The practitioner's professional judgment concerning the fairness of the presentation of the subject matter relates to whether the measurement, recognition, presentation, and disclosure of all material items in the presentation of the subject matter achieve fair presentation.)

Description of the Nature of an Assertion-Based Examination Engagement (Ref: par. .63h)

.A91 A description of the nature of an assertion-based examination engagement may state, for example, the following:

- An examination involves performing procedures to obtain evidence about the subject matter and that the nature, timing, and extent of the procedures selected depend on the practitioner's judgment, including an assessment of the risks of material misstatement of the subject matter, whether due to fraud or error.
- An examination also involves examining evidence about the subject matter.
- In making an assessment of the risks of material misstatement, the practitioner considered and obtained an understanding of internal control relevant to the subject matter in order to design procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of internal control. Accordingly, no such opinion is expressed.

.A92 The practitioner may decide to more fully describe the practitioner's responsibility, for example, to

- perform procedures to obtain evidence based on the practitioner's assessment of the risk of material misstatement about whether the subject matter is presented in accordance with (or based on) the criteria.
- obtain an understanding of internal control over the subject matter.

.A93 A practitioner may be requested to provide, in a separate section of the practitioner's report, a description of the procedures performed and the results thereof in support of the practitioner's opinion. The following factors are relevant when determining whether to include such a description in the report:

- Whether such a description is likely to overshadow the practitioner's overall opinion or cause report users to misunderstand the opinion.
- Whether the parties making the request have an appropriate business need or reasonable basis for requesting the information. For example, the specified parties are required to maintain and monitor controls that either encompass or are dependent on controls that are the subject of an assertion-based examination and, therefore, need information about the tests of controls to enable them to have a basis for concluding that they have met the requirements applicable to them.
- Whether the parties have an understanding of the nature and subject matter of the engagement and experience in using the information in such reports.

- Whether the practitioner's procedures performed directly relate to the subject matter of the engagement.

The addition of procedures performed and the results thereof in a separate section of an assertion-based examination report may increase the potential for the report to be misunderstood when taken out of the context of the knowledge of the requesting parties. This potential for an increase in the risk of misunderstanding may lead the practitioner to add a restricted-use paragraph to the practitioner's report.

Relevant Ethical Requirements (Ref: par. .63i)

.A94 Relevant ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive. When the AICPA Code of Professional Conduct applies, the practitioner's other ethical responsibilities relate to the "Principles of Professional Conduct" (ET sec. 0.300).

.A95 Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. When independence and other relevant ethical requirements are contained in a limited number of sources, the practitioner may choose to name the relevant sources (for example, the name of the code, rule, or applicable regulation, or *Government Auditing Standards* promulgated by the Comptroller General of the United States) or may refer to a term that appropriately describes those sources.

Inherent Limitations (Ref: par. .63j)

.A96 In some cases, identification of specific inherent limitations is required by an AT-C section. For example, section 305, *Prospective Financial Information*, requires that the practitioner's report include a statement indicating that the prospective results may not be achieved.⁴ To implement that requirement, the illustrative practitioner's assertion-based examination report on a forecast in section 305 states, "There will usually be differences between the forecasted and actual results because events and circumstances frequently do not occur as expected, and those differences may be material."⁵ When not explicitly required by an AT-C section, identification in the report of inherent limitations is based on the practitioner's judgment.

Opinion (Ref: par. .63k)

.A97 The practitioner's opinion can be worded either in terms of the subject matter and the criteria (for example, "In our opinion, the schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is in accordance with [or based on] the ABC criteria set forth in Note 1, in all material respects.") or in terms of an assertion made by the responsible party (for example, "In our opinion, management's assertion that the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with [or based on] the ABC criteria set forth in Note 1 is fairly stated, in all material respects.").

.A98 The language of the practitioner's opinion in paragraph .63k may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .63k(i) include the following:

⁴ Paragraph .31i of section 305, *Prospective Financial Information*.

⁵ Example 1 in paragraph .A43 of section 305.

- The subject matter is presented in accordance with (or based on) the criteria, in all material respects.
- The subject matter achieved the objectives, in all material respects (when the objectives are the criteria).
- The subject matter is free from material misstatement based on the criteria.
- The subject matter is presented fairly, in all material respects, based on the criteria. (The practitioner's professional judgment concerning the fairness of the presentation of the subject matter relates to whether the measurement, recognition, presentation, and disclosure of all material items in the presentation of the subject matter achieve fair presentation.)

.A99 A single practitioner's report may cover more than one aspect of a subject matter or an assertion about the subject matter. When that is the case, the report may contain separate opinions or conclusions on each aspect of the subject matter or assertion (for example, examination level related to some aspects or assertions and review level related to others, or an unmodified opinion on some aspects or assertions and a modified opinion on others).

.A100 A practitioner may report on subject matter or an assertion at multiple dates or covering multiple periods during which criteria have changed (for example, a practitioner's report on comparative information). Criteria are clearly described when they identify the criteria for each period and how the criteria have changed from one period to the next. If the criteria for the current date or period have changed from the criteria for a preceding date or period, changes in the criteria may be significant to users of the report. If so, the criteria and the fact that they have changed may be disclosed in the presentation of the subject matter, in the written assertion about the subject matter, or in the report, even if the subject matter for the preceding date or period is not presented.

Location (Ref: par. .63m)

.A101 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country.

Date (Ref: par. .63n)

.A102 Including the date of the practitioner's report informs the intended users that the practitioner has considered the effect of the events that occurred up to that date on the subject matter and the report.

.A103 Because the practitioner expresses an opinion on the subject matter or assertion and the subject matter or assertion is the responsibility of the responsible party, the practitioner is not in a position to conclude that sufficient appropriate evidence has been obtained until evidence is obtained that all the elements that the subject matter or assertion comprises, including any related notes, when applicable, have been prepared, and the responsible party has accepted responsibility for them.

Restricted-Use Paragraph (Ref: par. .10, .51, .64, and .65b–c)

.A104 A practitioner's report for which the conditions in paragraph .64 do not apply need not include an alert that restricts its use. However, nothing in

the attestation standards precludes a practitioner from including such an alert in any practitioner's report or other practitioner's written communication.

.A105 A practitioner's report that is required by paragraph .64 to include an alert that restricts the use of the report may be included in a document that also contains a practitioner's report that is for general use. In such circumstances, the use of the general use report is not affected.

.A106 A practitioner may also issue a single combined practitioner's report that includes

- a. a practitioner's report that is required by paragraph .64 to include an alert that restricts its use, and
- b. a report that is for general use.

If these two types of reports are clearly differentiated within the combined report, such as through the use of appropriate headings, the alert that restricts the use of the report may be limited to the report required by paragraph .64 to include such an alert. In such circumstances, the use of the general use report is not affected.

.A107 The written representations required by paragraph .51 include an assertion. If the engaging party is not the responsible party and the responsible party provides an oral assertion, rather than a written assertion, paragraph .64c calls for an alert that restricts the use of the practitioner's report to the engaging party.

.A108 The practitioner may identify the specified parties by naming them, referring to a list of those parties, or identifying the class of parties, for example, "all customers of XYZ Company during some or all of the period January 1, 20XX to December 31, 20XX." The method of identifying the specified parties is determined by the practitioner.

.A109 In some cases, the criteria used to measure or evaluate the subject matter may be designed for a specific purpose. For example, a regulator may require certain entities to use particular criteria designed for regulatory purposes. To avoid misunderstandings, the practitioner alerts users of the practitioner's report to this fact and, therefore, that the report is intended solely for the information and use of the specified parties.

.A110 The alert that restricts the use of the practitioner's report is designed to avoid misunderstandings related to the use of the report, particularly if the report is taken out of the context in which the report is intended to be used. A practitioner may consider informing the responsible party and, if different, the engaging party or other specified parties that the report is not intended for distribution to parties other than those specified in the report. The practitioner may, in connection with establishing the terms of the engagement, reach an understanding with the responsible party or, if different, the engaging party, that the intended use of the report will be restricted and may obtain the responsible party's agreement that the responsible party and specified parties will not distribute such report to parties other than those identified therein. A practitioner is not responsible for controlling, and cannot control, distribution of the report after its release.

.A111 In some cases, a restricted-use practitioner's report filed with regulatory agencies is required by law or regulation to be made available to the public as a matter of public record. Also, a regulatory agency, as part of its oversight responsibility for an entity, may require access to a restricted-use report in which it is not named as a specified party.

Reference to the Practitioner’s Specialist (Ref: par. .69)

.A112 The practitioner has sole responsibility for the opinion expressed, and that responsibility is not reduced by the practitioner's use of the work of a practitioner's specialist.

Modified Opinions (Ref: par. .70, .72, and .77)

.A113 The three types of modified opinions are a qualified opinion, an adverse opinion, and a disclaimer of opinion. The decision regarding which type of modified opinion is appropriate depends upon the following:

- a. The nature of the matter giving rise to the modification (that is, whether the subject matter of the engagement is in accordance with (or based on) the criteria, in all material respects or, in the case of an inability to obtain sufficient appropriate evidence, may be materially misstated)
- b. The practitioner's professional judgment about the pervasiveness of the effects or possible effects of the matter on the subject matter of the engagement

.A114 A practitioner may express an unmodified opinion only when the engagement has been conducted in accordance with the attestation standards. Such standards will not have been complied with if the practitioner has been unable to apply all the procedures that the practitioner considers necessary in the circumstances.

.A115 The term *pervasive* describes the effects on the subject matter of misstatements or the possible effects on the subject matter of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate evidence. Pervasive effects on the subject matter are those that, in the practitioner's professional judgment

- a. are not confined to specific aspects of the subject matter;
- b. if so confined, represent or could represent a substantial proportion of the subject matter; or
- c. in relation to disclosures, are fundamental to the intended users' understanding of the subject matter.

.A116 The following table illustrates how the practitioner's professional judgment about the nature of the matter giving rise to the modification and the pervasiveness of its effects or possible effects on the subject matter affects the type of practitioner's report to be issued.

<i>Nature of Matter Giving Rise to the Modification</i>	<i>Practitioner’s Professional Judgment About the Pervasiveness of the Effects or Possible Effects on the Subject Matter</i>	
	<i>Material but Not Pervasive</i>	<i>Material and Pervasive</i>
Scope limitation. An inability to obtain sufficient appropriate evidence.	Qualified opinion	Disclaimer of opinion
Subject matter is materially misstated.	Qualified opinion	Adverse opinion

.A117 A scope limitation may arise from the following:

- a. Circumstances beyond the control of the appropriate party. For example, documentation that the practitioner considers necessary to inspect may have been accidentally destroyed.
- b. Circumstances relating to the nature or timing of the practitioner's work. For example, a physical process that the practitioner considers necessary to observe may have occurred before the practitioner's engagement.
- c. Limitations imposed by the responsible party or the engaging party on the practitioner that, for example, may prevent the practitioner from performing a procedure that the practitioner considers necessary in the circumstances.

Limitations of this kind may have other implications for the engagement, such as for the practitioner's consideration of risks of material misstatement and engagement acceptance and continuance.

.A118 The inability to obtain written representations from the responsible party ordinarily would result in a scope limitation. However, when the engaging party is not the responsible party, paragraph .52 enables the practitioner to make inquiries of the responsible party and, if the responsible party's oral responses enable the practitioner to conclude that the practitioner has sufficient appropriate evidence to form an opinion about the subject matter, paragraph .57a indicates this would not cause a scope limitation. Further, paragraph .57a requires that the practitioner's report in these circumstances contain an alert paragraph that restricts the use of the report to the engaging party.

.A119 The practitioner's decision to express a qualified opinion, disclaim an opinion, or withdraw from the engagement because of a scope limitation depends on an assessment of the effect of the omitted procedures on the practitioner's ability to express an opinion. This assessment will be affected by the nature and magnitude of the potential effects of the matters in question and by their significance to the subject matter.

.A120 An inability to perform a specific procedure does not constitute a scope limitation if the practitioner is able to obtain sufficient appropriate evidence by performing alternative procedures.

Responsible Party Refuses to Provide a Written Assertion (Ref: par. .86)

.A121 The following is an example of the disclosure required by paragraph .86:

Attestation standards established by the AICPA require that we request a written statement from [identify the responsible party] stating that [identify the subject matter] that we examined has been accurately measured or evaluated. We requested that [identify the responsible party] provide such a written statement but [identify the responsible party] refused to do so.

.A122 The practitioner's report discussed in paragraph .86 is appropriate only when the engagement is to report on the subject matter; it is not appropriate for a report on an assertion. When reporting on an assertion, the practitioner is required to obtain a written assertion from the responsible party.

.A123 If the responsible party's failure to provide the practitioner with written representations causes the practitioner to conclude that a scope limitation exists and, thus, qualify or disclaim an opinion, the practitioner need

not restrict the use of the practitioner's report but is required by paragraph .71 to describe the matter that gave rise to the modified opinion. Paragraph .A104 notes, however, that the practitioner is not precluded from restricting the use of any report.

Communication Responsibilities (Ref: par. .87–.88)

.A124 Other matters that may be appropriate to communicate to the responsible party or, if different, the engaging party, include bias in the measurement, evaluation, or disclosure of the subject matter.

.A125 Disclosure of confidential information as defined in the Code of Professional Conduct requires the explicit consent of the engaging party or the responsible party, as appropriate. In circumstances in which such matters are identified, the practitioner may consider discussing with legal counsel or others prior to communicating or taking further action.

.A126 If the practitioner is performing an assertion-based examination engagement in accordance with *Government Auditing Standards*, the practitioner may be required to report on compliance with laws, regulations, and provisions of contracts or grant agreements as part of the assertion-based examination. The practitioner also may be required to communicate instances of noncompliance to appropriate oversight bodies and funding agencies.

Documentation (Ref: par. .89)

.A127 Documentation includes a record of the practitioner's reasoning on all significant findings or issues that require the exercise of professional judgment and related conclusions. The existence of difficult questions of principle or professional judgment calls for the documentation to include the relevant facts that were known by the practitioner at the time the conclusion was reached.

.A128 It is neither necessary nor practical to document every matter considered, or professional judgment made, during an engagement. Further, it is unnecessary for the practitioner to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included in the engagement file. Similarly, the practitioner need not include in the engagement file superseded drafts of working papers, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.A129 In applying professional judgment to assess the extent of documentation to be prepared and retained, the practitioner may consider what is necessary to provide an experienced practitioner, having no previous connection with the engagement, with an understanding of the work performed and the basis of the principal decisions made.

.A130 Documentation ordinarily includes a record of the following:

- Issues identified with respect to compliance with relevant ethical requirements and how they were resolved
- Conclusions on compliance with independence requirements that apply to the engagement and any relevant discussions with the firm that support these conclusions
- Conclusions reached regarding the acceptance and continuance of client relationships and attestation engagements
- The nature and scope of, and conclusions resulting from, consultations undertaken during the engagement

.A131

Exhibit — Illustrative Practitioner's Assertion-Based Examination Reports

The illustrative practitioner's assertion-based examination reports in this exhibit meet the applicable reporting requirements in paragraphs .62–.86. A practitioner may use alternative language in drafting an assertion-based examination report, provided that the language meets the applicable requirements in paragraphs .62–.86. The criteria for evaluating the subject matter in examples 1–3 and 5–6 have been determined by the practitioner to be suitable and available to all users of the practitioner's report; therefore, these practitioner's reports may be for general use. The criteria for evaluating the subject matter in example 4 are suitable but available only to specified parties; therefore, use of this practitioner's report is restricted to the specified parties who either participated in the establishment of the criteria or can be presumed to have an adequate understanding of the criteria. (See paragraph .65 for the information to be included in a separate paragraph of the report that contains an alert that restricts the use of the report and paragraph .66 for the content of that paragraph when the engagement is also performed in accordance with *Government Auditing Standards*.)

Example 1: Practitioner's Assertion-Based Examination Report on Subject Matter; Unmodified Opinion

The following is an illustrative practitioner's report for an assertion-based examination engagement in which the practitioner has examined the subject matter and is reporting on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have examined [identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]. XYZ Company's management is responsible for [identify the subject matter, for example, presenting the schedule of investment returns] in accordance with (or based on) [identify the criteria, for example, the ABC criteria set forth in Note 1]. Our responsibility is to express an opinion on [identify the subject matter, for example, the schedule of investment returns] based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether [identify the subject matter, for example, the schedule of investment returns] is in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about [identify the subject matter, for example, the schedule of investment returns]. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of [identify the subject matter, for example, the schedule of investment returns], whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, *[identify the subject matter, for example, the schedule of investment returns of XYZ Company for the year ended December 31, 20XX, or the schedule of investment returns referred to above]*, is presented in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 2: Practitioner's Assertion-Based Examination Report on an Assertion; Unmodified Opinion

The following is an illustrative practitioner's report for an assertion-based examination engagement in which the practitioner has examined the responsible party's assertion and is reporting on that assertion.

Independent Accountant's Report

[Appropriate Addressee]

We have examined management of XYZ Company's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with (or based on) the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on management's assertion based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, management's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is*

presented in accordance with (or based on) the ABC criteria set forth in Note 1]
is fairly stated, in all material respects.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 3: Practitioner's Assertion-Based Examination Report in Which the Practitioner Examines Management's Assertion and Reports Directly on the Subject Matter; Unmodified Opinion

The following is an illustrative practitioner's report for an assertion-based examination engagement in which the practitioner has examined the responsible party's assertion and is reporting directly on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have examined management of XYZ Company's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with (or based on) the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is presented in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the schedule of investment returns]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of *[identify the subject matter, for example, the schedule of investment returns]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX or the schedule of investment returns referred to above]* is presented in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 4: Practitioner's Assertion-Based Examination Report on Subject Matter; Unmodified Opinion; Use of the Practitioner's Report Is Restricted to Specified Parties

The following is an illustrative practitioner's report for an assertion-based examination engagement in which the criteria are suitable but available only to specified parties; therefore, use of the report is restricted to the specified parties who either participated in the establishment of the criteria or can be presumed to have an adequate understanding of the criteria. The practitioner has examined the subject matter and is reporting on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have examined *[identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company ... or gallons of gas sold in the United States by XYZ Company to ABC Company) during the year ended December 31, 20XX,]* to determine whether it has been calculated in accordance with (or based on) *[identify the criteria, for example, the agreement dated (date) between ABC Company and XYZ Company, as further described in Note 1]*. XYZ Company's management is responsible for *[identify the subject matter, for example, the number of widgets sold]* being calculated in accordance with *[identify the criteria, for example, the agreement dated (date) between ABC Company and XYZ Company, as further described in Note 1]*. Our responsibility is to express an opinion on *[identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company ... or gallons of gas sold in the United States by XYZ Company to ABC Company) during the year ended December 31, 20XX,]* based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether *[identify the subject matter, for example, the number of widgets sold, tons of coal mined, or gallons of gas sold]* is in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the number of widgets sold, tons of coal mined, or gallons of gas sold]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of *[identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company, or gallons of gas sold in the United States by XYZ Company to ABC Company)]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, *[identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company, or gallons of gas sold in the United States by XYZ Company to ABC Company) during the year ended December 31, 20XX,]* has been calculated in accordance with (or based on) *[identify the criteria, for example, the agreement dated (date)*

between ABC Company and XYZ Company, as further described in Note 1], in all material respects.

This report is intended solely for the information and use of *[identify the specified parties, for example, ABC Company and XYZ Company]* and is not intended to be and should not be used by anyone other than the specified parties.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 5: Practitioner's Assertion-Based Examination Report on Subject Matter; Qualified Opinion

The following is an illustrative practitioner's report for an assertion-based examination engagement in which the practitioner expresses a qualified opinion because conditions exist that, individually or in combination, result in one or more material, but not pervasive, misstatements of the subject matter based on (or, in certain engagements, deviations from, exceptions to, or instances of non-compliance with) the criteria. The practitioner has examined the subject matter and is reporting on the subject matter. Paragraph .76 states, "If the practitioner has concluded that conditions exist that, individually or in combination, result in one or more material misstatements based on the criteria, the practitioner should modify the opinion and should express a qualified or adverse opinion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement."

Independent Accountant's Report

[Appropriate Addressee]

We have examined *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]* in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*.

Our responsibility is to express an opinion on *[identify the subject matter, for example, the schedule of investment returns]* based on our examination. Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is presented in accordance with (or based on) the criteria, in all material respects.

An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the schedule of investment returns]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of *[identify the subject matter, for example, the schedule of investment returns]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our qualified opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Our examination disclosed *[describe conditions that, individually or in the aggregate, resulted in a material misstatement or deviation from the criteria]*.

In our opinion, except for the effects of the material misstatement *[or deviation from the criteria]* described in the preceding paragraph, *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, or the schedule of investment returns referred to above]*, is presented in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

[Practitioner's signature]

[Date of practitioner's report]

Example 6: Practitioner's Assertion-Based Examination Report; Practitioner Engaged to Report on Subject Matter; Disclaimer of Opinion Because of Scope Limitation

The following is an illustrative practitioner's report for an assertion-based examination engagement in which the practitioner was engaged to report on the subject matter but is disclaiming an opinion because of a scope limitation. (See paragraphs .70–.86 and the related application guidance for reporting guidance when a scope limitation exists.)

Independent Accountant's Report

[Appropriate Addressee]

We were engaged to examine *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]* in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]* (Our responsibility is to express an opinion on *[identify the subject matter, for example, the schedule of investment returns]* based on conducting the examination in accordance with attestation standards established by the AICPA.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[The first sentence of the practitioner's report has been revised to state, "We were engaged to examine" rather than "We have examined." The standards under which the practitioner conducts an examination have been identified at the end of the second sentence of the report, rather than in a separate sentence in the second paragraph of the report.]

[The report should omit statements

- *indicating what those standards require of the practitioner.*
- *indicating that the practitioner believes the evidence obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.*
- *describing the nature of an examination engagement.]*

[Include a paragraph to describe scope limitations.]

Because of the limitation on the scope of our examination discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on whether *[identify the subject matter,*

for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, or the schedule of investment returns referred to above] is in accordance with (or based on) [identify the criteria, for example, the ABC criteria set forth in Note 1], in all material respects.

AT-C Section 9205

Examination Engagements: Attestation Interpretations of Section 205

1. Reporting on Attestation Engagements Performed in Accordance With *Government Auditing Standards*¹

Alert to Readers – This interpretation has not been revised to reflect any changes necessary for the 2018 revision of *Government Auditing Standards*.

.01 Question—Chapter 5, "Standards for Attestation Engagements," of the 2011 revision of *Government Auditing Standards* (referred to herein as the Yellow Book) sets forth additional fieldwork and reporting standards for attestation engagements performed pursuant to generally accepted government auditing standards (GAGAS). Practitioners performing attestation engagements under GAGAS are also required to follow the general standards set forth in chapter 3, "General Standards," of the Yellow Book, as well as the guidance and requirements in chapter 1, "Government Auditing: Foundation and Ethical Principles," and chapter 2, "Standards for Use and Application of GAGAS." For examination attestation engagements performed pursuant to GAGAS, paragraph 5.18 of the Yellow Book prescribes additional reporting standards² that go beyond the standards of reporting set forth in section 205, *Assertion-Based Examination Engagements*, and section 210, *Review Engagements*.³ When a practitioner performs an attestation examination in accordance with GAGAS, how should the report be modified?

.02 Interpretation—The practitioner should modify the scope paragraph of the attestation report to indicate that the examination or review was "conducted in accordance with attestation standards established by the AICPA and the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States."

.03 Additionally, GAGAS requires the practitioner's attestation report to disclose any matters (often referred to as *findings*) that are set forth in paragraphs 5.20–.26 of the Yellow Book. Paragraphs 5.27–.28 of the Yellow Book set forth the presentation requirements that the practitioner should use, to the

¹ Although separate interpretations for other AT-C sections have not been issued to address attestation engagements performed in accordance with *Government Auditing Standards*, a practitioner may use this guidance to help the practitioner appropriately modify an attestation report pursuant to other AT-C sections.

² Paragraph 5.18 of the Yellow Book sets forth the additional reporting requirements: (a) reporting auditors' compliance with generally accepted government auditing standards, (b) reporting deficiencies in internal control, fraud, noncompliance with provisions of laws, regulations, contracts, and grant agreements, and abuse, (c) reporting views of responsible officials, (d) reporting confidential or sensitive information, and (e) distributing reports. [Footnote revised, January 2008, to reflect conforming changes necessary due to the issuance of the 2007 revised *Government Auditing Standards*. Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

³ Paragraphs .62–.86 of section 205, *Assertion-Based Examination Engagements*, and paragraphs .44–.62 of section 210, *Review Engagements*.

extent possible, in reporting a finding. The following illustration is a standard examination report modified to make reference to a schedule of findings when any of the matters set forth in paragraphs 5.20–.26 have been identified. This report pertains to subject matter for which suitable criteria exist and are available to all users through inclusion in a clear manner in the presentation of the subject matter. A written assertion has been obtained from the responsible party. Although the following illustrative report modifications would comply with the Yellow Book requirement, this illustration is not intended to preclude a practitioner from complying with these additional Yellow Book reporting requirements in other ways. In this illustrative report, the practitioner is reporting on the subject matter.

Independent Accountant's Report

We have examined *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*.⁴ XYZ Agency's management is responsible for presenting the *[identify the subject matter, for example, the schedule of performance measures]* in accordance with *[identify the criteria]*. Our responsibility is to express an opinion on *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*, based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA and the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]* is in accordance with *[identify the criteria]*, in all material respects. An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, *[identify the subject matter, for example, the performance measures of XYZ Agency for the year ended December 31, 20XX]*, is presented in accordance with *[identify criteria, for example, the criteria set forth in Note 1]*, in all material respects.

[When any of the matters set forth in paragraphs 5.20–.26 of the Yellow Book have been identified, the following paragraph would be added.]

⁴ If the practitioner is reporting on an assertion about the subject matter, the practitioner would identify the assertion, rather than the subject matter, for example, "management's assertion that the accompanying schedule presents the performance measures of XYZ Agency for the year ended December 31, 20XX, in conformity with the criteria in Note 1." [Footnote added, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

In accordance with *Government Auditing Standards*, we are required to report all deficiencies that are considered to be significant deficiencies or material weaknesses in internal control; fraud and noncompliance with provisions of laws or regulations that have a material effect on [identify the subject matter, for example, XYZ Agency's schedule of performance measures]; and any other instances that warrant the attention of those charged with governance; noncompliance with provisions of contracts or grant agreements, and abuse that has a material effect on the subject matter.⁵ We are also required to obtain and report the views of responsible officials concerning the findings, conclusions, and recommendations, as well as any planned corrective actions. We performed our examination to express an opinion on whether [identify the subject matter, for example, XYZ Agency's schedule of performance measures] is presented in accordance with the criteria described above and not for the purpose of expressing an opinion on the internal control over [identify the subject matter, for example, reporting of performance measures] or on compliance and other matters; accordingly, we express no such opinions. Our examination disclosed certain findings that are required to be reported under *Government Auditing Standards* and those findings, along with the views of responsible officials, are described in the attached Schedule of Findings.⁶

Cause

⁵ Note that paragraph 5.25 of the Yellow Book states that when auditors detect instances of noncompliance with provisions of contracts or grant agreements or abuse that have an effect on the subject matter or an assertion about the subject matter that is less than material but warrant the attention of those charged with governance, they should communicate those findings in writing to entity officials. When auditors detect any instances of fraud, noncompliance with provisions of laws, regulations, contracts, or grant agreements, or abuse that do not warrant the attention of those charged with governance, the auditors' determination of whether and how to communicate such instances to audited entity officials is a matter of professional judgment. [Footnote added, January 2008, to reflect conforming changes necessary due to the issuance of the 2007 revised *Government Auditing Standards*. 2. Reporting on the Design of Internal Control

.04 Question—A practitioner may be asked to report on the suitability⁸ of the design of an entity's internal control over financial reporting (internal control) for preventing, or detecting and correcting, material misstatements of the entity's financial statements on a timely basis. Such requests may be made by, for example,

- an entity applying for a government grant or contract that is required to submit a written pre-award survey by management about the suitability of the design of the entity's internal control or a portion of the entity's internal control, together with a practitioner's report thereon.
- a new casino applying for a license to operate that is required by a regulatory agency to submit a practitioner's report on whether the entity's internal control *that it plans to implement* is suitably designed to provide reasonable assurance that the control objectives specified in the regulatory agency's regulations would be achieved. (In this situation, the casino would not yet have begun operations, and audited financial statements or financial data relevant to the period covered by the engagement may not exist.)

May a practitioner report on the suitability of the design of an entity's internal control based on the risk assessment procedures the auditor performs to obtain a sufficient understanding of the entity and its environment, including its internal control, in an audit of the entity's financial statements?

.05 Interpretation—No. In a financial statement audit, the purpose of the auditor's understanding of the entity and its environment, including its internal control, is to enable the auditor to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. The understanding obtained in a financial statement audit does not provide the practitioner with a

⁸ In this interpretation, the *suitability of the design of internal control* means the same thing as the *design effectiveness of an entity's internal control*. [Footnote renumbered, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

sufficient basis to report on the suitability of the design of an entity's internal control or any portion thereof.

.06 Question—How may a practitioner report on the suitability of the design of an entity's internal control or a portion thereof?

.07 Interpretation—The practitioner may perform an examination of the suitability of the design of an entity's internal control under section 205 or apply agreed-upon procedures to that subject matter under section 215. AU-C section 940, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*, does not directly apply when a practitioner is engaged to examine the suitability of design of an entity's internal control. However, it may be useful in planning and performing such engagements. Paragraphs .33 and .A61–.A62 of AU-C section 940 discuss how the auditor evaluates the design effectiveness of controls.

.08 When the engagement involves the application of agreed-upon procedures related to the suitability of the design of an entity's internal control over compliance with specified requirements, the practitioner should follow the provisions of section 315, *Compliance Attestation*.⁹

.09 The following is an illustrative report a practitioner may issue when reporting on the suitability of the design of an entity's internal control that has been implemented. The report may be modified, as appropriate, to fit the particular circumstances.

Independent Accountant's Report

[Introductory paragraph]

We have examined the suitability of the design of W Company's internal control over financial reporting to prevent, or detect and correct, material misstatements in its financial statements on a timely basis as of December 31, 20XX.¹⁰ W Company's management is responsible for the suitability of the design of W Company's internal control over financial reporting, based on *[identify the criteria]*. Our responsibility is to express an opinion on the suitability of the design of W Company's internal control over financial reporting based on our examination.

[Scope paragraph]

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether W Company's internal control over financial reporting was suitably designed based on *[identify the criteria]*, in all material respects. An examination involves performing procedures to obtain evidence about the suitability of the design of W Company's internal control over financial reporting. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of a material weakness in the suitability of the design of W Company's internal control over financial reporting. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion. We were not engaged to examine and report on the operating effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, and, accordingly, we express no opinion on operating effectiveness.

⁹ Paragraphs .01–.05, .07–.08, and .23–.26 of section 315, *Compliance Attestation*.

¹⁰ This report assumes that the control criteria are both suitable and available to users as discussed in paragraph .27b(ii) of section 105, *Concepts Common to All Attestation Engagements*. Therefore, the use of this report is not restricted. [Footnote renumbered, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Inherent limitations paragraph]

Because of its inherent limitations, internal control over financial reporting may not prevent or detect and correct misstatements. Also, projections of any evaluation of the suitability of the design or effectiveness of W Company's internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

[Opinion paragraph]

In our opinion, W Company's internal control over financial reporting was suitably designed to prevent, or detect and correct, material misstatements in the financial statements on a timely basis as of December 31, 20XX, based on *[identify criteria]*, in all material respects.

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

.10 When reporting on the suitability of the design of an entity's internal control that has not yet been implemented, the practitioner would be unable to confirm that the controls have been implemented and should disclose that information in the practitioner's report. In those circumstances, the practitioner should modify (1) the scope paragraph of the illustrative report in paragraph .09 to inform readers that the controls identified in the report have not yet been implemented and (2) the inherent limitations paragraph to reflect the related risk. Following are modified illustrative report paragraphs for use when controls have not yet been implemented.

(New language is shown in boldface italics. Deleted language is shown in strikethrough.)

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether W Company's internal control over financial reporting was suitably designed based on *[identify the criteria]*, in all material respects. An examination involves performing procedures to obtain evidence about the suitability of the design of W Company's internal control over financial reporting. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of a material weakness in the suitability of the design of W Company's internal control over financial reporting. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion. ***Because operations had not begun as of December 31, 20XX, we could not confirm that the specified controls were implemented. Accordingly, our report solely addresses the suitability of the design of the Company's internal control and does not address whether the controls were implemented. Furthermore, because the specified controls have not yet been implemented, we were unable to test, and did not test,*** the operating effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, and, accordingly, we express no opinion on operating effectiveness.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[Inherent limitations paragraph]

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any evaluation of the suitability of the design or effectiveness of W Company's internal control over financial reporting to future periods are subject to the risk that controls **may not be implemented as intended when operations begin** or may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

.11 Question—A practitioner may be asked to sign a prescribed form developed by the party to whom the form is to be submitted regarding the design of an entity's internal control. What are the practitioner's responsibilities when requested to sign such a form if it includes language that is not consistent with the practitioner's function or responsibility or with the reporting requirements of professional standards?

.12 Interpretation—In the circumstances described in paragraph .11 of this interpretation, section 105, *Concepts Common to All Attestation Engagements*, requires the practitioner to reword the prescribed form of report or attach an appropriately worded separate report.¹¹ Section 105 indicates that some report forms can be made acceptable by inserting additional wording to include the report elements required by the applicable section.¹² However, some report forms required by law or regulation can be made acceptable only by complete revision because the prescribed language of the practitioner's report calls for statements by the practitioner that are not consistent with the practitioner's function or responsibility, for example, a report form that requests the practitioner to "certify" the subject matter. When reporting on the suitability of the design of an entity's internal control under section 205, the practitioner's report should contain all of the report elements required by section 205, which can be accomplished by either rewording the prescribed form of report or attaching an appropriately worded separate report in place of the prescribed form.¹³

.13 Question—An entity may be required to submit a practitioner's report about an entity's *ability* to establish suitably designed internal control (or its assertion thereon). May a practitioner issue such a report based on (a) the risk assessment procedures related to existing internal control that the auditor performs in an audit of an entity's financial statements or (b) the performance of an attestation engagement?

.14 Interpretation—No. Neither the risk assessment procedures the auditor performs in an audit of an entity's financial statements nor the performance of an attestation engagement provide the practitioner with a basis for issuing a report on the *ability* of an entity to establish suitably designed internal control. There are no suitable criteria for evaluating an entity's ability to establish suitably designed internal control. The requesting party may be willing to accept a report of the practitioner on a consulting service. The practitioner may include in the consulting service report

- a. a statement that the practitioner is unable to perform an attestation engagement that addresses the entity's ability to establish suitably designed internal control because there are no suitable criteria for evaluating the entity's ability to do so;
- b. a description of the nature and scope of the practitioner's services; and
- c. the practitioner's findings.

¹¹ Paragraph .20 of section 105.

¹² Paragraph .A28 of section 105.

¹³ Paragraph .63–.68 of section 205.

The practitioner may refer to the guidance in CS section 100, *Consulting Services: Definitions and Standards*.

[Issue Date: December 2008. Revised, December 2012. Revised, April 2016, effective for practitioners' reports dated on or after May 1, 2017. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

AT-C Section 205A^{*}

Examination Engagements

Source: SSAE No. 18; SSAE No. 20.

See section 9205A for interpretations of this section.

Effective for practitioners' examination reports dated on or after May 1, 2017, unless otherwise indicated.

Introduction

.01 This section contains performance and reporting requirements and application guidance for all examination engagements. The requirements and guidance in this section supplement the requirements and guidance in section 105, *Concepts Common to All Attestation Engagements*.

Effective Date

.02 This section is effective for practitioners' examination reports dated on or after May 1, 2017.

Objectives

.03 In conducting an examination engagement, the objectives of the practitioner are to

- a. obtain reasonable assurance about whether the subject matter as measured or evaluated against the criteria is free from material misstatement;
- b. express an opinion in a written report about whether
 - i. the subject matter is in accordance with (or based on) the criteria, in all material respects, or
 - ii. the responsible party's assertion is fairly stated, in all material respects; and
- c. communicate further as required by relevant AT-C sections.

Definitions

.04 For purposes of this section, the following terms have the meanings attributed as follows:

Appropriateness of evidence. The measure of the quality of evidence, that is, its relevancy and reliability in providing support for the practitioner's opinion.

Modified opinion. A qualified opinion, an adverse opinion, or a disclaimer of opinion.

Risk of material misstatement. The risk that the subject matter is not in accordance with (or based on) the criteria in all material

* This section contains an "AT-C" identifier, instead of an "AT" identifier, to avoid confusion with references to existing "AT" sections, which remain effective through April 2017.

respects or that the assertion is not fairly stated, in all material respects.

Sufficiency of evidence. The measure of the quantity of evidence. The quantity of the evidence needed is affected by the risks of material misstatement and also by the quality of such evidence.

Test of controls. A procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements in the subject matter.

Requirements

Conduct of an Examination Engagement

.05 In performing an examination engagement, the practitioner should comply with this section, section 105, and any subject-matter AT-C section that is relevant to the engagement. A subject-matter AT-C section is relevant to the engagement when it is in effect, and the circumstances addressed by the AT-C section exist. (Ref: par. .A1)

Preconditions for an Examination Engagement

.06 Section 105 indicates that a practitioner must be independent when performing an attestation engagement in accordance with the attestation standards, unless the practitioner is required by law or regulation to accept the engagement and report on the subject matter or assertion.¹ When the practitioner is not independent but is required by law or regulation to accept the engagement and report on the subject matter or assertion, the practitioner should disclaim an opinion and should specifically state that the practitioner is not independent. The practitioner is neither required to provide, nor precluded from providing, the reasons for the lack of independence; however, if the practitioner chooses to provide the reasons for the lack of independence, the practitioner should include all the reasons therefor.

Agreeing on the Terms of the Engagement

.07 The practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. (Ref: par. .A2)

.08 The agreed-upon terms of the engagement should include the following:

- a. The objective and scope of the engagement
- b. The responsibilities of the practitioner (Ref: par. .A3)
- c. A statement that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants
- d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different
- e. A statement about the inherent limitations of an examination engagement (Ref: par. .A4)

¹ Paragraph .24 of section 105, *Concepts Common to All Attestation Engagements*.

- f.* Identification of the criteria for the measurement, evaluation, or disclosure of the subject matter
- g.* An acknowledgement that the engaging party agrees to provide the practitioner with a representation letter at the conclusion of the engagement

.09 Although an engagement may recur, each engagement is considered a separate engagement. The practitioner should assess whether circumstances require revision to the terms of a preceding engagement. If the practitioner concludes that the terms of the preceding engagement need not be revised for the current engagement, the practitioner should remind the engaging party of the terms of the current engagement, and the reminder should be documented.

Requesting a Written Assertion

.10 The practitioner should request from the responsible party a written assertion about the measurement or evaluation of the subject matter against the criteria. When the engaging party is the responsible party and refuses to provide a written assertion, paragraph .82 requires the practitioner to withdraw from the engagement when withdrawal is possible under applicable law or regulation. When the engaging party is not the responsible party, and the responsible party refuses to provide a written assertion, the practitioner need not withdraw from the engagement. In that case, paragraph .84 requires the practitioner to disclose that refusal in the practitioner's report and restrict the use of the report to the engaging party. (Ref: par. .A5–.A8 and .A97)

Planning and Performing the Engagement

.11 The practitioner should establish an overall engagement strategy that sets the scope, timing, and direction of the engagement and guides the development of the engagement plan. (Ref: par. .A9–.A12)

.12 In establishing the overall engagement strategy, the practitioner should

- a.* identify the characteristics of the engagement that define its scope and ascertain the reporting objectives of the engagement in order to plan the timing of the engagement and the nature of the communications required;
- b.* consider the factors that, in the practitioner's professional judgment, are significant in directing the engagement team's efforts;
- c.* consider the results of preliminary engagement activities, such as client acceptance, and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant; and
- d.* ascertain the nature, timing, and extent of resources necessary to perform the engagement.

.13 The practitioner should develop a plan that includes a description of the following items:

- a.* The nature, timing, and extent of planned risk assessment procedures
- b.* The nature, timing, and extent of planned further procedures (see paragraph .21)
- c.* Other planned procedures that are required to be carried out so that the engagement complies with the attestation standards

Risk Assessment Procedures

.14 The practitioner should obtain an understanding of the subject matter and other engagement circumstances sufficient to (Ref: par. .A13–.A14)

- a. enable the practitioner to identify and assess the risks of material misstatement in the subject matter and
- b. provide a basis for designing and performing procedures to respond to the assessed risks and to obtain reasonable assurance to support the practitioner's opinion.

.15 In obtaining an understanding of the subject matter in accordance with paragraph .14, the practitioner should obtain an understanding of internal control over the preparation of the subject matter relevant to the engagement. This includes evaluating the design of those controls relevant to the subject matter and determining whether they have been implemented by performing procedures in addition to inquiry of the personnel responsible for the subject matter.

Materiality in Planning and Performing the Engagement

.16 When establishing the overall engagement strategy, the practitioner should consider materiality for the subject matter. (Ref: par. .A15–.A21)

.17 The practitioner should reconsider materiality for the subject matter if the practitioner becomes aware of information during the engagement that would have caused the practitioner to have initially determined a different materiality.

Identifying Risks of Material Misstatement

.18 The practitioner should identify and assess risks of material misstatement as the basis for designing and performing further procedures whose nature, timing, and extent (Ref: par. .A22–.A23)

- a. are responsive to assessed risks of material misstatement and
- b. allow the practitioner to obtain reasonable assurance about whether the subject matter is in accordance with (or based on) the criteria, in all material respects.

Responding to Assessed Risks and Obtaining Evidence

.19 To obtain reasonable assurance, the practitioner should obtain sufficient appropriate evidence to reduce attestation risk to an acceptably low level and thereby enable the practitioner to draw reasonable conclusions on which to base the practitioner's opinion.

.20 The practitioner should design and implement overall responses to address the assessed risks of material misstatement for the subject matter or assertion. (Ref: par. .A24–.A25)

Further Procedures

.21 The practitioner should design and perform further procedures whose nature, timing, and extent are based on, and responsive to, the assessed risks of material misstatement.

.22 In designing and performing further procedures in accordance with paragraph .21, the practitioner should

- a. consider the reasons for the assessment given to the risk of material misstatement, including
 - i. the likelihood of material misstatement due to the particular characteristics of the subject matter and
 - ii. whether the practitioner intends to rely on the operating effectiveness of controls in determining the nature, timing, and extent of other procedures, and
- b. obtain more persuasive evidence the higher the practitioner's assessment of risk.

.23 When designing and performing procedures, the practitioner should consider the relevance and reliability of the information to be used as evidence. If

- a. evidence obtained from one source is inconsistent with that obtained from another,
- b. the practitioner has doubts about the reliability of information to be used as evidence, or
- c. responses to inquiries of the responsible party or others are inconsistent or otherwise unsatisfactory (for example, vague or implausible),

the practitioner should determine what modifications or additions to procedures are necessary to resolve the matter and should consider the effect of the matter, if any, on other aspects of the engagement.

Tests of Controls

.24 The practitioner should design and perform tests of controls to obtain sufficient appropriate evidence about the operating effectiveness of relevant controls if

- a. the practitioner intends to rely on the operating effectiveness of controls in determining the nature, timing, and extent of other procedures;
- b. procedures other than tests of controls cannot alone provide sufficient appropriate evidence; or
- c. the subject matter is internal control.

.25 If the practitioner designed and performed tests of controls to rely on their operating effectiveness and identified deviations in those controls, the practitioner should make specific inquiries and perform other procedures as necessary to understand these matters and their potential consequences. The practitioner also should determine whether

- a. the tests of controls that have been performed provide an appropriate basis for reliance on the controls,
- b. additional tests of controls are necessary, or
- c. the potential risks of misstatement need to be addressed using other procedures.

Procedures Other Than Tests of Controls

.26 Irrespective of the assessed risks of material misstatement, the practitioner should design and perform tests of details or analytical procedures related to the subject matter, except when the subject matter is internal control.

Analytical Procedures Performed in Response to Assessed Risks

.27 When designing and performing analytical procedures in response to assessed risks, the practitioner should (Ref: par. .A26–.A27)

- a. determine the suitability of particular analytical procedures for the subject matter, taking into account the assessed risks of material misstatement and any related tests of details;
- b. evaluate the reliability of data from which the practitioner's expectation is developed, taking into account the source, comparability, nature, and relevance of information available, and controls over their preparation; and
- c. develop an expectation that is sufficiently precise to identify possible material misstatements (taking into account whether analytical procedures are to be performed alone or in combination with tests of details).

.28 If analytical procedures identify fluctuations or relationships that are inconsistent with other relevant information or that differ significantly from expected amounts or ratios, the practitioner should investigate such differences by

- a. inquiring of the responsible party and obtaining additional evidence relevant to its responses and
- b. performing other procedures as necessary in the circumstances.

Procedures Regarding Estimates

.29 Based on the assessed risks of material misstatement, the practitioner should evaluate whether

- a. the responsible party has appropriately applied the requirements of the criteria relevant to any estimated amounts and
- b. the methods for making estimates are appropriate and have been applied consistently and whether changes, if any, in reported estimates or in the method for making them from the prior period, if applicable, are appropriate in the circumstances.

.30 When responding to an assessed risk of material misstatement related to an estimate, the practitioner should undertake one or more of the following, taking into account the nature of the estimates:

- a. Determine whether events occurring up to the date of the practitioner's report provide evidence regarding the estimate.
- b. Test how the responsible party made the estimate and the data on which it is based. In doing so, the practitioner should evaluate whether the
 - i. method of measurement used is appropriate in the circumstances,
 - ii. assumptions used by the responsible party are reasonable, and
 - iii. data on which the estimate is based are sufficiently reliable for the practitioner's purposes.
- c. Test the operating effectiveness of the controls over how the responsible party made the estimate, together with other appropriate further procedures.
- d. Develop a point estimate or a range to evaluate the responsible party's estimate. For this purpose, if the practitioner

- i. uses assumptions or methods that differ from those of the responsible party, the practitioner should obtain an understanding of the responsible party's assumptions or methods sufficient to establish that the practitioner's point estimate or range takes into account relevant variables and to evaluate any significant differences from the responsible party's point estimate.
- ii. concludes that it is appropriate to use a range, the practitioner should narrow the range, based on evidence available, until all outcomes within the range are considered reasonable.

Sampling

.31 If sampling is used, the practitioner should, when designing the sample, consider the purpose of the procedure and the characteristics of the population from which the sample will be drawn. Sampling involves (Ref: par. .A28)

- a. determining a sample size sufficient to reduce sampling risk to an acceptably low level.
- b. selecting items for the sample in such a way that the practitioner can reasonably expect the sample to be representative of the relevant population and likely to provide the practitioner with a reasonable basis for conclusions about the population.
- c. treating a selected item to which the practitioner is unable to apply the designed procedures or suitable alternative procedures as a deviation from the prescribed control in the case of tests of controls or a misstatement in the case of tests of details.
- d. investigating the nature and cause of deviations or misstatements identified and evaluating their possible effect on the purpose of the procedure and on other areas of the engagement.
- e. evaluating the results of the sample, including sampling risk and projecting misstatements found in the sample to the population, and
- f. evaluating whether the use of sampling has provided an appropriate basis for conclusions about the population that has been tested.

Fraud, Laws, and Regulations

.32 The practitioner should

- a. consider whether risk assessment procedures and other procedures related to understanding the subject matter indicate risk of material misstatement due to fraud or noncompliance with laws or regulations.
- b. make inquiries of appropriate parties to determine whether they have knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter.
- c. evaluate whether there are unusual or unexpected relationships within the subject matter, or between the subject matter and other related information, that indicate risks of material misstatement due to fraud or noncompliance with laws or regulations.

- d. evaluate whether other information obtained indicates risk of material misstatement due to fraud or noncompliance with laws or regulations.

.33 The practitioner should respond appropriately to fraud or suspected fraud and noncompliance or suspected noncompliance with laws or regulations affecting the subject matter that is identified during the engagement. (Ref: par. .A29–.A30)

Revision of Risk Assessment

.34 The practitioner's assessment of the risks of material misstatement may change during the course of the engagement as additional evidence is obtained. In circumstances in which the practitioner obtains evidence from performing further procedures, or if new information is obtained, either of which is inconsistent with the evidence on which the practitioner originally based the assessment, the practitioner should revise the assessment and modify the planned procedures accordingly. (Ref: par. .A31–.A32)

Evaluating the Reliability of Information Produced by the Entity

.35 When using information produced by the entity, the practitioner should evaluate whether the information is sufficiently reliable for the practitioner's purposes, including, as necessary, the following: (Ref: par. .A33–.A34)

- a. Obtaining evidence about the accuracy and completeness of the information
- b. Evaluating whether the information is sufficiently precise and detailed for the practitioner's purposes

Using the Work of a Practitioner's Specialist

.36 When the practitioner expects to use the work of a practitioner's specialist, the practitioner should do the following:

- a. Evaluate whether the practitioner's specialist has the necessary competence, capabilities, and objectivity for the practitioner's purposes. In the case of a practitioner's external specialist, the evaluation of objectivity should include inquiry regarding interests and relationships that may create a threat to the objectivity of the practitioner's specialist. (Ref: par. .A38–.A41)
- b. Obtain a sufficient understanding of the field of expertise of a practitioner's specialist to enable the practitioner to (Ref: par. .A42)
 - i. determine the nature, scope, and objectives of that specialist's work for the practitioner's purposes and
 - ii. evaluate the adequacy of that work for the practitioner's purposes.
- c. Agree with the practitioner's specialist regarding (Ref: par. .A43)
 - i. the nature, scope, and objectives of that practitioner's specialist's work;
 - ii. the respective roles and responsibilities of the practitioner and that specialist;
 - iii. the nature, timing, and extent of communication between the practitioner and that specialist, including the form of

any report or documentation to be provided by that specialist; and

- iv. the need for the practitioner's specialist to observe confidentiality requirements.
- d. Evaluate the adequacy of the work of the practitioner's specialist for the practitioner's purposes, including
 - i. the relevance and reasonableness of the findings and conclusions of the practitioner's specialist and their consistency with other evidence;
 - ii. if the work of the practitioner's specialist involves the use of significant assumptions and methods
 - (1) obtaining an understanding of those assumptions and methods and
 - (2) evaluating the relevance and reasonableness of those assumptions and methods in the circumstances, giving consideration to the rationale and support provided by the practitioner's specialist, and in relation to the practitioner's other findings and conclusions;
 - iii. if the work of the practitioner's specialist involves the use of source data that are significant to the work of the practitioner's specialist, the relevance, completeness, and accuracy of that source data.

.37 If the practitioner determines that the work of the practitioner's specialist is not adequate for the practitioner's purposes, the practitioner should

- a. agree with the practitioner's specialist on the nature and extent of further work to be performed by the practitioner's specialist or
- b. perform additional procedures appropriate to the circumstances.

.38 The nature, timing, and extent of the procedures a practitioner performs when the practitioner expects to use the work of a practitioner's specialist will vary depending on the circumstances. In determining the nature, timing, and extent of those procedures, the practitioner should consider the following: (See section 105.²)

- a. The significance of that specialist's work in the context of the engagement (See also paragraphs .A35–.A36.)
- b. The nature of the matter to which that specialist's work relates
- c. The risks of material misstatement in the matter to which that specialist's work relates
- d. The practitioner's knowledge of, and experience with, previous work performed by that specialist
- e. Whether that specialist is subject to the practitioner's firm's quality control policies and procedures (see also paragraph .A37)

Using the Work of Internal Auditors

.39 When the practitioner expects to use the work of the internal audit function in obtaining evidence or to use internal auditors to provide direct assistance, the practitioner should determine whether the work can be used for purposes of the examination by evaluating (Ref: par. .A44–.A46)

² Paragraph .32 of section 105.

- a. the level of competence of the internal audit function or the individual internal auditors providing direct assistance;
- b. the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal audit function or for internal auditors providing direct assistance, the existence of threats to the objectivity of those internal auditors and the related safeguards applied to reduce or eliminate those threats; and
- c. when using the work of the internal audit function, the application by the internal audit function of a systematic and disciplined approach, including quality control.

.40 When using the work of the internal audit function, the practitioner should perform sufficient procedures on the body of work of the internal audit function as a whole that the practitioner plans to use to determine its adequacy for the purpose of the examination engagement, including reperforming some of the body of work of the internal audit function that the practitioner intends to use in obtaining evidence.

.41 Prior to using internal auditors to provide direct assistance, the practitioner should obtain written acknowledgment from the responsible party that internal auditors providing direct assistance to the practitioner will be allowed to follow the practitioner's instructions, and that the responsible party will not intervene in the work the internal auditor performs for the practitioner.

.42 When using internal auditors to provide direct assistance to the practitioner, the practitioner should direct, supervise, and review the work of the internal auditors.

.43 Because the practitioner has sole responsibility for the opinion expressed, the practitioner should make all significant judgments in the examination engagement, including when to use the work of the internal audit function in obtaining evidence. To prevent undue use of the internal audit function in obtaining evidence, the practitioner should plan to use less of the work of the function and perform more of the work directly:

- a. The more judgment is involved in
 - i. planning and performing relevant procedures or
 - ii. evaluating the evidence obtained
- b. the higher the assessed risk of material misstatement;
- c. the less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors; and
- d. the lower the level of competence of the internal audit function.

.44 Before the conclusion of the engagement, the practitioner should evaluate whether the use of the work of the internal audit function or the use of internal auditors to provide direct assistance results in the practitioner still being sufficiently involved in the examination given the practitioner's sole responsibility for the opinion expressed.

Evaluating the Results of Procedures

.45 The practitioner should accumulate misstatements identified during the engagement other than those that are clearly trivial. (Ref: par. .A47–.A48)

.46 The practitioner should evaluate the sufficiency and appropriateness of the evidence obtained in the context of the engagement and, if necessary,

attempt to obtain further evidence. The practitioner should consider all relevant evidence, regardless of whether it appears to corroborate or contradict the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A49–.A53)

.47 If the practitioner is unable to obtain necessary further evidence, the practitioner should consider the implications for the practitioner's opinion in paragraphs .68–.84.

Considering Subsequent Events and Subsequently Discovered Facts

.48 The practitioner should inquire whether the responsible party, and if different, the engaging party, is aware of any events subsequent to the period (or point in time) covered by the examination engagement up to the date of the practitioner's report that could have a significant effect on the subject matter or assertion and should apply other appropriate procedures to obtain evidence regarding such events. If the practitioner becomes aware, through inquiry or otherwise, of such an event, or any other event that is of such a nature and significance that its disclosure is necessary to prevent users of the report from being misled, and information about that event is not adequately disclosed by the responsible party in the subject matter or in its assertion, the practitioner should take appropriate action. (Ref: par. .A54–.A56)

.49 The practitioner has no responsibility to perform any procedures regarding the subject matter or assertion after the date of the practitioner's report. Nevertheless, the practitioner should respond appropriately to facts that become known to the practitioner after the date of the report that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. (Ref: par. .A57–.A58)

Written Representations

.50 The practitioner should request from the responsible party written representations in the form of a letter addressed to the practitioner. The representations should (Ref: par. .A59–.A62)

- a. include the responsible party's assertion about the subject matter based on the criteria. (Ref: par. .A97)
- b. state that all relevant matters are reflected in the measurement or evaluation of the subject matter or assertion.
- c. state that all known matters contradicting the subject matter or assertion and any communication from regulatory agencies or others affecting the subject matter or assertion have been disclosed to the practitioner, including communications received between the end of the period addressed in the written assertion and the date of the practitioner's report.
- d. acknowledge responsibility for
 - i. the subject matter and the assertion;
 - ii. selecting the criteria, when applicable; and
 - iii. determining that such criteria are appropriate for the responsible party's purposes.
- e. state that any known events subsequent to the period (or point in time) of the subject matter being reported on that would have a

material effect on the subject matter or assertion have been disclosed to the practitioner. (Ref: par. .A61)

- f.* state that it has provided the practitioner with all relevant information and access.
- g.* if applicable, state that the responsible party believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the subject matter. (Ref: par. .A62)
- h.* if applicable, state that significant assumptions used in making any material estimates are reasonable.
- i.* state that the responsible party has disclosed to the practitioner
 - i.* all deficiencies in internal control relevant to the engagement of which the responsible party is aware;
 - ii.* its knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter; and
 - iii.* other matters as the practitioner deems appropriate.

.51 When the engaging party is not the responsible party, and the responsible party refuses to provide the representations in paragraph .50 in writing, the practitioner should make inquiries of the responsible party about, and seek oral responses to, the matters in paragraph .50. (Ref: par. .A63)

.52 When the engaging party is not the responsible party, the practitioner should request written representations from the engaging party, in addition to those requested from the responsible party, in the form of a letter addressed to the practitioner. The representations should

- a.* acknowledge that the responsible party is responsible for the subject matter and assertion.
- b.* acknowledge the engaging party's responsibility for selecting the criteria, when applicable.
- c.* acknowledge the engaging party's responsibility for determining that such criteria are appropriate for its purposes.
- d.* state that the engaging party is not aware of any material misstatements in the subject matter or assertion.
- e.* state that the engaging party has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion. (Ref: par. .A61)
- f.* address other matters as the practitioner deems appropriate.

.53 When written representations are directly related to matters that are material to the subject matter, the practitioner should

- a.* evaluate their reasonableness and consistency with other evidence obtained, including other representations (oral or written) and
- b.* consider whether those making the representations can be expected to be well informed on the particular matters.

.54 The date of the written representations should be as of the date of the practitioner's report. The written representations should address the subject matter and periods covered by the practitioner's opinion.

Requested Written Representations Not Provided or Not Reliable

.55 When the engaging party is the responsible party, and one or more of the requested written representations are not provided, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should (Ref: par. .A64)

- a. discuss the matter with the appropriate party(ies);
- b. reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general; and
- c. if any of the matters are not resolved to the practitioner's satisfaction, take appropriate action.

.56 When the engaging party is not the responsible party

- a. if one or more of the requested representations are not provided in writing by the responsible party, but the practitioner receives satisfactory oral responses to the practitioner's inquiries performed in accordance with paragraph .51 sufficient to enable the practitioner to conclude that the practitioner has sufficient appropriate evidence to form an opinion about the subject matter, the practitioner's report should contain a separate paragraph that restricts the use of the report to the engaging party. (Paragraphs .65–.66 contain requirements for the contents of such a paragraph.) (Ref: par. .A63 and .A65)
- b. if one or more of the requested representations are provided neither in writing nor orally from the responsible party in accordance with paragraph .51, a scope limitation exists, and the practitioner should determine the effect on the report, or the practitioner should withdraw from the engagement. (Ref: par. .A66)

Other Information

.57 If prior to or after the release of the practitioner's report on subject matter or an assertion, the practitioner is willing to permit the inclusion of the report in a document that contains the subject matter or assertion and other information, the practitioner should read the other information to identify material inconsistencies, if any, with the subject matter, assertion, or the report. If upon reading the other information, in the practitioner's professional judgment (Ref: par. .A67–.A68)

- a. a material inconsistency between that other information and the subject matter, assertion, or the report exists or
- b. a material misstatement of fact exists in the other information, the subject matter, assertion, or the report

the practitioner should discuss the matter with the responsible party and take further action as appropriate.

Description of Criteria

.58 The practitioner should evaluate whether the written description of the subject matter or assertion adequately refers to or describes the criteria. (Ref: par. .A69–.A70)

Forming the Opinion

.59 The practitioner should form an opinion about whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or the assertion is fairly stated, in all material respects. In forming that opinion, the practitioner should evaluate

- a. the practitioner's conclusion regarding the sufficiency and appropriateness of evidence obtained and (Ref: par. .A71)
- b. whether uncorrected misstatements are material, individually or in the aggregate. (Ref: par. .A72)

.60 The practitioner should evaluate, based on the evidence obtained, whether the presentation of the subject matter or assertion is misleading within the context of the engagement. (Ref: par. .A73–.A74)

Preparing the Practitioner's Report

.61 The practitioner's report should be in writing. (Ref: par. .A75–.A76)

.62 A practitioner should report on a written assertion or should report directly on the subject matter. If the practitioner is reporting on the assertion, the assertion should be bound with or accompany the practitioner's report, or the assertion should be clearly stated in the report. (Ref: par. .A77)

Content of the Practitioner's Report

.63 The practitioner's report should include the following, unless the practitioner is disclaiming an opinion, in which case, items .63f, and .63g should be omitted:

- a. A title that includes the word *independent*. (Ref: par. .A78)
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. An identification or description of the subject matter or assertion being reported on, including the point in time or period of time to which the measurement or evaluation of the subject matter or assertion relates.
- d. An identification of the criteria against which the subject matter was measured or evaluated. (Ref: par. .A79)
- e. A statement that identifies (Ref: par. .A80–.A81)
 - i. the responsible party and its responsibility for the subject matter in accordance with (or based on) the criteria or for its assertion, and
 - ii. the practitioner's responsibility to express an opinion on the subject matter or assertion, based on the practitioner's examination.
- f. A statement that
 - i. the practitioner's examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants.
 - ii. those standards require that the practitioner plan and perform the examination to obtain reasonable assurance about whether

- (1) the subject matter is in accordance with (or based on) the criteria, in all material respects (or equivalent language regarding the subject matter and criteria, such as the language used in the examples in paragraph .A82) or
 - (2) the responsible party's assertion is fairly stated, in all material respects.
- iii. the practitioner believes the evidence the practitioner obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.
- g. A description of the nature of an examination engagement. (Ref: par. .A83–.A85)
- h. A statement that describes significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A86)
- i. The practitioner's opinion about whether (Ref: par. .A87–.A90)
 - i. the subject matter is in accordance with (or based on) the criteria, in all material respects or
 - ii. the responsible party's assertion is fairly stated, in all material respects.
- j. The manual or printed signature of the practitioner's firm.
- k. The city and state where the practitioner practices. (Ref: par. .A91)
- l. The date of the report. (The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate evidence on which to base the practitioner's opinion, including evidence that
 - i. the attestation documentation has been reviewed,
 - ii. if applicable, the written presentation of the subject matter has been prepared, and
 - iii. the responsible party has provided a written assertion or, in the circumstances described in paragraph .A66, an oral assertion.)

Restricted Use Paragraph

.64 In the following circumstances, the practitioner's report should include an alert, in a separate paragraph, that restricts the use of the report: (Ref: par. .A94–.A97)

- a. The practitioner determines that the criteria used to evaluate the subject matter are appropriate only for a limited number of parties who either participated in their establishment or can be presumed to have an adequate understanding of the criteria.
- b. The criteria used to evaluate the subject matter are available only to specified parties.
- c. The engaging party is not the responsible party, and the responsible party does not provide the written representations required by paragraph .50, but does provide oral responses to the practitioner's inquiries about the matters in paragraph .50, as provided for in paragraph .51 and .56a. In this case, the use of the practitioner's report should be restricted to the engaging party. (Ref: par. .A97)

.65 The alert should

- a. state that the practitioner's report is intended solely for the information and use of the specified parties,
- b. identify the specified parties for whom use is intended, and (Ref: par. .A98)
- c. state that the report is not intended to be, and should not be, used by anyone other than the specified parties. (Ref: par. .A99–.A101)

.66 When the engagement is also performed in accordance with *Government Auditing Standards*, the alert that restricts the use of the practitioner's report should include the following information, rather than the information required by paragraph .65:

- a. A description of the purpose of the report
- b. A statement that the report is not suitable for any other purpose

Reference to the Practitioner's Specialist

.67 The practitioner should not refer to the work of a practitioner's specialist in the practitioner's report containing an unmodified opinion. (Ref: par. .A102)

Modified Opinions

.68 The practitioner should modify the opinion when either of the following circumstances exist and, in the practitioner's professional judgment, the effect of the matter is or may be material: (Ref: par. .A103–.A104)

- a. The practitioner is unable to obtain sufficient appropriate evidence to conclude that the subject matter is in accordance with (or based on) the criteria, in all material respects.
- b. The practitioner concludes, based on evidence obtained, that the subject matter is not in accordance with (or based on) the criteria, in all material respects.

.69 When the practitioner modifies the opinion, the practitioner should include a separate paragraph in the practitioner's report that provides a description of the matter(s) giving rise to the modification.

.70 The practitioner should express a qualified opinion when (Ref: par. .A105–.A109)

- a. the practitioner, having obtained sufficient appropriate evidence, concludes that misstatements, individually or in the aggregate, are material, but not pervasive to the subject matter or
- b. the practitioner is unable to obtain sufficient appropriate evidence on which to base the opinion, but the practitioner concludes that the possible effects on the subject matter of undetected misstatements, if any, could be material, but not pervasive.

.71 When the practitioner expresses a qualified opinion due to a material misstatement of the subject matter, the practitioner should state that, in the practitioner's opinion, except for the effects of the matter(s) giving rise to the modification, the subject matter is presented in accordance with (or based on) the criteria, in all material respects. When the modification arises from an inability to obtain sufficient appropriate evidence, the practitioner should use the corresponding phrase "except for the possible effects of the matter(s) ..." for the modified opinion.

.72 The practitioner should express an adverse opinion when the practitioner, having obtained sufficient appropriate evidence, concludes that misstatements, individually or in the aggregate, are both material and pervasive to the subject matter.

.73 When the practitioner expresses an adverse opinion, the practitioner should state that, in the practitioner's opinion, because of the significance of the matter(s) giving rise to the modification, the subject matter is not presented in accordance with (or based on) the criteria, in all material respects.

.74 The practitioner should disclaim an opinion when the practitioner is unable to obtain sufficient appropriate evidence on which to base the opinion, and the practitioner concludes that the possible effects on the subject matter of undetected misstatements, if any, could be both material and pervasive. (Ref: par. .A110)

.75 When the practitioner disclaims an opinion due to an inability to obtain sufficient appropriate evidence, the practitioner's report should state that

- a. because of the significance of the matter(s) giving rise to the modification, the practitioner has not been able to obtain sufficient appropriate evidence to provide a basis for an examination opinion and
- b. accordingly, the practitioner does not express an opinion on the subject matter.

Description of the Practitioner's Responsibility When the Practitioner Expresses a Qualified or an Adverse Opinion

.76 When the practitioner expresses a qualified or an adverse opinion, the practitioner should amend the description of the practitioner's responsibility to state that the practitioner believes that the evidence the practitioner has obtained is sufficient and appropriate to provide a basis for the practitioner's modified opinion.

Description of the Practitioner's Responsibility When the Practitioner Disclaims an Opinion

.77 When the practitioner disclaims an opinion due to an inability to obtain sufficient appropriate evidence, the practitioner should amend the practitioner's report to state that the practitioner was engaged to examine the subject matter (or assertion). The practitioner should also amend the description of the practitioner's responsibility and the description of an examination to state only the following:

Our responsibility is to express an opinion on the subject matter (or assertion) based on conducting the examination in accordance with attestation standards established by the American Institute of Certified Public Accountants. Because of the limitation on the scope of our examination discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on whether the subject matter is in accordance with (or based on) the criteria, in all material respects.

.78 If the practitioner expresses a modified opinion because of a scope limitation but is also aware of a matter(s) that causes the subject matter to be materially misstated, the practitioner should include in the practitioner's report a clear description of both the scope limitation and the matter(s) that causes the subject matter to be materially misstated.

.79 If the practitioner has concluded that conditions exist that, individually or in combination, result in one or more material misstatements based on

the criteria, the practitioner should modify the opinion and express a qualified or adverse opinion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement.

.80 The practitioner's opinion on the subject matter or assertion should be clearly separated from any paragraphs emphasizing matters related to the subject matter or any other reporting responsibilities.

.81 When the opinion is modified, reference to an external specialist is permitted when such reference is relevant to an understanding of the modification to the practitioner's opinion. The practitioner should indicate in the practitioner's report that such reference does not reduce the practitioner's responsibility for that opinion.

Responsible Party Refuses to Provide a Written Assertion

.82 If the engaging party is the responsible party and refuses to provide the practitioner with a written assertion as required by paragraph .10, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation.

.83 If law or regulation does not allow the practitioner to withdraw from the engagement, the practitioner should disclaim an opinion.

.84 When the engaging party is not the responsible party and the responsible party refuses to provide the practitioner with a written assertion, the practitioner may report on the subject matter but should disclose in the practitioner's report the responsible party's refusal to provide a written assertion and should restrict the use of the practitioner's report to the engaging party. (Ref: par. .A111–.A113)

Communication Responsibilities

.85 The practitioner should communicate to the responsible party known and suspected fraud and noncompliance with laws or regulations, uncorrected misstatements, and, when relevant to the subject matter, internal control deficiencies identified during the engagement. When the engaging party is not the responsible party, the practitioner should also communicate this information to the engaging party. (Ref: par. .A114)

.86 If the practitioner has identified or suspects noncompliance with laws or regulations that are not relevant to the subject matter, the practitioner should determine whether the practitioner has a responsibility to report the identified or suspected noncompliance to parties other than the responsible party and the engaging party (if different). (Ref: par. .A115–.A116)

Documentation

.87 The practitioner should prepare engagement documentation that is sufficient to determine (Ref: par. .A117–.A120)

- a. the nature, timing, and extent of the procedures performed to comply with relevant AT-C sections and applicable legal and regulatory requirements, including
 - i. the identifying characteristics of the specific items or matters tested;
 - ii. who performed the engagement work and the date such work was completed;

- iii. the discussions with the responsible party or others about findings or issues that, in the practitioner's professional judgment, are significant, including the nature of the significant findings or issues discussed, and when and with whom the discussions took place;
 - iv. when the engaging party is the responsible party and the responsible party will not provide one or more of the requested written representations or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations; or that the written representations are otherwise not reliable, the matters in paragraph .55;
 - v. when the engaging party is not the responsible party and the responsible party will not provide the written representations regarding the matters in paragraph .50, the oral responses from the responsible party to the practitioner's inquiries regarding the matters in paragraph .50, in accordance with paragraph .51; and
 - vi. who reviewed the engagement work performed and the date and extent of such review.
- b. the results of the procedures performed and the evidence obtained.

.88 If the practitioner identified information that is inconsistent with the practitioner's final conclusion regarding a significant finding or issue, the practitioner should document how the practitioner addressed the inconsistency.

.89 If, in circumstances such as those described in paragraph .49, the practitioner performs new or additional procedures or draws new conclusions after the date of the practitioner's report, the practitioner should document

- a. the circumstances encountered;
- b. the new or additional procedures performed, evidence obtained, and conclusions reached and their effect on the report; and
- c. when and by whom the resulting changes to the documentation were made and reviewed.

Application and Other Explanatory Material

Conduct of an Examination Engagement

(Ref: par. .05)

.A1 For example, if a practitioner were examining prospective financial information, section 105, this section, and section 305, *Prospective Financial Information*, would be relevant.

Agreeing on the Terms of the Engagement

(Ref: par. .07, .08b, and .08e)

.A2 It is in the interests of both the engaging party and the practitioner to document the agreed-upon terms of the engagement before the commencement of the engagement to help avoid misunderstandings. The form and content of the engagement letter or other suitable form of written agreement will vary with the engagement circumstances.

.A3 A practitioner may further describe the responsibilities of the practitioner by adding the following items to the engagement letter or other suitable form of written agreement:

- a. A statement that an examination is designed to obtain reasonable assurance about whether the subject matter as measured or evaluated against the criteria is free from material misstatement
- b. A statement that the objective of an examination is the expression of an opinion in a written practitioner's report about whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or whether the responsible party's assertion is fairly stated, in all material respects

.A4 If relevant, a statement about the inherent limitations of an examination engagement may indicate that "because of the inherent limitations of an examination engagement, together with the inherent limitations of internal control, an unavoidable risk exists that some material misstatements may not be detected, even though the examination is properly planned and performed in accordance with the attestation standards."

Requesting a Written Assertion (Ref: par. .10)

.A5 The language of the responsible party's written assertion in paragraph .10 may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .10 include the following:

- The entity maintained effective internal control over the subject matter based on the criteria.
- The subject matter is presented in accordance with (or based on) the criteria.
- The subject matter achieved the objectives, for example, when the objectives are the criteria.
- The subject matter is presented fairly, based on the criteria.

.A6 Situations may arise in which the current responsible party was not present during some or all of the period covered by the practitioner's report. Such persons may contend that they are not in a position to provide a written assertion that covers the entire period because they were not in place during some or all of the period. This fact, however, does not diminish such persons' responsibilities for the subject matter as a whole. Accordingly, the requirement for the practitioner to request a written assertion from the responsible party that covers the entire relevant period(s) still applies.

.A7 Paragraph .50a requires the practitioner to request a written representation from the responsible party that is the same as the responsible party's assertion. If the responsible party provides the practitioner with the written representation in paragraph .50a, the practitioner need not request a separate written assertion unless a separate written assertion is called for by the engagement circumstances.

.A8 A practitioner may also be engaged to assist the responsible party in measuring or evaluating the subject matter against the criteria in connection with the responsible party providing a written assertion. Regardless of the procedures performed by the practitioner, the responsible party is required to

accept responsibility for its assertion and the subject matter and may not base its assertion solely on the practitioner's procedures.³

Planning and Performing the Engagement (Ref: par. .11)

.A9 Planning involves the engagement partner and other key members of the engagement team and may involve the practitioner's specialists in developing

- an overall strategy for the scope, timing, and conduct of the engagement and
- an engagement plan, consisting of a detailed approach for the nature, timing, and extent of procedures to be performed.

Adequate planning helps the practitioner to devote appropriate attention to important areas of the engagement, identify potential problems on a timely basis, and properly organize and manage the engagement in order for it to be performed in an effective and efficient manner. Adequate planning also assists the practitioner in properly assigning work to engagement team members and facilitates the direction, supervision, and review of their work. Further, it assists, when applicable, the coordination of work performed by other practitioners and practitioner's specialists. The nature and extent of planning activities will vary with the engagement circumstances, for example, the complexity of the assessment or evaluation of the subject matter and the practitioner's previous experience with it. Examples of relevant matters that may be considered include the following:

- The characteristics of the engagement that define its scope, including the terms of the engagement, the characteristics of the underlying subject matter, and the criteria
- The expected timing and the nature of the communications required
- The results of preliminary engagement activities, such as client acceptance, and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the appropriate party(ies) is relevant
- The engagement process, including possible sources of evidence, and choices among alternative measurement or evaluation methods
- The practitioner's understanding of the appropriate party(ies) and its (their) environment, including the risks that the subject matter may be materially misstated
- Identification of intended users and their information needs and consideration of materiality and the components of attestation risk
- The risk of fraud relevant to the engagement
- The effect on the engagement of using the internal audit function

.A10 The practitioner may decide to discuss elements of planning with the appropriate party(ies) to facilitate the conduct and management of the engagement (for example, to coordinate some of the planned procedures with the work

³ The "Nonattest Services" subtopic (ET sec. 1.295) of the AICPA Code of Professional Conduct addresses the practitioner's provision of nonattest services for an attest client.

of the responsible party's personnel). Although these discussions often occur, the overall engagement strategy and the engagement plan remain the practitioner's responsibility. When discussing matters included in the overall engagement strategy or engagement plan, care is needed to avoid compromising the effectiveness of the engagement. For example, discussing the nature and timing of detailed procedures with the responsible party may compromise the effectiveness of the engagement by making the procedures too predictable.

.A11 Planning is not a discrete phase but, rather, a cumulative and iterative process throughout the engagement. As a result of unexpected events, changes in conditions, or evidence obtained, the practitioner may need to revise the overall strategy and engagement plan and, thereby, the resulting nature, timing, and extent of planned procedures.

.A12 In smaller or less complex engagements, the entire engagement may be conducted by a very small engagement team, possibly involving the engagement partner (who may be a sole practitioner) working without any other engagement team members. With a smaller team, coordination of, and communication among, team members is easier. In such cases, establishing the overall engagement strategy need not be a complex or time-consuming exercise; it varies according to the size of the entity, complexity of the engagement, and size of the engagement team.

Risk Assessment Procedures (Ref: par. .14)

.A13 Obtaining an understanding of the subject matter and other engagement circumstances provides the practitioner with a frame of reference for exercising professional judgment throughout the engagement, for example, when

- considering the characteristics of the subject matter;
- assessing the suitability of criteria;
- considering the factors that, in the practitioner's professional judgment, are significant in directing the engagement team's efforts, including situations in which special consideration may be necessary (for example, when there is a need for specialized skills or the work of a specialist);
- establishing and evaluating the continued appropriateness of quantitative materiality levels (when appropriate) and considering qualitative materiality factors;
- developing expectations when performing analytical procedures;
- designing and performing procedures;
- evaluating evidence, including the reasonableness of the written representations received by the practitioner.

.A14 In assessing inherent risk, the practitioner may consider factors relevant to examination engagements, such as the following:

- The complexity of the subject matter or assertion
- The length of time during which the entity has had experience with the subject matter or assertion
- Prior experience with the entity's assessment of the subject matter or assertion

Materiality in Planning and Performing the Engagement (Ref: par. .16)

.A15 Materiality is considered in the context of qualitative factors and, when applicable, quantitative factors. The relative importance of qualitative factors and quantitative factors when considering materiality in a particular engagement is a matter for the practitioner's professional judgment.

.A16 Professional judgments about materiality are made in light of surrounding circumstances, but they are not affected by the level of assurance, that is, for the same intended users, materiality for an examination engagement is the same as it is for a review engagement because materiality is based on the information needs of intended users and not the level of assurance.

.A17 In general, misstatements, including omissions, are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by intended users based on the subject matter. The practitioner's consideration of materiality is a matter of professional judgment and is affected by the practitioner's perception of the common information needs of intended users as a group. For purposes of determining materiality, the practitioner may assume that intended users

- a. have a reasonable knowledge of the subject matter and a willingness to study the subject matter with reasonable diligence.
- b. understand that the subject matter is measured or evaluated and examined to appropriate levels of materiality and have an understanding of any materiality concepts included in the criteria.
- c. understand any inherent uncertainties involved in measuring or evaluating the subject matter.
- d. make reasonable judgments based on the subject matter.

Unless the engagement has been designed to meet the particular information needs of specific users, the possible effect of misstatements on specific users, whose information needs may vary widely, is not ordinarily considered. [As amended, effective for practitioners' examination reports dated on or after December 15, 2020, by SSAE No. 20.]

.A18 Qualitative factors may include the following:

- The interaction between, and relative importance of, various aspects of the subject matter, such as numerous performance indicators
- The wording chosen with respect to subject matter that is expressed in narrative form, for example, the wording chosen does not omit or distort the information
- The characteristics of the presentation adopted for the subject matter when the criteria allow for variations in that presentation
- The nature of a misstatement, for example, the nature of observed deviations in the operation of a control when the responsible party asserts that the control is effective
- Whether a misstatement affects compliance with laws or regulations
- In the case of periodic reporting on a subject matter, whether the effect of an adjustment affects past or current information about the subject matter or is likely to affect future information about the subject matter

- Whether a misstatement is the result of an intentional act or is unintentional
- Whether a misstatement is significant with regard to the practitioner's understanding of known previous communications to users, for example, in relation to the expected outcome of the measurement or evaluation of the subject matter
- Whether a misstatement relates to the relationship between the responsible party, and if different, the engaging party or its relationship with other parties

.A19 Quantitative factors relate to the magnitude of misstatements relative to reported amounts for those aspects of the subject matter, if any, that are

- expressed numerically or
- otherwise related to numerical values, for example, the number of observed deviations in the operation of a control when the examination involves the effectiveness of the control.

.A20 When quantitative factors are applicable, planning the engagement solely to detect individually material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the subject matter to be materially misstated. Applying materiality to elements of the subject matter ordinarily is not a simple mechanical calculation but involves the exercise of professional judgment. It is affected by the practitioner's understanding of the subject matter and the responsible party, updated during the performance of the risk assessment procedures, and consideration of the nature and extent of misstatements identified in previous attestation engagements.

.A21 The criteria may discuss the concept of materiality in the context of the preparation and presentation of the subject matter and thereby provide a frame of reference for the practitioner in considering materiality for the engagement. Although criteria may discuss materiality in different terms, the concept of materiality generally includes the matters discussed in paragraphs .A15–.A20. If the criteria do not include a discussion of the concept of materiality, these paragraphs provide the practitioner with a frame of reference.

Identifying Risks of Material Misstatement (Ref: par. .18)

.A22 Most of the practitioner's work in forming an opinion consists of obtaining and evaluating evidence. Procedures to obtain evidence can include inspection, observation, confirmation, recalculation, reperformance, and analytical procedures, often in some combination, in addition to inquiry.

.A23 In some cases, a subject-matter-specific section may include requirements that affect the nature, timing, and extent of procedures. For example, a subject-matter-specific section may describe the nature or extent of particular procedures to be performed in a particular type of engagement. Even in such cases, determining the exact nature, timing, and extent of procedures is a matter of professional judgment and will vary from one engagement to the next.

Responding to Assessed Risks and Obtaining Evidence (Ref: par. .20)

.A24 Overall responses to address the assessed risks of material misstatement of the subject matter or assertion may include

- emphasizing to the engagement team the need to maintain professional skepticism;
- assigning more experienced staff or those with specialized skills or using specialists;
- providing more supervision;
- incorporating additional elements of unpredictability in the selection of further procedures to be performed; and
- making changes to the nature, timing, or extent of procedures (for example, performing procedures at period-end instead of at an interim date or modifying the nature of procedures to obtain more persuasive evidence).

.A25 The assessment of the risks of material misstatement of the subject matter or assertion is affected by the practitioner's understanding of the control environment. An effective control environment may allow the practitioner to have more confidence in internal control and the reliability of evidence generated internally within the entity and, thus, for example, may allow the practitioner to conduct some procedures at an interim date, rather than at the period-end. Deficiencies in the control environment, however, have the opposite effect, for example, the practitioner may respond to an ineffective control environment by

- conducting more procedures as of the period-end, rather than at an interim date,
- obtaining more extensive evidence from procedures other than tests of controls, and
- increasing the number of locations to be included in the examination scope.

Further Procedures

Analytical Procedures Performed in Response to Assessed Risks (Ref: par. .27)

.A26 An understanding of the purposes of analytical procedures and the limitations of those procedures is important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires professional judgment by the practitioner.

.A27 Analytical procedures involve comparisons of expectations developed by the practitioner to recorded amounts or ratios developed from recorded amounts. The practitioner develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the practitioner's understanding of the subject matter; the practices used by the responsible party to measure, recognize, and record the subject matter; and, if applicable, the industry in which the entity operates.

Sampling (Ref: par. .31)

.A28 The AICPA Audit Guide *Audit Sampling* provides guidance that may be useful to a practitioner who has decided to use sampling in performing attestation procedures.

Fraud, Laws, and Regulations (Ref: par. .33)

.A29 In responding to fraud or suspected fraud identified during the engagement, it may be appropriate, unless prohibited by law, regulation, or ethics standards, for the practitioner to, for example,

- discuss the matter with the appropriate party(ies).
- request that the responsible party consult with an appropriately qualified third party, such as the entity's legal counsel or a regulator.
- consider the implications of the matter in relation to other aspects of the engagement, including the practitioner's risk assessment and the reliability of written representations from the responsible party.
- obtain legal advice about the consequences of different courses of action.
- communicate with third parties (for example, a regulator).
- withdraw from the engagement.

.A30 The actions noted in paragraph .A29 also may be appropriate in responding to noncompliance or suspected noncompliance with laws or regulations identified during the engagement. It may be appropriate to describe the matter in a separate paragraph in the practitioner's report, unless the practitioner

- a. is precluded by the responsible party from obtaining sufficient appropriate evidence to evaluate whether noncompliance that may be material to the subject matter has, or is likely to have, occurred, in which case, paragraphs .68a and .77 apply, or
- b. concludes that the noncompliance results in a material misstatement of the subject matter, in which case, paragraph .68b applies.

Revision of Risk Assessment (Ref: par. .34)

.A31 Information may come to the practitioner's attention that differs significantly from that on which the determination of planned procedures was based. As the practitioner performs planned procedures, the evidence obtained may cause the practitioner to perform additional procedures. Such procedures may include asking the responsible party to examine the matter identified by the practitioner and to make adjustments to the subject matter if appropriate.

.A32 The practitioner may become aware of a matter(s) that causes the practitioner to believe the subject matter may be materially misstated, for example, when performing analytical procedures the practitioner identifies a fluctuation or relationship that is inconsistent with other relevant information or that differs significantly from expectations.

Evaluating the Reliability of Information Produced by the Entity (Ref: par. .35)

.A33 Reliable information is sufficiently accurate and complete.

.A34 Obtaining evidence about the accuracy and completeness of information produced by the entity may be accomplished concurrently with the actual procedure applied to the information when obtaining such evidence is an integral part of the procedure itself. In other situations, the practitioner may have

obtained evidence of the accuracy and completeness of such information by testing controls over the preparation and maintenance of the information. In some situations, however, the practitioner may determine that additional procedures are needed.

Using the Work of a Practitioner's Specialist

Integrating the Work of a Practitioner's Specialist (Ref: par. .38a)

.A35 Examination engagements may be performed on a wide range of subject matters that require specialized skills and knowledge beyond those possessed by the practitioner and for which the work of a practitioner's specialist is used. In some situations, the practitioner's specialist will be consulted to provide advice on an individual matter, but the greater the significance of the work of the practitioner's specialist in the context of the engagement, the more likely it is that the specialist will work as part of a multidisciplinary team comprising subject-matter specialists and other attestation personnel. The more that specialist's work is integrated in nature, timing, and extent with the overall work effort, the more important effective two-way communication is between the practitioner's specialist and other attestation personnel. Effective two-way communication facilitates the proper integration of the specialist's work with the work of others on the engagement.

.A36 When the work of a practitioner's specialist is to be used, it may be appropriate to perform some of the procedures required by paragraph .36 at the engagement acceptance or continuance stage. This is particularly so when the work of the practitioner's specialist is to be used in the early stages of the engagement, for example, during initial planning and risk assessment.

The Practitioner's Firm's Quality Control Policies and Procedures (Ref: par. .38e)

.A37 Engagement teams are entitled to rely on their own firm's system of quality control, unless information provided by the firm or other parties suggests otherwise. The extent of that reliance will vary with the circumstances and may affect the nature, timing, and extent of the practitioner's procedures with respect to matters, such as the following:

- Competence and capabilities, through recruitment and training programs
- The practitioner's evaluation of the objectivity of the practitioner's internal specialist (The practitioner's internal specialists are subject to relevant ethical requirements, including those pertaining to independence.)
- The practitioner's evaluation of the adequacy of the practitioner's internal specialist's work (For example, the firm's training programs may provide the practitioner's internal specialists with an appropriate understanding of the interrelationship of their expertise with the evidence-gathering process. Reliance on such training and other firm processes, such as protocols for scoping the work of the practitioner's internal specialists, may affect the nature, timing, and extent of the practitioner's procedures to evaluate the adequacy of the practitioner's specialist's work.)
- Adherence to regulatory and legal requirements through monitoring processes
- Agreement with the practitioner's specialist

Such reliance does not reduce the practitioner's responsibility to meet the requirements of this section.

The Competence, Capabilities, and Objectivity of a Practitioner's Specialist
(Ref: par. .36a)

.A38 Information regarding the competence, capabilities, and objectivity of a practitioner's specialist may come from a variety of sources, such as the following:

- Personal experience with previous work of that specialist
- Discussions with that specialist
- Discussions with other practitioners or others who are familiar with that specialist's work
- Knowledge of that specialist's qualifications, membership of a professional body or industry association, license to practice, or other forms of external recognition
- Published papers or books written by that specialist
- The firm's quality control policies and procedures

.A39 Although a practitioner's specialist does not require the same proficiency as the practitioner in performing all aspects of an examination engagement, a practitioner's specialist whose work is used may need a sufficient understanding of relevant AT-C sections to enable that specialist to relate the work assigned to that specialist to the engagement objective.

.A40 The evaluation of the significance of threats to objectivity and of whether there is a need for safeguards may depend upon the role of the practitioner's specialist and the significance of the specialist's work in the context of the engagement. There may be some circumstances in which safeguards cannot reduce threats to an acceptable level, for example, if in an examination engagement a practitioner's specialist is an individual who has played a significant role in measuring, evaluating, or disclosing the subject matter.

.A41 When evaluating the objectivity of a practitioner's external specialist, it may be relevant to

- inquire of the appropriate party(ies) about any known interests or relationships that the appropriate party(ies) has with the practitioner's external specialist that may affect that specialist's objectivity.
- discuss with that specialist any applicable safeguards, including any professional requirements that apply to that specialist, and evaluate whether the safeguards are adequate to reduce threats to an acceptable level. Interests and relationships that may be relevant to discuss with the practitioner's specialist include
 - financial interests.
 - business and personal relationships.
 - provision of other services by the specialist, including by the organization in the case of an external specialist that is an organization.

In some cases, it may also be appropriate for the practitioner to obtain a written representation from the practitioner's external specialist about any interests or relationships with the appropriate party(ies) of which that specialist is aware.

Obtaining an Understanding of the Field of Expertise of a Practitioner's Specialist (Ref: par. .36b)

.A42 Aspects of a practitioner's specialist's field of expertise relevant to the practitioner's understanding may include the following:

- Whether that specialist's field has areas of specialty within it that are relevant to the engagement
- Whether any professional or other standards and regulatory or legal requirements apply
- What assumptions and methods, including models, when applicable, are used by the practitioner's specialist and whether they are generally accepted within that specialist's field and appropriate in the circumstances of the engagement
- The nature of internal and external data or information the practitioner's specialist uses

Agreement With a Practitioner's Specialist (Ref: par. .36c)

.A43 The matters noted in paragraph .A37 may affect the level of detail and formality of the agreement between the practitioner and the practitioner's specialist, including whether it is appropriate that the agreement be in writing. The agreement between the practitioner and a practitioner's external specialist is often in the form of an engagement letter.

Using the Work of Internal Auditors (Ref: par. .39)

.A44 Activities similar to those performed by an internal audit function may be conducted by functions with other titles within an entity. Some or all of the activities of an internal audit function may also be outsourced to a third-party service provider. Neither the title of the function nor whether it is performed by the entity or a third-party service provider are sole determinants of whether or not the practitioner can use the work of internal auditors. Rather, it is the nature of the activities, the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors, the competence of the internal auditors, and the systematic and disciplined approach of the function that are relevant. References in this section to the work of the internal audit function include relevant activities of other functions or third-party providers that have these characteristics.

.A45 A practitioner planning to use the work of the internal audit function to obtain evidence may find it effective and efficient to discuss the planned use of the work with the internal audit function as a basis for coordinating activities.

.A46 The practitioner has sole responsibility for the opinion expressed, and that responsibility is not reduced by the practitioner's use of the work of internal auditors on the engagement. The objectivity and competence of internal auditors are important in determining whether to use their work and, if so, the nature and extent of the use of their work. However, a high degree of objectivity cannot compensate for a low degree of competence, nor can a high degree of competence compensate for a low degree of objectivity. Additionally, neither a high level of competence nor strong support for the objectivity of the internal auditors compensates for the lack of a systematic and disciplined approach when using the work of the internal audit function.

Evaluating the Results of Procedures (Ref: par. .45–.46)

.A47 Uncorrected misstatements are accumulated during the engagement for the purpose of evaluating whether, individually or in aggregate, they are material when forming the practitioner's opinion. (See also paragraph .59b)

.A48 "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a wholly different (smaller) order of magnitude than materiality and will be matters that are clearly inconsequential, whether taken individually or in the aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the matter is considered not to be clearly trivial.

.A49 Sufficient appropriate evidence is necessary to support the practitioner's opinion and report. It is cumulative in nature and is primarily obtained from procedures performed during the course of the engagement. It may, however, also include information obtained from other sources such as previous engagements (provided the practitioner has determined whether changes have occurred since the previous engagement that may affect its relevance to the current engagement) or a firm's quality control procedures for client acceptance and continuance. Evidence may come from sources inside and outside the appropriate party(ies). Also, information that may be used as evidence may have been prepared by a specialist employed or engaged by the appropriate party(ies). *Evidence* comprises both information that supports and corroborates aspects of the subject matter and any information that contradicts aspects of the subject matter. In addition, in some cases, the absence of information (for example, refusal by the appropriate party(ies) to provide a requested representation) is considered by the practitioner and, therefore, also constitutes evidence.

.A50 The sufficiency and appropriateness of evidence are interrelated. Sufficiency of evidence is the measure of the quantity of evidence. The quantity of the evidence needed is affected by the risks of material misstatement and also by the quality of such evidence.

.A51 *Appropriateness of evidence* is the measure of the quality of evidence, that is, its relevance and reliability in providing support for the practitioner's opinion. The reliability of evidence is influenced by its source and nature and is dependent on the individual circumstances under which it is obtained. Generalizations about the reliability of various kinds of evidence can be made; however, such generalizations are subject to important exceptions. Even when evidence is obtained from sources external to the responsible party, circumstances may exist that could affect its reliability. For example, evidence obtained from an independent external source may not be reliable if the source is not knowledgeable. Recognizing that exceptions may exist, the following generalizations about the reliability of evidence may be useful:

- Evidence is more reliable when it is obtained from independent sources outside the appropriate party(ies).
- Evidence that is generated internally is more reliable when the related controls are effective.
- Evidence obtained directly by the practitioner (for example, observation of the application of a control) is more reliable than evidence obtained indirectly or by inference (for example, inquiry about the application of a control).

- Evidence is more reliable when it exists in documentary form, whether paper, electronic, or other media (for example, a contemporaneously written record of a meeting is ordinarily more reliable than a subsequent oral representation of what was discussed).
- Evidence provided by original documents is more reliable than evidence provided by photocopies, facsimiles, or documents that have been filmed, digitized, or otherwise transformed into electronic form, the reliability of which may depend on the controls over their preparation and maintenance.

.A52 Evidence obtained from different sources or of a different nature ordinarily provides more assurance than evidence from items considered individually. In addition, obtaining evidence from different sources or of a different nature may indicate that an individual item of evidence is not reliable. For example, corroborating information obtained from a source independent of the responsible party may increase the assurance the practitioner obtains from a representation from the responsible party. Conversely, when evidence obtained from one source is inconsistent with that obtained from another, the practitioner determines what additional procedures are necessary to resolve the inconsistency.

.A53 Whether sufficient appropriate evidence has been obtained on which to base the practitioner's opinion is a matter of professional judgment.

Considering Subsequent Events and Subsequently Discovered Facts (Ref: par. .48–.49)

.A54 For certain subject-matter AT-C sections, specific subsequent events requirements and related application guidance have been developed for engagement performance and reporting.

.A55 Procedures that a practitioner may perform to identify subsequent events include inquiring about and considering information

- contained in relevant reports issued during the subsequent period by internal auditors, other practitioners, or regulatory agencies.
- obtained through other professional engagements for that entity.

.A56 If the responsible party refuses to disclose a subsequent event for which disclosure is necessary to prevent users of the practitioner's report from being misled, appropriate actions the practitioner may take include

- disclosing the event in the practitioner's report and modifying the practitioner's opinion.
- withdrawing from the engagement.

.A57 Subsequent to the date of the practitioner's report, the practitioner may become aware of facts that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. In such circumstances, the practitioner undertakes to determine whether the facts existed at the date of the report and, if so, whether persons who would attach importance to these facts are currently using, or are likely to use, the report and related subject matter or assertion. This may include discussing the matter with the appropriate party(ies) and requesting the appropriate party(ies)'s cooperation in whatever investigation or further action that may be necessary. The specific actions to be taken in a particular case by the appropriate party(ies) and the practitioner may vary with the circumstances. Consideration may be given to,

among other things, the time elapsed since the date of the report and whether issuance of a subsequent report is imminent. The practitioner may need to perform additional procedures deemed necessary to determine whether the subject matter or assertion needs revision and whether the previously issued report continues to be appropriate.

.A58 Depending on the circumstances, the practitioner may determine that notification of the situation by the appropriate party(ies) to persons who would attach importance to the facts and who are currently using, or are likely to use, the practitioner's report is necessary. This may be the case, for example, when

- a. the report is not to be relied upon because the subject matter or assertion needs revision or the practitioner is unable to determine whether revision is necessary, and
- b. issuance of a subsequent report is not imminent.

If the appropriate party(ies) failed to take the necessary steps to prevent reliance on the report, the practitioner's course of action depends upon the practitioner's legal and ethical rights and obligations. Consequently, the practitioner may consider it appropriate to seek legal advice prior to making any disclosure of the situation. Disclosure of the situation directly by the practitioner may include a description of the nature of the matter and its effect on the subject matter or assertion and the report, avoiding comments concerning the conduct or motives of any person.

Written Representations (Ref: par. .50–.51, .52e, and .56a)

.A59 Written confirmation of oral representations reduces the possibility of misunderstandings between the practitioner and the responsible party. The person(s) from whom the practitioner requests written representations is ordinarily a member of senior management or those charged with governance depending on, for example, the management and governance structure of the responsible party(ies), which may vary by entity, reflecting influences such as size and ownership characteristics.

.A60 Representations by the responsible party cannot replace other evidence the practitioner could reasonably expect to be available. Although written representations provide evidence, they do not provide sufficient appropriate evidence on their own about any of the matters with which they deal. Furthermore, the fact that the practitioner has received reliable written representations does not affect the nature or extent of other evidence that the practitioner obtains.

.A61 A discussion of what is considered a material effect on the subject matter or assertion may be included explicitly in the representation letter in qualitative or quantitative terms.

.A62 A summary of uncorrected misstatements ordinarily is included in or attached to the written representation.

.A63 Certain subject-matter AT-C sections do not permit the practitioner to perform the alternative procedures described in paragraphs .51 and .56a (making inquiries of the responsible party and restricting the use of the practitioner's report).

Requested Written Representations Not Provided or Not Reliable (Ref: par. .55–.56)

.A64 In the situation discussed in paragraph .55, the refusal to furnish such evidence in the form of written representations constitutes a limitation on the scope of an examination sufficient to preclude an unmodified opinion and may be sufficient to cause the practitioner to withdraw from the engagement.

.A65 Even when the responsible party provides oral responses to the matters in paragraph .50, the practitioner may find it appropriate to consider whether there are significant concerns about the competence, integrity, ethical values, or diligence of those providing the oral responses or whether the oral responses are otherwise not reliable and the potential effect, if any, on the practitioner's report.

.A66 Paragraph .10 provides an exception to the requirement for a written assertion when the engaging party is not the responsible party. Nonetheless, because the assertion is the representation called for by paragraph .50a, application of paragraph .56a requires the practitioner to obtain an oral assertion when a written assertion is not obtained. Paragraph .56b applies when the responsible party provides neither a written nor an oral assertion.

Other Information (Ref: par. .57)

.A67 Further actions that may be appropriate if the practitioner identifies a material inconsistency or becomes aware of a material misstatement of fact include, for example, the following:

- Requesting the appropriate party(ies) to consult with a qualified third party, such as the appropriate party(ies)'s legal counsel
- Obtaining legal advice about the consequences of different courses of action
- If required or permissible, communicating with third parties (for example, a regulator)
- Describing the material inconsistency in the practitioner's report
- Withdrawing from the engagement, when withdrawal is possible under applicable laws and regulations

.A68 Other information does not include information contained on the appropriate party(ies)'s website. Websites are a means of distributing information and are not, themselves, documents for the purposes of paragraph .57.

Description of Criteria (Ref: par. .58)

.A69 The description of the criteria on which the subject matter or assertion is based is particularly important when there are significant differences among various criteria regarding how particular matters may be treated in the subject matter.

.A70 A description of the criteria that states that the subject matter is prepared in accordance with (or based on) particular criteria is appropriate only if the subject matter complies with all relevant requirements of those criteria that are effective.

Forming the Opinion (Ref: par. .59–.60)

.A71 The practitioner's professional judgment regarding what constitutes sufficient appropriate evidence is influenced by such factors as the following:

- The significance of a potential misstatement and the likelihood that it will have a material effect, individually or aggregated with other potential misstatements, on the subject matter or assertion
- The effectiveness of the responsible party's responses to address the known risks
- The experience gained during previous examination or review engagements with respect to similar potential misstatements
- The results of procedures performed, including whether such procedures identified specific misstatements
- The source and reliability of the available information
- The persuasiveness of the evidence
- The practitioner's understanding of the responsible party and its environment

.A72 An examination engagement is a cumulative and iterative process. As the practitioner performs planned procedures, the evidence obtained may cause the practitioner to change the nature, timing, or extent of other planned procedures. Information that differs significantly from the information on which the risk assessments and planned procedures were based may come to the practitioner's attention, for example

- the extent of the misstatements that the practitioner detects is greater than expected. (This may alter the practitioner's professional judgment about the reliability of particular sources of information.)
- the practitioner may become aware of discrepancies in relevant information or conflicting or missing evidence.
- procedures performed toward the end of the engagement may indicate a previously unrecognized risk of material misstatement. In such circumstances, the practitioner may need to reevaluate the planned procedures.

.A73 In making the evaluation required by paragraph .60, the practitioner may consider whether additional disclosures are necessary to describe the subject matter, assertion, or criteria. Additional disclosures may, for example, include

- the measurement or evaluation methods used when the criteria allow for choice among methods;
- significant interpretations made in applying the criteria in the engagement circumstances;
- subsequent events, depending on their nature and significance; and
- whether there have been any changes in the measurement or evaluation methods used.

.A74 Paragraph .60 does not require the practitioner to determine whether the presentation discloses all matters related to the subject matter, assertion, or criteria or all matters intended users may consider in making decisions based on the presentation.

Preparing the Practitioner's Report (Ref: par. .61–.62)

.A75 Oral and other forms of expressing an opinion can be misunderstood without the support of a written practitioner's report. For this reason, the practitioner may not report orally or by use of symbols (such as a web seal) under the attestation standards without also providing a written report that is readily available whenever the oral report is provided or the symbol is used. For example, a symbol could be hyperlinked to a written report on the Internet.

.A76 This section does not require a standardized format for reporting on all examination engagements. Instead, it identifies the basic elements that the practitioner's report is to include. The report is tailored to the specific engagement circumstances. The practitioner may use headings, separate paragraphs, paragraph numbers, typographical devices (for example, the bolding of text), and other mechanisms to enhance the clarity and readability of the report.

.A77 All of the following reporting options are available to a practitioner, except when the circumstances described in paragraph .79 exist:

<i>The practitioner's report may state that the practitioner examined</i>	<i>and</i>	<i>expresses an opinion on</i>
the subject matter		the subject matter
the responsible party's assertion		the responsible party's assertion
the responsible party's assertion		the subject matter

Content of the Practitioner's Report

Title (Ref: par. .63a)

.A78 A title indicating that the practitioner's report is the report of an independent practitioner (for example, "Independent Practitioner's Report," "Report of Independent Certified Public Accountant," or "Independent Accountant's Report") affirms that the practitioner has met all the relevant ethical requirements regarding independence and, therefore, distinguishes the independent practitioner's report from reports issued by others.

Criteria (Ref: par. .63d)

.A79 The practitioner's report may include the criteria or refer to them if they are included in the subject matter presentation, in the assertion, or are otherwise readily available. It may be relevant in the circumstances to disclose the source of the criteria or the relevant matters discussed in paragraph .A73.

Relevant Responsibilities (Ref: par. .63e)

.A80 Identifying relative responsibilities informs the intended users that the responsible party is responsible for the subject matter, and the practitioner's role is to independently express an opinion about it.

.A81 The practitioner may wish to expand the discussion of the responsible party's responsibility, for example, to indicate that the responsible party is responsible for the preparation and presentation of the subject matter in accordance with (or based on) the criteria, including the design, implementation, and maintenance of internal control to prevent, or detect and correct, misstatement of the subject matter, due to fraud or error.

Statement About the Subject Matter and the Criteria (Ref: par. .63f(ii)(1))

.A82 The language in paragraph .63f(ii)(1) may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .63f(ii)(1) include, "to obtain reasonable assurance about whether

- the entity maintained effective internal control over the subject matter, based on the criteria, in all material respects."
- the subject matter is presented in accordance with (or based on) the criteria, in all material respects."
- the subject matter achieves the objectives, in all material respects." (For example, when the objectives are the criteria.)
- the subject matter is presented fairly, in all material respects, based on the criteria." (The practitioner's professional judgment concerning the fairness of the presentation of the subject matter relates to whether the measurement, recognition, presentation, and disclosure of all material items in the presentation of the subject matter achieve fair presentation.)

Description of the Nature of an Examination Engagement (Ref: par. .63g)

.A83 A description of the nature of an examination engagement may state, for example, that

- an examination involves performing procedures to obtain evidence about the subject matter and that the nature, timing, and extent of the procedures selected depend on the practitioner's judgment, including an assessment of the risks of material misstatement of the subject matter, whether due to fraud or error.
- an examination also involves examining evidence about the subject matter or assertion.
- in making an assessment of the risks of material misstatement, the practitioner considered and obtained an understanding of internal control relevant to the subject matter in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. Accordingly, no such opinion is expressed.

.A84 The practitioner may decide to more fully describe the practitioner's responsibility, for example, to

- perform procedures to obtain evidence based on the practitioner's assessment of the risk of material misstatement about whether the subject matter is presented in accordance with (or based on) the criteria.
- obtain an understanding of internal control over the subject matter.

.A85 A practitioner may be requested to provide in a separate section of the practitioner's report a description of the procedures performed and the results thereof in support of the practitioner's opinion. The following factors are relevant when determining whether to include such a description in the report:

- Whether such a description is likely to overshadow the practitioner's overall opinion or cause report users to misunderstand the opinion

- Whether the parties making the request have an appropriate business need or reasonable basis for requesting the information (for example, the specified parties are required to maintain and monitor controls that either encompass or are dependent on controls that are the subject of an examination and, therefore, need information about the tests of controls to enable them to have a basis for concluding that they have met the requirements applicable to them)
- Whether the parties have an understanding of the nature and subject matter of the engagement and experience in using the information in such reports
- Whether the practitioner's procedures performed directly relate to the subject matter of the engagement

The addition of procedures performed and the results thereof in a separate section of an examination report may increase the potential for the report to be misunderstood when taken out of the context of the knowledge of the requesting parties. This potential for an increase in the risk of misunderstanding may lead the practitioner to add a restricted-use paragraph to the practitioner's report.

Inherent Limitations (Ref: par. .63h)

.A86 In some cases, identification of specific inherent limitations is required by an AT-C section. For example, section 305, *Prospective Financial Information*, requires that the practitioner's report include a statement indicating that the prospective results may not be achieved.⁴ To implement that requirement, the illustrative practitioner's examination report on a forecast in section 305 states, "There will usually be differences between the forecasted and actual results because events and circumstances frequently do not occur as expected, and those differences may be material."⁵ When not explicitly required by an AT-C section, identification in the report of inherent limitations is based on the practitioner's judgment

Opinion (Ref: par. .63i)

.A87 The practitioner's opinion can be worded either in terms of the subject matter and the criteria (for example, "In our opinion, the schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is in accordance with [or based on] the ABC criteria set forth in Note 1, in all material respects."), or in terms of an assertion made by the responsible party (for example, "In our opinion, management's assertion that the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with [or based on] the ABC criteria set forth in Note 1 is fairly stated, in all material respects.").

.A88 The language of the practitioner's opinion in paragraph .63i(i) may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .63i(i) include the following:

- The entity maintained effective internal control over the subject matter, in all material respects, based on the criteria.
- The subject matter is presented in accordance with (or based on) the criteria, in all material respects.

⁴ Paragraph .32i of section 305, *Prospective Financial Information*.

⁵ Example 1 in paragraph .A43 of section 305.

- The subject matter achieved the objectives, in all material respects (when the objectives are the criteria).
- The subject matter is free from material misstatement based on the criteria.
- The subject matter is presented fairly, in all material respects, based on the criteria. (The practitioner's professional judgment concerning the fairness of the presentation of the subject matter relates to whether the measurement, recognition, presentation, and disclosure of all material items in the presentation of the subject matter achieve fair presentation.)

.A89 A single practitioner's report may cover more than one aspect of a subject matter or an assertion about the subject matter. When that is the case, the report may contain separate opinions or conclusions on each aspect of the subject matter or assertion (for example, examination level related to some aspects or assertions and review level related to others, or an unmodified opinion on some aspects or assertions and a modified opinion on others).

.A90 A practitioner may report on subject matter or an assertion at multiple dates or covering multiple periods during which criteria have changed (for example, a practitioner's report on comparative information). Criteria are clearly described when they identify the criteria for each period and how the criteria have changed from one period to the next. If the criteria for the current date or period have changed from the criteria for a preceding date or period, changes in the criteria may be significant to users of the report. If so, the criteria and the fact that they have changed may be disclosed in the presentation of the subject matter, in the written assertion, or in the report, even if the subject matter for the preceding date or period is not presented.

Location (Ref: par. .63k)

.A91 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country.

Date (Ref: par. .63l)

.A92 Including the date of the practitioner's report informs the intended users that the practitioner has considered the effect of the events that occurred up to that date on the subject matter and the report.

.A93 Because the practitioner expresses an opinion on the subject matter or assertion and the subject matter or assertion is the responsibility of the responsible party, the practitioner is not in a position to conclude that sufficient appropriate evidence has been obtained until evidence is obtained that all the elements that the subject matter or assertion comprises, including any related notes, when applicable, have been prepared, and the responsible party has accepted responsibility for them.

Restricted-Use Paragraph (Ref: par. .10, .50, .64, and .65b–c)

.A94 A practitioner's report for which the conditions in paragraph .64 do not apply need not include an alert that restricts its use. However, nothing in the attestation standards precludes a practitioner from including such an alert in any practitioner's report or other practitioner's written communication.

.A95 A practitioner's report that is required by paragraph .64 to include an alert that restricts the use of the report may be included in a document that also contains a practitioner's report that is for general use. In such circumstances, the use of the general use report is not affected.

.A96 A practitioner may also issue a single combined practitioner's report that includes (a) a practitioner's report that is required by paragraph .64 to include an alert that restricts its use, and (b) a report that is for general use. If these two types of reports are clearly differentiated within the combined report, such as through the use of appropriate headings, the alert that restricts the use of the report may be limited to the report required by paragraph .64 to include such an alert. In such circumstances, the use of the general use report is not affected.

.A97 The written representations required by paragraph .50 include an assertion. If the engaging party is not the responsible party and the responsible party provides an oral assertion rather than a written assertion, paragraph .64c calls for an alert that restricts the use of the practitioner's report to the engaging party.

.A98 The practitioner may identify the specified parties by naming them, referring to a list of those parties, or identifying the class of parties, for example, "all customers of XYZ Company during some or all of the period January 1, 20XX to December 31, 20XX." The method of identifying the specified parties is determined by the practitioner.

.A99 In some cases, the criteria used to measure or evaluate the subject matter may be designed for a specific purpose. For example, a regulator may require certain entities to use particular criteria designed for regulatory purposes. To avoid misunderstandings, the practitioner alerts users of the practitioner's report to this fact and, therefore, that the report is intended solely for the information and use of the specified parties.

.A100 The alert that restricts the use of the practitioner's report is designed to avoid misunderstandings related to the use of the report, particularly if the report is taken out of the context in which the report is intended to be used. A practitioner may consider informing the responsible party and, if different, the engaging party or other specified parties that the report is not intended for distribution to parties other than those specified in the report. The practitioner may, in connection with establishing the terms of the engagement, reach an understanding with the responsible party or, if different, the engaging party, that the intended use of the report will be restricted and may obtain the responsible party's agreement that the responsible party and specified parties will not distribute such report to parties other than those identified therein. A practitioner is not responsible for controlling, and cannot control, distribution of the report after its release.

.A101 In some cases, a restricted-use practitioner's report filed with regulatory agencies is required by law or regulation to be made available to the public as a matter of public record. Also, a regulatory agency, as part of its oversight responsibility for an entity, may require access to a restricted-use report in which it is not named as a specified party.

Reference to the Practitioner's Specialist (Ref: par. .67)

.A102 The practitioner has sole responsibility for the opinion expressed, and that responsibility is not reduced by the practitioner's use of the work of a practitioner's specialist.

Modified Opinions (Ref: par. .68, .70, and .74)

.A103 The three types of modified opinions are a qualified opinion, an adverse opinion, and a disclaimer of opinion. The decision regarding which type of modified opinion is appropriate depends upon the following:

- a. The nature of the matter giving rise to the modification (that is, whether the subject matter of the engagement is in accordance with [or based on] the criteria, in all material respects or, in the case of an inability to obtain sufficient appropriate evidence, may be materially misstated)
- b. The practitioner's professional judgment about the pervasiveness of the effects or possible effects of the matter on the subject matter of the engagement

.A104 A practitioner may express an unmodified opinion only when the engagement has been conducted in accordance with the attestation standards. Such standards will not have been complied with if the practitioner has been unable to apply all the procedures that the practitioner considers necessary in the circumstances.

.A105 The term *pervasive* describes the effects on the subject matter of misstatements or the possible effects on the subject matter of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate evidence. Pervasive effects on the subject matter are those that, in the practitioner's professional judgment

- a. are not confined to specific aspects of the subject matter;
- b. if so confined, represent or could represent a substantial proportion of the subject matter; or
- c. in relation to disclosures, are fundamental to the intended users' understanding of the subject matter.

.A106 The following table illustrates how the practitioner's professional judgment about the nature of the matter giving rise to the modification and the pervasiveness of its effects or possible effects on the subject matter affects the type of practitioner's report to be issued.

<i>Nature of Matter Giving Rise to the Modification</i>	<i>Practitioner's Professional Judgment About the Pervasiveness of the Effects or Possible Effects on the Subject Matter</i>	
	<i>Material but Not Pervasive</i>	<i>Material and Pervasive</i>
Scope limitation. An inability to obtain sufficient appropriate evidence.	Qualified opinion	Disclaimer of opinion
Subject matter is materially misstated.	Qualified opinion	Adverse opinion

.A107 A scope limitation may arise from the following:

- a. Circumstances beyond the control of the appropriate party(ies). For example, documentation that the practitioner considers necessary to inspect may have been accidentally destroyed.
- b. Circumstances relating to the nature or timing of the practitioner's work. For example, a physical process that the practitioner considers necessary to observe may have occurred before the practitioner's engagement.
- c. Limitations imposed by the responsible party or the engaging party on the practitioner that, for example, may prevent the practitioner from performing a procedure that the practitioner

considers necessary in the circumstances. Limitations of this kind may have other implications for the engagement, such as for the practitioner's consideration of risks of material misstatement and engagement acceptance and continuance.

.A108 The inability to obtain written representations from the responsible party ordinarily would result in a scope limitation. However, when the engaging party is not the responsible party, paragraph .51 enables the practitioner to make inquiries of the responsible party and if the responsible party's oral responses enable the practitioner to conclude that the practitioner has sufficient appropriate evidence to form an opinion about the subject matter, paragraph .56a indicates this would not cause a scope limitation. Further, paragraph .56a requires that the practitioner's report in these circumstances contain an alert paragraph that restricts the use of the report to the engaging party.

.A109 The practitioner's decision to express a qualified opinion, disclaim an opinion, or withdraw from the engagement because of a scope limitation depends on an assessment of the effect of the omitted procedure(s) on the practitioner's ability to express an opinion. This assessment will be affected by the nature and magnitude of the potential effects of the matters in question and by their significance to the subject matter or assertion.

.A110 An inability to perform a specific procedure does not constitute a scope limitation if the practitioner is able to obtain sufficient appropriate evidence by performing alternative procedures.

Responsible Party Refuses to Provide a Written Assertion (Ref: par. .84)

.A111 The following is an example of the disclosure required by paragraph .84:

Attestation standards established by the American Institute of Certified Public Accountants require that we request a written statement from *[identify the responsible party]* stating that *[identify the subject matter]* that we examined has been accurately measured or evaluated. We requested that *[identify the responsible party]* provide such a written statement but *[identify the responsible party]* refused to do so.

.A112 The practitioner's report discussed in paragraph .84 is appropriate only when the engagement is to report on the subject matter; it is not appropriate for a report on an assertion. When reporting on an assertion, the practitioner is required to obtain a written assertion from the responsible party.

.A113 If the responsible party's failure to provide the practitioner with written representations causes the practitioner to conclude that a scope limitation exists and, thus, qualify or disclaim an opinion, the practitioner need not restrict the use of the practitioner's report but is required by paragraph .69 to describe the matter that gave rise to the modified opinion. Paragraph .A94 notes, however, that the practitioner is not precluded from restricting the use of any report.

Communication Responsibilities (Ref: par. .85–.86)

.A114 Other matters that may be appropriate to communicate to the responsible party or, if different, the engaging party, include bias in the measurement, evaluation, or disclosure of the subject matter. (Ref: par. .85)

.A115 The practitioner's professional duty to maintain the confidentiality of client information may preclude the practitioner from reporting identified or suspected noncompliance with laws or regulations that is not relevant to the

subject matter to a party other than the responsible party and, if different, the engaging party. However, the practitioner's legal responsibilities may vary by jurisdiction, and in certain circumstances, the duty of confidentiality may be overridden by statute, the law, or courts of law. In the following circumstances, a duty to notify parties outside the entity may exist:

- In response to a court order
- In compliance with requirements for examinations of entities that receive financial assistance from a government agency

Because potential conflicts with the practitioner's ethical and legal obligations for confidentiality may be complex, the practitioner may consult with legal counsel before discussing noncompliance with parties outside the entity. (Ref: par. .86)

.A116 If the practitioner is performing an examination engagement in accordance with *Government Auditing Standards*, the practitioner may be required to report on compliance with laws, regulations, and provisions of contracts or grant agreements as part of the examination. The practitioner also may be required to communicate instances of noncompliance to appropriate oversight bodies and funding agencies. (Ref: par. .86)

Documentation (Ref: par. .87)

.A117 Documentation includes a record of the practitioner's reasoning on all significant findings or issues that require the exercise of professional judgment and related conclusions. The existence of difficult questions of principle or professional judgment calls for the documentation to include the relevant facts that were known by the practitioner at the time the conclusion was reached.

.A118 It is neither necessary nor practical to document every matter considered, or professional judgment made, during an engagement. Further, it is unnecessary for the practitioner to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included in the engagement file. Similarly, the practitioner need not include in the engagement file superseded drafts of working papers, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.A119 In applying professional judgment to assess the extent of documentation to be prepared and retained, the practitioner may consider what is necessary to provide an experienced practitioner, having no previous connection with the engagement, with an understanding of the work performed and the basis of the principal decisions made.

.A120 Documentation ordinarily includes a record of

- issues identified with respect to compliance with relevant ethical requirements and how they were resolved.
- conclusions on compliance with independence requirements that apply to the engagement and any relevant discussions with the firm that support these conclusions.
- conclusions reached regarding the acceptance and continuance of client relationships and attestation engagements.
- the nature and scope of, and conclusions resulting from, consultations undertaken during the course of the engagement.

.A121

Exhibit—Illustrative Practitioner's Examination Reports

The illustrative practitioner's examination reports in this exhibit meet the applicable reporting requirements in paragraphs .61–.84. A practitioner may use alternative language in drafting an examination report, provided that the language meets the applicable requirements in paragraphs .61–.84. The criteria for evaluating the subject matter in examples 1–3 and 5–6 have been determined by the practitioner to be suitable and available to all users of the practitioner's report; therefore, these practitioner's reports may be for general use. The criteria for evaluating the subject matter in example 4 are suitable but available only to specified parties; therefore, use of this practitioner's report is restricted to the specified parties who either participated in the establishment of the criteria or can be presumed to have an adequate understanding of the criteria. (See paragraph .65 for the information to be included in a separate paragraph of the report that contains an alert that restricts the use of the report and paragraph .66 for the content of that paragraph when the engagement is also performed in accordance with *Government Auditing Standards*.)

Example 1: Practitioner's Examination Report on Subject Matter; Unmodified Opinion

The following is an illustrative practitioner's report for an examination engagement in which the practitioner has examined the subject matter and is reporting on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have examined [identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]. XYZ Company's management is responsible for [identify the subject matter, for example, presenting the schedule of investment returns] in accordance with (or based on) [identify the criteria, for example, the ABC criteria set forth in Note 1]. Our responsibility is to express an opinion on [identify the subject matter, for example, the schedule of investment returns] based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether [identify the subject matter, for example, the schedule of investment returns] is in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about [identify the subject matter, for example, the schedule of investment returns]. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of [identify the subject matter, for example, the schedule of investment returns], whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, *[identify the subject matter, for example, the schedule of investment returns of XYZ Company for the year ended December 31, 20XX or the schedule of investment returns referred to above]*, is presented in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

Example 2: Practitioner's Examination Report on an Assertion; Unmodified Opinion

The following is an illustrative practitioner's report for an examination engagement in which the practitioner has examined the responsible party's assertion and is reporting on that assertion.

Independent Accountant's Report

[Appropriate Addressee]

We have examined management of XYZ Company's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with [or based on] the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on management's assertion based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, management's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with [or based on] the ABC criteria set forth in Note 1]* is fairly stated, in all material respects.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

Example 3: Practitioner's Examination Report in Which the Practitioner Examines Management's Assertion and Reports Directly on the Subject Matter; Unmodified Opinion

The following is an illustrative practitioner's report for an examination engagement in which the practitioner has examined the responsible party's assertion and is reporting directly on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have examined management of XYZ Company's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with [or based on] the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is presented in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the schedule of investment returns]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of *[identify the subject matter, for example, the schedule of investment returns]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX or the schedule of investment returns referred to above]* is presented in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

[Date of practitioner's report]

Example 4: Practitioner's Examination Report on Subject Matter; Unmodified Opinion; Use of the Practitioner's Report Is Restricted to Specified Parties

The following is an illustrative practitioner's report for an examination engagement in which the criteria are suitable, but available only to specified parties; therefore, use of the report is restricted to the specified parties who either participated in the establishment of the criteria or can be presumed to have an adequate understanding of the criteria. The practitioner has examined the subject matter and is reporting on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have examined [identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company... or gallons of gas sold in the United States by XYZ Company to ABC Company) during the year ended December 31, 20XX,] to determine whether it has been calculated in accordance with (or based on) [identify the criteria, for example, the agreement dated (date) between ABC Company and XYZ Company, as further described in Note 1]. XYZ Company's management is responsible for [identify the subject matter; for example, calculating the number of widgets sold]. Our responsibility is to express an opinion on [identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company... or gallons of gas sold in the United States by XYZ Company to ABC Company) during the year ended December 31, 20XX,] based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether [identify the subject matter, for example, the number of widgets sold, tons of coal mined, or gallons of gas sold] is in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about [identify the subject matter, for example, the number of widgets sold, tons of coal mined, or gallons of gas sold]. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of [identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company, or gallons of gas sold in the United States by XYZ Company to ABC Company)], whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, [identify the subject matter, for example, the number of widgets sold by XYZ Company to ABC Company (or tons of coal mined by XYZ Company, or gallons of gas sold in the United States by XYZ Company to ABC Company) during the year ended December 31, 20XX,] has been calculated in accordance with (or based on) [identify the criteria, for example, the agreement dated (date) between ABC Company and XYZ Company, as further described in Note 1], in all material respects.

This report is intended solely for the information and use of [identify the specified parties, for example, ABC Company and XYZ Company], and is not intended to be and should not be used by anyone other than the specified parties.

[Date of practitioner's report]

**Example 5: Practitioner's Examination Report on Subject Matter;
Qualified Opinion**

The following is an illustrative practitioner's report for an examination engagement in which the practitioner expresses a qualified opinion because conditions

exist that, individually or in combination, result in one or more material, but not pervasive, misstatements of the subject matter based on (or in certain engagements, deviations from, exceptions to, or instances of noncompliance with) the criteria. The practitioner has examined the subject matter and is reporting on the subject matter. Paragraph .79 states, "If the practitioner has concluded that conditions exist that, individually or in combination, result in one or more material misstatements based on the criteria, the practitioner should modify the opinion and should express a qualified or adverse opinion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement."

Independent Accountant's Report

[Appropriate Addressee]

We have examined *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]* in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*. Our responsibility is to express an opinion on *[identify the subject matter, for example, the schedule of investment returns]* based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is presented in accordance with (or based on) the criteria, in all material respects. An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the schedule of investment returns]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of *[identify the subject matter, for example, the schedule of investment returns]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our modified opinion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Our examination disclosed *[describe condition(s) that, individually or in the aggregate, resulted in a material misstatement or deviation from the criteria]*.

In our opinion, except for the material misstatement *[or deviation from the criteria]* described in the preceding paragraph, *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, or the schedule of investment returns referred to above]*, is presented in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

Example 6: Practitioner's Examination Report; Practitioner Engaged to Report on Subject Matter; Disclaimer of Opinion Because of Scope Limitation

The following is an illustrative practitioner's report for an examination engagement in which the practitioner was engaged to report on the subject matter but is disclaiming an opinion because of a scope limitation. (See paragraphs .68–.84 and the related application guidance for reporting guidance when a scope limitation exists.)

Independent Accountant's Report

[Appropriate Addressee]

We were engaged to examine *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]*. Our responsibility is to express an opinion on *[identify the subject matter; for example, the schedule of investment returns]* based on conducting the examination in accordance with attestation standards established by the American Institute of Certified Public Accountants.

[The first sentence of the practitioner's report has been revised to state, "We were engaged to examine" rather than "We have examined." The standards under which the practitioner conducts an examination have been identified at the end of the second sentence of the report, rather than in a separate sentence in the second paragraph of the report.]

[The report should omit statements

- *indicating what those standards require of the practitioner.*
- *indicating that the practitioner believes the evidence obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.*
- *describing the nature of an examination engagement.]*

[Include a paragraph to describe scope limitations.]

Because of the limitation on the scope of our examination discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on whether *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, or the schedule of investment returns referred to above]* is in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

AT-C Section 9205A

Examination Engagements: Attestation Interpretations of Section 205A

1. Reporting on Attestation Engagements Performed in Accordance With *Government Auditing Standards*¹

.01 Question — Chapter 5, "Standards for Attestation Engagements," of the 2011 revision of *Government Auditing Standards* (referred to herein as the Yellow Book) sets forth additional fieldwork and reporting standards for attestation engagements performed pursuant to generally accepted government auditing standards (GAGAS). Practitioners performing attestation engagements under GAGAS are also required to follow the general standards set forth in chapter 3, "General Standards," of the Yellow Book, as well as the guidance and requirements in chapter 1, "Government Auditing: Foundation and Ethical Principles," and chapter 2, "Standards for Use and Application of GAGAS." For examination attestation engagements performed pursuant to GAGAS, paragraph 5.18 of the Yellow Book prescribes additional reporting standards² that go beyond the standards of reporting set forth in section 205A, *Examination Engagements*, and section 210A, *Review Engagements*.³ When a practitioner performs an attestation examination in accordance with GAGAS, how should the report be modified?

.02 Interpretation — The practitioner should modify the scope paragraph of the attestation report to indicate that the examination or review was "conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States."

.03 Additionally, GAGAS requires the practitioner's attestation report to disclose any matters (often referred to as *findings*) that are set forth in paragraphs 5.20–.26 of the Yellow Book. Paragraphs 5.27–.28 of the Yellow Book set forth the presentation requirements that the practitioner should use, to the extent possible, in reporting a finding. The following illustration is a standard examination report modified to make reference to a schedule of findings when any of the matters set forth in paragraphs 5.20–.26 have been identified. This

¹ Although separate interpretations for other AT-C sections have not been issued to address attestation engagements performed in accordance with *Government Auditing Standards*, a practitioner may use this guidance to help the practitioner appropriately modify an attestation report pursuant to other AT-C sections.

² Paragraph 5.18 of the Yellow Book sets forth the additional reporting requirements: (a) reporting auditors' compliance with generally accepted government auditing standards, (b) reporting deficiencies in internal control, fraud, noncompliance with provisions of laws, regulations, contracts, and grant agreements, and abuse, (c) reporting views of responsible officials, (d) reporting confidential or sensitive information, and (e) distributing reports. [Footnote revised, January 2008, to reflect conforming changes necessary due to the issuance of the 2007 revised *Government Auditing Standards*. Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

³ Paragraphs .61–.84 of section 205A, *Examination Engagements*, and paragraphs .44–.60 of section 210A, *Review Engagements*.

report pertains to subject matter for which suitable criteria exist and are available to all users through inclusion in a clear manner in the presentation of the subject matter. A written assertion has been obtained from the responsible party. Although the following illustrative report modifications would comply with the Yellow Book requirement, this illustration is not intended to preclude a practitioner from complying with these additional Yellow Book reporting requirements in other ways. In this illustrative report, the practitioner is reporting on the subject matter.

Independent Accountant's Report

We have examined *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*.⁴ XYZ Agency's management is responsible for presenting the *[identify the subject matter, for example, the schedule of performance measures]* in accordance with *[identify the criteria]*. Our responsibility is to express an opinion on *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*, based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]* is in accordance with *[identify the criteria]*, in all material respects. An examination involves performing procedures to obtain evidence about *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the *[identify the subject matter, for example, the accompanying schedule of performance measures of XYZ Agency for the year ended December 31, 20XX]*, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

In our opinion, the schedule referred to above presents *[identify the subject matter, for example, the performance measures of XYZ Agency for the year ended December 31, 20XX]*, in accordance with *[identify criteria, for example, the criteria set forth in Note 1]*, in all material respects.

[When any of the matters set forth in paragraphs 5.20–26 of the Yellow Book have been identified, the following paragraph would be added.]

In accordance with *Government Auditing Standards*, we are required to report all deficiencies that are considered to be significant deficiencies or material weaknesses in internal control; fraud and noncompliance with provisions

⁴ If the practitioner is reporting on an assertion about the subject matter, the practitioner would identify the assertion, rather than the subject matter, for example, "management's assertion that the accompanying schedule presents the performance measures of XYZ Agency for the year ended December 31, 20XX, in conformity with the criteria in Note 1." [Footnote added, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

of laws or regulations that have a material effect on [*identify the subject matter, for example, XYZ Agency's schedule of performance measures*]; and any other instances that warrant the attention of those charged with governance; noncompliance with provisions of contracts or grant agreements, and abuse that has a material effect on the subject matter.⁵ We are also required to obtain and report the views of responsible officials concerning the findings, conclusions, and recommendations, as well as any planned corrective actions. We performed our examination to express an opinion on whether [*identify the subject matter, for example, XYZ Agency's schedule of performance measures*] is presented in accordance with the criteria described above and not for the purpose of expressing an opinion on the internal control over [*identify the subject matter, for example, reporting of performance measures*] or on compliance and other matters; accordingly, we express no such opinions. Our examination disclosed certain findings that are required to be reported under *Government Auditing Standards* and those findings, along with the views of responsible officials, are described in the attached Schedule of Findings.⁶

Management's Response

⁵ Note that paragraph 5.25 of the Yellow Book states that when auditors detect instances of noncompliance with provisions of contracts or grant agreements or abuse that have an effect on the subject matter or an assertion about the subject matter that is less than material but warrant the attention of those charged with governance, they should communicate those findings in writing to entity officials. When auditors detect any instances of fraud, noncompliance with provisions of laws, regulations, contracts, or grant agreements, or abuse that do not warrant the attention of those charged with governance, the auditors' determination of whether and how to communicate such instances to audited entity officials is a matter of professional judgment. [Footnote added, January 2008, to reflect conforming changes necessary due to the issuance of the 2007 revised *Government Auditing Standards*. 2. Reporting on the Design of Internal Control

.04 Question — A practitioner may be asked to report on the suitability⁸ of the design of an entity's internal control over financial reporting (internal control) for preventing, or detecting and correcting, material misstatements of the entity's financial statements on a timely basis. Such requests may be made by, for example,

- an entity applying for a government grant or contract that is required to submit a written pre-award survey by management about the suitability of the design of the entity's internal control or a portion of the entity's internal control, together with a practitioner's report thereon.
- a new casino applying for a license to operate that is required by a regulatory agency to submit a practitioner's report on whether the entity's internal control *that it plans to implement* is suitably designed to provide reasonable assurance that the control objectives specified in the regulatory agency's regulations would be achieved. (In this situation, the casino would not yet have begun operations, and audited financial statements or financial data relevant to the period covered by the engagement may not exist.)

May a practitioner report on the suitability of the design of an entity's internal control based on the risk assessment procedures the auditor performs to obtain a sufficient understanding of the entity and its environment, including its internal control, in an audit of the entity's financial statements?

.05 Interpretation — No. In a financial statement audit, the purpose of the auditor's understanding of the entity and its environment, including its internal control, is to enable the auditor to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. The understanding obtained in a financial statement audit does not provide the practitioner with a sufficient basis to report on the suitability of the design of an entity's internal control or any portion thereof.

.06 Question — How may a practitioner report on the suitability of the design of an entity's internal control or a portion thereof?

⁸ In this interpretation, the *suitability of the design of internal control* means the same thing as the *design effectiveness of an entity's internal control*. [Footnote renumbered, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

.07 Interpretation — The practitioner may perform an examination of the suitability of the design of an entity's internal control under section 205A or apply agreed-upon procedures to that subject matter under section 215. AU-C section 940, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements*, does not directly apply when a practitioner is engaged to examine the suitability of design of an entity's internal control. However, it may be useful in planning and performing such engagements. Paragraphs .33 and .A61–.A62 of AU-C section 940 discuss how the auditor evaluates the design effectiveness of controls.

.08 When the engagement involves the application of agreed-upon procedures related to the suitability of the design of an entity's internal control over compliance with specified requirements, the practitioner should follow the provisions of section 315, *Compliance Attestation*.⁹

.09 The following is an illustrative report a practitioner may issue when reporting on the suitability of the design of an entity's internal control that has been implemented. The report may be modified, as appropriate, to fit the particular circumstances.

Independent Accountant's Report

[Introductory paragraph]

We have examined the suitability of the design of W Company's internal control over financial reporting to prevent, or detect and correct, material misstatements in its financial statements on a timely basis as of December 31, 20XX.¹⁰ W Company's management is responsible for the suitability of the design of W Company's internal control over financial reporting, based on *[identify the criteria]*. Our responsibility is to express an opinion on the suitability of the design of W Company's internal control over financial reporting based on our examination.

[Scope paragraph]

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether W Company's internal control over financial reporting was suitably designed based on *[identify the criteria]*, in all material respects. An examination involves performing procedures to obtain evidence about the suitability of the design of W Company's internal control over financial reporting. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of a material weakness in the suitability of the design of W Company's internal control over financial reporting. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion. We were not engaged to examine and report on the operating effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, and, accordingly, we express no opinion on operating effectiveness.

[Inherent limitations paragraph]

Because of its inherent limitations, internal control over financial reporting may not prevent or detect and correct misstatements. Also, projections of any

⁹ Paragraphs .01–.05, .07–.08, and .23–.26 of section 315, *Compliance Attestation*.

¹⁰ This report assumes that the control criteria are both suitable and available to users as discussed in paragraph .25b(ii) of section 105A, *Concepts Common to All Attestation Engagements*. Therefore, the use of this report is not restricted. [Footnote renumbered, December 2012, to reflect conforming changes necessary due to the issuance of the 2011 revision of *Government Auditing Standards*.]

evaluation of the suitability of the design or effectiveness of W Company's internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

[Opinion paragraph]

In our opinion, W Company's internal control over financial reporting was suitably designed to prevent, or detect and correct, material misstatements in the financial statements on a timely basis as of December 31, 20XX, based on *[identify criteria]*.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

.10 When reporting on the suitability of the design of an entity's internal control that has not yet been implemented, the practitioner would be unable to confirm that the controls have been implemented and should disclose that information in the practitioner's report. In those circumstances, the practitioner should modify (1) the scope paragraph of the illustrative report in paragraph .09 to inform readers that the controls identified in the report have not yet been implemented and (2) the inherent limitations paragraph to reflect the related risk. Following are modified illustrative report paragraphs for use when controls have not yet been implemented.

(New language is shown in boldface italics. Deleted language is shown in strikethrough.)

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether W Company's internal control over financial reporting was suitably designed based on *[identify the criteria]*, in all material respects. An examination involves performing procedures to obtain evidence about the suitability of the design of W Company's internal control over financial reporting. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of a material weakness in the suitability of the design of W Company's internal control over financial reporting. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion. ***Because operations had not begun as of December 31, 20XX, we could not confirm that the specified controls were implemented. Accordingly, our report solely addresses the suitability of the design of the Company's internal control and does not address whether the controls were implemented. Furthermore, because the specified controls have not yet been implemented, we were unable to test, and did not test,*** the operating effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, and, accordingly, we express no opinion on operating effectiveness.

[Inherent limitations paragraph]

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any evaluation of the suitability of the design or effectiveness of W Company's internal control over financial reporting to future periods are subject to the risk that controls ***may not be implemented as intended when operations begin*** or may become inadequate because of changes in conditions, ~~or that the degree of compliance with the policies or procedures may deteriorate.~~

.11 Question — A practitioner may be asked to sign a prescribed form developed by the party to whom the form is to be submitted regarding the design

of an entity's internal control. What are the practitioner's responsibilities when requested to sign such a form if it includes language that is not consistent with the practitioner's function or responsibility or with the reporting requirements of professional standards?

.12 Interpretation — In the circumstances described in paragraph .11 of this interpretation, section 105A, *Concepts Common to All Attestation Engagements*, requires the practitioner to reword the prescribed form of report or attach an appropriately worded separate report.¹¹ Section 105A indicates that some report forms can be made acceptable by inserting additional wording to include the report elements required by the applicable section.¹² However, some report forms required by law or regulation can be made acceptable only by complete revision because the prescribed language of the practitioner's report calls for statements by the practitioner that are not consistent with the practitioner's function or responsibility, for example, a report form that requests the practitioner to "certify" the subject matter. When reporting on the suitability of the design of an entity's internal control under section 205A, the practitioner's report should contain all of the report elements required by section 205A, which can be accomplished by either rewording the prescribed form of report or attaching an appropriately worded separate report in place of the prescribed form.¹³

.13 Question — An entity may be required to submit a practitioner's report about an entity's *ability* to establish suitably designed internal control (or its assertion thereon). May a practitioner issue such a report based on (a) the risk assessment procedures related to existing internal control that the auditor performs in an audit of an entity's financial statements or (b) the performance of an attestation engagement?

.14 Interpretation — No. Neither the risk assessment procedures the auditor performs in an audit of an entity's financial statements nor the performance of an attestation engagement provide the practitioner with a basis for issuing a report on the *ability* of an entity to establish suitably designed internal control. There are no suitable criteria for evaluating an entity's ability to establish suitably designed internal control. The requesting party may be willing to accept a report of the practitioner on a consulting service. The practitioner may include in the consulting service report

- a. a statement that the practitioner is unable to perform an attestation engagement that addresses the entity's ability to establish suitably designed internal control because there are no suitable criteria for evaluating the entity's ability to do so;
- b. a description of the nature and scope of the practitioner's services; and
- c. the practitioner's findings.

The practitioner may refer to the guidance in CS section 100, *Consulting Services: Definitions and Standards*.

[Issue Date: December 2008; Revised: December 2012; Revised: April 2016, effective for practitioners' reports dated on or after May 1, 2017.]

¹³ Paragraph .63–.66 of section 205A.

AT-C Section 206

Direct Examination Engagements

Source: SSAE No. 21.

Effective for practitioners' direct examination reports dated on or after June 15, 2022.

Introduction

.01 This section contains performance and reporting requirements and application guidance for direct examination engagements.

.02 In addition to complying with this section, a practitioner performing a direct examination engagement is required to comply with section 105, *Concepts Common to All Attestation Engagements*.^{*} This section addresses direct examination engagements in which the practitioner obtains reasonable assurance by measuring or evaluating the underlying subject matter against the criteria and performing other procedures to obtain sufficient appropriate evidence to express an opinion that conveys the results of that measurement or evaluation. In a direct examination engagement, the responsible party does not provide an assertion. (Ref: par. .A1–.A2)

Effective Date

.03 This section is effective for practitioners' direct examination reports dated on or after June 15, 2022.

Objectives

.04 In conducting a direct examination engagement, the objectives of the practitioner are to

- a. obtain reasonable assurance by measuring or evaluating the underlying subject matter against the criteria and performing other procedures to obtain sufficient appropriate evidence,
- b. express an opinion in a written report that conveys the results of the practitioner's measurement or evaluation, and
- c. communicate as required by this AT-C section, in accordance with the results of the practitioner's procedures.

Requirements

Requirements in AT-C Section 205 to Be Adapted to a Direct Examination Engagement and Requirements in This Section That Differ From and Replace Related Requirements in AT-C Section 205 or Are in Addition to Requirements in AT-C Section 205

.05 In performing a direct examination engagement, the practitioner is not required to request a written assertion from the responsible party.¹ However,

^{*} All AT-C sections can be found in AICPA *Professional Standards*.

¹ Paragraph .10 of section 205, *Assertion-Based Examination Engagements*.

the practitioner is required to apply the other requirements in section 205 to a direct examination engagement unless

- a. the requirement cannot be applied as written because of the nature of a direct examination engagement, in which case, the practitioner should adapt and apply the requirement (Ref: par. .A3–.A7)
- b. specified requirements in this section differ from and replace the related requirements in section 205. (These requirements are tailored to a direct examination engagement and identified in paragraph .06 of this section.) (Ref: par. .A8)

Requirements in This Section That Differ From and Replace Related Requirements in AT-C Section 205 or Are in Addition to Requirements in AT-C Section 205

.06 When the practitioner performs examination procedures that address the following aspects of a direct examination engagement, the practitioner should apply the requirements in the paragraphs identified in items *a–d*, which differ from and replace the related requirements in section 205 or are in addition to the requirements in section 205. (Ref: par. .A9)

- a. Matters relevant to accepting or continuing a direct examination engagement (paragraphs .07–.08)
- b. Terms of the engagement (paragraph .09)
- c. The written representations that a practitioner is required to request of the responsible party and of the engaging party when the engaging party is not the responsible party (paragraphs .10–.11)
- d. The required elements of the practitioner's direct examination report (paragraph .12)

Acceptance and Continuance

Determining Whether to Perform a Direct Examination Engagement

.07 Before accepting or continuing a direct examination engagement, the practitioner should obtain an understanding of the following matters through inquiries of the appropriate party: (Ref: par. .A10–.A14)

- a. The intended purpose of the engagement, how the practitioner's report will be used, and why the engaging party wishes to engage the practitioner to perform a direct examination engagement
- b. If the responsible party has not measured or evaluated the underlying subject matter against the criteria, why the responsible party has not done so
- c. If the responsible party has measured or evaluated the underlying subject matter against the criteria, why the responsible party does not intend to provide an assertion

.08 Based on the information obtained from the following, the practitioner should evaluate whether to perform a direct examination engagement:

- a. The inquiries in paragraph .07
- b. Previous engagements performed for the engaging party, if any
- c. Preliminary discussions with the engaging party, including discussion when agreeing upon the terms of the engagement

Terms of the Engagement

.09 Paragraph .07 of section 205 requires the practitioner to agree upon the terms of the engagement with the engaging party and that the agreement be in sufficient detail in an engagement letter or other suitable form of written agreement. In a direct examination engagement, the agreed-upon terms of the engagement should include the following: (Ref: par. .A15)

- a. The objective and scope of the engagement
- b. The responsibilities of the practitioner
- c. A statement that the engagement will be conducted in accordance with attestation standards established by the AICPA
- d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different, including the following: (Ref: par. .A16)
 - i. The responsible party is responsible for the underlying subject matter
 - ii. The responsible party or engaging party, as applicable, is responsible for the following:
 - (1) Selecting the criteria for the measurement, evaluation, or disclosure of the underlying subject matter (Ref: par. .A17)
 - (2) Determining that such criteria are suitable, will be available to the intended users, and are appropriate for the purpose of the engagement
- e. A statement about the inherent limitations of an examination engagement (Ref: par. .A18)
- f. Identification of the criteria for the measurement, evaluation, or disclosure of the underlying subject matter
- g. An acknowledgment that the engaging party agrees to provide the practitioner with a representation letter at the conclusion of the engagement

Written Representations

.10 The practitioner should request from the responsible party written representations in the form of a letter addressed to the practitioner. The representations should (Ref: par. .A19–.A20)

- a. state that all known matters contradicting the measurement or evaluation of the underlying subject matter or the subject matter information, and any communication from regulatory agencies or others affecting the underlying subject matter or subject matter information have been disclosed to the practitioner, including communications received between the end of the period addressed by the practitioner's report and the date of the practitioner's report.
- b. acknowledge responsibility for
 - i. the underlying subject matter;
 - ii. selecting the criteria, when applicable; (Ref: par. .A17) and
 - iii. determining that such criteria are suitable, will be available to the intended users, and are appropriate for the purpose of the engagement.

- c. state that the responsible party has disclosed to the practitioner
 - i. all deficiencies in internal control relevant to the underlying subject matter of which the responsible party is aware;
 - ii. its knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the underlying subject matter or subject matter information; and
 - iii. other matters as the practitioner deems appropriate
- d. state that any known events occurring subsequent to the period (or point in time) of the underlying subject matter or subject matter information being reported on that would have a material effect on the underlying subject matter or subject matter information have been disclosed to the practitioner. (Ref: par. .A21)
- e. state that it has provided the practitioner with all relevant information and access as agreed upon in the terms of the engagement.

.11 When the engaging party is not the responsible party, the practitioner should request written representations from the engaging party in addition to those requested from the responsible party, in the form of a letter addressed to the practitioner. The representations should

- a. acknowledge that the responsible party is responsible for the underlying subject matter.
- b. acknowledge the engaging party's responsibility for selecting the criteria, when applicable.
- c. acknowledge the engaging party's responsibility for determining that such criteria are suitable, will be available to the intended users, and are appropriate for the purpose of the engagement.
- d. state that the engaging party is not aware of any material misstatements in the underlying subject matter or subject matter information.
- e. state that the engaging party has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter information being reported on that would have a material effect on the subject matter information.
- f. address other matters as the practitioner deems appropriate.

Content of the Practitioner's Report

.12 The practitioner's report should include the following, unless the practitioner is disclaiming an opinion, in which case, items .12f–g should be omitted:

- a. A title that includes the word *independent*. (Ref: par. .A22)
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. An identification or description of the subject matter information being reported on, including the point in time or period of time to which the measurement or evaluation of the underlying subject matter against the criteria relates.

- d.* An identification of the criteria against which the underlying subject matter was measured or evaluated. (Ref: par. .A23)
- e.* An identification of (Ref: par. .A24)
 - i.* the responsible party and its responsibility for the underlying subject matter.
 - ii.* the practitioner's responsibility for
 - (1) measuring or evaluating the underlying subject matter against the criteria and performing other procedures,
 - (2) expressing an opinion that conveys the results of the practitioner's measurement or evaluation of the underlying subject matter against the criteria, based on the practitioner's examination, and
 - (3) presenting any subject matter information as part of the practitioner's measurement or evaluation, when applicable.
- f.* A statement that
 - i.* the practitioner's examination was conducted in accordance with attestation standards established by the AICPA.
 - ii.* those standards require that the practitioner obtain reasonable assurance by measuring or evaluating the underlying subject matter against the criteria and performing other procedures to obtain sufficient appropriate evidence to express an opinion that conveys the result of that measurement or evaluation.
 - iii.* the practitioner believes the evidence the practitioner obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.
- g.* A description of the nature of a direct examination engagement. (Ref: par. .A25–.A26)
- h.* A statement that the practitioner is required to be independent and to meet the practitioner's other ethical responsibilities in accordance with relevant ethical requirements related to the examination engagement. (Ref: par. .A27–.A28)
- i.* A statement that describes significant inherent limitations, if any, associated with the measurement or evaluation of the underlying subject matter against the criteria. (Ref: par. .A29)
- j.* The practitioner's opinion conveying the results of the practitioner's measurement or evaluation of the underlying subject matter against the criteria (Ref: par. .A30–.A32)
- k.* The manual or printed signature of the practitioner's firm.
- l.* The city and state where the practitioner's report is issued. (Ref: par. .A33)
- m.* The date of the report. (The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate evidence on which to base the practitioner's opinion, including evidence that

- i. the attestation documentation has been reviewed, and
- ii. if applicable, the written presentation of the subject matter information has been prepared. [Ref par. .A34–.A35])

Application and Other Explanatory Material

Introduction (Ref: par. .01–.02)

.A1 The practitioner's objective in a direct examination engagement is to obtain reasonable assurance, just as it is in an assertion-based examination engagement.

.A2 This section is not applicable to examination engagements related to subject matter for which other AT-C sections require the application of section 205, *Assertion-Based Examination Engagements*. Those sections are as follows: (Ref: par. .02)

- a. AT-C section 305, *Prospective Financial Information*
- b. AT-C section 310, *Reporting on Pro Forma Financial Information*
- c. AT-C section 315, *Compliance Attestation*
- d. AT-C section 320, *Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*
- e. AT-C section 395, *Management's Discussion and Analysis*

Requirements in AT-C Section 205 to Be Adapted to a Direct Examination Engagement and Requirements in This Section That Differ From and Replace Related Requirements in AT-C Section 205 or Are in Addition to Requirements in AT-C Section 205 (Ref: par. .05 and .06)

.A3 In a direct examination engagement, obtaining reasonable assurance is the benchmark the practitioner uses for determining how and the extent to which section 205 may need to be adapted.

.A4 The nature of a direct examination engagement is one in which the responsible party does not provide an assertion, and the extent to which the responsible party has measured or evaluated the underlying subject matter against the criteria may vary.

.A5 An example of a requirement in section 205 that the practitioner may be unable to apply, as written, is the requirement in paragraph .30a of section 205 to evaluate whether the responsible party has appropriately applied the requirements of the criteria to any estimated amounts. In a direct examination engagement, the responsible party may not have fully applied the criteria to the underlying subject matter to develop the estimate. Therefore, the practitioner would be unable to evaluate the responsible party's method for making the estimate. However, the practitioner might adapt the requirement by determining the method used by other entities in the same industry to make the estimate and then using that method in developing the estimate.

.A6 Although the practitioner could not evaluate the appropriateness of the responsible party's method for making the estimate, as required by section 205, the practitioner, as part of developing the estimate, would be able to perform other procedures that are relevant to making the estimate, such as obtaining an understanding of

- how the responsible party's information system captures and records data and other information that provides a basis for the estimate (that is, underlying subject matter).
- the relevant controls over that data and other information.
- the factors both internal and external to the entity that affect the estimate.

Obtaining an understanding of these matters also assists the practitioner in determining the appropriate method to use for making the estimate, assessing the accuracy and completeness of the data, and considering other relevant information to be used in developing the estimate.

.A7 Paragraph .13 of section 205 requires the practitioner to develop a plan that includes a description of the

- nature, timing, and extent of planned risk assessment procedures and further procedures.
- other planned procedures that are required to be carried out so that the engagement complies with the attestation standards.

Applying paragraph .13 to a direct examination engagement may increase the extent or change the nature of the work the practitioner needs to perform because in a direct examination engagement the practitioner measures or evaluates the underlying subject matter against the criteria and performs other procedures to obtain reasonable assurance. In an assertion-based examination engagement, the practitioner tests subject matter information prepared by the responsible party. Also, in a direct examination engagement, risk assessment procedures may primarily address

- the accuracy and completeness of the underlying subject matter,
- the practitioner's competence and experience with the underlying subject matter and criteria, and
- the complexity of the measurement or evaluation of the underlying subject matter against the criteria.

.A8 To provide context for the requirements identified in this section or to present a complete list of requirements for a particular aspect of a direct examination engagement, some paragraphs in this section repeat requirements that are the same as those for an assertion-based examination engagement. (Ref: par. .05b)

Requirements in This Section That Differ From and Replace Related Requirements in AT-C Section 205 or Are in Addition to Requirements in AT-C Section 205 (Ref: par. .06)

.A9 The following table identifies paragraphs in this section that contain requirements that differ from and replace related requirements in section 205 or are in addition to the requirements in section 205:

<i>Aspect of a Direct Examination</i>	<i>Paragraphs in AT-C Section 206 That Contain Requirements That Differ From and Replace Related Requirements in AT-C Section 205 or Are in Addition to Requirements in AT-C Section 205</i>	<i>Paragraphs in AT-C Section 205 That Are Replaced by Paragraphs in AT-C Section 206</i>
Acceptance or Continuance	.07–.08	
Terms of the Engagement	.09	.08
Written Representations	.10–.11	.51 and .53
Required Elements of the Report	.12	.63

Acceptance and Continuance (Ref: par. .07–.08)

Determining Whether to Perform a Direct Examination Engagement

.A10 In some cases, the responsible party may be unable to provide a written assertion because the entity does not have the personnel or systems needed to establish a reasonable basis for such an assertion. In other cases, the responsible party may simply wish to engage the practitioner to measure or evaluate the underlying subject matter against the criteria, or an engaging party other than the responsible party may engage the practitioner to do so.

.A11 In determining whether to accept or continue a direct examination engagement, the practitioner may inquire whether the responsible party is required by law, regulation, or contract to measure or evaluate the underlying subject matter against the criteria or provide a written assertion regarding the outcome of that measurement or evaluation.

.A12 If the responsible party states that it has measured or evaluated the underlying subject matter against the criteria, the practitioner may request the results of that measurement or evaluation.

.A13 The responsible party may not intend to provide an assertion because, for example, the responsible party performed only a partial measurement or evaluation of the underlying subject matter but not to an extent that would provide a reasonable basis for an assertion.

.A14 A practitioner may be requested to change an assertion-based examination engagement, in accordance with section 205, to a direct examination engagement. A change from an assertion-based examination engagement to a direct examination engagement would not be considered a change to a lower level of service as described in paragraph .32 of section 105 because both services entail obtaining reasonable assurance and result in an examination report.

Terms of the Engagement (Ref: par. .09)

.A15 A practitioner may further describe the terms of the engagement by adding the following items to the engagement letter or other suitable form of written agreement:

- a. A statement that a direct examination is designed to obtain reasonable assurance about whether the subject matter information is free from material misstatement
- b. A statement that the objective of a direct examination is
 - i. to obtain reasonable assurance by measuring or evaluating the underlying subject matter against the criteria and performing other procedures to obtain sufficient appropriate evidence
 - ii. to express an opinion in a written practitioner's report that conveys the results of the practitioner's measurement or evaluation of the underlying subject matter against the criteria

.A16 Situations may exist in which the responsible party is not the engaging party and, as such, the responsibilities of each party may differ. For example, when the responsible party is not the engaging party, the engaging party, rather than the responsible party, may be responsible for selecting the criteria.

.A17 The engaging party may request that the practitioner recommend, develop, or assist in developing the criteria for the engagement. Regardless of whether the practitioner recommends, develops, or assists in developing the criteria for the engagement, the engaging party is required to determine that the criteria are suitable, will be available to the intended users, and are appropriate for the purpose of the engagement.

.A18 If relevant, a statement about the inherent limitations of an examination engagement may indicate that "because of the inherent limitations of an examination engagement, together with the inherent limitations of internal control, an unavoidable risk exists that some material misstatements may not be detected, even though the examination is properly planned and performed in accordance with the attestation standards."

Written Representations (Ref: par. .10)

.A19 Written confirmation of oral representations reduces the possibility of misunderstandings between the practitioner and the responsible party. The person from whom the practitioner requests written representations is ordinarily a member of senior management or those charged with governance depending on, for example, the management and governance structure of the responsible party, which may vary by entity, reflecting influences such as size and ownership characteristics.

.A20 Representations by the responsible party cannot replace other evidence the practitioner could reasonably expect to be available. Although written representations provide evidence, they do not provide sufficient appropriate evidence on their own about any of the matters with which they deal. Furthermore, the fact that the practitioner has received reliable written representations does not affect the nature or extent of other evidence that the practitioner obtains.

.A21 A discussion of what is considered a material effect on the underlying subject matter or subject matter information may be included explicitly in the representation letter in qualitative or quantitative terms.

Content of the Practitioner's Report

Title (Ref: par. .12a)

.A22 A title indicating that the practitioner's report is the report of an independent practitioner (for example, "Independent Practitioner's Report," "Report of Independent Certified Public Accountant," or "Independent Accountant's Report") affirms that the practitioner has met all the relevant ethical requirements regarding independence and, therefore, distinguishes the independent practitioner's report from reports issued by others.

Criteria (Ref: par. .12d)

.A23 The practitioner's report may include the criteria or refer to them if they are included in the subject matter information or are otherwise readily available. It may be relevant in the circumstances to disclose the source of the criteria or the relevant matters discussed in paragraph .A86 of section 205.

Relevant Responsibilities (Ref: par. .12e)

.A24 Identifying relative responsibilities informs the intended users that the responsible party is responsible for the underlying subject matter, and the practitioner's role is to obtain reasonable assurance by measuring or evaluating the underlying subject matter against the criteria, and performing other procedures to obtain sufficient appropriate evidence to express an opinion that conveys the results of that measurement or evaluation.

Description of the Nature of a Direct Examination Engagement (Ref: par. .12g)

.A25 A description of the nature of a direct examination engagement may state, for example, that

- a direct examination involves measuring or evaluating the underlying subject matter against the criteria and performing other procedures to obtain sufficient appropriate evidence.
- in making an assessment of the risks of material misstatement, the practitioner considered and obtained an understanding of internal control relevant to the underlying subject matter in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. Accordingly, no such opinion is expressed.
- the nature, timing, and extent of the procedures selected depend on the practitioner's judgment, including an assessment of the risks of material misstatement of the subject matter information, whether due to fraud or error.

.A26 A practitioner may be requested to provide in a separate section of the practitioner's report a description of the procedures performed and the results thereof in support of the practitioner's opinion. The following factors are relevant when determining whether to include such a description in the report:

- Whether such a description is likely to overshadow the practitioner's overall opinion or cause report users to misunderstand the opinion
- Whether the parties making the request have an appropriate business need or reasonable basis for requesting the information (for example, the specified parties are required to maintain and

monitor controls that either encompass or are dependent on controls that are the subject of a direct examination and, therefore, need information about the tests of controls to enable them to have a basis for concluding that they have met the requirements applicable to them)

- Whether the parties have an understanding of the nature and underlying subject matter of the engagement and experience in using the information in such reports

Relevant Ethical Requirements (Ref: par. .12h)

.A27 Relevant ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive. When the AICPA Code of Professional Conduct applies, the practitioner's other ethical responsibilities relate to the "Principles of Professional Conduct" (ET sec. 0.300).²

.A28 Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. When independence and other relevant ethical requirements are contained in a limited number of sources, the practitioner may choose to name the relevant sources (for example, the name of the code, rule, or applicable regulation, or *Government Auditing Standards* promulgated by the Comptroller General of the United States, or may refer to a term that appropriately describes those sources.

Inherent Limitations (Ref: par. .12i)

.A29 When not explicitly required by an AT-C section, identification in the report of inherent limitations is based on the practitioner's judgment.

Opinion (Ref: par. .12j)

.A30 The following are examples of language the practitioner may use in the opinion to convey the results of the practitioner's measurement or evaluation of the underlying subject matter against the criteria, as required by paragraph .12j:

- The underlying subject matter is presented in accordance with (or based on) the criteria, in all material respects.
- The subject matter information is free from material misstatement based on the criteria.
- The subject matter information is presented fairly, in all material respects, based on the criteria. (The practitioner's professional judgment concerning the fairness of the presentation of the subject matter information relates to whether the measurement, recognition, presentation, and disclosure of all material items in the presentation of the subject matter achieve fair presentation.)

.A31 A single practitioner's report may cover more than one aspect of subject matter information. When that is the case, the report may contain separate opinions or conclusions on each aspect of the subject matter information.

.A32 A practitioner may report on subject matter information at multiple dates or covering multiple periods during which criteria have changed (for example, a practitioner's report on comparative information). Criteria are clearly

² All ET sections can be found in AICPA *Professional Standards*.

described when they identify the criteria for each period and how the criteria have changed from one period to the next. If the criteria for the current date or period have changed from the criteria for a preceding date or period, changes in the criteria may be significant to users of the report. If so, the criteria and the fact that they have changed may be disclosed in the presentation of the subject matter information, or in the report, even if the subject matter for the preceding date or period is not presented.

Location (Ref: par. .12l)

.A33 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country.

Date (Ref: par. .12m)

.A34 Including the date of the practitioner's report informs the intended users that the practitioner has considered the effect of the events that occurred up to that date on the subject matter information and the report.

.A35 The practitioner is not in a position to conclude that sufficient appropriate evidence has been obtained until evidence is obtained that all the elements that the subject matter information comprises, including any related notes, when applicable, have been prepared.

.A36

Exhibit — Illustrative Direct Examination Reports

The illustrative practitioner's direct examination reports in this exhibit meet the applicable reporting requirements in paragraph .12 of this section. A practitioner may use alternative language in drafting a direct examination report, provided that the language meets the applicable requirements in paragraph .12 of this section.

Example 1

Circumstances include the following:

The practitioner was engaged to

- measure the rates of return (subject matter information) on XYZ Company's investment transactions during the year ended December 31, 20XX (the underlying subject matter) based on specified criteria
- present the rates of return on the investment transactions in a schedule of investment returns (subject matter information).

Independent Accountant's Report

[Appropriate Addressee]

We have examined¹ *[identify the underlying subject matter, for example, the investment transactions of XYZ Company during the year ended December 31, 20XX]*. XYZ Company's management is responsible for *[identify the underlying subject matter, for example, its investment transactions during the year ended December 31, 20XX]* and maintaining a record of those transactions. Our responsibility is to obtain reasonable assurance by measuring (or evaluating) *[identify the underlying subject matter, for example, the investment transactions of XYZ Company during the year ended December 31, 20XX]* against *[identify the criteria, for example, the ABC criteria set forth in Note 1 of the accompanying schedule of investment returns]* to determine *[identify the subject matter information, for example, the rates of return on those investment transactions]* and performing other procedures to obtain sufficient appropriate evidence to express an opinion that conveys the results of our measurement (or evaluation) based on our examination. We have presented the results of our measurement in the accompanying schedule of investment returns.

Our examination was conducted in accordance with the attestation standards for a direct examination engagement established by the AICPA. Those standards require that we obtain reasonable assurance by measuring (or evaluating) *[identify the underlying subject matter, for example, the investment transactions of XYZ Company during the year ended December 31, 20XX]* against *[identify the criteria, for example, the ABC criteria set forth in Note 1 of the accompanying schedule of investment returns]* and performing other procedures to obtain sufficient appropriate evidence to express an opinion that conveys the results of our measurement or evaluation of *[identify the underlying subject matter, for example, the investment transactions of XYZ Company during the year ended December 31, 20XX]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of *[identify the subject matter information, for example,*

¹ The practitioner may revise the first sentence of the report to read "We have directly examined ..." or "We have performed a direct examination of ..." or similar.

the rates of return on those investment transactions for the year ended December 31, 20XX, as presented in the schedule of investment returns], whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent of *[identify the responsible party, for example, XYZ Company]* and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our examination engagement.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the underlying subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement, the underlying subject matter, or the subject matter information.]

In our opinion, *[identify the subject matter information, for example, the rates of return on the investment transactions of XYZ Company during the year ended December 31, 20XX included in the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX,]* are fairly presented in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*, in all material respects.

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

Example 2

Circumstances include the following:

The practitioner was engaged to

- evaluate a daycare center's safety practices during the year ended December 31, 20XX, and implementation of those practices (the underlying subject matter) based on criteria established by an educational organization.
- express an opinion (subject matter information) about whether the daycare center's safety practices and implementation of those practices were in accordance with the criteria.

Independent Accountant's Report

[Appropriate Addressee]

We have examined ¹ *[identify the underlying subject matter, for example, Indulgent Daycare Center's safety practices and its implementation of those practices during the year ended December 31, 20XX]*. Indulgent Daycare Center's management is responsible for *[identify the underlying subject matter, for example, its safety practices and its implementation of those practices]*. Our responsibility is to obtain reasonable assurance by measuring (or evaluating) *[identify the underlying subject matter, for example, Indulgent Daycare Center's safety practices and its implementation of those practices during the year ended December 31, 20XX]* against *[identify the criteria, for example, XYZ Educator's Best Safety Practices for Daycare Centers]* and performing other procedures to obtain sufficient appropriate evidence to express an opinion that conveys the results of our measurement (or evaluation) based on our examination.

¹ The practitioner may revise the first sentence of the report to read "We have directly examined ..." or "We have performed a direct examination of ..." or similar.

Our examination was conducted in accordance with the attestation standards for a direct examination engagement established by the AICPA. Those standards require that we obtain reasonable assurance by measuring (or evaluating) *[identify the underlying subject matter, for example, Indulgent Daycare Center's safety practices and its implementation of those practices during the year ended December 31, 20XX]* against *[identify the criteria, for example, XYZ Educator's Best Safety Practices for Daycare Centers]* and performing other procedures to obtain sufficient appropriate evidence to express an opinion that conveys the results of our measurement or evaluation of *[identify the underlying subject matter, for example, Indulgent Daycare Center's safety practices and its implementation of those practices during the year ended December 31, 20XX]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks that *[identify the underlying subject matter, for example, Indulgent Daycare Center's safety practices and its implementation of those practices]* were not in accordance with *[identify the criteria, for example, XYZ Educator's Best Safety Practices for Daycare Centers]* in all material respects, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent of *[identify the responsible party, for example, Indulgent Daycare Center]*, and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our examination engagement.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the underlying subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement, the underlying subject matter, or the subject matter information.]

In our opinion, *[identify the underlying subject matter, for example, Indulgent Daycare Center's safety practices and its implementation of those practices during the year ended December 31, 20XX]*, were in accordance with (or based on) *[identify the criteria, for example, XYZ Educator's Best Safety Practices for Daycare Centers]*, in all material respects.

[Date of the practitioner's report]

AT-C Section 210

Review Engagements

(Supersedes SSAE No. 18 section 210.)

Source: SSAE No. 22.

Effective for practitioners' review reports dated on or after June 15, 2022.

Introduction

.01 This section contains performance and reporting requirements and application guidance for review engagements performed in accordance with the attestation standards. The requirements and guidance in this section supplement the requirements and guidance in section 105, *Concepts Common to All Attestation Engagements*. For purposes of applying this section, the term *subject matter* encompasses the terms *underlying subject matter* and *subject matter information*, as defined in section 105. If only one of these terms is applicable, that term is used.

Effective Date

.02 This section is effective for practitioners' review reports dated on or after June 15, 2022. Early implementation is permitted only if the practitioner also implements early the amendments to section 105 included in Statement on Standards for Attestation Engagements (SSAE) No. 21, *Direct Examination Engagements*.

Objectives

.03 In conducting a review engagement, the objectives of the practitioner are to do the following:

- a. Obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria
- b. Express a conclusion in a written report about whether, based on the procedures performed and the review evidence obtained, the practitioner is aware of any material modifications that should be made to
 - i. the subject matter in order for it to be in accordance with (or based on) the criteria or
 - ii. the responsible party's assertion in order for it to be fairly stated
- c. Communicate further as required by relevant AT-C sections

Definitions

.04 For purposes of this section, the following terms have the meanings attributed as follows:

Appropriateness of review evidence. The measure of the quality of review evidence, that is, its relevancy and reliability in providing support for the practitioner's conclusion.

Modified conclusion. A qualified or an adverse conclusion.

Review evidence. Information used by the practitioner in obtaining limited assurance on which the practitioner's conclusion is based.

Sufficiency of review evidence. The measure of the quantity of review evidence. The quantity of the review evidence needed is affected by the risks of material misstatement and also by the quality of such evidence.

Requirements

Conduct of a Review Engagement

.05 In performing a review engagement, the practitioner should comply with this section, section 105, and any subject-matter AT-C section that is relevant to the engagement. A subject-matter AT-C section is relevant to the engagement when it is in effect, and the circumstances addressed by the AT-C section exist. (Ref: par. .A1)

.06 The practitioner should consider whether the nature of the procedures to be performed would enable the practitioner to obtain sufficient appropriate review evidence to obtain limited assurance.

.07 A practitioner should not perform a review of

- a. prospective financial information,
- b. internal control, or
- c. compliance with requirements of specified laws, regulations, rules, contracts, or grants.

Agreeing on the Terms of the Engagement

.08 The practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. (Ref: par. .A2)

.09 The agreed-upon terms of the engagement should include the following:

- a. The objective and scope of the engagement
- b. The responsibilities of the practitioner (Ref: par. .A3)
- c. A statement that the engagement will be conducted in accordance with attestation standards established by the AICPA
- d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different (Ref: par. .A4–.A5)
- e. A statement that the procedures performed in a review vary in nature and timing from, and are substantially less in extent than, an examination and, consequently, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed (Ref: par. .A6)

- f.* Identification of the criteria for the measurement, evaluation, or disclosure of the subject matter
- g.* An acknowledgement that the engaging party agrees to provide the practitioner with a representation letter at the conclusion of the engagement

.10 Although an engagement may recur, each engagement is considered a separate engagement. The practitioner should assess whether circumstances require revision to the terms of a preceding engagement. If the practitioner concludes that the terms of the preceding engagement need not be revised for the current engagement, the practitioner should remind the engaging party of the terms of the current engagement, and the reminder should be documented.

Requesting a Written Assertion

.11 The practitioner should request from the responsible party a written assertion about the measurement or evaluation of the underlying subject matter against the criteria. The practitioner should use professional judgment in determining whether management has a reasonable basis for making its assertion. When the engaging party is the responsible party and refuses to provide a written assertion, paragraph .61 requires the practitioner to withdraw from the engagement, when withdrawal is possible under applicable law or regulation. When the engaging party is not the responsible party, and the responsible party refuses to provide a written assertion, the practitioner need not withdraw from the engagement. In that case, paragraph .62 requires the practitioner to disclose that refusal in the practitioner's report and restrict the use of the report to the engaging party. (Ref: par. .A7–.A11 and .A88)

Planning and Performing the Engagement

.12 The practitioner should establish an overall engagement strategy that sets the scope, timing, and direction of the engagement and determine the nature, timing, and extent of the procedures that are necessary to achieve the objectives of the engagement. The practitioner should exercise professional judgment in selecting and applying procedures to obtain sufficient appropriate review evidence that provides a reasonable basis for the practitioner's conclusion. (Ref: par. .A12–.A15)

.13 The practitioner should obtain an understanding of the subject matter and other engagement circumstances sufficient to do the following: (Ref: par. .A16)

- a.* Enable the practitioner to identify areas in which a material misstatement is likely to arise (Ref: par. .A17)
- b.* Provide a basis for designing and performing procedures to address the areas identified in item (*a*) and to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria, or the assertion, in order for it to be fairly stated

.14 The practitioner should make inquiries of the responsible party regarding

- a.* whether the responsible party has an internal audit function. If the responsible party has an internal audit function, the practitioner should make further inquiries to obtain an understanding

of the activities and main findings of the internal audit function with respect to the subject matter.

- b. whether the responsible party has used any specialists in the preparation of the subject matter.

Materiality in Planning and Performing the Engagement

.15 The practitioner should consider materiality when establishing the overall engagement strategy, determining the nature, timing, and extent of procedures, and evaluating whether the practitioner is aware of any material modifications that should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or the assertion in order for it to be fairly stated. (Ref: par. .A18–.A24)

.16 The practitioner should reconsider materiality for the subject matter if the practitioner becomes aware of information during the engagement that would have caused the practitioner to have initially determined a different materiality.

Procedures to Be Performed to Obtain Limited Assurance

.17 To obtain limited assurance, the practitioner should obtain sufficient appropriate review evidence to reduce attestation risk to a level that is acceptable in the circumstances of the engagement as a basis for expressing a conclusion about whether the practitioner is aware of any material modifications that should be made to the subject matter in order for it to be in accordance with (or based on) the criteria, or the assertion, in order for it to be fairly stated.

.18 Based on the practitioner's understanding obtained pursuant to paragraph .13, the practitioner should design and perform procedures to obtain limited assurance to support the practitioner's conclusion. In doing so, the practitioner should identify and place increased focus on those areas in which the practitioner believes there are increased risks that the subject matter may be materially misstated. Inquiry procedures alone are not sufficient to obtain limited assurance. (Ref: par. .A25–.A30)

Analytical Procedures

.19 If designing and performing analytical procedures to obtain limited assurance, the practitioner should do the following: (Ref: par. .A31–.A32)

- a. Determine the suitability of particular analytical procedures for the subject matter, taking into account the practitioner's awareness of risks
- b. Evaluate the reliability of data from which the practitioner's expectation is developed, taking into account the source, comparability, nature, and relevance of information available
- c. Develop an expectation with respect to recorded amounts or ratios

.20 If analytical procedures identify fluctuations or relationships that are inconsistent with other relevant information or that differ significantly from expected amounts or ratios, the practitioner should do the following: (Ref: par. .A33)

- a. Inquire of the responsible party about such differences
- b. Consider the responses to these inquiries to determine whether other procedures are necessary in the circumstances

Inquiries

.21 The practitioner should inquire of the responsible party about the following:

- a. Whether the subject matter has been prepared in accordance with (or based on) the criteria
- b. The practices used by the responsible party to measure, recognize, and record the subject matter
- c. Questions that have arisen in the course of applying the procedures
- d. Communications from regulatory agencies or others, if relevant

.22 The practitioner should consider the reasonableness and consistency of the responsible party's responses in light of the results of other procedures and the practitioner's knowledge of the subject matter, criteria, and responsible party.

Fraud, Laws, and Regulations

.23 The practitioner should make inquiries of the appropriate party to determine whether the party has knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter.

.24 The practitioner should respond appropriately to fraud or suspected fraud and noncompliance or suspected noncompliance with laws or regulations affecting the subject matter that is identified during the engagement. (Ref: par. .A34–.A35)

Incorrect, Incomplete, or Otherwise Unsatisfactory Information

.25 During the performance of procedures, if the practitioner becomes aware that information coming to the practitioner's attention is incorrect, incomplete, or otherwise unsatisfactory, the practitioner should request that the responsible party consider the effect of these matters on the subject matter and communicate the results of its consideration to the practitioner. The practitioner should consider the results communicated to the practitioner by the responsible party and the potential effect, if any, on the practitioner's report.

.26 If the practitioner believes the subject matter may be materially misstated, the practitioner should perform additional procedures sufficient to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or the assertion in order for it to be fairly stated.

Using the Work of a Practitioner's Specialist or Internal Auditors

.27 When the practitioner expects to use the work of a practitioner's specialist or internal auditors, the practitioner should apply the requirements in section 205, *Assertion-Based Examination Engagements*, and the related application guidance, as appropriate, for a review engagement.¹

Evaluating the Results of Procedures

.28 The practitioner should accumulate misstatements identified during the engagement, other than those that are clearly trivial. (Ref: par. .A36–.A37)

¹ Paragraphs .37–.45 of section 205, *Assertion-Based Examination Engagements*.

.29 The practitioner should evaluate whether sufficient appropriate review evidence has been obtained from the procedures performed and, if not, the practitioner should perform additional procedures based on the practitioner's professional judgment to be necessary in the circumstances to be able to form a conclusion on the subject matter. (Ref: par. .A38–.A40)

.30 If the practitioner is unable to obtain sufficient appropriate review evidence, a scope limitation exists, and paragraph .60 applies.

Considering Subsequent Events and Subsequently Discovered Facts

.31 The practitioner should inquire whether the responsible party, and if different, the engaging party, is aware of any events subsequent to the period (or point in time) covered by the review engagement up to the date of the practitioner's report that could have a significant effect on the subject matter or assertion. If so, the practitioner should apply other appropriate procedures to obtain review evidence regarding such events. If the practitioner becomes aware, through inquiry or otherwise, of such an event, or any other event that is of such a nature and significance that its disclosure is necessary to prevent users of the report from being misled, and information about that event is not adequately disclosed by the responsible party in the subject matter or in its assertion, the practitioner should take appropriate action. (Ref: par. .A41–.A43)

.32 The practitioner has no responsibility to perform any procedures regarding the subject matter or assertion after the date of the practitioner's report. Nevertheless, the practitioner should respond appropriately to facts that become known to the practitioner after the date of the report that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. (Ref: par. .A44–.A45)

Written Representations

.33 The practitioner should request from the responsible party written representations in the form of a letter addressed to the practitioner. The representations should do the following: (Ref: par. .A46–.A49)

- a. Include the responsible party's assertion about the subject matter based on the criteria (Ref: par. .A88)
- b. State that all relevant matters are reflected in the measurement or evaluation of the subject matter or assertion
- c. State that all known matters contradicting the subject matter or assertion and any communication from regulatory agencies or others affecting the subject matter or assertion have been disclosed to the practitioner, including communications received between the end of the period addressed in the written assertion and the date of the practitioner's report
- d. Acknowledge responsibility for
 - i. the subject matter and the responsible party's assertion;
 - ii. selecting the criteria, when applicable; and
 - iii. determining that such criteria are suitable, will be available to the intended users, and appropriate for the purpose of the engagement

- e. State that the responsible party has disclosed to the practitioner
 - i. all deficiencies in internal control relevant to the engagement of which the responsible party is aware;
 - ii. its knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter; and
 - iii. other matters as the practitioner deems appropriate
- f. State that any known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion have been disclosed to the practitioner (Ref: par. .A48)
- g. State that the responsible party has provided the practitioner with all relevant information and access, as agreed upon in the terms of the engagement
- h. If applicable, state that the responsible party believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the subject matter (Ref: par. .A48–.A49)
- i. If applicable, state that significant assumptions used in making any material estimates are reasonable

.34 When the engaging party is not the responsible party, and the responsible party refuses to provide the representations in paragraph .33 in writing, the practitioner should make inquiries of the responsible party about, and seek oral responses to, the matters in paragraph .33. (Ref: par. .A50)

.35 When the engaging party is not the responsible party, the practitioner should request written representations from the engaging party, in addition to those requested from the responsible party, in the form of a letter addressed to the practitioner. The representations should do the following:

- a. Acknowledge that the responsible party is responsible for the subject matter being in accordance with the criteria and for its assertion
- b. Acknowledge the engaging party's responsibility for selecting the criteria
- c. Acknowledge the engaging party's responsibility for determining that such criteria are suitable, will be available to the intended users, and are appropriate for the purposes of the engagement
- d. State that the engaging party is not aware of any material misstatements in the subject matter information or assertion
- e. State that the engaging party has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion (Ref: par. .A42)
- f. Address other matters as the practitioner deems appropriate

.36 When written representations are directly related to matters that are material to the subject matter, the practitioner should

- a. evaluate their reasonableness and consistency with other review evidence obtained, including other representations (oral or written), and
- b. consider whether those making the representations can be expected to be well-informed on the particular matters.

.37 The date of the written representations should be as of the date of the practitioner's report. The written representations should address the subject matter and periods covered by the practitioner's conclusion.

Requested Written Representations Not Provided or Not Reliable

.38 When the engaging party is the responsible party, and one or more of the requested written representations are not provided, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should do the following (Ref: par. .A51–.A52)

- a. Discuss the matter with the appropriate party.
- b. Reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and review evidence in general.
- c. If any of the matters are not resolved to the practitioner's satisfaction, take appropriate action, including determining the possible effect on the practitioner's conclusion.

.39 When the engaging party is not the responsible party (Ref: par. .A53–.A55)

- a. if one or more of the requested representations are not provided in writing by the responsible party, but the practitioner receives satisfactory oral responses to the practitioner's inquiries performed in accordance with paragraph .34 sufficient to enable the practitioner to conclude that the practitioner has sufficient appropriate review evidence to form a conclusion about the subject matter, the practitioner's report should contain a separate paragraph that restricts the use of the practitioner's report to the engaging party. (Paragraphs .47–.48 contain requirements for the contents of such a paragraph.)
- b. if one or more of the requested representations are provided neither in writing nor orally from the responsible party in accordance with paragraph .34, a scope limitation exists, and paragraph .60 applies.

Other Information

.40 If prior to or after the release of the practitioner's report on subject matter or an assertion the practitioner is willing to permit the inclusion of the practitioner's report in a document that contains the subject matter or assertion and other information, the practitioner should read the other information to identify material inconsistencies, if any, with the subject matter, assertion, or the report. If upon reading the other information, in the practitioner's professional judgment either of the following applies, the practitioner should discuss the matter with the appropriate party and take further action, as appropriate: (Ref: par. .A56–.A57)

- a. A material inconsistency between that other information and the subject matter, assertion, or report exists.
- b. A material misstatement of fact exists in the other information, the subject matter, assertion, or the report.

Description of Criteria

.41 The practitioner should evaluate whether the written description of the subject matter or assertion adequately refers to or describes the criteria. (Ref: par. .A58–.A59)

Forming the Conclusion

.42 The practitioner should form a conclusion about whether the practitioner is aware of any material modifications that should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or to the responsible party's assertion in order for it to be fairly stated. In forming that conclusion, the practitioner should evaluate

- a. the sufficiency and appropriateness of the review evidence obtained and (Ref: par. .A60)
- b. whether uncorrected misstatements are material, individually or in the aggregate. (Ref: par. .A61)

.43 The practitioner should evaluate, based on the review evidence obtained, whether the presentation of the subject matter or assertion is misleading within the context of the engagement. (Ref: par. .A62–.A63)

Preparing the Practitioner's Report

.44 The practitioner's report should be in writing. (Ref: par. .A64–.A67)

Content of the Practitioner's Report

.45 The practitioner's report should include the following:

- a. A title that includes the word *independent*. (Ref: par. .A68)
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. An identification or description of the subject matter or assertion being reported on, including the point in time or period of time to which the measurement or evaluation of the subject matter or assertion relates.
- d. An identification of the criteria against which the subject matter was measured or evaluated. (Ref: par. .A69)
- e. A statement that identifies the responsible party and its responsibility for the subject matter being in accordance with (or based on) the criteria or for its assertion. (Ref: par. .A70–.A71)
- f. A statement that the practitioner's responsibility is to express a conclusion on the subject matter or assertion based on the practitioner's review.
- g. A statement that
 - i. the practitioner's review was conducted in accordance with attestation standards established by the AICPA. (Ref: par. .A72–.A73).
 - ii. those standards require that the practitioner plan and perform the review to obtain limited assurance about whether any material modifications should be made to

- (1) the subject matter in order for it to be in accordance with (or based on) the criteria (or equivalent language regarding the subject matter and criteria, such as the language used in the examples in paragraph .A74) or
 - (2) the responsible party's assertion in order for it to be fairly stated.
 - iii. the practitioner believes the review evidence the practitioner obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's conclusion.
- h. A statement that the procedures performed in a review vary in nature and timing from, and are substantially less in extent than, an examination, the objective of which is to obtain reasonable assurance about whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or the responsible party's assertion is fairly stated, in all material respects, in order to express an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed.
- i. A statement that the practitioner is required to be independent and to meet the practitioner's other ethical responsibilities in accordance with relevant ethical requirements relating to the review engagement. (Ref: par. .A74–.A75)
- j. A statement that describes significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A76)
- k. A description of the work performed as a basis for the practitioner's conclusion. (Ref: par. .A77–.A78)
- l. The practitioner's conclusion about whether, based on the review, the practitioner is aware of any material modifications that should be made to (Ref: par. .A79–.A81)
 - i. the subject matter in order for it be in accordance with (or based on) the criteria or
 - ii. the responsible party's assertion in order for it to be fairly stated.
- m. The manual or printed signature of the practitioner's firm.
- n. The city and state where the practitioner's report is issued. (Ref: par. .A82)
- o. The date of the report. The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate review evidence on which to base the practitioner's conclusion, including review evidence that (Ref: par. .A83–.A84)
 - i. the attestation documentation has been reviewed,
 - ii. if applicable, the written presentation of the subject matter has been prepared, and
 - iii. the responsible party has provided a written assertion or, in the circumstance described in paragraph .A55, an oral assertion.

Restricted-Use Paragraph

.46 In the following circumstances, the practitioner's report should include an alert, in a separate paragraph, that restricts the use of the report: (Ref: par. .A85–.A87)

- a. The practitioner determines that the criteria used to evaluate the subject matter are appropriate only for a limited number of parties who either participated in their establishment or can be presumed to have an adequate understanding of the criteria.
- b. The criteria used to evaluate the subject matter are available only to specified parties.
- c. The engaging party is not the responsible party, and the responsible party does not provide the written representations required by paragraph .33 but does provide oral responses to the practitioner's inquiries about the matters in paragraph .33, as provided for in paragraphs .34 and .39a. In this case, use of the report should be restricted to the engaging party. (Ref: par. .A88)

.47 The alert should

- a. state that the practitioner's report is intended solely for the information and use of the specified parties,
- b. identify the specified parties for whom use is intended, and (Ref: par. .A89)
- c. state that the report is not intended to be, and should not be, used by anyone other than the specified parties. (Ref: par. .A90–.A92)

.48 When the engagement is also performed in accordance with *Govern-ment Auditing Standards*, the alert that restricts the use of the practitioner's report should include the following information, rather than the information required by paragraph .47:

- a. A description of the purpose of the report
- b. A statement that the report is not suitable for any other purpose

Reporting on Subject Matter or a Written Assertion

.49 A practitioner should report on a written assertion or directly on the subject matter.

.50 If the practitioner is reporting on the assertion, the assertion should be bound with or accompany the practitioner's report, or the assertion should be clearly stated in the report.

Reference to the Practitioner's Specialist

.51 The practitioner should not refer to the work of a practitioner's specialist in the practitioner's report containing an unmodified conclusion. (Ref: par. .A93)

Modified Conclusions***Misstatement of Subject Matter***

.52 A practitioner who is engaged to perform a review may become aware that the subject matter is misstated. If the misstatement is not corrected,

the practitioner should consider whether modification of the standard practitioner's report is sufficient to disclose the misstatement of the subject matter. (Ref: par. .A94–.A95)

.53 The practitioner should express a modified conclusion when, in the practitioner's professional judgment, the subject matter is materially misstated. In such cases, the practitioner should express a qualified conclusion or an adverse conclusion. (Ref: par. .A96)

.54 When the practitioner modifies the conclusion, the practitioner should include a separate paragraph in the practitioner's report that provides a description of the nature of the matter giving rise to the modification and, if practicable, includes the effects on the subject matter.

.55 The practitioner should express a qualified conclusion when, in the practitioner's professional judgment, the effects of a matter are material but not pervasive. A qualified conclusion is expressed as being "except for" the effects of the matter to which the qualification relates. (Ref: par. .A97–.A98)

.56 The practitioner should express an adverse conclusion when the practitioner, having obtained sufficient appropriate review evidence, concludes that misstatements, individually or in the aggregate, are both material and pervasive to the subject matter. (Ref: par. .A97–.A98)

.57 If the practitioner believes that conditions exist that, individually or in combination, result in one or more material misstatements based on the criteria, the practitioner should modify the conclusion and express a qualified or an adverse conclusion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement.

.58 The practitioner's conclusion on the subject matter or assertion should be clearly separated from any paragraphs emphasizing matters related to the subject matter or any other reporting responsibilities. Any paragraphs emphasizing matters related to the subject matter or any other reporting responsibilities should be phrased in a manner that makes it clear that these paragraphs are not intended to detract from that conclusion or to imply that the practitioner has obtained reasonable assurance.

.59 When the conclusion is modified, reference to an external specialist is permitted when such reference is relevant to an understanding of the modification to the practitioner's conclusion. The practitioner should indicate in the practitioner's report that such reference does not reduce the practitioner's responsibility for that conclusion.

Scope Limitations

.60 If the practitioner is unable to obtain sufficient appropriate review evidence, a scope limitation exists. When a scope limitation exists, the practitioner should withdraw from the engagement, when withdrawal is possible under applicable laws and regulations. (Ref: par. .A53 and .A99–.A101)

Responsible Party Refuses to Provide a Written Assertion

.61 If the engaging party is the responsible party and refuses to provide the practitioner with a written assertion as required by paragraph .11, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation.

.62 When the engaging party is not the responsible party and the responsible party refuses to provide the practitioner with a written assertion, the

practitioner may report on the subject matter but should disclose in the practitioner's report the responsible party's refusal to provide a written assertion and should restrict the use of the practitioner's report to the engaging party. (Ref: par. .A102–.A103)

Communication Responsibilities

.63 The practitioner should communicate to the responsible party known and suspected fraud and noncompliance with laws or regulations, as well as uncorrected misstatements. When the engaging party is not the responsible party, the practitioner should also communicate this information to the engaging party. (Ref: par. .A104)

.64 In the event the practitioner encounters known or suspected fraud or noncompliance with laws or regulations in connection with the engagement, the practitioner should consider responsibilities under the AICPA Code of Professional Conduct (AICPA code) and applicable law prior to communicating such information either to the responsible party or the engaging party. (Ref: par. A105)

Documentation

.65 The practitioner should prepare engagement documentation that is sufficient to determine the following: (Ref: par. .A106–.A109)

- a.* The nature, timing, and extent of the procedures performed to comply with relevant AT-C sections and applicable legal and regulatory requirements, including the following:
 - i. The identifying characteristics of the specific items or matters tested
 - ii. Who performed the engagement work and the date such work was completed
 - iii. The discussions with the responsible party or others about findings or issues that, in the practitioner's professional judgment, are significant, including the nature of the significant findings or issues discussed, and when and with whom the discussions took place
 - iv. When the engaging party is the responsible party and the responsible party will not provide one or more of the requested written representations or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or that the written representations are otherwise not reliable, the matters in paragraph .38
 - v. When the engaging party is not the responsible party and the responsible party will not provide the written representations regarding the matters in paragraph .33, the oral responses from the responsible party to the practitioner's inquiries regarding the matters in paragraph .33, in accordance with paragraph .34
 - vi. Who reviewed the engagement work performed and the date and extent of such review
 - vii. If the practitioner identified information that is inconsistent with the practitioner's final conclusion regarding a

significant matter, how the practitioner addressed the inconsistency

- b. The results of the procedures performed and the review evidence obtained

.66 If, in circumstances such as those described in paragraph .32, the practitioner performs new or additional procedures or draws new conclusions after the date of the practitioner's report, the practitioner should document the following:

- a. The circumstances encountered
- b. The new or additional procedures performed, review evidence obtained, and conclusions reached and their effect on the report
- c. When and by whom the resulting changes to the documentation were made and reviewed

Application and Other Explanatory Material

Conduct of a Review Engagement (Ref: par. .05)

.A1 For example, if a practitioner was performing a review on pro forma financial information, section 105, this section, and section 310, *Reporting on Pro Forma Financial Information*, would be relevant.

Agreeing on the Terms of the Engagement (Ref: par. .08–.09)

.A2 It is in the interests of both the engaging party and the practitioner to document the agreed-upon terms of the engagement before the commencement of the engagement to help avoid misunderstandings. The form and content of the engagement letter or other suitable form of written agreement will vary with the engagement circumstances.

.A3 A practitioner may further describe the responsibilities of the practitioner by adding the following items to the engagement letter or other suitable form of written agreement:

- a. A statement that a review is designed to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria
- b. A statement that the objective of a review is the expression of a conclusion in a written practitioner's report about whether the practitioner is aware of any material modifications that should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or the responsible party's assertion in order for it to be fairly stated

.A4 Situations may exist in which the responsible party is not the engaging party and, as such, the responsibilities of each party may differ. For example, when the responsible party is not the engaging party, the engaging party may be responsible for identifying the criteria.

.A5 The engaging party may request that the practitioner recommend, develop, or assist in developing the criteria for the engagement. Regardless of whether the practitioner recommends, develops, or assists in developing or identifying the criteria for the engagement, the engaging party is required to take responsibility for the criteria.

.A6 If relevant, a statement about the inherent limitations of a review engagement may indicate that "because of the inherent limitations of a review engagement, together with the inherent limitations of internal control, an unavoidable risk exists that some material misstatements may not be detected, even though the review is properly planned and performed in accordance with the attestation standards."

Requesting a Written Assertion (Ref: par. .11)

.A7 What constitutes a reasonable basis for the responsible party's assertion depends on the nature of the subject matter and other engagement circumstances. In some cases, a formal process with extensive internal control may be needed to provide the responsible party with a reasonable basis for making its assertion. The fact that the practitioner will report on the subject matter is not a substitute for the responsible party's own processes to have a reasonable basis for its assertion.

.A8 The language of the responsible party's written assertion in paragraph .11 may need to be tailored to reflect the nature of the underlying subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .11 include the following:

- The subject matter is presented in accordance with (or based on) the criteria.
- The subject matter achieved the objectives, for example, when the objectives are the criteria.

.A9 Situations may arise in which the current responsible party was not present during some or all of the period covered by the practitioner's report. Such persons may contend that they are not in a position to provide a written assertion that covers the entire period because they were not in place during some or all of the period. This fact, however, does not diminish such persons' responsibilities for the subject matter as a whole. Accordingly, the requirement for the practitioner to request a written assertion from the responsible party that covers the entire relevant period or periods still applies.

.A10 Paragraph .33a requires the practitioner to request a written representation from the responsible party that is the same as the responsible party's assertion. If the responsible party provides the practitioner with the written representation in paragraph .33a, the practitioner need not request a separate written assertion, unless a separate written assertion is called for by the engagement circumstances.

.A11 Regardless of the procedures performed by the practitioner, the responsible party is required to accept responsibility for its assertion and the subject matter. An assertion based solely on the practitioner's procedures would not be considered a reasonable basis for its assertion.²

Planning and Performing the Engagement (Ref: par. .12–.13)

.A12 Planning involves the engagement partner and other key members of the engagement team and may involve the practitioner's specialists. Adequate planning helps the practitioner devote appropriate attention to important areas of the engagement, identify potential problems on a timely basis,

² The "Nonattest Services" subtopic (ET sec. 1.295) of the AICPA Code of Professional Conduct addresses the practitioner's provision of nonattest services for an attest client.

and properly organize and manage the engagement for it to be performed in an effective and efficient manner. Adequate planning also assists the practitioner in properly assigning work to engagement team members and facilitates the direction, supervision, and review of their work. Further, it assists, when applicable, the coordination of work performed by other practitioners and practitioner's specialists. The nature and extent of planning activities will vary with the engagement circumstances, for example, the complexity of the assessment or evaluation of the subject matter and the practitioner's previous experience with it. Examples of relevant matters that may be considered include the following:

- The characteristics of the engagement that define its scope, including the terms of the engagement, the characteristics of the subject matter, and the criteria
- The expected timing and nature of the communications required
- The results of preliminary engagement activities, such as client acceptance, and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the appropriate party is relevant
- The engagement process, including possible sources of review evidence and choices among alternative measurement or evaluation methods
- The practitioner's understanding of the appropriate party and its environment, including the risks that the subject matter or assertion may be materially misstated
- Identification of intended users and their information needs and consideration of materiality and the components of attestation risk
- The risk of fraud relevant to the engagement
- The effect on the engagement of using the internal audit function

.A13 The practitioner may decide to discuss elements of planning with the appropriate party to facilitate the conduct and management of the engagement (for example, to coordinate some of the planned procedures with the work of the responsible party's personnel). Although these discussions often occur, the elements of planning remain the practitioner's responsibility. When discussing planning matters, care is needed to avoid compromising the effectiveness of the engagement. For example, discussing the nature and timing of detailed procedures with the responsible party may compromise the effectiveness of the engagement by making the procedures too predictable.

.A14 Planning is not a discrete phase but, rather, a cumulative and iterative process throughout the engagement. Because of unexpected events, changes in conditions, or review evidence obtained, the practitioner may need to revise the nature, timing, and extent of planned procedures.

.A15 In smaller or less complex engagements, the entire engagement may be conducted by a very small engagement team, possibly involving the engagement partner (who may be a sole practitioner) working without any other engagement team members. With a smaller team, coordination of and communication among team members is easier. In such cases, planning the engagement need not be a complex or time-consuming exercise; it varies according to the size of the entity, the complexity of the engagement, and the size of the engagement team.

.A16 Obtaining an understanding of the subject matter and other engagement circumstances provides the practitioner with a frame of reference for exercising professional judgment throughout the engagement, for example, when doing the following:

- Considering the characteristics of the subject matter
- Assessing the suitability of the criteria
- Considering the factors that, in the practitioner's professional judgment, are significant in directing the engagement team's efforts, including situations in which special consideration may be necessary (for example, when there is a need for specialized skills or the work of a specialist)
- Establishing and evaluating the continued appropriateness of quantitative materiality levels (when appropriate) and considering qualitative materiality factors
- Developing expectations when performing analytical procedures
- Designing and performing procedures
- Evaluating review evidence, including the reasonableness of the written representations received by the practitioner

In some review engagements, the practitioner may obtain an understanding of internal control over the measurement, evaluation, or disclosure of the subject matter.

.A17 Identifying the areas in which a material misstatement of the subject matter is likely to arise enables the practitioner to focus procedures on those areas. For example, the practitioner may focus procedures on areas that are subjective in nature.

Materiality in Planning and Performing the Engagement **(Ref: par. .15)**

.A18 Materiality is considered in the context of qualitative factors and, when applicable, quantitative factors. The relative importance of qualitative factors and quantitative factors when considering materiality in a particular engagement is a matter for the practitioner's professional judgment.

.A19 Professional judgments about materiality are made considering surrounding circumstances, but they are not affected by the level of assurance; that is, for the same intended users, materiality for a review engagement is the same as it is for an examination engagement because materiality is based on the information needs of intended users and not the level of assurance.

.A20 In general, misstatements, including omissions, are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by intended users based on the subject matter. The practitioner's consideration of materiality is a matter of professional judgment and is affected by the practitioner's perception of the common information needs of intended users as a group. For purposes of determining materiality, the practitioner may assume that intended users

- a. have a reasonable knowledge of the subject matter and a willingness to study the subject matter with reasonable diligence.
- b. understand that the subject matter is measured or evaluated and subjected to procedures using appropriate levels of materiality

and that they have an understanding of any materiality concepts included in the criteria.

- c. understand any inherent uncertainties involved in measuring or evaluating the subject matter.
- d. make reasonable judgments based on the subject matter.

Unless the engagement has been designed to meet the particular information needs of specific users, the possible effect of misstatements on specific users, whose information needs may vary widely, is not ordinarily considered.

.A21 Qualitative factors may include the following:

- The interaction between, and relative importance of, various aspects of the subject matter, such as numerous performance indicators
- The wording chosen with respect to subject matter that is expressed in narrative form, for example, the wording chosen does not omit or distort the information
- The characteristics of the presentation adopted for the subject matter when the criteria allow for variations in that presentation
- The nature of a misstatement
- Whether a misstatement affects compliance with laws or regulations
- In the case of periodic reporting on a subject matter, whether the effect of an adjustment that affects past or current information about the subject matter or is likely to affect future information about the subject matter
- Whether a misstatement is the result of an intentional act or is unintentional
- Whether a misstatement is significant with regard to the practitioner's understanding of known previous communications to users, for example, in relation to the expected outcome of the measurement or evaluation of the subject matter
- Whether a misstatement relates to the relationship between the responsible party and, if different, the engaging party or its relationship with other parties

.A22 Quantitative factors relate to the magnitude of misstatements relative to reported amounts for those aspects of the subject matter, if any, that are

- expressed numerically or
- otherwise related to numerical values.

.A23 When quantitative factors are applicable, planning the engagement solely to detect individually material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the subject matter to be materially misstated. Applying materiality to elements of the subject matter ordinarily is not a simple mechanical calculation but involves the exercise of professional judgment. It is affected by the practitioner's understanding of the subject matter and the responsible party and consideration of the nature and extent of misstatements identified in previous attestation engagements.

.A24 The criteria may discuss the concept of materiality in the context of the preparation and presentation of the subject matter and thereby provide a

frame of reference for the practitioner in considering materiality for the engagement. Although criteria may discuss materiality in different terms, the concept of materiality generally includes the matters discussed in paragraphs .A18–.A23. If the criteria do not include a discussion of the concept of materiality, these paragraphs provide the practitioner with a frame of reference.

Procedures to Be Performed to Obtain Limited Assurance (Ref: par. .18)

.A25 The practitioner's work in forming a conclusion consists of obtaining and evaluating review evidence. In addition to inquiry, examples of procedures to obtain review evidence include the following:

- Analytical procedures
- Inspection
- Observation
- Confirmation
- Recalculation
- Repperformance

.A26 Review evidence obtained through the performance of inquiry and analytical procedures will ordinarily provide the practitioner with a reasonable basis for obtaining limited assurance. However, analytical procedures may not be possible when the subject matter is qualitative, rather than quantitative. Additionally, analytical procedures may not provide sufficient appropriate review evidence if an expectation (see paragraph .A33) cannot be developed. Therefore, the practitioner may determine that other procedures are more effective or efficient to obtain limited assurance.

.A27 Information may come to the practitioner's attention that differs significantly from that on which the determination of planned procedures was based. As the practitioner performs planned procedures, the review evidence obtained may cause the practitioner to perform additional procedures. Such procedures may include asking the responsible party to examine the matter identified by the practitioner and to make adjustments to the subject matter, if appropriate.

.A28 In some cases, a subject-matter AT-C section may include requirements that affect the nature, timing, and extent of procedures. For example, a subject-matter AT-C section may describe the nature or extent of particular procedures to be performed in a particular type of engagement. Even in such cases, determining the exact nature, timing, and extent of procedures is a matter of professional judgment and will vary from one engagement to the next.

.A29 The results of the practitioner's procedures may modify the practitioner's risk awareness.

.A30 The practitioner may become aware of a matter that causes the practitioner to believe that the subject matter may be materially misstated. For example, when performing analytical procedures, the practitioner may identify a fluctuation or relationship that is inconsistent with other relevant information or that differs significantly from expected amounts or ratios. In such cases, the practitioner's investigation of such differences may include inquiring of the responsible party or performing other procedures as appropriate in the circumstances.

Analytical Procedures (Ref: par. .19–.20)

.A31 An understanding of the purposes of analytical procedures and the limitations of those procedures is important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires professional judgment by the practitioner.

.A32 Analytical procedures involve comparisons of expectations developed by the practitioner to recorded amounts or ratios developed from recorded amounts. The practitioner develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the practitioner's understanding of the subject matter; the practices used by the responsible party to measure, recognize, and record the subject matter; and, if applicable, the industry in which the entity operates.

.A33 Analytical procedures in a review engagement are not designed to identify misstatements with the level of precision expected in an examination engagement. In an examination engagement, analytical procedures performed in response to the engagement risk involve developing expectations that are sufficiently precise to identify material misstatements. In a review engagement, the results of analytical procedures may be compared to expectations regarding the direction of trends, relationships, and ratios, rather than to identify misstatements with the level of precision expected in an examination engagement. Further, when significant fluctuations, relationships, or differences are identified, appropriate review evidence in a review engagement may often be obtained by making inquiries of the responsible party and considering responses received in light of known engagement circumstances without obtaining additional review evidence as required in the case of an examination engagement.

Fraud, Laws, and Regulations (Ref: par. .24)

.A34 In responding to fraud or suspected fraud identified during the engagement, it may be appropriate, unless prohibited by law, regulation, or ethics standards, for the practitioner to, for example, do the following:

- Discuss the matter with the appropriate party
- Request that the responsible party consult with an appropriately qualified third party, such as the entity's legal counsel or a regulator
- Consider the implications of the matter in relation to other aspects of the engagement, including the practitioner's planning and the reliability of written representations from the responsible party
- Obtain legal advice about the consequences of different courses of action
- Communicate with third parties (for example, a regulator)
- Withdraw from the engagement when withdrawal is possible under applicable law or regulation

.A35 The actions noted in paragraph .A34 also may be appropriate in responding to noncompliance or suspected noncompliance with laws or regulations identified during the engagement. It may also be appropriate to describe the matter in a separate paragraph of the practitioner's report, unless either of the following apply:

- a. The practitioner is precluded by the responsible party from obtaining sufficient appropriate review evidence to evaluate whether noncompliance that may be material to the subject matter has or is likely to have occurred, in which case, paragraph .60 applies.
- b. The practitioner concludes that the noncompliance results in a material misstatement of the subject matter, in which case, paragraphs .52–.59 apply.

Evaluating the Results of Review Procedures (Ref: par. .28–.29)

.A36 Uncorrected misstatements are accumulated during the engagement for the purpose of evaluating whether, individually or in aggregate, they are material when forming the practitioner's conclusion.

.A37 "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a wholly different (smaller) order of magnitude than materiality and will be matters that are clearly inconsequential, whether taken individually or in the aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the matter is considered not to be clearly trivial.

.A38 Sufficient appropriate review evidence is necessary to support the practitioner's conclusion and report.

.A39 The sufficiency and appropriateness of review evidence are interrelated. *Sufficiency of review evidence* is the measure of the quantity of review evidence. The quantity of the review evidence needed is affected by the risks of material misstatement and also by the quality of such review evidence.

.A40 Whether sufficient appropriate review evidence has been obtained on which to base the practitioner's conclusion is a matter of professional judgment. In some circumstances, the practitioner may not have obtained the review evidence that the practitioner had expected to obtain through the design and performance of procedures. In these circumstances, the practitioner may

- extend the work performed, or
- perform other procedures based on the practitioner's professional judgement to be necessary in the circumstances.

When neither of these is practicable in the circumstances, the practitioner will not be able to obtain sufficient appropriate review evidence to be able to form a conclusion, a scope limitation exists, and paragraph .60 applies.

Considering Subsequent Events and Subsequently Discovered Facts (Ref: par. .31–.32)

.A41 For certain subject-matter AT-C sections, specific subsequent events requirements and related application guidance have been developed for engagement performance and reporting.

.A42 Procedures that a practitioner may perform to identify subsequent events include inquiring about and considering information

- contained in relevant reports issued during the subsequent period by internal auditors, other practitioners, or regulatory agencies.
- obtained through other professional engagements for that entity.

.A43 If the responsible party refuses to disclose a subsequent event for which disclosure is necessary to prevent users of the practitioner's report from being misled, appropriate actions the practitioner may take include

- disclosing the event in the report and modifying the practitioner's conclusion.
- withdrawing from the engagement when withdrawal is possible under applicable law or regulation.

.A44 Subsequent to the date of the practitioner's report, the practitioner may become aware of facts that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. In such circumstances, the practitioner undertakes to determine whether the facts existed at the date of the report and, if so, whether persons who would attach importance to these facts are currently using or are likely to use the report and related subject matter or assertion. This may include discussing the matter with the appropriate party and requesting the appropriate party's cooperation in whatever investigation or further action that may be necessary. The specific actions to be taken in a particular case by the appropriate party and the practitioner may vary with the circumstances. Consideration may be given to, among other things, the time elapsed since the date of the report and whether issuance of a subsequent report is imminent. The practitioner may need to perform additional procedures deemed necessary to determine whether the subject matter or assertion needs revision and whether the previously issued report continues to be appropriate.

.A45 Depending on the circumstances, the practitioner may determine that notification of the situation by the appropriate party to persons who would attach importance to the facts and who are currently using, or are likely to use, the practitioner's report is necessary. This may be the case, for example, when

- a. the report is not to be relied upon because the subject matter or assertion needs revision or the practitioner is unable to determine whether revision is necessary, and
- b. issuance of a subsequent report is not imminent.

If the appropriate party failed to take the necessary steps to prevent reliance on the report, the practitioner's course of action depends upon the practitioner's legal and ethical rights and obligations. Consequently, the practitioner may consider it appropriate to seek legal advice prior to making any disclosure of the situation. Disclosure of the situation directly by the practitioner may include a description of the nature of the matter and of its effect on the subject matter or assertion and the report, avoiding comments concerning the conduct or motives of any person.

Written Representations (Ref: par. .33–.34)

.A46 Written confirmation of oral representations reduces the possibility of misunderstandings between the practitioner and the responsible party. The person from whom the practitioner requests written representations is ordinarily a member of senior management or those charged with governance depending on, for example, the management and governance structure of the responsible party, which may vary by entity, reflecting influences such as size and ownership characteristics.

.A47 Representations by the responsible party cannot replace other review evidence the practitioner could reasonably expect to be available. Although written representations provide review evidence, they do not provide sufficient

appropriate review evidence on their own about any of the matters with which they deal. Furthermore, the fact that the practitioner has received reliable written representations does not affect the nature or extent of other review evidence that the practitioner obtains.

.A48 A discussion of what is considered a material effect on the subject matter or assertion may be included explicitly in the representation letter in qualitative or quantitative terms.

.A49 A summary of uncorrected misstatements ordinarily is included in or attached to the written representation.

.A50 Certain subject-matter AT-C sections do not permit the practitioner to perform the alternative procedures described in paragraphs .34 and .39a (making inquiries of the responsible party and restricting the use of the practitioner's report).

Requested Written Representations Not Provided or Not Reliable (Ref: par. .38 and .60)

.A51 The engaging party's refusal to furnish written representations constitutes a limitation on the scope of the review. Such refusal may cause the practitioner to withdraw, when withdrawal is possible under applicable law or regulation.

.A52 The practitioner may determine, after performing the procedures in items (a)–(b) of paragraph .38, that an oral representation may provide a portion of the review evidence needed with respect to the matter addressed by the representation.

.A53 Circumstances in which the practitioner may be unable to obtain one or more requested written representations from a responsible party that is not the engaging party include, for example, the following:

- When the engaging party does not have a relationship with the responsible party
- When the review is undertaken against the wishes of the responsible party, for example, when required by law or regulation

In these or other circumstances, the practitioner may need to reconsider whether the responsible party is able or willing to take responsibility for the subject matter. Additionally, the practitioner may not have access to the review evidence to support a conclusion that the responsible party has taken responsibility for the subject matter.

.A54 Even when the responsible party provides oral responses to the matters in paragraph .33, the practitioner may find it appropriate to consider whether there are significant concerns about the competence, integrity, ethical values, or diligence of those providing the oral responses or whether the oral responses are otherwise not reliable and the potential effect, if any, on the practitioner's report.

.A55 Paragraph .11 provides an exception to the requirement for a written assertion when the engaging party is not the responsible party. Nonetheless, because the assertion is the representation called for by paragraph .33a, application of paragraph .39a requires the practitioner to obtain an oral assertion, when a written assertion is not obtained. Paragraph .39b applies when the responsible party provides neither a written nor an oral assertion.

Other Information (Ref: par. .40)

.A56 Further actions that may be appropriate if the practitioner identifies a material inconsistency or becomes aware of a material misstatement of fact include, for example, the following:

- Requesting the appropriate party to consult with a qualified third party, such as the appropriate party's legal counsel
- Obtaining legal advice about the consequences of different courses of action
- If required or permissible, communicating with third parties (for example, a regulator)
- Describing the material inconsistency in the practitioner's report
- Withdrawing from the engagement, when withdrawal is possible under applicable law or regulation

.A57 Other information does not include information contained on the appropriate party's website. Websites are a means of distributing information and are not, themselves, documents for the purposes of paragraph .40.

Description of Criteria (Ref: par. .41)

.A58 The description of the criteria on which the subject matter or assertion is based is particularly important when there are significant differences between various criteria regarding how particular matters may be treated in the subject matter.

.A59 A description of the criteria that states that the subject matter is prepared in accordance with (or based on) particular criteria is appropriate only if the subject matter complies with all relevant requirements of those criteria that are effective.

Forming the Conclusion (Ref: par. .42–.43)

.A60 The practitioner's professional judgment regarding what constitutes sufficient appropriate review evidence is influenced by such factors as the following:

- The significance of a potential misstatement and the likelihood that it will have a material effect, individually or aggregated with other potential misstatements, on the subject matter or assertion
- The effectiveness of the responsible party's responses to address the known risks
- The experience gained during previous examination or review engagements with respect to similar potential misstatements
- The results of procedures performed, including whether such procedures identified specific misstatements
- The source and reliability of the available information
- The persuasiveness of the review evidence
- The practitioner's understanding of the responsible party and its environment

.A61 A review engagement is a cumulative and iterative process. As the practitioner performs planned procedures, the review evidence obtained may cause the practitioner to change the nature, timing, or extent of other planned

procedures. Information that differs significantly from the information on which the planned procedures were based may come to the practitioner's attention. Examples of such information include the following:

- The extent of the misstatements that the practitioner detects is greater than expected. (This may alter the practitioner's professional judgment about the reliability of particular sources of information.)
- The practitioner may become aware of discrepancies in relevant information or conflicting or missing review evidence.
- Procedures performed toward the end of the engagement may indicate a previously unrecognized risk of material misstatement. In such circumstances, the practitioner may need to reevaluate the planned procedures.

.A62 In making the evaluation required by paragraph .43, the practitioner may consider whether additional disclosures are necessary to describe the subject matter, assertion, or criteria. Additional disclosures may, for example, include the following:

- The measurement or evaluation methods used when the criteria allow for choice among methods
- Significant interpretations made in applying the criteria in the engagement circumstances
- Subsequent events, depending on their nature and significance
- Whether there have been any changes in the measurement or evaluation methods used

.A63 Paragraph .43 does not require the practitioner to determine whether the presentation discloses all matters related to the subject matter, assertion, or criteria or all matters intended users may consider in making decisions based on the presentation.

Preparing the Practitioner's Report (Ref: par. .44–.45)

.A64 Oral and other forms of expressing a conclusion can be misunderstood without the support of a written practitioner's report. For this reason, the practitioner may not report orally or by use of symbols (such as a web seal) under the attestation standards without also providing a written report that is readily available whenever the oral report is provided or the symbol is used. For example, a symbol could be hyperlinked to a written report on the internet.

.A65 This section does not require a standardized format for reporting on all review engagements. Instead, it identifies the basic elements that the practitioner's report is to include. The report is tailored to the specific engagement circumstances. The practitioner may use headings, separate paragraphs, paragraph numbers, typographical devices (for example, the bolding of text), and other mechanisms to enhance the clarity and readability of the report.

.A66 The practitioner may choose to issue a report that contains only the minimum reporting elements included in paragraph .45 or may issue a report that expands on or supplements those elements. In addition to the basic elements, a report may include information and explanations that are not intended to affect the practitioner's conclusion, for example, detail about the terms of the engagement, the applicable criteria being used, findings relating to particular aspects of the engagement, details of the qualifications and experience of the practitioner and others involved in the engagement, and, in some cases,

recommendations. The practitioner may find it helpful to consider the importance of providing such information to the information needs of the intended users. As required by paragraph .58, additional information is clearly separated from the practitioner's conclusion and phrased in a manner that makes it clear that it is not intended to detract from that conclusion or to imply that the practitioner has obtained reasonable assurance.

.A67 All of the following reporting options are available to a practitioner, except when the circumstances described in paragraph .49 exist.

<i>The practitioner's report may state that the practitioner reviewed</i>	<i>and</i>	<i>concludes on</i>
the subject matter		the subject matter
the responsible party's assertion		the responsible party's assertion
the responsible party's assertion		the subject matter

Content of the Practitioner’s Report

Title (Ref: par. .45a)

.A68 A title indicating that the practitioner's report is the report of an independent practitioner (for example, "Independent Practitioner's Report," "Report of Independent Certified Public Accountant," or "Independent Accountant's Report") affirms that the practitioner has met all the relevant ethical requirements regarding independence and, therefore, distinguishes the independent practitioner's report from reports issued by others.

Criteria (Ref: par. .45d)

.A69 The practitioner's report may include the criteria or refer to them if they are included in the subject matter presentation, in the assertion, or are otherwise readily available. It may be relevant in the circumstances to disclose the source of the criteria or the relevant matters discussed in paragraph .A62.

Relevant Responsibilities (Ref: par. .45e)

.A70 Identifying relevant responsibilities informs the intended users that the responsible party is responsible for the subject matter and that the practitioner's role is to independently express a conclusion about it.

.A71 The practitioner may wish to expand the discussion of the responsible party's responsibility, for example, to indicate that the responsible party is responsible for the preparation and presentation of the subject matter in accordance with (or based on) the criteria, including the design, implementation, and maintenance of internal control to prevent, or detect and correct, misstatement of the subject matter, due to fraud or error.

Statement About the Subject Matter and Criteria (Ref: par. 45g)

.A72 In identifying the standards under which the engagement was performed, the practitioner may specify the AT-C section under which the engagement was performed, for example, section 310, *Reporting on Pro Forma Financial Information*, of the attestation standards established by the AICPA.

.A73 The language in paragraph .45g(ii)(1) may need to be tailored to reflect the nature of the subject matter and criteria for the engagement.

Examples of language that meet the requirements in paragraph .45g(ii)(1) include, "to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to

- be presented in accordance with (or based on) the criteria."
- meet the objectives," for example, when the objectives are the criteria.

Relevant Ethical Requirements (Ref: par. .45i)

.A74 Relevant ethical requirements consist of the AICPA code together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive. When the AICPA code applies, the practitioner's other ethical responsibilities relate to the "Principles of Professional Conduct" (ET sec. 0.300).

.A75 Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. When independence and other relevant ethical requirements are contained in a limited number of sources, the practitioner may choose to name the relevant sources (for example, the name of the code, rule, or applicable regulation, or *Government Auditing Standards* promulgated by the Comptroller General of the United States) or may refer to a term that appropriately describes those sources.

Inherent Limitations (Ref: par. .45j)

.A76 In some cases, identification of specific inherent limitations may be required by an AT-C section. To communicate specific inherent limitations, the illustrative practitioner's report on a review of pro forma financial information under AT-C section 310, for example, indicates that the objective of pro forma financial information is to show what the significant effects on the historical financial information might have been had the transaction (or event) occurred at an earlier date. It also indicates that the pro forma condensed financial statements are not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the specified transaction (or event) actually occurred earlier.³ When not explicitly required by an AT-C section, identification in the report of inherent limitations is based on the practitioner's judgment.

Description of the Work Performed (Ref: par. .45k)

.A77 The summary of the work performed helps the intended users understand the basis for the practitioner's conclusion. The summary may be as brief as "the procedures we performed were based on our professional judgment and consisted primarily of analytical procedures and inquiries" or may be more detailed. Factors to consider in determining the level of detail to be provided in the summary of the work performed may include the following:

- Circumstances specific to the entity (for example, the differing nature of the entity's activities compared to those typical in the industry)

³ Paragraph .18k and examples 2, "Practitioner's Review Report on Pro Forma Financial Information: Unmodified Conclusion," and 3, "Practitioner's Examination Report on Pro Forma Financial Information at Year-End With a Review of Pro Forma Financial Information for a Subsequent Interim Date: Unmodified Opinion and Unmodified Conclusion," in paragraph .A24 of section 310, *Reporting on Pro Forma Financial Information*.

- Specific engagement circumstances affecting the nature and extent of the procedures performed
- The intended users' expectations of the level of detail to be provided in the report, based on market practice, or applicable law or regulation

.A78 It is important that the summary be written in an objective way that allows intended users to understand the work done as the basis for the practitioner's conclusion. In most cases, this will not involve detailing the entire work plan. On the other hand, it is important that the description of the work is not so concise as to be vague or ambiguous but also not written in a way that is overstated or embellished.

Conclusion (Ref: par. .45l)

.A79 The practitioner's conclusion can be worded either in terms of the subject matter and the criteria (for example, "Based on our review, we are not aware of any material modifications that should be made to the XYZ schedule in order for it to be in accordance with [or based on] the ABC criteria.") or in terms of an assertion made by the responsible party (for example, "Based on our review, we are not aware of any material modifications that should be made to management of XYZ Company's assertion in order for it to be fairly stated.").

.A80 A single practitioner's report may cover more than one aspect of a subject matter or an assertion about the subject matter. When that is the case, the report may contain separate opinions or conclusions on each aspect of the subject matter or assertion (for example, examination level related to some aspects or assertions and review level related to others, or an unmodified conclusion on some aspects or assertions and a modified conclusion on others).

.A81 A practitioner may report on subject matter or an assertion at multiple dates or covering multiple periods during which criteria have changed (for example, a practitioner's report on comparative information). Criteria are clearly described when they identify the criteria for each period and how the criteria have changed from one period to the next. If the criteria for the current date or period have changed from the criteria for a preceding date or period, changes in the criteria may be significant to users of the report. If so, the criteria and the fact that they have changed may be disclosed in the presentation of the subject matter, in the written assertion about the subject matter, or in the report, even if the subject matter for the preceding date or period is not presented.

Location (Ref: par. .45n)

.A82 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country.

Date (Ref: par. .45o)

.A83 Including the date of the practitioner's report informs the intended users that the practitioner has considered the effect of the events that occurred up to that date on the subject matter and the report.

.A84 Because the practitioner expresses a conclusion on the subject matter or assertion and the subject matter or assertion is the responsibility of the responsible party, the practitioner is not in a position to conclude that sufficient appropriate review evidence has been obtained until review evidence is obtained that all the elements that the subject matter or assertion comprises, including any related notes, when applicable, have been prepared, and the responsible party has accepted responsibility for them.

Restricted-Use Paragraph (Ref: par. .11, .33, .46, and .47b–c)

.A85 A practitioner's report for which the conditions in paragraph .46 do not apply need not include an alert that restricts its use. However, nothing in the attestation standards precludes a practitioner from including such an alert in any practitioner's report or other practitioner's written communication.

.A86 A practitioner's report that is required by paragraph .46 to include an alert that restricts the use of the report may be included in a document that also contains a practitioner's report that is for general use. In such circumstances, the use of the general use report is not affected.

.A87 A practitioner may also issue a single combined practitioner's report that includes

- a. a practitioner's report that is required by paragraph .46 to include an alert that restricts its use and
- b. a report that is for general use.

If these two types of reports are clearly differentiated within the combined report, such as through the use of appropriate headings, the alert that restricts the use of the report may be limited to the report required by paragraph .46 to include such an alert. In such circumstances, the use of the general use report is not affected.

.A88 The representations required by paragraph .33 include an assertion. If the engaging party is not the responsible party and the responsible party provides an oral assertion, rather than a written assertion, paragraph .46c calls for an alert that restricts the use of the practitioner's report to the engaging party.

.A89 The practitioner may identify the specified parties by naming them, referring to a list of those parties, or identifying the class of parties, for example, "all customers of XYZ Company during some or all of the period January 1, 20XX to December 31, 20XX." The method of identifying the specified parties is determined by the practitioner.

.A90 In some cases, the criteria used to measure or evaluate the subject matter may be designed for a specific purpose. For example, a regulator may require certain entities to use particular criteria designed for regulatory purposes. To avoid misunderstandings, the practitioner alerts users of the practitioner's report to this fact and, therefore, that the report is intended solely for the information and use of the specified parties.

.A91 The alert that restricts the use of the practitioner's report is designed to avoid misunderstandings related to the use of the report, particularly if the report is taken out of the context in which the report is intended to be used. A practitioner may consider informing the responsible party and, if different, the engaging party or other specified parties that the report is not intended for distribution to parties other than those specified in the report. The practitioner may, in connection with establishing the terms of the engagement, reach an understanding with the responsible party or, if different, the engaging party, that the intended use of the report will be restricted and may obtain the responsible party's agreement that the responsible party and specified parties will not distribute such report to parties other than those identified therein. A practitioner is not responsible for controlling, and cannot control, distribution of the report after its release.

.A92 In some cases, a restricted-use practitioner's report filed with regulatory agencies is required by law or regulation to be made available to the public as a matter of public record. Also, a regulatory agency, as part of its oversight

responsibility for an entity, may require access to the restricted-use report in which it is not named as a specified party.

Reference to the Practitioner's Specialist (Ref: par. .51)

.A93 The practitioner has sole responsibility for the conclusion expressed, and that responsibility is not reduced by the practitioner's use of the work of a practitioner's specialist.

Modified Conclusions (Ref: par. .52-.53 and .55)

.A94 The two types of modified conclusions are a qualified conclusion and an adverse conclusion. The decision regarding what type of modified conclusion is appropriate depends on the following:

- a. The nature of the matter giving rise to the modification (that is, whether the subject matter of the engagement is in accordance with [or based on] the criteria or may be materially misstated)
- b. The practitioner's professional judgment about the pervasiveness of the effects or possible effects of the matter on the subject matter of the engagement

.A95 A practitioner may express an unmodified conclusion only when the engagement has been conducted in accordance with the attestation standards. Such standards will not have been complied with if the practitioner has been unable to apply all the procedures that the practitioner considers necessary in the circumstances.

.A96 Example of a qualified conclusion or an adverse conclusion are as follows:

- *Qualified conclusion (an example for a material but not pervasive misstatement).* "Based on our review, except for the matter(s) described in [the Basis for Qualified Conclusion section of our report], we are not aware of any material modifications that should be made to [the subject matter] for it to be in accordance with [the criteria]."
- *Adverse conclusion (an example for a material and pervasive misstatement).* "Based on our review, because of the significance of the matter described in [the Basis for Adverse Conclusion section of our report], the [subject matter] is not in accordance with [the criteria]. Had we been engaged to perform an examination, other matters might have come to our attention."

.A97 The term *pervasive* describes the effects on the subject matter of misstatements. Pervasive effects on the subject matter are those that, in the practitioner's professional judgment

- a. are not confined to specific aspects of the subject matter;
- b. if so confined, represent or could represent a substantial proportion of the subject matter; or
- c. in relation to disclosures, are fundamental to the intended users' understanding of the subject matter.

.A98 The nature of the misstatement, and the practitioner's judgment about the pervasiveness of the effects of the material misstatement on the subject matter, affect the type of conclusion to be expressed.

Scope Limitations (Ref: par. .60)

.A99 The procedures performed in a review engagement are, by definition, limited compared with those performed in an examination engagement. Limitations known to exist prior to accepting a review engagement are a relevant consideration when establishing whether the preconditions for a review engagement are present, in particular, whether the practitioner expects to be able to obtain the review evidence needed to arrive at the practitioner's conclusion. (See section 105.)⁴ If a further limitation is imposed by the appropriate party after a review engagement has been accepted, it may be appropriate to withdraw from the engagement, when withdrawal is possible under applicable laws and regulations.

.A100 The inability to obtain written representations from the responsible party ordinarily would result in a scope limitation. However, when the engaging party is not the responsible party, paragraph .34 enables the practitioner to make inquiries of the responsible party, and if the responsible party's oral responses enable the practitioner to conclude that the practitioner has sufficient appropriate review evidence to form a conclusion about the subject matter, paragraph .39a indicates that this would not cause a scope limitation. Further, paragraph .39a requires that the practitioner's report, in these circumstances, contain an alert paragraph that restricts the use of the report to the engaging party.

.A101 An inability to perform a specific procedure does not constitute a scope limitation if the practitioner is able to obtain sufficient appropriate review evidence by performing alternative procedures.

Responsible Party Refuses to Provide a Written Assertion (Ref: par. .62)

.A102 The following is an example of the disclosure required by paragraph .62:

Attestation standards established by the AICPA require that we request a written statement from *[identify the responsible party]* stating that *[identify the subject matter]* that we reviewed has been accurately measured or evaluated. We requested that *[identify the responsible party]* provide such a written statement but *[identify the responsible party]* refused to do so.

.A103 The practitioner's report discussed in paragraph .62 is appropriate only when the engagement is to report on the subject matter; it is not appropriate for a report on an assertion. When reporting on an assertion, the practitioner is required to obtain a written assertion from the responsible party.

Communication Responsibilities (Ref: par. .63–.64)

.A104 Other matters that may be appropriate to communicate to the responsible party or, if different, the engaging party, include deficiencies in internal control identified during the engagement or bias in the measurement, evaluation, or disclosure of the subject matter.

.A105 Disclosure of confidential information as defined in the AICPA code requires the explicit consent of the engaging party or the responsible party, as

⁴ Paragraph .27b(iii) of section 105, *Concepts Common to All Attestation Engagements*.

appropriate. In circumstances in which such matters are identified, the practitioner may consider discussing with legal counsel or others prior to communicating or taking further action.

Documentation (Ref: par. .65)

.A106 Documentation includes a record of the practitioner's reasoning on all significant findings or issues that require the exercise of professional judgment and related conclusions. The existence of difficult questions of principle or professional judgment calls for the documentation to include the relevant facts that were known by the practitioner at the time the conclusion was reached.

.A107 It is neither necessary nor practical to document every matter considered, or professional judgment made, during an engagement. Further, it is unnecessary for the practitioner to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included in the engagement file. Similarly, the practitioner need not include in the engagement file superseded drafts of working papers, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.A108 In applying professional judgment to assess the extent of documentation to be prepared and retained, the practitioner may consider what is necessary to provide an experienced practitioner, having no previous connection with the engagement, with an understanding of the work performed and the basis of the principal decisions made.

.A109 Documentation ordinarily includes a record of the following:

- Issues identified with respect to compliance with relevant ethical requirements and how they were resolved
- Conclusions on compliance with independence requirements that apply to the engagement and any relevant discussions with the firm that support these conclusions
- Conclusions reached regarding the acceptance and continuance of client relationships and attestation engagements
- The nature and scope of and conclusions resulting from consultations undertaken during the engagement

.A110

Exhibit — Illustrative Practitioner's Review Reports

The illustrative practitioner's review reports in this exhibit meet the applicable reporting requirements in paragraphs .44–.62. A practitioner may use alternative language in drafting a review report, provided that the language meets the applicable requirements in paragraphs .44–.62. The criteria for evaluating the subject matter in examples 1, 3, and 4 have been determined by the practitioner to be suitable and available to all users of the practitioner's report; therefore, these practitioner's reports may be for general use. The criteria for evaluating the subject matter in example 2 are suitable but available only to specified parties; therefore, use of this report is restricted to the specified parties who either participated in the establishment of the criteria or can be presumed to have an adequate understanding of the criteria. (See paragraph .47 for the information to be included in a separate paragraph of the report that contains an alert that restricts the use of the report and paragraph .48 for the content of that paragraph when the engagement is also performed in accordance with *Government Auditing Standards*.)

Example 1: Practitioner's Review Report on Subject Matter; Unmodified Conclusion

The following is an illustrative practitioner's review report in which the practitioner has reviewed the subject matter and is reporting on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have reviewed [identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]. XYZ Company's management is responsible for [identify the subject matter, for example, presenting the schedule of investment returns] in accordance with (or based on) [identify the criteria, for example, the ABC criteria set forth in Note 1]. Our responsibility is to express a conclusion on [identify the subject matter, for example, the schedule of investment returns] based on our review.

Our review was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to [identify the subject matter, for example, the schedule of investment returns] in order for it to be in accordance with (or based on) the criteria. The procedures performed in a review vary in nature and timing from and are substantially less in extent than, an examination, the objective of which is to obtain reasonable assurance about whether [identify the subject matter, for example, the schedule of investment returns] is in accordance with (or based on) the criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the review evidence obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements related to the engagement.

[Include a description of the work performed as a basis for the practitioner's conclusion.]

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Based on our review, we are not aware of any material modifications that should be made to *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, in order for it to be in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 2: Practitioner's Review Report on an Assertion; Unmodified Conclusion; Use of the Report Is Restricted to Specified Parties

The following is an illustrative practitioner's report for a review engagement in which the practitioner has reviewed the responsible party's assertion and is reporting on that assertion. Although suitable criteria exist for the subject matter, use of the report is restricted to specified parties because the criteria are available only to the specified parties.

Independent Accountant's Report

[Appropriate Addressee]

We have reviewed management of XYZ Company's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with (or based on) the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for its assertion. Our responsibility is to express a conclusion on management's assertion based on our review.

Our review was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to management's assertion in order for it to be fairly stated. The procedures performed in a review vary in nature and timing from and are substantially less in extent than, an examination, the objective of which is to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the review evidence obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements related to the engagement.

[Include a description of the work performed as a basis for the practitioner's conclusion.]

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Based on our review, we are not aware of any material modifications that should be made to management of XYZ Company's assertion in order for it to be fairly stated.

This report is intended solely for the information and use of *[identify the specified parties, for example, ABC Company and XYZ Company]*, and is not intended to be, and should not be, used by anyone other than the specified parties.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 3: Practitioner's Review Report on Subject Matter; Qualified Conclusion

The following is an illustrative practitioner's report for a review engagement in which the practitioner expresses a qualified conclusion because the review identified conditions that, individually or in combination, result in one or more material, but not pervasive, misstatements of the subject matter, based on the criteria. The practitioner has reviewed the subject matter and is also reporting on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have reviewed *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]* based on *[identify the criteria, for example, the ABC criteria set forth in Note 1]*. Our responsibility is to express a conclusion on *[identify the subject matter, for example, the schedule of investment returns]* based on our review.

Our review was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to *[identify the subject matter, for example, the schedule of investment returns]* in order for it to be in accordance with (or based on) the criteria. The procedures performed in a review vary in nature and timing from and are substantially less in extent than, an examination, the objective of which is to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is in accordance with (or based on) the criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the review evidence obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements related to the engagement.

[Include a description of the work performed as a basis for the practitioner's conclusion.]

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraphs may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Our review identified *[describe conditions that, individually or in the aggregate, resulted in a material misstatement, or deviation from, the criteria]*.

Based on our review, except for the matters described in the preceding paragraph, we are not aware of any material modifications that should be made to *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, in order for it to be in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 4: Practitioner's Review Report on Subject Matter; Adverse Conclusion

The following is an illustrative practitioner's report for a review engagement in which the practitioner expresses an adverse conclusion because the review identified conditions that, individually or in combination, result in one or more material and pervasive misstatements of the subject matter based on the criteria. The practitioner has reviewed the subject matter and is also reporting on the subject matter.

Independent Accountant's Report

[Appropriate Addressee]

We have undertaken a review of *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]* based on *[identify the criteria, for example, the ABC criteria set forth in Note 1]*. Our responsibility is to express a conclusion on *[identify the subject matter, for example, the schedule of investment returns]* based on our review.

Our review was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform this engagement to obtain limited assurance about whether any material modifications should be made to *[identify the subject matter, for example, the schedule of investment returns]* in order for it to be in accordance with (or based on) the criteria. The procedures performed in a review vary in nature and timing from and are substantially less in extent than, an examination, the objective of which is to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is in accordance with (or based on) the criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the review evidence obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements related to the engagement.

XYZ Company has not *[describe the material and pervasive misstatement of the subject matter]*. Had XYZ Company properly accounted for *[describe the material and pervasive misstatement of the subject matter]*, many elements in *[identify the subject matter, for example, the schedule of investment returns]* would have been materially affected. The effects on the *[identify the subject matter, for example, the schedule of investment returns]* have not been determined.

Based on our review, because of the significance of the matter described in the preceding paragraph [*identify the subject matter, for example, the schedule of investment returns*], is not in accordance with [*identify the criteria, for example, the ABC criteria set forth in Note 1*]. [Had we been engaged to perform an examination, other matters might have come to our attention.]

AT-C Section 210A^{*}

Review Engagements

Source: SSAE No. 18; SSAE No. 20.

Effective for practitioners' review reports dated on or after May 1, 2017, unless otherwise indicated.

Introduction

.01 This section contains performance and reporting requirements and application guidance for all review engagements. The requirements and guidance in this section supplement the requirements and guidance in section 105, *Concepts Common to All Attestation Engagements*.

Effective Date

.02 This section is effective for practitioners' review reports dated on or after May 1, 2017.

Objectives

.03 In conducting a review engagement, the objectives of the practitioner are to

- a. obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria;
- b. express a conclusion in a written report about whether the practitioner is aware of any material modifications that should be made to
 - i. the subject matter in order for it to be in accordance with (or based on) the criteria or
 - ii. the responsible party's assertion in order for it to be fairly stated; and
- c. communicate further as required by relevant AT-C sections.

Definitions

.04 For purposes of this section, the following terms have the meanings attributed as follows:

Appropriateness of review evidence. The measure of the quality of review evidence, that is, its relevancy and reliability in providing support for the practitioner's conclusion.

Review evidence. Information used by the practitioner in obtaining limited assurance on which the practitioner's review report is based.

* This section contains an "AT-C" identifier, instead of an "AT" identifier, to avoid confusion with references to existing "AT" sections, which remain effective through April 2017.

Sufficiency of review evidence. The measure of the quantity of review evidence. The quantity of the review evidence needed is affected by the risks of material misstatement and also by the quality of such evidence.

Requirements

Conduct of a Review Engagement

.05 In performing a review engagement, the practitioner should comply with this section, section 105, and any subject-matter AT-C section that is relevant to the engagement. A subject-matter AT-C section is relevant to the engagement when it is in effect, and the circumstances addressed by the AT-C section exist. (Ref: par. .A1)

.06 The practitioner should consider whether the nature of review procedures would enable the practitioner to obtain sufficient appropriate review evidence to obtain limited assurance. (Ref: par. .A2)

.07 A practitioner should not perform a review of (Ref: par. .A2)

- a. prospective financial information,
- b. internal control, or
- c. compliance with requirements of specified laws, regulations, rules, contracts, or grants.

Agreeing on the Terms of the Engagement

.08 The practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. (Ref: par. .A3)

.09 The agreed-upon terms of the engagement should include the following:

- a. The objective and scope of the engagement
- b. The responsibilities of the practitioner (Ref: par. .A4)
- c. A statement that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants
- d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different
- e. A statement that a review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or the assertion is fairly stated, in all material respects, in order to express an opinion, and that, accordingly, the practitioner will not express such an opinion
- f. Identification of the criteria for the measurement, evaluation, or disclosure of the subject matter
- g. An acknowledgement that the engaging party agrees to provide the practitioner with a representation letter at the conclusion of the engagement

.10 Although an engagement may recur, each engagement is considered a separate engagement. The practitioner should assess whether circumstances require revision to the terms of a preceding engagement. If the practitioner concludes that the terms of the preceding engagement need not be revised for the current engagement, the practitioner should remind the engaging party of the terms of the current engagement, and the reminder should be documented.

Requesting a Written Assertion

.11 The practitioner should request from the responsible party a written assertion about the measurement or evaluation of the subject matter against the criteria. When the engaging party is the responsible party and refuses to provide a written assertion, paragraph .59 requires the practitioner to withdraw from the engagement, when withdrawal is possible under applicable laws and regulations. When the engaging party is not the responsible party, and the responsible party refuses to provide a written assertion, the practitioner need not withdraw from the engagement. In that case, paragraph .60 requires the practitioner to disclose that refusal in the practitioner's report and restrict the use of the report to the engaging party. (Ref: par. .A5–.A8 and .A76)

Planning and Performing the Engagement

.12 The practitioner should set the scope, timing, and direction of the engagement and determine the nature, timing, and extent of the planned procedures that are required to be carried out in order to achieve the objectives of the engagement. (Ref: par. .A9–.A12)

.13 The practitioner should obtain an understanding of the subject matter and other engagement circumstances sufficient to provide a basis for designing and performing procedures in order to achieve the objectives of the engagement. That understanding should include the practices used to measure, recognize, and record the subject matter. (Ref: par. .A13)

Materiality in Planning and Performing the Engagement

.14 The practitioner should consider materiality when (Ref: par. .A14–.A19)

- planning and performing the review engagement, including when determining the nature, timing, and extent of procedures.
- evaluating whether the practitioner is aware of any material modifications that should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or the assertion in order for it to be fairly stated.

Procedures to Be Performed

.15 To obtain limited assurance, the practitioner should obtain sufficient appropriate review evidence in order to express a conclusion about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria, or the assertion, in order for it to be fairly stated.

.16 The practitioner should apply professional judgment in determining the specific nature, timing, and extent of review procedures. Based on (Ref: par. .A20–.A23)

- a.* the practitioner's understanding of

- i. the subject matter and the practices used by the responsible party to measure, recognize, and record the subject matter and
 - ii. the engagement circumstances, and
- b. the practitioner's awareness of the risk that the practitioner may unknowingly fail to modify the practitioner's report when the subject matter is materially misstated,

the practitioner should design and perform analytical procedures and make inquiries and perform other procedures, as appropriate, to accumulate review evidence in obtaining limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria, or the assertion, in order for it to be fairly stated.

.17 Analytical procedures may not be possible when the subject matter is qualitative, rather than quantitative. In those circumstances, the practitioner should perform other procedures, in addition to inquiries, that provide equivalent levels of review evidence. (Ref: par. .A24)

.18 The practitioner should place increased focus in those areas in which the practitioner believes there are increased risks that the subject matter may be materially misstated. (Ref: par. .A25–.A26)

Analytical Procedures

.19 When designing and performing analytical procedures, the practitioner should (Ref: par. .A27–.A28)

- a. determine the suitability of particular analytical procedures for the subject matter, taking into account the practitioner's awareness of risks;
- b. evaluate the reliability of data from which the practitioner's expectation is developed, taking into account the source, comparability, nature, and relevance of information available; and
- c. develop an expectation with respect to recorded amounts or ratios.

.20 If analytical procedures identify fluctuations or relationships that are inconsistent with other relevant information or that differ significantly from expected amounts or ratios, the practitioner should (Ref: par. .A29)

- a. inquire of the responsible party about such differences and
- b. consider the responses to these inquiries to determine whether other procedures are necessary in the circumstances.

Inquiries and Other Review Procedures

.21 The practitioner should inquire of the responsible party about the following: (Ref: par. .A30)

- a. Whether the subject matter has been prepared in accordance with (or based on) the criteria
- b. The practices used by the responsible party to measure, recognize, and record the subject matter
- c. Questions that have arisen in the course of applying the review procedures
- d. Communications from regulatory agencies or others, if relevant

.22 The practitioner should consider the reasonableness and consistency of the responsible party's responses in light of the results of other review procedures and the practitioner's knowledge of the subject matter, criteria, and responsible party.

Fraud, Laws, and Regulations

.23 The practitioner should make inquiries of appropriate parties to determine whether they have knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter.

.24 The practitioner should respond appropriately to fraud or suspected fraud and noncompliance or suspected noncompliance with laws or regulations affecting the subject matter that is identified during the engagement. (Ref: par. .A31–.A32)

Incorrect, Incomplete, or Otherwise Unsatisfactory Information

.25 During the performance of review procedures, if the practitioner becomes aware that information coming to the practitioner's attention is incorrect, incomplete, or otherwise unsatisfactory, the practitioner should request that the responsible party consider the effect of these matters on the subject matter and communicate the results of its consideration to the practitioner. The practitioner should consider the results communicated to the practitioner by the responsible party and the potential effect, if any, on the practitioner's report.

.26 If the practitioner believes the subject matter may be materially misstated, the practitioner should perform additional procedures sufficient to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or the assertion in order for it to be fairly stated.

Using the Work of a Practitioner's Specialist or Internal Auditors

.27 When the practitioner expects to use the work of a practitioner's specialist or internal auditors, the practitioner should apply the requirements in section 205, *Examination Engagements*, and the related application guidance, as appropriate, for a review engagement.¹

Evaluating the Results of Review Procedures

.28 The practitioner should accumulate misstatements identified during the engagement, other than those that are clearly trivial. (Ref: par. .A33–.A34)

.29 The practitioner should evaluate the sufficiency and appropriateness of the review evidence obtained in the context of the engagement and, if necessary, attempt to obtain further review evidence. The practitioner should consider all relevant review evidence, regardless of whether it appears to corroborate or contradict the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A35–.A37)

.30 If the practitioner concludes that the subject matter is materially misstated or is unable to obtain review evidence sufficient for limited assurance, the practitioner should consider the implications for the practitioner's conclusion in paragraphs .51–.60.

¹ Paragraphs .36–.44 of section 205, *Examination Engagements*.

Considering Subsequent Events and Subsequently Discovered Facts

.31 The practitioner should inquire whether the responsible party, and if different, the engaging party, is aware of any events subsequent to the period (or point in time) covered by the review engagement up to the date of the practitioner's report that could have a significant effect on the subject matter or assertion. If the practitioner becomes aware, through inquiry or otherwise, of such an event, or any other event that is of such a nature and significance that its disclosure is necessary to prevent users of the report from being misled, and information about that event is not adequately disclosed by the responsible party in the subject matter or in its assertion, the practitioner should take appropriate action. (Ref: par. .A38–.A40)

.32 The practitioner has no responsibility to perform any procedures regarding the subject matter or assertion after the date of the practitioner's report. Nevertheless, the practitioner should respond appropriately to facts that become known to the practitioner after the date of the report that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. (Ref: par. .A41–.A42)

Written Representations

.33 The practitioner should request from the responsible party written representations in the form of a letter addressed to the practitioner. The representations should (Ref: par. .A43–.A46)

- a. include the responsible party's assertion about the subject matter based on the criteria. (Ref: par. .A76)
- b. state that all relevant matters are reflected in the measurement or evaluation of the subject matter or assertion.
- c. state that all known matters contradicting the subject matter or assertion and any communication from regulatory agencies or others affecting the subject matter or assertion have been disclosed to the practitioner, including communications received between the end of the period addressed in the written assertion and the date of the practitioner's report.
- d. acknowledge responsibility for
 - i. the subject matter and the assertion;
 - ii. selecting the criteria, when applicable; and
 - iii. determining that such criteria are appropriate for the responsible party's purposes.
- e. state that any known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion have been disclosed to the practitioner. (Ref: par. .A45)
- f. state that it has provided the practitioner with all relevant information and access.
- g. if applicable, state that the responsible party believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the subject matter. (Ref: par. .A46)
- h. if applicable, state that significant assumptions used in making any material estimates are reasonable.
- i. state that the responsible party has disclosed to the practitioner

- i. all deficiencies in internal control relevant to the engagement of which the responsible party is aware;
- ii. its knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter; and
- iii. other matters as the practitioner deems appropriate.

.34 When the engaging party is not the responsible party, and the responsible party refuses to provide the representations in paragraph .33 in writing, the practitioner should make inquiries of the responsible party about, and seek oral responses to, the matters in paragraph .33. (Ref: par. .A47)

.35 When the engaging party is not the responsible party, the practitioner should request written representations from the engaging party, in addition to those requested from the responsible party, in the form of a letter addressed to the practitioner. The representations should

- a. acknowledge that the responsible party is responsible for the subject matter and assertion.
- b. acknowledge the engaging party's responsibility for selecting the criteria, when applicable.
- c. acknowledge the engaging party's responsibility for determining that such criteria are appropriate for its purposes.
- d. state that the engaging party is not aware of any material misstatements in the subject matter or assertion.
- e. state that the engaging party has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion. (Ref: par. .A45)
- f. address other matters as the practitioner deems appropriate.

.36 When written representations are directly related to matters that are material to the subject matter, the practitioner should

- a. evaluate their reasonableness and consistency with other review evidence obtained, including other representations (oral or written) and
- b. consider whether those making the representations can be expected to be well informed on the particular matters.

.37 The date of the written representations should be as of the date of the practitioner's report. The written representations should address the subject matter and periods covered by the practitioner's conclusion.

Requested Written Representations Not Provided or Are Unreliable

.38 When the engaging party is the responsible party, and one or more of the requested written representations are not provided, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should

- a. discuss the matter with the appropriate party(ies),
- b. reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may

have on the reliability of representations and review evidence in general, and

- c. if any of the matters are not resolved to the practitioner's satisfaction, withdraw from the engagement.

.39 When the engaging party is not the responsible party (Ref: par. .A47–.A49)

- a. if one or more of the requested representations are not provided in writing by the responsible party, but the practitioner receives satisfactory oral responses to the practitioner's inquiries performed in accordance with paragraph .34 sufficient to enable the practitioner to conclude that the practitioner has sufficient appropriate review evidence to form a conclusion about the subject matter, the practitioner's report should contain a separate paragraph that restricts the use of the practitioner's report to the engaging party. (Paragraphs .48–.49 contain requirements for the contents of such a paragraph.)
- b. if one or more of the requested representations are provided neither in writing nor orally from the responsible party in accordance with paragraph .34, a scope limitation exists, and the practitioner should withdraw from the engagement.

Other Information

.40 If prior to or after the release of the practitioner's report on subject matter or an assertion, the practitioner is willing to permit the inclusion of the practitioner's report in a document that contains the subject matter or assertion and other information, the practitioner should read the other information to identify material inconsistencies, if any, with the subject matter, assertion, or the practitioner's report. If on reading the other information, in the practitioner's professional judgment (Ref: par. .A50–.A51)

- a. a material inconsistency between that other information and the subject matter, assertion, or the practitioner's report exists, or
- b. a material misstatement of fact exists in the other information, the subject matter, assertion, or the practitioner's report

the practitioner should discuss the matter with the responsible party and take further action as appropriate.

Description of Criteria

.41 The practitioner should evaluate whether the written description of the subject matter or assertion adequately refers to or describes the criteria. (Ref: par. .A52–.A53)

Forming the Conclusion

.42 The practitioner should form a conclusion about whether the practitioner is aware of any material modifications that should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or to the responsible party's assertion in order for it to be fairly stated. In forming that conclusion, the practitioner should evaluate

- a. the practitioner's conclusion regarding the sufficiency and appropriateness of the review evidence obtained and (Ref: par. .A54)

- b. whether uncorrected misstatements are material, individually or in the aggregate. (Ref: par. .A55)

.43 The practitioner should evaluate, based on the review evidence obtained, whether the presentation of the subject matter or assertion is misleading within the context of the engagement. (Ref: par. .A56–.A57)

Preparing the Practitioner's Report

.44 The practitioner's report should be in writing. (Ref: par. .A58–.A59)

.45 A practitioner should report on a written assertion or should report directly on the subject matter. If the practitioner is reporting on the assertion, the assertion should be bound with or accompany the practitioner's report, or the assertion should be clearly stated in the report. (Ref: par. .A60)

Content of the Practitioner's Report

.46 The practitioner's report should include the following:

- a. A title that includes the word *independent*. (Ref: par. .A61)
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. An identification or description of the subject matter or assertion being reported on, including the point in time or period of time to which the measurement or evaluation of the subject matter or assertion relates.
- d. An identification of the criteria against which the subject matter was measured or evaluated. (Ref: par. .A62)
- e. A statement that identifies
 - i. the responsible party and its responsibility for the subject matter in accordance with (or based on) the criteria or for its assertion and (Ref: par. .A63–.A64)
 - ii. the practitioner's responsibility to express a conclusion on the subject matter or assertion, based on the practitioner's review. (Ref: par. .A63)
- f. A statement that
 - i. the practitioner's review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants.
 - ii. those standards require that the practitioner plan and perform the review to obtain limited assurance about whether any material modifications should be made to
 - (1) the subject matter in order for it to be in accordance with (or based on) the criteria (or equivalent language regarding the subject matter and criteria, such as the language used in the examples in paragraph .A65) or
 - (2) the responsible party's assertion in order for it to be fairly stated.
 - iii. a review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or

the responsible party's assertion is fairly stated, in all material respects, in order to express an opinion. Accordingly, the practitioner does not express such an opinion.

- iv. the practitioner believes the review provides a reasonable basis for the practitioner's conclusion.
- g. A statement that describes significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A66)
- h. The practitioner's conclusion about whether, based on the review, the practitioner is aware of any material modifications that should be made to (Ref: par. .A67–.A69)
 - i. the subject matter in order for it be in accordance with (or based on) the criteria (or equivalent language regarding the subject matter and criteria, such as the language used in the examples in paragraph .A67) or
 - ii. the responsible party's assertion in order for it to be fairly stated.
- i. The manual or printed signature of the practitioner's firm.
- j. The city and state where the practitioner practices. (Ref: par. .A70)
- k. The date of the report. (The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate review evidence on which to base the practitioner's conclusion, including evidence that
 - i. the attestation documentation has been reviewed,
 - ii. if applicable, the written presentation of the subject matter has been prepared, and
 - iii. the responsible party has provided a written assertion or, in the circumstance described in paragraph .A49, an oral assertion.) (Ref: par. .A71–.A72)

Restricted-Use Paragraph

.47 In the following circumstances, the practitioner's report should include an alert, in a separate paragraph, that restricts the use of the report: (Ref: par. .A73–.A76)

- a. The practitioner determines that the criteria used to evaluate the subject matter are appropriate only for a limited number of parties who either participated in their establishment or can be presumed to have an adequate understanding of the criteria.
- b. The criteria used to evaluate the subject matter are available only to specified parties.
- c. The engaging party is not the responsible party, and the responsible party does not provide the written representations required by paragraph .33, but does provide oral responses to the practitioner's inquiries about the matters in paragraph .33, as provided for in paragraphs .34 and .39a. In this case, use of the report should be restricted to the engaging party. (Ref: par. .A76)

.48 The alert should

- a. state that the practitioner's report is intended solely for the information and use of the specified parties,
- b. identify the specified parties for whom use is intended, and (Ref: par. .A77)

- c. state that the report is not intended to be, and should not be, used by anyone other than the specified parties. (Ref: par. .A78–.A80)

.49 When the engagement is also performed in accordance with *Government Auditing Standards*, the alert that restricts the use of the practitioner's report should include the following information, rather than the information required by paragraph .48:

- a. A description of the purpose of the report
- b. A statement that the report is not suitable for any other purpose

Reference to the Practitioner's Specialist

.50 The practitioner should not refer to the work of a practitioner's specialist in the practitioner's report containing an unmodified conclusion. (Ref: par. .A81)

Modified Conclusions

Misstatement of Subject Matter

.51 A practitioner who is engaged to perform a review engagement may become aware that the subject matter is misstated. If the misstatement is not corrected, the practitioner should consider whether qualification of the conclusion in the standard practitioner's report is adequate to disclose the misstatement of the subject matter. (Ref: par. .A82)

.52 When the practitioner qualifies the conclusion, the practitioner should include a separate paragraph in the practitioner's report that provides a description of the matter(s) giving rise to the qualification.

.53 The practitioner should express a qualified conclusion when the effects of a matter are material but not pervasive. A qualified conclusion is expressed as being "except for the effects" of the matter to which the qualification relates. When the effects of a matter are material and also pervasive, the practitioner should withdraw from the engagement, when withdrawal is possible under applicable laws and regulations. (Ref: par. .A83)

.54 If the practitioner has concluded that the material misstatement results in a qualified conclusion, the practitioner should report directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement.

.55 If the practitioner believes that qualification of the conclusion in the standard practitioner's report is not adequate to indicate the misstatements in the subject matter, the practitioner should withdraw from the engagement.

.56 The practitioner's conclusion on the subject matter or assertion should be clearly separated from any paragraphs emphasizing matters related to the subject matter or any other reporting responsibilities.

.57 When the conclusion is qualified, reference to an external specialist is permitted when such reference is relevant to an understanding of the qualification to the practitioner's conclusion. The practitioner should indicate in the practitioner's report that such reference does not reduce the practitioner's responsibility for that conclusion.

Scope Limitations

.58 If the practitioner is unable to obtain sufficient appropriate review evidence, a scope limitation exists. When a scope limitation exists, the practitioner

should withdraw from the engagement, when withdrawal is possible under applicable laws and regulations. (Ref: par. .A84–.A86)

Responsible Party Refuses to Provide a Written Assertion

.59 If the engaging party is the responsible party and refuses to provide the practitioner with a written assertion as required by paragraph .11, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation.

.60 When the engaging party is not the responsible party and the responsible party refuses to provide the practitioner with a written assertion, the practitioner may report on the subject matter but should disclose in the practitioner's report the responsible party's refusal to provide a written assertion and should restrict the use of the practitioner's report to the engaging party. (Ref: par. .A87–.A88)

Communication Responsibilities

.61 The practitioner should communicate to the responsible party known and suspected fraud and noncompliance with laws or regulations, as well as uncorrected misstatements. When the engaging party is not the responsible party, the practitioner should also communicate this information to the engaging party. (Ref: par. .A89)

Documentation

.62 The practitioner should prepare engagement documentation that is sufficient to determine (Ref: par. .A90–.A93)

- a. the nature, timing, and extent of the procedures performed to comply with relevant AT-C sections and applicable legal and regulatory requirements, including
 - i. the identifying characteristics of the specific items or matters tested;
 - ii. who performed the engagement work and the date such work was completed;
 - iii. the discussions with the responsible party or others about findings or issues that, in the practitioner's professional judgment, are significant, including the nature of the significant findings or issues discussed, and when and with whom the discussions took place;
 - iv. when the engaging party is the responsible party and the responsible party will not provide one or more of the requested written representations; the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations; or that the written representations are otherwise not reliable, the matters in paragraph .38;
 - v. when the engaging party is not the responsible party and the responsible party will not provide the written representations regarding the matters in paragraph .33, the oral responses from the responsible party to the practitioner's inquiries regarding the matters in paragraph .33, in accordance with paragraph .34; and

- vi. who reviewed the engagement work performed and the date and extent of such review.
- b. the results of the procedures performed and the review evidence obtained.

.63 If the practitioner identified information that is inconsistent with the practitioner's final conclusion regarding a significant finding or issue, the practitioner should document how the practitioner addressed the inconsistency.

.64 If, in circumstances such as those described in paragraph .32, the practitioner performs new or additional procedures or draws new conclusions after the date of the practitioner's report, the practitioner should document

- a. the circumstances encountered;
- b. the new or additional procedures performed, evidence obtained, and conclusions reached and their effect on the report; and
- c. when and by whom the resulting changes to the documentation were made and reviewed.

Application and Other Explanatory Material

Conduct of a Review Engagement (Ref: par. .05–.07)

.A1 For example, if a practitioner was reviewing pro forma financial information, section 105, this section, and section 310, *Reporting on Pro Forma Financial Information*, would be relevant.

.A2 Review procedures generally are limited to inquiries and analytical procedures. In circumstances in which inquiry and analytical procedures are not expected to provide sufficient appropriate review evidence, or when the nature of the subject matter does not lend itself to the application of analytical procedures, the practitioner may perform other procedures that he or she believes can provide the practitioner with a level of assurance equivalent to that which inquiries and analytical procedures would have provided. If the practitioner cannot design other procedures to obtain sufficient appropriate review evidence, a review engagement may not be appropriate.

Agreeing on the Terms of the Engagement (Ref: par. .08 and .09b)

.A3 It is in the interests of both the engaging party and the practitioner to document the agreed-upon terms of the engagement before the commencement of the engagement to help avoid misunderstandings. The form and content of the engagement letter or other suitable form of written agreement will vary with the engagement circumstances.

.A4 A practitioner may further describe the responsibilities of the practitioner by adding the following items to the engagement letter or other suitable form of written agreement:

- a. A statement that a review is designed to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria
- b. A statement that the objective of a review is the expression of a conclusion in a written practitioner's report about whether the

practitioner is aware of any material modifications that should be made to

- i. the subject matter in order for it be in accordance with (or based on) the criteria or
- ii. the responsible party's assertion in order for it to be fairly stated

Requesting a Written Assertion (Ref: par. .11)

.A5 The language of the responsible party's written assertion in paragraph .11 may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .11 include the following:

- The subject matter is presented in accordance with (or based on) the criteria.
- The subject matter achieved the objectives, for example, when the objectives are the criteria.

.A6 Situations may arise in which the current responsible party was not present during some or all of the period covered by the practitioner's report. Such persons may contend that they are not in a position to provide a written assertion that covers the entire period because they were not in place during some or all of the period. This fact, however, does not diminish such persons' responsibilities for the subject matter as a whole. Accordingly, the requirement for the practitioner to request a written assertion from the responsible party that covers the entire relevant period(s) still applies.

.A7 Paragraph .33a requires the practitioner to request a written representation from the responsible party that is the same as the responsible party's assertion. If the responsible party provides the practitioner with the written representation in paragraph .33a, the practitioner need not request a separate written assertion, unless a separate written assertion is called for by the engagement circumstances. (Ref: par. .11)

.A8 A practitioner may also be engaged to assist the responsible party in measuring or evaluating the subject matter against the criteria in connection with the responsible party providing a written assertion. Regardless of the procedures performed by the practitioner, the responsible party is required to accept responsibility for its assertion and the subject matter and may not base its assertion solely on the practitioner's procedures.²

Planning and Performing the Engagement (Ref: par. .12–.13)

.A9 Planning involves the engagement partner and other key members of the engagement team and may involve the practitioner's specialists. Adequate planning helps the practitioner devote appropriate attention to important areas of the engagement, identify potential problems on a timely basis, and properly organize and manage the engagement in order for it to be performed in an effective and efficient manner. Adequate planning also assists the practitioner in properly assigning work to engagement team members, and facilitates the direction, supervision, and the review of their work. Further, it assists, when applicable, the coordination of work performed by other practitioners and practitioner's specialists. The nature and extent of planning activities will vary

² The "Nonattest Services" subtopic (ET sec. 1.295) of the AICPA Code of Professional Conduct addresses the practitioner's provision of nonattest services for an attest client.

with the engagement circumstances, for example, the complexity of the assessment or evaluation of the subject matter and the practitioner's previous experience with it. Examples of relevant matters that may be considered include the following:

- The characteristics of the engagement that define its scope, including the terms of the engagement, the characteristics of the underlying subject matter, and the criteria
- The expected timing and nature of the communications required
- The results of preliminary engagement activities, such as client acceptance, and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the appropriate party(ies) is relevant
- The engagement process, including possible sources of review evidence, and choices among alternative measurement or evaluation methods
- The practitioner's understanding of the appropriate party(ies) and its (their) environment, including the risks that the subject matter may be materially misstated
- Identification of intended users and their information needs and consideration of materiality and the components of attestation risk
- The risk of fraud relevant to the engagement
- The effect on the engagement of using the internal audit function

.A10 The practitioner may decide to discuss elements of planning with the appropriate party(ies) to facilitate the conduct and management of the engagement (for example, to coordinate some of the planned procedures with the work of the responsible party's personnel). Although these discussions often occur, the elements of planning remain the practitioner's responsibility. When discussing planning matters, care is needed to avoid compromising the effectiveness of the engagement. For example, discussing the nature and timing of detailed procedures with the responsible party may compromise the effectiveness of the engagement by making the procedures too predictable.

.A11 Planning is not a discrete phase but, rather, a cumulative and iterative process throughout the engagement. As a result of unexpected events, changes in conditions, or review evidence obtained, the practitioner may need to revise the nature, timing, and extent of planned procedures.

.A12 In smaller or less complex engagements, the entire engagement may be conducted by a very small engagement team, possibly involving the engagement partner (who may be a sole practitioner) working without any other engagement team members. With a smaller team, coordination of, and communication among, team members is easier. In such cases, planning the engagement need not be a complex or time-consuming exercise; it varies according to the size of the entity, the complexity of the engagement, and the size of the engagement team.

.A13 Obtaining an understanding of the subject matter and other engagement circumstances provides the practitioner with a frame of reference for exercising professional judgment throughout the engagement, for example, when

- considering the characteristics of the subject matter;
- assessing the suitability of the criteria;

- considering the factors that, in the practitioner's professional judgment, are significant in directing the engagement team's efforts, including situations in which special consideration may be necessary (for example, when there is a need for specialized skills or the work of a specialist);
- establishing and evaluating the continued appropriateness of quantitative materiality levels (when appropriate) and considering qualitative materiality factors;
- developing expectations when performing analytical procedures;
- designing and performing procedures; and
- evaluating review evidence, including the reasonableness of the written representations received by the practitioner.

In some review engagements, the practitioner may obtain an understanding of internal control over the measurement, evaluation, or disclosure of the subject matter.

Materiality in Planning and Performing the Engagement **(Ref: par. .14)**

.A14 Materiality is considered in the context of qualitative factors and, when applicable, quantitative factors. The relative importance of qualitative factors and quantitative factors when considering materiality in a particular engagement is a matter for the practitioner's professional judgment.

.A15 Professional judgments about materiality are made in light of surrounding circumstances, but they are not affected by the level of assurance, that is, for the same intended users, materiality for a review engagement is the same as it is for an examination engagement because materiality is based on the information needs of intended users and not the level of assurance.

.A16 In general, misstatements, including omissions, are considered to be material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by intended users based on the subject matter. The practitioner's consideration of materiality is a matter of professional judgment and is affected by the practitioner's perception of the common information needs of intended users as a group. For purposes of determining materiality, the practitioner may assume that intended users

- a. have a reasonable knowledge of the subject matter and a willingness to study the subject matter with reasonable diligence.
- b. understand that the subject matter is measured or evaluated and reviewed to appropriate levels of materiality and have an understanding of any materiality concepts included in the criteria.
- c. understand any inherent uncertainties involved in measuring or evaluating the subject matter.
- d. make reasonable judgments based on the subject matter.

Unless the engagement has been designed to meet the particular information needs of specific users, the possible effect of misstatements on specific users, whose information needs may vary widely, is not ordinarily considered. [As amended, effective for practitioners' review reports dated on or after December 15, 2020, by SSAE No. 20.]

.A17 Qualitative factors may include the following:

- The interaction between, and relative importance of, various aspects of the subject matter, such as numerous performance indicators
- The wording chosen with respect to subject matter that is expressed in narrative form, for example, the wording chosen does not omit or distort the information
- The characteristics of the presentation adopted for the subject matter when the criteria allow for variations in that presentation
- The nature of a misstatement
- Whether a misstatement affects compliance with laws or regulations
- In the case of periodic reporting on a subject matter, the effect of an adjustment that affects past or current information about the subject matter or is likely to affect future information about the subject matter
- Whether a misstatement is the result of an intentional act or is unintentional
- Whether a misstatement is significant with regard to the practitioner's understanding of known previous communications to users, for example, in relation to the expected outcome of the measurement or evaluation of the subject matter
- Whether a misstatement relates to the relationship between the responsible party and, if different, the engaging party or its relationship with other parties

.A18 Quantitative factors relate to the magnitude of misstatements relative to reported amounts for those aspects of the subject matter, if any, that are

- expressed numerically or
- otherwise related to numerical values.

.A19 The criteria may discuss the concept of materiality in the context of the preparation and presentation of the subject matter and thereby provide a frame of reference for the practitioner in considering materiality for the engagement. Although criteria may discuss materiality in different terms, the concept of materiality generally includes the matters discussed in paragraphs .A14–.A18. If the criteria do not include a discussion of the concept of materiality, these paragraphs provide the practitioner with a frame of reference.

Procedures to Be Performed (Ref: par. .16–.18)

.A20 Review evidence obtained through the performance of analytical procedures and inquiry will ordinarily provide the practitioner with a reasonable basis for obtaining limited assurance. However, the practitioner may determine it is appropriate to perform additional procedures if the practitioner determines such procedures to be necessary in order to meet the objectives of this section.

.A21 The degree to which procedures beyond analytical procedures and inquiry may be performed may be influenced by factors specific to the engagement. The practitioner may substitute other procedures that provide equivalent levels of review evidence.

.A22 Information may come to the practitioner's attention that differs significantly from that on which the determination of planned procedures was

based. As the practitioner performs planned procedures, the review evidence obtained may cause the practitioner to perform additional procedures. Such procedures may include asking the responsible party to examine the matter identified by the practitioner and to make adjustments to the subject matter, if appropriate.

.A23 In some cases, a subject-matter AT-C section may include requirements that affect the nature, timing, and extent of procedures. For example, a subject-matter AT-C section may describe the nature or extent of particular procedures to be performed in a particular type of engagement. Even in such cases, determining the exact nature, timing, and extent of procedures is a matter of professional judgment and will vary from one engagement to the next.

.A24 Review procedures generally are limited to inquiries and analytical procedures. In circumstances in which inquiry and analytical procedures are not expected to provide sufficient appropriate review evidence, or when the nature of the subject matter does not lend itself to the application of analytical procedures, the practitioner may perform other procedures that he or she believes can provide the practitioner with a level of assurance equivalent to that which inquiries and analytical procedures would have provided. If the practitioner cannot design other procedures to obtain sufficient appropriate review evidence, a review engagement may not be appropriate.

.A25 The results of the practitioner's analytical procedures and inquiries may modify the practitioner's risk awareness.

.A26 The practitioner may become aware of a matter(s) that causes the practitioner to believe that the subject matter may be materially misstated when, for example, performing analytical procedures if the practitioner identifies a fluctuation or relationship that is inconsistent with other relevant information or that differs significantly from expected amounts or ratios. In such cases, the practitioner's investigation of such differences may include inquiring of the responsible party or performing other procedures as appropriate in the circumstances.

Analytical Procedures (Ref: par. .19–.20)

.A27 An understanding of the purposes of analytical procedures and the limitations of those procedures is important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires professional judgment by the practitioner.

.A28 Analytical procedures involve comparisons of expectations developed by the practitioner to recorded amounts or ratios developed from recorded amounts. The practitioner develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the practitioner's understanding of the subject matter; the practices used by the responsible party to measure, recognize, and record the subject matter; and, if applicable, the industry in which the entity operates.

.A29 Analytical procedures in a review engagement are not designed to identify misstatements with the level of precision expected in an examination engagement. Further, when significant fluctuations, relationships, or differences are identified, appropriate review evidence in a review engagement may often be obtained by making inquiries of the responsible party and considering responses received in the light of known engagement circumstances without obtaining additional evidence required in the case of an examination engagement.

Inquiries and Other Review Procedures (Ref: par. .21)

.A30 The practitioner is not ordinarily required to corroborate the responsible party's responses with other review evidence.

Fraud, Laws, and Regulations (Ref: par. .24)

.A31 In responding to fraud or suspected fraud identified during the engagement, it may be appropriate, unless prohibited by law, regulation, or ethics standards, for the practitioner to, for example

- discuss the matter with the appropriate party(ies).
- request that the responsible party consult with an appropriately qualified third party, such as the entity's legal counsel or a regulator.
- consider the implications of the matter in relation to other aspects of the engagement, including the practitioner's planning and the reliability of written representations from the responsible party.
- obtain legal advice about the consequences of different courses of action.
- communicate with third parties (for example, a regulator).
- withdraw from the engagement.

.A32 The actions noted in paragraph .A31 also may be appropriate in responding to noncompliance or suspected noncompliance with laws or regulations identified during the engagement. It may also be appropriate to describe the matter in a separate paragraph of the practitioner's report, unless the practitioner

- a. is precluded by the responsible party from obtaining sufficient appropriate review evidence to evaluate whether noncompliance that may be material to the subject matter has, or is likely to have, occurred, in which case, paragraph .58 applies or
- b. concludes that the noncompliance results in a material misstatement of the subject matter, in which case, paragraphs .51–.57 apply.

Evaluating the Results of Review Procedures (Ref: par. .28–.29)

.A33 Uncorrected misstatements are accumulated during the engagement for the purpose of evaluating whether, individually or in aggregate, they are material when forming the practitioner's conclusion. (See paragraph .42b.)

.A34 "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a wholly different (smaller) order of magnitude than materiality and will be matters that are clearly inconsequential, whether taken individually or in the aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the matter is considered not to be clearly trivial.

.A35 Sufficient appropriate review evidence is necessary to support the practitioner's conclusion and report.

.A36 The sufficiency and appropriateness of review evidence are interrelated. Sufficiency of review evidence is the measure of the quantity of review

evidence. The quantity of the review evidence needed is affected by the risks of material misstatement and also by the quality of such review evidence.

.A37 Whether sufficient appropriate review evidence has been obtained on which to base the practitioner's conclusion is a matter of professional judgment.

Considering Subsequent Events and Subsequently Discovered Facts (Ref: par. .31–.32)

.A38 For certain subject-matter AT-C sections, specific subsequent events requirements and related application guidance have been developed for engagement performance and reporting.

.A39 Procedures that a practitioner may perform to identify subsequent events include inquiring about and considering information

- contained in relevant reports issued during the subsequent period by internal auditors, other practitioners, or regulatory agencies
- obtained through other professional engagements for that entity

.A40 If the responsible party refuses to disclose a subsequent event for which disclosure is necessary to prevent users of the practitioner's report from being misled, appropriate actions the practitioner may take include

- disclosing the event in the report and modifying the practitioner's conclusion.
- withdrawing from the engagement.

.A41 Subsequent to the date of the practitioner's report, the practitioner may become aware of facts that, had they been known to the practitioner at that date, may have caused the practitioner to revise the report. In such circumstances, the practitioner undertakes to determine whether the facts existed at the date of the report and, if so, whether persons are currently using or likely to use the report and related subject matter or assertion who would attach importance to these facts. This may include discussing the matter with the appropriate party(ies) and requesting the appropriate party(ies)'s cooperation in whatever investigation or further action that may be necessary. The specific actions to be taken in a particular case by the appropriate party(ies) and the practitioner may vary with the circumstances. Consideration may be given to, among other things, the time elapsed since the date of the report and whether issuance of a subsequent report is imminent. The practitioner may need to perform additional procedures deemed necessary to determine whether the subject matter or assertion needs revision and whether the previously issued report continues to be appropriate.

.A42 Depending on the circumstances, the practitioner may determine that notification of the situation by the appropriate party(ies) to persons who would attach importance to these facts and who are currently using, or are likely to use, the practitioner's report who would attach importance to the facts is necessary. This may be the case, for example, when

- a. the report is not to be relied upon because the subject matter or assertion needs revision or the practitioner is unable to determine whether revision is necessary, and
- b. issuance of a subsequent report is not imminent.

If the appropriate party(ies) failed to take the necessary steps to prevent reliance on the report, the practitioner's course of action depends upon the practitioner's legal and ethical rights and obligations. Consequently, the practitioner may consider it appropriate to seek legal advice prior to making any disclosure

of the situation. Disclosure of the situation directly by the practitioner may include a description of the nature of the matter and of its effect on the subject matter or assertion and the report, avoiding comments concerning the conduct or motives of any person.

Written Representations (Ref: par. .33–.34, .35e, and .39a)

.A43 Written confirmation of oral representations reduces the possibility of misunderstandings between the practitioner and the responsible party. The person(s) from whom the practitioner requests written representations is ordinarily a member of senior management or those charged with governance depending on, for example, the management and governance structure of the responsible party(ies), which may vary by entity, reflecting influences such as size and ownership characteristics.

.A44 Representations by the responsible party cannot replace other review evidence the practitioner could reasonably expect to be available. Although written representations provide review evidence, they do not provide sufficient appropriate review evidence on their own about any of the matters with which they deal. Furthermore, the fact that the practitioner has received reliable written representations does not affect the nature or extent of other review evidence that the practitioner obtains.

.A45 A discussion of what is considered a material effect on the subject matter or assertion may be included explicitly in the representation letter in qualitative or quantitative terms.

.A46 A summary of uncorrected misstatements ordinarily is included in or attached to the written representation.

.A47 Certain subject-matter AT-C sections do not permit the practitioner to perform the alternative procedures described in paragraphs .34 and .39a (making inquiries of the responsible party and restricting the use of the practitioner's report).

Requested Written Representations Not Provided or Not Reliable (Ref: par. .39)

.A48 Even when the responsible party provides oral responses to the matters in paragraph .33, the practitioner may find it appropriate to consider whether there are significant concerns about the competence, integrity, ethical values, or diligence of those providing the oral responses or whether the oral responses are otherwise not reliable and the potential effect, if any, on the practitioner's report.

.A49 Paragraph .11 provides an exception to the requirement for a written assertion when the engaging party is not the responsible party. Nonetheless, because the assertion is the representation called for by paragraph .33a, application of paragraph .39a requires the practitioner to obtain an oral assertion, when a written assertion is not obtained. Paragraph .39b applies when the responsible party provides neither a written nor an oral assertion.

Other Information (Ref: par. .40)

.A50 Further actions that may be appropriate if the practitioner identifies a material inconsistency or becomes aware of a material misstatement of fact include, for example, the following:

- Requesting the appropriate party(ies) to consult with a qualified third party, such as the appropriate party(ies)'s legal counsel
- Obtaining legal advice about the consequences of different courses of action
- If required or permissible, communicating with third parties (for example, a regulator)
- Describing the material inconsistency in the practitioner's report
- Withdrawing from the engagement, when withdrawal is possible under applicable law or regulation

.A51 Other information does not include information contained on the appropriate party(ies)'s website. Websites are a means of distributing information and are not, themselves, documents for the purposes of paragraph .40.

Description of Criteria (Ref: par. .41)

.A52 The description of the criteria on which the subject matter or assertion is based is particularly important when there are significant differences between various criteria regarding how particular matters may be treated in the subject matter.

.A53 A description of the criteria that states that the subject matter is prepared in accordance with (or based on) particular criteria is appropriate only if the subject matter complies with all relevant requirements of those criteria that are effective.

Forming the Conclusion (Ref: par. .42–.43)

.A54 The practitioner's professional judgment regarding what constitutes sufficient appropriate review evidence is influenced by such factors as the following:

- The significance of a potential misstatement and the likelihood that it will have a material effect, individually or aggregated with other potential misstatements, on the subject matter or assertion
- The effectiveness of the responsible party's responses to address the known risks
- The experience gained during previous examination or review engagements with respect to similar potential misstatements
- The results of procedures performed, including whether such procedures identified specific misstatements
- The source and reliability of the available information
- The persuasiveness of the review evidence
- The practitioner's understanding of the responsible party and its environment

.A55 A review engagement is a cumulative and iterative process. As the practitioner performs planned procedures, the review evidence obtained may cause the practitioner to change the nature, timing, or extent of other planned procedures. Information that differs significantly from the information on which the planned procedures were based may come to the practitioner's attention, for example

- the extent of the misstatements that the practitioner detects is greater than expected. (This may alter the practitioner's

professional judgment about the reliability of particular sources of information.)

- the practitioner may become aware of discrepancies in relevant information or conflicting or missing review evidence.
- procedures performed toward the end of the engagement may indicate a previously unrecognized risk of material misstatement. In such circumstances, the practitioner may need to reevaluate the planned procedures.

.A56 In making the evaluation required by paragraph .43, the practitioner may consider whether additional disclosures are necessary to describe the subject matter, assertion, or criteria. Additional disclosures may, for example, include

- the measurement or evaluation methods used when the criteria allow for choice among methods;
- significant interpretations made in applying the criteria in the engagement circumstances;
- subsequent events, depending on their nature and significance; and
- whether there have been any changes in the measurement or evaluation methods used.

.A57 Paragraph .43 does not require the practitioner to determine whether the presentation discloses all matters related to the subject matter, assertion, or criteria or all matters users may consider in making decisions based on the presentation.

Preparing the Practitioner's Report (Ref: par. .44–.45)

.A58 Oral and other forms of expressing a conclusion can be misunderstood without the support of a written practitioner's report. For this reason, the practitioner may not report orally or by use of symbols (such as a web seal) under the attestation standards without also providing a written report that is readily available whenever the oral report is provided or the symbol is used. For example, a symbol could be hyperlinked to a written report on the Internet.

.A59 This section does not require a standardized format for reporting on all review engagements. Instead, it identifies the basic elements that the practitioner's report is to include. The report is tailored to the specific engagement circumstances. The practitioner may use headings, separate paragraphs, paragraph numbers, typographical devices (for example, the bolding of text), and other mechanisms to enhance the clarity and readability of the report.

.A60 All of the following reporting options are available to a practitioner, except when the circumstances described in paragraph .54 exist.

<i>The practitioner's report may state that the practitioner examined</i>	<i>and</i>	<i>expresses an opinion on</i>
the subject matter		the subject matter
the responsible party's assertion		the responsible party's assertion
the responsible party's assertion		the subject matter

Content of the Practitioner's Report

Title (Ref: par. .46a)

.A61 A title indicating that the practitioner's report is the report of an independent practitioner (for example, "Independent Practitioner's Report," "Report of Independent Certified Public Accountant," or "Independent Accountant's Review Report") affirms that the practitioner has met all the relevant ethical requirements regarding independence and, therefore, distinguishes the independent practitioner's report from reports issued by others.

Criteria (Ref: par. .46d)

.A62 The practitioner's report may include the criteria or refer to them if they are included in the subject matter presentation, in the assertion, or are otherwise readily available.

Relative Responsibilities (Ref: par. .46e)

.A63 Identifying relative responsibilities informs the intended users that the responsible party is responsible for the subject matter, and the practitioner's role is to independently express a conclusion about it.

.A64 The practitioner may wish to expand the discussion of the responsible party's responsibility, for example, to indicate that the responsible party is responsible for the preparation and presentation of the subject matter in accordance with (or based on) the criteria, including the design, implementation, and maintenance of internal control to prevent, or detect and correct, misstatement of the subject matter, due to fraud or error.

Statement About the Subject Matter and Criteria (Ref: par. 46f(ii)(1))

.A65 The language in paragraph .46f(ii)(1) may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .46f(ii)(1) include, "to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to

- be presented in accordance with (or based on) the criteria."
- meet the objectives," for example, when the objectives are the criteria.

Inherent Limitations (Ref: par. .46g)

.A66 In some cases, identification of specific inherent limitations may be required by an AT-C section. To communicate specific inherent limitations, the illustrative practitioner's report on a review of pro forma financial information under section 310, for example, indicates that the objective of pro forma financial information is to show what the significant effects on the historical financial information might have been had the transaction (or event) occurred at an earlier date and that the pro forma condensed financial statements are not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the specified transaction (or event) actually occurred earlier.³ When not explicitly required by an AT-C section, identification in the report of inherent limitations is based on the practitioner's judgment.

³ Paragraph .18k and examples 2 and 3 in paragraph .A24 of section 310, *Reporting on Pro Forma Financial Information*.

Conclusion (Ref: par. .46h)

.A67 The practitioner's conclusion can be worded either in terms of the subject matter and the criteria (for example, "Based on our review, we are not aware of any material modifications that should be made to the XYZ schedule in order for it to be in accordance with [or based on] the ABC criteria.") or in terms of an assertion made by the responsible party (for example, "Based on our review, we are not aware of any material modifications that should be made to management of XYZ Company's assertion in order for it to be fairly stated.").

.A68 A single practitioner's report may cover more than one aspect of a subject matter or an assertion about the subject matter. When that is the case, the report may contain separate opinions or conclusions on each aspect of the subject matter or assertion (for example, examination level related to some aspects or assertions and review level related to others, or an unmodified conclusion on some aspects or assertions and a modified conclusion on others).

.A69 A practitioner may report on subject matter or an assertion at multiple dates or covering multiple periods during which criteria have changed (for example, a practitioner's report on comparative information). Criteria are clearly described when they identify the criteria for each period and how the criteria have changed from one period to the next. If the criteria for the current date or period have changed from the criteria for a preceding date or period, changes in the criteria may be significant to users of the report. If so, the criteria and the fact that they have changed may be disclosed in the presentation of the subject matter, in the written assertion, or in the report, even if the subject matter for the preceding date or period is not presented.

Location (Ref: par. .46j)

.A70 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country.

Date (Ref: par. .46k)

.A71 Including the date of the practitioner's report informs the intended users that the practitioner has considered the effect on the subject matter and on the report of events that occurred up to that date.

.A72 Because the practitioner expresses a conclusion on the subject matter or assertion and the subject matter or assertion is the responsibility of the responsible party, the practitioner is not in a position to conclude that sufficient appropriate review evidence has been obtained until evidence is obtained that all of the elements that the subject matter or assertion comprises, including any related notes, when applicable, have been prepared, and the responsible party has accepted responsibility for them.

Restricted Use Paragraph (Ref: par. .47 and .48b–c)

.A73 A practitioner's report for which the conditions in paragraph .47 do not apply need not include an alert that restricts its use. However, nothing in the attestation standards precludes a practitioner from including such an alert in any practitioner's report or other practitioner's written communication.

.A74 A practitioner's report that is required by paragraph .47 to include an alert that restricts the use of the report may be included in a document that also contains a practitioner's report that is for general use. In such circumstances, the use of the general use report is not affected.

.A75 A practitioner may also issue a single combined practitioner's report that includes (a) a practitioner's report that is required by paragraph .47 to

include an alert that restricts its use, and (b) a report that is for general use. If these two types of reports are clearly differentiated within the combined report, such as through the use of appropriate headers, the alert that restricts the use of the report may be limited to the report required by paragraph .47 to include such an alert. In such circumstances, the use of the general use report is not affected.

.A76 The representations required by paragraph .33 include an assertion. If the engaging party is not the responsible party and the responsible party provides an oral assertion, rather than a written assertion, paragraph .47c calls for an alert that restricts the use of the practitioner's report to the engaging party.

.A77 The practitioner may identify the specified parties by naming them, referring to a list of those parties, or identifying the class of parties, for example, "all customers of XYZ Company during some or all of the period January 1, 20XX to December 31, 20XX." The method of identifying the specified parties is determined by the practitioner.

.A78 In some cases, the criteria used to measure or evaluate the subject matter may be designed for a specific purpose. For example, a regulator may require certain entities to use particular criteria designed for regulatory purposes. To avoid misunderstandings, the practitioner alerts users of the practitioner's report to this fact and, therefore, that the report is intended solely for the information and use of the specified parties.

.A79 The alert that restricts the use of the practitioner's report is designed to avoid misunderstandings related to the use of the report, particularly if the report is taken out of the context in which the report is intended to be used. A practitioner may consider informing the responsible party and, if different, the engaging party or other specified parties that the report is not intended for distribution to parties other than those specified in the report. The practitioner may, in connection with establishing the terms of the engagement, reach an understanding with the responsible party or, if different, the engaging party, that the intended use of the report will be restricted and may obtain the responsible party's agreement that the responsible party and specified parties will not distribute such report to parties other than those identified therein. A practitioner is not responsible for controlling, and cannot control, distribution of the report after its release.

.A80 In some cases, a restricted-use practitioner's report filed with regulatory agencies is required by law or regulation to be made available to the public as a matter of public record. Also, a regulatory agency, as part of its oversight responsibility for an entity, may require access to the restricted-use report in which it is not named as a specified party.

Reference to the Practitioner's Specialist (Ref: par. .50)

.A81 The practitioner has sole responsibility for the conclusion expressed, and that responsibility is not reduced by the practitioner's use of the work of a practitioner's specialist.

Modified Conclusions (Ref: par. .51–.53)

.A82 A practitioner may issue an unmodified conclusion only when the engagement has been conducted in accordance with the attestation standards. Such standards will not have been complied with if the practitioner has been unable to apply all the procedures that the practitioner considers necessary in the circumstances.

.A83 Pervasive effects on the subject matter are those that, in the practitioner's professional judgment

- a. are not confined to specific aspects of the subject matter;
- b. if so confined, represent or could represent a substantial proportion of the subject matter; or
- c. in relation to disclosures, are fundamental to the intended users' understanding of the subject matter.

Scope Limitations (Ref: par. .58)

.A84 The procedures performed in a review engagement are, by definition, limited compared with those performed in an examination engagement. Limitations known to exist prior to accepting a review engagement are a relevant consideration when establishing whether the preconditions for a review engagement are present, in particular, whether the practitioner expects to be able to obtain the evidence needed to arrive at the practitioner's conclusion. (See section 105.)⁴ If a further limitation is imposed by the appropriate party(ies) after a review engagement has been accepted, it may be appropriate to withdraw from the engagement, when withdrawal is possible under applicable laws and regulations.

.A85 The inability to obtain written representations from the responsible party ordinarily would result in a scope limitation. However, when the engaging party is not the responsible party, paragraph .34 enables the practitioner to make inquiries of the responsible party, and if the responsible party's oral responses enable the practitioner to conclude that the practitioner has sufficient appropriate review evidence to form a conclusion about the subject matter, paragraph .39a indicates that this would not cause a scope limitation. Further, paragraph .39a requires that the practitioner's report, in these circumstances, contain an alert paragraph that restricts the use of the report to the engaging party.

.A86 An inability to perform a specific procedure does not constitute a scope limitation if the practitioner is able to obtain sufficient appropriate review evidence by performing alternative procedures.

Responsible Party Refuses to Provide a Written Assertion (Ref: par. .60)

.A87 The following is an example of the disclosure required by paragraph .60:

Attestation standards established by the American Institute of Certified Public Accountants require that we request a written statement from *[identify the responsible party]* stating that *[identify the subject matter]* that we reviewed has been accurately measured or evaluated. We requested that *[identify the responsible party]* provide such a written statement but *[identify the responsible party]* refused to do so.

.A88 The practitioner's report discussed in paragraph .60 is appropriate only when the engagement is to report on the subject matter; it is not appropriate for a report on an assertion. When reporting on an assertion, the practitioner is required to obtain a written assertion from the responsible party.

⁴ Paragraph .25b(iii) of section 105, *Concepts Common to All Attestation Engagements*.

Communication Responsibilities (Ref: par. .61)

.A89 Other matters that may be appropriate to communicate to the responsible party or, if different, the engaging party, include deficiencies in internal control identified during the engagement, or bias in the measurement, evaluation, or disclosure of the subject matter.

Documentation (Ref: par. .62)

.A90 Documentation includes a record of the practitioner's reasoning on all significant findings or issues that require the exercise of professional judgment and related conclusions. The existence of difficult questions of principle or professional judgment calls for the documentation to include the relevant facts that were known by the practitioner at the time the conclusion was reached.

.A91 It is neither necessary nor practical to document every matter considered, or professional judgment made, during an engagement. Further, it is unnecessary for the practitioner to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included in the engagement file. Similarly, the practitioner need not include in the engagement file superseded drafts of working papers, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.A92 In applying professional judgment to assess the extent of documentation to be prepared and retained, the practitioner may consider what is necessary to provide an experienced practitioner, having no previous connection with the engagement, with an understanding of the work performed and the basis of the principal decisions made.

.A93 Documentation ordinarily includes a record of

- issues identified with respect to compliance with relevant ethical requirements and how they were resolved.
- conclusions on compliance with independence requirements that apply to the engagement and any relevant discussions with the firm that support these conclusions.
- conclusions reached regarding the acceptance and continuance of client relationships and attestation engagements.
- the nature and scope of, and conclusions resulting from, consultations undertaken during the course of the engagement.

.A94

Exhibit — Illustrative Practitioner's Review Reports

The illustrative practitioner's review reports in this exhibit meet the applicable reporting requirements in paragraphs .44–.60. A practitioner may use alternative language in drafting a review report, provided that the language meets the applicable requirements in paragraphs .44–.60. The criteria for evaluating the subject matter in examples 1 and 3 have been determined by the practitioner to be suitable and available to all users of the report; therefore, these reports may be for general use. The criteria for evaluating the subject matter in example 2 are suitable but available only to specified parties; therefore, use of this report is restricted to the specified parties who either participated in the establishment of the criteria or can be presumed to have an adequate understanding of the criteria. (See paragraph .48 for the information to be included in a separate paragraph of the report that contains an alert that restricts the use of the report and paragraph .49 for the content of that paragraph when the engagement is also performed in accordance with *Government Auditing Standards*.)

Example 1: Practitioner's Review Report on Subject Matter; Unmodified Conclusion

The following is an illustrative practitioner's review report in which the practitioner has reviewed the subject matter and is reporting on the subject matter.

Independent Accountant's Review Report

[Appropriate Addressee]

We have reviewed [identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]. XYZ Company's management is responsible for [identify the subject matter, for example, presenting the schedule of investment returns] in accordance with (or based on) [identify the criteria, for example, the ABC criteria set forth in Note 1]. Our responsibility is to express a conclusion on [identify the subject matter, for example, the schedule of investment returns] based on our review.

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to [identify the subject matter, for example, the schedule of investment returns] in order for it to be in accordance with (or based on) the criteria. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether [identify the subject matter, for example, the schedule of investment returns] is in accordance with (or based on) the criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. We believe that our review provides a reasonable basis for our conclusion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Based on our review, we are not aware of any material modifications that should be made to *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, in order for it to be in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*.

[Date of practitioner's report]

Example 2: Practitioner's Review Report on an Assertion; Unmodified Conclusion; Use of the Report Is Restricted to Specified Parties

The following is an illustrative practitioner's report for a review engagement in which the practitioner has reviewed the responsible party's assertion and is reporting on that assertion. Although suitable criteria exist for the subject matter, use of the report is restricted to specified parties because the criteria are available only to the specified parties.

Independent Accountant's Review Report

[Appropriate Addressee]

We have reviewed management of XYZ Company's assertion that *[identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with (or based on) the ABC criteria set forth in Note 1]*. XYZ Company's management is responsible for its assertion. Our responsibility is to express a conclusion on management's assertion based on our review.

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to management's assertion in order for it to be fairly stated. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. We believe that our review provides a reasonable basis for our conclusion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Based on our review, we are not aware of any material modifications that should be made to management of XYZ Company's assertion in order for it to be fairly stated.

This report is intended solely for the information and use of *[identify the specified parties, for example, ABC Company and XYZ Company]*, and is not intended to be, and should not be, used by anyone other than the specified parties.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

**Example 3: Practitioner's Review Report on Subject Matter;
Qualified Conclusion**

The following is an illustrative practitioner's report for a review engagement in which the practitioner expresses a qualified conclusion because the review identified conditions that, individually or in combination, result in one or more material, but not pervasive, misstatements of the subject matter, based on the criteria. The practitioner has reviewed the subject matter and is also reporting on the subject matter. Paragraph .53 states, "If the practitioner has concluded that the material misstatement results in a qualified conclusion, the practitioner should report directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement."

Independent Accountant's Review Report

[Appropriate Addressee]

We have reviewed *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]* based on *[identify the criteria, for example, the ABC criteria set forth in Note 1]*. Our responsibility is to express a conclusion on *[identify the subject matter, for example, the schedule of investment returns]* based on our review.

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to *[identify the subject matter, for example, the schedule of investment returns]* in order for it to be in accordance with (or based on) the criteria. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is in accordance with (or based on) the criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. We believe that our review provides a reasonable basis for our conclusion.

[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]

[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]

Our review identified *[describe condition(s) that, individually or in the aggregate, resulted in a material misstatement, or deviation from, the criteria]*.

Based on our review, except for the matter(s) described in the preceding paragraph, we are not aware of any material modifications that should be made to *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, in order for it to be in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*.

AT-C Section 215

Agreed-Upon Procedures Engagements

(Supersedes SSAE No. 18 section 215)

Source: SSAE No. 19.

Effective for agreed-upon procedures reports dated on or after July 15, 2021. Early implementation is permitted.

Introduction

Scope of This Statement on Standards for Attestation Engagements

.01 This section contains performance and reporting requirements and application guidance for all agreed-upon procedures engagements. The requirements and guidance in this section supplement the requirements and guidance in section 105, *Concepts Common to All Attestation Engagements*.

.02 An *agreed-upon procedures engagement* is an attestation engagement in which a practitioner performs specific procedures on subject matter and reports the findings without providing an opinion or conclusion. The subject matter may be financial or nonfinancial information. Because the needs of an engaging party may vary widely, the nature, timing, and extent of the procedures may vary, as well. (Ref: par. .A1–.A2)

.03 Because the engaging party best understands its own needs, the engaging party is required to agree to the procedures and acknowledge that the procedures performed are appropriate for the intended purpose of the engagement prior to issuance of the practitioner's agreed-upon procedures report. Engagement circumstances may be such that it is appropriate for parties in addition to the engaging party to agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes. The engaging party and intended users assess for themselves the procedures and findings reported by the practitioner and draw their own conclusions from the work performed by the practitioner.

.04 In an engagement performed in accordance with this section, the practitioner does not perform an examination or a review engagement and does not provide an opinion or conclusion. Instead, the agreed-upon procedures report is in the form of procedures and findings.

.05 When a practitioner performs services pursuant to an engagement to apply agreed-upon procedures to subject matter as part of or in addition to another form of service, this section applies only to those services described herein; other professional standards would apply to the other services. Other services may include an audit, review, or compilation of a financial statement, another attestation service performed pursuant to the attestation standards, or a nonattest service. A practitioner's report on applying agreed-upon procedures to subject matter may be combined with a report on such other services, provided the types of services can be clearly distinguished, and the applicable standards for each service are followed.

.06 This section does not apply to engagements to issue letters (commonly referred to as *comfort letters*) to underwriters and certain other requesting parties.¹

Effective Date

.07 This section is effective for agreed-upon procedures reports dated on or after July 15, 2021. Early implementation is permitted.

Objectives

.08 In conducting an agreed-upon procedures engagement, the objectives of the practitioner are to do the following:

- a. Apply specific procedures to subject matter (Ref: par. .A3)
- b. Issue a written practitioner's report that describes the procedures applied and the practitioner's findings without providing an opinion or conclusion on the subject matter
- c. Communicate further as required by relevant AT-C sections

Requirements

Conduct of an Agreed-Upon Procedures Engagement

.09 In performing an agreed-upon procedures engagement, the practitioner should comply with this section, section 105, and any subject matter section that is relevant to the engagement. A subject-matter section is relevant to the engagement when it is in effect, and the circumstances addressed by the section exist. (Ref: par. .A4)

Preconditions for an Agreed-Upon Procedures Engagement

.10 Section 105 indicates that a practitioner must be independent when performing an attestation engagement in accordance with the attestation standards, unless the practitioner is required by law or regulation to accept the engagement and report on the subject matter.² When the practitioner is not independent but is required by law or regulation to accept an agreed-upon procedures engagement and report on the procedures performed and findings obtained, the practitioner's report should specifically state that the practitioner is not independent. The practitioner is neither required to provide, nor precluded from providing, the reasons for the lack of independence; however, if the practitioner chooses to provide the reasons for the lack of independence, the practitioner should include all the reasons therefor. (Ref: par. .A5)

.11 In order to establish that the preconditions for an agreed-upon procedures engagement are present, the practitioner should determine that the following conditions, in addition to the preconditions identified in section 105, are present:³ (Ref: par. .A6–.A7)

- a. The practitioner determines that procedures can be designed, performed, and reported on in accordance with this section.

¹ See AU-C section 920, *Letters for Underwriters and Certain Other Requesting Parties*.

² Paragraph .24 of section 105, *Concepts Common to All Attestation Engagements*.

³ Paragraphs .24–.28 of section 105.

- b. The engaging party agrees, or will be able to agree, to the procedures and acknowledges that the procedures are appropriate for the intended purpose of the engagement. (Ref: par. .A8)
- c. The procedures to be applied to the subject matter are expected to result in reasonably consistent findings.
- d. When applicable, the practitioner agrees to apply a threshold for reporting exceptions established by the engaging party. (Ref: par. .A36)

.12 The practitioner should establish an understanding with the engaging party regarding the nature of the engagement, including the following:

- a. The intended purpose of the engagement and the intended users of the agreed-upon procedures report
- b. Whether the practitioner's agreed-upon procedures report is expected to be restricted to the use of specified parties (Ref: par. .A8–.A10)
- c. Whether the engagement to be performed is pursuant to any law, regulation, or contract (Ref: par. .A11)
- d. Whether parties in addition to the engaging party will be requested to agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes (Ref: par. .A12–.A15)

.13 The practitioner is precluded from accepting an agreed-upon procedures engagement if the practitioner believes the intended purpose of the engagement is not clear or the engaging party will not have a basis for agreeing and acknowledging that the procedures are appropriate for the intended purpose of the engagement.

Agreeing on the Terms of the Engagement

.14 The practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. (Ref: par. .A16)

.15 The agreed-upon terms of the engagement should include the following:

- a. The nature of the engagement established pursuant to paragraph .12
- b. Identification of the subject matter and the responsible party
- c. The responsibilities of the practitioner (Ref: par. .A17–.A18)
- d. A statement that the engagement will be conducted in accordance with attestation standards established by the AICPA
- e. A statement that the responsible party is responsible for the subject matter (Ref: par. .A19)
- f. A statement that the engaging party agrees to provide the practitioner, prior to the completion of the engagement, with a written agreement and acknowledgment that the procedures performed are appropriate for the intended purpose of the engagement. (Ref: par. .A20)
- g. A statement that the engaging party agrees to provide, at the conclusion of the engagement, a representation letter.

- h. If known at the onset of the engagement, an identification of any other parties, in addition to the engaging party, that will be requested to agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes. If the request is expected to be made by the engaging party, a statement that the engaging party agrees to provide, at the conclusion of the engagement, a written representation that the engaging party has obtained from all necessary other parties agreement to the procedures and acknowledgment that the procedures performed are appropriate for their purposes.
- i. If the engaging party is not the responsible party, a statement that written representations may be requested from the responsible party.
- j. Reference to the expected form and content of the practitioner's agreed-upon procedures report, including any use restrictions, if applicable.
- k. Disclaimers expected to be included in the practitioner's report, if applicable
- l. Assistance to be provided to the practitioner, if applicable
- m. Involvement of a practitioner's external specialist, if applicable
- n. Specified thresholds for reporting exceptions, if applicable (Ref: par. .A37)

Procedures to Be Performed

.16 The practitioner should perform procedures agreed to and acknowledged by the engaging party to meet the intended purpose of the engagement established with the engaging party pursuant to paragraph .12a. (Ref: par. .A21–.A26).

.17 The practitioner should not perform procedures that are open to varying interpretations or that use vague or ambiguous language. Terms of uncertain meaning (such as *general review*, *limited review*, *check*, or *test*) should not be used in describing the procedures unless such terms are defined within the procedures. (Ref: par. .A27)

.18 The practitioner should obtain evidence from applying the procedures to provide a reasonable basis for the finding or findings expressed in the practitioner's report but need not perform additional procedures outside the scope of the engagement to gather additional evidence.

Using the Work of a Practitioner's External Specialist

.19 The practitioner and the engaging party should explicitly agree to the involvement of a practitioner's external specialist if assisting a practitioner in the performance of an agreed-upon procedures engagement. (Ref: par. .A28–.A30)

.20 The practitioner's report should describe the nature of the assistance provided by the practitioner's external specialist.

Using the Work of Internal Auditors or Other Practitioners

.21 The procedures to be enumerated or referred to in the practitioner's report should be performed by the engagement team or other practitioners and not by internal auditors. (Ref: par. .A31–.A33)

Appropriateness of the Procedures Performed

.22 Prior to the issuance of the practitioner's agreed-upon procedures report, the practitioner should obtain a written agreement of the procedures and acknowledgment from the engaging party that the procedures performed are appropriate for the intended purpose of the engagement. (Ref: par. .A34–.A35)

.23 If the engaging party refuses to provide the written agreement and acknowledgment required by paragraph .22, the practitioner should withdraw from the engagement.

Findings

.24 A practitioner should present the results of applying procedures to specific subject matter in the form of findings. (Ref: par. .A36)

.25 The practitioner should report all findings from application of the procedures. If the engaging party has established a threshold for reporting exceptions, the practitioner should describe such threshold in the practitioner's report. (Ref: par. .A25, .A37, and .A47)

.26 When reporting findings, the practitioner should not (Ref: par. .A41–.A42)

- a. use vague or ambiguous language. (Ref: par. .A38)
- b. include terms of uncertain meaning. (Ref: par. .A39)
- c. express an opinion or conclusion on the subject matter or about whether the subject matter is in accordance with (or based on) the criteria. (Ref: par. .A40)

Written Representations

.27 The practitioner should request from the engaging party written representations in the form of a letter addressed to the practitioner. The representations should include the following: (Ref: par. .A35 and .A43)

- a. A statement that the responsible party is responsible for the subject matter
- b. If applicable, a statement that the engaging party has obtained from all necessary parties agreement to the procedures and acknowledgment that the procedures are appropriate for their purposes
- c. A statement that it has provided the practitioner with all relevant information and access, as applicable, as agreed upon in the terms of the engagement
- d. A statement that all known matters contradicting the subject matter and any communication from regulatory agencies or others affecting the subject matter have been disclosed to the practitioner, including communications received between the end of the period addressed by the subject matter and the date of the practitioner's report
- e. A statement that it is not aware of any material misstatements in the subject matter
- f. A statement that it has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter

- g. Any additional representations that the practitioner determines are appropriate

.28 When the engaging party is not the responsible party, the practitioner should consider requesting the relevant written representations pursuant to paragraph .27 from the responsible party in the form of a letter addressed to the practitioner.

.29 The date of the written representations should be as of the date of the practitioner's report. The written representations should address the subject matter and periods covered by the practitioner's findings.

Requested Written Representations Not Provided or Not Reliable

.30 When one or more of the written representations that the practitioner has requested pursuant to paragraphs .27–.28 are not provided, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should do the following: (Ref: par. .A44)

- a. Discuss the matter with the engaging or responsible party, as appropriate
- b. Reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general
- c. If any of the matters are not resolved to the practitioner's satisfaction, take appropriate action, including determining the possible effect on the practitioner's agreed-upon procedures report (Ref: par. .A45)

Preparing the Practitioner's Report

.31 The practitioner's report should be in writing. (Ref: par. .A46)

.32 The practitioner's report should be in the form of procedures and findings.

.33 If, as a result of performing procedures, the practitioner determines that the description of the procedures performed or the corresponding findings, in the practitioner's professional judgment, are misleading in the circumstances of the engagement, the practitioner should discuss the matter with the engaging party and take appropriate action. (Ref: par. .A47–.A48)

Content of the Practitioner's Agreed-Upon Procedures Report

.34 The practitioner's agreed-upon procedures report should include the following:

- a. A title that includes the word *independent* to clearly indicate that it is the report of an independent accountant. (Ref: par. .A49)
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. Identification of the engaging party.
- d. Identification of the subject matter to which the procedures have been applied. (Ref: par. .A50–.A51)
- e. Identification of the responsible party, including a statement that the responsible party is responsible for the subject matter. When

the engaging party is not the responsible party and identification of the responsible party and its responsibility for the subject matter is based solely on representations received from the engaging party, the practitioner's agreed-upon procedures report should include a statement to that effect. (Ref: par. .A52)

- f.* A statement that the engaging party acknowledged that the procedures performed are appropriate to meet the intended purpose of the engagement. (Ref: par. .A53–.A54)
- g.* An identification of the intended purpose of the engagement in sufficient detail to enable the user to understand the nature of the work performed. (Ref: par. .A55)
- h.* A statement that the practitioner's report may not be suitable for any other purpose. (Ref: par. .A56)
- i.* A statement that the procedures performed may not address all the items of interest to a user of the report and may not meet the needs of all users of the report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.
- j.* A statement that an agreed-upon procedures engagement involves the practitioner performing specific procedures that the engaging party has agreed to and acknowledged to be appropriate for the intended purpose of the engagement and reporting on findings based on the procedures performed.
- k.* A description of the procedures performed detailing the nature and extent, and if applicable, the timing, of each procedure.
- l.* A description of the findings from each procedure performed, including sufficient details on exceptions found.
- m.* If applicable, a description of any specified threshold established by the engaging party for reporting exceptions.
- n.* A statement that the agreed-upon procedures engagement was conducted in accordance with attestation standards established by the AICPA.
- o.* A statement that the practitioner was not engaged to and did not conduct an examination or review, the objective of which would be the expression of an opinion or conclusion, respectively, on the subject matter. (Ref: par. .A57)
- p.* A statement that the practitioner does not express such an opinion or conclusion.
- q.* A statement that had the practitioner performed additional procedures, other matters might have come to the practitioner's attention that would have been reported.
- r.* A statement that the practitioner is required to be independent of the responsible party and to meet the practitioner's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the agreed-upon procedures engagement. (Ref: par. .A58–.A59)
- s.* If applicable, a description of the nature of the assistance provided by a practitioner's external specialist, as discussed in paragraphs .19–.20.
- t.* When applicable, reservations or restrictions concerning procedures or findings. (Ref: par. .A60)

- u.* The manual or printed signature of the practitioner's firm. (Ref: par. .A61–.A63)
- v.* The city and state where the practitioner's report is issued. (Ref: par. .A64)
- w.* The date of the report. The practitioner's report should be dated no earlier than the date on which the practitioner completed the procedures and determined the findings, including that
 - i.* the attestation documentation has been reviewed, and
 - ii.* if applicable, the written presentation of the subject matter has been prepared.

Alert That Restricts the Use of the Practitioner's Agreed-Upon Procedures Report

.35 The practitioner should consider whether to include an alert, in a separate paragraph, that restricts the use of the practitioner's agreed-upon procedures report, taking into account the understanding with the engaging party regarding the nature of the engagement pursuant to paragraph .12*a*. (Ref: par. .A7 and .A65–.A69)

.36 The alert should

- a.* state that the practitioner's report is intended solely for the information and use of the specified parties.
- b.* identify the specified parties for whom use is intended. (Ref: par. .A70)
- c.* state that the report is not intended to be, and should not be, used by anyone other than the specified parties.

Adding Other Specified Parties After the Release of the Practitioner's Report

.37 When the practitioner issues a report that includes an alert restricting the use of the practitioner's report to certain specified parties, and the engaging party subsequently requests the practitioner to add an additional specified party, the practitioner should determine whether to add the additional specified party. As part of this determination, the practitioner should consider whether (Ref: par. .A71)

- a.* the additional specified party has acknowledged or will be requested to acknowledge that the procedures performed are appropriate for their purposes. If the practitioner determines that the acknowledgment is necessary, the practitioner should either obtain such acknowledgment directly from the additional specified party or obtain a representation from the engaging party that the additional specified party has agreed to the procedures and acknowledged that the procedures performed are appropriate for their purposes, and
- b.* the report will be reissued to identify the additional specified party.

.38 If the practitioner provides a written acknowledgment to the engaging party and the additional party that such party has been added as a specified party, the practitioner should state in the acknowledgment that no procedures were performed subsequent to the original date of the practitioner's agreed-upon procedures report.

Restrictions on the Performance of Procedures

.39 When circumstances impose restrictions on the performance of the procedures, the practitioner should discuss with the engaging party whether those restrictions are appropriate and, if the restrictions are appropriate, describe the restrictions in the practitioner's report.

Knowledge of Matters Outside Procedures

.40 Although the practitioner need not perform procedures beyond the procedures agreed to and acknowledged by the engaging party to be appropriate for the intended purpose of the engagement, if in connection with the application of the procedures, and through the completion of the engagement, matters come to the practitioner's attention by other means that significantly contradict the subject matter referred to in the practitioner's report, the practitioner should discuss the matter with the engaging party and take appropriate action, including determining whether the practitioner's report should be revised to disclose the matter. (Ref: par. .A72–.A73)

Communication Responsibilities

.41 In the event the practitioner encounters known or suspected fraud or noncompliance with laws or regulations in connection with the engagement, the practitioner should consider responsibilities under the AICPA Code of Professional Conduct and applicable law prior to communicating such information either to the responsible party or the engaging party. (Ref: par. .A74)

Documentation

.42 The practitioner should prepare engagement documentation on a timely basis that includes the following: (Ref: par. .A75–.A76)

- a. The written agreement and acknowledgment from the engaging party regarding the appropriateness of the procedures performed for the intended purpose of the engagement, as required by paragraph .22
- b. The nature, timing, and extent of the procedures performed to comply with relevant sections and applicable legal and regulatory requirements, including the following:
 - i. The identifying characteristics of the specific items or matters tested
 - ii. Who performed the engagement work and the date such work was completed
 - iii. When the appropriate party will not provide one or more of the requested written representations pursuant to paragraphs .27–.28 or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or that the written representations are otherwise not reliable, the matters in paragraph .30a–c
 - iv. Who reviewed the engagement work performed and the date and extent of such review
- c. The results of the procedures performed and the evidence obtained

Application and Other Explanatory Material

Scope of This Statement on Standards for Attestation Engagements (Ref: par. .02)

.A1 Reference to "subject matter" in this section encompasses anything on which agreed-upon procedures are performed, including information, documents, measurements, or compliance with laws and regulations.

.A2 The procedures to be performed may be developed by the practitioner, the engaging party, another party, or a combination of these parties. Further, the procedures may be prescribed by law, regulation, or contract.

Objectives (Ref: par. .08a)

.A3 In an agreed-upon procedures engagement, the practitioner applies procedures to the subject matter of the engagement. The requirements and guidance related to the subject matter in section 105 apply.

Conduct of an Agreed-Upon Procedures Engagement (Ref: par. .09)

.A4 If a practitioner were performing an agreed-upon procedures engagement related to an entity's compliance with requirements of specified laws, regulations, rules, contracts, or grants, section 105, this section, and section 315, *Compliance Attestation*, would be relevant. In addition, there may be interpretative publications applicable to the subject matter, such as, for example, AICPA Statement of Position 17-1, *Performing Agreed-Upon Procedures Related to Rated Exchange Act Asset-Backed Securities Third-Party Due Diligence Services as Defined by SEC Release No. 34-72936*.

Preconditions for an Agreed-Upon Procedures Engagement (Ref: par. .10–.11 and .35)

.A5 The "Agreed-Upon Procedure Engagements Performed in Accordance With Statements on Standards for Attestation Engagements" interpretation (ET sec. 1.297.020) of the "Independence Rule" (ET sec. 1.200.001) establishes independence requirements unique to agreed-upon procedures engagements.

.A6 In determining whether procedures can be designed, performed, and reported on in accordance with this section, the practitioner may consider whether such procedures

- are or will be subjective or require judgment to apply,
- will be selected to result only in findings that show the subject matter in a favorable light, and
- will meet the intended purpose of the engagement.

.A7 In determining whether procedures can be designed, performed, and reported on in accordance with this section, the practitioner may need to obtain an understanding of the criteria or measurement framework used in developing the subject matter.

.A8 The intended purpose of the engagement is determined by the engaging party. Consideration of the intended purpose of the engagement and the intended users of the practitioner's agreed-upon procedures report informs the

practitioner's professional judgment about whether it is practical or necessary to obtain the agreement of those intended users and whether to restrict the use of the report as discussed in paragraphs .35–.36.

.A9 The engagement may be required by law, regulation, or contract or may arise as a result of a request by a third party or the engaging party's intent to provide information to a broad class of users, such as customers.

.A10 The restriction to specified parties may or may not include parties that have agreed to the procedures and acknowledged that the procedures performed are appropriate for their purposes.

.A11 Law or regulation may require an agreed-upon procedures engagement to be performed (for example, to demonstrate compliance with requirements of specific laws or regulations). Further, the procedures to be performed may be prescribed by law, regulation, or contract. Regulatory expectations may also be set out as part of a regulatory audit or communications or requests from regulators. Law or regulation may prescribe the nature, timing, and extent of the procedures to be performed and, in some cases, the way the procedures or findings are to be described in the practitioner's report. In other circumstances, law or regulation may prescribe only the nature of the procedures to be performed or may use terms that are unclear about whether an agreed-upon procedures engagement is an acceptable service (for example, terms requiring an audit, review, examination, validation, or certification).

.A12 Based on the practitioner's understanding with the engaging party, the practitioner may consider it necessary to request a regulator to agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes.

.A13 A contract may require an agreed-upon procedures engagement to be performed. Given that the procedures are being performed to satisfy the obligations or expectations of the parties to the contract, unless the procedures, or a detailed description of the nature of the procedures, are included in the contract, all users of the practitioner's agreed-upon procedures report ordinarily would agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes.

.A14 For example, a practitioner may be engaged to perform procedures relating to a securitization transaction. In such circumstances, the practitioner and engaging party may identify other parties, such as underwriters, to request to agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes.

.A15 Nothing precludes the practitioner and engaging party from agreeing to the type of communication or acknowledgment to be used to obtain the agreement and acknowledgment of parties other than the engaging party that the procedures performed are appropriate for their purposes and who would make the communication. If the practitioner intends to communicate directly with a party other than the engaging party, the rules regarding confidential information as set forth in the AICPA Code of Professional Conduct apply.

Agreeing on the Terms of the Engagement (Ref: par. .14–.15)

.A16 It is in the interests of both the engaging party and the practitioner to document the agreed-upon terms of the engagement before the commencement of the engagement to help avoid misunderstandings. The form and content of the engagement letter or other suitable form of written agreement will vary with the engagement circumstances.

.A17 The responsibility of the practitioner is to carry out the procedures and report the findings in accordance with the attestation standards. The practitioner assumes the risk that misapplication of the procedures may result in inappropriate findings being reported. Furthermore, the practitioner assumes the risk that appropriate findings may not be reported or may be reported inaccurately. The practitioner's risks can be reduced through adequate planning and supervision and due professional care in performing the procedures, accumulating the findings, and preparing the practitioner's report.

.A18 The practitioner has no responsibility to determine the differences between the procedures to be performed and the procedures that the practitioner would have determined to be necessary had the practitioner been engaged to perform another form of attestation engagement. The procedures that the practitioner performs pursuant to an agreed-upon procedures engagement may be more or less extensive than the procedures that the practitioner would determine to be necessary had the practitioner been engaged to perform another form of engagement.

.A19 There may be circumstances in which the party responsible for the subject matter is not a party to the engagement. For example, the practitioner may be engaged to perform procedures with respect to benchmarking certain information in which multiple entities may be responsible for certain aspects of the information, or the information may be publicly available, such as subject matter that appears on the internet or in a public building, such as a grocery or retail store. If the practitioner is engaged to benchmark the prices of 10 products at 3 different stores on a certain date, each of the stores may be responsible for the source of the subject matter and the price that is published on the shelf.

.A20 If the procedures are prescribed or otherwise developed by parties other than the practitioner, the agreed-upon terms of the engagement may include the procedures to be performed.

Procedures to Be Performed (Ref: par. .16–.17 and .25)

.A21 Mere reading of specified information about the subject matter does not constitute a procedure sufficient to permit a practitioner to report on the results of applying procedures.

.A22 Examples of appropriate procedures include the following:

- Inspection of specified documents evidencing certain types of transactions or detailed attributes thereof
- Confirmation of specific information with third parties
- Comparison of documents, schedules, or analyses with certain specified attributes
- Performance of specific procedures on work performed by others
- Performance of mathematical computations

.A23 Examples of inappropriate procedures include the following:

- Mere reading of the work performed by others solely to describe their findings
- Evaluating the competency or objectivity of another party
- Obtaining an understanding about a particular subject

- Interpreting documents outside the scope of the practitioner's professional expertise

.A24 If the practitioner selects a sample, stating the size of the sample and how the sample was selected contributes to the specificity of the description of procedures performed (for example, 50 items starting at the 8th item and selecting every 15th item thereafter or invoices issued from May 1 to July 31, 20XX).

.A25 In certain circumstances, it may be appropriate for a planned procedure to be modified because the results of applying the procedure indicate that the procedure was not appropriately designed, and the findings would be inconsistent with the intended purpose of the engagement. However, any revisions to the descriptions of procedures performed or findings that are intended to mislead users would be inappropriate.

.A26 Examples of other information the practitioner may include are the date the procedure was performed and the sources of information used in performing the procedure.

.A27 To avoid vague or ambiguous language, the procedures to be performed are characterized by the action to be taken at a level of specificity sufficient for a reader to understand the nature and extent of the procedures performed. Examples of descriptions of acceptable actions are as follows:

- Inspect
- Confirm
- Compare
- Agree
- Trace
- Inquire
- Recalculate
- Observe
- Mathematically check

Conversely, the following descriptions of actions (unless defined to indicate the nature, timing, and extent of the procedures associated with these actions) generally are not acceptable because they are not sufficiently precise or have an uncertain meaning:

- Note
- Review
- General review
- Limited review
- Evaluate
- Analyze
- Check
- Test
- Interpret
- Verify
- Examine

Using the Work of a Practitioner's External Specialist (Ref: par. .19)

.A28 The practitioner's education and experience enable the practitioner to be knowledgeable about business matters in general, but the practitioner is not expected to have the expertise of a person trained for or qualified to engage in the practice of another profession or occupation. In certain circumstances, it may be appropriate to involve a practitioner's external specialist to assist the practitioner in the performance of one or more procedures. The following are examples of such circumstances:

- An attorney who helps with the interpretation of legal terminology in laws, regulations, rules, contracts, or grants
- A medical specialist who assists with understanding the characteristics of diagnosis codes documented in patient medical records
- An environmental engineer who assists with the interpretation of environmental remedial action regulatory directives that may affect the procedures applied to an environmental liabilities account in a financial statement
- A geologist who helps distinguish between the physical characteristics of a generic minerals group related to information to which the procedures are applied

.A29 The agreement regarding the involvement of a practitioner's external specialist may be reached when agreeing upon the terms of the engagement or as part of obtaining the engaging party's agreement to the procedures and acknowledgment that the procedures performed are appropriate for the intended purpose of the engagement.

.A30 A practitioner may apply procedures to the report or work product of a practitioner's external specialist that does not constitute assistance by the external specialist to the practitioner in an agreed-upon procedures engagement. For example, the practitioner may reference information contained in a report of a practitioner's external specialist in describing a procedure. However, it is inappropriate for the practitioner to merely read the external specialist's report solely to describe or repeat the findings or to take responsibility for all or a portion of any procedures performed by a practitioner's external specialist or the external specialist's work product.

Using the Work of Internal Auditors or Other Practitioners (Ref: par. .21)

.A31 Internal auditors may prepare schedules and accumulate data or provide other information for the practitioner's use in performing the procedures. Also, internal auditors may perform and report separately on procedures that they have carried out. Such procedures may be similar to those that a practitioner may perform under this section.

.A32 A practitioner may perform procedures on information documented in the working papers of internal auditors. For example, the practitioner may do the following:

- Repeat all or some of the procedures
- Determine whether the internal auditors' documentation indicates procedures performed and whether the findings documented are presented in a report by the internal auditors

.A33 It is inappropriate for the practitioner to do the following:

- Merely read the internal auditors' report solely to describe or repeat their findings
- Take responsibility for all or a portion of any procedures performed by internal auditors by reporting those findings as the practitioner's own
- Report in any manner that implies shared responsibility for the procedures with the internal auditors

Appropriateness of the Procedures Performed (Ref: par. .22 and .27)

.A34 The practitioner's communication with the engaging party enables the engaging party, if not already aware, to be made aware of the specific procedures performed and affords the engaging party an opportunity to suggest alternative or additional procedures that the engaging party may feel are appropriate in order to meet the intended purpose of the engagement.

.A35 The written agreement of the procedures and acknowledgment that the procedures performed are appropriate for the intended purpose of the engagement may be documented in the engagement letter, an addendum to the engagement letter, a representation letter, or some other form of written communication.

Findings (Ref: par. .11d, .15n, and .24–.26)

.A36 *Findings* are the factual results of procedures performed. Findings are capable of being objectively verified and objectively described, which means that procedures to be applied to the subject matter are expected to result in reasonably consistent findings. Accordingly, findings exclude opinions or conclusions in any form as well as any recommendations that the practitioner may make.

.A37 A threshold for reporting exceptions does not apply to findings reported in an agreed-upon procedures engagement unless such threshold is established by the engaging party. An example of language that describes a threshold for reporting exceptions is as follows: "For purposes of performing these procedures, no exceptions were reported for differences of \$1,000 or less resulting solely from the rounding of amounts disclosed."

.A38 To avoid vague or ambiguous language, the findings are described at a level of specificity sufficient for a user to understand the nature, timing, and extent of the procedures and findings.

.A39 If, in the practitioner's judgment, certain terms are potentially uncertain in meaning, the practitioner may consider whether a glossary is appropriate in the circumstances.

.A40 An example of language that should not be used in reporting findings is as follows:

Nothing came to our attention that caused us to believe that the subject matter is not in accordance with (or based on) the criteria, in all material respects.

.A41 The following table provides examples of appropriate and inappropriate descriptions of findings resulting from the application of certain procedures.

<i>Appropriate Procedures</i>	<i>Appropriate Description of Findings</i>	<i>Inappropriate Description of Findings</i>
Inspect the shipment dates for a sample (agreed-upon) of specified shipping documents and determine whether any such dates were subsequent to [date].	No shipment dates shown on the sample of shipping documents were subsequent to [date].	Nothing came to my attention as a result of applying that procedure.
Recalculate the number of blocks of streets paved during the year ended [date], shown on contractors' certificates of project completion; compare the resultant number to the number in an identified chart of performance statistics as of [date].	The number of blocks of streets paved in the chart of performance statistics was Y blocks more than the number calculated from the contractors' certificates of project completion.	The number of blocks of streets paved approximated the number of blocks included in the chart of performance statistics.
Recalculate the rate of return on a specified investment (according to an agreed-upon formula) and determine whether the resultant percentage agrees to the percentage in an identified schedule.	No exceptions were found as a result of applying the procedure.	The resultant percentage approximated the predetermined percentage in the identified schedule.
Inspect the quality standards classification codes in identified performance test documents for products produced during [specified period]; compare such codes to those shown in the [identified] computer printout for [specified period] as of [date].	All classification codes inspected in the identified documents were the same as those shown in the computer printout, except for the following: [List all exceptions.]	All classification codes appeared to comply with such performance documents.
Trace all outstanding checks appearing on a bank reconciliation as of [date] to checks cleared in the bank statement of the subsequent month.	All outstanding checks appearing on the bank reconciliation were traced to the list of cleared checks in the subsequent month's bank statement, except for the following: [List all exceptions.]	Nothing came to my attention as a result of applying the procedure.

<i>Appropriate Procedures</i>	<i>Appropriate Description of Findings</i>	<i>Inappropriate Description of Findings</i>
Compare the amounts of the invoices included in the "over 90 days" column shown in an identified schedule of aged accounts receivable of a specific customer as of [date] to the amount and invoice date shown on the corresponding outstanding invoice. Determine whether the dates on the corresponding outstanding invoices precede the date indicated on the schedule by more than 90 days.	All outstanding invoice amounts agreed with the amounts shown on the schedule in the "over 90 days" column, and the dates shown on such outstanding invoices preceded the date indicated on the schedule by more than 90 days.	The outstanding invoice amounts agreed within approximation of the amounts shown on the schedule in the "over 90 days" column, and nothing came to our attention that the dates shown on such outstanding invoices did not precede the date indicated on the schedule by more than 90 days.
Obtain from XYZ Company [personnel specified by management], the [date] bank reconciliations. Confirm with the bank the cash on deposit as of [date]. Compare the balance confirmed by the bank to the amount shown on the bank reconciliations.	Obtained from XYZ Company [personnel specified by management], the [date] bank reconciliations. Obtained bank confirmations of the cash on deposit as of [date]. Compared the balance confirmed by the bank to the amount shown on the bank reconciliations. [List all exceptions.]	No exceptions were identified in the confirmations received, and nothing came to our attention as a result of applying the procedures.

.A42 When a procedure is written in sufficient detail, the finding may be very brief because the practitioner does not need to repeat the procedure in describing the result. When there are no exceptions, common descriptions of results are the following:

- No exceptions were noted.
- No exceptions were [noted / found / identified] as a result of applying the procedure.

It is acceptable to repeat part of the procedure in the finding, such as in the following examples:

- No shipment dates shown on the sample of shipping documents were subsequent to [date].
- All outstanding invoice numbers, dates, and amounts agreed with the corresponding fields on the "over 90 days" column of the schedule.

If the practitioner identifies exceptions in applying the procedures, the report states them and provides some detail about the item or items involved, such as in the following examples:

- We found 14 out of the 15 items to be in agreement; the address on one item on the schedule did not agree to the [source document].
- The amount recalculated as a result of performing the procedure was \$XXX, which did not agree with the amount of \$YYYY on the [describe supporting document].
- Of the 30 selections made, two [insert attribute, such as amounts, dates, names] did not agree from the [describe the supporting documentation] to the [describe the supporting documentation].

A finding written to appear to be a fact or a conclusion would not be appropriate, such as in the following examples:

- A result stating, "We determined the current ratio of X Company at December 31, 20X4, was 2:1," could be considered a fact and is not appropriate. An appropriate description of the result could be stated as, "We recalculated the current ratio of X Company at December 31, 20X4, as 2:1."
- A result stating, "We have [observed / found / determined] the net sales of X Company for the year 20X4 were \$X," could be considered a fact and is not appropriate. An appropriate description of the result could be stated as, "We recalculated the net sales of X Company for the year 20X4 based on totaling the list of invoices in the sales journal as \$X."

Additionally, terms that might be construed as communicating assurance — such as *reasonable* or *adequate*, or that the results of applying the procedure were *close enough* — would not be appropriate. For example, it is inappropriate to state the following:

- The [number of blocks of streets paved] per the [supporting documentation] approximated the [number of blocks of streets paved] included in the chart of performance statistics for the year ended [date].
- All [classification codes] appear to comply with the requirements in the contract.

Terms such as *minor*, *immaterial*, *material*, or *significant*, unless the measures of relevance comprehended by such terms are clearly defined in both the engagement letter and the practitioner's report, are not appropriate for use in expressing results of procedures. It is also inappropriate to word a finding to convey negative assurance. For example, it is inappropriate to state the following:

- Nothing came to our attention as a result of applying the procedure.
- Nothing came to our attention that caused us to believe that [the subject matter] is not presented in accordance with [the criteria].

Written Representations (Ref: par. .27)

.A43 Written confirmation of oral representations reduces the possibility of misunderstandings between the practitioner and the engaging party. The person from whom the practitioner requests written representations is ordinarily a member of senior management or those charged with governance

depending on, for example, the management and governance structure of the engaging party, which may vary by entity, reflecting influences such as size and ownership characteristics.

Requested Written Representations Not Provided or Not Reliable (Ref: par. .30c)

.A44 Circumstances in which the practitioner may be unable to obtain requested written representations include, for example, when

- the engaging party does not have a relationship with the responsible party, and
- the agreed-upon procedures engagement is undertaken against the wishes of the responsible party, for example, when required by law or regulation.

In these or similar circumstances, the practitioner may need to reconsider whether the responsible party is able to take responsibility for the subject matter.

.A45 Although it is expected that the practitioner will be able to obtain all the requested written representations from the engaging party and, if applicable, the responsible party pursuant to paragraphs .27–.28, appropriate actions the practitioner might consider in the circumstances described in paragraph .30c include the following:

- a. Determining the effect on the practitioner's report, including whether to restrict the use of the practitioner's report or whether to disclose in the practitioner's report that the engaging party or the responsible party did not provide one or more of the requested written representations
- b. Withdrawing from the engagement

Preparing the Practitioner's Report (Ref: par. .25, .31, and .33)

.A46 This section does not require a standardized format for reporting on all agreed-upon procedures engagements. Instead, it identifies the basic elements that the report is to include. The report is tailored to the specific engagement circumstances. The practitioner may use headings, separate paragraphs, paragraph numbers, typographical devices (for example, boldface text), and other mechanisms to enhance the clarity and readability of the report.

.A47 Findings may be misleading, for example, if the responsible party revises the subject matter as a result of initial findings from procedures performed, and the findings to be expressed in the report do not indicate that the subject matter was changed. In such instances, the findings may indicate that the subject matter was revised as a result of initial findings from the procedures performed and that there are no findings with respect to the revised subject matter.

.A48 Appropriate actions that the practitioner might consider in the circumstances described in paragraph .33 include

- a. performing revised procedures,
- b. rewording a procedure or a finding, or
- c. withdrawing from the engagement.

Content of the Practitioner's Agreed-Upon Procedures Report

Title (Ref: par. .34a)

.A49 A title indicating that the practitioner's report is the report of an independent practitioner (for example, "Independent Practitioner's Report," "Report of Independent Certified Public Accountant," or "Independent Accountant's Report") affirms that the practitioner has met all the relevant ethical requirements regarding independence and, therefore, distinguishes the independent practitioner's report from reports issued by others.

Identification of the Subject Matter to Which the Procedures Have Been Applied (Ref: par. .34d)

.A50 In identifying the subject matter to which the procedures have been applied, the practitioner may describe the criteria or measurement framework used by the responsible party to develop the subject matter. For example, the identification of the subject matter may be "the cash and accounts receivable of XYZ Company as of December 31, 20XX in accordance with accounting principles generally accepted in the United States of America." Including additional information in the practitioner's report, particularly a general-use report, about the criteria or measurement framework used by the responsible party to develop the subject matter may assist users in determining whether the procedures are appropriate for their purposes.

.A51 A practitioner may be asked to apply procedures to more than one subject matter. In these engagements, the practitioner may issue one practitioner's report that refers to all subject matter covered. Section 315 contains an example of language that may be used in the introductory paragraph to address such circumstances.⁴

Identification of the Responsible Party (Ref: par. .34e)

.A52 The following is an example of a statement that the practitioner may include in the practitioner's report when the engaging party is not the responsible party, and identification of the responsible party and its responsibility for the subject matter is based solely on representations received from the engaging party: "In performing our agreed-upon procedures engagement, we have relied solely on representations provided by [*the engaging party*] relating to the responsible party and its responsibility for [*the subject matter*]."

Agreement to and Acknowledgment of the Appropriateness of the Procedures (Ref: par. 34f)

.A53 Although not required, the practitioner may consider adding one or more of the following statements to address the risk that a user (particularly of a general-use agreed-upon procedures report) may inappropriately conclude that parties in addition to the engaging party agreed to and acknowledged the appropriateness of the procedures:

- A statement that no other party acknowledged the appropriateness of the procedures
- An identification of any other parties who agreed to and acknowledged the appropriateness of the procedures for their purposes and a statement that these parties have acknowledged that the procedures performed are appropriate for their purposes

⁴ Paragraph .A32 of section 315, *Compliance Attestation*.

- A statement that the procedures are specified in a contract, law, or regulation and a reference to the contract, law, or regulation that clearly indicates that additional parties are parties to the contract, law, or regulation

.A54 Although not required, the practitioner may make an explicit statement that the practitioner makes no representation regarding the appropriateness of the procedures either for the purpose for which the practitioner's report has been requested or for any other purpose. The practitioner might make this statement to address the risk that a user may conclude that the practitioner represents that the procedures performed are appropriate for the intended purpose of the engagement or for any other purpose.

Description of the Intended Purpose of the Agreed-Upon Procedures Engagement (Ref: par. 34g)

.A55 Because the practitioner is precluded from expressing an opinion or conclusion, it would not be appropriate to state that the intended purpose of the engagement was to determine whether the subject matter was prepared or is stated in accordance with specified criteria or that the practitioner performed the engagement to conclude whether the entity complied with specified criteria.

Practitioner's Report Not Suitable for Any Other Purpose (Ref: par. 34h)

.A56 The practitioner may advise users regarding inappropriate uses of the practitioner's agreed-upon procedures report. For example, the practitioner may advise that the report is not intended for making investment decisions or for use by potential lenders or investors.

Statement When the Subject Matter Consists of Elements, Accounts, or Items of a Financial Statement (Ref: par. 34o)

.A57 If the subject matter consists of elements, accounts, or items of a financial statement, the practitioner's report might, instead, state that the procedures do not constitute an audit (or a review) of financial statements or any part thereof, the objective of which is the expression of an opinion (or conclusion) on the financial statements or a part thereof.

Relevant Ethical Requirements (Ref: par. 34r)

.A58 Relevant ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive. When the Code of Professional Conduct applies, the practitioner's other ethical responsibilities relate to the "Principles of Professional Conduct" (ET sec. 0.300).

.A59 Relevant ethical requirements may exist in several different sources, such as ethical codes and additional rules and requirements within law and regulation. When independence and other relevant ethical requirements are contained in a limited number of sources, the practitioner may choose to name the relevant sources (for example, the name of the code, rule, or applicable regulation, or *Government Auditing Standards* promulgated by the Comptroller General of the United States) or refer to a term that appropriately describes those sources.

Reservations or Restrictions Concerning Procedures or Findings (Ref: par. 34t)

.A60 Examples of reservations or restrictions procedures or findings may include the following:

- Disclosure of stipulated facts, assumptions, or interpretations (including the source thereof) used in the application of procedures
- Description of the condition of records, controls, or data to which the procedures were applied
- Explanation that the practitioner has no responsibility to update the practitioner's report
- Explanation that the sample may not be representative of the population

Signature of the Practitioner (Ref: par. 34u)

.A61 In some cases, law or regulation may allow for the use of electronic signatures in the practitioner's report.

.A62 In certain situations, the practitioner's report may be required by law or regulation to include the personal name and signature of the practitioner, in addition to the practitioner's firm.

.A63 *Considerations Specific to Governmental Entities.* This section would not preclude a governmental practitioner from including the personal name and signature of the practitioner in the practitioner's report when, in certain situations, the governmental practitioner is required by law or regulation or chooses to do so.

Practitioner's Address (Ref: par. .34v)

.A64 In the United States, the location of the issuing office is the city and state. In another country, it may be the city and country. The city and state where the practitioner practices may be indicated on letterhead that contains the issuing office's location.

Alert That Restricts the Use of the Practitioner's Agreed-Upon Procedures Report (Ref: par. .35–.36)

.A65 Based on the circumstances of the engagement, the practitioner may consider it appropriate to include an alert, in a separate paragraph, that restricts the use of the practitioner's agreed-upon procedures report. Examples of situations in which the practitioner, using professional judgment, may decide to include an alert, in a separate paragraph, that restricts the use of the practitioner's agreed-upon procedures report include the following:

- When the engaging party requests that the use of the report be restricted.
- When agreed-upon procedures are performed on compliance with aspects of contractual agreements, the practitioner may determine to restrict the use of the report to the parties to the contract or agreement.
- When agreed-upon procedures are performed to comply with regulatory requirements, the practitioner may determine to restrict the use of the report to the engaging party and the regulator.
- When agreed-upon procedures are performed relating to certain subject matter (for example, subject matter addressed in the AT-C section 300 series), the practitioner may determine to restrict the use of the report to parties that are known to understand the subject matter.

- When agreed-upon procedures are performed on subject matter that is intended to be used by or is only available to a limited number of parties, the practitioner may determine to restrict the use of the report to such parties.
- When the procedures that the practitioner is engaged to perform are prescribed and the practitioner does not have the ability to perform or design additional procedures, the practitioner may determine to restrict the use of the report to those parties that prescribed the procedures.

.A66 A practitioner's report that includes an alert that restricts the use of the report may be included in a document that also contains a practitioner's report that is for general use. The inclusion of the separate restricted-use report does not affect the intended use of the general-use report nor does the inclusion of the general-use report affect the intended use of the restricted-use report. The restricted-use report remains restricted as to use, and the general-use report continues to be for general use.

.A67 A practitioner may also issue a single combined practitioner's report that includes (a) a practitioner's report that includes an alert that restricts its use and (b) a report that is for general use. If these two types of reports are clearly differentiated within the combined report, such as through the use of appropriate headings, the alert that restricts the use of the report may be limited to the report that includes the alert that restricts its use. In such circumstances, the use of the general-use report is not affected.

.A68 Law or regulation may require that a practitioner's report be made available to the public as a matter of public record.

.A69 A practitioner is not responsible for controlling, and cannot control, distribution of the practitioner's report after its release. The alert that restricts the use of the practitioner's report is designed to avoid misunderstandings related to the use of the practitioner's report, particularly if the practitioner's report is taken out of the context in which the practitioner's report is intended to be used. A practitioner may consider informing the engaging party or other specified parties that the practitioner's report is not intended for distribution to parties other than those specified in the practitioner's report. The practitioner may, in connection with establishing the terms of the engagement, reach an understanding with the engaging party that the intended use of the practitioner's report will be restricted and may obtain the engaging party's agreement that the engaging party and specified parties will not distribute such practitioner's report to parties other than those identified therein.

.A70 The practitioner may identify the specified parties by naming them, referring to a list of those parties, or identifying the class of parties, for example, "all customers of XYZ Company during some or all of the period January 1, 20XX, to December 31, 20XX." The method of identifying the specified parties is determined by the practitioner.

Adding Other Specified Parties After the Release of the Practitioner's Report (Ref: par. .37)

.A71 When the practitioner is requested to add an additional specified party, the practitioner may agree to add the additional specified party based on the practitioner's consideration of factors such as the identity of the other parties and the intended use of the practitioner's report. The practitioner is not required to reissue the report to identify the additional specified party in the alert that restricts the use of the report, or if applicable, indicate that the

additional specified party agreed to the procedures and acknowledged that the procedures performed are appropriate for their purposes. If the practitioner's report is reissued, the practitioner is not required to change the date of the report.

Knowledge of Matters Outside Procedures (Ref: par. .40)

.A72 For example, if, during the course of applying procedures regarding an entity's internal control, the practitioner becomes aware of a material weakness by means other than performance of the procedures, such matter may be included in the practitioner's report.

.A73 When the practitioner applies procedures to an element, account, or item of a financial statement and has performed an audit or review of the entity's related financial statements, and the practitioner's audit or review report on such financial statements includes a departure from the standard report, the practitioner may include a reference to the audit or review report and the departure from the standard report in the practitioner's agreed-upon procedures report.

Communication Responsibilities (Ref: par. .41)

.A74 Disclosure of confidential information as defined in the Code of Professional Conduct requires the explicit consent of the engaging party or the responsible party, as appropriate. In circumstances in which such matters are identified, the practitioner may consider discussing with legal counsel or others prior to communicating or taking further action.

Documentation (Ref: par. .42)

.A75 Documentation prepared at the time work is performed or shortly thereafter is likely to be more accurate than documentation prepared at a much later time.

.A76 The practitioner need not include in the engagement file superseded drafts of working papers, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.A77

Exhibit — Illustrative Practitioner's Agreed-Upon Procedures Reports

The illustrative practitioner's agreed-upon procedures reports in this exhibit meet the applicable reporting requirements in paragraphs .34–.37. A practitioner may use alternative language in drafting an agreed-upon procedures report, provided that the language meets the applicable requirements in paragraphs .34–.37.

Example 1: Practitioner's Agreed-Upon Procedures Report Related to a Statement of Investment Performance Statistics

Circumstances include the following:

- The engaging party is the responsible party.
- The practitioner has assisted in the development of the procedures.
- No party other than the engaging party has agreed to the procedures and acknowledged that the procedures are appropriate for their purposes.

Independent Accountant's Report

[Appropriate Addressee]

We have performed the procedures enumerated below on [identify the subject matter, for example, the accompanying Statement of Investment Performance Statistics of XYZ Fund for the year ended December 31, 20X1]. [The responsible party, for example, XYZ Fund] is responsible for [the subject matter].

[The engaging party, for example, XYZ Fund] has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of [identify the intended purpose of the engagement, for example, assisting users in understanding the Statement of Investment Performance Statistics of XYZ Fund for the year ended December 31, 20X1]. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and the associated findings are as follows:

[Include paragraphs to describe the procedures performed detailing the nature and extent, and if applicable, the timing, of each procedure and to describe the findings from each procedure performed, including sufficient details on exceptions found.]

We were engaged by [the engaging party, for example, XYZ Fund] to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on [identify the subject matter, for example, the accompanying Statement of Investment Performance Statistics of XYZ Fund for the year ended December 31, 20X1]. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of XYZ Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

[Additional paragraphs may be added to describe other matters.]

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

Example 2: Practitioner's Agreed-Upon Procedures Report Related to Cash and Accounts Receivable

Circumstances include the following:

- The engaging party is not the responsible party.
- Other than the engaging party, no other party has agreed to the procedures and acknowledged that the procedures are appropriate for their purposes.

Independent Accountant's Report

[Appropriate Addressee]

We have performed the procedures enumerated below on *[identify the subject matter, for example, the cash and accounts receivable of XYZ Company as of December 31, 20XX, included in the accompanying information provided to us by management of XYZ Company]*. *[The responsible party, for example, XYZ Company]* is responsible for *[the subject matter]*.

[The engaging party, for example, ABC Company] has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of *[identify the intended purpose of the engagement, for example, assisting users in understanding cash and accounts receivable of XYZ Company as of December 31, 20XX, included in the accompanying information provided to us by management of ABC Company]*. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and the associated findings are as follows:

Cash

1. For the four bank accounts listed below, we obtained from XYZ Company management
 - a. the December 31, 20XX, bank reconciliations and
 - b. the December 31, 20XX, general ledger.
2. We performed the following procedures:
 - a. Obtained a bank confirmation directly from each bank of the cash on deposit as of December 31, 20XX
 - b. Compared the balance confirmed by the bank to the amount shown on the respective bank reconciliations
 - c. Mathematically recomputed the bank reconciliations
 - d. Compared the cash balances per book listed in the reconciliations below to the respective general ledger account balances

Cash December 31, 20XX

<i>Bank</i>	<i>Cash Balance per Book</i>
DEF National Bank, general ledger account 123	\$5,000
LMN State Bank, general ledger account 124	3,776
RST Trust Company regular account, general ledger account 125	86,912
RST Trust Company payroll account, general ledger account 126	5,000
	\$110,688

We found no exceptions as a result of the procedures.

Accounts Receivable

3. We obtained the accounts receivable aged trial balance as of December 31, 20XX, from XYZ Company (attached as exhibit A). We mathematically checked that the individual customer account balance subtotals in the aged trial balance of accounts receivable agreed to the total accounts receivable per the aged trial balance. We compared the total accounts receivable per the accounts receivable aged trial balance to the total accounts receivable per general ledger account 250.

We found no exceptions as a result of the procedures.

4. We obtained the accounts receivable subsidiary ledger as of December 31, 20XX, from XYZ Company. We compared the individual customer account balance subtotals shown in the accounts receivable aged trial balance (exhibit A) as of December 31, 20XX, to the balances shown in the accounts receivable subsidiary ledger.

We found no exceptions as a result of the procedures.

5. We selected 50 customer account balances from exhibit A by starting at the 8th item and selecting every 15th item thereafter until 50 were selected. The sample size selected represents 9.8% of the aggregate amount of the customer account balances. We obtained the corresponding invoices from XYZ Company and traced the aging (according to invoice dates) for the 50 customer account balances shown in exhibit A to the details of outstanding invoices in the accounts receivable subsidiary ledger.

We found no exceptions as a result of the procedures.

6. We mailed confirmations directly to the customers representing the 150 largest customer account balance subtotals selected from the accounts receivable aged trial balance, and we received responses as indicated below. As agreed, any individual differences in a customer account balance of less than \$300 were to be considered minor, and no further procedures were performed.

Of the 150 customer balances confirmed, we received responses from 140 customers; 10 customers did not reply.

No exceptions were identified in 120 of the confirmations received. The differences in the remaining 20 confirmation replies were less than \$300.

For the 10 customers that did not reply, we traced the items constituting the outstanding customer account balance to invoices and supporting shipping documents.

A summary of the confirmation results according to the respective aging categories is as follows.

Accounts Receivable December 31, 20XX			
Aging Categories	Customer Account Balances	Confirmations Requested	Confirmations Received
Current	\$156,000	\$76,000	\$65,000
Past due:			
Less than 1 month	60,000	30,000	19,000
1–3 months	36,000	18,000	10,000
Over 3 months	48,000	48,000	8,000
	\$300,000	\$172,000	\$102,000

We were engaged by [the engaging party, for example, ABC Company] to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on [identify the subject matter]. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of XYZ Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

[Additional paragraphs may be added to describe other matters.]

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

Example 3: Practitioner’s Agreed-Upon Procedures Report in Connection With Claims of Creditors

Circumstances include the following:

- The engaging party is the responsible party.
- The engaging party and one specified party have prescribed the procedures for the practitioner to perform. The engaging party and the specified party have both agreed the procedures and have acknowledged that the procedures are appropriate for the intended purpose of the engagement and their purposes, respectively.

- The practitioner has determined to disclose in the agreed-upon procedures report that the specified party has agreed to and acknowledged that the procedures are appropriate for their purposes.
- The practitioner has determined to restrict the use of the agreed-upon procedures report to the parties that prescribed the procedures.

Independent Accountant's Report

[Appropriate Addressee]

We have performed the procedures enumerated below on *[identify the subject matter, for example, the claims of creditors of XYZ Company as of May 31, 20XX, as set forth in the accompanying Schedule A]*. *[The responsible party, for example, XYZ Company]* is responsible for *[the subject matter]*.

[The engaging party, for example, XYZ Company] has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of *[identify the intended purpose of the engagement, for example, assisting users in understanding the claims of creditors of XYZ Company as of May 31, 20XX, as set forth in the accompanying Schedule A]*. Additionally, *[identify the other party or parties that has or have agreed to and acknowledged that the procedures performed are appropriate to meet their purposes, for example, the Trustee of XYZ Company]* has agreed to and acknowledged that the procedures performed are appropriate to meet for their purposes. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and associated findings are as follows:

1. Obtained the general ledger and the accounts payable trial balance as of May 31, 20XX, from XYZ Company. Compared the total of the accounts payable trial balance to the total accounts payable balance in general ledger account 450.
The total of the accounts payable trial balance agreed with the total accounts payable balance in the general ledger account number 450.
2. Obtained the claim form submitted by creditors in support of the amounts claimed from XYZ Company. Compared the creditor name and amounts from the claim form to the respective name and amounts shown in the accounts payable trial balance obtained in procedure 1. For any differences identified, requested XYZ Company to provide supporting detail. Compared such identified differences to the supporting detail provided.
All differences noted are presented in column 3 of Schedule A. Except for those amounts shown in column 4 of Schedule A, all such differences were agreed to *[describe supporting detail]*.
3. Using the claim form obtained in procedure 2, compared the name and amount to invoices, and if applicable, receiving reports, provided by XYZ Company.

No exceptions were found as a result of this procedure.

We were engaged by *[the engaging party, for example, XYZ Company]* to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the

objective of which would be the expression of an opinion or conclusion, respectively, on *[identify the subject matter, for example, the claims of creditors of XYZ Company as of May 31, 20XX, as set forth in the accompanying Schedule A]*. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of XYZ Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

This report is intended solely for the information and use of *[identify the specified parties, for example, XYZ Company and the Trustee of XYZ Company]*, and is not intended to be, and should not be, used by anyone other than these specified parties.

[Additional paragraphs may be added to describe other matters.]

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

Example 4: Practitioner's Agreed-Up-on Procedures Report in Which Procedures Are Specified in Regulation

Circumstances include the following:

- The engaging party has agreed to the procedures and acknowledged that the procedures are appropriate for the intended purpose of the engagement.
- The procedures are prescribed in regulation.
- The practitioner has determined to restrict the use of the agreed-upon procedures report to the engaging party and the regulator.

Independent Accountant's Report

[Appropriate Addressee]

We have performed the procedures enumerated below on *[identify the subject matter, for example, the financial accounts of the engaging party during the year ended December 31, 20XX]*. *[The responsible party]* is responsible for *[the subject matter]*.

[The engaging party] has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of *[identify the intended purpose of the engagement, for example, assisting users in understanding the financial accounts of the engaging party during the year ended December 31, 20XX]*. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and the associated findings are as follows:

[Include paragraphs to describe the procedures performed detailing the nature and extent, and if applicable, the timing, of each procedure and to describe the findings from each procedure performed, including sufficient details on exceptions found.]

We were engaged by *[the engaging party]* to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not

conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on *[identify the subject matter]*. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of *[the responsible party]* and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

This report is intended solely for the information and use of *[identify the specified parties, for example, the engaging party and the State of XXX]*, and is not intended to be, and should not be, used by anyone other than these specified parties.

[Additional paragraphs may be added to describe other matters.]

[Signature of the practitioner's firm]

AT-C Section 305

Prospective Financial Information

Source: SSAE No. 18.

Effective for practitioners' examination and agreed-upon procedures reports on prospective financial information dated on or after May 1, 2017.

Introduction

.01 This section contains performance and reporting requirements and application guidance for a practitioner examining or performing agreed-upon procedures on prospective financial information.

.02 Prospective financial information can take the form of prospective financial statements or partial presentations.

.03 The AICPA Guide *Prospective Financial Information* (guide) provides comprehensive guidance regarding prospective financial information. Chapter 6, "Preparation Guidelines," chapter 7, "Reasonably Objective Basis," chapter 8, "Presentation Guidelines," and chapter 9, "Illustrative Prospective Financial Statements," of the guide establish the preparation and presentation guidelines for financial forecasts and financial projections. The guide also includes information about the types and uses of prospective financial information and interpretive guidance for applying this section.

.04 In addition to complying with this section, a practitioner is required to comply with section 105, *Concepts Common to All Attestation Engagements*, and either section 205, *Assertion-Based Examination Engagements*, for examinations of prospective financial information, or section 215, *Agreed-Upon Procedures Engagements*, for agreed-upon procedures engagements that address prospective financial information. In some cases, this section repeats or refers to requirements found in sections 105, 205, and 215 when describing those requirements in the context of engagements that address prospective financial information. Although not all the requirements in sections 105, 205, and 215 are repeated or referred to in this section, the practitioner is responsible for complying with all the requirements in sections 105 and 205, or 105 and 215, as applicable. [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.05 Section 210, *Review Engagements*, states that a practitioner should not perform a review of prospective financial information.¹ Section 206, *Direct Examination Engagements*, states that section 206 is not applicable to examination engagements related to subject matter for which other AT-C sections require the application of section 205, which includes section 305, *Prospective Financial Information*. [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹ Paragraph .07 of section 210, *Review Engagements*.

Effective Date

.06 This section is effective for practitioners' examination and agreed-upon procedures reports on prospective financial information dated on or after May 1, 2017.

Objectives of an Examination Engagement²

.07 In conducting an examination of prospective financial information, the objectives of the practitioner are to

- a. obtain reasonable assurance about whether, in all material respects,
 - i. the prospective financial information is presented in accordance with the guidelines for the presentation of prospective financial information established by the AICPA (AICPA presentation guidelines) (Ref: par. .A1) and
 - ii. the assumptions underlying the forecast are suitably supported and provide a reasonable basis for the responsible party's forecast, or the assumptions underlying the projection are suitably supported and provide a reasonable basis for the responsible party's projection, given the hypothetical assumptions. (Ref: par. .A2)
- b. express an opinion in a written report on the matters in paragraph .07a.

Objectives of an Agreed-Upon Procedures Engagement

.08 In conducting an agreed-upon procedures engagement for which the subject matter is prospective financial information, the objectives of the practitioner are to

- a. apply specific procedures to the prospective financial information and
- b. issue a written report that describes the procedures applied and the practitioner's findings without providing an opinion or conclusion on the prospective financial information.

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Definitions

.09 For purposes of this section, the following terms have the meanings attributed as follows:^[3]

Entity. Any unit, existing or to be formed, for which financial statements could be prepared in accordance with generally accepted

² Paragraph .18 of this section requires the practitioner to request a written assertion from the responsible party. For that reason, when the term "examination" is used in this section, it refers to an "assertion-based examination" performed under section 205, *Assertion-Based Examination Engagements*, and this section. [Footnote added, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

^[3] [Footnote deleted, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

accounting principles or special purpose frameworks. For example, an entity can be an individual, partnership, corporation, trust, estate, association, or governmental unit. (Ref: par. .A3)

Financial forecast. Prospective financial statements that present, to the best of the responsible party's knowledge and belief, an entity's expected financial position, results of operations, and cash flows. A financial forecast is based on the responsible party's assumptions reflecting conditions it expects to exist and the course of action it expects to take. A financial forecast may be expressed in specific monetary amounts as a single-point estimate of forecasted results or as a range, when the responsible party selects key assumptions to form a range within which it reasonably expects, to the best of its knowledge and belief, the item or items subject to the assumptions to actually fall. If a forecast contains a range, the range is not selected in a biased or misleading manner (for example, a range in which one end is significantly less expected than the other). (Ref: par. .A4)

Financial projection. Prospective financial statements that present, to the best of the responsible party's knowledge and belief, given one or more hypothetical assumptions, an entity's expected financial position, results of operations, and cash flows. A financial projection is sometimes prepared to present one or more hypothetical courses of action for evaluation, as in response to a question such as, "What would happen if...?" A financial projection is based on the responsible party's assumptions reflecting conditions it expects would exist and the course of action it expects would be taken, given one or more hypothetical assumptions. A projection, like a forecast, may contain a range. (Ref: par. .A5–.A6)

Guide. The AICPA Guide *Prospective Financial Information*.

Hypothetical assumption. An assumption used in a financial projection or in a partial presentation of projected information to present a condition or course of action that is not necessarily expected to occur, but is consistent with the purpose of the projection.

Key factors. The significant matters on which an entity's future results are expected to depend. Such factors are basic to the entity's operations and, thus, encompass matters that affect, among other things, the entity's sales, production, service, and financing activities. Key factors serve as a foundation for prospective financial information and are the bases for the assumptions.

Partial presentation. A presentation of prospective financial information that excludes one or more of the applicable items required for prospective financial statements as described in chapter 8 of the guide. (Ref: par. .A7)

Presentation guidelines. The criteria for the presentation and disclosure of prospective financial information. (Ref: par. .A8)

Prospective financial information. Any financial information about the future. The information may be presented as complete financial statements or limited to one or more elements, items, or accounts.

Prospective financial statements. Either financial forecasts or financial projections, including the summaries of significant assumptions and accounting policies. Although prospective

financial statements may cover a period that has partially expired, statements for periods that have completely expired are not considered to be prospective financial statements. Pro forma financial statements and partial presentations are not considered to be prospective financial statements. (Ref: par. .A9–.A10)

Requirements

Preconditions for an Examination Engagement

.10 Because a financial projection is not appropriate for general use, a practitioner should not agree to the use of the practitioner's name in conjunction with a financial projection that the practitioner believes will be distributed to those who will not be negotiating directly with the responsible party. (Ref: par. .A4–.A5 and .A11)

.11 Unless required by law or regulation to do so, a practitioner should not accept an engagement to examine

- a. a forecast or projection, unless the responsible party has agreed to disclose the significant assumptions
- b. a projection, unless the responsible party has agreed to identify in the presentation which of the assumptions are hypothetical and to describe the limitations on the usefulness of the projection.
- c. a partial presentation that does not describe the limitations on the usefulness of the presentation.

.12 A practitioner should not examine a forecast or projection that discloses none of the significant assumptions. If after accepting the engagement the practitioner determines that the forecast or projection discloses none of the significant assumptions, the practitioner should withdraw from the engagement, unless required by law or regulation to report on the forecast or projection, in which case, the practitioner should express an adverse opinion in the practitioner's report.

.13 If after accepting the engagement, the practitioner determines that the forecast or projection fails to disclose one or more of the significant assumptions, the practitioner should describe the assumption(s) in the practitioner's report and express an adverse opinion.

.14 If after accepting the engagement the practitioner determines that a projection fails to identify which of the assumptions are hypothetical or describe the limitations on the usefulness of the projection, the practitioner should withdraw from the engagement, unless required by law or regulation to report on the projection, in which case, the practitioner should express an adverse opinion in the practitioner's report.

Training and Proficiency

.15 The practitioner should understand the guidelines for the preparation and presentation of prospective financial information contained in the guide.

.16 The practitioner should possess or obtain a level of knowledge of the industry and the accounting principles and practices of the industry in which the entity operates, or will operate, that will enable the practitioner to examine prospective financial information that is appropriate for an entity operating in that industry.

.17 The practitioner should obtain knowledge of the key factors on which the entity's prospective financial information is based. (Ref: par. .A12)

Requesting a Written Assertion

.18 In performing an examination under this section, the practitioner should request from the responsible party a written assertion. If the responsible party refuses to provide a written assertion, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation. (Ref: par. .A13) [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Planning

.19 In accordance with section 205, the practitioner should establish an overall engagement strategy that sets the scope, timing, and direction of the engagement and guides the development of the engagement plan.⁴ (Ref: par. .A14)

Examination Procedures

.20 The examination procedures should be based on the practitioner's consideration of the following:

- a. The nature and materiality of the information to the prospective financial information taken as a whole
- b. The likelihood of material misstatements
- c. Knowledge obtained during current and previous engagements
- d. The responsible party's competence with respect to prospective financial information
- e. The extent to which the prospective financial information is affected by the responsible party's judgment, for example, its judgment in selecting the significant assumptions used to prepare the prospective financial information
- f. The support for the responsible party's assumptions

.21 The practitioner should evaluate whether the responsible party has a reasonably objective basis for the forecast and should consider whether sufficiently objective assumptions can be developed for each key factor. (Ref: par. .A15)

.22 The practitioner should perform those procedures the practitioner considers necessary in the circumstances to report on whether the assumptions underlying the forecast are suitably supported and provide a reasonable basis for the forecast, or whether the assumptions underlying the projection are suitably supported and provide a reasonable basis for the projection, given the hypothetical assumptions. (Ref: par. .A16–.A17)

.23 The practitioner should evaluate the support for the significant assumptions individually and in the aggregate. Assumptions are suitably supported if the preponderance of the information supports each significant assumption. In an examination of a projection, the practitioner need not obtain support for the hypothetical assumptions, although the practitioner should

⁴ Paragraph .11 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

evaluate whether they are consistent with the purpose of the presentation. (Ref: par. .A18–.A20)

.24 In an evaluation of whether the assumptions provide a reasonable basis for the forecast, the practitioner should evaluate the assumptions in the aggregate. If certain assumptions do not have a material effect on the presentation, they may not have to be individually evaluated. Nonetheless, the practitioner should evaluate the aggregate effect of individually insignificant assumptions in making the practitioner's overall evaluation.

.25 The practitioner should evaluate the assumptions related to an expired portion of the prospective period. (Ref: par. .A21–.A23)

.26 In evaluating the preparation and presentation of the prospective financial information, the practitioner should perform procedures to obtain reasonable assurance about whether the

- a. presentation reflects the identified assumptions,
- b. computations made to translate the assumptions into prospective amounts are mathematically accurate,
- c. assumptions are internally consistent,
- d. accounting principles used in the forecast or projection are appropriate, (Ref: par. .A24)
- e. prospective financial information is presented in accordance with the AICPA presentation guidelines, and
- f. assumptions have been adequately disclosed in accordance with the AICPA presentation guidelines.

.27 The practitioner should conclude whether the prospective financial information, including related disclosures, should be revised because of any of the following: (Ref: par. .A25)

- a. Mathematical errors
- b. Unreasonable or internally inconsistent assumptions
- c. Inappropriate or incomplete presentation
- d. Inadequate disclosure

Written Representations in an Examination Engagement

.28 In an examination of a forecast, in addition to the written representations from the responsible party required by section 205,⁵ the practitioner should request from the responsible party written representations that

- a. the forecast presents the expected financial position, results of operations, and cash flows for the forecast period and that the forecast reflects the responsible party's judgment, based on present circumstances, of the expected conditions and its expected course of action;
- b. the assumptions on which the forecast is based are reasonable and suitably supported; and
- c. if the forecast contains a range, the item or items subject to the assumptions are reasonably expected to fall within the range and that the range was not selected in a biased or misleading manner.

⁵ Paragraph .51 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.29 In an examination of a projection, in addition to the written representations from the responsible party required by section 205,⁶ the practitioner should request from the responsible party written representations that

- a. identify the hypothetical assumptions;
- b. identify which of the hypothetical assumptions, if any, are improbable;
- c. describe the limitations of the usefulness of the presentation;
- d. state that the responsible party is responsible for the projection presenting the expected financial position, results of operations, and cash flows for the projection period given the hypothetical assumptions, and that the projection reflects the responsible party's judgment, based on present circumstances, of expected conditions and its expected course of action given the occurrence of the hypothetical events;
- e. state that the assumptions other than the hypothetical assumptions are reasonable, given the hypothetical assumptions, and are suitably supported; and
- f. state that if the projection contains a range, given the hypothetical assumptions, the item or items subject to the assumption are reasonably expected to actually fall within the range and that the range was not selected in a biased or misleading manner.

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.30 In an examination of prospective information, the written representation required by section 205 regarding whether the subject matter is in accordance with (or based on) the criteria should indicate that the forecast (or projection) is presented in accordance with (or based on) the guidelines for the presentation of a forecast (or financial projection) established by the AICPA.^[7] (Ref: par. .A26)

.31 In an examination of prospective financial information, the practitioner should request from the responsible party the written representations required by section 205 and paragraphs .28 or .29 of this section, as applicable, even if the engaging party is not the responsible party.⁸ The alternative to obtaining the required written representations provided for in section 205 is not permitted in an engagement to examine prospective financial information.⁹ The responsible party's refusal to furnish the written representations required by section 205 and paragraphs .28 or .29 of this section, as applicable, constitutes a limitation on the scope of the engagement. Such refusal is often sufficient to preclude an unmodified opinion and particularly with respect to the representations in paragraph .53 of section 205, may cause the practitioner to disclaim an opinion or withdraw from the examination engagement, when withdrawal

⁶ See footnote 5. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

^[7] [Footnote deleted, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁸ See footnote 5. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁹ Paragraph .52 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

is possible under applicable law or regulations.¹⁰ However, based on the nature of the representations not obtained or the circumstances of the refusal, the practitioner may conclude that a qualified opinion is appropriate. [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Content of the Practitioner's Examination Report

.32 The practitioner's examination report on prospective financial information should include the following, unless the practitioner is disclaiming an opinion, in which case, items .32*f*, and .32*g* should be omitted: (Ref: par. .A27–.A30)

- a. A title that includes the word *independent*.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. An identification of the prospective financial information being reported on, including the period of time to which the prospective financial information relates.
- d. An indication that the criteria against which the prospective financial information was measured or evaluated are the guidelines for the presentation of a forecast (or projection) established by the AICPA.
- e. A statement that identifies the responsible party and its responsibility for the prospective financial information being prepared and presented in accordance with the guidelines for the presentation of a forecast (or projection) established by the AICPA.
- f. A statement that the practitioner's responsibility is to express an opinion on the prospective financial information, based on the practitioner's examination.
- g. A statement that
 - i. the practitioner's examination was conducted in accordance with attestation standards established by the AICPA. (Ref: par. A31)
 - ii. those standards require that the practitioner plan and perform the examination to obtain reasonable assurance about whether the forecast (or projection) is presented in accordance with the guidelines for the presentation of a forecast (or projection) established by the AICPA, in all material respects.
 - iii. the practitioner believes the evidence obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.
- h. A description of the nature of an examination engagement
- i. A statement that the practitioner is required to be independent and to meet the practitioner's other ethical responsibilities in accordance with relevant ethical requirements related to the examination engagement.

¹⁰ Paragraphs .56 and .A68 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- j. The practitioner's opinion about whether the forecast (or projection) is presented, in all material respects, in accordance with the guidelines for the presentation of a forecast (or projection) established by the AICPA, and whether the underlying assumptions are suitably supported and provide a reasonable basis for the forecast or a reasonable basis for the projection given the hypothetical assumptions.
- k. A statement indicating that the prospective results may not be achieved and describing other significant inherent limitations, if any.
- l. A statement that the practitioner has no responsibility to update the report for events and circumstances occurring after the date of the report.
- m. The manual or printed signature of the practitioner's firm.
- n. The city and state where the practitioner's report is issued.
- o. The date of the report. (The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate evidence on which to base the practitioner's opinion, including evidence that
 - i. the attestation documentation has been reviewed,
 - ii. the prospective financial information has been prepared, and
 - iii. the responsible party has provided a written assertion.)

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.33 When a practitioner examines a projection, the practitioner's opinion regarding the assumptions should be conditioned on the hypothetical assumptions, that is, the practitioner should express an opinion on whether the assumptions provide a reasonable basis for the projection, given the hypothetical assumptions. In addition to the required elements for a practitioner's report on an examination of a forecast, a report on an examination of a projection should include (Ref: par. .A27 and .A32–.A33)

- a. an identification of the hypothetical assumptions,
- b. a description of the special purpose for which the projection was prepared, and
- c. an alert, in a separate paragraph, that restricts the use of the report. The alert should
 - i. state that the report is intended solely for the information and use of the specified parties,
 - ii. identify the specified parties for whom use is intended, and
 - iii. state that the report is not intended to be, and should not be, used by anyone other than the specified parties.
- d. When the engagement is also performed in accordance with *Government Auditing Standards*, the alert that restricts the use of the report should include the following information, rather than the information required by paragraph .33c:
 - i. a description of the purpose of the report, and
 - ii. a statement that the report is not suitable for any other purpose.

.34 When the prospective financial information contains a range, the practitioner's report should also include a separate paragraph that states that the responsible party has elected to portray the expected results of one or more assumptions as a range. (Ref: par. .A27 and .A34)

Modified Opinions

.35 The following are circumstances that require the practitioner to modify the opinion and the type of modified opinion the practitioner should express in each circumstance: (Ref: par. .A35–.A39)

- a. If, in the practitioner's judgment, the prospective financial information materially departs from AICPA presentation guidelines, the practitioner should express a qualified or adverse opinion. (Ref: par. .A36–.A37)
- b. If the prospective financial information fails to disclose assumptions that, in the practitioner's professional judgment, are significant, or misapplies the accounting principles, the practitioner should express an adverse opinion. (Ref: par. .A38)
- c. If the practitioner believes that one or more significant assumptions are not suitably supported or do not provide a reasonable basis for the forecast, or for the projection given the hypothetical assumptions, the practitioner should express an adverse opinion. (Ref: par. .A38)
- d. If the practitioner is unable to obtain sufficient appropriate evidence, the practitioner should disclaim an opinion and describe the scope limitation in the practitioner's report. (Ref: par. .A39)

Partial Presentations

.36 When examining a partial presentation, the practitioner should give appropriate consideration to whether key factors affecting elements, accounts, or items that are interrelated with those in the partial presentation have been considered, including key factors that may not necessarily be obvious to the user of a partial presentation (for example, production capacity relative to a sales forecast), and whether all significant assumptions have been disclosed. (Ref: par. .A40–.A41 and .A29)

.37 Because partial presentations are generally appropriate only for limited use, practitioners' reports on partial presentations of both forecasted and projected financial information should include a description of any limitations on the usefulness of the presentation.

Preconditions for an Agreed-Upon Procedures Engagement

.38 In addition to determining that the preconditions for accepting or continuing an agreed-upon procedures engagement enumerated in section 105 and section 215 are met, the practitioner should not perform an agreed-upon procedures engagement on a forecast or projection unless the prospective financial information includes a summary of significant assumptions.

Content of the Practitioner's Agreed-Upon Procedures Report

.39 The practitioner's report on the application of agreed-upon procedures to a forecast or projection should include the following: (Ref: par. .A42–.A43)

- a. A title that includes the word *independent* to clearly indicate that it is the report of an independent accountant.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. An identification of the engaging party.
- d. An identification of the prospective financial information to which the procedures have been applied.
- e. A statement that identifies the responsible party and its responsibility for preparing and presenting the forecast (or projection) in accordance with the guidelines for the presentation of a forecast (or projection) established by the AICPA. When the engaging party is not the responsible party and identification of the responsible party and its responsibility for the prospective financial information is based solely on representations received from the engaging party, the practitioner's agreed-upon procedures report should include a statement to that effect.
- f. A statement that the engaging party acknowledged that the procedures performed are appropriate to meet the intended purpose of the engagement.
- g. An identification of the intended purpose of the engagement in sufficient detail to enable the user to understand the nature of the work performed.
- h. A statement that the practitioner's report may not be suitable for any other purpose.
- i. A statement that the procedures performed may not address all the items of interest to a user of the report and may not meet the needs of all users of the report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.
- j. A statement that an agreed-upon procedures engagement involves the practitioner performing specific procedures that the engaging party has agreed to and acknowledged to be appropriate for the intended purpose of the engagement and reporting on findings based on the procedures performed.
- k. A description of the procedures performed detailing the nature and extent, and if applicable, the timing of each procedure.
- l. A description of the findings from each procedure performed, including sufficient details on exceptions found. (The practitioner should not provide a conclusion.)
- m. If applicable, a description of any specified threshold established by the engaging party for reporting exceptions.
- n. A statement that the agreed-upon procedures engagement was conducted in accordance with attestation standards established by the AICPA.
- o. A statement that the practitioner was not engaged to and did not conduct an examination or review, the objective of which would be the expression of an opinion or a conclusion, respectively, on
 - i. whether the presentation of the forecast (or projection) is in accordance with guidelines for the presentation of a forecast (or projection) established by the AICPA,
 - ii. whether the underlying assumptions are suitably supported, and

- iii. whether the underlying assumptions provide a reasonable basis for the forecast or a reasonable basis for the projection given the hypothetical assumptions.
- p. A statement that the practitioner does not express such an opinion or conclusion.
- q. A statement that had the practitioner performed additional procedures, other matters might have come to the practitioner's attention that would have been reported.
- r. A statement that the practitioner is required to be independent of the responsible party and to meet the practitioner's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the agreed-upon procedures engagement.
- s. If applicable, a description of the nature of the assistance provided by a practitioner's external specialist.
- t. A statement indicating that the prospective results may not be achieved and describing other significant inherent limitations, if any.
- u. A statement that the practitioner has no responsibility to update the report for events and circumstances occurring after the date of the report.
- v. When applicable, reservations or restrictions concerning procedures or findings.
- w. The manual or printed signature of the practitioner's firm.
- x. The city and state where the practitioner's report is issued.
- y. The date of the report. (The report should be dated no earlier than the date on which the practitioner completed the procedures and determined the findings, including that
 - i. the attestation documentation has been reviewed, and
 - ii. the prospective financial information has been prepared.

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Alert That Restricts the Use of the Practitioner's Agreed-Upon Procedures Report

.40 The practitioner should consider whether to include an alert, in a separate paragraph, that restricts the use of the practitioner's agreed-upon procedures report, taking into account the understanding with the engaging party regarding the nature of the engagement. [Paragraph added, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.41 If the practitioner determines to include an alert, in a separate paragraph, that restricts the use of the practitioner's report, such alert should

- a. state that the practitioner's report is intended solely for the information and use of the specified parties.
- b. identify the specified parties for whom use is intended.
- c. state that the report is not intended to be, and should not be, used by anyone other than the specified parties.

[Paragraph added, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Application and Other Explanatory Material

Objectives of an Examination Engagement (Ref: par. .07a)

.A1 The practitioner's objective in an examination of prospective financial information is to obtain sufficient appropriate evidence to reduce attestation risk to a level that is, in the practitioner's professional judgment, acceptably low to express an opinion about whether the prospective financial information is presented in accordance with AICPA presentation guidelines and the assumptions are suitably supported and provide either a reasonable basis for the responsible party's forecast or a reasonable basis for the responsible party's projection, given the hypothetical assumptions. The practitioner's opinion does not address whether the prospective results can be achieved because events and circumstances frequently do not occur as expected, and achievement of the prospective results is dependent on the actions, plans, and assumptions of the responsible party.

.A2 The concept of *suitably supported* is discussed in paragraphs .23 and .A18–.A20.

Definitions

Entity (Ref: par. .09)

.A3 The term *entity* is used elsewhere in the attestation standards. However, the definition of the term *entity* in paragraph .09 is applicable only to this section.

Financial Forecast (Ref: par. .09–.10)

.A4 As indicated in chapter 4, "Types of Prospective Financial Information and Their Uses," of the guide, prospective financial statements are for either general use or limited use. *General use of prospective financial statements* refers to the use of the statements by persons with whom the responsible party is not negotiating directly—for example, in an offering statement of an entity's debt or equity interests. Because recipients of prospective financial statements distributed for general use are unable to ask the responsible party directly about the presentation, the presentation most useful to them is one that portrays, to the best of the responsible party's knowledge and belief, the expected results. Thus, only a financial forecast is appropriate for general use.

Financial Projection (Ref: par. .09–.10)

.A5 *Limited use of prospective financial statements* refers to the use of prospective financial statements by the responsible party alone or by the responsible party and third parties with whom the responsible party is negotiating directly. Examples include use in negotiations for a bank loan, submission to a regulatory agency, and use solely within the entity. Third-party recipients of prospective financial statements intended for limited use can ask questions of the responsible party and negotiate terms directly with it. Any type of prospective financial statements that would be useful in the circumstances would normally be appropriate for limited use. Thus, the presentation may be a financial forecast or a financial projection.

.A6 Generally, as the number or significance of the hypothetical assumptions increases, the less likely that it is appropriate for the responsible party to present a financial projection.

Partial Presentation (Ref: par. .09)

.A7 Paragraphs 8.61–.72 of the guide establishes a limitation on the use of partial presentations. Paragraph 8.59 of the guide states, in part

...partial presentations are not ordinarily appropriate for general use. Accordingly, a partial presentation ordinarily should not be distributed to third parties who will not be *negotiating directly* with the responsible party (for example, in an offering document for an entity's debt or equity interests). In this context, negotiating directly is defined as a third-party user's ability to ask questions of, and negotiate the terms or structure of a transaction directly with, the responsible party.

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Presentation Guidelines (Ref: par. .09)

.A8 Chapter 8 of the guide contains the guidelines for the presentation and disclosure of prospective financial information.

Prospective Financial Statements (Ref: par. .09)

.A9 Prospective financial statements may take the form of complete financial statements or may be summarized or condensed, as described in chapter 8 of the guide. Presentations that exclude one or more relevant elements described in that section are defined as *partial presentations*. For the purposes of this section, the term *forecast* used alone means forecasted information, which can be either a full presentation (a financial forecast) or a partial presentation. The term *projection* can refer to either a financial projection or a partial presentation of projected information.

.A10 The objective of pro forma financial information is to show what the significant effects on the historical financial statements might have been had a consummated or proposed transaction or event occurred at an earlier date. Although the transaction in question might be prospective, this section does not apply to such presentations because they are essentially historical financial statements and do not purport to be prospective financial statements. See section 310, *Reporting on Pro Forma Financial Information*.

Preconditions for an Examination Engagement (Ref: par. .10)

.A11 Paragraph .10 indicates that it is not appropriate for a practitioner to agree to the use of the practitioner's name in conjunction with a financial projection that the practitioner believes will be distributed to those who will not be negotiating directly with the responsible party. An example of such a situation is the inclusion of a financial projection in an offering statement of an entity's debt or equity interests, unless the projection is used to supplement a financial forecast for the period covered by the forecast (that is, the financial projection would be presented in the same document as the financial forecast and the period covered by the projection would not begin before, or extend beyond, the period covered by the forecast).

Training and Proficiency (Ref: par. .17)

.A12 In obtaining knowledge of the entity's business, accounting policies, and the key factors upon which its future financial results appear to depend, the practitioner may focus on areas such as the following:

- The availability and cost of resources needed to operate, for example, raw materials, labor, short-term and long-term financing, and plant and equipment.
- The nature and condition of markets in which the entity sells its goods or services, including final consumer markets if the entity sells to intermediate markets
- Factors specific to the industry, including competitive conditions, sensitivity to economic conditions, accounting policies, specific regulatory requirements, and technology
- Patterns of past performance for the entity or comparable entities, including trends in revenue and costs, turnover of assets, uses and capacities of physical facilities, and management policies

Requesting a Written Assertion (Ref: par. .18)

.A13 Paragraph .18 applies regardless of whether the responsible party is the engaging party.

Planning (Ref: par. .19)

.A14 Factors that may be considered by the practitioner in planning the examination of prospective financial information include the following:

- The financial reporting framework to be used and the type of presentation
- Preliminary judgments about materiality levels
- Items within the prospective financial information that are subject to risk of material misstatement
- Conditions that may require extension or modification of the practitioner's examination procedures
- Knowledge of the entity's business and its industry
- The responsible party's experience in preparing prospective financial information
- The length of the period covered by the prospective financial information
- The process by which the responsible party develops its prospective financial information

Examination Procedures (Ref: par. .21–.23, .25, .26d, and .27)

.A15 Chapter 7 of the guide indicates that a reasonably objective basis for a forecast cannot exist if the premise on which the assumptions are based is too subjective. A forecast has to be based on a realistic premise, which has to be supportable. In contrast, the basic premise for a projection does not have to be supportable, although the hypothetical assumptions should be consistent with the purpose of the presentation. Accordingly, in a projection, the responsible party need not have a reasonably objective basis for the hypothetical assumptions.

.A16 Forecast. The practitioner can form an opinion that the assumptions provide a reasonable basis for the financial forecast if the responsible party represents that the presentation reflects, to the best of its knowledge and belief, its estimate of expected financial position, results of operations, and cash flows

for the prospective period, and the practitioner concludes that, based on the practitioner's examination, (a) the responsible party has explicitly identified all key factors expected to materially affect the operations of the entity during the prospective period and has developed appropriate assumptions with respect to such factors, and (b) the assumptions are suitably supported.

.A17 Projection. The practitioner can form an opinion that the assumptions provide a reasonable basis for the financial projection given the hypothetical assumptions if the responsible party represents that the presentation reflects, to the best of its knowledge and belief, expected financial position, results of operations, and cash flows for the prospective period given the hypothetical assumptions, and the practitioner concludes, based on the practitioner's examination, that

- a. the responsible party has explicitly identified all key factors that would materially affect the operations of the entity during the prospective period if the hypothetical assumptions were to materialize and has developed appropriate assumptions with respect to such factors, and
- b. the other assumptions are suitably supported given the hypothetical assumptions. However, as the number and significance of the hypothetical assumptions increase, the practitioner may not be able to be satisfied about the presentation as a whole by obtaining support for the remaining assumptions.

.A18 A preponderance of information exists for an assumption if the weight of available information supports that assumption. Furthermore, because of the judgments involved in developing assumptions, different people may arrive at somewhat different, but equally reasonable, assumptions based on the same information.

.A19 In evaluating support for assumptions other than hypothetical assumptions in a projection, the practitioner can conclude that they are suitably supported if the preponderance of information supports each significant assumption given the hypothetical assumptions.

.A20 Appropriate considerations for forecasts and projections include whether

- a. sufficient pertinent sources of information about the assumptions have been considered. Examples of external sources the practitioner might consider are government publications, industry publications, economic forecasts, existing or proposed legislation, and reports of changing technology. Examples of internal sources are budgets, labor agreements, patents, royalty agreements and records, sales backlog records, debt agreements, and actions of the board of directors involving entity plans.
- b. the assumptions are consistent with the sources from which they are derived.
- c. the assumptions are consistent with each other.
- d. the historical financial information and other data used in developing the assumptions are sufficiently reliable for that purpose. Reliability can be assessed by inquiry and analytical or other procedures, some of which may have been completed in past audits or reviews of the historical financial statements.
- e. the historical financial information and other data used in developing the assumptions are comparable over the periods specified

or whether the effects of any lack of comparability were considered in developing the assumptions.

- f. the logical arguments or theory, considered with the data supporting the assumptions, are reasonable.

.A21 The procedures the practitioner performs to evaluate these assumptions depends on

- the significance of the period,
- whether financial statements have been prepared for the expired period, and
- whether the forecast or projection incorporates the historical results.

.A22 The practitioner may obtain evidence regarding the actual results by applying audit or review procedures to the historical results.

.A23 At some point the historical results become such a large portion of the prospective results that the practitioner might consider it inappropriate to examine the prospective financial information.

.A24 Under the AICPA presentation guidelines, the accounting principles used in a projection need not be those expected to be used in the historical financial statements for the prospective period if use of a different principle is consistent with the purpose of the presentation.

.A25 The practitioner's consideration of materiality is discussed in section 205.¹¹ Materiality is a concept that is judged in light of the expected range of reasonableness of the information; therefore, users would not expect prospective financial information (information about events that have not yet occurred) to be as precise as historical information.

Written Representations in an Examination Engagement (Ref: par. .30)

.A26 Section 205 requires the practitioner to request written representations from the responsible party, including a representation that it has disclosed to the practitioner all known matters contradicting the subject matter.¹² Because no one can know the future, "known matters," in the context of prospective financial information, refers to what the responsible party expects. The required disclosure in the written representations relates to assumptions that are not consistent with the responsible party's expectations, or in the case of a projection, not consistent with the responsible party's expectations given the occurrence of the hypothetical assumptions.

Content of the Practitioner's Examination Report (Ref: par. .32–.34, and .36)

.A27 The list of elements in paragraphs .32–.34 constitutes all the required elements for a practitioner's report on an examination of prospective

¹¹ Paragraph .17 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹² Paragraph .51c of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

financial information, including the elements required by section 205.¹³ Application guidance regarding the elements of an examination report is included in section 205.¹⁴

.A28 Example 1 in the exhibit, "Illustrative Practitioner's Examination and Agreed-Upon Procedures Reports Related to Prospective Financial Information," to this section provides an illustration of a practitioner's report on an examination of a financial forecast.

.A29 The requirements in paragraph .32 are applicable to practitioners' reports on prospective financial statements and on partial presentations.

.A30 When the practitioner's examination of prospective financial information is part of a larger engagement, for example, a financial feasibility study or business acquisition study, the practitioner may expand the practitioner's report on the examination of the prospective financial information to describe the entire engagement. Chapter 17, "The Practitioner's Examination Report," of the guide addresses reporting when the examination engagement is part of a larger engagement.

.A31 In identifying the standards under which the engagement was performed, the practitioner may specify the AT-C section under which the engagement was performed, for example: AT-C section 305, *Prospective Financial Information*, of the attestation standards established by the AICPA. [Paragraph added, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A32 Section 205 notes that the specified parties may be identified by naming them, referring to a list of them, or identifying them as a class.¹⁵ [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A33 Example 2 in the exhibit to this section provides an illustration of a practitioner's examination report on a financial projection. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A34 The following is an example of a separate paragraph to be added to the practitioner's report when the practitioner examines prospective financial statements, in this case, a forecast that contains a range:

As described in the summary of significant assumptions, management of XYZ Company has elected to portray forecasted [*describe the financial statement element or elements for which the expected results of one or more assumptions fall within a range, and identify assumptions expected to fall within a range, for example, revenue in the amounts of \$X,XXX and \$Y,YYY, which is predicated upon occupancy rates of XX percent and YY percent of available apartments*] rather than as a single point estimate. Accordingly, the accompanying forecast presents forecasted financial position, results of operations, and cash flows [*describe one or more assumptions expected to fall within a range, for example, "at such occupancy rates"*]. However, there is no assurance that the actual results will fall within the range of [*describe one or more assumptions expected to fall within a range, for example, occupancy rates*] presented.

¹⁴ Paragraphs .A85–.A111 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁵ Paragraph .A108 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Modified Opinions (Ref: par. .35)

.A35 Because of the nature, sensitivity, and interrelationship of prospective financial information, a user of a practitioner's report may find it difficult to interpret a practitioner's opinion that is qualified because of a misapplication of accounting principles, the failure to disclose a significant assumption, the unreasonableness of the underlying assumptions, an assumption that is not suitably supported, or a scope limitation. Using language such as "except for . . ." in the practitioner's opinion about these items may result in misunderstanding by users of the report. For that reason, when a misapplication of accounting principles, a failure to disclose a significant assumption, an unreasonable assumption, an assumption that is not suitably supported, or a limitation on the scope of the practitioner's examination has led the practitioner to conclude that the practitioner cannot express an unmodified opinion, paragraph .35 identifies the type of modified opinion to be expressed. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A36 A qualified opinion may result from the failure to disclose matters (other than the significant assumptions) required by AICPA presentation guidelines, for example, the failure to disclose significant accounting policies, which is required by chapter 8 of the guide. (As indicated in paragraph .35*b*, the failure to disclose significant assumptions would result in an adverse opinion.) [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A37 Section 205 indicates that a qualified opinion is expressed as being "except for" the effects of the matter to which the qualification relates.¹⁶ Section 205 also requires that the practitioner's opinion be separated from any paragraphs emphasizing matters related to the subject matter or any other reporting responsibilities.¹⁷ Accordingly, the opinion paragraph would refer to a separate paragraph that describes the matter giving rise to the qualification. The following is an illustration of the separate paragraph that describes the matter giving rise to the qualification and the opinion paragraph when a financial forecast contains a departure from AICPA presentation guidelines:

The forecast does not disclose significant accounting policies. Disclosure of such policies is required by guidelines for the presentation of a forecast established by the AICPA.

In our opinion, except for the omission of the disclosures related to significant accounting policies as discussed in the preceding paragraph, the accompanying forecast is presented, in all material respects, in accordance with the guidelines for the presentation of a forecast established by the AICPA, and the underlying assumptions are suitably supported and provide a reasonable basis for management's forecast.

[Paragraph renumbered and revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

¹⁶ Paragraph .73 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁷ Paragraph .82 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

A38 In an adverse opinion, the practitioner's opinion states that the presentation is not in accordance with the AICPA presentation guidelines and, when applicable, also states that in the practitioner's opinion, the assumptions are not suitably supported and do not provide a reasonable basis for the prospective financial statements. The following are illustrative paragraphs for use when the practitioner expresses an adverse opinion because the financial forecast contains a significant assumption that is unreasonable:

As discussed under the caption "Sales" in the summary of significant forecast assumptions, the forecasted sales include, among other things, revenue from the Company's federal defense contracts continuing at the current level. The Company's present federal defense contracts will expire in March 20XX. No new contracts have been signed, and no negotiations are underway for new federal defense contracts. Furthermore, the federal government has entered into contracts with another company to supply the items being manufactured under the Company's present contracts.

In our opinion, the accompanying forecast is not presented in accordance with the guidelines for the presentation of a forecast established by the AICPA because management's assumptions, as discussed in the preceding paragraph, are not suitably supported and do not provide a reasonable basis for management's forecast.

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

A39 In a disclaimer of opinion, the paragraph of the practitioner's report that describes the matters giving rise to the opinion modification describes the respects in which the examination did not comply with attestation standards applicable to an examination engagement. The practitioner states that because of the respects in which the examination did not comply with such standards, the scope of the examination was not sufficient to enable the practitioner to express, and the practitioner does not express, an opinion on the presentation of or the assumptions underlying the forecast or projection. The following is an illustrative report on an examination of prospective financial statements, in this case, a financial forecast, for which a significant assumption could not be evaluated.

We were engaged to examine the accompanying forecast of XYZ Company, which comprises the forecasted balance sheet as of December 31, 20XX, and the related forecasted statements of income, stockholders' equity, and cash flows for the year then ending. XYZ Company's management is responsible for preparing and presenting the forecast in accordance with the guidelines for the presentation of a forecast established by the AICPA.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

As discussed under the caption, "Income From Investee" in the summary of significant forecast assumptions, the forecast includes income from an equity investee constituting 23 percent of forecasted net income, which is management's estimate of the Company's share of the investee's income to be accrued for 20XX. The investee has not prepared a forecast for the year ending December 31, 20XX, and we were, therefore, unable to obtain suitable support for this assumption.

Our responsibility is to express an opinion on the subject matter or assertion based on conducting the examination in accordance with attestation standards established by the AICPA. Because, as described in the preceding paragraph, we are unable to evaluate management's assumption regarding income from an equity investee and other assumptions that depend thereon, the scope of

our work was not sufficient to express, and we do not express, an opinion with respect to the presentation of or the assumptions underlying the accompanying forecast.

We have no responsibility to update this report for events and circumstances occurring after the date of this report.

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Partial Presentations (Ref: par. .36)

.A40 Paragraphs 8.57–.72 of the guide addresses partial presentations. [Paragraph renumbered and revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A41 The practitioner's procedures on a partial presentation may be affected by the nature of the information presented. Many elements of prospective financial statements are interrelated. The nature and extent of the procedures performed in an examination of some partial presentations may need to be similar to the procedures performed in an examination of a full presentation of prospective financial statements. For example, the scope of a practitioner's procedures when the practitioner examines forecasted results of operations (a partial presentation) would likely be similar to that of procedures used for the examination of prospective financial statements because the practitioner would most likely need to consider the interrelationships of all accounts in the examination of results of operations. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Content of the Practitioner's Agreed-Upon Procedures Report (Ref: par. .39)

.A42 The list of elements in paragraph .39 constitutes all the required elements for a practitioner's report on the application of agreed-upon procedures to a forecast or projection, including the elements required by section 215.¹⁸ Application guidance regarding the elements of an agreed-upon procedures report is included in section 215.¹⁹ [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A43 Example 3 in the exhibit to this section provides an illustration of a practitioner's agreed-upon procedures report. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

¹⁸ Paragraph .34 of section 215, *Agreed-Upon Procedures Engagements*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁹ Paragraphs .A49–.A64 of section 215. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Exhibit — Illustrative Practitioner's Examination and Agreed-Upon Procedures Reports Related to Prospective Financial Information

Example 1: Practitioner's Examination Report on a Financial Forecast

The following is an illustrative practitioner's report for an examination of a financial forecast that does not contain a range.

Independent Accountant's Report

[Appropriate Addressee]

We have examined the accompanying forecast of XYZ Company, which comprises *[identify the statements, for example, the forecasted balance sheet as of December 31, 20XX, and the related forecasted statements of income, stockholders' equity, and cash flows for the year then ending]*, based on the guidelines for the presentation of a forecast established by the AICPA. XYZ Company's management¹ is responsible for preparing and presenting the forecast in accordance with the guidelines for the presentation of a forecast established by the AICPA.² Our responsibility is to express an opinion on the forecast based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the forecast is presented in accordance with the guidelines for the presentation of a forecast established by the AICPA, in all material respects. An examination involves performing procedures to obtain evidence about the forecast. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the forecast, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

In our opinion, the accompanying forecast is presented, in all material respects, in accordance with the guidelines for the presentation of a forecast established by the AICPA, and the underlying assumptions are suitably supported and provide a reasonable basis for management's forecast.

There will usually be differences between the forecasted and actual results because events and circumstances frequently do not occur as expected, and those differences may be material. We have no responsibility to update this report for events and circumstances occurring after the date of this report.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

¹ If the responsible party is other than management, the references to management in this illustrative practitioner's report would be changed to refer to the party who has responsibility for the assumptions.

² When the presentation is summarized as illustrated in exhibit 9-2 of the AICPA Guide *Prospective Financial Information*, this sentence might read, "We have examined the accompanying summarized forecast of XYZ Company as of December 31, 20XX, and for the year then ending..."

Example 2: Practitioner's Examination Report on a Financial Projection

The following is an illustrative practitioner's report for an examination of a financial projection that does not contain a range.

Independent Accountant's Report

[Appropriate Addressee]

We have examined the accompanying projection of XYZ Company, which comprises *[identify the statements, for example, the projected balance sheet as of December 31, 20XX, and the related projected statements of income, stockholders' equity, and cash flows for the year then ending]* based on the guidelines for the presentation of a projection established by the AICPA.³ XYZ Company's management⁴ is responsible for preparing and presenting the projection based on *[identify the hypothetical assumption, for example, the granting of the requested loan as described in the summary of significant assumptions]* in accordance with the guidelines for the presentation of a projection established by the AICPA. The projection was prepared for *[describe the special purpose, for example, the purpose of negotiating a loan to expand XYZ Company's plant]*. Our responsibility is to express an opinion on the projection based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the projection is presented in accordance with the guidelines for the presentation of a projection established by the AICPA, in all material respects. An examination involves performing procedures to obtain evidence about the projection. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the projection, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

In our opinion, *[describe the hypothetical assumption(s), for example, assuming the granting of the requested loan for the purpose of expanding XYZ Company's plant as described in the summary of significant assumptions]* the projection referred to above is presented, in all material respects, in accordance with the guidelines for the presentation of a projection established by the AICPA, and the underlying assumptions are suitably supported and provide a reasonable basis for management's projection given the hypothetical assumption(s).

Even if *[identify the hypothetical assumption, for example, the loan is granted and the plant is expanded,]* there will usually be differences between the projected and actual results because events and circumstances frequently do not occur as expected, and those differences may be material. We have no responsibility to update this report for events and circumstances occurring after the date of this report.

³ When the presentation is summarized as illustrated in exhibit 9-2 of the AICPA Guide *Prospective Financial Information*, this sentence might read, "We have examined the accompanying summarized projection of XYZ Company as of December 31, 20XX, and for the year then ending..."

⁴ If the responsible party is other than management, the references to management in this illustrative practitioner's report would be changed to refer to the party who has responsibility for the assumptions.

The accompanying projection and this report are intended solely for the information and use of *[identify specified parties, for example, XYZ Company and DEF National Bank]*, and are not intended to be and should not be used by anyone other than these specified parties.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 3: Practitioner's Agreed-Upon Procedures Report Related to a Financial Forecast

The following is an illustrative practitioner's report for an engagement to apply agreed-upon procedures to a financial forecast.

Independent Accountant's Agreed-Upon Procedures Report

[Appropriate Addressee]

We have performed the procedures enumerated below on *[identify the statements, for example, the forecasted balance sheet as of December 31, 20XX and the related forecasted statements of income, stockholders' equity, and cash flows of DEF Company, a subsidiary of ABC Company, for the year then ending]*. DEF Company's management⁵ is responsible for preparing and presenting the forecast in accordance with the guidelines for the presentation of a forecast established by the AICPA.

XYZ Corporation's management has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of *[identify the intended purpose of the engagement]*. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and the associated findings are as follows:

[Include paragraphs to describe the procedures performed detailing the nature and extent, and if applicable, the timing of each procedure and to describe the findings from each procedure performed, including sufficient details on exceptions found.]

We were engaged by XYZ Corporation to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, about whether the forecast is presented in accordance with the guidelines for the presentation of a forecast established by the AICPA or whether the underlying assumptions are suitably supported or provide a reasonable basis for management's forecast. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

There will usually be differences between the forecasted and actual results because events and circumstances frequently do not occur as expected, and those differences may be material. We have no responsibility to update this report for events and circumstances occurring after the date of this report.

⁵ If the responsible party is other than management, the references to management in this illustrative report would be changed to refer to the party who has responsibility for the assumptions.

We are required to be independent of XYZ Corporation and to meet our other ethical responsibilities, in accordance with relevant ethical requirements related to our agreed-upon procedures engagement.

[Additional paragraphs may be added to describe other matters]

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

[Paragraph renumbered and revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

AT-C Section 310

Reporting on Pro Forma Financial Information

Source: SSAE No. 18.

Effective for practitioners' examination and review reports on pro forma financial information dated on or after May 1, 2017.

Introduction

.01 This section contains performance and reporting requirements and application guidance for a practitioner examining or reviewing pro forma financial information.

.02 This section does not apply when

- a practitioner is performing agreed-upon procedures related to pro forma financial information. Section 105, *Concepts Common to All Attestation Engagements*, and section 215, *Agreed-Upon Procedures Engagements*, are applicable to such engagements.
- certain requesting parties request a comfort letter or ask a practitioner to perform procedures on pro forma financial information in connection with an offering. AU-C section 920, *Letters for Underwriters and Certain Other Requesting Parties*, is applicable to such engagements.
- pro forma financial information is presented outside the basic financial statements but within the same document, and the practitioner is not engaged to report on the pro forma financial information. AU-C section 720, *The Auditor's Responsibilities Relating to Other Information Included in Annual Reports*, and AU-C section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*, may be applicable to such engagements.
- for purposes of a more meaningful presentation, a transaction consummated after the balance sheet date is reflected in the historical financial statements (such as a revision of debt maturities or a revision of earnings per share calculations for a stock split).
- the applicable financial reporting framework requires the presentation of pro forma financial information in the financial statements or the accompanying notes. For example, generally accepted accounting principles require pro forma financial information in FASB *Accounting Standards Codification* (ASC) 805, *Business Combinations*, FASB ASC 250, *Accounting Changes and Error Corrections*, or, in some cases, pro forma financial information relating to subsequent events.

.03 In addition to complying with this section, a practitioner is required to comply with section 105 and either section 205, *Assertion-Based Examination Engagements*, for examinations of pro forma financial information or section 210, *Review Engagements*, for reviews of pro forma financial information. In some cases, this section repeats or refers to requirements found in sections 105, 205, and 210 when describing those requirements in the context of an examination or review of pro forma financial information. Although not all the

requirements in sections 105, 205, and 210 are repeated or referred to in this section, the practitioner is responsible for complying with all the requirements in sections 105, 205, and 210, as applicable.¹ [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Effective Date

.04 This section is effective for practitioners' examination and review reports on pro forma financial information dated on or after May 1, 2017.

Objectives of an Examination Engagement²

.05 In conducting an examination of pro forma financial information, the objectives of the practitioner are to

- a. obtain reasonable assurance about whether, in accordance with (or based on) the criteria
 - i. management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), (Ref: par. .A1)
 - ii. and, in all material respects
 - (1) the related pro forma adjustments give appropriate effect to those assumptions, and
 - (2) the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts.
- b. express an opinion in a written report on the matters in paragraph .05a.

Objectives of a Review Engagement

.06 In conducting a review of pro forma financial information, the objectives of the practitioner are to

- a. obtain limited assurance about whether, in accordance with (or based on) the criteria, any material modifications should be made to
 - i. management's assumptions in order for them to provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event),
 - ii. the related pro forma adjustments in order for them to give appropriate effect to those assumptions, or
 - iii. the pro forma amounts in order for them to reflect the proper application of those adjustments to the historical financial statement amounts.

¹ Section 206, *Direct Examination Engagements*, states that section 206 is not applicable to examination engagements related to subject matter for which other AT-C sections require the application of section 205, *Assertion-Based Examination Engagements*, which includes this section. [Footnote added, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

² Paragraph .10 of this section requires the practitioner to request a written assertion from the responsible party. For that reason, when the term "examination" is used in this section, it refers to an "assertion-based examination" performed under section 205 and this section. [Footnote added, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- b. express a conclusion in a written report on the matters in paragraph .06a.

Definitions

.07 For the purposes of this section, the following terms have the meanings attributed as follows: (Ref: par. .A2–.A5)

Criteria for the preparation of pro forma financial information. The basis disclosed in the pro forma financial information that management used to develop the pro forma financial information, including the assumptions underlying the pro forma financial information. Paragraph .11 contains the attributes of suitable criteria for an examination or review of pro forma financial information.

Pro forma financial information. A presentation that shows what the significant effects on historical financial information might have been had a consummated or proposed transaction (or event) occurred at an earlier date.

Requirements

Preconditions for an Examination or Review Engagement

.08 In order to accept an attestation engagement to examine or review pro forma financial information, in addition to the preconditions for an attestation engagement included in sections 105 and 205, the practitioner³

- a. should determine that the document that contains the pro forma financial information includes historical financial statements of the entity for the most recent year (or for the preceding year if financial statements for the most recent year are not yet available) or that such financial statements are readily available and, if pro forma financial information is presented for an interim period, the document also either includes historical interim financial information for that period (which may be presented in condensed form) or such interim information is readily available. In the case of a business combination, the document includes the relevant historical financial information for the significant constituent parts of the combined entity. (Ref: par. .A6–.A7)
- b. should determine that the historical financial statements of the entity (or in the case of a business combination, of each significant constituent part of the combined entity) on which the pro forma financial information is based, in the case of (Ref: par. .A7–.A8)
 - i. an examination of pro forma financial information, have been audited, or
 - ii. a review of pro forma financial information, have been audited or reviewed, (Ref: par. .A8)and the audit report (or the review report, if issued) is included in the document containing the pro forma financial information (or is readily available) to the extent that the historical financial information is included in the document pursuant to paragraph .08a.

³ Paragraphs .26–.30 of section 105, *Concepts Common to All Attestation Engagements*, and paragraph .06 of section 205, *Examination Engagements*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- c. will be able to obtain an appropriate level of knowledge of the accounting and financial reporting practices of the entity (or in the case of a business combination, of each significant constituent part of the combined entity) that will enable the practitioner to perform the procedures necessary to report on the pro forma financial information.

.09 The level of service provided by the practitioner on the pro forma financial information should not exceed that provided on the related historical financial statements. An examination can be performed on pro forma financial information only if the related historical financial statements were audited. A review can be performed on pro forma financial information only if the related historical financial statements were audited or reviewed. In the case of a business combination, the level of service provided by the practitioner on the pro forma financial information should not exceed the lowest level of service provided on the underlying historical financial statements of any significant constituent part of the combined entity. (Ref: par. .A9)

Requesting a Written Assertion

.10 The practitioner should request from management a written assertion. If management refuses to provide a written assertion, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation (Ref: par. .A10)

Assessing the Suitability of the Criteria

.11 As required by section 105, the practitioner should determine whether management has used suitable criteria in preparing and presenting the pro forma financial information.⁴ In assessing the suitability of the criteria, the practitioner should determine whether the criteria include, at a minimum, that

- a. the financial information be extracted from audited or reviewed historical financial statements;
- b. the pro forma adjustments be
 - i. directly attributable to the transaction (or event),
 - ii. factually supportable (Ref: par. .A11),
 - iii. consistent with the entity's applicable financial reporting framework and its accounting policies under that framework; and
- c. the pro forma financial information be appropriately presented and include disclosures that enable intended users to understand the information conveyed.

Understanding the Entity's Accounting and Financial Reporting Policies

.12 The practitioner who is reporting on the pro forma financial information should have or obtain an appropriate level of knowledge of the accounting and financial reporting practices of the entity (or, in the case of a business combination, each significant constituent part of the combined entity). (Ref: par. .A12)

⁴ Paragraph .27b(ii) of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Examination and Review Procedures

.13 The procedures the practitioner should apply to the assumptions and pro forma adjustments for either an examination or a review engagement are as follows:

- a.* Obtain an understanding of the underlying transaction (or event). (Ref: par. .A13)
- b.* Obtain an understanding of the accounting and financial reporting practices of each significant constituent part of the combined entity in a business combination that will enable the practitioner to perform the required procedures. If another practitioner has performed an audit or a review of the most recent annual or interim period for which the pro forma financial information is presented (or the most recent annual or interim period of a significant constituent part of the combined entity), the need, by a practitioner reporting on the pro forma financial information, for an understanding of such entity's accounting and financial reporting practices is not diminished. In such circumstances, the practitioner should consider whether the practitioner can acquire sufficient knowledge of these matters to perform the procedures necessary to report on the pro forma financial information.
- c.* Discuss with management their assumptions regarding the effects of the transaction (or event).
- d.* Evaluate whether pro forma adjustments are included for all significant effects directly attributable to the transaction (or event).
- e.* Obtain sufficient evidence in support of such adjustments. (Ref: par. .A14)
- f.* Evaluate whether management's assumptions that underlie the pro forma adjustments are presented in a sufficiently clear and comprehensive manner.
- g.* Evaluate whether the pro forma adjustments are consistent with each other and with the data used to develop them.
- h.* Evaluate whether computations of pro forma adjustments are mathematically correct and whether the pro forma column reflects the proper application of those adjustments to the historical financial statements.
- i.* Read the pro forma financial information and evaluate whether
 - i.* the underlying transaction (or event), the pro forma adjustments, the significant assumptions, and the significant uncertainties, if any, about those assumptions have been appropriately described.
 - ii.* the source of the historical financial information on which the pro forma financial information is based has been appropriately identified.

Written Representations in an Examination and Review Engagement

.14 In addition to the written representations from management required by section 205 for an examination engagement or by section 210 for a review

engagement, the practitioner should request written representations from management that⁵

- a. it is responsible for the assumptions used in determining the pro forma adjustments;
- b. the assumptions are factually supportable;
- c. the assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event); the related pro forma adjustments give appropriate effect to those assumptions; and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts
- d. the pro forma adjustments are consistent with the entity's applicable financial reporting framework and its accounting policies under that framework
- e. the pro forma financial information is appropriately presented and discloses the significant effects directly attributable to the transaction (or event). (See paragraph .11c.)

.15 In an examination or a review engagement, the practitioner should request from management the written representations required by section 205 or section 210, as applicable, and paragraph .14 of this section, even if the engaging party is not management. The alternative to obtaining the required written representations provided for in sections 205 and 210 is not permitted in an engagement to examine or review pro forma financial information.⁶ Management's refusal to furnish the written representations required by section 205 and paragraph .14 of this section constitutes a limitation on the scope of the examination engagement. Such refusal is often sufficient to preclude an unmodified opinion and, particularly with respect to the representations in paragraph .53 of section 205, may cause the practitioner to disclaim an opinion or withdraw from the examination engagement, when withdrawal is possible under applicable law or regulation.⁷ Management's refusal to furnish the written representations required by section 210 and paragraph .14 of this section constitutes a limitation on the scope of the review engagement sufficient to cause the practitioner to withdraw from the review engagement.⁸ However, based on the nature of the representations not obtained or the circumstances of the refusal, the practitioner may conclude that a qualified opinion is appropriate. [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Reporting

.16 The practitioner's report on pro forma financial information may be added to the practitioner's report on historical financial information, or it may appear separately. If the reports are combined and the date of completion of the procedures for the examination or review of the pro forma financial information

⁵ Paragraph .51 of section 205 and paragraph .33 of section 210, *Review Engagements*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁶ Paragraph .52 of section 205 and paragraph .34 of section 210. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁷ Paragraphs .51, .56, and .A68 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁸ Paragraphs .33–.38c of section 210. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

is after the date the practitioner obtained the evidence necessary to issue a report on the audit or review of the historical financial information, the combined report should be dual-dated. (Ref: par. .A15)

Content of the Practitioner's Examination Report

.17 The practitioner's examination report on pro forma financial information should include the following, unless the practitioner is disclaiming an opinion, in which case, items .17j and .17k should be omitted: (Ref: par. .A16)

- a. A title that includes the word *independent*.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. A reference to the pro forma adjustments included in the pro forma financial information.
- d. A reference to management's description of the transaction (or event) to which the pro forma adjustments give effect. (The description is included in the pro forma financial information.)
- e. An identification or description of the pro forma financial information being reported on, including the point in time or period of time to which the measurement or evaluation of the pro forma financial information relates.
- f. An identification of the criteria against which the pro forma financial information was measured or evaluated.
- g. A reference to the financial statements from which the historical financial information is derived, a statement that such financial statements were audited, and, if applicable, whether the financial statements were audited by another auditor. (The report on pro forma financial information should refer to any modification in the auditor's report on the historical financial statements. In the case of a business combination, this paragraph applies to each significant constituent part of the combined entity.) (Ref: par. .A17)
- h. A statement that the pro forma adjustments are based on management's assumptions.
- i. A statement that identifies management and its responsibility for the pro forma financial information.
- j. A statement that the practitioner's responsibility is to express an opinion on the pro forma financial information based on the practitioner's examination.
- k. A statement that
 - i. the practitioner's examination was conducted in accordance with attestation standards established by the AICPA.
 - ii. those standards require that the practitioner plan and perform the examination to obtain reasonable assurance about whether, in accordance with (or based on) the criteria
 - (1) management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event),
 - (2) and, in all material respects,

- (a) the related pro forma adjustments give appropriate effect to those assumptions, and
 - (b) the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts.
 - iii. the practitioner believes the evidence obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.
- l.* An examination of pro-forma financial information involves performing procedures to obtain evidence about
 - i. management's assumptions, (Ref: par. .A18)
 - ii. the related pro forma adjustments, and
 - iii. the pro forma amounts.
- m.* A statement that the practitioner is required to be independent and to meet the practitioner's other ethical responsibilities in accordance with relevant ethical requirements related to the examination engagement.
- n.* A description of the objectives and limitations of pro forma financial information.
- o.* The practitioner's opinion about whether, in accordance with (or based on) the criteria
 - i. management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the transaction (or event), (Ref: par. .A19)
 - ii. and, in all material respects
 - (1) the related pro forma adjustments give appropriate effect to those assumptions, and
 - (2) the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts.
- p.* When the circumstances identified in section 205 are applicable, an alert, in a separate paragraph, that restricts the use of the report or describes the purpose of the report, as applicable.⁹
- q.* The manual or printed signature of the practitioner's firm.
- r.* The city and state where the practitioner's report is issued.
- s.* The date of the report. (The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate evidence on which to base the practitioner's opinion, including evidence that
 - i. the attestation documentation has been reviewed,
 - ii. the pro forma financial information has been prepared, and
 - iii. management has provided a written assertion.)

⁹ Paragraph .64 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

[Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Content of the Practitioner's Review Report

.18 The practitioner's review report on pro forma financial information should include the following: (Ref: par. .A20)

- a. A title that includes the word *independent*.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. A reference to the pro forma adjustments included in the pro forma financial information.
- d. A reference to management's description of the transaction (or event) to which the pro forma adjustments give effect. (The description is included in the pro forma financial information.)
- e. An identification or description of the pro forma financial information being reported on, including the point in time or period of time to which the measurement or evaluation of the pro forma financial information relates.
- f. An identification of the criteria against which the pro forma financial information was measured or evaluated.
- g. A reference to the financial statements from which the historical financial information is derived and (Ref: par. .A21)
 - i. a statement that such financial statements were audited or reviewed, as applicable.
 - ii. if the practitioner issued a review report on the historical financial statements, a statement that a review report was issued, and, if applicable, whether the financial statements were reviewed by another accountant. (The report on pro forma financial information should refer to any modification in the accountant's report on the historical financial information. In the case of a business combination, this paragraph applies to each significant constituent part of the combined entity.)
- h. A statement that the pro forma adjustments are based on management's assumptions.
- i. A statement that identifies
 - i. management and its responsibility for the pro forma financial information.
 - ii. the practitioner's responsibility to express a conclusion on the pro forma financial information based on the practitioner's review.
- j. A statement that
 - i. the practitioner's review was conducted in accordance with attestation standards established by the AICPA.
 - ii. those standards require that the practitioner plan and perform the review to obtain limited assurance about whether, in accordance with (or based on) the criteria, any material modifications should be made to

- (1) management's assumptions in order for them to provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), (Ref: par. .A22)
 - (2) the related pro forma adjustments in order for them to give appropriate effect to those assumptions, or
 - (3) the pro forma amounts in order for them to reflect the proper application of those adjustments to the historical financial statement amounts.
- iii. the practitioner believes the review evidence the practitioner obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's conclusion.
- iv. the procedures performed in a review vary in nature and timing from, and are substantially less in extent than, an examination, the objective of which is to obtain reasonable assurance about whether, in accordance with (or based on) the criteria, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts in order to express an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed.
- v. the practitioner is required to be independent and to meet the practitioner's other ethical responsibilities in accordance with relevant ethical requirements relating to the review engagement.
- k. a description of the objectives and limitations of pro forma financial information.
- l. a description of the work performed as a basis for the practitioner's conclusion.
- m. the practitioner's conclusion about whether, based on the review and in accordance with (or based on) the criteria, the practitioner is aware of any material modifications that should be made to
 - i. management's assumptions in order for them to provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), (Ref: par. .A23)
 - ii. the related pro forma adjustments in order for them to give appropriate effect to those assumptions, or
 - iii. the pro forma amounts in order for them to reflect the proper application of those adjustments to the historical financial statement amounts.

- n.* When the circumstances identified in section 210 are applicable, an alert, in a separate paragraph, that restricts the use of the report or describes the purpose of the report, as applicable.¹⁰
- o.* The manual or printed signature of the practitioner's firm.
- p.* The city and state where the practitioner's report is issued.
- q.* The date of the report. The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate review evidence on which to base the practitioner's conclusion, including evidence that
 - i.* the attestation documentation has been reviewed,
 - ii.* the pro forma financial information has been prepared, and
 - iii.* management has provided a written assertion.

[Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Application and Other Explanatory Material

Objectives of an Examination Engagement (Ref: par. .05a[i])

.A1 For the purposes of this section, the responsible party is management of the entity for which the practitioner is reporting on pro forma financial information.

Definitions (Ref: par. .07)

Pro Forma Financial Information

.A2 Pro forma financial information is developed by applying pro forma adjustments to historical financial information. Appropriate pro forma adjustments are based on management's assumptions, give effect to all significant effects directly attributable to the transaction (or event), and are stated on a basis consistent with the financial reporting framework of the reporting entity and its accounting policies under that framework.

.A3 Pro forma financial information is commonly used to show the effects of transactions such as the following:

- Business combination
- Change in capitalization
- Disposition of a significant portion of the business
- Change in the form of business organization or status as an autonomous entity
- Proposed sale of securities and the application of the proceeds

.A4 Adequately disclosed pro forma financial information

- is labeled as such to distinguish it from historical financial information.

¹⁰ Paragraph .47c of section 210. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- describes the transaction (or event) that is reflected in the pro forma financial information, the date on which the transaction (or event) is assumed to occur, the financial reporting framework of the historical financial statements, the source of the historical financial information on which it is based, the significant assumptions used to develop the pro forma adjustments, and any significant uncertainties about those assumptions.
- indicates that the pro forma financial information should be read in conjunction with related historical financial information and that the pro forma financial information is not necessarily indicative of the results (such as financial position and results of operations, as applicable) that would have been attained had the transaction (or event) actually taken place earlier.

.A5 Article 11 of Regulation S-X provides further guidance on the presentation of pro forma financial information included in filings with the SEC.

Preconditions for an Examination or Review Engagement (Ref: par. .08–.09)

.A6 For pro forma financial information included in an SEC Form 8-K, historical financial information previously included in an SEC filing would meet this requirement. Interim historical financial information may be presented as a column in the pro forma financial information.

.A7 Historical financial statements, historical interim financial information, and audit reports are deemed to be *readily available* if they are obtainable by a third-party user without any further action by the entity. (For example, historical interim financial information on an entity's website may be considered readily available, but being available upon request is not considered readily available.)

.A8 For entities within the PCAOB's jurisdiction as defined by the Sarbanes-Oxley Act of 2002, as amended, the review may be as defined in AS 4105, *Reviews of Interim Financial Information*, of the PCAOB's auditing standards. For nonissuers, the review may be an interim or annual review as described in AR-C section 90, *Review of Financial Statements*, or an interim review as discussed in AU-C section 930, *Interim Financial Information*, when the review of interim financial information meets the provisions of that section.¹¹ Although AS 4105 does not require an accountant to issue a written report on a review of interim financial information, the SEC requires the report to be filed if, in any filing, the entity states that the interim financial information has been reviewed by an independent public accountant.¹² [Revised, February 2017, to better reflect the AICPA Council Resolution designating the PCAOB to promulgate technical standards.]

.A9 If the underlying historical financial statements of the entity (or, in the case of a business combination, of each significant constituent part of the combined entity) have been audited at year-end and reviewed at an interim date, the practitioner may perform an examination or a review of the pro forma

¹¹ Paragraph .04 of AR-C section 90, *Review of Financial Statements*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹² Paragraph .03 of AS 4105, *Reviews of Interim Financial Information*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

financial information at year-end, but is limited to performing a review of the pro forma financial information at the interim date.

Requesting a Written Assertion (Ref: par. .10)

.A10 Paragraph .10 applies regardless of whether the responsible party is the engaging party.

Assessing the Suitability of the Criteria (Ref: par. .11b(ii))

.A11 Management is responsible for having factually supportable pro forma adjustments. The pro forma adjustments are factually supportable if the preponderance of the information supports each significant assumption underlying the adjustments.

Understanding the Entity's Accounting and Financial Reporting Policies (Ref: par. .12)

.A12 Procedures to obtain knowledge of each significant constituent part of the combined entity in a business combination may include communicating with other practitioners who have audited or reviewed the historical financial information on which the pro forma financial information is based. Matters that may be considered include

- accounting principles and financial reporting practices followed;
- transactions between the entities;
- material contingencies; and
- relevant industry, legal and regulatory, and other external factors pertaining to the entity and any acquiree or divestee.

Examination and Review Procedures (Ref: par. .13a and e)

.A13 An understanding of the underlying transaction (or event) may be obtained, for example, by reading relevant contracts and minutes of meetings of the board of directors and by making inquiries of appropriate officials of the entity, and, if considered necessary in the circumstances, of the entity acquired or to be acquired.

.A14 The evidence required to support the level of assurance obtained is a matter of professional judgment. Sections 205 and 210 provide guidance about the evidence to be obtained in examination and review engagements, respectively. Examples of evidence that the practitioner might consider obtaining are purchase, merger or exchange agreements, appraisal reports, debt agreements, employment agreements, actions of the board of directors, and existing or proposed legislation or regulatory actions.

Reporting (Ref: par. .16)

.A15 The following is an example of how the report would be dual dated:

February 15, 20X2, except for the paragraphs regarding pro forma financial information for which the date is March 20, 20X2.

Content of the Practitioner's Examination Report (Ref: par. .17)

.A16 The list of elements in paragraph .17 constitutes all the required elements for a practitioner's examination report on pro forma financial information, including the elements required by section 205.¹³ Application guidance regarding the elements of an examination report is included in section 205.¹⁴

Reference to Financial Statements From Which Historical Financial Information is Derived (Ref: par. .17g)

.A17 If the historical financial information was previously included in an SEC filing, the practitioner's report would be modified to indicate that the historical financial statements are "incorporated by reference."

Statement That Examination Involves Performing Procedures to Obtain Evidence About Management's Assumptions (Ref: par. .17[iii][1])

.A18 Because a business combination accounted for in a manner similar to a pooling-of-interests combines the historical amounts of the combined entities retroactively, pro forma adjustments for a transaction that is not yet reflected in the historical financial statements or a proposed transaction generally affect only the equity section of the pro forma condensed balance sheet. Such business combinations would not ordinarily involve a choice of assumptions by management. Accordingly, a practitioner's report on a business combination that will be accounted for in a manner similar to a pooling-of-interests need not address management's assumptions unless the pro forma financial information includes adjustments to conform the accounting principles of the combining entities or gives effect to other transactions (for example, a new contractual arrangement or reduction in interest expense attributable to repayment of debt).

Opinion About Management's Assumptions (Ref: par. .17[i])

.A19 Uncertainty about whether the transaction (or event) will be consummated would not ordinarily require a modification of the practitioner's report.

Content of the Practitioner's Review Report (Ref: par. .18)

.A20 The list of elements in paragraph .18 constitutes all the required elements for a practitioner's report on a review of pro forma financial information, including the elements required by section 210.¹⁵ Application guidance regarding the elements of a review report is included in section 210.¹⁶

Reference to Financial Statements From Which Historical Financial Information is Derived (Ref: par. .18g)

.A21 If the historical financial information was previously included in an SEC filing, the practitioner's report would be modified to indicate that the historical financial statements are "incorporated by reference."

¹³ Paragraphs .63–.66 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁴ Paragraphs .A85–.A111 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁵ Paragraphs .46–.49 of section 210. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁶ Paragraphs .A61–.A80 of section 210. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Statement That the Practitioner Plans and Performs Review to Obtain Limited Assurance About Management's Assumptions (Ref: par. .18[iii][1])

.A22 Because a business combination accounted for in a manner similar to a pooling-of-interests combines the historical amounts of the combined entities retroactively, pro forma adjustments for a transaction that is not yet reflected in the historical financial statements or a proposed transaction generally affect only the equity section of the pro forma condensed balance sheet. Such business combinations would not ordinarily involve a choice of assumptions by management. Accordingly, a practitioner's report on a business combination that will be accounted for in a manner similar to a pooling-of-interests need not address management's assumptions unless the pro forma financial information includes adjustments to conform the accounting principles of the combining entities or gives effect to other transactions (for example, a new contractual arrangement or reduction in interest expense attributable to a repayment of debt).

Conclusion About Management's Assumptions (Ref: par. .18m[i])

.A23 Uncertainty about whether the transaction (or event) will be consummated would not ordinarily require a modification of the practitioner's report.

.A24

Exhibit—Illustrative Practitioner's Reports for Examinations and Reviews of Pro Forma Financial Information

The illustrative practitioner's examination reports in this exhibit (examples 1, 3, 4, 5, and 6) meet the reporting requirements of section 205, *Assertion-Based Examination Engagements*, and of paragraph .17 of this section.¹ A practitioner may use alternative language in drafting an examination report, provided that the language meets the applicable requirements of section 205 and paragraph .17 of this section.²

The illustrative practitioner's review reports in this exhibit (examples 2 and 3) meet the applicable reporting requirements of section 210, *Review Engagements*, and of paragraph .18 of this section.³ A practitioner may use alternative language in drafting a review report, provided that the language meets the applicable requirements of section 210 and paragraph .18 of this section.⁴

The language in these illustrative examination and review reports assume that one column of pro forma financial information is presented without presenting separate columns of historical financial information and pro forma adjustments.

Example 1: Practitioner's Examination Report on Pro Forma Financial Information: Unmodified Opinion

Independent Accountant's Report

[Appropriate Addressee]

We have examined the pro forma adjustments giving effect to the underlying transaction (or event) described in Note 1 and the application of those adjustments to the historical amounts in the accompanying pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended (pro forma financial information), based on the criteria in Note 1. The historical condensed financial statements are derived from the historical financial statements of X Company, which were audited by us, and of Y Company, which were audited by other accountants, appearing elsewhere herein [or "*and are readily available*"]. The pro forma adjustments are based on management's assumptions described in Note 1. X Company's management is responsible for the pro forma financial information. Our responsibility is to express an opinion on the pro forma financial information based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, based on the criteria in Note 1, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts

¹ Paragraphs .62–.86 of section 205, *Examination Engagements*.

² Paragraphs .62–.86 of section 205.

³ Paragraphs .44–.60 of section 210, *Review Engagements*.

⁴ See footnote 3.

reflect the proper application of those adjustments to the historical financial statement amounts. An examination involves performing procedures to obtain evidence about management's assumptions, the related pro forma adjustments, and the pro forma amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the pro forma financial information, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

The objective of this pro forma financial information is to show what the significant effects on the historical financial information might have been had the underlying transaction (or event) occurred at an earlier date. However, the pro forma condensed financial statements are not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the above-mentioned transaction (or event) actually occurred at such earlier date.

In our opinion, based on the criteria in Note 1, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the above-mentioned transaction (or event) described in Note 1, and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 2: Practitioner's Review Report on Pro Forma Financial Information: Unmodified Conclusion

Independent Accountant's Report

[Appropriate Addressee]

We have reviewed the pro forma adjustments giving effect to the transaction (or event) described in Note 1 and the application of those adjustments to the historical amounts in the accompanying pro forma condensed balance sheet of X Company as of March 31, 20X2, and the related pro forma condensed statement of income for the three months then ended (pro forma financial information), based on the criteria in Note 1. These historical condensed financial statements are derived from the historical unaudited financial statements of X Company, which were reviewed by us, and of Y Company, which were reviewed by other accountants,⁵ appearing elsewhere herein [or "and are readily available"]. The pro forma adjustments are based on management's assumptions as described

⁵ When one set of historical financial statements is audited and the other set is reviewed, wording similar to the following would be appropriate:

The historical condensed financial statements are derived from the historical financial statements of X Company, which were audited by us, and of Y Company, which were reviewed by other accountants, appearing elsewhere herein [or "and are readily available"].

in Note 1. X Company's management is responsible for the pro forma financial information. Our responsibility is to express a conclusion based on our review.

Our review was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform our review to obtain limited assurance about whether, based on the criteria in Note 1, any material modifications should be made to management's assumptions in order for them to provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event); the related pro forma adjustments, in order for them to give appropriate effect to those assumptions; or the pro forma amounts, in order for them to reflect the proper application of those adjustments to the historical financial statement amounts. The procedures performed in a review vary in nature and timing from, and are substantially less in extent than an examination, the objective of which is to obtain reasonable assurance about whether, based on the criteria, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts, in order to express an opinion. Accordingly, we do not express such an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the review evidence obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements related to the engagement.

The objective of this pro forma financial information is to show what the significant effects on the historical financial information might have been had the underlying transaction (or event) occurred at an earlier date. However, the pro forma condensed financial statements are not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the above-mentioned transaction (or event) actually occurred at such earlier date.

[Include a description of the work performed as a basis for the practitioner's conclusion.]

Based on our review, we are not aware of any material modifications that should be made to management's assumptions in order for them to provide a reasonable basis for presenting the significant effects directly attributable to the above-mentioned transaction (or event) described in Note 1, the related pro forma adjustments in order for them to give appropriate effect to those assumptions, or the pro forma amounts, in order for them to reflect the proper application of those adjustments to the historical financial statement amounts in the pro forma condensed balance sheet of X Company as of March 31, 20X2, and the related pro forma condensed statement of income for the three months then ended, based on the criteria in Note 1.

[Date of practitioner's report]

**Example 3: Practitioner's Examination Report on Pro Forma Financial Information at Year-End With a Review of Pro Forma Financial Information for a Subsequent Interim Date:
Unmodified Opinion and Unmodified Conclusion**

Independent Accountant's Report

[Appropriate Addressee]

We have examined the pro forma adjustments giving effect to the transaction (or event) described in Note 1 and the application of those adjustments to the historical amounts in the accompanying pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended (pro forma financial information) based on the criteria in Note 1. The historical condensed financial statements are derived from the historical financial statements of X Company, which were audited by us, and of Y Company, which were audited by other accountants, appearing elsewhere herein *[or "and are readily available"]*. The pro forma adjustments are based on management's assumptions described in Note 1. X Company's management is responsible for the pro forma financial information. Our responsibility is to express an opinion on the pro forma financial information based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, based on the criteria in Note 1, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts. An examination involves performing procedures to obtain evidence about management's assumptions, the related pro forma adjustments, and the pro forma amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the pro forma financial information, whether due to fraud or error. We believe that the evidence we have obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements related to the engagement.

In addition, we have reviewed the pro forma adjustments and the application of those adjustments to the historical amounts in the accompanying pro forma condensed balance sheet of X Company as of March 31, 20X2, and the related pro forma condensed statement of income for the three months then ended (pro forma financial information), based on the criteria in Note 1. The historical condensed financial statements are derived from the historical financial statements of X Company, which were reviewed by us, and of Y Company, which were reviewed by other accountants,⁶ appearing elsewhere herein *[or "and are*

⁶ When one set of historical financial statements is audited and the other set is reviewed, wording similar to the following would be appropriate:

The historical condensed financial statements are derived from the historical financial statements of X Company, which were audited by us, and of Y Company, which were reviewed by other accountants, appearing elsewhere herein *[or "and are readily available"]*.

readily available"]. The pro forma adjustments are based on management's assumptions as described in Note 1. X Company's management is responsible for the pro forma financial information. Our responsibility is to express a conclusion based on our review.

Our review was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform our review to obtain limited assurance about whether, based on the criteria in Note 1, any material modifications should be made to management's assumptions in order for them to provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event); the related pro forma adjustments, in order for them to give appropriate effect to those assumptions; or the pro forma amounts, in order for them to reflect the proper application of those adjustments to the historical financial statement amounts. The procedures performed in a review vary in nature and timing from, and are substantially less in extent than an examination, the objective of which is to obtain reasonable assurance about whether, based on the criteria, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts, in order to express an opinion. Accordingly, we do not express such an opinion on the pro forma adjustments or on the application of such adjustments to the pro forma condensed balance sheet as of March 31, 20X2, and the pro forma condensed statement of income for the three months then ended. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the review evidence obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

The objective of this pro forma financial information is to show what the significant effects on the historical financial information might have been had the underlying transactions (or event) occurred at an earlier date. However, the pro forma condensed financial statements are not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the above-mentioned transaction (or event) actually occurred at such earlier date.

[Include a description of the work performed as a basis for the practitioner's conclusion.]

In our opinion, based on the criteria in Note 1, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the above-mentioned transaction (or event) described in Note 1, and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended.

Based on our review, we are not aware of any material modifications that should be made to management's assumptions in order for them to provide a reasonable basis for presenting the significant effects directly attributable to the above-mentioned transaction (or event) described in Note 1, the related pro forma adjustments in order for them to give appropriate effect to those assumptions, or the pro forma amounts in order for them to reflect the proper application of those adjustments to the historical financial statement amounts

in the pro forma condensed balance sheet of X Company as of March 31, 20X2, and the related pro forma condensed statement of income for the three months then ended based on the criteria in Note 1.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 4: Practitioner's Examination Report: Qualified Opinion Because of a Scope Limitation

Independent Accountant's Report

[Appropriate Addressee]

We have examined the pro forma adjustments giving effect to the transaction (or event) described in Note 1 and the application of those adjustments to the historical amounts in the accompanying pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended (pro forma financial information), based on the criteria in Note 1. The historical condensed financial statements are derived from the historical financial statements of X Company, which were audited by us, and of Y Company, which were audited by other accountants, appearing elsewhere herein *[or "and are readily available"]*. The pro forma adjustments are based upon management's assumptions described in Note 1. X Company's management is responsible for the pro forma financial information. Our responsibility is to express an opinion on the pro forma financial information based on our examination.

Except as discussed below, our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, based on the criteria in Note 1, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the underlying transaction (or event), and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts. An examination involves performing procedures to obtain evidence about management's assumptions, the related pro forma adjustments, and the pro forma amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the pro forma financial information, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent of *[identify the responsible party, for example, X Company]* and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

We were unable to perform the examination procedures we considered necessary with respect to the assumptions relating to the proposed loan described in Adjustment E in Note 1.

The objective of this pro forma financial information is to show what the significant effects on the historical financial information might have been had the underlying transaction (or event) occurred at an earlier date. However, the pro forma condensed financial statements are not necessarily indicative of the results of operations or related effects on financial position that would have been

attained had the above-mentioned transaction (or event) actually occurred at such earlier date.

In our opinion, based on the criteria in Note 1, except for the effects of such changes, if any, as might have been determined to be necessary had we been able to satisfy ourselves as to the assumptions relating to the proposed loan, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the above-mentioned transaction (or event) described in Note 1, and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 5: Practitioner's Examination Report: Qualified Opinion Because of Reservations About the Propriety of the Assumptions

Independent Accountant's Report

[Appropriate Addressee]

[Same first four paragraphs as examination report in example 1.]

As discussed in Note 1 to the pro forma financial statements, the pro forma adjustments reflect management's assumption that X Division of the acquired company will be sold. The net assets of this division are reflected at their historical carrying amount; generally accepted accounting principles require these net assets to be recorded at fair value less cost to sell.

In our opinion, based on the criteria in Note 1, except for inappropriate valuation of the net assets of X Division, management's assumptions described in Note 1 provide a reasonable basis for presenting the significant effects directly attributable to the above-mentioned transaction (or event) described in Note 1, and, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

Example 6: Practitioner's Examination Report: Disclaimer of Opinion Because of a Scope Limitation

Independent Accountant's Report

[Appropriate Addressee]

We were engaged to examine the pro forma adjustments giving effect to the transaction (or event) described in Note 1 and the application of those adjustments to the historical amounts in the accompanying pro forma financial condensed balance sheet of X Company as of December 31, 20X1, and the related

pro forma condensed statement of income for the year then ended (pro forma financial information), based on the criteria in Note 1. The historical condensed financial statements are derived from the historical financial statements of X Company, which were audited by us, and of Y Company, which were audited by other accountants, appearing elsewhere herein [or "*and are readily available*"]. The pro forma adjustments are based on management's assumptions described in Note 1. X Company's management is responsible for the pro forma financial information.

[The second paragraph in the practitioner's examination report in example 1 is intentionally omitted from the report with a disclaimer of opinion.]

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

[The fourth paragraph in the practitioner's examination report in example 1 is intentionally omitted from the report with a disclaimer of opinion.]

As discussed in Note 1 to the pro forma financial statements, the pro forma adjustments reflect management's assumptions that the elimination of duplicate facilities would have resulted in a 30 percent reduction in operating costs. Management could not supply us with sufficient evidence to support this assertion.

Our responsibility is to express an opinion on the pro forma financial information based on conducting the examination in accordance with attestation standards established by the AICPA. Because we were unable to evaluate management's assumptions regarding the reduction in operating costs and other assumptions related thereto, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on whether, based on the criteria in Note 1, management's assumptions provide a reasonable basis for presenting the significant effects directly attributable to the above-mentioned transaction (or event) described in Note 1, or on whether, in all material respects, the related pro forma adjustments give appropriate effect to those assumptions, and the pro forma amounts reflect the proper application of those adjustments to the historical financial statement amounts in the pro forma condensed balance sheet of X Company as of December 31, 20X1, and the related pro forma condensed statement of income for the year then ended.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

[Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE Nos. 21 and 22.]

AT-C Section 315

Compliance Attestation

Source: SSAE No. 18.

Effective for practitioners' examination reports on compliance with specified requirements and for practitioners' agreed-upon procedures reports related to compliance or internal control over compliance with specified requirements dated on or after May 1, 2017.

Introduction

.01 This section contains performance and reporting requirements and application guidance for a practitioner (Ref: par. .A1–.A3)

- a. examining an entity's compliance with requirements of specified laws, regulations, rules, contracts, or grants (specified requirements) or an assertion about compliance with specified requirements.
- b. performing agreed-upon procedures related to an entity's compliance with specified requirements.
- c. performing agreed-upon procedures related to an entity's internal control over compliance with specified requirements.

.02 This section does not apply to

- a. reviews that address compliance with specified requirements or an entity's internal control over compliance or an assertion thereon because section 210, *Review Engagements*, states that such engagements should not be performed.¹
- b. examination engagements in which a practitioner is reporting on an entity's internal control over compliance with specified requirements. (Ref: par. .A4)
- c. situations in which an auditor reports on specified requirements based solely on an audit of financial statements, as addressed in AU-C section 806, *Reporting on Compliance With Aspects of Contractual Agreements or Regulatory Requirements in Connection With Audited Financial Statements*.
- d. engagements in which a governmental audit requirement requires an auditor to express an opinion on compliance in accordance with AU-C section 935, *Compliance Audits*.

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.03 A practitioner's report issued in accordance with the provisions of this section does not provide a legal determination of an entity's compliance with specified requirements. However, such a report may be useful to legal counsel or others in making such determinations.

.04 In addition to complying with this section, a practitioner is required to comply with section 105, *Concepts Common to All Attestation Engagements*, and

¹ Paragraph .07 of section 210, *Review Engagements*.

either section 205, *Assertion-Based Examination Engagements*, for examinations of compliance, or section 215, *Agreed-Upon Procedures Engagements*, for agreed-upon procedures engagements that address compliance. In some cases, this section repeats or refers to requirements found in sections 105, 205, and 215 when describing those requirements in the context of engagements that address compliance. Although not all the requirements in sections 105, 205, and 215 are repeated or referred to in this section, the practitioner is responsible for complying with all the requirements in sections 105 and either 205 or 215, as applicable.² [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Effective Date³

.05 This section is effective for practitioners' examination reports on compliance with specified requirements and for practitioners' agreed-upon procedures reports related to compliance or internal control over compliance with specified requirements dated on or after May 1, 2017.

Objectives of an Examination Engagement

.06 In conducting an examination of an entity's compliance with specified requirements, the objectives of the practitioner are to (Ref: par. .A5)

- a. obtain reasonable assurance about whether the entity complied with the specified requirements, in all material respects,
- b. express an opinion in a written report about whether
 - i. the entity complied with the specified requirements, in all material respects, or
 - ii. management's assertion about its compliance with the specified requirements is fairly stated, in all material respects.

Objectives of an Agreed-Upon Procedures Engagement

.07 In conducting an agreed-upon procedures engagement for which the subject matter is compliance or internal control over compliance with specified requirements, the objectives of the practitioner are to (Ref: par. .A5)

- a. apply specific procedures to an entity's compliance with specified requirements or an entity's internal control over compliance with specified requirements and
- b. issue a written report that describes the procedures applied and the practitioner's findings without providing an opinion or conclusion on an entity's compliance with specified requirements or an entity's internal control over compliance with specified requirements.

² Section 206, *Direct Examination Engagements*, states that section 206 is not applicable to examination engagements related to subject matter for which other AT-C sections require the application of section 205, *Assertion-Based Examination Engagements*, which includes this section. [Footnote added, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

³ Paragraph .10 of this section requires the practitioner to request a written assertion from the responsible party. For that reason, when the term "examination" is used in this section, it refers to an "assertion-based examination" performed under section 205 and this section. [Footnote added, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Definitions

.08 For the purposes of this section, the following terms have the meanings attributed as follows:

Compliance with specified requirements. An entity's compliance with specified laws, regulations, rules, contracts, or grants.

Internal control over compliance. An entity's internal control over compliance with specified requirements. The internal control addressed in this section may include part of, but is not the same as, internal control over financial reporting. (Ref: par. .A6)

Material noncompliance. A failure to follow compliance requirements or a violation of prohibitions included in the specified requirements that results in noncompliance that is quantitatively or qualitatively material, either individually or when aggregated with other noncompliance. (Ref: par. .A7)

Requirements

Preconditions for Examination Engagements

.09 In order to accept an attestation engagement to examine compliance with specified requirements, in addition to the preconditions for an examination engagement in sections 105 and 205, the practitioner should determine that⁴ (Ref: par. .A8–.A9)

- a. management accepts responsibility for the entity's compliance with specified requirements and the entity's internal control over compliance. (Ref: par. .A8–.A9)
- b. management evaluates the entity's compliance with specified requirements. (Ref: par. .A9)

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.10 In performing an examination under this section, the practitioner should request from management a written assertion. If management refuses to provide a written assertion, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation. (Ref: par. .A10–.A11)

Reasonable Assurance

.11 In an engagement to examine compliance with specified requirements, the practitioner should seek to obtain reasonable assurance that the entity complied with the specified requirements, in all material respects, including designing the examination to detect both intentional and unintentional material noncompliance.

⁴ Paragraphs .26–.30 of section 105, *Concepts Common to All Attestation Engagements*, and paragraph .06 of section 205, *Examination Engagements*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Materiality

.12 As required by section 205, the practitioner should consider materiality when establishing the overall engagement strategy.⁵ (Ref: par. .A12–.A13)

Examination Procedures

.13 The practitioner should obtain an understanding of the specified requirements. The practitioner's procedures to obtain that understanding should include the following: (Ref: par. .A14)

- a. Consideration of laws, regulations, rules, contracts, and grants that pertain to the specified requirements, including published requirements
- b. Consideration of knowledge about the specified requirements obtained through prior engagements and regulatory reports
- c. Discussion with appropriate individuals within the entity (for example, the chief financial officer, internal auditors, legal counsel, compliance officer, or grant or contract administrators)

.14 In an engagement to examine an entity's compliance with specified requirements when the entity has operations in several components (for example, locations, branches, subsidiaries, or programs), the practitioner should determine the nature, timing, and extent of testing to be performed at individual components. In making such a determination and in selecting the components to be tested, the practitioner should evaluate factors such as the following:

- a. The degree to which the specified requirements apply at the component level
- b. Judgments about materiality
- c. The degree of centralization of records
- d. The effectiveness of the control environment, particularly management's direct control over the exercise of authority delegated to others and its ability to supervise activities at various locations effectively
- e. The nature and extent of operations conducted at the various components
- f. The similarity of operations over compliance for different components

.15 The practitioner should obtain an understanding of relevant portions of internal control over compliance sufficient to plan the engagement and to assess control risk for compliance with specified requirements. In planning the examination, such knowledge should be used to identify types of potential noncompliance, to consider factors that affect the risk of material noncompliance, and to design appropriate tests of compliance. (Ref: par. .A15–.A16)

.16 For engagements involving compliance with regulatory requirements, the practitioner's procedures should include reviewing reports of relevant examinations and related communications between regulatory agencies and the entity and, when appropriate, making inquiries of the regulatory agencies, including inquiries about examinations in progress.

⁵ Paragraph .17 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Written Representations in an Examination Engagement

.17 In an examination engagement, in addition to the written representations from management required by section 205,⁶ the practitioner should request written representations from management that (Ref: par. .A17)

- a. acknowledge management's responsibility for establishing and maintaining effective internal control over compliance.
- b. state that management has performed an evaluation of the entity's compliance with specified requirements.
- c. state management's interpretation of any compliance requirements that have varying interpretations.
- d. state that management has disclosed any known noncompliance occurring during or subsequent to the period covered by the practitioner's report.

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.18 In an examination of compliance, the practitioner should request from management the written representations required by section 205 and paragraph .17 of this section, even if the engaging party is not management.⁷ The alternative to obtaining the required written representations provided for in section 205 is not permitted in an engagement to examine compliance.⁸ Management's refusal to furnish the written representations required by section 205 and paragraph .17 of this section constitutes a limitation on the scope of the engagement. Such refusal is often sufficient to preclude an unmodified opinion and particularly with respect to the representations in paragraph .53 of section 205, may cause the practitioner to disclaim an opinion or withdraw from the examination engagement, when withdrawal is possible under applicable law or and regulation.⁹ However, based on the nature of the representations not obtained or the circumstances of the refusal, the practitioner may conclude that a qualified opinion is appropriate. [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Forming the Opinion

.19 In evaluating whether the entity has complied with the specified requirements, in all material respects, (or whether management's assertion about its compliance with the specified requirements is fairly stated, in all material respects), the practitioner should evaluate (a) the nature and frequency of the noncompliance identified and (b) whether such noncompliance is material relative to the nature of the compliance requirements.

⁶ Paragraph .51 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁷ See footnote 6. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁸ Paragraph .52 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁹ Paragraphs .56 and .A68 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Content of the Practitioner's Examination Report

.20 The practitioner's examination report on compliance should include the following, unless the practitioner is disclaiming an opinion, in which case, items .20g and .20h should be omitted: (Ref: par. .A18–.A20)

- a. A title that includes the word *independent*.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. An identification of the compliance matters that are being reported on or the assertion about such matters, including the point in time or period of time to which the measurement or evaluation of compliance relates.
- d. An identification of the specified requirements against which compliance was measured or evaluated. (Ref: par. .A21)
- e. A statement that identifies
 - i. management and its responsibility for compliance with the specified requirements (when reporting on the subject matter) or for its assertion about compliance with the specified requirements (when reporting on the assertion).
- f. A statement that the practitioner's responsibility is to express an opinion on the entity's compliance with the specified requirements or on management's assertion about the entity's compliance with the specified requirements, based on the practitioner's examination.
- g. A statement that
 - i. the practitioner's examination was conducted in accordance with attestation standards established by the AICPA. (Ref: par. .A22)
 - ii. those standards require that the practitioner plan and perform the examination to obtain reasonable assurance about whether
 - (1) the entity complied with the specified requirements, in all material respects, or
 - (2) management's assertion about compliance with the specified requirements is fairly stated, in all material respects.
 - iii. the practitioner believes the evidence obtained is sufficient and appropriate to provide a reasonable basis for the practitioner's opinion.
- h. A description of the nature of an examination engagement.
- i. A statement that the practitioner is required to be independent and to meet the practitioner's other ethical responsibilities in accordance with relevant ethical requirements related to the examination engagement.
- j. A statement that describes significant inherent limitations, if any, associated with the measurement or evaluation of the entity's compliance with specified requirements or its assertion thereon.
- k. A statement that the examination does not provide a legal determination on the entity's compliance with specified requirements.
- l. The practitioner's opinion about whether, in all material respects

- i. the entity complied with the specified requirements or
 - ii. management's assertion about the entity's compliance with specified requirements is fairly stated.
- m. When the circumstances identified in section 205 are applicable, an alert in a separate paragraph that restricts the use of the report or describes the purpose of the report, as applicable.¹⁰
- n. The manual or printed signature of the practitioner's firm.
- o. The city and state where the practitioner's report is issued.
- p. The date of the report. (The report should be dated no earlier than the date on which the practitioner has obtained sufficient appropriate evidence on which to base the practitioner's opinion, including evidence that
 - i. the attestation documentation has been reviewed, and
 - ii. management has provided a written assertion.)

[Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.21 Frequently, criteria will be contained in the compliance requirements, in which case, it is not necessary to repeat the criteria in the practitioner's report; however, if the criteria are not included in the compliance requirement, the report should identify the criteria. (Ref: par. .A21 and .A23–.A24)

Modified Opinions

.22 If the practitioner determines that there is material noncompliance, the practitioner's report should describe the material noncompliance, and the opinion should be modified in accordance with section 205.¹¹ (Ref: par. .A25–.A29)

Preconditions for an Agreed-Upon Procedures Engagement

.23 In order to accept an attestation engagement to apply agreed-upon procedures related to compliance with specified requirements or internal control over compliance with specified requirements, in addition to the preconditions for an agreed-upon procedures engagement in sections 105 and 215, the practitioner should determine that management accepts responsibility for the entity's compliance with specified requirements and the entity's internal control over compliance.¹² (Ref: par. .A30) [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.24 The practitioner should obtain an understanding of the specified requirements. The practitioner's procedures to obtain that understanding should include the following:

- a. Consideration of laws, regulations, rules, contracts, and grants that pertain to the specified requirements, including published requirements

¹⁰ Paragraph .64 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹¹ Paragraphs .70–.83 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹² Paragraphs .26–.30 of section 105 and paragraphs .10–.13 of section 215, *Agreed-Upon Procedures Engagements*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- b. Consideration of knowledge about the specified requirements obtained through prior engagements and regulatory reports
- c. Discussion with appropriate individuals within the entity (for example, the chief financial officer, internal auditors, legal counsel, compliance officer, or grant or contract administrators)

Written Representations in an Agreed-Upon Procedures Engagement

.25 In an agreed-upon procedures engagement, in addition to the written representations from management required by section 215, the practitioner should request written representations from management that¹³

- a. acknowledge management's responsibility for establishing and maintaining effective internal control over compliance.
- b. state management's interpretation of any compliance requirements that have varying interpretations.
- c. state that management has disclosed any known noncompliance occurring during or subsequent to the period covered by the practitioner's report.

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Content of the Practitioner's Agreed-Upon Procedures Report

.26 The practitioner's agreed-upon procedures report on compliance (or internal control over compliance) should include the following: (Ref: par. .A32–.A35)

- a. A title that includes the word *independent* to clearly indicate that it is the report of an independent accountant.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. Identification of the engaging party.
- d. Indication that the subject matter to which the procedures have been applied is the entity's compliance (or internal control over compliance) during a period or as of a point in time.
- e. Identification of the specified requirements against which the entity's compliance (or internal control over compliance) was measured or evaluated.
- f. An indication that management of the entity is responsible for the entity's compliance (or internal control over compliance) with the specified requirements.
- g. A statement that the engaging party acknowledged that the procedures performed are appropriate to meet the intended purpose of the engagement.
- h. A statement that the purpose of the engagement is to assist users in determining whether the entity complied with the specified requirements (or internal control over compliance with specified requirements)

¹³ Paragraph .27 of section 215. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- i.* A statement that the practitioner's report may not be suitable for any other purpose.
- j.* A statement that the procedures performed may not address all the items of interest to a user of the report and may not meet the needs of all users of the report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.
- k.* A statement that an agreed-upon procedures engagement involves the practitioner performing specific procedures that the engaging party has agreed to and acknowledged to be appropriate for the intended purpose of the engagement and reporting on findings based on the procedures performed.
- l.* A description of the procedures performed detailing the nature and extent, and if applicable, the timing of each procedure.
- m.* A description of the findings from each procedure performed, including sufficient details on exceptions found. (The practitioner should not provide a conclusion.)
- n.* If applicable, a description of any specified threshold established by management for reporting exceptions.
- o.* A statement that the agreed-upon procedures engagement was conducted in accordance with attestation standards established by the AICPA.
- p.* A statement that the practitioner was not engaged to and did not conduct an examination or review, the objective of which would be the expression of an opinion or conclusion, respectively, on compliance with specified requirements (or internal control over compliance with specified requirements).
- q.* A statement that the practitioner does not express such an opinion or conclusion.
- r.* A statement that had the practitioner performed additional procedures, other matters might have come to the practitioner's attention that would have been reported.
- s.* A statement that the practitioner is required to be independent of the entity and to meet the practitioner's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the agreed-upon procedures engagement.
- t.* If applicable, a description of the nature of the assistance provided by a practitioner's external specialist.
- u.* When applicable, reservations or restrictions concerning procedures or findings.
- v.* The manual or printed signature of the practitioner's firm.
- w.* The city and state where the practitioner's report is issued.
- x.* The date of the report. (The report should be dated no earlier than the date on which the practitioner completed the procedures and determined the findings, including that the attestation documentation has been reviewed.)

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Alert That Restricts the Use of the Practitioner's Agreed-Upon Procedures Report

.27 The practitioner should consider whether to include an alert, in a separate paragraph, that restricts the use of the practitioner's agreed-upon procedures report, taking into account the understanding with the engaging party regarding the nature of the engagement. [Paragraph added, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.28 If the practitioner determines to include an alert, in a separate paragraph, that restricts the use of the practitioner's report, such alert should

- a. state that the practitioner's report is intended solely for the information and use of the specified parties.
- b. identify the specified parties for whom use is intended.
- c. state that the report is not intended to be, and should not be, used by anyone other than the specified parties.

[Paragraph added, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.29 When the engagement is also performed in accordance with *Government Auditing Standards*, and the practitioner determines to include an alert, in a separate paragraph that restricts the use of the practitioner's report, such alert should include the following information, rather than the information required by paragraph .28:

- a. A description of the purpose of the report
- b. A statement indicating that the report is not suitable for any other purpose

[Paragraph added, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Application and Other Explanatory Material

Introduction (Ref: par. .01 and .02b)

.A1 Compliance requirements may be either financial or nonfinancial in nature.

.A2 The criteria for evaluating or measuring compliance with specified requirements ordinarily are included in the specified requirements but may be otherwise identified.

.A3 A practitioner may be engaged to provide other types of services in connection with an entity's compliance with specified requirements or its internal control over compliance with specified requirements. For example, the practitioner may be engaged to provide recommendations on how to improve the entity's compliance or related internal control. Such an engagement is governed by the guidance in CS section 100, *Consulting Services: Definitions and Standards*.

.A4 An engagement to examine internal control over compliance is governed by sections 105 and 205. Additionally, AU-C section 940, *An Audit of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements*, may be helpful to a practitioner in such an engagement.

Objectives of an Examination Engagement (Ref: par. .06–.07)

.A5 For the purposes of this section, the responsible party is management of the entity for which the practitioner is reporting on compliance.

Definitions

Internal Control Over Compliance

.A6 An entity's internal control over compliance is the process by which management obtains reasonable assurance of compliance with specified requirements. Although management's internal control may include a wide variety of objectives and related policies and procedures, only some of these may be relevant to an entity's compliance with specified requirements. An entity's internal control over compliance may vary based on the nature of the compliance requirements. For example, internal control over compliance with a capital requirement would generally include accounting procedures, whereas internal control over compliance with a requirement to practice nondiscriminatory hiring may not include accounting procedures.

Material Noncompliance

.A7 Government requirements or other requirements may define material noncompliance for the purpose of the engagement.

Preconditions for Examination Engagements (Ref: par. .09–.10)

.A8 Management is responsible for ensuring that the entity complies with the requirements applicable to its activities. That responsibility encompasses the following:

- a. Identifying and complying with the specified requirements
- b. Designing, implementing, and maintaining internal control to provide reasonable assurance that the entity complies with those requirements
- c. Specifying reports that satisfy legal, regulatory, or contractual requirements

[Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A9 In carrying out its responsibilities, management will ordinarily have documentation regarding its compliance such as accounting or statistical data, entity policy manuals, accounting manuals, narrative memoranda, procedural write-ups, flowcharts, completed questionnaires, or internal auditors' reports. The form and extent of documentation will vary depending on the nature of the compliance requirements and the size and complexity of the entity. [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A10 Management's written assertion about compliance with specified requirements may take many forms. Throughout this section, for example, the phrase "management's assertion that W Company complied with [*specify compliance requirement*] as of [*date*]," illustrates such an assertion. Other phrases may also be used. A statement that is so subjective (for example, *substantially complied*) that people having competence in and using the same or similar criteria would not ordinarily be able to arrive at similar conclusions is not an appropriate written assertion.

.A11 Paragraph .10 applies regardless of whether management is the engaging party. [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Materiality (Ref: par. .12)

.A12 The terms of an engagement may provide for a supplemental practitioner's report of all or certain noncompliance discovered. Such terms would not affect the practitioner's judgments about materiality in establishing the overall engagement strategy or in forming an opinion on an entity's compliance with specified requirements or on management's assertion about such compliance.

.A13 In an examination of an entity's compliance with specified requirements, the practitioner's consideration of materiality is affected by (a) the nature of the compliance requirements, which may or may not be quantifiable in monetary terms, (b) the nature and frequency of noncompliance identified with appropriate consideration of sampling risk, and (c) qualitative considerations, including the needs and expectations of the users of the practitioner's report.

Examination Procedures (Ref: par. .13 and .15)

.A14 In certain circumstances, the practitioner may determine that it is necessary to discuss the specified requirements with appropriate individuals outside the entity (for example, a regulator or specialist).

.A15 A practitioner generally obtains an understanding of the design of specific controls by performing the following:

- a. Inquiries of appropriate management, supervisory, and staff personnel
- b. Inspection of the entity's documents
- c. Observation of the entity's activities and operations

.A16 The nature and extent of procedures a practitioner performs vary from entity to entity and are influenced by factors such as the following:

- The newness and complexity of the specified requirements
- The practitioner's knowledge of internal control over compliance obtained in previous professional engagements
- The nature of the specified requirements
- An understanding of the industry in which the entity operates
- Judgments about materiality

Written Representations in an Examination Engagement (Ref: par. .17)

.A17 At the beginning of the engagement, the practitioner may want to consider discussing with management the need for management to provide the practitioner with a written representation letter at the conclusion of the engagement.

Content of the Practitioner's Examination Report (Ref: par. .20–.21)

.A18 The list of elements in paragraph .20 constitutes all the required elements for a practitioner's report on an examination of compliance with specified requirements, including the elements required by section 205.¹⁴ Application guidance regarding the elements of an examination report is included in section 205.¹⁵

.A19 Examples 1 and 2 in the exhibit to this section provide illustrations of practitioner's examination reports on compliance.

.A20 Paragraph .20*d* represents the criteria for measuring or evaluating compliance with the specified requirements.

.A21 Ordinarily, the criteria are included in the specified requirements. In that case, the identification may say, "We have examined management of XYZ Company's compliance with *[identify the specified requirements...]*."

.A22 In identifying the standards under which the engagement was performed, the practitioner may specify the AT-C section under which the engagement was performed, for example: AT-C section 315, *Compliance Attestation*, of the attestation standards established by the AICPA. [Paragraph added, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A23 If a compliance requirement is to "maintain \$25,000 in capital," it would not be necessary to identify the \$25,000 in the practitioner's report; however, if the requirement is subjectively worded, for example, to "maintain adequate capital," the criteria used to define *adequate* would be included in the report. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A24 When evaluating compliance with certain requirements requires interpretation of the laws, regulations, rules, contracts, or grants that establish those requirements, the practitioner evaluates whether the criteria are suitable for evaluating compliance. If these interpretations are significant, the practitioner may include a paragraph describing the interpretations and identifying the source of the interpretations made by the entity's management. The following is an example of such a paragraph:

We have been informed that, under *[name of entity]*'s interpretation of *[identify the compliance requirement]*, *[explain the source and nature of the relevant interpretation]*.

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Modified Opinions (Ref: par. .22)

Qualified Opinion

.A25 The following is an example of

¹⁴ Paragraph .63 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁵ Paragraphs .A85–.A111 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- a. a paragraph that would be added to the practitioner's report to describe the matter giving rise to the qualified opinion, and
- b. an opinion paragraph of a report containing the qualified opinion:

Our examination disclosed the following material noncompliance with *[type of compliance requirement]* applicable to *[name of entity]* during the *[period]* ended *[date]*. *[Describe noncompliance.]*

In our opinion, except for the material noncompliance described in the preceding paragraph, *[name of entity]* complied, in all material respects, with the aforementioned requirements for the *[period]* ended *[date]*.

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Adverse Opinion

.A26 The following is an example of

- a. a paragraph that would be added to the practitioner's report to describe the matter(s) giving rise to the adverse opinion, and
- b. an opinion paragraph of a report containing an adverse opinion:

Our examination disclosed the following material noncompliance with *[type of compliance requirement]* applicable to *[name of entity]* during the *[period]* ended *[date]*. *[Describe noncompliance.]*

In our opinion, because of the effect of the noncompliance described in the preceding paragraph, *[name of entity]* has not complied with the aforementioned requirements for the *[period]* ended *[date]*.

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A27 If the practitioner's report containing a qualified or adverse opinion on the entity's compliance with specified requirements is included in a document that also includes the practitioner's audit report on the entity's financial statements, the compliance report may indicate that the noncompliance was considered during the audit. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A28 The following is an example of an additional sentence that may be included in the opinion paragraph of a practitioner's examination report that describes material noncompliance:

We considered the effect of these conditions on our audit of the 20XX financial statements. This report on XYZ Company's compliance with *[identify the specified requirements]* does not affect our audit report dated *[date of report]* on those financial statements.

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A29 The practitioner also may include the preceding sentence when the two practitioner's reports are not included in the same document. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Preconditions for an Agreed-Upon Procedures Engagement (Ref: par. .23)

.A30 Management is responsible for ensuring that the entity complies with the requirements applicable to its activities. That responsibility encompasses the following:

- a. Identifying and complying with the specified requirements
- b. Designing, implementing, and maintaining internal control to provide reasonable assurance that the entity complies with those requirements
- c. Specifying reports that satisfy legal, regulatory, or contractual requirements

[Paragraph renumbered and revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.A31] [Paragraph renumbered and deleted, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Content of the Practitioner's Agreed-Upon Procedures Report (Ref: par. .26)

.A32 The list of elements in paragraph .26 of this section constitutes all the required elements for a practitioner's report on the application of agreed-upon procedures related to an entity's compliance with specified requirements, including the elements required by section 215.¹⁶ Application guidance regarding the elements of an agreed-upon procedures report is included in section 215.¹⁷ [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A33 In some agreed-upon procedures engagements, procedures may relate to both compliance with specified requirements and the entity's internal control over compliance. In these engagements, the practitioner may issue one practitioner's report that addresses both. For example, the first sentence of the introductory paragraph may state the following:

We have performed the procedures enumerated below, related to *[name of entity]*'s compliance with *[identify the specified requirements]* during the *[period]* ended *[date]* and *[name of entity]*'s internal control over compliance with the aforementioned compliance requirements as of *[date]*.

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A34 When performing agreed-upon procedures related to an entity's compliance with specified requirements, or an entity's internal control over compliance with certain requirements requires interpretation of the laws, regulations, rules, contracts, or grants that establish those requirements, the practitioner evaluates whether the criteria are suitable for performing such agreed-upon procedures and reporting findings. If these interpretations are significant, the practitioner may include a paragraph describing the interpretations made by

¹⁶ Paragraph .34 of section 215. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁷ Paragraphs .A49–.A64 of section 215. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

management and the source of the interpretations. An example of such a paragraph, which would precede the procedures and findings paragraph(s), follows:

We have been informed that, under *[name of entity]*'s interpretation of *[identify the compliance requirement]*, *[explain the nature and source of the relevant interpretation.]*

[Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A35 Example 3 in the exhibit to this section provides an illustration of a practitioner's agreed-upon procedures report related to compliance with specified requirements. Example 4 in the exhibit to this section provides an illustration of an agreed-upon procedures report related to internal control over compliance with specified requirements. [Paragraph renumbered, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.A36

Exhibit — Illustrative Practitioner's Examination and Agreed-Upon Procedures Reports Related to Compliance, and Agreed-Upon Procedures Report Related to Internal Control Over Compliance

The illustrative practitioner's examination reports in this exhibit (examples 1 and 2) meet the reporting requirements of section 205, *Assertion-Based Examination Engagements*,¹ and of paragraphs .20–.22 of this section. A practitioner may use alternative language in drafting an examination report, provided that the language meets the applicable requirements of section 205² and paragraphs .20–.22 of this section.

The illustrative practitioner's agreed-upon procedures reports in this exhibit (examples 3 and 4) meet the applicable reporting requirements of section 215, *Agreed-Upon Procedures Engagements*,³ and paragraph .26 of this section. A practitioner may use alternative language in drafting an agreed-upon procedures report, provided that the language meets the applicable requirements of section 215⁴ and paragraph .26 of this section.

Example 1: Practitioner's Examination Report on Compliance; Unmodified Opinion

The following is an illustrative practitioner's examination report for an engagement in which the practitioner is reporting on subject matter (an entity's compliance with specified requirements during a period of time).

Independent Accountant's Report

[Appropriate addressee]

We have examined XYZ Company's compliance with [identify the specified requirements, for example, the requirements listed in Attachment 1] during the period January 1, 20X1, to December 31, 20X1. Management of XYZ Company is responsible for XYZ Company's compliance with the specified requirements. Our responsibility is to express an opinion on XYZ Company's compliance with the specified requirements based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether XYZ Company complied, in all material respects, with the specified requirements referenced above. An examination involves performing procedures to obtain evidence about whether XYZ Company complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material noncompliance, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

¹ Paragraphs .62–.83 of section 205.

² See footnote 1.

³ Paragraphs .31–.38 of section 215.

⁴ See footnote 3.

Our examination does not provide a legal determination on XYZ Company's compliance with specified requirements.

In our opinion, XYZ Company complied, in all material respects, with *[identify the specified requirements, for example, the requirements listed in Attachment 1]* during the period January 1, 20X1 to December 31, 20X1.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

Example 2: Practitioner's Examination Report on an Assertion About Compliance; Unmodified Opinion

The following is an illustrative practitioner's examination report for an engagement in which the practitioner is reporting on the management's assertion about compliance with specified requirements and management's assertion accompanies the report.

Independent Accountant's Report

[Appropriate Addressee]

We have examined management of XYZ Company's assertion that XYZ Company complied with *[identify the specified requirements, for example, the requirements listed in Attachment 1]* during the period January 1, 20X1 to December 31, 20X1.⁵ XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on management's assertion about XYZ Company's compliance with the specified requirements based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion about compliance with the specified requirements is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent of XYZ Company and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on XYZ Company's compliance with the specified requirements.

In our opinion, management's assertion that XYZ Company complied with *[identify the specified requirements, for example, the requirements listed in Attachment 1]*, is fairly stated, in all material respects.

[Practitioner's signature]

[City and state where the practitioner's report is issued]

[Date of practitioner's report]

⁵ If management's assertion accompanies the practitioner's report, the practitioner would refer to management's assertion by using the same title as management used for its assertion. The report also would use the same description of the specified requirements that management used in its assertion. If management's assertion is stated in the report, rather than accompanying the report, the word *accompanying* would be omitted.

Example 3: Practitioner's Agreed-Upon Procedures Report Related to Compliance

The following is an illustrative practitioner's agreed-upon procedures report related to an entity's compliance with specified requirements in which the procedures and findings are described in the report, rather than referenced.

Independent Accountant's Report on Applying Agreed-Upon Procedures

[Appropriate Addressee]

We have performed the procedures enumerated below related to XYZ Company's compliance with *[identify the specified requirements, for example, the requirements listed in Attachment I]* during the period January 1, 20X1 to December 31, 20X1.⁶ XYZ Company's management is responsible for its compliance with those requirements.

XYZ Company's management has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of assisting users in determining whether the entity complied with the specified requirements. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and the associated findings are as follows:

[Include paragraphs to describe the procedures performed detailing the nature and extent, and if applicable, the timing, of each procedure and to describe the findings from each procedure performed, including sufficient details on exceptions found.]

We were engaged by XYZ Company's management to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on compliance with specified requirements. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of XYZ Company and to meet our other ethical responsibilities, in accordance with relevant ethical requirements related to our agreed-upon procedures engagement.

[Additional paragraphs may be added to describe other matters]

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

⁶ If the agreed-upon procedures have been published by a third-party (for example, a regulator in regulatory policies or a lender in a debt agreement), this sentence might begin as follows: "We have performed the procedures included in [title of publication or other document] and enumerated below..." [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Example 4: Practitioner's Agreed-Upon Procedures Report Related to Internal Control Over Compliance

The following is an illustrative practitioner's agreed-upon procedures report related to an entity's internal control over compliance in which the procedures and findings are described in the report rather than referenced.

Independent Accountant's Report on Applying Agreed-Upon Procedures

[Appropriate Addressee]

We have performed the procedures enumerated below related to XYZ Company's internal control over compliance with *[identify the specified requirements for example, the requirements listed in Attachment 1]*, as of December 31, 20X1.⁷ XYZ Company's management is responsible for its internal control over compliance with those requirements.

XYZ Company's management has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of assisting users in determining whether the entity complied with the specified requirements. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and the associated findings are as follows:

[Include paragraphs to describe the procedures performed detailing the nature and extent, and if applicable, the timing, of each procedure and to describe the findings from each procedure performed, including sufficient details on exceptions found.]

We were engaged by XYZ Company's management to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on internal control over compliance with specified requirements. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of XYZ Company and to meet our other ethical responsibilities, in accordance with relevant ethical requirements related to our agreed-upon procedures engagement.

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

[Paragraph renumbered and revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19. Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁷ If the agreed-upon procedures have been published by a third-party (for example, a regulator in regulatory policies or a lender in a debt agreement), this sentence might begin as follows: "We have performed the procedures included in [title of publication or other documents] and enumerated below..." [Revised, July 2021, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

AT-C Section 320

Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting

Source: SSAE No. 18.

Effective for service auditors' reports dated on or after May 1, 2017.

Introduction

.01 This section contains performance and reporting requirements and application guidance for a service auditor examining controls at organizations that provide services to user entities when those controls are likely to be relevant to user entities' internal control over financial reporting. It complements AU-C section 402, *Audit Considerations Relating to an Entity Using a Service Organization*, in that a service auditor's report prepared in accordance with this section may provide appropriate evidence under AU-C section 402. (Ref: par. .A1)

.02 In addition to complying with this section, a practitioner is required to comply with section 105, *Concepts Common to All Attestation Engagements*, and section 205, *Assertion-Based Examination Engagements*. In some cases, this section repeats or refers to requirements in sections 105 and 205 when describing those requirements in the context of examinations that address controls at a service organization likely to be relevant to user entities' internal control over financial reporting. Although not all the requirements in sections 105 and 205 are repeated or referred to in this section, the practitioner is responsible for complying with all the requirements in sections 105 and 205.^{1, 2} (Ref: par. .A2) [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.03 Section 205 indicates that when performing an attestation engagement, a practitioner should report on a written assertion or should report directly on the subject matter.³ For engagements conducted under this section, the service auditor reports directly on the subject matter.

¹ Section 206, *Direct Examination Engagements*, states that section 206 is not applicable to examination engagements related to subject matter for which other AT-C sections require the application of section 205, *Assertion-Based Examination Engagements*, which includes this section. [Footnote added, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

² Paragraph .13 of this section requires the service auditor to request a written assertion from management of the service organization. For that reason, when the term "examination" is used in this section, it refers to an "assertion-based examination" performed under section 205 and this section. [Footnote added, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

³ Paragraph .67 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.04 The focus of this section is on controls at service organizations likely to be relevant to user entities' internal control over financial reporting. The guidance herein also may be helpful to a practitioner performing an engagement under section 205 to report on controls at a service organization

- a. other than those that are likely to be relevant to user entities' internal control over financial reporting (for example, controls that affect user entities' compliance with specified requirements of laws, regulations, rules, contracts, or grants or controls that affect user entities' production or quality control). Section 315, *Compliance Attestation*, is applicable if a practitioner is performing agreed-upon procedures related to an entity's internal control over compliance with specified requirements. Section 205 is applicable if a practitioner is examining an entity's controls over compliance with specified requirements. (Ref: par. .A3–.A4)
- b. when management of the service organization does not provide an assertion about the suitability of the design of controls because it is not responsible for the design of the controls (for example, when the controls have been designed by the user entity or the design is stipulated in a contract between the user entity and the service organization). (Ref: par. .A5)

.05 In addition to performing an examination of a service organization's controls, a service auditor may be engaged to (a) examine and report on a user entity's transactions or balances maintained by a service organization, or (b) perform and report under section 215, *Agreed-Upon Procedures Engagements*, the results of agreed-upon procedures related to the controls of a service organization or to transactions or balances of a user entity maintained by a service organization. However, these engagements are not addressed in this section.

Effective Date

.06 This section is effective for service auditors' reports dated on or after May 1, 2017.

Objectives

.07 The objectives of the service auditor are to

- a. obtain reasonable assurance about whether, in all material respects, based on the criteria
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented throughout the specified period (or in the case of a type 1 report, as of a specified date)
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to provide reasonable assurance that the control objectives would be achieved if the controls operated effectively throughout the specified period (or in the case of a type 1 report, as of a specified date).
 - iii. when included in the scope of the engagement, the controls operated effectively to provide reasonable assurance that the control objectives stated in management's

description of the service organization's system were achieved throughout the specified period.

- b. express an opinion in a written report about the matters in paragraph .07a.

Definitions

.08 For the purposes of this section, the following definitions apply:

Carve-out method. Method of addressing the services provided by a subservice organization, whereby management's description of the service organization's system identifies the nature of the services performed by the subservice organization and excludes from the description and from the scope of the service auditor's engagement the subservice organization's relevant control objectives and related controls.

Complementary subservice organization controls. Controls that management of the service organization assumes, in the design of the service organization's system, will be implemented by the subservice organizations and are necessary to achieve the control objectives stated in management's description of the service organization's system.

Complementary user entity controls. Controls that management of the service organization assumes, in the design of the service organization's system, will be implemented by user entities and are necessary to achieve the control objectives stated in management's description of the service organization's system. (Ref: par. .A6)

Control objectives. The aim or purpose of specified controls at the service organization. Control objectives address the risks that controls are intended to mitigate.

Controls at a service organization. The policies and procedures at a service organization likely to be relevant to user entities' internal control over financial reporting. These policies and procedures are designed, implemented, and documented by the service organization to provide reasonable assurance about the achievement of the control objectives relevant to the services covered by the service auditor's report. (Ref: par. .A7)

Inclusive method. Method of addressing the services provided by a subservice organization whereby management's description of the service organization's system includes a description of the nature of the services provided by the subservice organization as well as the subservice organization's relevant control objectives and related controls.

Management's description of a service organization's system and a service auditor's report on that description and on the suitability of the design of controls (referred to in this section as a *type 1 report*). A service auditor's report that comprises the following:

- a. Management's description of the service organization's system
- b. A written assertion by management of the service organization about whether, based on the criteria

- i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented as of a specified date
- ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to achieve those control objectives as of the specified date
- c. A report that expresses an opinion on the matters in b(i)–(ii)

Management's description of a service organization's system and a service auditor's report on that description and on the suitability of the design and operating effectiveness of controls (referred to in this section as a *type 2 report*). A service auditor's report that comprises the following:

- a. Management's description of the service organization's system
- b. A written assertion by management of the service organization about whether, based on the criteria
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented throughout the specified period
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed throughout the specified period to achieve those control objectives
 - iii. the controls related to the control objectives stated in management's description of the service organization's system operated effectively throughout the specified period to achieve those control objectives
- c. A report that
 - i. expresses an opinion on the matters in b(i)–(iii)
 - ii. includes a description of the tests of controls and the results thereof

Service auditor. A practitioner who reports on controls at a service organization.

Service organization. An organization or segment of an organization that provides services to user entities, which are likely to be relevant to those user entities' internal control over financial reporting.

Service organization's assertion. A written assertion about the matters referred to in part (b) of the definition of **management's description of a service organization's system and a service auditor's report on that description and on the suitability of the design and operating effectiveness of controls**, for a type 2 report, and, for a type 1 report, the matters referred to in part (b) of the definition of **management's description of a service organization's system and a service**

auditor's report on that description and on the suitability of the design of controls.

Service organization's system. The policies and procedures designed, implemented, and documented by management of the service organization to provide user entities with the services covered by the service auditor's report. Management's description of the service organization's system identifies the services covered, the period to which the description relates (or in the case of a type 1 report, the date to which the description relates), the control objectives specified by management or an outside party, the party specifying the control objectives (if not specified by management), and the related controls. (Ref: par. .A8)

Subservice organization. A service organization used by another service organization to perform some of the services provided to user entities that are likely to be relevant to those user entities' internal control over financial reporting. (Ref: par. .A9)

Test of controls. A procedure designed to evaluate the operating effectiveness of controls in achieving the control objectives stated in management's description of the service organization's system.

Type 1 report. See **management's description of a service organization's system and a service auditor's report on that description and on the suitability of the design of controls.**

Type 2 report. See **management's description of a service organization's system and a service auditor's report on that description and on the suitability of the design and operating effectiveness of controls.**

User auditor. An auditor who audits and reports on the financial statements of a user entity.

User entity. An entity that uses a service organization for which controls at the service organization are likely to be relevant to that entity's internal control over financial reporting.

Requirements

Management and Those Charged With Governance

.09 When this section requires the service auditor to inquire of, request representations from, communicate with, or otherwise interact with management of the service organization, the service auditor should determine the appropriate person(s) within the service organization's management or governance structure with whom to interact. This should include consideration of which person(s) has the appropriate responsibilities for and knowledge of the matters concerned. (Ref: par. .A10–.A11)

Preconditions

.10 A service auditor should accept or continue an engagement to report on controls at a service organization pursuant to this section only if the preconditions for an attestation engagement identified in section 105 and the following conditions are met:⁴ (Ref: par. .A12–.A13)

⁴ Paragraphs .26–.30 of section 105, *Concepts Common to All Attestation Engagements*. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- a. The service auditor's preliminary knowledge of the engagement circumstances indicates that the scope of the engagement and management's description of the service organization's system will not be so limited that they are unlikely to be useful to user entities and their auditors.
- b. Management acknowledges and accepts its responsibility for the following:
 - i. Preparing its description of the service organization's system and its assertion, including the completeness, accuracy, and method of presentation of the description and assertion (Ref: par. .A14)
 - ii. Having a reasonable basis for its assertion (Ref: par. .A15)
 - iii. Selecting the criteria to be used and stating them in the assertion
 - iv. Specifying the control objectives, stating them in the description of the service organization's system, and, if the control objectives are specified by law, regulation, or another party (for example, a user group or a professional body), identifying in the description the party specifying the control objectives (Ref: par. .A16)
 - v. Identifying the risks that threaten the achievement of the control objectives stated in the description and designing, implementing, and documenting controls that are suitably designed and operating effectively to provide reasonable assurance that the control objectives stated in the description of the service organization's system will be achieved (Ref: par. .A17)
 - vi. Providing a written assertion that accompanies management's description of the service organization's system, both of which will be provided to user entities (Ref: par. .A18)

.11 When the inclusive method is used, the service auditor should apply the requirements in sections 105, 205, and this section to the services provided by the subservice organization, as applicable, including the requirement to obtain management of the service organization's acknowledgement and acceptance of responsibility for the matters in paragraph .10b of this section as they relate to the subservice organization. (Ref: par. .A19–.A20)

Request to Change the Scope of the Engagement

.12 As required by section 105, if management requests a change in the scope of the engagement before the completion of the engagement, the service auditor should not agree to a change in the terms of the engagement when no reasonable justification for doing so exists.⁵ (Ref: par. .A21–.A22 and .A57)

Requesting a Written Assertion

.13 The practitioner should request from management of the service organization a written assertion. If management refuses to provide a written assertion, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation. (Ref: par. .A23)

⁵ Paragraph .31 of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Assessing the Suitability of the Criteria

.14 As required by section 105, the service auditor should assess whether management has used suitable criteria in⁶ (Ref: par. .A25–.A26)

- a. preparing its description of the service organization's system,
- b. evaluating whether controls were suitably designed to achieve the control objectives stated in the description, and
- c. evaluating whether controls operated effectively throughout the specified period to achieve the control objectives stated in the description of the service organization's system, in the case of a type 2 report.

.15 In assessing the suitability of the criteria to evaluate whether management's description of the service organization's system is fairly presented, the service auditor should determine if the criteria include, at a minimum

- a. whether management's description of the service organization's system presents how the service organization's system was designed and implemented, including the following information about the service organization's system, if applicable:
 - i. The types of services provided, including, as appropriate, the classes of transactions processed.
 - ii. The procedures, within both automated and manual systems, by which services are provided, including, as appropriate, procedures by which transactions are initiated, authorized, recorded, processed, corrected as necessary, and transferred to the reports and other information prepared for user entities.
 - iii. The information used in the performance of the procedures, including, if applicable, related accounting records, whether electronic or manual, and supporting information involved in initiating, authorizing, recording, processing, and reporting transactions. This includes the correction of incorrect information and how information is transferred to the reports and other information prepared for user entities.
 - iv. How the service organization's system captures and addresses significant events and conditions other than transactions.
 - v. The process used to prepare reports and other information for user entities.
 - vi. Services performed by a subservice organization, if any, including whether the carve-out method or the inclusive method has been used in relation to them. (Ref: par. .A37)
 - vii. The specified control objectives and controls designed to achieve those objectives, including, as applicable, complementary user entity controls and complementary subservice organization controls assumed in the design of the service organization's controls.

⁶ Paragraph .27b(ii) of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- viii. Other aspects of the service organization's control environment, risk assessment process, information and communications (including the related business processes), control activities, and monitoring activities that are relevant to the services provided. (Ref: par. .A15 and .A27)
- b. in the case of a type 2 report, whether management's description of the service organization's system includes relevant details of changes to the service organization's system during the period covered by the description. (Ref: par. .A50)
- c. whether management's description of the service organization's system does not omit or distort information relevant to the service organization's system, while acknowledging that management's description of the service organization's system is prepared to meet the common needs of a broad range of user entities and their user auditors, and may not, therefore, include every aspect of the service organization's system that each individual user entity and its user auditor may consider important in its own particular environment.

.16 In assessing the suitability of the criteria to evaluate whether the controls are suitably designed, the service auditor should determine if the criteria include, at a minimum, whether

- a. the risks that threaten the achievement of the control objectives stated in management's description of the service organization's system have been identified by management.
- b. the controls identified in management's description of the service organization's system would, if operating effectively, provide reasonable assurance that those risks would not prevent the control objectives stated in the description from being achieved.

.17 In assessing the suitability of the criteria to evaluate whether controls operated effectively to provide reasonable assurance that the control objectives stated in management's description of the service organization's system were achieved, the service auditor should determine if the criteria include, at a minimum, whether the controls were consistently applied as designed throughout the specified period, including whether manual controls were applied by individuals who have the appropriate competence and authority.

.18 Section 205 requires a practitioner to request from the responsible party a written assertion about the measurement or evaluation of the underlying subject matter against the criteria.⁷ The practitioner should determine that management's assertion addresses all the criteria management used to evaluate the fairness of the presentation of the description, the suitability of the design of the controls, and in a type 2 engagement, the operating effectiveness of the controls. (Ref: par. .A24) [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Materiality

.19 The service auditor's consideration of materiality should include the fair presentation of management's description of the service organization's system, the suitability of the design of controls to achieve the related control objectives stated in the description and, in the case of a type 2 report, the operating

⁷ Paragraph .10 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

effectiveness of the controls to achieve the related control objectives stated in the description. (Ref: par. .A28–.A30)

Obtaining an Understanding of the Service Organization's System and Assessing the Risk of Material Misstatement

.20 The service auditor should obtain an understanding of the service organization's system, including controls that are included in the scope of the engagement. That understanding should include service organization processes used to (Ref: par. .A31–.A33)

- a.* prepare the description of the service organization's system, including the determination of control objectives,
- b.* identify controls designed to achieve the control objectives,
- c.* assess the suitability of the design of the controls, and
- d.* in a type 2 report, assess the operating effectiveness of controls.

.21 If the service organization has an internal audit function, part of the service auditor's understanding of the service organization's system should include the following:

- a.* The nature of the internal audit function's responsibilities and how the internal audit function fits in the service organization's organizational structure
- b.* The activities performed, or to be performed, by the internal audit function as it relates to the service organization

.22 As required by section 205, the service auditor should identify and assess the risks of material misstatement.⁸ (Ref: par. .A34–.A35) [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.23 The service auditor should read the reports of the internal audit function and regulatory examinations that relate to the services provided to user entities and the scope of the engagement, if any, to obtain an understanding of the nature and extent of the procedures performed and the related findings. The findings should be taken into consideration as part of the risk assessment and in determining the nature, timing, and extent of the tests.

Responding to Assessed Risks and Further Procedures

.24 As required by paragraphs .25–.39 of this section and section 205, the service auditor should⁹

- a.* design and implement overall responses to address the assessed risks of material misstatement for the subject matter and
- b.* design and perform further procedures whose nature, timing, and extent are based on, and responsive to, the assessed risks of material misstatement.

⁸ Paragraph .19 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

⁹ Paragraphs .21–.22 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Obtaining Evidence Regarding Management's Description of the Service Organization's System

.25 The service auditor should obtain and read management's description of the service organization's system and should evaluate whether those aspects of the description that are included in the scope of the engagement are presented fairly, in all material respects, based on the criteria in management's assertion, including whether (Ref: par. .A28–.A29 and .A36–.A40)

- a. the control objectives stated in management's description of the service organization's system are reasonable in the circumstances;
- b. controls identified in management's description of the service organization's system were implemented;
- c. complementary user entity controls and complementary subservice organization controls, if any, are adequately described; and
- d. services performed by a subservice organization, if any, are adequately described, including whether the carve-out method or the inclusive method has been used in relation to them.

.26 The service auditor should determine through inquiries made in combination with other procedures whether the service organization's system has been implemented. (Ref: par. .A40)

Obtaining Evidence Regarding the Design of Controls

.27 The service auditor should assess whether the controls that management identified in its description of the service organization's system as the controls that achieve the control objectives were suitably designed to achieve those control objectives by (Ref: par. .A28–.A29, .A36, and .A41–.A45)

- a. obtaining an understanding of management's process for identifying and evaluating the risks that threaten the achievement of the control objectives and assessing the completeness and accuracy of management's identification of those risks,
- b. evaluating the linkage of the controls identified in management's description of the service organization's system with those risks, including risks arising from each of the described classes of transactions and risks that IT poses to the user entity's internal control over financial reporting, and
- c. determining that the controls have been implemented.

Obtaining Evidence Regarding the Operating Effectiveness of Controls

.28 When performing a type 2 engagement, the service auditor should test those controls that management has identified in its description of the service organization's system as the controls that achieve the control objectives and should assess the operating effectiveness of those controls throughout the period. Evidence obtained in prior engagements about the satisfactory operation of controls in prior periods does not provide a basis for a reduction in testing, even if it is supplemented with evidence obtained during the current period. (Ref: par. .A28–.A30, .A36, and .A46–.A51)

.29 When performing a type 2 engagement, the service auditor should obtain an understanding of changes in the service organization's system that were

implemented during the period covered by the service auditor's report. If the service auditor believes the changes would be considered significant by user entities and their auditors, the service auditor should determine whether those changes are included in management's description of the service organization's system. If such changes are not included in the description, the service auditor should describe the changes in the report and determine the effect on the report. If superseded controls are relevant to the achievement of the control objectives stated in the description, the service auditor should, if possible, test the superseded controls before the change. If the service auditor cannot test superseded controls relevant to the achievement of the control objectives stated in the description, the service auditor should determine the effect on the report. (Ref: par. .A50–.A51)

Evaluating the Reliability of Information Produced by the Service Organization

.30 When using information produced by the service organization, section 205 requires the service auditor to evaluate whether such information is sufficiently reliable for the service auditor's purposes by obtaining evidence about its accuracy and completeness and evaluating whether the information is sufficiently precise and detailed.¹⁰ (Ref: par. .A52)

.31 When designing and performing tests of controls, the service auditor should

- a. perform other procedures such as inspection, observation, or reperformance in combination with inquiry to obtain evidence about the following:
 - i. How the control was applied
 - ii. The consistency with which the control was applied
 - iii. By whom or by what means the control was applied
- b. determine whether the controls to be tested depend on other controls, and if so, whether it is necessary to obtain evidence supporting the operating effectiveness of those other controls.
- c. determine an effective method for selecting the items to be tested to meet the objectives of the procedure.

Nature and Cause of Deviations

.32 The service auditor should investigate the nature and cause of any deviations identified and should determine whether

- a. identified deviations are within the expected rate of deviation and are acceptable. If so, the testing that has been performed provides an appropriate basis for concluding that the control operated effectively throughout the specified period.
- b. additional testing of the control or other controls is necessary to reach a conclusion about whether the controls related to the control objectives stated in management's description of the service organization's system operated effectively throughout the specified period.
- c. the testing that has been performed provides an appropriate basis for concluding that the control did not operate effectively throughout the specified period.

¹⁰ Paragraph .36 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.33 If, as a result of performing the procedures in paragraph .32, the service auditor becomes aware that any identified deviations have resulted from fraud by service organization personnel, the service auditor should assess the risk that management's description of the service organization's system is not fairly presented, the controls are not suitably designed and, in a type 2 engagement, the controls are not operating effectively. (Ref: par. .A36)

.34 If the service auditor becomes aware of incidents of noncompliance with laws or regulations, fraud or uncorrected misstatements attributable to management or other service organization personnel that are not clearly trivial and that may affect one or more user entities, the service auditor should determine the effect of such incidents on management's assertion, management's description of the service organization's system, the achievement of the control objectives, and the service auditor's report.

Subsequent Events

.35 In performing subsequent events procedures as required by section 205, if the service auditor becomes aware of an event that is of such a nature and significance that its disclosure is necessary to prevent users of a type 1 or type 2 report from being misled, and information about that event is not disclosed by management in its description, the service auditor should disclose such event in the service auditor's report.¹¹

Written Representations

.36 In addition to the written representations from management required by section 205, the service auditor should request written representations indicating that it has disclosed to the service auditor any of the following of which it is aware:¹² (Ref: par. .A53–.A56)

- a. Instances of noncompliance with laws and regulations or uncorrected misstatements attributable to the service organization that may affect one or more user entities
- b. Knowledge of any actual, suspected, or alleged fraud by management or the service organization's employees that could adversely affect the fairness of the presentation of management's description of the service organization's system or the completeness or achievement of the control objectives stated in the description

.37 If a service organization uses a subservice organization and management's description of the service organization's system uses the inclusive method, the service auditor should also obtain the written representations identified in section 205 and paragraph .36 of this section from management of the subservice organization.¹³ (Ref: par. .A53–.A56)

.38 In a type 1 or type 2 engagement, the practitioner should request from the responsible party (in this case, management of the service organization), the written representations required by section 205 and paragraph .36 of this section, even if the engaging party is not the responsible party. The alternative to obtaining the required written representations provided for in section 205 is

¹¹ Paragraph .49 and .A60 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹² Paragraph .51 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹³ See footnote 12. [Footnote revised and renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

not permitted in a type 1 or type 2 engagement.¹⁴ The refusal by management of the service organization (or by management of a subservice organization that is being presented using the inclusive method) to furnish the written representations required by section 205 and paragraph .36 of this section constitutes a limitation on the scope of the engagement. Such refusal is often sufficient to preclude an unmodified opinion and particularly with respect to the representations in paragraph .53 of section 205, may cause the service auditor to disclaim an opinion or withdraw from the examination engagement when withdrawal is possible under applicable law or regulation.^[15] However, based on the nature of the representations not obtained or the circumstances of the refusal, the service auditor may conclude that a qualified opinion is appropriate. (Ref: par. .A53–.A57) [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Other Information

.39 Section 205 contains requirements for situations in which prior to or after the release of the practitioner's report on subject matter or an assertion, the practitioner is willing to permit the inclusion of the report in a document that contains the subject matter or assertion on which the service auditor reported and other information.¹⁶ (Ref: par. .A58)

Content of the Service Auditor's Report

.40 A service auditor's type 2 report should include the following: (Ref: par. .A59–.A60)

- a. A title that includes the word *independent*.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. Identification of the following:
 - i. Management's description of the service organization's system, the function performed by the system, and the period to which the description relates
 - ii. The criteria identified in management's assertion against which the fairness of the presentation of the description and the suitability of the design and operating effectiveness of the controls to achieve the related control objectives stated in the description were evaluated
 - iii. Any information included in a document containing the report that is not covered by the report (Ref: par. .A58)
 - iv. Any services performed by a subservice organization and whether the carve-out method or the inclusive method was used in relation to them. Depending on which method is used, the following should be included:
 - (1) If the carve-out method was used, a statement indicating that (Ref: par. .A61)

¹⁴ Paragraph .52 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

^[15] [Footnote renumbered and deleted, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

¹⁶ Paragraph .58 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- (a) management's description of the service organization's system excludes the control objectives and related controls of the relevant subservice organizations
 - (b) certain control objectives specified by the service organization can be achieved only if complementary subservice organization controls assumed in the design of the service organization's controls are suitably designed and operating effectively
 - (c) the service auditor's procedures do not extend to such complementary subservice organization controls
- (2) If the inclusive method was used, a statement that management's description of the service organization's system includes the subservice organization's specified control objectives and related controls, and that the service auditor's procedures included procedures related to the subservice organization
- d. A statement that the controls and control objectives included in the description are those that management believes are likely to be relevant to user entities' internal control over financial reporting, and the description does not include those aspects of the system that are not likely to be relevant to user entities' internal control over financial reporting.
- e. If management's description of the service organization's system refers to the need for complementary user entity controls, a statement that the service auditor has not evaluated the suitability of the design or operating effectiveness of complementary user entity controls, and that the control objectives stated in the description can be achieved only if complementary user entity controls are suitably designed and operating effectively, along with the controls at the service organization.
- f. A reference to management's assertion and a statement that management is responsible for
 - i. preparing the description of the service organization's system and the assertion, including the completeness, accuracy, and method of presentation of the description and assertion.
 - ii. providing the services covered by the description of the service organization's system.
 - iii. specifying the control objectives and stating them in the description of the service organization's system.
 - iv. identifying the risks that threaten the achievement of the control objectives.
 - v. selecting the criteria.
 - vi. designing, implementing, and documenting controls that are suitably designed and operating effectively to achieve the related control objectives stated in the description of the service organization's system.

- g.* A statement that the service auditor is responsible for expressing an opinion on the fairness of the presentation of management's description of the service organization's system and on the suitability of the design and operating effectiveness of the controls to achieve the related control objectives stated in the description based on the service auditor's examination.
- h.* A statement that
 - i. the examination was conducted in accordance with attestation standards established by the AICPA.
 - ii. those standards require that the service auditor plan and perform the examination to obtain reasonable assurance about whether, in all material respects, based on the criteria in management's assertion, management's description of the service organization's system is fairly presented and the controls are suitably designed and operating effectively throughout the specified period to achieve the related control objectives.
 - iii. the service auditor believes the evidence obtained is sufficient and appropriate to provide a reasonable basis for the service auditor's opinion.
- i.* A statement that an examination of management's description of a service organization's system and the suitability of the design and operating effectiveness of the service organization's controls to achieve the related control objectives stated in the description involves
 - i. performing procedures to obtain evidence about the fairness of the presentation of the description and the suitability of the design and operating effectiveness of the controls to achieve the related control objectives stated in the description based on the criteria in management's assertion.
 - ii. assessing the risks that management's description of the service organization's system is not fairly presented and that the controls were not suitably designed or operating effectively to achieve the related control objectives.
 - iii. testing the operating effectiveness of those controls that management considers necessary to provide reasonable assurance that the related control objectives stated in management's description of the service organization's system were achieved.
 - iv. evaluating the overall presentation of management's description of the service organization's system, suitability of the control objectives stated in the description, and suitability of the criteria specified by the service organization in its assertion.
- j.* A statement that the service auditor is required to be independent and to meet the service auditor's other ethical responsibilities in accordance with relevant ethical requirements related to the examination engagement
- k.* A description of the inherent limitations of controls, including that projecting to the future any evaluation of the fairness of the presentation of management's description of the service organization's system or conclusions about the suitability of the design or operating effectiveness of the controls to achieve the related

control objectives is subject to the risk that controls at a service organization may become ineffective.

- l.* A reference to a description of the service auditor's tests of controls and the results thereof that includes (Ref: par. .A62)
 - i. an identification of the controls that were tested.
 - ii. whether the items tested represent all or a selection of the items in the population.
 - iii. the nature of the tests in sufficient detail to enable user auditors to determine the effect of such tests on their risk assessments.
 - iv. any identified deviations in the operation of controls included in the description, the extent of testing performed by the service auditor that led to the identification of the deviations (including the number of items tested), and the number and nature of the deviations noted (even if, on the basis of tests performed, the service auditor concludes that the related control objective was achieved). (Ref: par. .A63)
 - v. if the work of the internal audit function has been used in tests of controls to obtain evidence, a description of the internal auditor's work and of the service auditor's procedures with respect to that work. (Ref: par. .A64–.A66)
- m.* The service auditor's opinion on whether, in all material respects, based on the criteria described in management's assertion
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented throughout the specified period.
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to provide reasonable assurance that the control objectives would be achieved if the controls operated effectively throughout the specified period.
 - iii. the controls operated effectively to provide reasonable assurance that the control objectives stated in management's description of the service organization's system were achieved throughout the specified period.
 - iv. if the application of complementary user entity controls is necessary to achieve the related control objectives stated in management's description of the service organization's system, a statement to that effect.
 - v. if the application of complementary subservice organization controls is necessary to achieve the related control objectives stated in management's description of the service organization's system, a statement to that effect.
- n.* An alert, in a separate paragraph, that restricts the use of the report. The alert should (Ref: par. .A67–.A72)
 - i. state that the report, including the description of tests of controls and results thereof, is intended solely for the information and use of management of the service organization, user entities of the service organization's system during some or all of the period covered by the report, and the auditors who audit and report on such user entities'

financial statements or internal control over financial reporting.

- ii. state that the report is not intended to be, and should not be, used by anyone other than the specified parties.¹⁷
- o. The manual or printed signature of the service auditor's firm.
- p. The city and state where the service auditor's report is issued.
- q. The date of the report. (The report should be dated no earlier than the date on which the service auditor has obtained sufficient appropriate evidence on which to base the service auditor's opinion, including evidence that
 - i. management's description of the service organization system has been prepared,
 - ii. management has provided a written assertion, and
 - iii. the attestation documentation has been reviewed.)

[Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.41 A service auditor's type 1 report should include the following: (Ref: par. .A59 and .A72)

- a. A title that includes the word *independent*.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. Identification of the following:
 - i. Management's description of the service organization's system, the function performed by the system, and the specified date to which the description relates.
 - ii. The criteria identified in management's assertion against which the fairness of the presentation of the description and the suitability of the design of the controls to achieve the related control objectives stated in the description were evaluated.
 - iii. Any information included in a document containing the report that is not covered by the report. (Ref: par. .A58)
 - iv. Any services performed by a subservice organization and whether the carve-out method or the inclusive method was used in relation to them. Depending on which method is used, the following should be included:
 - (1) If the carve-out method was used, a statement indicating that (Ref: par. .A61)
 - (a) management's description of the service organization's system excludes the control objectives and related controls of the relevant subservice organizations.
 - (b) certain control objectives specified by the service organization can be achieved only if complementary subservice organization controls assumed in the design of the service organization's controls are

¹⁷ Paragraph .65 or .66 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- suitably designed and operating effectively.
 - (c) the service auditor's procedures do not extend to such complementary subservice organization controls.
- (2) If the inclusive method was used, a statement that management's description of the service organization's system includes the subservice organization's specified control objectives and related controls, and that the service auditor's procedures included procedures related to the subservice organization.
- d. A statement that the controls and control objectives included in the description are those that management believes are likely to be relevant to user entities' internal control over financial reporting, and the description does not include those aspects of the system that are not likely to be relevant to user entities' internal control over financial reporting.
- e. If management's description of the service organization's system refers to the need for complementary user entity controls, a statement that the service auditor has not evaluated the suitability of the design or operating effectiveness of complementary user entity controls, and that the control objectives stated in the description can be achieved only if complementary user entity controls are suitably designed and operating effectively, along with the controls at the service organization.
- f. A reference to management's assertion and a statement that management is responsible for
 - i. preparing the description of the service organization's system and the assertion, including the completeness, accuracy, and method of presentation of the description and assertion.
 - ii. providing the services covered by the description of the service organization's system.
 - iii. specifying the control objectives and stating them in the description of the service organization's system.
 - iv. identifying the risks that threaten the achievement of the control objectives.
 - v. selecting the criteria.
 - vi. designing, implementing, and documenting controls that are suitably designed and operating effectively to achieve the related control objectives stated in the description of the service organization's system.
- g. A statement that the service auditor is responsible for expressing an opinion on the fairness of the presentation of management's description of the service organization's system and on the suitability of the design of the controls to achieve the related control objectives stated in the description, based on the service auditor's examination.
- h. A statement that
 - i. the examination was conducted in accordance with attestation standards established by the AICPA.

- ii. those standards require that the service auditor plan and perform the examination to obtain reasonable assurance about whether, in all material respects, based on the criteria in management's assertion, management's description of the service organization's system is fairly presented, and the controls are suitably designed as of the specified date to achieve the related control objectives.
 - iii. the service auditor believes the evidence obtained is sufficient and appropriate to provide a reasonable basis for the service auditor's opinion.
- i. A statement that an examination of management's description of a service organization's system and the suitability of the design of the service organization's controls to achieve the related control objectives stated in the description involves
 - i. performing procedures to obtain evidence about the fairness of the presentation of the description and the suitability of the design of the controls to achieve the related control objectives stated in the description, based on the criteria in management's assertion.
 - ii. assessing the risks that management's description of the service organization's system is not fairly presented and that the controls were not suitably designed to achieve the related control objectives.
 - iii. evaluating the overall presentation of management's description of the service organization's system, suitability of the control objectives stated in the description, and suitability of the criteria specified by the service organization in its assertion.
- j. A statement that the service auditor is required to be independent and to meet the service auditor's other ethical responsibilities in accordance with relevant ethical requirements related to the examination engagement.
- k. A description of the inherent limitations of controls, including that projecting to the future any evaluation of the fairness of the presentation of management's description of the service organization's system or conclusions about the suitability of the design of the controls to achieve the related control objectives is subject to the risk that controls at a service organization may become ineffective.
- l. A statement the service auditor has not performed any procedures regarding the operating effectiveness of controls and, therefore, expresses no opinion thereon.
- m. The service auditor's opinion on whether, in all material respects, based on the criteria described in management's assertion
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented as of the specified date.
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to provide reasonable assurance that the control objectives would be achieved if the controls operated effectively as of the specified date.

- iii. if the application of complementary user entity controls is necessary to achieve the related control objectives stated in management's description of the service organization's system, a statement to that effect.
 - iv. if the application of complementary subservice organization controls is necessary to achieve the related control objectives stated in management's description of the service organization's system, a statement to that effect.
 - n. An alert, in a separate paragraph, that restricts the use of the report. The alert should (Ref: par. .A67–.A72)
 - i. state that the report is intended solely for the information and use of management of the service organization, user entities of the service organization's system as of the specified date, and the auditors who audit and report on such user entities' financial statements or internal control over financial reporting.
 - ii. state that the report is not intended to be, and should not be, used by anyone other than the specified parties.¹⁸
 - o. The manual or printed signature of the service auditor's firm.
 - p. The city and state where the service auditor's report is issued.
 - q. The date of the report. (The report should be dated no earlier than the date on which the service auditor has obtained sufficient appropriate evidence on which to base the service auditor's opinion, including evidence that
 - i. management's description of the service organization system has been prepared,
 - ii. management has provided a written assertion, and
 - iii. the attestation documentation has been reviewed.)

[Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Modified Opinions

.42 The service auditor's opinion should be modified, and the service auditor's report should contain a clear description of all the reasons for the modification, if the service auditor concludes that, based on the criteria in management's assertion (Ref. par. .A73)

- a. management's description of the service organization's system is not fairly presented, in all material respects;
- b. the controls are not suitably designed to provide reasonable assurance that the control objectives stated in management's description of the service organization's system would be achieved if the controls operated effectively, in all material respects;
- c. in the case of a type 2 report, the controls did not operate effectively throughout the specified period to achieve the related control objectives stated in management's description of the service organization's system, in all material respects; or

¹⁸ Paragraph .65 or .66 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- d. the service auditor is unable to obtain sufficient appropriate evidence.

.43 If the service auditor plans to disclaim an opinion because of the inability to obtain sufficient appropriate evidence, and, based on the limited procedures performed, has concluded that, in all material respects, based on the criteria in management's assertion

- a. certain aspects of management's description of the service organization's system are not fairly presented,
- b. certain controls were not suitably designed to provide reasonable assurance that the control objectives stated in management's description of the service organization's system would be achieved if the controls operated effectively, or
- c. in the case of a type 2 report, certain controls did not operate effectively throughout the specified period to achieve the related control objectives stated in management's description of the service organization's system, then

the service auditor should identify these findings in the service auditor's report.

.44 If the service auditor plans to disclaim an opinion, the service auditor *should not* identify the procedures that were performed nor include statements describing the characteristics of a service auditor's engagement in the service auditor's report—to do so might overshadow the disclaimer.

Other Communication Responsibilities

.45 In addition to the communication responsibilities in section 205, if the service auditor becomes aware of the matters identified in paragraph .34, the service auditor should determine whether this information has been communicated appropriately to affected user entities.¹⁹ If the information has not been so communicated, and management of the service organization refuses to do so, the service auditor should take appropriate action. (Ref: par. .A74)

Application and Other Explanatory Material

Introduction (Ref: par. .01–.02 and .04)

.A1 Controls related to a service organization's operations and compliance objectives may be relevant to a user entity's internal control over financial reporting. Such controls may pertain to assertions about presentation and disclosure relating to account balances, classes of transactions or disclosures, or may pertain to evidence that the user auditor evaluates or uses in applying auditing procedures. For example, a payroll processing service organization's controls related to the timely remittance of payroll deductions to government authorities may be relevant to a user entity because late remittances could incur interest and penalties that would result in a liability to the user entity. Similarly, a service organization's controls over the acceptability of investment transactions from a regulatory perspective may be considered relevant to a user entity's presentation and disclosure of transactions and account balances in its financial statements.

¹⁹ Paragraphs .85–.86 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.A2 Section 105 requires the practitioner to consider applicable interpretive publications when planning and performing an attestation engagement.²⁰ Additional interpretive guidance for a practitioner examining controls at a service organization relevant to user entities' internal control over financial reporting is provided in the AICPA Guide *Service Organizations: Reporting on Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*.

.A3 Paragraph .04 of this section refers to other engagements the practitioner may perform and report on under section 205 when reporting on controls at a service organization. Paragraph .04 is not, however, intended to

- alter the definitions of a *service organization* and *service organization's system* in paragraph .08 to permit reports issued under this section to include in the description of the service organization's system aspects of their services (including relevant control objectives and related controls) not likely to be relevant to user entities' internal control over financial reporting, or
- permit a practitioner's report to be issued that combines reporting under this section on a service organization's controls that are likely to be relevant to user entities' internal control over financial reporting, with reporting under section 205 on controls that are not likely to be relevant to user entities' internal control over financial reporting.

.A4 When a service auditor conducts an engagement under section 205 to report on controls at a service organization other than those controls likely to be relevant to user entities' internal control over financial reporting, and the service auditor intends to use the guidance in this section in planning and performing that engagement, the service auditor may encounter matters that differ significantly from those associated with engagements to report on a service organization's controls likely to be relevant to user entities' internal control over financial reporting. The following are examples of such matters:

- Identification of suitable and available criteria, as prescribed in section 105, for evaluating the fairness of presentation of management's description of the service organization's system and the suitability of the design and the operating effectiveness of the controls²¹
- Identification of appropriate control objectives, and the basis for evaluating the reasonableness of the control objectives in the circumstances of the particular engagement
- Identification of the intended users of the report and the manner in which they intend to use the report
- Relevance and appropriateness of the definitions in paragraph .08, many of which specifically relate to internal control over financial reporting
- Application of references to auditing standards (AU-C sections) that are intended to provide the service auditor with guidance relevant to internal control over financial reporting

²⁰ Paragraph .23 of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

²¹ Paragraph .27b(ii) of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- Application of the concept of materiality in the circumstances of the particular engagement
- Developing the language to be used and identifying the elements to be included in a practitioner's examination report, as discussed in section 205²²

.A5 In some circumstances, management of the service organization may not be in a position to assert that the controls are suitably designed, for example, because the controls have been designed by management of the user entity. If management is unable to assert that the controls are suitably designed, management would also be precluded from asserting that the controls are operating effectively because of the inextricable link between the suitability of the design of controls and their operating effectiveness. The absence of an assertion with respect to the suitability of design of controls would preclude the service auditor from expressing an opinion on the operating effectiveness of controls. As an alternative, the practitioner may report under section 205 on whether the controls were operating as described or may perform agreed-upon procedures under section 215.

Definitions (Ref: par. .08)

Complementary User Entity Controls

.A6 Complementary user entity controls are specific and relevant to the services provided by the service organization applicable to user entities' internal control over financial reporting.

Controls at a Service Organization

.A7 The policies and procedures referred to in the definition of *controls at a service organization* in paragraph .08 include aspects of the information and communications component of user entities' internal control maintained by the service organization and control activities related to the information and communications component and may also include aspects of one or more of the other components of internal control at a service organization. For example, the definition of *controls at a service organization* may include aspects of the service organization's control environment, risk assessment, monitoring activities, and control activities when they relate to the services provided. Such definition does not, however, include controls at a service organization that are not related to the achievement of the control objectives stated in management's description of the service organization's system, for example, controls related to the preparation of the service organization's own financial statements.

Service Organization's System

.A8 The policies and procedures referred to in the definition of *service organization's system* refer to the guidelines and activities for providing transaction processing and other services to user entities and include the infrastructure, software, people, and data that support the policies and procedures.

Subservice Organization

.A9 There may be instances in which a subservice organization uses the services of another service organization to perform services that are likely to be relevant to user entities' internal control over financial reporting. In those

²² Paragraphs .63–.66 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

circumstances, the service organization that provides services to the subservice organization is also a subservice organization.

Management and Those Charged With Governance (Ref: par. .09)

.A10 For the purposes of this section, the responsible party is management of the service organization.

.A11 Management and governance structures vary by entity, reflecting influences such as size and ownership characteristics. Such diversity means that it is not possible for this section to specify for all engagements the person(s) with whom the service auditor is to interact regarding particular matters. For example, the service organization may be a segment of an organization and not a separate legal entity. In such cases, identifying the appropriate management personnel or those charged with governance from whom to request written representations may require the exercise of professional judgment.

Preconditions

Service Auditor Need Not Be Independent of User Entities (Ref: par. .10)

.A12 In performing a service auditor's engagement, the service auditor need not be independent of each user entity.

Law or Regulation Requires Acceptance or Continuance of Engagement (Ref: par. .10)

.A13 If one or more of the conditions in paragraph .10 of this section or in section 105 are not met and the service auditor is, nevertheless, required by law or regulation to accept or continue an engagement to report on controls at a service organization, the service auditor is required, in accordance with paragraphs .42–.44, to determine the effect on the service auditor's report of one or more of such conditions not being met.²³

Management's Responsibility for Documenting the Service Organization's System (Ref: par. .10b[i])

.A14 Management of the service organization is responsible for documenting the service organization's system. No one particular form of documentation is prescribed, and the extent of documentation may vary depending on the size and complexity of the service organization and its monitoring activities.

Reasonable Basis for Management's Assertion (Ref: par. .10b[ii] and .15a[viii])

.A15 Management's monitoring activities may provide evidence of the design and operating effectiveness of controls in support of management's assertion. *Monitoring of controls* is a process to assess the effectiveness of internal control performance over time. It involves assessing the effectiveness of controls on a timely basis, identifying and reporting deficiencies to appropriate individuals within the service organization, and taking necessary corrective actions. Management accomplishes monitoring of controls through ongoing activities, separate evaluations, or a combination of the two. Ongoing monitoring

²³ Paragraphs .26–.30 of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

activities are often built into the normal recurring activities of an entity and include regular management and supervisory activities. Internal auditors or personnel performing similar functions may contribute to the monitoring of a service organization's activities. Monitoring activities may also include using information communicated by external parties, such as customer complaints, which may indicate problems or highlight areas in need of improvement. The greater the degree and effectiveness of ongoing monitoring, the less need for separate evaluations. Usually, some combination of ongoing monitoring and separate evaluations will ensure that internal control maintains its effectiveness over time. The service auditor's report on controls is not a substitute for the service organization's own processes to provide a reasonable basis for its assertion.

Management's Responsibility for Control Objectives (Ref. par. 10b[iv])

.A16 The control objectives stated in management's description of the service organization's system relate to the types of financial statement assertions commonly embodied in the broad range of user entities' financial statements to which controls at the service organization could reasonably be expected to relate.

Management's Responsibility for Identifying Risks (Ref: par. . 10b[v])

.A17 Control objectives relate to risks that controls seek to mitigate. For example, the risk that a transaction is recorded at the wrong amount or in the wrong period can be expressed as a control objective that transactions are recorded at the correct amount and in the correct period. Management is responsible for identifying the risks that threaten achievement of the control objectives stated in management's description of the service organization's system. A service organization's controls may be designed with the assumption that user entities will have implemented complementary user entity controls or that subservice organizations will have implemented complementary subservice organization controls that are necessary to achieve the control objectives. The risks that management identifies also include the risk that such controls were not implemented by user entities or subservice organizations or that those controls were not operating effectively. Management may have a formal or informal process for identifying relevant risks. A formal process may include estimating the significance of identified risks, assessing the likelihood of their occurrence, and deciding about actions to address them. However, because control objectives relate to risks that controls seek to mitigate, thoughtful identification by management of control objectives when designing, implementing, and documenting the service organization's system may itself comprise an informal process for identifying relevant risks.

Providing a Written Assertion (Ref: par. . 10b[vi])

.A18 The service organization's assertion may be attached to the description of the service organization's system or may be included in the description if clearly segregated from the description, for example, through the use of headings. Segregating the assertion from the description clarifies that the assertion is not part of the description. (See subparagraph (b) of the definitions of *management's description of a service organization's system* and *a service auditor's report on that description and on the suitability of the design of controls* and *management's description of a service organization's system* and *a service auditor's report on that description and on the suitability of the design and operating effectiveness of controls* in paragraph .08.)

Inclusive Method (Ref: par. . 11)

.A19 The inclusive method is generally feasible if, for example, the service organization and the subservice organization are related, or if the contract between the service organization and the subservice organization provides for the use of the inclusive method. In such circumstances, the service organization is the engaging party, and the requirements relative to agreeing on the terms of the engagement may not be applicable.

.A20 If the inclusive method is used, matters to be agreed upon or coordinated by the service organization and the subservice organization include

- the scope of the examination and the period to be covered by the service auditor's report.
- acknowledgment from management of the subservice organization that it will provide the service auditor with a written assertion and representation letter. (Both management of the service organization and management of the subservice organization are responsible for providing the service auditor with a written assertion and representation letter.)
- the planned content and format of the inclusive description.
- the representatives of the subservice organization and the service organization who will be responsible for
 - providing each entity's description.
 - integrating the descriptions.
- for a type 2 report, the timing of the tests of controls.

Request to Change the Scope of the Engagement (Ref: par. .12)

.A21 A request to change the scope of the engagement may not have a reasonable justification if, for example, the request is made

- to exclude certain control objectives at the service organization from the scope of the engagement because of the likelihood that the service auditor's opinion would be modified with respect to those control objectives.
- to prevent the disclosure of deviations identified at a subservice organization by requesting a change from the inclusive method to the carve-out method.

.A22 A request to change the scope of the engagement may have a reasonable justification when, for example, the request is made because the service organization, a transfer agent, after providing the description of its system to the service auditor, decides that it would like to remove a control objective related to new fund setup because only one fund was set up during the reporting period, and management of the fund had performed its own testing. The service auditor concluded that the removal of the control objective related to new fund setup was reasonable in the circumstances because the objective was not relevant to a broad range of user entities during the examination period.

Requesting a Written Assertion (Ref: par. .13 and .18)

.A23 Paragraph .13 applies regardless of whether the responsible party is the engaging party.

.A24 Exhibit B, "Illustrative Assertions by Management of a Service Organization," contains illustrative management assertions for type 1 and type 2 engagements.

Assessing the Suitability of the Criteria (Ref: par. .14)

.A25 Section 105 requires a practitioner, among other things, to determine whether the criteria to be applied in the preparation and evaluation of the underlying subject matter are suitable and will be available to the intended users, and the subject matter is appropriate.²⁴ Section 105 also indicates that one of the attributes of an appropriate subject matter is that it is identifiable and capable of consistent measurement or evaluation against the criteria.²⁵ As indicated in section 105, the responsible party (in this case, management of the service organization) or the engaging party is responsible for selecting the criteria, and the engaging party is responsible for determining that such criteria are appropriate for its purposes.²⁶ For an examination or review engagement, section 105 defines the *underlying subject matter* as the phenomenon that is measured or evaluated by applying criteria.²⁷ [Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.A26 For the purposes of engagements performed in accordance with this section, criteria need to be available to user entities and their auditors to enable them to understand the basis for the service organization's assertion about the fair presentation of management's description of the service organization's system, the suitability of the design of controls that address control objectives stated in the description of the system and, in the case of a type 2 report, the operating effectiveness of such controls. Information about suitable criteria is provided in section 105.²⁸ Paragraphs .15–.17 discuss the criteria for evaluating the fairness of the presentation of management's description of the service organization's system and the suitability of the design and operating effectiveness of the controls.

Monitoring the Effectiveness of Controls at Subservice Organizations (Ref: par. .15a[viii])

.A27 Management's description of the service organization's system and the scope of the service auditor's engagement includes controls at the service organization that monitor the effectiveness of controls at the subservice organization, which may include some combination of ongoing monitoring to determine that potential issues are identified timely and separate evaluations to determine that the effectiveness of internal control is maintained over time. Such monitoring activities may include

- reviewing and reconciling output reports,
- holding periodic discussions with the subservice organization,
- making regular site visits to the subservice organization,
- testing controls at the subservice organization by members of the service organization's internal audit function,
- reviewing type 1 or type 2 reports on the subservice organization's system prepared pursuant to this section or section 205, and

²⁴ Paragraph .27b(ii) of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

²⁵ Paragraph .A39a of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

²⁶ Paragraph .A47 of section 105. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

²⁷ Definition of *underlying subject matter* in paragraph .12 of section 105. [Footnote revised and renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

²⁸ See footnote 24. [Footnote revised and renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- monitoring external communications, such as customer complaints relevant to the services by the subservice organization.

Materiality (Ref: par. .19, .25, and .27–.28)

.A28 In an engagement to report on controls at a service organization, the concept of materiality relates to the information being reported on, not the financial statements of user entities. The service auditor plans and performs procedures to determine whether, in all material respects, based on the criteria in management's assertion, management's description of the service organization's system is fairly presented; controls at the service organization are suitably designed to achieve the control objectives stated in the description; and, in the case of a type 2 report, controls at the service organization operated effectively throughout the specified period to achieve the control objectives stated in the description. The concept of materiality takes into account that the service auditor's report provides information about the service organization's system to meet the common information needs of a broad range of user entities and their auditors who have an understanding of the manner in which the system is being used by a particular user entity for financial reporting.

.A29 Materiality with respect to the fair presentation of management's description of the service organization's system and with respect to the design of controls primarily includes the consideration of qualitative factors, for example, whether

- management's description of the service organization's system includes the significant aspects of the processing of transactions.
- management's description of the service organization's system omits or distorts relevant information.
- the controls have the ability, as designed, to provide reasonable assurance that the control objectives stated in management's description of the service organization's system would be achieved.

Materiality with respect to the operating effectiveness of controls includes the consideration of both quantitative and qualitative factors, for example, the tolerable rate and observed rate of deviation (a quantitative matter) and the nature and cause of any observed deviations (a qualitative matter).

.A30 The concept of materiality is not applied when disclosing, in the description of the tests of controls, the results of those tests when deviations have been identified. This is because in the particular circumstances of a specific user entity or user auditor, a deviation may have significance beyond whether or not, in the opinion of the service auditor, it prevents a control from operating effectively. For example, the control to which the deviation relates may be particularly significant in preventing a certain type of error that may be material in the particular circumstances of a user entity's financial statements.

Obtaining an Understanding of the Service Organization's System and Assessing the Risk of Material Misstatement (Ref: par. .20 and .22)

.A31 Obtaining an understanding of the service organization's system, including related controls, assists the service auditor in the following:

- Identifying the boundaries of the system and how it interfaces with other systems

- Assessing whether management's description of the service organization's system fairly presents the service organization's system that has been designed and implemented
- Understanding which controls are necessary to achieve the control objectives stated in management's description of the service organization's system, whether controls were suitably designed to achieve those control objectives, and, in the case of a type 2 report, whether controls were operating effectively throughout the specified period to achieve those control objectives.
- When a separate type 1 or type 2 report exists for a subservice organization, whether management has identified controls that are necessary, either at the service organization or at user entities, to address relevant complementary user entity controls identified in the carved-out subservice organization's description of its system.

.A32 Paragraph .15a(viii) indicates that the criteria for assessing whether management's description of the service organization's system is fairly presented should include other aspects of the service organization's control environment, risk assessment process, information and communications (including relevant business processes), control activities, and monitoring activities that are relevant to the services provided. Although aspects of the service organization's control environment, risk assessment process, and monitoring activities may not be presented in the description in the context of control objectives, they may, nevertheless, be necessary to achieve the specified control objectives stated in the description. Likewise, deficiencies in these controls may have an effect on the service auditor's assessment of whether the controls, taken as a whole, were suitably designed or operating effectively to achieve the specified control objectives.

.A33 The service auditor's procedures to obtain the understanding may include the following:

- Inquiring of management and others within the service organization who, in the service auditor's judgment, may have relevant information
- Observing operations and inspecting documents, reports, and printed and electronic records of transaction processing
- Inspecting a selection of agreements between the service organization and user entities to identify their common terms
- Reperforming the application of a control

One or more of the preceding procedures may be accomplished through the performance of a walkthrough.

.A34 In a type 1 or type 2 engagement, the risk of material misstatement relates to the risk that, in all material respects, based on the criteria in management's assertion

- a. management's description of the service organization's system is not fairly presented;
- b. the controls are not suitably designed to provide reasonable assurance that the control objectives stated in management's description of the service organization's system would be achieved if the controls operated effectively; and
- c. in the case of a type 2 report, the controls did not operate effectively throughout the specified period to achieve the related

control objectives stated in management's description of the service organization's system.

.A35 The risks identified in paragraph .A34 may include those related to new or changed controls, system changes, significant changes in processing volume, new personnel or significant changes in key management or personnel, new types of transactions, new products or technologies, or modifications to the service auditor's opinion in the service auditor's report for the prior year.

Reasonable Assurance (Ref: par. .25, .27-.28, and .33)

.A36 In a service auditor's examination engagement, the service auditor plans and performs the engagement to obtain reasonable assurance of detecting misstatements in management's description of the service organization's system and instances in which control objectives were not achieved. Absolute assurance is not attainable because of factors such as the need for judgment, the use of sampling, and the inherent limitations of controls at the service organization that affect whether the description is fairly presented and the controls are suitably designed and operating effectively to achieve the control objectives, and because much of the evidence available to the service auditor is persuasive, rather than conclusive, in nature. Also, procedures that are effective for detecting unintentional misstatements in the description, and instances in which control objectives were not achieved, may be ineffective for detecting misstatements in the description resulting from fraud and instances in which the control objectives were not achieved that are concealed through collusion between service organization personnel and a third party or among management or employees of the service organization. Therefore, the subsequent discovery of the existence of material misstatements in the description or instances in which control objectives were not achieved does not, in and of itself, evidence inadequate planning, performance, or judgment on the part of the service auditor.

Obtaining Evidence Regarding Management's Description of the Service Organization's System (Ref: par. .15a[vi] and .25-.26)

.A37 Considering the following questions may assist the service auditor in determining whether management's description of the service organization's system is fairly presented, in all material respects, based on the criteria in management's assertion:

- Is the description prepared at a level of detail that could reasonably be expected to provide a broad range of user auditors with sufficient information to obtain an understanding of internal control in accordance with AU-C section 402? The description need not address every aspect of the service organization's processing or the services provided to user entities and need not be so detailed that it would potentially enable a reader to compromise security or other controls at the service organization.
- Is the description prepared in a manner that does not omit or distort information that might affect the decisions of a broad range of user auditors, for example, does the description contain any significant omissions or inaccuracies regarding processing of which the service auditor is aware?
- Does the description include relevant details of changes to the service organization's system during the period covered by the description when the description covers a period of time?

- Have the controls identified in the description actually been implemented?
- If the inclusive method has been used, does the description separately identify controls at the service organization and controls at the subservice organization? Does the description include activities at the service organization that monitor the effectiveness of controls at the subservice organization?
- Are complementary user entity controls, if any, adequately described? In most cases, the control objectives stated in the description are worded so that they are capable of being achieved through the effective operation of controls implemented by the service organization alone. In some cases, however, the control objectives stated in the description cannot be achieved by the service organization alone because their achievement requires particular controls to be implemented by user entities. For example, to achieve the specified control objectives, a user entity may need to review the completeness and accuracy of input provided to the service organization before submitting it to the service organization or the completeness and accuracy of reports provided to the user entity subsequent to processing. When the description does include complementary user entity controls, the description separately identifies those controls, along with the specific control objectives that cannot be achieved by the service organization alone.
- If the carve-out method has been used, does the description identify the functions that are performed by the subservice organization? (When the carve-out method has been used, the description does not describe the detailed processing or controls at the subservice organization.) Does the description include activities at the service organization that monitor the effectiveness of controls at the subservice organization as well as complementary subservice organization controls?

.A38 The service auditor's procedures to evaluate the fair presentation of management's description of the service organization's system may include the following:

- Considering the nature of the user entities and how the services provided by the service organization are likely to affect them, for example, the predominant types of user entities, and whether the user entities are regulated by government agencies
- Reading contracts with user entities to gain an understanding of the service organization's contractual obligations
- Observing procedures performed by service organization personnel
- Reviewing the service organization's policy and procedure manuals and other documentation of the system, for example, flowcharts and narratives
- Performing walkthroughs of transactions through the service organization's system

.A39 Paragraph .25a requires the service auditor to evaluate whether the control objectives stated in management's description of the service organization's system are reasonable in the circumstances. Considering the following questions may assist the service auditor in this evaluation:

- Do the control objectives stated in the description relate to the types of assertions commonly embodied in the broad range of user entities' financial statements to which controls at the service organization could reasonably be expected to relate (for example, assertions about existence and accuracy that are affected by access controls that prevent or detect unauthorized access to the system)? Although the service auditor ordinarily will not be able to determine how controls at a service organization specifically relate to the assertions embodied in individual user entities' financial statements, the service auditor considers matters, such as the following, when identifying the types of assertions to which the controls are likely to relate:
 - The types of services provided by the service organization, including the classes of transactions processed
 - The contents of reports and other information prepared for user entities
 - The information used in the performance of procedures
 - The types of significant events other than transactions that occur in providing the services
 - Services performed by a subservice organization, if any
 - The responsibility of the service organization to implement controls, including responsibilities established in contracts and agreements with user entities
 - The risks to a user entity's internal control over financial reporting arising from information technology used or provided by the service organization
- Are the control objectives stated in the description complete? Although a complete set of control objectives can provide a broad range of user auditors with a framework to assess the effect of controls at the service organization on assertions commonly embodied in user entities' financial statements, the service auditor ordinarily will not be able to determine how controls at a service organization specifically relate to the assertions embodied in individual user entities' financial statements and cannot, therefore, determine whether control objectives are complete from the viewpoint of individual user entities or user auditors. It is the responsibility of individual user entities or user auditors to assess whether the service organization's description addresses the particular control objectives that are relevant to their needs. If the control objectives are specified by an outside party, including control objectives specified by law or regulation, the outside party is responsible for their completeness and reasonableness.

.A40 The service auditor's procedures to determine whether the system described by the service organization has been implemented may be similar to, and performed in conjunction with, procedures to obtain an understanding of that system. Other procedures that the service auditor may use in combination with inquiry of management and other service organization personnel include observation, inspection of records and other documentation, and reperformance of the manner in which transactions are processed through the system and controls are applied.

Obtaining Evidence Regarding the Design of Controls (Ref: par. .27)

.A41 The risks and control objectives identified in paragraph .27 encompass fraud and unintentional acts that threaten the achievement of the control objectives.

.A42 From the viewpoint of a user auditor, a control is suitably designed to achieve the control objectives stated in management's description of the service organization's system if individually or in combination with other controls, it would, when complied with satisfactorily, provide reasonable assurance that material misstatements are prevented, or detected and corrected. A service auditor, however, is not aware of the circumstances at individual user entities that would affect whether or not a misstatement is material to those user entities. Therefore, from the viewpoint of a service auditor, a control is suitably designed if individually or in combination with other controls, it would, when complied with satisfactorily, provide reasonable assurance that the control objective(s) stated in the description of the service organization's system are achieved.

.A43 A service auditor may consider using flowcharts, questionnaires, or decision tables to facilitate understanding the design of the controls.

.A44 Controls may consist of a number of activities directed at the achievement of various control objectives. Consequently, if the service auditor evaluates certain activities as being ineffective in achieving a particular control objective, the existence of other activities may allow the service auditor to conclude that controls related to the control objective are suitably designed to achieve the control objective. (Ref: par. .27)

.A45 The service organization may have different controls in place to address each of the risks associated with the control objective; therefore, multiple controls may be needed in order for the service auditor to conclude on the design of controls relating to each of the risks associated with the control objective.

Obtaining Evidence Regarding the Operating Effectiveness of Controls (Ref: par. .15*b* and .28–.29)

.A46 From the viewpoint of a user auditor, a control is operating effectively if individually or in combination with other controls, it provides reasonable assurance that material misstatements are prevented, or detected and corrected. A service auditor, however, is not aware of the circumstances at individual user entities that would affect whether or not a misstatement resulting from a control deviation is material to those user entities. Therefore, from the viewpoint of a service auditor, a control is operating effectively if, individually or in combination with other controls, it provides reasonable assurance that the control objectives stated in management's description of the service organization's system are achieved. Similarly, a service auditor is not in a position to determine whether any observed control deviation would result in a material misstatement from the viewpoint of an individual user entity.

.A47 Obtaining an understanding of controls sufficient to opine on the suitability of their design is not sufficient evidence regarding their operating effectiveness unless some automation provides for the consistent operation of the controls as they were designed and implemented. For example, obtaining information about the implementation of a manual control at a point in time does not provide evidence about operation of the control at other times. However, because of the inherent consistency of IT processing, performing procedures to determine the design of an automated application control and whether it has

been implemented may serve as evidence of that control's operating effectiveness, depending on the service auditor's assessment and testing of IT general controls such as those over program changes.

.A48 Evidence about the satisfactory operation of controls in prior periods does not provide evidence of the operating effectiveness of controls during the current period. The service auditor expresses an opinion on the effectiveness of controls throughout each period; therefore, sufficient appropriate evidence about the operating effectiveness of controls throughout the current period is required for the service auditor to express that opinion for the current period. Knowledge of modifications to the service auditor's report or deviations observed in prior engagements may, however, be considered in assessing risk and lead the service auditor to increase the extent of testing during the current period.

.A49 Generally, a type 2 report(s) is most useful to user entities and their auditors when it covers a substantial portion of the period covered by the user entity's financial statements being audited.

.A50 Determining the effect of changes in the service organization's controls that were implemented during the period covered by the service auditor's report involves gathering information about the nature and extent of such changes, how they affect processing at the service organization, and how they might affect assertions in the user entities' financial statements.

.A51 Certain controls may not leave evidence of their operation that can be tested at a later date and, accordingly, the service auditor may find it appropriate to test the operating effectiveness of such controls at various times throughout the reporting period.

Evaluating the Reliability of Information Produced by the Service Organization (Ref: par. .30)

.A52 The following are examples of information produced by a service organization that are commonly used by a service auditor:

- Population lists the service auditor uses to select a sample of items for testing
- Lists of data that have specific characteristics
- Exception reports
- Transaction reconciliations
- Documentation that provides evidence of the operating effectiveness of controls, such as user access lists
- System-generated reports
- Other system-generated data

Written Representations (Ref: par. .12 and .36–.38)

.A53 Written representations reaffirming the service organization's assertion about the effective operation of controls may be based on ongoing monitoring activities, separate evaluations, or a combination of the two.

.A54 In certain circumstances, a service auditor may obtain written representations from parties in addition to management of the service organization, such as those charged with governance.

.A55 The written representations required by paragraph .36 are separate from and in addition to the assertion that accompanies management's description of the service organization's system.

.A56 In addition to the written representations required by paragraph .36, the service auditor may consider it necessary to request other written representations.

.A57 If the service auditor is unable to obtain written representations regarding relevant control objectives and related controls at the subservice organization, management of the service organization may be able to use the carve-out method.

Other Information (Ref: par. .39, .40[iii], and .41[iii])

.A58 The other information referred to in paragraph .39 may include

- information provided by the service organization and included in a separate section of the type 1 or type 2 report, or
- information outside the type 1 or type 2 report included in a document that contains the service auditor's report. This other information may be provided by the service organization or another party.

Content of the Service Auditor's Report (Ref: par. .40 and .41)

.A59 Examples of service auditors' reports are presented in exhibit A of this section, and illustrative assertions by management of the service organization are presented in exhibit B.

.A60 The list of report elements in paragraphs .40 and .41 constitutes all the required report elements for a service auditor's type 2 and type 1 engagement, respectively, including the elements required by section 205.²⁹ Application guidance regarding the elements of a practitioner's examination report is included in section 205.³⁰ (Ref: par. .40)

.A61 The following is an example of the information required by paragraphs .40c(iv)(1) and .41c(iv)(1):

As indicated in the description, XYZ Service Organization uses a subservice organization for all of its computerized application processing. The description includes only the control objectives and related controls of XYZ Service Organization and excludes the control objectives and related controls of the subservice organization. The description also indicates that certain control objectives specified by XYZ Service Organization can be achieved only if complementary subservice organization controls assumed in the design of XYZ Service Organization's controls are suitably designed and operating effectively, along with related controls at XYZ Service Organization. Our examination did not extend to controls of the subservice organization, and we have not evaluated the suitability of the design or operating effectiveness of such complementary subservice organization controls.

²⁹ Paragraphs .63–.66 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

³⁰ Paragraphs .A85–.A111 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

Description of the Service Auditor's Tests of Controls and the Results Thereof (Ref: par. .40k)

.A62 The service auditor may include in the description of tests of controls and results the procedures the service auditor performed to verify the completeness and accuracy of information provided by the service organization.

.A63 In describing the service auditor's tests of controls and results thereof for a type 2 report, it is helpful to readers if the service auditor's report includes information about causative factors for identified deviations, to the extent the service auditor has identified such factors.

.A64 When the work of the internal audit function has been used in performing tests of controls, the service auditor's description of that work and of the service auditor's procedures with respect to that work may be presented in a number of ways, for example

- by including introductory material to the description of tests of controls indicating that certain work of the internal audit function was used in performing tests of controls and describing the service auditor's procedures with regard to that work.
- by attributing individual tests to internal audit and describing the service auditor's procedures with regard to that work.

.A65 The work of the internal audit function referred to in paragraph .40k(v) does not include tests of controls performed by internal auditors as a part of direct assistance.

.A66 Other than the description of the work of the internal auditors referred to in paragraph .40k(v), the service auditor's report does not make any reference to the use of the work of the internal audit function to obtain evidence or to the use of internal auditors to provide direct assistance.

Use of the Service Auditor's Report (Ref: par. .40m and .41m)

.A67 Section 205 requires that the use of a practitioner's report be restricted to specified parties when the criteria used to evaluate or measure the subject matter are available only to specified parties or appropriate only for a limited number of parties who either participated in their establishment or can be presumed to have an adequate understanding of the criteria.³¹ The criteria used for engagements to report on controls at a service organization are relevant only for the purpose of providing information about the service organization's system, including controls, to those who have an understanding of how the system is used for financial reporting by user entities and, accordingly, the service auditor's report states that the report and the description of tests of controls are intended only for use by management of the service organization, user entities of the service organization ("during some or all of the period covered by the service auditor's report" for a type 2 report, and "as of the specified date" for a type 1 report), and their user auditors. (The illustrative reports in exhibit A of this section illustrate language for a paragraph restricting the use of the report.)

.A68 Section 205 indicates that the need for restriction on the use of a practitioner's report may result from a number of circumstances, including the potential for the report to be misunderstood when taken out of the context in

³¹ Paragraph .64b of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

which it was intended to be used, and the extent to which the procedures performed are known or understood.³²

.A69 Although the alert language in the service auditor's report restricts the use of the report, a service auditor is not responsible for controlling a service organization's distribution of a report. A service auditor may inform the service organization of the following:

- A service auditor's type 1 report is not intended for distribution to parties other than the service organization, user entities of the service organization's system as of the end of the period covered by the report, and their user auditors.
- A service auditor's type 2 report is not intended for distribution to parties other than the service organization, user entities of the service organization's system during some or all of the period covered by the report, and their user auditors.

.A70 A user entity is also considered a user entity of the service organization's subservice organizations if controls at subservice organizations are relevant to internal control over financial reporting of the user entity. In such case, the user entity is referred to as an *indirect* or *downstream* user entity of the subservice organization. Consequently, an indirect or downstream user entity may be included in the group to whom use of the service auditor's report is restricted if controls at the service organization are relevant to internal control over financial reporting of such indirect or downstream user entity.

.A71 In engagements in which the inclusive method is used, the users of a subservice organization's system that are not users of the service organization's system, are not *user entities*, as defined in paragraph .08.

.A72 In engagements in which the inclusive method is used, management of a subservice organization may be identified as a specified party and, if so, would be included in the alert language described in paragraphs .40m and .41m.

Modified Opinions (Ref: par. .42)

.A73 The AICPA Guide *Service Organizations: Reporting on Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting* contains examples of elements of modified service auditor's reports.

Other Communication Responsibilities (Ref: par. .45)

.A74 Actions that a service auditor may take when the service auditor becomes aware of noncompliance with laws or regulations, fraud, or uncorrected misstatements at the service organization (after giving additional consideration to instances in which the service organization has not appropriately communicated this information to affected user entities, and the service organization refuses to do so) include the following:

- Obtaining legal advice about the consequences of different courses of action
- Communicating with those charged with governance of the service organization

³² Paragraph .A110 of section 205. [Footnote renumbered, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

- Disclaiming an opinion, modifying the service auditor's opinion, or adding a separate paragraph to the practitioner's report that describes the matter
- Communicating with third parties, for example, a regulator, when required to do so
- Withdrawing from the engagement
- Considering the nature of the user entities and how the services provided by the service organization are likely to affect them, for example, the predominant types of user entities, and whether the user entities are regulated by government agencies
- Reading contracts with user entities to gain an understanding of the service organization's contractual obligations
- Observing procedures performed by service organization personnel
- Reviewing the service organization's policy and procedure manuals and other documentation of the system, for example, flowcharts and narratives
- Performing walkthroughs of transactions through the service organization's system

.A75

Exhibit A — Illustrative Service Auditor's Reports

The following illustrative service auditor's reports contain text in **boldface italics** that would be added to the report if the situation described in the text is applicable. These illustrative reports are for guidance only and are not intended to be exhaustive or applicable to all situations. The inclusion of headings in the report may be useful but is not required by this section or section 205.¹ The AICPA Guide *Service Organizations: Reporting on Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting* includes additional illustrative reports, including reports with modified opinions.

Example 1: Type 2 Service Auditor's Report

Independent Service Auditor's Report² on XYZ Service Organization's Description of Its [type or name of] System and the Suitability of the Design and Operating Effectiveness of Controls

To: XYZ Service Organization

Scope

We have examined XYZ Service Organization's description of its [type or name of] system entitled "XYZ Service Organization's Description of Its [type or name of] System" for processing user entities' transactions [or identification of the function performed by the system] throughout the period [date] to [date] (description) and the suitability of the design and operating effectiveness of the controls included in the description to achieve the related control objectives stated in the description, based on the criteria identified in "XYZ Service Organization's Assertion" (assertion). The controls and control objectives included in the description are those that management of XYZ Service Organization believes are likely to be relevant to user entities' internal control over financial reporting, and the description does not include those aspects of the [type or name of] system that are not likely to be relevant to user entities' internal control over financial reporting.

[A statement such as the following is added to the service auditor's report when information that is not covered by the report is included in the description of the service organization's system.]

The information included in [section number where the other information is presented], "Other Information Provided by XYZ Service Organization" is presented by management of XYZ Service Organization to provide additional information and is not a part of XYZ Service Organization's description of its [name or type of] system made available to user entities during the period [date] to [date]. Information about XYZ Service Organization's [describe the nature of the information, for example, business continuity planning, privacy practices, and so on] has not been subjected to the procedures applied in the examination of the description of the [name or type of] system and of the suitability of the design and operating effectiveness of controls to achieve the related control objectives stated in the description of the [name or type of] system.

¹ Paragraph .A82 of section 205.

² May also be "Report of Independent Service Auditors."

[A statement such as the following is added to the service auditor's report when the service organization uses a subservice organization, the carve-out method is used to present the subservice organization, and complementary subservice organization controls are required to meet the control objectives.]

XYZ Service Organization uses a subservice organization to [identify the function or service provided by the subservice organization]. The description includes only the control objectives and related controls of XYZ Service Organization and excludes the control objectives and related controls of the subservice organization. The description also indicates that certain control objectives specified by XYZ Service Organization can be achieved only if complementary subservice organization controls assumed in the design of XYZ Service Organization's controls are suitably designed and operating effectively, along with the related controls at XYZ Service Organization. Our examination did not extend to controls of the subservice organization, and we have not evaluated the suitability of the design or operating effectiveness of such complementary subservice organization controls.

[A statement such as the following is added to the assertion when complementary user entity controls are required to meet the control objectives.]

The description indicates that certain control objectives specified in the description can be achieved only if complementary user entity controls assumed in the design of XYZ Service Organization's controls are suitably designed and operating effectively, along with related controls at the service organization. Our examination did not extend to such complementary user entity controls, and we have not evaluated the suitability of the design or operating effectiveness of such complementary user entity controls.

Service Organization's Responsibilities

In [section number where the assertion is presented], XYZ Service Organization has provided an assertion about the fairness of the presentation of the description and suitability of the design and operating effectiveness of the controls to achieve the related control objectives stated in the description. XYZ Service Organization is responsible for preparing the description and assertion, including the completeness, accuracy, and method of presentation of the description and assertion, providing the services covered by the description, specifying the control objectives and stating them in the description, identifying the risks that threaten the achievement of the control objectives, selecting the criteria stated in the assertion, and designing, implementing, and documenting controls that are suitably designed and operating effectively to achieve the related control objectives stated in the description.

Service Auditor's Responsibilities

Our responsibility is to express an opinion on the fairness of the presentation of the description and on the suitability of the design and operating effectiveness of the controls to achieve the related control objectives stated in the description, based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, in all material respects, based on the criteria in management's assertion, the description is fairly presented and the controls were suitably designed and operating effectively to achieve the related control objectives stated in the description throughout the period [date] to [date]. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

An examination of a description of a service organization's system and the suitability of the design and operating effectiveness of controls involves

- performing procedures to obtain evidence about the fairness of the presentation of the description and the suitability of the design and operating effectiveness of the controls to achieve the related control objectives stated in the description, based on the criteria in management's assertion.
- assessing the risks that the description is not fairly presented and that the controls were not suitably designed or operating effectively to achieve the related control objectives stated in the description.
- testing the operating effectiveness of those controls that management considers necessary to provide reasonable assurance that the related control objectives stated in the description were achieved.
- evaluating the overall presentation of the description, suitability of the control objectives stated in the description, and suitability of the criteria specified by the service organization in its assertion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Inherent Limitations

The description is prepared to meet the common needs of a broad range of user entities and their auditors who audit and report on user entities' financial statements and may not, therefore, include every aspect of the system that each individual user entity may consider important in its own particular environment. Because of their nature, controls at a service organization may not prevent, or detect and correct, all misstatements in processing or reporting transactions [*or identification of the function performed by the system*]. Also, the projection to the future of any evaluation of the fairness of the presentation of the description, or conclusions about the suitability of the design or operating effectiveness of the controls to achieve the related control objectives, is subject to the risk that controls at a service organization may become ineffective.

Description of Tests of Controls

The specific controls tested and the nature, timing, and results of those tests are listed in [*section number where the description of tests of controls is presented*].

Opinion

In our opinion, in all material respects, based on the criteria described in XYZ Service Organization's assertion

- a. the description fairly presents the [*type or name of*] system that was designed and implemented throughout the period [*date*] to [*date*].
- b. the controls related to the control objectives stated in the description were suitably designed to provide reasonable assurance that the control objectives would be achieved if the controls operated effectively throughout the period [*date*] to [*date*] **and subservice organizations and user entities applied the complementary controls assumed in the design of XYZ Service Organization's controls throughout the period [*date*] to [*date*].**
- c. the controls operated effectively to provide reasonable assurance that the control objectives stated in the description were achieved

throughout the period [date] to [date] ***if complementary subservice organization and user entity controls assumed in the design of XYZ Service Organization's controls operated effectively throughout the period [date] to [date].***

Restricted Use

This report, including the description of tests of controls and results thereof in [section number where the description of tests of controls is presented], is intended solely for the information and use of management of XYZ Service Organization, user entities of XYZ Service Organization's [type or name of] system during some or all of the period [date] to [date], and their auditors who audit and report on such user entities' financial statements or internal control over financial reporting and have a sufficient understanding to consider it, along with other information, including information about controls implemented by user entities themselves, when assessing the risks of material misstatement of user entities' financial statements. This report is not intended to be, and should not be, used by anyone other than the specified parties.

[Service auditor's signature]

[City and state where the service auditor's report is issued]

[Date of the service auditor's report]

Example 2: Type 1 Service Auditor's Report

Independent Service Auditor's Report³ on XYZ Service Organization's Description of Its [type or name of] System and the Suitability of the Design of Controls

To: XYZ Service Organization

We have examined XYZ Service Organization's description of its [type or name of] system entitled, "XYZ Service Organization's Description of Its [type or name of] System," for processing user entities' transactions [or identification of the function performed by the system] as of [date] (description) and the suitability of the design of the controls included in the description to achieve the related control objectives stated in the description, based on the criteria identified in "XYZ Service Organization's Assertion" (assertion). The controls and control objectives included in the description are those that management of XYZ Service Organization believes are likely to be relevant to user entities' internal control over financial reporting, and the description does not include those aspects of the [type or name of] system that are not likely to be relevant to user entities' internal control over financial reporting.

[A statement such as the following is added to the service auditor's report when information that is not covered by the report is included in the description of the service organization's system.]

The information included in [section number where the other information is presented], "Other Information Provided by XYZ Service Organization," is presented by management of XYZ Service Organization to provide additional information and is not a part of XYZ Service Organization's description of its [name or type of] system made available to user entities as of [date]. Information about XYZ Service Organization's [describe the nature of the information, for example, business continuity planning, privacy practices, and so on] has not been subjected to the procedures applied in the examination of the description

³ May also be "Report of Independent Service Auditors."

of the [name or type of] system and of the suitability of the design of controls to achieve the related control objectives stated in the description of the [name or type of] system.

[A statement such as the following is added to the report when the service organization uses a subservice organization, the carve-out method is used to present the subservice organization, and complementary subservice organization controls are required to meet the control objectives.]

XYZ Service Organization uses a subservice organization to [identify the function or service provided by the subservice organization]. The description includes only the control objectives and related controls of XYZ Service Organization and excludes the control objectives and related controls of the subservice organization. The description also indicates that certain control objectives specified by XYZ Service Organization can be achieved only if complementary subservice organization controls assumed in the design of XYZ Service Organization's controls are suitably designed and operating effectively, along with the related controls at XYZ Service Organization. Our examination did not extend to controls of the subservice organization, and we have not evaluated the design or operating effectiveness of such complementary subservice organization controls.

[A statement such as the following is added to the assertion when complementary user entity controls are required to meet the control objectives.]

The description indicates that certain control objectives specified in the description can be achieved only if complementary user entity controls assumed in the design of XYZ Service Organization's controls are suitably designed and operating effectively, along with related controls at the service organization. Our examination did not extend to such complementary user entity controls, and we have not evaluated the suitability of the design or operating effectiveness of such complementary user entity controls.

Service Organization's Responsibilities

In [section number where assertion is presented], XYZ Service Organization has provided an assertion about the fairness of the presentation of the description and suitability of the design of the controls to achieve the related control objectives stated in the description. XYZ Service Organization is responsible for preparing the description and its assertion, including the completeness, accuracy, and method of presentation of the description and assertion, providing the services covered by the description, specifying the control objectives and stating them in the description, identifying the risks that threaten the achievement of the control objectives, selecting the criteria stated in the assertion, and designing, implementing, and documenting controls that are suitably designed and operating effectively to achieve the related control objectives stated in the description.

Service Auditor's Responsibilities

Our responsibility is to express an opinion on the fairness of the presentation of the description and on the suitability of the design of the controls to achieve the related control objectives stated in the description, based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, in all material respects, based on the criteria in management's assertion, the description is fairly presented and the controls were suitably designed to achieve the related

control objectives stated in the description as of [date]. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

An examination of a description of a service organization's system and the suitability of the design of controls involves

- performing procedures to obtain evidence about the fairness of the presentation of the description and the suitability of the design of the controls to achieve the related control objectives stated in the description, based on the criteria in management's assertion.
- assessing the risks that the description is not fairly presented and that the controls were not suitably designed to achieve the related control objectives stated in the description.
- evaluating the overall presentation of the description, suitability of the control objectives stated in the description, and suitability of the criteria specified by the service organization in its assertion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Inherent Limitations

The description is prepared to meet the common needs of a broad range of user entities and their auditors who audit and report on user entities' financial statements and may not, therefore, include every aspect of the system that each individual user entity may consider important in its own particular environment. Because of their nature, controls at a service organization may not prevent, or detect and correct, all misstatements in processing or reporting transactions [or *identification of the function performed by the system*]. Also, the projection to the future of any evaluation of the fairness of the presentation of the description, or conclusions about the suitability of the design of the controls to achieve the related control objectives, is subject to the risk that controls at a service organization may become ineffective.

Other Matter

We did not perform any procedures regarding the operating effectiveness of controls stated in the description and, accordingly, do not express an opinion thereon.

Opinion

In our opinion, in all material respects, based on the criteria described in XYZ Service Organization's assertion

- a. the description fairly presents the [type or name of] system that was designed and implemented as of [date].
- b. the controls related to the control objectives stated in the description were suitably designed to provide reasonable assurance that the control objectives would be achieved if the controls operated effectively as of [date] **and subservice organizations and user entities applied the complementary controls assumed in the design of XYZ Service Organization's controls as of [date].**

Restricted Use

This report is intended solely for the information and use of management of XYZ Service Organization, user entities of XYZ Service Organization's [type or name of] system as of [date], and their auditors who audit and report on such user entities' financial statements or internal control over financial reporting and have a sufficient understanding to consider it, along with other

information, including information about controls implemented by user entities themselves, when assessing the risks of material misstatements of user entities' financial statements. This report is not intended to be, and should not be, used by anyone other than the specified parties.

[Service auditor's signature]

[Date of the service auditor's report]

[Revised, June 2022, to reflect conforming changes necessary due to the issuance of SSAE No. 21.]

.A76

Exhibit B — Illustrative Assertions by Management of a Service Organization

Paragraph .10b(vi) indicates that one of the preconditions for a service auditor to accept or continue an engagement is that management acknowledge and accept responsibility for providing a written assertion that accompanies management's description of the service organization's system. Paragraph .A18 indicates that the service organization has the option of attaching the assertion to the description of the service organization's system or including it in the description and clearly segregating the assertion from the description, for example, through the use of headings. Segregating the assertion from the description clarifies that the assertion is not part of the description.

The following illustrative management assertions contain text in boldface italics that would be added to management's assertion if the situation described in the text is applicable. These illustrative assertions are for guidance only and are not intended to be exhaustive or applicable to all situations.

Example 1: Assertion by Management of a Service Organization for a Type 2 Report

XYZ Service Organization's Assertion

We have prepared the description of XYZ Service Organization's *[type or name of]* system entitled, "XYZ Service Organization's Description of Its *[type or name of]* System," for processing user entities' transactions *[or identification of the function performed by the system]* throughout the period *[date]* to *[date]* (description) for user entities of the system during some or all of the period *[date]* to *[date]*, and their auditors who audit and report on such user entities' financial statements or internal control over financial reporting and have a sufficient understanding to consider it, along with other information, ***including information about controls implemented by subservice organizations and user entities of the system themselves***, when assessing the risks of material misstatement of user entities' financial statements.

[A statement such as the following is added to the assertion when the service organization uses a subservice organization, the carve-out method is used to present the subservice organization, and complementary subservice organization controls are required to meet the control objectives.]

XYZ Service Organization uses a subservice organization to [identify the function or service provided by the subservice organization]. The description includes only the control objectives and related controls of XYZ Service Organization and excludes the control objectives and related controls of the subservice organization. The description also indicates that certain control objectives specified in the description can be achieved only if complementary subservice organization controls assumed in the design of our controls are suitably designed and operating effectively, along with the related controls at the service organization. The description does not extend to controls of the subservice organization.

[A statement such as the following is added to the service auditor's report when complementary user entity controls are required to meet the control objectives.]

The description indicates that certain control objectives specified in the description can be achieved only if complementary user entity controls

assumed in the design of XYZ Service Organization's controls are suitably designed and operating effectively, along with related controls at the service organization. The description does not extend to controls of the user entities.

We confirm, to the best of our knowledge and belief, that

- a. the description fairly presents the [type or name of] system made available to user entities of the system during some or all of the period [date] to [date] for processing their transactions [or identification of the function performed by the system] as it relates to controls that are likely to be relevant to user entities' internal control over financial reporting. The criteria we used in making this assertion were that the description
 - i. presents how the system made available to user entities of the system was designed and implemented to process relevant user entity transactions, including, if applicable,
 - (1) the types of services provided, including, as appropriate, the classes of transactions processed.
 - (2) the procedures, within both automated and manual systems, by which those services are provided, including, as appropriate, procedures by which transactions are initiated, authorized, recorded, processed, corrected as necessary, and transferred to the reports and other information prepared for user entities of the system.
 - (3) the information used in the performance of the procedures including, if applicable, related accounting records, whether electronic or manual, and supporting information involved in initiating, authorizing, recording, processing, and reporting transactions; this includes the correction of incorrect information and how information is transferred to the reports and other information prepared for user entities.
 - (4) how the system captures and addresses significant events and conditions other than transactions.
 - (5) the process used to prepare reports and other information for user entities.
 - (6) services performed by a subservice organization, if any, including whether the carve-out method or the inclusive method has been used in relation to them.
 - (7) the specified control objectives and controls designed to achieve those objectives, including, as applicable, complementary user entity controls and complementary subservice organization controls assumed in the design of the service organization's controls.
 - (8) other aspects of our control environment, risk assessment process, information and communications (including the related business processes), control activities, and monitoring activities that are relevant to the services provided.

- ii. includes relevant details of changes to the service organization's system during the period covered by the description.
 - iii. does not omit or distort information relevant to the service organization's system, while acknowledging that the description is prepared to meet the common needs of a broad range of user entities of the system and their user auditors, and may not, therefore, include every aspect of the [type or name of] system that each individual user entity of the system and its auditor may consider important in its own particular environment.
- b. the controls related to the control objectives stated in the description were suitably designed and operating effectively throughout the period [date] to [date] to achieve those control objectives ***if subservice organizations and user entities applied the complementary controls assumed in the design of XYZ Service Organization's controls throughout the period [date] to [date].*** The criteria we used in making this assertion were that
- i. the risks that threaten the achievement of the control objectives stated in the description have been identified by management of the service organization.
 - ii. the controls identified in the description would, if operating effectively, provide reasonable assurance that those risks would not prevent the control objectives stated in the description from being achieved.
 - iii. the controls were consistently applied as designed, including whether manual controls were applied by individuals who have the appropriate competence and authority.

Example 2: Assertion by Management of a Service Organization for a Type 1 Report

XYZ Service Organization's Assertion

We have prepared the description of XYZ Service Organization's [type or name of] system entitled, "XYZ Service Organization's Description of Its [type or name of] System," for processing user entities' transactions [or identification of the function performed by the system] as of [date] (description) for user entities of the system as of [date], and their auditors who audit and report on such user entities' financial statements or internal control over financial reporting and have a sufficient understanding to consider it, along with other information, including information about controls ***implemented by subservice organizations and user entities themselves***, when obtaining an understanding of user entities' information and communication systems relevant to financial reporting.

[A statement such as the following is added to the assertion when the service organization uses a subservice organization, the carve-out method is used to present the subservice organization, and complementary subservice organization controls are required to meet the control objectives.]

XYZ Service Organization uses a subservice organization to [identify the function or service provided by the subservice organization]. The description includes only the control objectives and related controls of XYZ Service Organization and excludes the control objectives and related controls of the subservice organization(s). The description also indicates that certain control objectives specified in the description can

be achieved only if complementary subservice organization controls assumed in the design of our controls are suitably designed and operating effectively, along with the related controls at the service organization. The description does not extend to controls of the subservice organization.

[A statement such as the following is added to the service auditor's report when complementary user entity controls are required to meet the control objectives.]

The description indicates that certain control objectives specified in the description can be achieved only if complementary user entity controls assumed in the design of XYZ Service Organization's controls are suitably designed and operating effectively, along with related controls at the service organization. The description does not extend to controls of the user entities.

We confirm, to the best of our knowledge and belief, that

- a. the description fairly presents the [type or name of] system made available to user entities of the system as of [date] for processing their transactions [or identification of the function performed by the system] as it relates to controls that are likely to be relevant to user entities' internal control over financial reporting. The criteria we used in making this assertion were that the description
 - i. presents how the system made available to user entities of the system was designed and implemented to process relevant transactions, including, if applicable
 - (1) the types of services provided, including, as appropriate, the classes of transactions processed.
 - (2) the procedures, within both automated and manual systems, by which those services are provided, including, as appropriate, procedures by which transactions are initiated, authorized, recorded, processed, corrected as necessary, and transferred to the reports and other information prepared for user entities of the system.
 - (3) the information used in the performance of the procedures including, if applicable, related accounting records, whether electronic or manual, and supporting information involved in initiating, authorizing, recording, processing, and reporting transactions; this includes the correction of incorrect information and how information is transferred to the reports and other information prepared for user entities.
 - (4) how the system captures and addresses significant events and conditions other than transactions.
 - (5) the process used to prepare reports and other information for user entities.
 - (6) services performed by a subservice organization, if any, including whether the carve-out method or the inclusive method has been used in relation to them.
 - (7) the specified control objectives and controls designed to achieve those objectives, including, as

applicable, complementary user entity controls and complementary subservice organization controls assumed in the design of the service organization's controls.

- (8) other aspects of our control environment, risk assessment process, information and communication systems (including the related business processes), control activities, and monitoring activities that are relevant to the services provided.
 - ii. does not omit or distort information relevant to the service organization's system, while acknowledging that the description is prepared to meet the common needs of a broad range of user entities of the system and their user auditors, and may not, therefore, include every aspect of the [type or name of] system that each individual user entity of the system and its auditor may consider important in its own particular environment.
 - b. the controls related to the control objectives stated in the description were suitably designed as of [date] to achieve those control objectives ***if subservice organizations and user entities applied the complementary controls assumed in the design of XYZ Service Organization's controls as of [date].*** The criteria we used in making this assertion were that
 - i. the risks that threaten the achievement of the control objectives stated in the description have been identified by management of the service organization.
 - ii. the controls identified in the description would, if operating effectively, provide reasonable assurance that those risks would not prevent the control objectives stated in the description from being achieved.
-

AT-C Section 395****[Designated for AT Section 701,
Management's Discussion and Analysis]*****NOTE**

SSAE No. 18 does not supersede chapter 7, "Management's Discussion and Analysis," of SSAE No. 10, *Attestation Standards: Revision and Recodification*, which is currently codified as AT section 701.

The Auditing Standards Board (ASB) has not clarified AT section 701 because practitioners rarely perform attest engagements to report on management's discussion and analysis prepared pursuant to the rules and regulations adopted by the U.S. Securities and Exchange Commission. Therefore, the ASB decided that it would retain AT section 701 in its current unclarified format as section 395 until further notice.

AT Section 701—Management's Discussion and Analysis

Source: SSAE No. 10.

Effective when management's discussion and analysis is for a period ending on or after June 1, 2001. Earlier application is permitted.

General

.01 This section sets forth attestation standards and provides guidance to a practitioner concerning the performance of an attest engagement¹ with respect to management's discussion and analysis (MD&A) prepared pursuant to the rules and regulations adopted by the Securities and Exchange Commission (SEC), which are presented in annual reports to shareholders and in other documents.²

Applicability

.02 This section is applicable to the following levels of service when a practitioner is engaged by (a) a public³ entity that prepares MD&A in accordance

* This section contains an "AT-C" identifier, instead of an "AT" identifier, to avoid confusion with references to existing "AT" sections, which remain effective through April 2017.

¹ Paragraph .01 of section 101, *Attest Engagements*, defines an attest engagement as one in which a practitioner "is engaged to issue or does issue an examination, a review, or an agreed-upon procedures report on subject matter, or an assertion about the subject matter (hereafter referred to as the *assertion*), that is the responsibility of another party."

² Because this section provides guidance specific to attest engagements concerning MD&A presentations, a practitioner should not perform a compliance attestation engagement under section 601, *Compliance Attestation*, with respect to an MD&A presentation.

³ For purposes of this section, a public entity is any entity (a) whose securities trade in a public market either on a stock exchange (domestic or foreign) or in the over-the-counter (OTC) market, including securities quoted only locally or regionally, (b) that makes a filing with a regulatory agency in preparation for the sale of any class of its securities in a public market, or (c) a subsidiary, corporate joint venture, or other entity controlled by an entity covered by (a) or (b).

with the rules and regulations adopted by the SEC (see paragraph .04) or (b) a nonpublic entity that prepares an MD&A presentation and whose management provides a written assertion that the presentation has been prepared using the rules and regulations adopted by the SEC:⁴

- An examination of an MD&A presentation
- A review of an MD&A presentation for an annual period, an interim period, or a combined annual and interim period⁵

A practitioner⁶ engaged to examine or review MD&A and report thereon should comply with the general, fieldwork, and reporting standards established in section 50, *SSAE Hierarchy*, and the specific standards set forth in this section. A practitioner engaged to perform agreed-upon procedures on MD&A should follow the guidance set forth in section 201, *Agreed-Upon Procedures Engagements*.⁷ [Revised, November 2006, to reflect conforming changes necessary due to the issuance of SSAE No. 14.]

.03 This section does not—

- a. Change the auditor's responsibility in an audit of financial statements performed in accordance with generally accepted auditing standards (GAAS).
- b. Apply to situations in which the practitioner is requested to provide management with recommendations to improve the MD&A rather than to provide assurance. A practitioner engaged to provide such nonattest services should refer to CS section 100, *Consulting Services: Definitions and Standards*.
- c. Apply to situations in which the practitioner is engaged to provide attest services with respect to an MD&A presentation that is prepared based on criteria other than the rules and regulations adopted by the SEC. A practitioner engaged to perform an examination or a review based upon such criteria should refer to the guidance in section 101, or to section 201 if engaged to perform an agreed-upon procedures engagement.⁸

⁴ Such assertion may be made by any of the following:

- (a) Including a statement in the body of the MD&A presentation that it has been prepared using the rules and regulations adopted by the SEC.
- (b) Providing a separate written assertion to accompany the MD&A presentation.
- (c) Providing a written assertion in a representation letter to the practitioner.

⁵ As discussed in paragraph .85*k*, a review report is not intended to be filed with the SEC as a report under the Securities Act of 1933 (the 1993 Act) or the Securities Exchange Act of 1934 (the 1934 Act) and, accordingly, the review report should contain a statement of restrictions on the use of the report to specified parties if the entity is (a) a public entity or (b) a nonpublic entity that is making or has made an offering of securities and it appears that the securities may subsequently be registered or subject to a filing with the SEC or other regulatory agency.

⁶ In this section, the terms *practitioner* or *accountant* generally refer to a person engaged to perform an attest service on MD&A. The term *accountant* may also refer to a person engaged to review financial statements. The term *auditor* refers to a person engaged to audit financial statements. As this section includes certain requirements for the practitioner to have audited or performed a review of financial statements in accordance with AU-C section 930, *Interim Financial Information*, the terms *auditor*, *practitioner*, or *accountant* may refer, in this section, to the same person. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

⁷ Practitioners should follow guidance in AU-C section 920, *Letters for Underwriters and Certain Other Requesting Parties*, when requested to perform agreed-upon procedures on MD&A and report thereon in a letter for an underwriter. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

⁸ The guidance in this section may be helpful when performing an engagement to provide attest services with respect to an MD&A presentation that is based on criteria other than the rules and regulations adopted by the SEC. Such other criteria would have to be suitable and available as discussed in paragraphs .23–.33 of section 101.

.04 The requirements for MD&A have changed periodically since the first requirement was adopted by the SEC in 1974. As of the date of issuance of this SSAE, the rules and regulations for MD&A adopted by the SEC are found in Item 303 of Regulation S-K, as interpreted by Financial Reporting Release (FRR) No. 36, *Management's Discussion and Analysis of Financial Condition and Results of Operations; Certain Investment Company Disclosures* (Chapter 5 of the "Codification of Financial Reporting Policies"); Item 303 of Regulation S-B for small business issuers; and Item 9 of Form 20-F for Foreign Private Issuers.⁹ Item 303 of Regulation S-K, as interpreted by FRR No. 36, Item 303 of Regulation S-B for small business issuers, and Item 9 of Form 20-F for Foreign Private Issuers, provide the relevant rules and regulations adopted by the SEC that meet the definition of suitable criteria in paragraphs .23–.32 of section 101. The practitioner should consider whether the SEC has adopted additional rules and regulations with respect to MD&A subsequent to the issuance of this section.

Conditions for Engagement Performance

Examination

.05 The practitioner's objective in an engagement to examine MD&A is to express an opinion on the MD&A presentation taken as a whole by reporting whether—

- a. The presentation includes, in all material respects, the required elements of the rules and regulations adopted by the SEC.¹⁰
- b. The historical financial amounts have been accurately derived, in all material respects, from the entity's financial statements.¹¹
- c. The underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained therein.¹²

.06 A practitioner may accept an engagement to examine MD&A of a public or nonpublic entity, provided the practitioner audits, in accordance with GAAS,¹³ the financial statements for at least the latest period to which the

⁹ The SEC staff from time to time issues guidance related to the SEC's adopted requirements; for example, Staff Accounting Bulletins (SABs), Staff Legal Bulletins, and speeches. Although such guidance may provide additional information with respect to the adopted requirements for MD&A, the practitioner should not be expected to attest to assertions on compliance with such guidance. The practitioner may find it helpful to also familiarize himself or herself with material contained on the SEC's website www.sec.gov that provides further information with respect to the SEC's views concerning MD&A disclosures.

¹⁰ The required elements as of the date of issuance of this SSAE include a discussion of the entity's financial condition, changes in financial condition, and results of operations, including a discussion of liquidity and capital resources.

¹¹ Whether historical financial amounts are accurately derived from the financial statements includes both amounts that are derived from the face of the financial statements (which includes the notes to the financial statements) and financial statement schedules and those that are derived from underlying records supporting elements, accounts, or items included in the financial statements.

¹² Whether the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained therein requires consideration of management's interpretation of the disclosure criteria for MD&A, management's determinations as to the relevancy of information to be included, and estimates and assumptions made by management that affect reported information.

¹³ Restrictions on the scope of the audit of the financial statements will not necessarily preclude the practitioner from accepting an engagement to examine MD&A. Note that the SEC will generally not accept an auditor's report that is modified for a scope limitation. The practitioner should consider the nature and magnitude of the scope limitation and the form of the auditor's report in assessing whether an examination of MD&A could be performed.

MD&A presentation relates and the financial statements for the other periods covered by the MD&A presentation have been audited by the practitioner or a predecessor auditor. A base knowledge of the entity and its operations gained through an audit of the historical financial statements and knowledge about the industry and the environment is necessary to provide the practitioner with sufficient knowledge to properly evaluate the results of the procedures performed in connection with the examination.

.07 If a predecessor auditor has audited the financial statements for a prior period covered by the MD&A presentation, the practitioner (the successor auditor) should also consider whether, under the particular circumstances, he or she can acquire sufficient knowledge of the business and of the entity's accounting and financial reporting practices for such period so that he or she would be able to—

- a. Identify types of potential material misstatements in MD&A and consider the likelihood of their occurrence.
- b. Perform the procedures that will provide the practitioner with a basis for expressing an opinion as to whether the MD&A presentation includes, in all material respects, the required elements of the rules and regulations adopted by the SEC.
- c. Perform the procedures that will provide the practitioner with a basis for expressing an opinion on the MD&A presentation with respect to whether the historical financial amounts have been accurately derived, in all material respects, from the entity's financial statements for such period.
- d. Perform the procedures that will provide the practitioner with a basis for expressing an opinion as to whether the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained therein.

Refer to paragraphs .99–.101 for guidance regarding the review of the predecessor auditor's working papers.

Review

.08 The objective of a review of MD&A is to report whether any information came to the practitioner's attention to cause him or her to believe that—

- a. The MD&A presentation does not include, in all material respects, the required elements of the rules and regulations adopted by the SEC.
- b. The historical financial amounts included therein have not been accurately derived, in all material respects, from the entity's financial statements.
- c. The underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures contained therein.

A review consists principally of applying analytical procedures and making inquiries of persons responsible for financial, accounting, and operational matters. A review ordinarily does not contemplate (a) tests of accounting records through inspection, observation, or confirmation, (b) obtaining corroborating evidential matter in response to inquiries, or (c) the application of certain other procedures ordinarily performed during an examination of MD&A. A review may bring to the practitioner's attention significant matters affecting the

MD&A, but it does not provide assurance that the practitioner will become aware of all significant matters that would be disclosed in an examination.

.09 A practitioner may accept an engagement to review the MD&A presentation of a public entity for an annual period provided the practitioner has audited, in accordance with GAAS, the financial statements for at least the latest annual period to which the MD&A presentation relates and the financial statements for the other periods covered by the MD&A presentation have been audited by the practitioner or a predecessor auditor.¹⁴ A base knowledge of the entity and its operations gained through an audit of the historical financial statements and knowledge about the industry and the environment is necessary to provide the practitioner with sufficient knowledge to properly evaluate the results of the procedures performed in connection with the review.

.10 If a predecessor auditor has audited the financial statements for a prior period covered by the MD&A presentation, the practitioner should also consider whether, under the particular circumstances, he or she can acquire sufficient knowledge of the business and of the entity's accounting and financial reporting practices for such period so he or she would be able to—

- a. Identify types of potential material misstatements in the MD&A and consider the likelihood of their occurrence.
- b. Perform the procedures that will provide the practitioner with a basis for reporting whether any information has come to the practitioner's attention to cause him or her to believe any of the following.
 - (1) The MD&A presentation does not include, in all material respects, the required elements of the rules and regulations adopted by the SEC.
 - (2) The historical financial amounts included therein have not been accurately derived, in all material respects, from the entity's financial statements for such period.
 - (3) The underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures contained therein.

.11 A practitioner may accept an engagement to review the MD&A presentation of a public entity for an interim period provided that both of the following conditions are met.

- a. The practitioner performs either (1) a review of the historical financial statements for the related comparative interim periods and issues a review report thereon in accordance with AU-C section 930, *Interim Financial Information*, or (2) an audit of the interim financial statements.
- b. The MD&A presentation for the most recent fiscal year has been or will be examined or reviewed by either the practitioner or a predecessor auditor.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

¹⁴ As discussed in paragraph .85*k*, a review report is not intended to be filed with the SEC as a report under the 1933 Act or the 1934 Act and, accordingly, the review report should contain a statement of restrictions on the use of the report to specified parties if the entity is (a) a public entity or (b) a nonpublic entity that is making or has made an offering of securities and it appears that the securities may subsequently be registered or subject to a filing with the SEC or other regulatory agency.

.12 If a predecessor auditor examined or reviewed the MD&A presentation of a public entity for the most recent fiscal year, the practitioner should not accept an engagement to review the MD&A presentation for an interim period unless he or she can acquire sufficient knowledge of the business and of the entity's accounting and financial reporting practices for the interim period to perform the procedures described in paragraph .10.

.13 If a nonpublic entity chooses to prepare MD&A, the practitioner should not accept an engagement to perform a review of such MD&A for an annual period under this section unless both of the following conditions are met.

- a. The annual financial statements for the periods covered by the MD&A presentation have been or will be audited and the practitioner has audited or will audit the most recent year (refer to paragraph .07 if the financial statements for prior years were audited by a predecessor auditor).
- b. Management will provide a written assertion that the presentation has been prepared using the rules and regulations adopted by the SEC as the criteria. (See paragraph .02.)

.14 A practitioner may accept an engagement to review the MD&A presentation of a nonpublic entity for an interim period provided that all of the following conditions are met.

- a. The practitioner performs one of the following:
 - (1) A review of the historical financial statements for the related interim periods under the Statements on Standards for Accounting and Review Services (SSARs) and issues a review report thereon
 - (2) A review of the condensed interim financial information for the related interim periods under AU-C section 930 and issues a review report thereon, and such interim financial information is accompanied by complete annual financial statements for the most recent fiscal year that have been audited
 - (3) An audit of the interim financial statements
- b. The MD&A presentation for the most recent fiscal year has been or will be examined or reviewed.
- c. Management will provide a written assertion stating that the presentation has been prepared using the rules and regulations adopted by the SEC as the criteria. (See paragraph .02.)

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Engagement Acceptance Considerations

.15 In determining whether to accept an engagement, the practitioner should consider whether management (and others engaged by management to assist them, such as legal counsel) has the appropriate knowledge of the rules and regulations adopted by the SEC to prepare MD&A.

Responsibilities of Management

.16 Management is responsible for the preparation of the entity's MD&A pursuant to the rules and regulations adopted by the SEC. The preparation of MD&A in conformity with the rules and regulations adopted by the SEC

requires management to interpret the criteria, accurately derive the historical amounts from the entity's books and records, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information.

.17 An entity should not name the practitioner in a client-prepared document as having examined or reviewed MD&A unless the MD&A presentation and related practitioner's report and the related financial statements and auditor's (or accountant's review) report are included in the document (or, in the case of a public entity, incorporated by reference to such information filed with a regulatory agency). If such a statement is made in a document that does not include (or incorporate by reference) such information, the practitioner should request that neither his or her name nor reference to the practitioner be made with respect to the MD&A information, or that such document be revised to include the required presentations and reports. If the client does not comply, the practitioner should advise the client that he or she does not consent to either the use of his or her name or the reference to the practitioner, and he or she should consider what other actions might be appropriate.¹⁵

Obtaining an Understanding of the SEC Rules and Regulations and Management's Methodology for the Preparation of MD&A

.18 The practitioner should obtain an understanding of the rules and regulations adopted by the SEC for MD&A. (Refer to paragraph .04.)

.19 The practitioner should inquire of management regarding the method of preparing MD&A, including matters such as the sources of the information, how the information is gathered, how management evaluates the types of factors having a material effect on financial condition (including liquidity and capital resources), results of operations, and cash flows, and whether there have been any changes in the procedures from the prior year.

Timing of Procedures

.20 Proper planning by the practitioner contributes to the effectiveness of the attest procedures in an examination or a review of MD&A. Performing some of the work in conjunction with the audit of the historical financial statements or the review of interim financial statements may permit the work to be carried out in a more efficient manner and to be completed at an earlier date. When performing an examination or a review of MD&A, the practitioner may consider the results of tests of controls, analytical procedures,¹⁶ and substantive tests performed in a financial statement audit or analytical procedures and inquiries made in a review of financial statements or interim financial information.

¹⁵ In considering what other actions, if any, may be appropriate in these circumstances, the practitioner may wish to consult his or her legal counsel.

¹⁶ AU-C section 520, *Analytical Procedures*, defines analytical procedures as "evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass such investigation, as is necessary, of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount." In applying analytical procedures to MD&A, the practitioner develops expectations of matters that would be discussed in MD&A by identifying and using plausible relationships that are reasonably expected to exist based on the practitioner's understanding of the client and of the industry in which the client operates, and the knowledge of relationships among the various financial elements gained through the audit of financial statements or review of interim financial information. Refer to AU-C section 520 for further discussion of analytical procedures. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Materiality

.21 The practitioner should consider the concept of materiality in planning and performing the engagement. The objective of an examination or a review is to report on the MD&A presentation taken as a whole and not on the individual amounts and disclosures contained therein. In the context of an MD&A presentation, the concept of materiality encompasses both material omissions (for example, the omission of trends, events, and uncertainties that are currently known to management that are reasonably likely to have material effects on the entity's financial condition, results of operations, liquidity, or capital resources) and material misstatements in MD&A, both of which are referred to herein as a misstatement. Assessing the significance of a misstatement of some items in MD&A may be more dependent upon qualitative than quantitative considerations. Qualitative aspects of materiality relate to the relevance and reliability of the information presented (for example, qualitative aspects of materiality are considered in assessing whether the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures in the MD&A). Furthermore, quantitative information is often more meaningful when accompanied by qualitative disclosures. For example, quantitative information about market risk-sensitive instruments is more meaningful when accompanied by qualitative information about an entity's market risk exposures and how those exposures are managed. Materiality is also a concept that is judged in light of the expected range of reasonableness of the information; therefore, users should not expect prospective information (information about events that have not yet occurred) to be as precise as historical information.

.22 In expressing an opinion, or providing the limited assurance of a review engagement, on the presentation, the practitioner should consider the omission or misstatement of an individual assertion (see paragraph .34) to be material if the magnitude of the omission or misstatement—individually or when aggregated with other omissions or misstatements—is such that a reasonable person using the MD&A presentation would be influenced by the inclusion or correction of the individual assertion. The relative rather than absolute size of an omission or misstatement may determine whether it is material in a given situation.

Inclusion of Pro Forma Financial Information

.23 Management may include pro forma financial information with respect to a business combination or other transactions in MD&A. The practitioner should consider the guidance in paragraph .10 of section 401, *Reporting on Pro Forma Financial Information*, when performing procedures with respect to such information, even if management indicates in MD&A that certain information has been derived from unaudited financial statements. For example, in an examination of MD&A, the practitioner's procedures would ordinarily include obtaining an understanding of the underlying transaction or event, discussing with management their assumptions, obtaining sufficient evidence in support of the adjustments, and other procedures for the purpose of expressing an opinion on the MD&A presentation taken as a whole and not for expressing an opinion on (or providing the limited assurance of a review of) the pro forma financial information included therein under section 401.

Inclusion of External Information

.24 An entity may also include in its MD&A information external to the entity, such as the rating of its debt by certain rating agencies or comparisons

with statistics from a trade association. Such external information should also be subjected to the practitioner's examination or review procedures. For example, in an examination, the practitioner might compare information concerning the statistics of a trade organization to a published source; however, the practitioner would not be expected to test the underlying support for the trade association's calculation of such statistics.

Inclusion of Forward-Looking Information

.25 An entity may include certain forward-looking disclosures in the MD&A presentation, including cautionary language concerning the achievability of the matters disclosed. Although any forward-looking disclosures that are included in the MD&A presentation should be subjected to the practitioner's examination or review, such information is subjected to testing only for the purpose of expressing an opinion that the underlying information, determinations, estimates, and assumptions provide a reasonable basis for the disclosures contained therein or providing the limited assurance of a review on the MD&A presentation taken as a whole. The practitioner may consider the guidance in section 301, *Financial Forecasts and Projections*, when performing procedures with respect to forward-looking information. The practitioner may also consider whether meaningful cautionary language has been included with the forward-looking information.

.26 Section 27A of the Securities Act of 1933 (the 1933 Act) and Section 21E of the Securities Exchange Act of 1934 (the 1934 Act) provide a safe harbor from liability in private litigation with respect to forward-looking statements that include or make reference to meaningful cautionary language. However, such sections also include exclusions from safe harbor protection in certain situations. Whether an entity's forward-looking statements and the practitioner's report thereon qualify for safe harbor protection is a legal matter.

Inclusion of Voluntary Information

.27 An entity may voluntarily include other information in the MD&A presentation that is not required by the rules and regulations adopted by the SEC for MD&A. When the entity includes in MD&A additional information required by other rules and regulations of the SEC (for example, Item 305 of Regulation S-K, *Quantitative and Qualitative Disclosures About Market Risk*), the practitioner should also consider such other rules and regulations in subjecting such information to his or her examination or review procedures.¹⁷

Examination Engagement

.28 To express an opinion about whether (a) the presentation includes, in all material respects, the required elements of the rules and regulations adopted by the SEC, (b) the historical financial amounts have been accurately derived, in all material respects, from the entity's financial statements, and (c) the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained therein, the practitioner seeks to obtain reasonable assurance by accumulating sufficient evidence in support of the disclosures and assumptions, thereby restricting attestation risk to an appropriately low level.

¹⁷ To the extent that the voluntary information includes forward-looking information, refer to paragraphs .25–.26.

Attestation Risk

.29 In an engagement to examine MD&A, the practitioner plans and performs the examination to obtain reasonable assurance of detecting both intentional and unintentional misstatements that are material to the MD&A presentation taken as a whole. Absolute assurance is not attainable because of factors such as the need for judgment regarding the areas to be tested and the nature, timing, and extent of tests to be performed; the concept of selective testing of the data; and the inherent limitations of the controls applicable to the preparation of MD&A. The practitioner exercises professional judgment in assessing the significant determinations made by management as to the relevancy of information to be included, and the estimates and assumptions that affect reported information. As a result of these factors, in the great majority of cases, the practitioner has to rely on evidence that is persuasive rather than convincing. Also, procedures may be ineffective for detecting an intentional misstatement that is concealed through collusion among client personnel and third parties or among management or employees of the client. Therefore, the subsequent discovery that a material misstatement exists in the MD&A does not, in and of itself, evidence (a) failure to obtain reasonable assurance; (b) inadequate planning, performance, or judgment on the part of the practitioner; (c) the absence of due professional care; or (d) a failure to comply with this section.

.30 Factors to be considered by the practitioner in planning an examination of MD&A include (a) the anticipated level of attestation risk related to assertions embodied in the MD&A presentation, (b) preliminary judgments about materiality for attest purposes, (c) the items within the MD&A presentation that are likely to require revision or adjustment, and (d) conditions that may require extension or modification of attest procedures. For purposes of an engagement to examine MD&A, the components of attestation risk are defined as follows.

- a. *Inherent risk* is the susceptibility of an assertion within MD&A to a material misstatement, assuming that there are no related controls. (See paragraphs .34–.38.)
- b. *Control risk* is the risk that a material misstatement that could occur in an assertion within MD&A will not be prevented or detected on a timely basis by the entity's controls; some control risk will always exist because of the inherent limitations of any internal control.
- c. *Detection risk* is the risk that the practitioner will not detect a material misstatement that exists in an assertion within MD&A.

Inherent Risk

.31 The level of inherent risk varies with the nature of the assertion. For example, the inherent risk concerning financial information included in the MD&A presentation may be low, whereas the inherent risk concerning the completeness of the disclosure of the entity's risks or liquidity may be high.

Control Risk

.32 The practitioner should assess control risk as discussed in paragraphs .53–.57. Assessing control risk contributes to the practitioner's evaluation of the risk that material misstatement in the MD&A exists. In the process of assessing control risk (together with assessing inherent risk), the practitioner may obtain evidential matter about the risk that such misstatement may exist. The practitioner uses this evidential matter as part of the reasonable basis for his or her opinion on the MD&A presentation taken as a whole.

Detection Risk

.33 In determining an acceptable level of detection risk, the practitioner assesses inherent risk and control risk, and considers the extent to which he or she seeks to restrict attestation risk. As assessed inherent risk or control risk decreases, the acceptable level of detection risk increases. Accordingly, the practitioner may alter the nature, timing, and extent of tests performed based on the assessments of inherent risk and control risk.

Nature of Assertions

.34 Assertions are representations by management that are embodied in the MD&A presentation. They can be either explicit or implicit and can be classified according to the following broad categories:

- a. Occurrence
- b. Consistency with the financial statements
- c. Completeness
- d. Presentation and disclosure

.35 Assertions about occurrence address whether reported transactions or events have occurred during a given period. Assertions about consistency with the financial statements address whether—

- a. Reported transactions, events, and explanations are consistent with the financial statements.
- b. Historical financial amounts have been accurately derived from the financial statements and related records.
- c. Nonfinancial data have been accurately derived from related records.

.36 Assertions about completeness address whether descriptions of transactions and events necessary to obtain an understanding of the entity's financial condition (including liquidity and capital resources), changes in financial condition, results of operations, and material commitments for capital resources are included in MD&A; and whether known events, transactions, conditions, trends, demands, commitments, or uncertainties that will result in or are reasonably likely to result in material changes to these items are appropriately described in the MD&A presentation.

.37 For example, if management asserts that the reason for an increase in revenues is a price increase in the current year, they are explicitly asserting that both an increase in revenues and a price increase have occurred in the current year, and implicitly asserting that any historical financial amounts included are consistent with the financial statements for such period. They are also implicitly asserting that the explanation for the increase in revenues is complete; that there are no other significant reasons for the increase in revenues.

.38 Assertions about presentation and disclosure address whether information included in the MD&A presentation is properly classified, described, and disclosed. For example, management asserts that any forward-looking information included in MD&A is properly classified as being based on management's present assessment and includes an appropriate description of the expected results. To further disclose the nature of such information, management may also include a statement that actual results in the future may differ materially from management's present assessment. (See paragraphs .25–.26.)

.39 The auditor of the underlying financial statements is responsible for designing and performing audit procedures to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the auditor's opinion, as discussed in AU-C section 500, *Audit Evidence*. Although procedures designed to achieve the practitioner's objective of forming an opinion on the MD&A presentation taken as a whole may test certain assertions embodied in the underlying financial statements, the practitioner is not expected to test the underlying financial statement assertions in an examination of MD&A. For example, the practitioner is not expected to test the completeness of revenues or the existence of inventory when testing the assertions in MD&A concerning an increase in revenues or an increase in inventory levels; assurance related to completeness of revenues or for existence of inventory would be obtained as part of the audit. The practitioner is, however, responsible for testing the completeness of the explanation for the increase in revenues or the increase in inventory levels. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Performing an Examination Engagement

.40 The practitioner should exercise (a) due professional care in planning, performing, and evaluating the results of his or her examination procedures and (b) the proper degree of professional skepticism to obtain reasonable assurance that material misstatements will be detected.

.41 In an examination of MD&A, the practitioner should perform the following.

- a. Obtain an understanding of the rules and regulations adopted by the SEC for MD&A and management's method of preparing MD&A. (See paragraphs .18–.19.)
- b. Plan the engagement. (See paragraphs .42–.48.)
- c. Consider relevant portions of the entity's internal control applicable to the preparation of MD&A. (See paragraphs .49–.58.)
- d. Obtain sufficient evidence, including testing completeness. (See paragraphs .59–.64.)
- e. Consider the effect of events subsequent to the balance-sheet date. (See paragraphs .65–.66.)
- f. Obtain written representations from management concerning its responsibility for MD&A, completeness of minutes, events subsequent to the balance-sheet date, and other matters about which the practitioner believes written representations are appropriate. (See paragraphs .110–.112.)
- g. Form an opinion about whether the MD&A presentation includes, in all material respects, the required elements of the rules and regulations adopted by the SEC, whether the historical financial amounts included therein have been accurately derived, in all material respects, from the entity's financial statements, and whether the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained in the MD&A. (See paragraph .67.)

Planning the Engagement

General Considerations

.42 Planning an engagement to examine MD&A involves developing an overall strategy for the expected scope and performance of the engagement.

When developing an overall strategy for the engagement, the practitioner should consider factors such as the following:

- Matters affecting the industry in which the entity operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes
- Knowledge of the entity's internal control applicable to the preparation of MD&A obtained during the audit of the financial statements and the extent of recent changes, if any
- Matters relating to the entity's business, including its organization, operating characteristics, capital structure, and distribution methods
- The types of relevant information that management reports to external analysts (for example, press releases and presentations to lenders and rating agencies, if any, concerning past and future performance)
- How the entity analyzes actual performance compared to budgets and the types of information provided in documents submitted to the board of directors for purposes of the entity's day-to-day operations and long-range planning
- The extent of management's knowledge of and experience with the rules and regulations adopted by the SEC for MD&A
- If the entity is a nonpublic entity, the intended use of the MD&A presentation
- Preliminary judgments about (a) materiality, (b) inherent risk at the individual assertion level, and (c) factors (for example, matters identified during the audit or review of the historical financial statements) relating to significant deficiencies in internal control applicable to the preparation of MD&A (See paragraph .58.)
- The fraud risk factors or other conditions identified during the audit of the most recent annual financial statements and the practitioner's response to such risk factors
- The type and extent of evidential matter supporting management's assertions and disclosures in the MD&A presentation
- The nature of complex or subjective matters potentially material to the MD&A presentation that may require special skill or knowledge and whether such matters may require using the work of a specialist to obtain sufficient evidential matter (See paragraph .47.)
- The presence of an internal audit function (See paragraph .48.)

.43 In planning an engagement when MD&A has not previously been examined, the practitioner should consider the degree to which the entity has information available for such prior periods and the continuity of the entity's personnel and their ability to respond to inquiries with respect to such periods. In addition, the practitioner should obtain an understanding of the entity's internal control in prior years applicable to the preparation of MD&A.

Consideration of Audit Results

.44 The practitioner should also consider the results of the audits of the financial statements for the periods covered by the MD&A presentation on the examination engagement, such as matters relating to the following:

- The availability and condition of the entity's records
- The nature and magnitude of audit adjustments
- Misstatements¹⁸ that were not corrected in the financial statements that may affect MD&A disclosures (for example, misclassifications between financial statement line items)

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.45 The practitioner should also consider the possible impact on the scope of the examination engagement of any modification or contemplated modification of the auditor's report, including matters addressed in explanatory language. For example, if the auditor has modified the auditor's report to include a going-concern uncertainty explanatory paragraph, the practitioner would consider such a matter in assessing attestation risk.

Multiple Components

.46 In an engagement to examine MD&A, if the entity has operations in several components (for example, locations, branches, subsidiaries, or programs), the practitioner examining the group's MD&A should determine the components to which procedures should be applied. In making such a determination and in selecting the components to be tested, the practitioner examining the group's MD&A should consider factors such as the following:

- The relative importance of each component to the applicable disclosure in the group's MD&A
- The degree of centralization of records
- The effectiveness of controls, particularly those that affect group management's direct control over the exercise of authority delegated to others and its ability to supervise activities at various locations effectively
- The nature and extent of operations conducted at the various components
- The similarity of operations and internal control for different components

The practitioner examining the group's MD&A should consider whether the audit base of the components is consistent with the components that are disclosed in MD&A. Accordingly, it may be desirable for the practitioner examining the group's MD&A to coordinate the audit work with the components that will be disclosed. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Using the Work of a Specialist

.47 In some engagements to examine MD&A, the nature of complex or subjective matters potentially material to the MD&A presentation may require specialized skill or knowledge in a particular field other than accounting or auditing. For example, the entity may include information concerning plant production capacity, which would ordinarily be determined by an engineer. In

¹⁸ Refer to paragraphs .05–.06 and .11–.13 of AU-C section 320, *Materiality in Planning and Performing an Audit*, and paragraph .10 of AU-C section 450, *Evaluation of Misstatements Identified During the Audit*. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

such cases, the practitioner may use the work of a specialist and should consider the relevant guidance in AU-C section 620, *Using the Work of an Auditor's Specialist*. An auditor's specialist may be either an auditor's internal specialist (for example, a partner of the auditor's firm) or an external specialist. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Internal Audit Function

.48 Another factor the practitioner should consider when planning the engagement is whether the entity has an internal audit function and the extent to which internal auditors are involved in directly testing the MD&A presentation, in monitoring the entity's internal control applicable to the preparation of MD&A, or in testing the underlying records supporting disclosures in the MD&A. A practitioner should consider the guidance in AU-C section 610, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, when addressing the competence and objectivity of internal auditors; the nature, timing, and extent of work to be performed; and other related matters. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Consideration of Internal Control Applicable to the Preparation of MD&A

.49 The practitioner should obtain an understanding of the entity's internal control applicable to the preparation of MD&A sufficient to plan the engagement and to assess control risk. Generally, controls that are relevant to an examination pertain to the entity's objective of preparing MD&A in conformity with the rules and regulations adopted by the SEC, and may include controls within the control environment, risk assessment, information and communication, control activities, and monitoring components.

.50 The controls relating to operations and compliance objectives may be relevant to an examination if they pertain to data the practitioner evaluates or uses in applying examination procedures. For example, controls over the gathering of information, which are different from financial statement controls, and controls relating to nonfinancial data that are included in the MD&A presentation, may be relevant to an examination engagement.

.51 In planning the examination, knowledge of such controls should be used to identify types of potential misstatement (including types of potential material omissions), to consider factors that affect the risk of material misstatement and to design appropriate tests.

.52 A practitioner generally obtains an understanding of the design of the entity's internal control applicable to the preparation of MD&A by making inquiries of appropriate management, supervisory, and staff personnel; by inspection of the entity's documents; and by observation of the entity's relevant activities, including controls over matters discussed, nonfinancial data included, and management evaluation of the reasonableness of information included. The nature and extent of procedures a practitioner performs vary from entity to entity and are influenced by factors such as the entity's complexity, the length of time that the entity has prepared MD&A pursuant to the rules and regulations adopted by the SEC, the practitioner's knowledge of the entity's controls obtained in audits and previous professional engagements, and judgments about materiality.

.53 After obtaining an understanding of the entity's internal control applicable to the preparation of MD&A, the practitioner assesses control risk for the assertions embodied in the MD&A presentation. (Refer to paragraphs .34–.39.) The practitioner may assess control risk at the maximum level (the greatest probability that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by an entity's controls) because the practitioner believes controls are unlikely to pertain to an assertion, are unlikely to be effective, or because evaluating their effectiveness would be inefficient. Alternatively, the practitioner may obtain evidential matter about the effectiveness of both the design and operation of a control that supports a lower assessed level of control risk. Such evidential matter may be obtained from tests of controls planned and performed concurrently with obtaining the understanding of the internal control or from procedures performed to obtain the understanding that were not specifically planned as tests of controls.

.54 After obtaining the understanding and assessing control risk, the practitioner may desire to seek a further reduction in the assessed level of control risk for certain assertions. In such cases, the practitioner considers whether evidential matter sufficient to support a further reduction is likely to be available and whether performing additional tests of controls to obtain such evidential matter would be efficient.

.55 When seeking to assess control risk below the maximum for controls over financial and nonfinancial data, the practitioner should perform tests of controls to obtain evidence to support the assessed level of control risk. For example, the practitioner may perform tests of controls directed toward the effectiveness of the design or operation of internal control over the accumulation of the number of units sold for a manufacturing company, average interest rates earned and paid for a financial institution, or average net sales per square foot for a retail entity.

.56 The practitioner uses the knowledge provided by the understanding of internal control applicable to the preparation of MD&A and the assessed level of control risk in determining the nature, timing, and extent of substantive tests for the MD&A assertions.

.57 The practitioner should document the understanding of the internal control components obtained to plan the examination and the assessment of control risk. The form and extent of this documentation is influenced by the size and complexity of the entity, as well as the nature of the entity's controls applicable to the preparation of MD&A.

.58 During the course of an engagement to examine MD&A, the practitioner may become aware of control deficiencies in the design or operation of controls applicable to the preparation of MD&A that could adversely affect the entity's ability to prepare MD&A in accordance with the rules and regulations adopted by the SEC. The practitioner should consider the implications of such control deficiencies on his or her ability to rely on management's explanations and on comparisons to summary accounting records. A practitioner's responsibility to communicate these control deficiencies in an examination of MD&A is similar to the auditor's responsibility described in AU-C section 265, *Communicating Internal Control Related Matters Identified in an Audit*, and AU-C section 260, *The Auditor's Communication With Those Charged With Governance*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 112. Revised, January 2010, to reflect conforming changes necessary due to the issuance of SAS No. 115. Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Obtaining Sufficient Evidence

.59 The practitioner should apply procedures to obtain reasonable assurance of detecting material misstatements. In an audit of historical financial statements, the practitioner will have applied audit procedures to some of the information included in the MD&A. However, because the objective of those audit procedures is to have a reasonable basis for expressing an opinion on the financial statements taken as a whole rather than on the MD&A, certain additional examination procedures should be performed as discussed in paragraphs .60–.64. Determining these procedures and evaluating the sufficiency of the evidence obtained are matters of professional judgment.

.60 The practitioner ordinarily should apply the following procedures.

- a. Read the MD&A and compare the content for consistency with the audited financial statements; compare financial amounts to the audited financial statements or related accounting records and analyses; recompute the increases, decreases, and percentages disclosed.
- b. Compare nonfinancial amounts to the audited financial statements, if applicable, or to other records. (Refer to paragraphs .62–.64.)
- c. Consider whether the explanations in MD&A are consistent with the information obtained during the audit; investigate further those explanations that cannot be substantiated by information in the audit working papers through inquiry (including inquiry of officers and other executives having responsibility for operational areas) and inspection of client records.
- d. Examine internally generated documents (for example, variance analyses, sales analyses, wage cost analyses, sales or service pricing sheets, and business plans or programs) and externally generated documents (for example, correspondence, contracts, or loan agreements) in support of the existence, occurrence, or expected occurrence of events, transactions, conditions, trends, demands, commitments, and uncertainties disclosed in the MD&A.
- e. Obtain available prospective financial information (for example, budgets; sales forecasts; forecasts of labor, overhead, and materials costs; capital expenditure requests; and financial forecasts and projections) and compare such information to forward-looking MD&A disclosures. Inquire of management as to the procedures used to prepare the prospective financial information. Evaluate whether the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the MD&A disclosures of events, transactions, conditions, trends, demands, commitments, or uncertainties.¹⁹
- f. Consider obtaining available prospective financial information relating to prior periods and comparing actual results with forecasted and projected amounts.
- g. Make inquiries of officers and other executives having responsibility for operational areas (such as sales, marketing, and production) and financial and accounting matters, as to their plans and

¹⁹ Refer to paragraph .26 for a discussion concerning the safe harbor rules for forward-looking statements.

expectations for the future that could affect the entity's liquidity and capital resources.

- h.* Consider obtaining external information concerning industry trends, inflation, and changing prices and comparing the related MD&A disclosures to such information.
- i.* Compare the information in MD&A with the rules and regulations adopted by the SEC and consider whether the presentation includes the required elements of such rules and regulations.
- j.* Read the minutes of meetings to date of the board of directors and other significant committees to identify matters that may affect MD&A; consider whether such matters are appropriately addressed in MD&A.
- k.* Inquire of officers as to the entity's prior experience with the SEC and the extent of comments received upon review of documents by the SEC; read correspondence between the entity and the SEC with respect to such review, if any.
- l.* Obtain public communications (for example, press releases and quarterly reports) and the related supporting documentation dealing with historical and future results; consider whether MD&A is consistent with such communications.
- m.* Consider obtaining other types of publicly available information (for example, analyst reports and news articles); compare the MD&A presentation with such information.

Testing Completeness

.61 The practitioner should design procedures to test the presentation for completeness, including tests of the completeness of explanations that relate to historical disclosures as discussed in paragraphs .36–.37. The practitioner should also consider whether the MD&A discloses matters that could significantly impact future financial condition and results of operations of the entity by considering information that he or she obtained through the following:

- a.* Audit of the financial statements
- b.* Inquiries of the entity's officers and other executives directed to current events, conditions, economic changes, commitments and uncertainties, within both the entity and its industry
- c.* Other information obtained through procedures such as those listed in paragraphs .60 and .65–.66

As discussed in paragraph .31, the inherent risk concerning the completeness of disclosures may be high; if it is, the practitioner may extend the procedures (for example, by making additional inquiries of management or by examining additional internally generated documents).

Nonfinancial Data

.62 Management may include nonfinancial data (such as units produced; the number of units sold, locations, or customers; plant utilization; or square footage) in the MD&A. The practitioner should consider whether the definitions used by management for such nonfinancial data are reasonable for the particular disclosure in the MD&A and whether there are suitable criteria (for example, industry standards with respect to square footage for retail operations), as discussed in paragraphs .23–.32 of section 101.

.63 In some situations, the nonfinancial data or the controls over the nonfinancial data may have been tested by the practitioner in conjunction with

the financial statement audit; however, the practitioner's consideration of the nature of the procedures to apply to nonfinancial data in an examination of MD&A is based on the concept of materiality with respect to the MD&A presentation. The practitioner should consider whether industry standards exist for the nonfinancial data or whether there are different methods of measurement that may be used, and, if such methods could result in significantly different results, whether the method of measurement selected by management is reasonable and consistent between periods covered by the MD&A presentation. For example, the number of customers reported by management could vary depending on whether management defines a customer as a subsidiary or "ship to" location of a company rather than the company itself.

.64 In testing nonfinancial data included in the MD&A, the practitioner may seek to assess control risk below the maximum for controls over such nonfinancial data, as discussed in paragraph .55. The practitioner weighs the increase in effort of the examination associated with the additional tests of controls that is necessary to obtain evidential matter against the resulting decrease in examination effort associated with the reduced substantive tests. For those nonfinancial assertions for which the practitioner performs additional tests of controls, the practitioner determines the assessed level of control risk that the results of those tests will support. This assessed level of control risk is used in determining the appropriate detection risk to accept for those nonfinancial assertions and, accordingly, in determining the nature, timing, and extent of substantive tests for such assertions.

Consideration of the Effect of Events Subsequent to the Balance-Sheet Date

.65 As there is an expectation by the SEC that MD&A considers events through a date at or near the filing date,²⁰ the practitioner should consider information about events²¹ that comes to his or her attention after the end of the period addressed by MD&A and prior to the issuance of his or her report that may have a material effect on the entity's financial condition (including liquidity and capital resources), changes in financial condition, results of operations, and material commitments for capital resources. Events or matters that should be disclosed in MD&A include those that—²²

- Are reasonably expected to have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.
- Are reasonably likely to result in the entity's liquidity increasing or decreasing in any material way.
- Will have a material effect on the entity's capital resources.
- Would cause reported financial information not to be necessarily indicative of future operating results or of future financial condition.

²⁰ A registration statement under the 1933 Act speaks as of its effective date.

²¹ Such events are only referred to as *subsequent events* in relation to an MD&A presentation if they occur after the MD&A presentation has been issued. The annual MD&A presentation ordinarily would not be updated for subsequent events if an MD&A presentation for a subsequent interim period has been issued or the event has been reported through a filing on Form 8-K.

²² The practitioner should refer to the rules and regulations adopted by the SEC for other examples of events that should be disclosed.

The practitioner should consider whether events identified during the examination of the MD&A presentation or the audit of the related financial statements require adjustment to or disclosure in the MD&A presentation. When MD&A will be included or incorporated by reference in a 1933 Act document that is filed with the SEC, the practitioner's procedures should extend up to the filing date or as close to it as is reasonable and practicable in the circumstances.²³ If a public entity's MD&A presentation is to be included only in a filing under the 1934 Act (for example, Forms 10-K or 10-KSB), the practitioner's responsibility to consider subsequent events does not extend beyond the date of the report on MD&A. Paragraphs .94–.98 provide guidance when the practitioner is engaged subsequent to the filing of the MD&A presentation.

.66 In an examination of MD&A, the practitioner's fieldwork ordinarily extends beyond the date of the auditor's report on the related financial statements.²⁴ Accordingly, the practitioner generally should—

- a. Read available minutes of meetings of stockholders, the board of directors, and other appropriate committees; as to meetings for which minutes are not available, inquire about matters dealt with at such meetings.
- b. Read the latest available interim financial statements for periods subsequent to the date of the auditor's report, compare them with the financial statements for the periods covered by the MD&A, and inquire of and discuss with officers and other executives having responsibility for operational, financial, and accounting matters (limited where appropriate to major locations) matters such as the following:
 - Whether interim financial statements have been prepared on the same basis as the audited financial statements
 - Whether there were any significant changes in the entity's operations, liquidity, or capital resources in the subsequent period
 - The current status of items in the financial statements for which the MD&A has been prepared that were accounted for on the basis of tentative, preliminary, or inconclusive data
 - Whether any unusual adjustments were made during the period from the balance-sheet date to the date of inquiry
- c. Make inquiries of members of senior management as to the current status of matters concerning litigation, claims, and assessments identified during the audit of the financial statements and

²³ Additionally, if the practitioner's report on MD&A is included or incorporated by reference in a 1933 Act document, the practitioner should extend his or her procedures with respect to subsequent events from the date of his or her report on MD&A up to the effective date or as close thereto as is reasonable and practicable in the circumstances.

²⁴ Undertaking an engagement to examine MD&A does not extend the auditor's responsibility to update the subsequent events review procedures for the financial statements beyond the date of the auditor's report. However, see AU-C section 560, *Events and Subsequently Discovered Facts*. Also, see AU-C section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*, as to an auditor's responsibility when his or her report is included in a registration statement filed under the 1933 Act. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

of any new matters or unfavorable developments. Consider obtaining updated legal letters from legal counsel.²⁵

- d. Consider whether there have been any changes in economic conditions or in the industry that could have a significant effect on the entity.
- e. Obtain written representations from appropriate officials as to whether any events occurred subsequent to the latest balance-sheet date that would require disclosure in the MD&A. (See paragraphs .110–.112.)
- f. Make such additional inquiries or perform such other procedures as considered necessary and appropriate to address questions that arise in carrying out the foregoing procedures, inquiries, and discussions.

Forming an Opinion

.67 The practitioner should consider the concept of materiality discussed in paragraphs .21–.22, and the impact of any modification of the auditor's report on the historical financial statements in forming an opinion on the examination of MD&A, including the practitioner's ability to evaluate the results of inquiries and other procedures.

Reporting

.68 In order for the practitioner to issue a report on an examination of MD&A, the financial statements for the periods covered by the MD&A presentation and the related auditor's report(s) should accompany the MD&A presentation (or, with respect to a public entity, be incorporated in the document containing the MD&A by reference to information filed with a regulatory agency). In addition, if the entity is a nonpublic entity, one of the following conditions should be met.

- a. A statement should be included in the body of the MD&A presentation that it has been prepared using the rules and regulations adopted by the SEC.
- b. A separate written assertion should accompany the MD&A presentation or such assertion should be included in a representation letter obtained from the entity.

.69 The practitioner's report on an examination of MD&A should include the following:

- a. A title that includes the word *independent*
- b. An identification of the MD&A presentation, including the period covered
- c. A statement that management is responsible for the preparation of the MD&A pursuant to the rules and regulations adopted by the SEC, and a statement that the practitioner's responsibility is to express an opinion on the presentation based on his or her examination

²⁵ See paragraphs .16–.24 of AU-C section 501, *Audit Evidence—Specific Considerations for Selected Items*, for guidance concerning obtaining legal letters. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

- d. A reference to the auditor's report on the related financial statements, and if the report was other than a standard report, the substantive reasons therefor
- e. A statement that the examination was conducted in accordance with attestation standards established by the AICPA and a description of the scope of an examination of MD&A
- f. A statement that the practitioner believes the examination provides a reasonable basis for his or her opinion
- g. A paragraph stating that—
 - (1) The preparation of MD&A requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information
 - (2) Actual results in the future may differ materially from management's present assessment of information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties
- h. If the entity is a nonpublic entity, a statement that, although the entity is not subject to the rules and regulations of the SEC, the MD&A presentation is intended to be a presentation in accordance with the rules and regulations adopted by the SEC
- i. The practitioner's opinion on whether—
 - (1) The presentation includes, in all material respects, the required elements of the rules and regulations adopted by the SEC
 - (2) The historical financial amounts have been accurately derived, in all material respects, from the entity's financial statements
 - (3) The underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained therein
- j. The manual or printed signature of the practitioner's firm
- k. The date of the examination report

Appendix A [paragraph .114], "Examination Reports," includes a standard examination report. (See Example 1.)

Dating

.70 The practitioner's report on the examination of MD&A should be dated as of the completion of the practitioner's examination procedures. That date should not precede the date of the auditor's report on the latest historical financial statements covered by the MD&A.

Report Modifications

.71 The practitioner should modify the standard report described in paragraph .69, if any of the following conditions exist.

- The presentation excludes a material required element under the rules and regulations adopted by the SEC. (See paragraph .72.)

- The historical financial amounts have not been accurately derived, in all material respects, from the entity's financial statements. (See paragraph .72.)
- The underlying information, determinations, estimates, and assumptions used by management do not provide the entity with a reasonable basis for the disclosure in the MD&A. (See paragraph .72.)
- There is a restriction on the scope of the engagement. (See paragraph .73.)
- The practitioner decides to refer to the report of another practitioner as the basis in part for his or her report. (See paragraph .74.)
- The practitioner is engaged to examine the MD&A presentation after it has been filed with the SEC or other regulatory agency. (See paragraphs .94–.98.)

.72 The practitioner should express a qualified or an adverse opinion if (a) the MD&A presentation excludes a material required element, (b) historical financial amounts have not been accurately derived in all material respects, or (c) the underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures; for example, if there is a lack of consistency between management's method of measuring nonfinancial data between periods covered by the MD&A presentation. The basis for such opinion should be stated in the practitioner's report. Appendix A [paragraph .114] includes several examples of such modifications. (See Example 2.) Also refer to paragraph .107 for required communications with the audit committee.

.73 If the practitioner is unable to perform the procedures he or she considers necessary in the circumstances, the practitioner should modify the report or withdraw from the engagement. If the practitioner modifies the report, he or she should describe the limitation on the scope of the examination in an explanatory paragraph and qualify his or her opinion, or disclaim an opinion. However, limitations on the ability of the practitioner to perform necessary procedures could also arise because of the lack of adequate support for a significant representation in the MD&A. That circumstance may result in a conclusion that the unsupported representation constitutes a material misstatement of fact and, accordingly, the practitioner may qualify his or her opinion or express an adverse opinion, as described in paragraph .72.

Reference to Report of Another Practitioner

.74 If another practitioner examined the MD&A presentation of a component (refer to paragraph .46), the practitioner examining the group's MD&A may decide to make reference to such report of the component practitioner as a basis for his or her opinion on the group's consolidated MD&A presentation. The practitioner examining the group's MD&A should disclose this fact in the introductory paragraph of the report and should refer to the report of the component practitioner in expressing an opinion on the group's consolidated MD&A presentation. These references indicate (1) that the practitioner examining the group's MD&A is not taking responsibility for the work of the component practitioner, and (2) the source of the examination evidence with respect to those components for which reference to the examination of component practitioners is made. Appendix A [paragraph .114] provides an example of a report for such a situation. (See example 3.) Refer to paragraph .105 for guidance when the

other practitioner does not issue a report. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Emphasis of a Matter

.75 In a number of circumstances, the practitioner may wish to emphasize a matter regarding the MD&A presentation. For example, he or she may wish to emphasize that the entity has included information beyond the required elements of the rules and regulations adopted by the SEC. Such explanatory comments should be presented in a separate paragraph of the practitioner's report.

Review Engagement

.76 The objective of a review engagement, including a review of MD&A for an interim period, is to accumulate sufficient evidence to provide the practitioner with a basis for reporting whether any information came to the practitioner's attention to cause him or her to believe that (a) the MD&A presentation does not include, in all material respects, the required elements of the rules and regulations adopted by the SEC, (b) the historical financial amounts included therein have not been accurately derived, in all material respects, from the entity's financial statements, or (c) the underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures contained therein. MD&A for an interim period may be a free-standing presentation or it may be combined with the MD&A presentation for the most recent fiscal year. Procedures for conducting a review of MD&A generally are limited to inquiries and analytical procedures, rather than also including search and verification procedures, concerning factors that have a material effect on financial condition, including liquidity and capital resources, results of operations, and cash flows. In a review engagement, the practitioner should—

- a. Obtain an understanding of the rules and regulations adopted by the SEC for MD&A and management's method of preparing MD&A. (See paragraphs .18–.19.)
- b. Plan the engagement. (See paragraph .77.)
- c. Consider relevant portions of the entity's internal control applicable to the preparation of the MD&A. (See paragraph .78.)
- d. Apply analytical procedures and make inquiries of management and others. (See paragraphs .79–.80.)
- e. Consider the effect of events subsequent to the balance-sheet date. The practitioner's consideration of such events in a review of MD&A is similar to the practitioner's consideration in an examination. (See paragraphs .65–.66.)
- f. Obtain written representations from management concerning its responsibility for MD&A, completeness of minutes, events subsequent to the balance-sheet date, and other matters about which the practitioner believes written representations are appropriate. (See paragraph .110.)
- g. Form a conclusion as to whether any information came to the practitioner's attention that causes him or her to believe any of the following.
 - (1) The MD&A presentation does not include, in all material respects, the required elements of the rules and regulations adopted by the SEC.

- (2) The historical financial amounts included therein have not been accurately derived, in all material respects, from the entity's financial statements.
- (3) The underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures contained therein.

Planning the Engagement

.77 Planning an engagement to review MD&A involves developing an overall strategy for the analytical procedures and inquiries to be performed. When developing an overall strategy for the review engagement, the practitioner should consider factors such as the following:

- Matters affecting the industry in which the entity operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes
- Matters relating to the entity's business, including its organization, operating characteristics, capital structure, and distribution methods
- The types of relevant information that management reports to external analysts (for example, press releases or presentations to lenders and rating agencies concerning past and future performance)
- The extent of management's knowledge of and experience with the rules and regulations adopted by the SEC for MD&A
- If the entity is a nonpublic entity, the intended use of the MD&A presentation
- Matters identified during the audit or review of the historical financial statements relating to MD&A reporting, including knowledge of the entity's internal control applicable to the preparation of MD&A and the extent of recent changes, if any
- Matters identified during prior engagements to examine or review MD&A
- Preliminary judgments about materiality
- The nature of complex or subjective matters potentially material to the MD&A that may require special skill or knowledge
- The presence of an internal audit function and the extent to which internal auditors are involved in directly testing the MD&A presentation or underlying records

Consideration of Internal Control Applicable to the Preparation of MD&A

.78 To perform a review of MD&A, the practitioner needs to have sufficient knowledge of the entity's internal control applicable to the preparation of MD&A to—

- Identify types of potential misstatements in MD&A, including types of material omissions, and consider the likelihood of their occurrence.

- Select the inquiries and analytical procedures that will provide a basis for reporting whether any information causes the practitioner to believe the following.
 - The MD&A presentation does not include, in all material respects, the required elements of the rules and regulations adopted by the SEC, or the historical financial amounts included therein have not been accurately derived, in all material respects, from the entity's financial statements.
 - The underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures contained therein.

Application of Analytical Procedures and Inquiries

.79 The practitioner ordinarily would not obtain corroborating evidential matter of management's responses to the practitioner's inquiries in performing a review of MD&A. The practitioner should, however, consider the consistency of management's responses in light of the results of other inquiries and the application of analytical procedures. The practitioner ordinarily should apply the following analytical procedures and inquiries.

- a. Read the MD&A presentation and compare the content for consistency with the audited financial statements (or reviewed interim financial information if MD&A includes interim information); compare financial amounts to the audited or reviewed financial statements or related accounting records and analyses; recompute the increases, decreases, and percentages disclosed.
- b. Compare nonfinancial amounts to the audited (or reviewed) financial statements, if applicable, or to other records. (Refer to paragraph .80.)
- c. Consider whether the explanations in MD&A are consistent with the information obtained during the audit or the review of interim financial information; make further inquiries of officers and other executives having responsibility for operational areas as necessary.
- d. Obtain available prospective financial information (for example, budgets; sales forecasts; forecasts of labor, overhead, and materials costs; capital expenditure requests; and financial forecasts and projections) and compare such information to forward-looking MD&A disclosures. Inquire of management as to the procedures used to prepare the prospective financial information. Consider whether information came to the practitioner's attention that causes him or her to believe that the underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures of trends, demands, commitments, events, or uncertainties.²⁶
- e. Make inquiries of officers and other executives having responsibility for operational areas (such as sales, marketing, and production) and financial and accounting matters, as to any plans and

²⁶ Refer to paragraph .26 for a discussion concerning the safe harbor rules for forward-looking statements.

expectations for the future that could affect the entity's liquidity and capital resources.

- f.* Compare the information in MD&A with the rules and regulations adopted by the SEC and consider whether the presentation includes the required elements of such rules and regulations.
- g.* Read the minutes of meetings to date of the board of directors and other significant committees to identify actions that may affect MD&A; consider whether such matters are appropriately addressed in the MD&A presentation.
- h.* Inquire of officers as to the entity's prior experience with the SEC and the extent of comments received upon review of documents by the SEC; read correspondence between the entity and the SEC with respect to such review, if any.
- i.* Inquire of management regarding the nature of public communications (for example, press releases and quarterly reports) dealing with historical and future results and consider whether the MD&A presentation is consistent with such communications.

.80 If nonfinancial data are included in the MD&A presentation, the practitioner should inquire as to the nature of the records from which such information was derived and observe the existence of such records, but need not perform other tests of such records beyond analytical procedures and inquiries of individuals responsible for maintaining them. The practitioner should consider whether such nonfinancial data are relevant to users of the MD&A presentation and whether such data are clearly defined in the MD&A presentation. The practitioner should make inquiries regarding whether the definition of the nonfinancial data was consistently applied during the periods reported.

.81 However, if the practitioner becomes aware that the presentation may be incomplete or contain inaccuracies, or is otherwise unsatisfactory, the practitioner should perform the additional procedures he or she deems necessary to achieve the limited assurance contemplated by a review engagement.

Reporting

.82 In order for the practitioner to issue a report on a review of MD&A for an annual period, the financial statements for the periods covered by the MD&A presentation and the related auditor's report(s) should accompany the MD&A presentation (or with respect to a public entity be incorporated in the document containing the MD&A by reference to information filed with a regulatory agency).

.83 If the MD&A presentation relates to an interim period and the entity is a public entity, the financial statements for the interim periods covered by the MD&A presentation and the related accountant's review report(s) should accompany the MD&A presentation, or be incorporated in the document containing the MD&A by reference to information filed with a regulatory agency. The comparative financial statements for the most recent annual period and the related MD&A should accompany the MD&A presentation for the interim period, or be incorporated by reference to information filed with a regulatory agency. Generally, the requirement for inclusion of the annual financial statements and related MD&A is satisfied by a public entity that has met its reporting responsibility for filing its annual financial statements and MD&A in its annual report on Form 10-K.

.84 If the MD&A presentation relates to an interim period and the entity is a nonpublic entity, the following documents should accompany the interim MD&A presentation in order for the practitioner to issue a review report:

- a. The MD&A presentation for the most recent fiscal year and related accountant's examination or review report(s)
- b. The financial statements for the periods covered by the respective MD&A presentations (most recent fiscal year and interim periods and the related auditor's report(s) and accountant's review report(s))

In addition, one of the following conditions should be met.

- A statement should be included in the body of the MD&A presentation that it has been prepared using the rules and regulations adopted by the SEC.
- A separate written assertion should accompany the MD&A presentation or such assertion should be included in a representation letter obtained from the entity.

.85 The practitioner's report on a review of MD&A should include the following:

- a. A title that includes the word *independent*
- b. An identification of the MD&A presentation, including the period covered
- c. A statement that management is responsible for the preparation of the MD&A pursuant to the rules and regulations adopted by the SEC
- d. A reference to the auditor's report on the related financial statements, and, if the report was other than a standard report, the substantive reasons therefor
- e. A statement that the review was conducted in accordance with attestation standards established by the AICPA
- f. A description of the procedures for a review of MD&A
- g. A statement that a review of MD&A is substantially less in scope than an examination, the objective of which is an expression of opinion regarding the MD&A presentation, and accordingly, no such opinion is expressed
- h. A paragraph stating that—
 - (1) The preparation of MD&A requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information
 - (2) Actual results in the future may differ materially from management's present assessment of information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties
- i. If the entity is a nonpublic entity, a statement that although the entity is not subject to the rules and regulations of the SEC, the MD&A presentation is intended to be a presentation in accordance with the rules and regulations adopted by the SEC

- j. A statement about whether any information came to the practitioner's attention that caused him or her to believe that—
 - (1) The MD&A presentation does not include, in all material respects, the required elements of the rules and regulations adopted by the SEC
 - (2) The historical financial amounts included therein have not been accurately derived, in all material respects, from the entity's financial statements
 - (3) The underlying information, determinations, estimates, and assumptions of the entity do not provide a reasonable basis for the disclosures contained therein
- k. If the entity is a public entity as defined in paragraph .02, or a nonpublic entity that is making or has made an offering of securities and it appears that the securities may subsequently be registered or subject to a filing with the SEC or other regulatory agency (for example, certain offerings of securities under Rule 144A of the 1933 Act that purport to conform to Regulation S-K), a statement of restrictions on the use of the report to specified parties, because it is not intended to be filed with the SEC as a report under the 1933 Act or the 1934 Act.
- l. The manual or printed signature of the practitioner's firm
- m. The date of the review report

Appendix B [paragraph .115], "Review Reports," provides examples of a standard review report for an annual and interim period.

Dating

.86 The practitioner's report on the review of MD&A should be dated as of the completion of the practitioner's review procedures. That date should not precede the date of the accountant's report on the latest historical financial statements covered by the MD&A.

Report Modifications

.87 The practitioner should modify the standard review report described in paragraph .86 if any of the following conditions exist.

- The presentation excludes a material required element of the rules and regulations adopted by the SEC. (See paragraph .89.)
- The historical financial amounts have not been accurately derived, in all material respects, from the entity's financial statements. (See paragraph .89.)
- The underlying information, determinations, estimates, and assumptions used by management do not provide the entity with a reasonable basis for the disclosures in the MD&A. (See paragraph .89.)
- The practitioner decides to refer to the report of another practitioner as the basis, in part, for his or her report. (See paragraph .90.)
- The practitioner is engaged to review the MD&A presentation after it has been filed with the SEC or other regulatory agency. (See paragraphs .94–.98.)

.88 When the practitioner is unable to perform the inquiry and analytical procedures he or she considers necessary to achieve the limited assurance

provided by a review, or the client does not provide the practitioner with a representation letter, the review will be incomplete. A review that is incomplete is not an adequate basis for issuing a review report. If the practitioner is unable to complete a review because of a scope limitation, the practitioner should consider the implications of that limitation with respect to possible misstatements of the MD&A presentation. In those circumstances, the practitioner should also refer to paragraphs .107–.109 for guidance concerning communications with the audit committee.

.89 If the practitioner becomes aware that the MD&A is materially misstated, the practitioner should modify the review report to describe the nature of the misstatement. Appendix B [paragraph .115] contains an example of such a modification of the accountant's report. (See Example 3.)

.90 If another practitioner reviewed or examined the MD&A for a material component, the practitioner may decide to make reference to such report of the other practitioner in reporting on the consolidated MD&A presentation. Such reference indicates a division of responsibility for performance of the review.

Emphasis of a Matter

.91 In some circumstances, the practitioner may wish to emphasize a matter regarding the MD&A presentation. For example, he or she may wish to emphasize that the entity has included information beyond the required elements of the rules and regulations adopted by the SEC. Such explanatory comments should be presented in a separate paragraph of the practitioner's report.

Combined Examination and Review Report on MD&A

.92 A practitioner may be engaged both to examine an MD&A presentation as of the most recent fiscal year-end and to review a separate MD&A presentation for a subsequent interim period. If the examination and review are completed at the same time, a combined report may be issued. Appendix C [paragraph .116], "Combined Reports," contains an example of a combined report on an examination of an annual MD&A presentation and the review of a separate MD&A presentation for an interim period. (See Example 1.)

.93 If an entity prepares a combined MD&A presentation for annual and interim periods in which there is a discussion of liquidity and capital resources only as of the most recent interim period but not as of the most recent annual period, the practitioner is limited to performing the highest level of service that is provided with respect to the historical financial statements for any of the periods covered by the MD&A presentation. For example, if the annual financial statements have been audited and the interim financial statements have been reviewed, the practitioner may be engaged to perform a review of the combined MD&A presentation. Appendix C [paragraph .116] contains an example of a review report on a combined MD&A presentation for annual and interim periods. (See Example 2.)

When Practitioner Is Engaged Subsequent to the Filing of MD&A

.94 Management's responsibility for updating an MD&A presentation for events occurring subsequent to the issuance of MD&A depends on whether the entity is a public or nonpublic entity. A public entity is required to report significant subsequent events in a Form 8-K or Form 10-Q, or in a registration

statement; therefore, a public company would ordinarily not modify its MD&A presentation once it is filed with the SEC (or other regulatory agency).

.95 Therefore, if the practitioner is engaged to examine (or review) an MD&A presentation of a public entity that has already been filed with the SEC (or other regulatory agency), the practitioner should consider whether material subsequent events are appropriately disclosed in a Form 8-K or 10-Q, or a registration statement that includes or incorporates by reference such MD&A presentation. Refer to paragraphs .65–.66 for guidance concerning consideration of events up to the filing date when the practitioner's report on MD&A will be included (or incorporated by reference) in a 1933 Act document filed with the SEC that will require a consent.

.96 If subsequent events of a public entity are appropriately disclosed in a Form 8-K or 10-Q, or in a registration statement, or if there have been no material subsequent events, the practitioner should add the following paragraph to his or her examination or review report following the opinion or concluding paragraph, respectively.

The accompanying Management's Discussion and Analysis does not consider events that have occurred subsequent to Month XX, 20X6, the date as of which it was filed with the Securities and Exchange Commission.

.97 If there has been a material subsequent event that has not been disclosed in a manner described in paragraph .95 and if the practitioner determines that it is appropriate to issue a report even though the MD&A presentation has not been updated for such material subsequent event (for example, because the filing of the Form 10-Q that will disclose such events has not yet occurred), the practitioner should express a qualified or an adverse opinion (or appropriately modify the review report) on the MD&A presentation. As discussed in paragraph .107, if such material subsequent event is not appropriately disclosed, the practitioner should evaluate (a) whether to resign from the engagement related to the MD&A presentation and (b) whether to remain as the entity's auditor or stand for re-election to audit the entity's financial statements.

.98 Because a nonpublic entity is not subject to the filing requirements of the SEC, an MD&A presentation of a nonpublic entity should be updated for material subsequent events through the date of the practitioner's report.

When a Predecessor Auditor Has Audited Prior Period Financial Statements

.99 If a predecessor auditor has audited the financial statements for a prior period covered by the MD&A, the need by the practitioner reporting on the MD&A for an understanding of the business and the entity's accounting and financial reporting practices for such prior period, as discussed in paragraph .07, is not diminished and the practitioner should apply the appropriate procedures. In applying the appropriate procedures, the practitioner may consider reviewing the predecessor auditor's working papers with respect to audits of financial statements and examinations or reviews of MD&A presentations for such prior periods.

.100 Information that may be obtained from the audit or attest working papers of the predecessor auditor will not provide a sufficient basis in itself for the practitioner to express an opinion with respect to the MD&A disclosures for such prior periods. If the practitioner has audited the current year, the results of such audit may be considered in planning and performing the examination

of MD&A and may provide evidential matter that is useful in performing the examination, including with respect to matters disclosed for prior periods. For example, an increase in salaries expense may be the result of an acquisition in the last half of the prior year. Auditing procedures applied to payroll expense in the current year that validate the increase as a result of the acquisition may provide evidential matter with respect to the increase in salaries expense in the prior year attributed to the acquisition.

.101 In addition to the procedures described in paragraphs .49–.66, the practitioner will need to make inquiries of the predecessor auditor and management as to audit adjustments proposed by the predecessor auditor that were not recorded in the financial statements.

Communications Between Predecessor and Successor Auditors

.102 If the practitioner is appointed as the successor auditor, he or she follows the guidance AU-C section 210A, *Terms of Engagement*, in considering whether or not to accept the engagement. If, at the time of the appointment as auditor, the practitioner is also being engaged to examine or review MD&A, the practitioner should also make specific inquiries of the predecessor auditor regarding MD&A. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.103 The practitioner's examination may be facilitated by (a) making specific inquiries of the predecessor regarding matters that the successor believes may affect the conduct of the examination (or review), such as areas that required an inordinate amount of time or problems that arose from the condition of the records, and (b) if the predecessor previously examined or reviewed MD&A, reviewing the predecessor's working papers for the predecessor's examination or review engagement.

.104 If, subsequent to his or her engagement to audit the financial statements, the practitioner is requested to examine MD&A, the practitioner should request the client to authorize the predecessor auditor to allow a review of the predecessor's audit working papers related to the financial statement periods included in the MD&A presentation. Although the practitioner may previously have had access to the predecessor auditor's working papers in connection with the successor's audit of the financial statements, ordinarily the predecessor auditor should permit the practitioner to review those audit working papers relating to matters that are disclosed or that would likely be disclosed in MD&A.

Another Auditor Audits a Significant Part of the Financial Statements

.105 When one or more component auditors audits a significant part of a group's financial statements, the practitioner²⁷ may request that the component auditor perform procedures with respect to the MD&A or the practitioner may perform the procedures directly with respect to such component(s).²⁸

²⁷ The practitioner serving as auditor of the group's financial statements is presumed to have an audit base for purposes of examining or reviewing the consolidated MD&A presentation. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

²⁸ The practitioner should consider whether he or she has sufficient industry expertise with respect to a subsidiary audited by a component auditor to take sole responsibility for the group's consolidated MD&A presentation. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Unless the component auditor issues an examination or review report on a separate MD&A presentation of such component(s) (see paragraph .74), the practitioner examining the group's MD&A should not make reference to the work of the component practitioner on MD&A in his or her report on MD&A.²⁹ Accordingly, if the practitioner examining the group's MD&A has requested such component auditor to perform procedures, the practitioner examining the group's MD&A should perform those procedures that he or she considers necessary to take responsibility for the work of the other auditor. Such procedures may include one or more of the following:

- a. Visiting the component auditor and discussing the procedures followed and the results thereof.
- b. Reviewing the working papers of the component auditor with respect to the component.
- c. Participating in discussions with the component's management regarding matters that may affect the preparation of the component's MD&A.
- d. Making supplemental tests with respect to such component.

The determination of the extent of the procedures to be applied by the practitioner examining the group's MD&A rests with that practitioner alone in the exercise of his or her professional judgment and in no way constitutes a reflection on the adequacy of the component auditor's work. Because the practitioner examining the group's MD&A in this case assumes responsibility for his or her opinion on the MD&A presentation without making reference to the procedures performed by the other auditor, the judgment of the practitioner examining the group's MD&A should govern as to the extent of procedures to be undertaken. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Responsibility for Other Information in Documents Containing MD&A

.106 A client may publish annual reports containing MD&A and other documents to which the practitioner, at the client's request, devotes attention. See paragraphs .91–.94 of section 101 for pertinent guidance in these circumstances. See Appendix D of this section [paragraph .117], "Comparison of Activities Performed Under SAS No. 8, *Other Information in Documents Containing Audited Financial Statements*, Versus a Review or an Examination Attest Engagement." The guidance in AU-C section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*, is pertinent when the practitioner's report on MD&A is included in a registration statement, proxy statement, or periodic report filed under the federal securities statutes. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Communications With the Audit Committee

.107 If the practitioner concludes that the MD&A presentation contains material inconsistencies with other information included in the document

²⁹ This does not preclude the practitioner from referring to the component auditor's report on the financial statements in his or her report on the group's MD&A. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

containing the MD&A presentation or with the historical financial statements,³⁰ material omissions, or material misstatements of fact, and management refuses to take corrective action, the practitioner should inform the audit committee or others with equivalent authority and responsibility. If the MD&A is not revised, the practitioner should evaluate (a) whether to resign from the engagement related to the MD&A, and (b) whether to remain as the entity's auditor or stand for re-election to audit the entity's financial statements. The practitioner may wish to consult with his or her attorney when making these evaluations.

.108 If the practitioner is engaged after the MD&A presentation has been filed with the SEC (or other regulatory agency), and becomes aware that such MD&A presentation on file with the SEC (or other regulatory agency) has not been revised for a matter for which the practitioner has or would qualify his or her opinion, the practitioner should discuss such matter with the audit committee and request that the MD&A presentation be revised. If the audit committee fails to take appropriate action, the practitioner should consider whether to resign as the independent auditor of the company. The practitioner may consider paragraphs .21–.23 and .27 of AU-C section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, concerning communication with the audit committee and other considerations. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.109 If, as a result of performing an examination or a review of MD&A, the practitioner has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. This is generally appropriate even if the matter might be considered clearly inconsequential. If the matter relates to the audited financial statements, the practitioner should consider the guidance in AU-C section 240, *Consideration of Fraud in a Financial Statement Audit*, concerning communication responsibilities, and the effect on the auditor's report on the financial statements. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Obtaining Written Representations

.110 In an examination or a review engagement, the practitioner should obtain written representations from management.³¹ The specific written representations obtained by the practitioner will depend on the circumstances of the engagement and the nature of the MD&A presentation. Specific representations should relate to the following matters:

- a. Management's acknowledgment of its responsibility for the preparation of MD&A and management's assertion that the

³⁰ See AU-C section 720B, *Other Information in Documents Containing Audited Financial Statements*, for guidance on the impact of material inconsistencies or material misstatements of fact on the auditor's report on the related historical financial statements. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

³¹ Paragraph .21 of AU-C section 580, *Written Representations*, requires that written representations be in the form of a representation letter addressed to the auditor. Paragraph .09b of AU-C section 925 requires the auditor to obtain updated written representations from management at or shortly before the effective date of the registration statement, about (a) whether any information has come to management's attention that would cause management to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the date of the financial statements that would require adjustment to, or disclosure in, those financial statements. (See paragraph .65.) [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

MD&A presentation has been prepared in accordance with the rules and regulations adopted by the SEC for MD&A³²

- b. A statement that the historical financial amounts included in MD&A have been accurately derived from the entity's financial statements
- c. Management's belief that the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained in the MD&A
- d. A statement that management has made available all significant documentation related to compliance with SEC rules and regulations for MD&A
- e. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors
- f. For a public entity, whether any communications from the SEC were received concerning noncompliance with or deficiencies in MD&A reporting practices
- g. Whether any events occurred subsequent to the latest balance-sheet date that would require disclosure in the MD&A
- h. If forward-looking information is included, a statement that—
 - The forward-looking information is based on management's best estimate of expected events and operations, and is consistent with budgets, forecasts, or operating plans prepared for such periods
 - The accounting principles expected to be used for the forward-looking information are consistent with the principles used in preparing the historical financial statements
 - Management has provided the latest version of such budgets, forecasts, or operating plans, and has informed the practitioner of any anticipated changes or modifications to such information that could affect the disclosures contained in the MD&A presentation
- i. If voluntary information is included that is subject to the rules and regulations adopted by the SEC (for example, information required by Item 305, *Quantitative and Qualitative Disclosures About Market Risk*), a statement that such voluntary information has been prepared in accordance with the related rules and regulations adopted by the SEC for such information
- j. If pro forma information is included, a statement that—
 - Management is responsible for the assumptions used in determining the pro forma adjustments
 - Management believes that the assumptions provide a reasonable basis for presenting all the significant effects directly attributable to the transaction or event, that the related pro forma adjustments give appropriate effect to those assumptions, and that the pro forma column reflects

³² Management should specify the SEC rules (for example, Item 303 of Regulation S-K, Item 303 of Regulation S-B, or Item 9 of Form 20-F). For nonpublic entities, the practitioner also obtains a written assertion that the presentation has been prepared using the rules and regulations adopted by the SEC. (See paragraph .02.)

the proper application of those adjustments to the historical financial statements

- Management believes that the significant effects directly attributable to the transaction or event are appropriately disclosed in the pro forma financial information

.111 In an examination, management's refusal to furnish written representations constitutes a limitation on the scope of the engagement sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause a practitioner to disclaim an opinion or withdraw from the examination engagement. However, based on the nature of the representations not obtained or the circumstances of the refusal, the practitioner may conclude that a qualified opinion is appropriate in an examination engagement. In a review engagement, management's refusal to furnish written representations constitutes a limitation of the scope of the engagement sufficient to require withdrawal from the review engagement. Further, the practitioner should consider the effects of the refusal on his or her ability to rely on other management representations.

.112 If the practitioner is precluded from performing procedures he or she considers necessary in the circumstances with respect to a matter that is material to the MD&A presentation, even though management has given representations concerning the matter, there is a limitation on the scope of the engagement, and the practitioner should qualify his or her opinion or disclaim an opinion in an examination engagement, or withdraw from a review engagement.

Effective Date

.113 This section is effective when management's discussion and analysis is for a period ending on or after June 1, 2001. Early application is permitted.

Appendix A—Examination Reports

Example 1: Standard Examination Report

1. The following is an illustration of a standard examination report.

Independent Accountant's Report

[Introductory paragraph]

We have examined XYZ Company's Management's Discussion and Analysis taken as a whole, included *[incorporated by reference]* in the Company's *[insert description of registration statement or document]*. Management is responsible for the preparation of the Company's Management's Discussion and Analysis pursuant to the rules and regulations adopted by the Securities and Exchange Commission. Our responsibility is to express an opinion on the presentation based on our examination. We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company, which comprise the balance sheets as of December 31, 20X5 and 20X4, and the related statements of income, changes in stockholder's equity, and cash flows for each of the years in the three-year period ended December 31, 20X5, and the related notes to the financial statements. In our report dated *[Month]* XX, 20X6, we expressed an unmodified opinion on those financial statements.³³

[Scope paragraph]

Our examination of Management's Discussion and Analysis was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the historical amounts and disclosures in the presentation. An examination also includes assessing the significant determinations made by management as to the relevancy of information to be included and the estimates and assumptions that affect reported information. We believe that our examination provides a reasonable basis for our opinion.

³³ If prior financial statements were audited by other auditors, this sentence would be replaced by the following:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company, which comprise the balance sheet as of December 31, 20X5, and the related statement of income, changes in stockholder's equity, and cash flows for the year then ended, and the related notes to the financial statements. In our report dated *[Month]* XX, 20X6, we expressed an unmodified opinion on those financial statements. The financial statements of XYZ Company; which comprise the balance sheet as of December 31, 20X4, and the related statement of income, changes in stockholder's equity, and cash flows for each of the years in the two-year period then ended, and the notes to the financial statements; were audited by other auditors, whose report dated *[Month]* XX, 20X5, expressed an unmodified opinion on those financial statements.

If the practitioner's opinion on the financial statements is based on the report of component auditors, this sentence would be replaced by the following:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company which comprise the balance sheets as of December 31, 20X5 and 20X4, and the related statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 20X5, and the notes to the financial statements. In our report dated *[Month]* XX, 20X6, we expressed an unmodified opinion on those financial statements based on our audits and the report of component auditors.

Refer to Example 3 if the practitioner's opinion on MD&A is based on the report of another practitioner on a component of the entity. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[Explanatory paragraph] ³⁴

The preparation of Management's Discussion and Analysis requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information. Management's Discussion and Analysis includes information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties. Actual results in the future may differ materially from management's present assessment of this information because events and circumstances frequently do not occur as expected.

[Opinion paragraph]

In our opinion, the Company's presentation of Management's Discussion and Analysis includes, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission; the historical financial amounts included therein have been accurately derived, in all material respects, from the Company's financial statements; and the underlying information, determinations, estimates, and assumptions of the Company provide a reasonable basis for the disclosures contained therein.

[Signature]

[Date]

Example 2: Modifications to Examination Report for a Qualified Opinion

2. An example of a modification of an examination report for a qualified opinion due to a material omission described in paragraph .72 follows.

[Additional explanatory paragraph preceding the opinion paragraph]

Based on information furnished to us by management, we believe that the Company has excluded a discussion of the significant capital outlay required for its plans to expand into the telecommunications industry and the possible effects on the Company's financial condition, liquidity, and capital resources.

[Opinion paragraph]

In our opinion, except for the omission of the matter described in the preceding paragraph, the Company's presentation of Management's Discussion and Analysis includes, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission; the historical financial amounts included therein have been accurately derived, in all material respects, from the Company's financial statements; and the underlying information, determinations, estimates, and assumptions of the Company provide a reasonable basis for the disclosures contained therein.

3. An example of a modification of an examination report for a qualified opinion when overly subjective assertions are included in MD&A follows.

³⁴ The following sentence should be added to the beginning of the explanatory paragraph if the entity is a nonpublic entity, as discussed in paragraph .69h:

Although XYZ Company is not subject to the rules and regulations of the Securities and Exchange Commission, the accompanying Management's Discussion and Analysis is intended to be a presentation in accordance with the rules and regulations adopted by the Securities and Exchange Commission.

[Additional explanatory paragraph preceding the opinion paragraph]

Based on information furnished to us by management, we believe that the underlying information, determinations, estimates, and assumptions used by management do not provide the Company with a reasonable basis for the disclosure concerning *[describe]* in the Company's Management's Discussion and Analysis.

[Opinion paragraph]

In our opinion, except for the disclosure regarding *[describe]* discussed in the preceding paragraph, the Company's presentation of Management's Discussion and Analysis includes, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission; the historical financial amounts included therein have been accurately derived, in all material respects, from the Company's financial statements; and the underlying information, determinations, estimates, and assumptions of the Company provide a reasonable basis for the disclosures contained therein.

Example 3: Examination Report With Reference to the Report of Another Practitioner

4. The following is an illustration of an examination report indicating a division of responsibility with another practitioner, who has examined a separate MD&A presentation of a wholly-owned subsidiary, when the practitioner reporting is serving as the auditor of the related group's consolidated financial statements.

Independent Accountant's Report

[Introductory paragraphs]

We have examined XYZ Company's Management's Discussion and Analysis taken as a whole, included *[incorporated by reference]* in the Company's *[insert description of registration statement or document]*. Management is responsible for the preparation of the Company's Management's Discussion and Analysis pursuant to the rules and regulations adopted by the Securities and Exchange Commission. Our responsibility is to express an opinion on the presentation based on our examination. We did not examine Management's Discussion and Analysis of ABC Corporation, a wholly-owned subsidiary, included in ABC Corporation's *[insert description of registration statement or document]*. Such Management's Discussion and Analysis was examined by other accountants, whose report has been furnished to us, and our opinion, insofar as it relates to information included for ABC Corporation, is based solely on the report of the other accountants.

We have audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated financial statements of XYZ Company, which comprise the consolidated balance sheets as of December 31, 20X5 and 20X4, and the related consolidated statements of income, changes in stockholders' equity, and cash flows, for each of the years in the three-year period ended December 31, 20X5. In our report dated *[Month]* XX, 20X6, we expressed an unmodified opinion on those financial statements based on our audits and the report of other auditors.

[Scope paragraph]

Our examination of Management's Discussion and Analysis was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test

basis, evidence supporting the historical amounts and disclosures in the presentation. An examination also includes assessing the significant determinations made by management as to the relevancy of information to be included and the estimates and assumptions that affect reported information. We believe that our examination and the report of other accountants provide a reasonable basis for our opinion.

[Explanatory paragraph] ³⁵

The preparation of Management's Discussion and Analysis requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information. Management's Discussion and Analysis includes information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties. Actual results in the future may differ materially from management's present assessment of this information because events and circumstances frequently do not occur as expected.

[Opinion paragraph]

In our opinion, based on our examination and the report of other accountants, the Company's presentation of Management's Discussion and Analysis included *[incorporated by reference]* in the Company's *[insert description of registration statement or document]* includes, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission; the historical financial amounts included therein have been accurately derived, in all material respects, from the Company's financial statements; and the underlying information, determinations, estimates, and assumptions of the Company provide a reasonable basis for the disclosures contained therein.

[Signature]

[Date]

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

³⁵ The following sentence should be added to the beginning of the explanatory paragraph if the entity is a nonpublic entity, as discussed in paragraph .69*h*.

Although XYZ Company is not subject to the rules and regulations of the Securities and Exchange Commission, the accompanying Management's Discussion and Analysis is intended to be a presentation in accordance with the rules and regulations adopted by the Securities and Exchange Commission.

.115

Appendix B—Review Reports

Example 1: Standard Review Report on an Annual MD&A Presentation

1. The following is an illustration of a standard review report on an annual MD&A presentation.

Independent Accountant's Report

[Introductory paragraph]

We have reviewed XYZ Company's Management's Discussion and Analysis taken as a whole, included [*incorporated by reference*] in the Company's [*insert description of registration statement or document*]. Management is responsible for the preparation of the Company's Management's Discussion and Analysis pursuant to the rules and regulations adopted by the Securities and Exchange Commission. We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company, which comprise the balance sheets as of December 31, 20X5 and 20X4, and the related statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 20X5. In our report dated [*Month*] XX, 20X6, we expressed an unqualified opinion on those financial statements.

[Scope paragraph]

We conducted our review of Management's Discussion and Analysis in accordance with attestation standards established by the American Institute of Certified Public Accountants. A review of Management's Discussion and Analysis consists principally of applying analytical procedures and making inquiries of persons responsible for financial, accounting, and operational matters. It is substantially less in scope than an examination, the objective of which is the expression of an opinion on the presentation. Accordingly, we do not express such an opinion.

[Explanatory paragraph] ³⁶

The preparation of Management's Discussion and Analysis requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information. Management's Discussion and Analysis includes information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties. Actual results in the future may differ materially from management's present assessment of this information because events and circumstances frequently do not occur as expected.

[Concluding paragraph]

Based on our review, nothing came to our attention that caused us to believe that the Company's presentation of Management's Discussion and Analysis

³⁶ The following sentence should be added to the beginning of the explanatory paragraph if the entity is a nonpublic entity, as discussed in paragraph .85i.

Although XYZ Company is not subject to the rules and regulations of the Securities and Exchange Commission, the accompanying Management's Discussion and Analysis is intended to be a presentation in accordance with the rules and regulations adopted by the Securities and Exchange Commission.

does not include, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission, that the historical financial amounts included therein have not been accurately derived, in all material respects, from the Company's financial statements, or that the underlying information, determinations, estimates and assumptions of the Company do not provide a reasonable basis for the disclosures contained therein.

*[Restricted use paragraph]*³⁷

This report is intended solely for the information and use of *[list or refer to specified parties]* and is not intended to be and should not be used by anyone other than the specified parties.

[Date]

Example 2: Standard Review Report on an Interim MD&A Presentation

2. The following is an illustration of a standard review report on an MD&A presentation for an interim period.

Independent Accountant's Report

[Introductory paragraph]

We have reviewed XYZ Company's Management's Discussion and Analysis taken as a whole included in the Company's *[insert description of registration statement or document]*. Management is responsible for the preparation of the Company's Management's Discussion and Analysis pursuant to the rules and regulations adopted by the Securities and Exchange Commission. We have reviewed, in accordance with standards established by the American Institute of Certified Public Accountants, the interim financial information of XYZ Company as of June 30, 20X6 and 20X5, and for the three-month and six-month periods then ended, and have issued our report thereon dated July XX, 20X6.

[Scope paragraph]

We conducted our review of Management's Discussion and Analysis in accordance with attestation standards established by the American Institute of Certified Public Accountants. A review of Management's Discussion and Analysis consists principally of applying analytical procedures and making inquiries of persons responsible for financial, accounting, and operational matters. It is substantially less in scope than an examination, the objective of which is the expression of an opinion on the presentation. Accordingly, we do not express such an opinion.

*[Explanatory paragraph]*³⁸

The preparation of Management's Discussion and Analysis requires management to interpret the criteria, make determinations as to the relevancy of

³⁷ This paragraph may be omitted for certain nonpublic entities. (Refer to paragraph .85*k*.)

³⁸ The following sentence should be added to the beginning of the explanatory paragraph if the entity is a nonpublic entity, as discussed in paragraph .85*i*.

Although XYZ Company is not subject to the rules and regulations of the Securities and Exchange Commission, the accompanying Management's Discussion and Analysis is intended to be a presentation in accordance with the rules and regulations adopted by the Securities and Exchange Commission.

information to be included, and make estimates and assumptions that affect reported information. Management's Discussion and Analysis includes information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties. Actual results in the future may differ materially from management's present assessment of this information because events and circumstances frequently do not occur as expected.

[Concluding paragraph]

Based on our review, nothing came to our attention that caused us to believe that the Company's presentation of Management's Discussion and Analysis does not include, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission, that the historical financial amounts included therein have not been accurately derived, in all material respects, from the Company's financial statements, or that the underlying information, determinations, estimates, and assumptions of the Company do not provide a reasonable basis for the disclosures contained therein.

*[Restricted use paragraph]*³⁹

This report is intended solely for the information and use of *[list or refer to specified parties]* and is not intended to be and should not be used by anyone other than the specified parties.

[Signature]

[Date]

Example 3: Modification to Review Report for a Material Misstatement

3. An example of a modification of the accountant's report when MD&A is materially misstated, as discussed in paragraph .89, follows.

[Additional explanatory paragraph preceding the concluding paragraph]

Based on information furnished to us by management, we believe that the Company has excluded a discussion of the significant capital outlay required for its plans to expand into the telecommunications industry and the possible effects on the Company's financial condition, liquidity, and capital resources.

[Concluding paragraph]

Based on our review, with the exception of the matter described in the preceding paragraph, nothing came to our attention that caused us to believe that the Company's presentation of Management's Discussion and Analysis does not include, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission, that the historical financial amounts included therein have not been accurately derived, in all material respects, from the Company's financial statements, or that the underlying information, determinations, estimates and assumptions of the Company do not provide a reasonable basis for the disclosures contained therein.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

³⁹ This paragraph may be omitted for certain nonpublic entities. (Refer to paragraph .85*k*.)

Appendix C—Combined Reports

Example 1: Combined Examination and Review Report on MD&A

1. An example of a combined report on an examination of an annual MD&A presentation and the review of MD&A for an interim period discussed in paragraph .92 follows.

Independent Accountant's Report

[Introductory paragraph]

We have examined XYZ Company's Management's Discussion and Analysis taken as a whole for the three-year period ended December 31, 20X5, included *[incorporated by reference]* in the Company's *[insert description of registration statement or document]*. Management is responsible for the preparation of the Company's Management's Discussion and Analysis pursuant to the rules and regulations adopted by the Securities and Exchange Commission. Our responsibility is to express an opinion on the annual presentation based on our examination. We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company as of December 31, 20X5 and 20X4, and for each of the years in the three-year period ended December 31, 19X5, and in our report dated *[Month]* XX, 20X6, we expressed an unqualified opinion on those financial statements.

[Scope paragraph]

Our examination of Management's Discussion and Analysis was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the historical amounts and disclosures in the presentation. An examination also includes assessing the significant determinations made by management as to the relevancy of information to be included and the estimates and assumptions that affect reported information. We believe that our examination provides a reasonable basis for our opinion.

*[Explanatory paragraph]*⁴⁰

The preparation of Management's Discussion and Analysis requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information. Management's Discussion and Analysis includes information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties. Actual results in the future may differ materially from management's present assessment of this information because events and circumstances frequently do not occur as expected.

⁴⁰ The following sentence should be added to the beginning of the explanatory paragraph if the entity is a nonpublic entity, as discussed in paragraph .69*h*.

Although XYZ Company is not subject to the rules and regulations of the Securities and Exchange Commission, the accompanying Management's Discussion and Analysis is intended to be a presentation in accordance with the rules and regulations adopted by the Securities and Exchange Commission.

[Opinion paragraph]

In our opinion, the Company's presentation of Management's Discussion and Analysis for the three-year period ended December 31, 20X5, includes, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission; the historical financial amounts included therein have been accurately derived, in all material respects, from the Company's financial statements; and the underlying information, determinations, estimates, and assumptions of the Company provide a reasonable basis for the disclosures contained therein.

[Paragraphs on interims]

We have also reviewed XYZ Company's Management's Discussion and Analysis taken as a whole for the six-month period ended June 30, 20X6 included *[incorporated by reference]* in the Company's *[insert description of registration statement or document]*. We have reviewed, in accordance with standards established by the American Institute of Certified Public Accountants, the interim financial information of XYZ Company as of June 30, 20X6 and 20X5, and for the six-month periods then ended, and have issued our report thereon dated July XX, 20X6.

We conducted our review of Management's Discussion and Analysis in accordance with attestation standards established by the American Institute of Certified Public Accountants. A review of Management's Discussion and Analysis consists principally of applying analytical procedures and making inquiries of persons responsible for financial, accounting, and operational matters. It is substantially less in scope than an examination, the objective of which is the expression of an opinion on the presentation. Accordingly, we do not express such an opinion.

Based on our review, nothing came to our attention that caused us to believe that the Company's presentation of Management's Discussion and Analysis for the six-month period ended June 30, 20X6, does not include, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission, that the historical financial amounts included therein have not been accurately derived, in all material respects, from the Company's unaudited interim financial statements, or that the underlying information, determinations, estimates, and assumptions of the Company do not provide a reasonable basis for the disclosures contained therein.

[Restricted use paragraph] ⁴¹

This report is intended solely for the information and use of *[list or refer to specified parties]* and is not intended to be and should not be used by anyone other than the specified parties.

[Signature]

[Date]

Example 2: Review Report on a Combined Annual and Interim MD&A Presentation

2. An example of a review report on a combined MD&A presentation for annual and interim periods follows.

⁴¹ This paragraph may be omitted for certain nonpublic entities. (Refer to paragraph .85*k*.)

Independent Accountant's Report*[Introductory paragraph]*

We have reviewed XYZ Company's Management's Discussion and Analysis taken as a whole included *[incorporated by reference]* in the Company's *[insert description of registration statement or document]*. Management is responsible for the preparation of the Company's Management's Discussion and Analysis pursuant to the rules and regulations adopted by the Securities and Exchange Commission. We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company as of December 31, 20X5 and 20X4, and for each of the years in the three-year period ended December 31, 20X5, and in our report dated *[Month]* XX, 20X6, we expressed an unqualified opinion on those financial statements. We have reviewed, in accordance with standards established by the American Institute of Certified Public Accountants, the interim financial information of XYZ Company as of June 30, 20X6 and 20X5, and for the six-month periods then ended, and have issued our report thereon dated July XX, 20X6.

[Scope paragraph]

We conducted our review of Management's Discussion and Analysis in accordance with attestation standards established by the American Institute of Certified Public Accountants. A review of Management's Discussion and Analysis consists principally of applying analytical procedures and making inquiries of persons responsible for financial, accounting, and operational matters. It is substantially less in scope than an examination, the objective of which is the expression of an opinion on the presentation. Accordingly, we do not express such an opinion.

[Explanatory paragraph] ⁴²

The preparation of Management's Discussion and Analysis requires management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect reported information. Management's Discussion and Analysis includes information regarding the estimated future impact of transactions and events that have occurred or are expected to occur, expected sources of liquidity and capital resources, operating trends, commitments, and uncertainties. Actual results in the future may differ materially from management's present assessment of this information because events and circumstances frequently do not occur as expected.

[Concluding paragraph]

Based on our review, nothing came to our attention that caused us to believe that the Company's presentation of Management's Discussion and Analysis does not include, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission, that the historical financial amounts included therein have not been accurately derived, in

⁴² The following sentence should be added to the beginning of the explanatory paragraph if the entity is a nonpublic entity, as discussed in paragraph .69*h*.

Although XYZ Company is not subject to the rules and regulations of the Securities and Exchange Commission, the accompanying Management's Discussion and Analysis is intended to be a presentation in accordance with the rules and regulations adopted by the Securities and Exchange Commission.

all material respects, from the Company's financial statements, or that the underlying information, determinations, estimates, and assumptions of the Company do not provide a reasonable basis for the disclosures contained therein.

Appendix D—Comparison of Activities Performed Under SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* [AU-C Section 720B], Versus a Review or an Examination Attest Engagement *

<i>Activities</i>	<i>SAS No. 118 (AU-C Section 720B)</i>	<i>Review</i>	<i>Examination</i>
Obtain an understanding of SEC rules and regulations and management's methodology for the preparation of Management's Discussion and Analysis (MD&A).	Not applicable (N/A)—Auditor is only required to read the information in the MD&A in order to identify material inconsistencies, if any, with the audited financial statements.	Obtain an understanding of the rules and regulations adopted by the SEC for MD&A. Inquire of management regarding the method of preparing MD&A.	Same as for a review.
Plan the engagement.	N/A	Develop an overall strategy for the analytical procedures and inquiries to be performed to provide negative assurance.	Develop an overall strategy for the expected scope and performance of the engagement to obtain reasonable assurance to express an opinion.
Consider internal control.	N/A	Consider relevant portions of the entity's internal control applicable to the preparation of MD&A to identify the types of potential misstatements and to select the inquiries and analytical procedures; no testing of controls would be performed.	Obtain an understanding of internal control applicable to the preparation of MD&A sufficient to plan the engagement and to assess control risk; controls may be tested by performing inquiries of client personnel, inspection of documents, and observation of relevant activities.

* Refer to AU-C section 720B, *Other Information in Documents Containing Audited Financial Statements*. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

<i>Activities</i>	<i>SAS No. 118 (AU-C Section 720B)</i>	<i>Review</i>	<i>Examination</i>
Test assertions.	N/A	Apply the following analytical procedures and make inquiries of management and others; no corroborating evidential matter is obtained: ● Read the MD&A and compare the content for consistency with the financial statements; compare financial amounts to the financial statements or related accounting records and analyses; recompute increases, decreases and percentages disclosed. ● Compare nonfinancial amounts to the financial statements or other records. ● Consider whether MD&A explanations are consistent with information obtained during the audit or review of financial statements; make further inquiries, as necessary. (Note: Such additional inquiries may result in a decision to perform other procedures or detail tests.)	Apply the following analytical and corroborative procedures to obtain reasonable assurance of detecting material misstatements: ● Read the MD&A and compare the content for consistency with the financial statements; compare financial amounts to the financial statements or related accounting records and analyses; recompute increases, decreases and percentages disclosed. ● Compare nonfinancial amounts to the financial statements or other records; perform tests on other records based on the concept of materiality. ● Consider whether explanations are consistent with the information obtained during the audit of financial statements; investigate further explanations that cannot be substantiated by information in the audit working papers through inquiry and inspection of client records.

(continued)

Activities	SAS No. 118 (AU-C Section 720B)	Review	Examination
		● Compare information in MD&A with the rules and regulations adopted by the SEC. ● Obtain and read available prospective financial information; inquire of management as to the procedures used to prepare such information; consider whether information came to the practitioner's attention that causes him or her to believe that the underlying information, determinations, estimates, and assumptions do not provide a reasonable basis for the MD&A disclosures. ● Obtain public communications and minutes of meetings for comparison with disclosures in MD&A. ● Make inquiries of the officers or executives with responsibility for operational areas and financial and accounting matters as to their plans and expectations for the future.	● Examine internally and externally generated documents in support of the existence, occurrence, or expected occurrence of events, transactions, conditions, trends, demands, commitments, and uncertainties disclosed in MD&A. ● Compare information in MD&A with the rules and regulations adopted by the SEC. ● Obtain and read available prospective financial information; inquire of management as to the procedures used to prepare such information; evaluate whether the underlying information, determinations, estimates, and assumptions provide a reasonable basis for the MD&A disclosures.

<i>Activities</i>	<i>SAS No. 118 (AU-C Section 720B)</i>	<i>Review</i>	<i>Examination</i>
		● Inquire as to prior experience with the SEC and the extent of comments received; read correspondence. ● Consider whether there are any additional matters that should be disclosed in the MD&A based on the results of the preceding procedures and knowledge obtained during the audit or review of the financial statements.	● Obtain public communications and minutes of meetings; consider obtaining other types of publicly available information for comparison with the disclosures in MD&A. ● Make inquiries of the officers or executives with responsibility for operational areas and financial and accounting matters as to their plans and expectations for the future. ● Inquire as to prior experience with the SEC and the extent of comments received; read correspondence. ● Test completeness by considering the results of the preceding procedures and knowledge obtained during the audit of the financial statements, and whether such matters are appropriately disclosed in the MD&A; extend procedures if the inherent risk relating to completeness of disclosures is high.

(continued)

<i>Activities</i>	<i>SAS No. 118 (AU-C Section 720B)</i>	<i>Review</i>	<i>Examination</i>
Consider the effect of events subsequent to the balance-sheet date.	Yes	Yes	Yes
Obtain written representations from management.	Yes	Yes	Yes
Form a conclusion and report.	The auditor has no reporting responsibility with respect to MD&A unless the auditor concludes that there is a material inconsistency in the MD&A that has not been eliminated. In such a situation, the auditor may add an other matter paragraph to the auditor's report on the audited financial statements describing the material inconsistency or withhold the auditor's report. If, while reading the MD&A, the auditor becomes aware of an apparent material misstatement of fact, the auditor should discuss such matter with management and take other actions based on management's response.	Form a conclusion based on the results of the preceding procedures and report in the form of negative assurance.	Form an opinion based on the results of the preceding procedures and report conclusion by expressing an opinion.

[Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120. Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

(continued)

¹ Statement on Standards for Attestation Engagements (SSAE) No. 18, *Attestation Standards: Clarification and Recodification*, contains "AT-C" section numbers instead of "AT" section numbers to avoid confusion with references to existing "AT" sections, which remain effective through April 2017.

AT-C Sections Designated by SSAE No. 18		AT Sections Superseded by SSAE No. 18	
AT-C Section	Title	AT Section	Title
300	Subject Matter		
305 ²	Prospective Financial Information	301	Financial Forecasts and Projections
310	Reporting on Pro Forma Financial Information	401	Reporting on Pro Forma Financial Information
315	Compliance Attestation	601	Compliance Attestation
320	Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting	801	Reporting on Controls at a Service Organization
395	Management's Discussion and Analysis	701 ³	Management's Discussion and Analysis

² AT-C section 305, *Prospective Financial Information*, does not address compilations of prospective financial information—a service that is included in AT section 301, *Financial Forecasts and Projections*. Paragraph .01 of AR-C section 80A, *Compilation Engagements*, states that AR-C section 80A (which is applicable to compilations of historical financial statements) also may be applied, adapted as necessary in the circumstances, to other historical or prospective financial information. Footnote 1 of AR-C section 80A states that the Accounting and Review Services Committee plans to expose for public comment separate proposed Statements on Standards for Accounting and Review Services that would provide requirements and guidance to accountants with respect to compilation engagements on pro forma or prospective financial information.

³ The Auditing Standards Board did not clarify AT section 701, *Management's Discussion and Analysis*, because practitioners rarely perform attestation engagements to report on management's discussion and analysis prepared pursuant to the rules and regulations adopted by the SEC. AT section 701 will be retained in its current unclarified format as AT-C section 395, *Management's Discussion and Analysis*, until further notice.

¹ Statement on Standards for Attestation Engagements (SSAE) No. 18, *Attestation Standards: Clarification and Recodification*, contains "AT-C" section numbers instead of "AT" section numbers to avoid confusion with references to existing "AT" sections, which remain effective through April 2017.

² AT-C section 305, *Prospective Financial Information*, does not address compilations of prospective financial information—a service that is included in AT section 301, *Financial Forecasts and Projections*. Paragraph .01 of AR-C section 80A, *Compilation Engagements*, states that AR-C section 80A (which is applicable to compilations of historical financial statements) also may be applied, adapted as necessary in the circumstances, to other historical or prospective financial information. Footnote 1 of AR-C section 80A states that the Accounting and Review Services Committee plans to expose for public comment separate proposed Statements on Standards for Accounting and Review Services that would provide requirements and guidance to accountants with respect to compilation engagements on pro forma or prospective financial information.

³ The issuance of Statement on Auditing Standards (SAS) No. 130, *An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements* (AU-C sec. 940),

(continued)

AT Sections Superseded by SSAE No. 18		AT-C Sections Designated by SSAE No. 18	
AT Section	Title	AT-C Section	Title
601	Compliance Attestation	315	Compliance Attestation
701 ⁴	Management's Discussion and Analysis	395	Management's Discussion and Analysis
801	Reporting on Controls at a Service Organization	320	Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting

(footnote continued)

moves the content of AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements*, from the SSAEs to the SASs. SAS No. 130 was issued in October 2015 and becomes effective for integrated audits (audits of internal control over financial reporting that are integrated with audits of financial statements) for periods ending on or after December 15, 2016. Upon its effective date, SAS No. 130 withdraws SSAE No. 15, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements*, and related Attestation Interpretation No. 1, "Reporting Under Section 112 of the Federal Deposit Insurance Corporation Improvement Act" (AT sec. 501 and 9501).

⁴ The Auditing Standards Board did not clarify AT section 701, *Management's Discussion and Analysis*, because practitioners rarely perform attestation engagements to report on management's discussion and analysis prepared pursuant to the rules and regulations adopted by the SEC. AT section 701 will be retained in its current unclarified format as AT-C section 395, *Management's Discussion and Analysis*, until further notice.

AUD Section

STATEMENTS OF POSITION—AUDITING AND ATTESTATION

Introduction

Auditing and Attestation Statements of Position (SOPs) are issued to achieve one or more of several objectives: to revise, clarify, or supplement guidance in previously issued Audit and Accounting Guides; to describe and provide implementation guidance for specific types of audit and attestation engagements; or to provide guidance on specialized areas in audit and attestation engagements.

Auditing SOPs

An auditing SOP is recognized as an interpretive publication as defined in AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. Interpretive publications are recommendations on the application of generally accepted auditing standards (GAAS) in specific circumstances, including engagements for entities in specialized industries.

An interpretive publication is issued under the authority of the AICPA Auditing Standards Board (ASB) after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with GAAS. The members of the ASB have found this SOP to be consistent with existing GAAS.

Although interpretive publications are not auditing standards, AU-C section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit because interpretive publications are relevant to the proper application of GAAS in specific circumstances. If the auditor does not apply the auditing guidance in an applicable interpretive publication, the auditor should document how the requirements of GAAS were complied with in the circumstances addressed by such auditing guidance.

Attestation SOPs

An attestation SOP is recognized as an interpretive publication as defined in AT-C section 105, *Concepts Common to All Attestation Engagements*. Interpretive publications are recommendations on the application of Statements on Standards for Attestation Engagements (SSAEs) in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSAEs. The members of the ASB have found this SOP to be consistent with existing SSAEs.

Although interpretive publications are not attestation standards, AT-C section 105 requires the practitioner to consider applicable interpretive publications in planning and performing the attestation engagement because interpretive

publications are relevant to the proper application of the attestation standards in specific circumstances. If the practitioner does not apply the guidance included in this SOP, the practitioner should be prepared to explain how he or she complied with the SSAE provisions of this SOP.

AUD Section 10***Statement of Position 92-8 Auditing
Property/Casualty Insurance Entities'
Statutory Financial Statements—Applying
Certain Requirements of the NAIC Annual
Statement Instructions*****October 1992****NOTE**

This AICPA Statement of Position (SOP) has been developed by the AICPA Insurance Companies Committee to provide guidance regarding the audit of property/casualty insurance entities' statutory financial statements in applying certain requirements of the National Association of Insurance Commissioners' Annual Statement Instructions.

This SOP is recognized as an interpretive publication as defined in AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. Interpretive publications are recommendations on the application of generally accepted auditing standards (GAAS) in specific circumstances, including engagements for entities in specialized industries.

An interpretive publication is issued under the authority of the AICPA Auditing Standards Board (ASB) after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with GAAS. The members of the ASB have found this SOP to be consistent with existing GAAS.

Although interpretive publications are not auditing standards, AU-C section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit because interpretive publications are relevant to the proper application of GAAS in specific circumstances. If the auditor does not apply the auditing guidance in an applicable interpretive publication, the auditor should document how the requirements of GAAS were complied with in the circumstances addressed by such auditing guidance.

Applicability

.01 This statement of position (SOP) provides guidance on the impact of certain requirements of the National Association of Insurance Commissioners' (NAIC's) Annual Statement Instructions—Property and Casualty on the auditor's procedures in the audit of statutory financial statements of property/casualty insurance entities.

Introduction

.02 The NAIC's Annual Statement Instructions direct property/casualty insurers to require their independent certified public accountants to subject the current Schedule P-Part 1 (excluding those amounts related to bulk and incurred-but-not-reported [IBNR] reserves and claim counts) to the auditing procedures applied in the audit of the current statutory financial statements to determine whether Schedule P-Part 1 is fairly stated in all material respects in relation to the basic statutory financial statements taken as a whole. Schedule P-Part 1 includes Part 1-Summary and Part 1A-1R.

.03 Although no separate report on Schedule P-Part 1 is required by the NAIC, the provisions of AU-C section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*, and the provisions of this SOP apply when information in Schedule P-Part 1 is subjected to auditing procedures applied in the audit of the basic statutory financial statements. The requirements of this SOP do not preclude an auditor from issuing a report similar to those illustrated in paragraph .A17 of AU-C section 725. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120. Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Auditing Procedures

.04 Certain of the information in Schedule P-Part 1 is typically subjected to auditing procedures applied in the audit of the basic statutory financial statements (for example, premiums earned and losses paid). Other information not directly related to the basic statutory financial statements is also presented (for example, lines of business classifications for immaterial lines). Although such information may not have been subjected to auditing procedures applied in the audit of the basic statutory financial statements in all instances, such information may have been derived from accounting records that have been tested by the auditor.

.05 Paragraph .A5 of AU-C section 725 states that although an auditor has no obligation to apply auditing procedures to supplementary information presented outside the basic financial statements, the auditor may choose to modify or redirect certain of the procedures to be applied in the audit of the basic financial statements so that the auditor may express an opinion on the supplementary information in relation to the financial statements as a whole. [Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120. Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.06 Chapter 4, "The Loss Reserving and Claims Cycle," of the AICPA Audit and Accounting Guide *Property and Liability Insurance Entities* (the guide), addresses auditing the claims data base, and is applicable when applying auditing procedures to the information presented in Schedule P-Part 1. Chapter 4 also provides a comprehensive discussion of auditing loss reserves and the claims cycle. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.07 As stated in chapter 4 of the guide, because claim data and characteristics such as dates and types of loss can significantly influence reserve estimation, the auditor should test the completeness, accuracy, and classification of the claim loss data during the audit of the statutory financial statements. In

extending those procedures to Schedule P-Part 1, the auditor should determine that

- a. The data presented on Schedule P-Part 1 is properly reconciled to the statistical records of the company.
- b. Changes between the prior-year and current-year Schedule P-Part 1 are properly reconciled to the current-year audited statutory financial statements.
- c. The source of the data for the auditing procedures applied to the claim loss and loss adjustment expense data during the current calendar year (for example, tests of payments on claims for all accident years that were paid during the current calendar year) is the same as (or reconciles to) the statistical records that support the data presented on Schedule P-Part 1.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.08 If, as a result of the procedures performed during the audit of the statutory financial statements, the auditor concludes, on the basis of facts known to the auditor, that Schedule P-Part 1 is materially misstated in relation to the basic financial statements as a whole, the auditor should communicate to the company's management and the opining actuary that Schedule P-Part 1 is not fairly stated and should describe the misstatement. If the company will not agree to revise Schedule P-Part 1, the auditor should issue a report on Schedule P-Part 1 and should include a description of the misstatement in that report. (The auditor should refer to AU-C section 725 when a report will be issued.) The auditor should consider the impact of a misstatement in Schedule P-Part 1 on the auditor's report on the statutory financial statements. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120. Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Effective Date

.09 This SOP is effective for audits of statutory-basis financial statements of property/casualty insurance entities for periods ending after December 15, 1992.

AUD Section 15

Statement of Position 99-1 Guidance to Practitioners in Conducting and Reporting on an Agreed-Upon Procedures Engagement to Assist Management in Evaluating the Effectiveness of Its Corporate Compliance Program

May 21, 1999

NOTE

This AICPA Statement of Position (SOP) has been developed by the AICPA Health Care Pilot Task Force of the AICPA Auditing Standards Board (ASB) to provide guidance regarding the application of Statements on Standards for Attestation Engagements (SSAEs) to agreed-upon procedures attestation engagements performed to assist a health care provider in evaluating the effectiveness of its corporate compliance program consistent with the requirements of a Corporate Integrity Agreement entered into with the Office of Inspector General of the U.S. Department of Health and Human Services.

An attestation SOP is recognized as an interpretive publication as defined in AT-C section 105, *Concepts Common to All Attestation Engagements*. Interpretive publications are recommendations on the application of SSAEs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSAEs. The members of the ASB have found this SOP to be consistent with existing SSAEs.

Although interpretive publications are not attestation standards, AT-C section 105 requires the practitioner to consider applicable interpretive publications in planning and performing the attestation engagement because interpretive publications are relevant to the proper application of the attestation standards in specific circumstances.

Summary

This Statement of Position (SOP) provides guidance to practitioners in conducting and reporting on an agreed-upon procedures engagement performed pursuant to the AICPA Statements on Standards for Attestation Engagements (SSAEs) to assist a health care provider in evaluating the effectiveness of its corporate compliance program consistent with the requirements of a Corporate

Integrity Agreement (CIA) entered into with the Office of Inspector General (OIG) of the U.S. Department of Health and Human Services. CIAs are specific to the entity involved; consequently, users of this SOP should be familiar with the specific requirements of the entity's CIA.

Introduction and Background

.01 The health care industry has historically experienced a significant number and magnitude of allegations of fraud and abuse involving federal health care programs (for example, Medicare and Medicaid) and private health care insurance. Such allegations trigger regulatory scrutiny, litigation, significant monetary settlements, and negative publicity related to — among other things — coding and billing practices, patient referrals, cost reporting, quality of care, and clinical practices. Typically, as part of the global resolution of these allegations, the entity enters into a CIA with the OIG of the U.S. Department of Health and Human Services. Such agreements require that management annually report on its compliance with the terms of the CIA and that there be an assessment of the entity's compliance with the CIA. This assessment includes a billing analysis, which may be performed by an independent review organization (such as a practitioner or consultant) or the provider (if permitted by the OIG), and an agreed-upon procedures engagement. [Paragraph revised, June 2020, for clarity.]

.02 This SOP provides guidance to practitioners in conducting and reporting on an agreed-upon procedures engagement performed pursuant to the AICPA Statements on Standards for Attestation Engagements to assist an entity in evaluating the effectiveness of its corporate compliance program consistent with the requirements of a CIA.¹ The terms of a CIA are unique to the entity; consequently, users of this SOP need to be familiar with the actual CIA and its requirements.

.03 This SOP applies to agreed-upon procedures engagements to assist in evaluating an entity's compliance for a specified period. The practitioner should perform such engagements in accordance with the paragraphs in AT-C section 315, *Compliance Attestation*, that address agreed-upon procedures engagements related to compliance (applicable paragraphs in AT-C section 315). The engagement should be conducted in accordance with standards established by the AICPA, including the criteria set forth in this SOP. However, this SOP is not intended to provide all the required criteria set forth in individual CIAs, nor all the applicable standards established by the AICPA. Additionally, the SOP contains some guidance that may be applied in evaluating an organization's corporate compliance program, even though the program was not imposed by a CIA. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Overview of a Typical Corporate Integrity Agreement

.04 A CIA is an agreement between a health care provider and the OIG in conjunction with a global settlement of a fraud investigation. Such an

¹ The practitioner also might be engaged to assist in other areas beyond an agreed-upon procedures engagement such as providing consulting services in connection with evaluating the company's billing practices, policies, and procedures as required by the CIA or in implementing, assessing, and reporting on voluntarily adopted compliance programs. In addition, the practitioner may assist in preparing an entity's self-disclosure reports to federal health agencies related to billing errors and other compliance matters. Similarly, practitioners may be involved in an entity's preparation of government-required (but not CIA-imposed) compliance reporting (for example, contract requirements for Medicare part C) beyond an agreed-upon procedures engagement.

agreement typically seeks to establish a compliance program within the health care provider (for example, hospital, clinical lab, physician group) that will promote compliance with the requirements of Medicare, Medicaid, and all other federal health care programs.

.05 CIAs are case-specific. Their terms are tailored to address the organizational and operating deficiencies related to providing and billing for health care services that have been identified by the OIG, the entity, or others. Detailed compliance requirements are imposed as a condition for continued participation in federal health care programs. A sample CIA, provided by the OIG and intended to identify potential requirements, is included in appendix A (paragraph .33), "Sample Corporate Integrity Agreement Between the Office of Inspector General of the Department of Health and Human Services and [Provider]." Typical agreements cover five years and require the entity to address the following areas:

- Appointment of a compliance officer and establishment of a compliance committee
- Establishment of a code of conduct
- Establishment of policies and procedures regarding the compliance program
- Development of an information and education program as to the CIA requirements, compliance program, and code of conduct
- Annual assessment of billing policies, procedures, and practices
- Establishment of a confidential disclosure program
- Prohibition of employment of excluded or convicted persons
- Notification to OIG of investigation or legal proceedings
- Reporting of credible evidence of misconduct
- Notifications to OIG of new provider locations
- Provision of implementation and annual reports
- Proper notification and submission of required reports
- Granting of OIG access to documents and individuals to conduct assessments
- Documentation of record retention requirements
- Awareness of disclosure criteria
- Agreement to comply with certain default provisions, penalties, and remedies
- Review of rights as to dispute resolution
- Review of effective and binding agreement clauses

Conditions for Engagement Performance

.06 A practitioner may perform an agreed-upon procedures engagement related to management's compliance with a CIA if all of the conditions specified in AT-C section 105, *Concepts Common to all Attestation Engagements*, AT-C section 215, *Agreed-Upon Procedures Engagements*, and AT-C section 315 are met. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, for clarity.]

.07 For the purposes of this SOP, the responsible party is management of the entity. Management is responsible for ensuring that the entity complies with the requirements of the CIA. That responsibility encompasses (a) identifying applicable compliance requirements, (b) establishing and maintaining internal control policies and procedures to provide reasonable assurance that the entity complies with those requirements, (c) evaluating and monitoring the entity's compliance, and (d) preparing reports that satisfy legal, regulatory, or contractual requirements. Management's evaluation may include documentation such as accounting or statistical data, policy manuals, accounting manuals, narrative memoranda, procedural write-ups, flowcharts, completed questionnaires, internal auditors' reports, and other special studies or analyses. The form and extent of documentation will vary depending on the nature of the compliance requirements and the size and complexity of the entity. Management may engage the practitioner to gather information to assist it in evaluating the entity's compliance. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Agreeing on the Terms of the Engagement

.08 Paragraph .14 of AT-C section 215 requires the practitioner to agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. The agreement should include the following items:

- a. The nature of the engagement
- b. Identification of the subject matter and the responsible party
- c. The responsibilities of the practitioner
- d. A statement that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants
- e. A statement that management of the entity is responsible for the subject matter
- f. A statement that the engaging party agrees to provide the practitioner, prior to the completion of the engagement, with a written agreement and acknowledgment that the procedures performed are appropriate for the intended purpose of the engagement
- g. A statement that the engaging party agrees to provide, at the conclusion of the engagement, a representation letter
- h. Reference to the expected form and content of the practitioner's agreed-upon procedures report, including any use restrictions, if applicable
- i. Disclaimers expected to be included in the practitioner's report, if applicable
- j. Assistance to be provided to the practitioner, if applicable
- k. Involvement of a practitioner's external specialist, if applicable
- l. Specified thresholds for reporting exceptions, if applicable

Appendix C (paragraph .35), "Sample Engagement Letter," contains a sample engagement letter that may be used for this kind of engagement. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE

No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.09] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.10] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Practitioner's Responsibilities

.11 The objective of the practitioner's agreed-upon procedures engagement is to apply specific procedures to the entity's compliance with the requirements specified in the CIA and issue a written agreed-upon procedures report that describes the procedures applied and the practitioner's findings without providing an opinion or conclusion on the entity's compliance with the requirements specified in the CIA. (See appendix D [paragraph .36], "Sample Procedures.") [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.12 The practitioner's procedures may be as limited or extensive as the engaging party agrees to and acknowledges are appropriate to assist management and the OIG in evaluating the entity's compliance with the requirements specified in the CIA. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.13] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.14] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Using the Work of a Practitioner's External Specialist²

.15 The practitioner's education and experience enable the practitioner to be knowledgeable about business matters in general, but a practitioner is not expected to have the expertise of a person trained for or qualified to engage in the practice of another profession or occupation. In certain circumstances, it may be appropriate to involve a specialist to assist the practitioner in the performance of one or more procedures. The following are examples:

- An attorney might provide assistance concerning the application of legal terminology in laws, regulations, rules, contracts, or grants to a client's situation.
- A medical specialist might provide assistance in understanding the characteristics of diagnosis codes documented in patient medical records.

[Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

² A *practitioner's specialist* is an individual or organization possessing expertise in a field other than accounting or attestation, whose work in that field is used by the practitioner to assist the practitioner in obtaining evidence for the service being provided. A practitioner's specialist may be either a practitioner's internal specialist (who is a partner or staff, including temporary staff, of the practitioner's firm or a network firm) or a practitioner's external specialist. *Partner* and *firm* refer to their governmental equivalents when relevant. [Footnote revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.16 The practitioner and the engaging party should explicitly agree to the involvement of a practitioner's external specialist if assisting a practitioner in the performance of an agreed-upon procedures engagement. This agreement may be reached when agreeing upon the terms of the engagement or as part of obtaining the engaging party's agreement to the procedures and acknowledgment that the procedures performed are appropriate for the intended purpose of the engagement. The practitioner's report should describe the nature of the assistance provided by the practitioner's external specialist as discussed in paragraphs .19–.20 of AT-C section 215. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.17 A practitioner may apply procedures to the report or work product of a practitioner's external specialist that does not constitute assistance by the external specialist to the practitioner in an agreed-upon procedures engagement. For example, the practitioner may reference information contained in a report of a practitioner's external specialist in describing a procedure. However, it is inappropriate for the practitioner to merely read the external specialist's report solely to describe or repeat the findings, or to take responsibility for all or a portion of any procedures performed by a practitioner's external specialist or the external specialist's work product. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Using the Work of Internal Auditors and Other Practitioners³

.18 The procedures to be enumerated or referred to in the practitioner's report should be performed by the engagement team or other practitioners and not by internal auditors. However, internal auditors may prepare schedules, accumulate data, perform an internal assessment of management's compliance, or provide other information for the practitioner's use in performing the procedures. Also, internal auditors may perform and report separately on procedures that they have carried out. Such procedures may be similar to those that a practitioner may perform in the agreed-upon procedures engagement. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.19 A practitioner may perform procedures on information documented in the working papers of internal auditors. For example, the practitioner may do the following:

- repeat all or some of the procedures.
- determine whether the internal auditors' documentation indicates procedures performed and whether the findings documented are presented in a report by the internal auditors.

[Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

³ AU-C section 610, *Using the Work of Internal Auditors*, does not apply to agreed-upon procedures engagements. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126. Footnote revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.20 However, it is inappropriate for the practitioner to

- merely read the internal auditor's report solely to describe or repeat their findings.
- take responsibility for all or a portion of any procedures performed by internal auditors by reporting those findings as the practitioner's own.
- report in any manner that implies shared responsibility for the procedures with the internal auditors.

[Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Planning the Engagement

.21 Paragraph .33b of AT-C section 105 requires the engagement partner to take responsibility for the overall quality on each attestation engagement, including responsibility for the engagement being planned and performed (including appropriate direction and supervision) to comply with professional standards and applicable legal and regulatory requirements. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.22 Paragraph .32a of AT-C section 105 requires the engagement partner to be satisfied that the engagement team, and any practitioner's external specialists, collectively, have the appropriate competence, including knowledge of the subject matter, and capabilities to comply with professional standards and applicable legal and regulatory requirements and enable the issuance of a practitioner's report that is appropriate in the circumstances. Relevant matters the engagement partner may consider with respect to appropriate competence and capabilities of those persons involved in the engagement collectively include the following:

- Understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation
- Understanding of professional standards and applicable legal and regulatory requirements, for example the attestation standards.
- Technical expertise, including expertise with relevant IT and specialized areas relevant to the subject matter, for example, knowledge of health care regulatory matters to enable them to sufficiently understand the events, transactions, and practices that, in their judgment, have a significant effect on the presentation of the assertions
- Knowledge of relevant industries in which the entity operates
- Ability to apply professional judgment
- Understanding of the firm's quality control policies and procedures

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Documentation

.23 The practitioner should prepare engagement documentation on a timely basis. In an agreed-upon procedures engagement, documentation includes the record of procedures performed, relevant evidence obtained, and findings of the practitioner. The sufficiency of engagement documentation is discussed in paragraphs .34–.41 of AT-C section 105 and in paragraph .42 of AT-C section 215. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.24 Concern over access to the practitioner's documentation might cause some clients to inquire about documentation requirements. In situations where the practitioner is requested to not maintain copies of certain client documentation, or to not prepare and maintain documentation similar to client documents, the practitioner may refer to Interpretation No. 1, "The Effect of an Inability to Obtain Audit Evidence Relating to Income Tax Accruals" (AU-C sec. 9500 par. .01–.22), of AU-C section 500, *Audit Evidence*, for guidance. See Interpretation No. 3, "Providing Access to or Copies of Engagement Documentation to a Regulator," (AT-C sec. 9105 par. .15–.30), of AT-C section 105 for guidance related to providing access to or copies of engagement documentation to a regulator in connection with work performed on an attestation engagement.⁴ [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126. Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Written Representations

.25 The practitioner should request from the engaging party written representations in the form of a letter addressed to the practitioner. The representations should include the following:

- a. A statement that management is responsible for compliance with the terms of the CIA⁵
- b. An acknowledgement of management's responsibility for establishing and maintaining effective internal control over compliance

⁴ Paragraph .10 of AT-C section 105, *Concepts Common to All Attest Engagements*, indicates that engagement documentation may also be referred to as working papers. [Footnote added, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Footnote revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

⁵ Depending on the circumstances, representations in the following areas might be appropriate:

- Violations or possible violations of laws or regulations, such as those related to the Medicare and Medicaid antifraud and abuse statutes
- Compliance of third-party billings with applicable coding guidelines (for example, ICD-9-CM, CPT) and laws and regulations (including medical necessity, proper approvals, and proper rendering of care)
- Proper filing of all required Medicare, Medicaid, and similar reports under the applicable reimbursement rules and regulations (including nature of costs — allowable, patient-related, properly allocated, in accordance with applicable rules and regulations, properly adjusted to reflect prior audit adjustments) and adequacy of disclosures (including disputed costs)

[Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

- c. A statement that management has provided the practitioner with all relevant information and access, as applicable, as agreed upon in the terms of the engagement
- d. A statement that all known matters contradicting the entity's compliance with the CIA and any communication from regulatory agencies or others affecting the entity's compliance with the CIA have been disclosed to the practitioner, including communications received between the end of the reporting period and the date of the practitioner's report
- e. A description of any related material fraud or abuse, other fraud, abuse or illegal acts that, whether or not material, involve management or other employees who have a significant role in the entity's design, implementation, and monitoring of the policies and procedures in place upon which compliance is based
- f. A statement that management has disclosed to the practitioners, orally or in writing, information about past noncompliance issues covered in the settlement agreement that gave rise to the CIA and the related corrective measures taken to support compliance in those areas
- g. A statement that management has disclosed to the practitioner all known events subsequent to the period (or point in time) of the entity's compliance with the CIA being reported on that would have a material effect on the entity's compliance with the CIA
- h. Any additional representations that the practitioner determines are appropriate

When one or more of the written representations that the practitioner has requested are not provided or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should (a) discuss the matter with management; (b) reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general; and (c) if any of the matters are not resolved to the practitioner's satisfaction, take appropriate action, including determining the possible effect on the practitioner's report.⁶ [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Reporting Considerations

.26 A practitioner should present the results of applying agreed-upon procedures to the specific subject matter in the form of findings. The practitioner's report should not express an opinion or conclusion on the subject matter. For example, the report should not include a statement that "nothing came to our attention that caused us to believe that the subject matter is not fairly stated in

⁶ See paragraphs .30 and .A44–.A45 of AT-C section 215, *Agreed-Upon Procedures Engagements*. [Footnote added, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

accordance with the criteria." [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.27 The practitioner should report all findings from the application of the agreed-upon procedures. Any specified threshold established by the engaging party for reporting exceptions should be described in the practitioner's report. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.28 Although the practitioner need not perform procedures beyond the procedures agreed to and acknowledged by the engaging party to be appropriate for the intended purpose of the engagement, if in connection with the application of the procedures, and through the completion of the engagement, matters related to the entity's noncompliance come to the practitioner's attention by other means that significantly contradict the entity's compliance with the CIA, the practitioner should discuss the matter with the engaging party and take appropriate action, including determining whether the practitioner's report should be revised to disclose the matter. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.29] [Paragraph renumbered and deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.30 The practitioner should follow the reporting requirements in paragraphs .31–.37 of AT-C section 215 and paragraph .26 of AT-C section 315. A sample report is included in appendix E (paragraph .37), "Sample Report." [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.31 When evaluating compliance with certain requirements of a CIA requires interpretation of the laws, regulations, rules, contracts, or grants that establish those requirements, the practitioner evaluates whether the criteria (the specified requirements of the CIA) are suitable for performing such agreed-upon procedures and reporting findings. If these interpretations are significant, the practitioner may include a paragraph describing the interpretations made by management and the source of the interpretations. An example of such a paragraph, which would precede the procedures and findings paragraph(s), follows:

We have been informed that, under *[name of entity's]* interpretation of *[identify the compliance requirement]*, *[explain the nature and source of the relevant interpretation]*.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.32 The report should be dated no earlier than the date on which the practitioner completed the procedures and determined the findings, including that

- a. the attestation documentation has been reviewed, and

- b.* if applicable, the written presentation of the subject matter has been prepared.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph revised, April 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Appendix A — Sample Corporate Integrity Agreement Between the Office of Inspector General of the Department of Health and Human Services and [Provider]

I. Preamble

[Provider] ("[Provider]") hereby enters into this Corporate Integrity Agreement ("CIA") with the Office of Inspector General ("OIG") of the United States Department of Health and Human Services ("HHS") to ensure compliance by its employees with the requirements of Medicare, Medicaid and all other Federal health care programs (as defined in 42 U.S.C. 1320a-7b(f)) (hereinafter collectively referred to as the "Federal health care programs"). [Provider's] compliance with the terms and conditions in this CIA shall constitute an element of [Provider's] present responsibility with regard to participation in the Federal health care programs. Contemporaneously with this CIA, [Provider] is entering into a Settlement Agreement with the United States, and this CIA is incorporated by reference into the Settlement Agreement.

II. Term of the CIA

The period of the compliance obligations assumed by [Provider] under this CIA shall be 5 years from the effective date of this CIA (unless otherwise specified). The effective date of this CIA will be the date on which the final signatory of this CIA executes this CIA (the "effective date").*

III. Corporate Integrity Obligations

[Provider] shall establish a compliance program that includes the following elements:

A. Compliance Officer

Within ninety (90) days after the effective date of this CIA, [Provider] shall appoint an individual to serve as Compliance Officer, who shall be responsible for developing and implementing policies, procedures, and practices designed to ensure compliance with the requirements set forth in this CIA and with the requirements of the Federal health care programs. The Compliance Officer shall be a member of senior management of [Provider], shall make regular (at least quarterly) reports regarding compliance matters directly to the CEO and/or to the Board of Directors of [Provider] and shall be authorized to report to the Board of Directors at any time. The Compliance Officer shall be responsible for monitoring the day-to-day activities engaged in by [Provider] to further its compliance objectives as well as any reporting obligations created under this CIA. In the event a new Compliance Officer is appointed during the term of this CIA, [Provider] shall notify the OIG, in writing, within fifteen (15) days of such a change.

[Provider] shall also appoint a Compliance Committee within ninety (90) days after the effective date of this CIA. The Compliance Committee shall, at a minimum, include the Compliance Officer and any other appropriate officers as necessary to meet the requirements of this CIA within the provider's

* Source: Office of the Inspector General of the United States Department of Health and Human Services.

corporate structure (e.g., senior executives of each major department, such as billing, clinical, human resources, audit, and operations). The Compliance Officer shall chair the Compliance Committee and the Committee shall support the Compliance Officer in fulfilling his/her responsibilities.

B. Written Standards

1. *Code of Conduct.* Within ninety (90) days of the effective date of this CIA, [Provider] shall establish a Code of Conduct. The Code of Conduct shall be distributed to all employees within ninety (90) days of the effective date of this CIA. [Provider] shall make the promotion of, and adherence to, the Code of Conduct an element in evaluating the performance of managers, supervisors, and all other employees. The Code of Conduct shall, at a minimum, set forth:
 - a. [Provider's] commitment to full compliance with all statutes, regulations, and guidelines applicable to Federal health care programs, including its commitment to prepare and submit accurate billings consistent with Federal health care program regulations and procedures or instructions otherwise communicated by the Health Care Financing Administration ("HCFA") (or other appropriate regulatory agencies) and/or its agents;
 - b. [Provider's] requirement that all of its employees shall be expected to comply with all statutes, regulations, and guidelines applicable to Federal health care programs and with [Provider's] own policies and procedures (including the requirements of this CIA);
 - c. the requirement that all of [Provider's] employees shall be expected to report suspected violations of any statute, regulation, or guideline applicable to Federal health care programs or with [Provider's] own policies and procedures;
 - d. the possible consequences to both [Provider] and to any employee of failure to comply with all statutes, regulations, and guidelines applicable to Federal health care programs and with [Provider's] own policies and procedures or of failure to report such non-compliance; and
 - e. the right of all employees to use the confidential disclosure program, as well as [Provider's] commitment to confidentiality and non-retaliation with respect to disclosures.

Within ninety (90) days of the effective date of the CIA, each employee shall certify, in writing, that he or she has received, read, understands, and will abide by [Provider's] Code of Conduct. New employees shall receive the Code of Conduct and shall complete the required certification within two (2) weeks after the commencement of their employment or within ninety (90) days of the effective date of the CIA, whichever is later.

[Provider] will annually review the Code of Conduct and will make any necessary revisions. These revisions shall be distributed within thirty (30) days of initiating such a change. Employees shall certify on an annual basis that they have received, read, understand and will abide by the Code of Conduct.

2. *Policies and Procedures.* Within ninety (90) days of the effective date of this CIA, [Provider] shall develop and initiate implementation of written Policies and Procedures regarding the operation of

[*Provider's*] compliance program and its compliance with all federal and state health care statutes, regulations, and guidelines, including the requirements of the Federal health care programs. At a minimum, the Policies and Procedures shall specifically address [*insert language relevant to allegations in the case*]. In addition, the Policies and Procedures shall include disciplinary guidelines and methods for employees to make disclosures or otherwise report on compliance issues to [*Provider*] management through the Confidential Disclosure Program required by section III.E. [*Provider*] shall assess and update as necessary the Policies and Procedures at least annually and more frequently, as appropriate. A summary of the Policies and Procedures will be provided to OIG in the Implementation Report. The Policies and Procedures will be available to OIG upon request.

Within ninety (90) days of the effective date of the CIA, the relevant portions of the Policies and Procedures shall be distributed to all appropriate employees. Compliance staff or supervisors should be available to explain any and all policies and procedures.

C. Training and Education

1. *General Training.* Within ninety (90) days of the effective date of this CIA, [*Provider*] shall provide at least two (2) hours of training to each employee. This general training shall explain [*Provider's*]:
 - a. Corporate Integrity Agreement requirements;
 - b. Compliance Program (including the Policies and Procedures as they pertain to general compliance issues); and
 - c. Code of Conduct.

These training materials shall be made available to the OIG, upon request.

New employees shall receive the general training described above within thirty (30) days of the beginning of their employment or within ninety (90) days after the effective date of this CIA, whichever is later. Each year, every employee shall receive such general training on an annual basis.

2. *Specific Training.* Within ninety (90) days of the effective date of this CIA, each employee who is involved directly or indirectly in the delivery of patient care and/or in the preparation or submission of claims for reimbursement for such care (including, but not limited to, coding and billing) for any Federal health care programs shall receive at least [*insert number of training hours*] hours of training in addition to the general training required above. This training shall include a discussion of:
 - a. the submission of accurate bills for services rendered to Medicare and/or Medicaid patients;
 - b. policies, procedures and other requirements applicable to the documentation of medical records;
 - c. the personal obligation of each individual involved in the billing process to ensure that such billings are accurate;
 - d. applicable reimbursement rules and statutes;
 - e. the legal sanctions for improper billings; and
 - f. examples of proper and improper billing practices.

These training materials shall be made available to OIG, upon request. Persons providing the training must be knowledgeable about the subject area.

Affected new employees shall receive this training within thirty (30) days of the beginning of their employment or within ninety (90) days of the effective date of this CIA, whichever is later. If a new employee has any responsibility for the delivery of patient care, the preparation or submission of claims and/or the assignment of procedure codes prior to completing this specific training, a [Provider] employee who has completed the substantive training shall review all of the untrained person's work regarding the assignment of billing codes.

Each year, every employee shall receive such specific training on an annual basis.

3. *Certification.* Each employee shall certify, in writing, that he or she has attended the required training. The certification shall specify the type of training received and the date received. The Compliance Officer shall retain the certifications, along with specific course materials. These shall be made available to OIG upon request.

D. Review Procedures

[Provider] shall retain an entity, such as an accounting, auditing or consulting firm (hereinafter "Independent Review Organization"), to perform review procedures to assist [Provider] in assessing the adequacy of its billing and compliance practices pursuant to this CIA. This shall be an annual requirement and shall cover a twelve (12) month period. The Independent Review Organization must have expertise in the billing, coding, reporting and other requirements of the Federal health care programs from which [Provider] seeks reimbursement. The Independent Review Organization must be retained to conduct the assessment of the first year within ninety (90) days of the effective date of this CIA. For purposes of complying with this review procedures requirement, the OIG at its discretion, may permit the [Provider] to utilize internal auditors to perform the review(s). In such case, the [Provider] will engage the Independent Review Organization to verify the propriety of the internal auditors' methods and accuracy of their results. The [Provider] will request the Independent Review Organization to produce a report on its findings which report shall be included in the Annual Report to the OIG.

The Independent Review Organization (or the [Provider], if permitted by the OIG, as set forth above) will conduct two separate engagements. One will be an analysis of [Provider's] billing to the Federal health care programs to assist the [Provider] and OIG in determining compliance with all applicable statutes, regulations, and directives/guidance ("billing engagement"). The second engagement will assist the [Provider] and OIG in determining whether [Provider] is in compliance with this CIA ("compliance engagement").

1. *Billing Engagement.* The billing engagement shall consist of a review of a statistically valid sample of claims for the relevant period. The sample size shall be determined through the use of a probe sample.¹ At a minimum, the full sample must be within a ninety (90) percent confidence level and a precision of twenty-five (25) percent. The probe sample must contain at least thirty (30) sample units and cannot be used as part of the full sample.

¹ Probe sample is defined as a small, random preliminary sample.

Both the probe sample and the sample must be selected through random numbers. [Provider] shall use OIG's Office of Audit Services Statistical Sampling Software, also known as "RAT-STATS", which is available through the Internet at <https://oig.hhs.gov/compliance/rat-stats/index.asp>.

Each annual billing engagement analysis shall include the following components in its methodology:

- a. **Billing Engagement Objective:** Provide a statement stating clearly the objective intended to be achieved by the billing engagement and the procedure or combination of procedures that will be applied to achieve the objective.
- b. **Billing Engagement Population:** Identify the population, which is the group about which information is needed. Explain the methodology used to develop the population and provide the basis for this determination.
- c. **Sources of Data:** Provide a full description of the source of the information upon which the billing engagement conclusions will be based, including the legal or other standards applied, documents relied upon, payment data, and/or any contractual obligations.
- d. **Sampling Unit:** Define the sampling unit, which is any of the designated elements that comprise the population of interest.
- e. **Sampling Frame:** Identify the sampling frame, which is the totality of the sampling units from which the sample will be selected.

As part of the billing engagement:

- a. Inquire of management as to the procedures and controls affecting the billing process subject to the annual assessment as specified in the CIA. Document that aspect of the billing process (e.g., flow of documents, processing activities), and those controls that will be tested in the sample. The documentation may consist of flow charts, excerpts from policies and procedures manuals, control questionnaires, etc.
 - b. Report the sample results, including the overall error rate and the nature of the errors found (e.g., no documentation, inadequate documentation, assignment of incorrect code).
 - c. Document findings related to [Provider's] procedures to correct inaccurate billings and codings to the Federal health care programs and findings regarding the steps [Provider] is taking to bring its operations into compliance or to correct problems identified by the audit.
2. **Agreed-upon Procedures or Compliance Engagement.** An Independent Review Organization (or the [Provider], if permitted by the OIG) shall also conduct an agreed-upon procedures or compliance engagement, which shall assist the users in determining whether [Provider's] program, policies, procedures, and operations comply with the terms of this CIA. This engagement shall include a section by section analysis of the requirements of this CIA.

A complete copy of the Independent Review Organization's billing and agreed-upon procedures or compliance engagement shall be included in each of [Provider's] Annual Reports to OIG.

3. *Disclosure of Overpayments and Material Deficiencies.* If, as a result of these engagements, [Provider] or the Independent Review Organization identifies any billing, coding or other policies, procedures and/or practices that result in an overpayment, [Provider] shall notify the payor (e.g., Medicare fiscal intermediary or carrier) within 30 days of discovering the deficiency or overpayment and take remedial steps within 60 days of discovery (or such additional time as may be agreed to by the payor) to correct the problem, including preventing the deficiency from recurring. The notice to the payor shall include:
 - a. a statement that the refund is being made pursuant to this CIA;
 - b. a description of the complete circumstances surrounding the overpayment;
 - c. the methodology by which the overpayment was determined;
 - d. the amount of the overpayment;
 - e. any claim-specific information used to determine the overpayment (e.g., beneficiary health insurance number, claim number, service date, and payment date);
 - f. the cost reporting period; and
 - g. the provider identification number under which the repayment is being made.

If [Provider] determines an overpayment represents a material deficiency, contemporaneous with [Provider's] notification to the payor as provided above, [Provider] shall also notify OIG of:

- a. a complete description of the material deficiency;
- b. amount of overpayment due to the material deficiency;
- c. [Provider's] action(s) to correct and prevent such material deficiency from recurring;
- d. the payor's name, address, and contact person where the overpayment was sent;
- e. the date of the check and identification number (or electronic transaction number) on which the overpayment was repaid.

For purposes of this CIA, an "overpayment" shall mean the amount of money the provider has received in excess of the amount due and payable under the Federal health care programs' statutes, regulations or program directives, including carrier and intermediary instructions.

For purposes of this CIA, a "material deficiency" shall mean anything that involves: (i) a substantial overpayment or improper payment relating to the Medicare and/or Medicaid programs; (ii) conduct or policies that clearly violate the Medicare and/or Medicaid statute, regulations or directives issued by HCFA and/or its agents; or (iii) serious quality of care implications for federal health care beneficiaries or recipients. A material deficiency may be the result of an isolated event or a series of occurrences.

4. *Verification/Validation.* In the event that the OIG determines that it is necessary to conduct an independent review to determine whether or the extent to which [Provider] is complying with its obligations under this CIA, [Provider] agrees to pay for the

reasonable cost of any such review or engagement by the OIG or any of its designated agents.

E. Confidential Disclosure Program

Within ninety (90) days after the effective date of this CIA, [Provider] shall establish a Confidential Disclosure Program, which must include measures (e.g., a toll-free compliance telephone line) to enable employees, contractors, agents or other individuals to disclose, to the Compliance Officer or some other person who is not in the reporting individual's chain of command, any identified issues or questions associated with [Provider's] policies, practices or procedures with respect to the Federal health care program, believed by the individual to be inappropriate. [Provider] shall publicize the existence of the hotline (e.g., e-mail to employees or post hotline number in prominent common areas).

The Confidential Disclosure Program shall emphasize a non-retribution, non-retaliation policy, and shall include a reporting mechanism for anonymous, confidential communication. Upon receipt of a complaint, the Compliance Officer (or designee) shall gather the information in such a way as to elicit all relevant information from the individual reporting the alleged misconduct. The Compliance Officer (or designee) shall make a preliminary good faith inquiry into the allegations set forth in every disclosure to ensure that he or she has obtained all of the information necessary to determine whether a further review should be conducted. For any disclosure that is sufficiently specific so that it reasonably: (1) permits a determination of the appropriateness of the alleged improper practice, and (2) provides an opportunity for taking corrective action, [Provider] shall conduct an internal review of the allegations set forth in such a disclosure and ensure that proper follow-up is conducted.

The Compliance Officer shall maintain a confidential disclosure log, which shall include a record and summary of each allegation received, the status of the respective investigations, and any corrective action taken in response to the investigation.

F. Ineligible Persons

[Provider] shall not hire or engage as contractors any "Ineligible Person." For purposes of this CIA, an "Ineligible Person" shall be any individual or entity who: (i) is currently excluded, suspended, debarred or otherwise ineligible to participate in the Federal health care programs; or (ii) has been convicted of a criminal offense related to the provision of health care items or services and has not been reinstated in the Federal health care programs after a period of exclusion, suspension, debarment, or ineligibility.

Within ninety (90) days of the effective date of this CIA, [Provider] will review its list of current employees and contractors against the General Services Administration's List of Parties Excluded from Federal Programs (available through the Internet at www.arinet.gov/epl) and the HHS/OIG Cumulative Sanction Report (available through the Internet at www.dhhs.gov/progorg/oig) to ensure that it is not currently employing or contracting with any Ineligible Person. Thereafter, [Provider] will review the list once semi-annually to ensure that no current employees or contractors are or have become Ineligible Persons.

To prevent hiring or contracting with any Ineligible Person, [Provider] shall screen all prospective employees and prospective contractors prior to engaging their services by (i) requiring applicants to disclose whether they are Ineligible Persons, and (ii) reviewing the General Services Administration's List of Parties Excluded from Federal Programs (available through the Internet at www.arinet.gov/epl) and the HHS/OIG Cumulative Sanction Report (available through the Internet at www.dhhs.gov/progorg/oig).

If [Provider] has notice that an employee or agent is charged with a criminal offense related to any Federal health care program, or is suspended or proposed

for exclusion during his or her employment or contract with [Provider], within 10 days of receiving such notice [Provider] will remove such employee from responsibility for, or involvement with, [Provider's] business operations related to the Federal health care programs until the resolution of such criminal action, suspension, or proposed exclusion. If [Provider] has notice that an employee or agent has become an Ineligible Person, [Provider] will remove such person from responsibility for, or involvement with, [Provider's] business operations related to the Federal health care programs and shall remove such person from any position for which the person's salary or the items or services rendered, ordered, or prescribed by the person are paid in whole or in part, directly or indirectly, by Federal health care programs or otherwise with Federal funds at least until such time as the person is reinstated into participation in the Federal health care programs.

G. Notification of Proceedings

Within thirty (30) days of discovery, [Provider] shall notify OIG, in writing, of any ongoing investigation or legal proceeding conducted or brought by a governmental entity or its agents involving an allegation that [Provider] has committed a crime or has engaged in fraudulent activities or any other knowing misconduct. This notification shall include a description of the allegation, the identity of the investigating or prosecuting agency, and the status of such investigation or legal proceeding. [Provider] shall also provide written notice to OIG within thirty (30) days of the resolution of the matter, and shall provide OIG with a description of the findings and/or results of the proceedings, if any.

H. Reporting

1. *Credible evidence of misconduct.* If [Provider] discovers credible evidence of misconduct from any source and, after reasonable inquiry, has reason to believe that the misconduct may violate criminal, civil, or administrative law concerning [Provider's] practices relating to the Federal health care programs, then [Provider] shall promptly report the probable violation of law to OIG. Defendants shall make this disclosure as soon as practicable, but, not later than thirty (30) days after becoming aware of the existence of the probable violation. The [Provider's] report to OIG shall include:
 - a. the findings concerning the probable violation, including the nature and extent of the probable violation;
 - b. [Provider's] actions to correct such probable violation; and
 - c. any further steps it plans to take to address such probable violation and prevent it from recurring.

To the extent the misconduct involves an overpayment, the report shall include the information listed in section III.D.3 regarding material deficiencies.

2. *Inappropriate Billing.* If [Provider] discovers inappropriate or incorrect billing through means other than the Independent Review Organization's engagement, the provider shall follow procedures in section III.D.3 regarding overpayments and material deficiencies.

IV. New Locations

In the event that [Provider] purchases or establishes new business units after the effective date of this CIA, [Provider] shall notify OIG of this fact within thirty (30) days of the date of purchase or establishment. This notification shall include the location of the new operation(s), phone number, fax number, Federal health care program provider number(s) (if any), and the corresponding

payor(s) (contractor specific) that has issued each provider number. All employees at such locations shall be subject to the requirements in this CIA that apply to new employees (e.g., completing certifications and undergoing training).

V. Implementation and Annual Reports

A. Implementation Report

Within one hundred and twenty (120) days after the effective date of this CIA, [Provider] shall submit a written report to OIG summarizing the status of its implementation of the requirements of this CIA. This Implementation Report shall include:

1. the name, address, phone number and position description of the Compliance Officer required by section III.A;
2. the names and positions of the members of the Compliance Committee required by section III.A;
3. a copy of [Provider's] Code of Conduct required by section III.B.1;
4. the summary of the Policies and Procedures required by section III.B.2;
5. a description of the training programs required by section III.C including a description of the targeted audiences and a schedule of when the training sessions were held;
6. a certification by the Compliance Officer that:
 - a. the Policies and Procedures required by section III.B have been developed, are being implemented, and have been distributed to all pertinent employees;
 - b. all employees have completed the Code of Conduct certification required by section III.B.1; and
 - c. all employees have completed the training and executed the certification required by section III.C;
7. a description of the confidential disclosure program required by section III.E;
8. the identity of the Independent Review Organization(s) and the proposed start and completion date of the first audit; and
9. a summary of personnel actions taken pursuant to section III.F.

B. Annual Reports

[Provider] shall submit to OIG an Annual Report with respect to the status and findings of [Provider's] compliance activities. The Annual Reports shall include:

1. any change in the identity or position description of the Compliance Officer and/or members of the Compliance Committee described in section III.A;
2. a certification by the Compliance Officer that:
 - a. all employees have completed the annual Code of Conduct certification required by section III.B.1; and
 - b. all employees have completed the training and executed the certification required by section III.C;

3. notification of any changes or amendments to the Policies and Procedures required by section III.B and the reasons for such changes (e.g., change in contractor policy);
4. a complete copy of the report prepared pursuant to the Independent Review Organization's billing and compliance engagement, including a copy of the methodology used;
5. [Provider's] response/corrective action plan to any issues raised by the Independent Review Organization;
6. a summary of material deficiencies reported throughout the course of the previous twelve (12) months pursuant to III.D.3 and III.H;
7. a report of the aggregate overpayments that have been returned to the Federal health care programs that were discovered as a direct or indirect result of implementing this CIA. Overpayment amounts should be broken down into the following categories: Medicare, Medicaid (report each applicable state separately) and other Federal health care programs;
8. a copy of the confidential disclosure log required by section III.E;
9. a description of any personnel action (other than hiring) taken by [Provider] as a result of the obligations in section III.F;
10. a summary describing any ongoing investigation or legal proceeding conducted or brought by a government entity involving an allegation that [Provider] has committed a crime or has engaged in fraudulent activities, which have been reported pursuant to section III.G. The statement shall include a description of the allegation, the identity of the investigating or prosecuting agency, and the status of such investigation, legal proceeding or requests for information;
11. a corrective action plan to address the probable violations of law identified in section III.H; and
12. a listing of all of the [Provider's] locations (including locations and mailing addresses), the corresponding name under which each location is doing business, the corresponding phone numbers and fax numbers, each location's Federal health care program provider identification number(s) and the payor (specific contractor) that issued each provider identification number.

The first Annual Report shall be received by the OIG no later than one year and thirty (30) days after the effective date of this CIA. Subsequent Annual Reports shall be submitted no later than the anniversary date of the due date of the first Annual Report.

C. Certifications

The Implementation Report and Annual Reports shall include a certification by the Compliance Officer under penalty of perjury, that: (1) [Provider] is in compliance with all of the requirements of this CIA, to the best of his or her knowledge; and (2) the Compliance Officer has reviewed the Report and has made reasonable inquiry regarding its content and believes that, upon such inquiry, the information is accurate and truthful.

VI. Notifications and Submission of Reports

Unless otherwise stated in writing subsequent to the effective date of this CIA, all notifications and reports required under this CIA shall be submitted to the entities listed below:

OIG:

Civil Recoveries Branch — Compliance Unit
Office of Counsel to the Inspector General
Office of Inspector General
U.S. Department of Health and Human Services
Cohen Building, Room 5527
330 Independence Avenue, SW
Washington, DC 20201
Phone 202-619-2078; Fax 202-205-0604

[*Provider*]:

[*Address and Telephone number of Provider's Compliance Contact*]

VII. OIG Inspection, Audit and Review Rights

In addition to any other rights OIG may have by statute, regulation, or contract, OIG or its duly authorized representative(s), may examine [*Provider's*] books, records, and other documents and supporting materials for the purpose of verifying and evaluating: (a) [*Provider's*] compliance with the terms of this CIA; and (b) [*Provider's*] compliance with the requirements of the Federal health care programs in which it participates. The documentation described above shall be made available by [*Provider*] to OIG or its duly authorized representative(s) at all reasonable times for inspection, audit or reproduction. Furthermore, for purposes of this provision, OIG or its duly authorized representative(s) may interview any of [*Provider's*] employees who consent to be interviewed at the employee's place of business during normal business hours or at such other place and time as may be mutually agreed upon between the employee and OIG. [*Provider*] agrees to assist OIG in contacting and arranging interviews with such employees upon OIG's request. [*Provider's*] employees may elect to be interviewed with or without a representative of [*Provider*] present.

VIII. Document and Record Retention

[*Provider*] shall maintain for inspection all documents and records relating to reimbursement from the Federal health care programs or to compliance with this CIA one year longer than the term of this CIA (or longer if otherwise required by law).

IX. Disclosures

Subject to HHS's Freedom of Information Act ("FOIA") procedures, set forth in 45 C.F.R. Part 5, the OIG shall make a reasonable effort to notify [*Provider*] prior to any release by OIG of information submitted by [*Provider*] pursuant to its obligations under this CIA and identified upon submission by [*Provider*] as trade secrets, commercial or financial information and privileged and confidential under the FOIA rules. [*Provider*] shall refrain from identifying any information as trade secrets, commercial or financial information and privileged and confidential that does not meet the criteria for exemption from disclosure under FOIA.

X. Breach and Default Provisions

[*Provider*] is expected to fully and timely comply with all of the obligations herein throughout the term of this CIA or other time frames herein agreed to.

A. Stipulated Penalties for Failure to Comply with Certain Obligations

As a contractual remedy, [Provider] and OIG hereby agree that failure to comply with certain obligations set forth in this CIA may lead to the imposition of the following monetary penalties (hereinafter referred to as "Stipulated Penalties") in accordance with the following provisions.

1. A Stipulated Penalty of \$2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day, beginning 120 days after the effective date of this CIA and concluding at the end of the term of this CIA, [Provider] fails to have in place any of the following:
 - a. a Compliance Officer;
 - b. a Compliance Committee;
 - c. a written Code of Conduct;
 - d. written Policies and Procedures;
 - e. a training program; and
 - f. a Confidential Disclosure Program;
2. A Stipulated Penalty of \$2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day [Provider] fails to meet any of the deadlines to submit the Implementation Report or the Annual Reports to the OIG.
3. A Stipulated Penalty of \$2,000 (which shall begin to accrue on the date the failure to comply began) for each day [Provider]:
 - a. hires or contracts with an Ineligible Person after that person has been listed by a federal agency as excluded, debarred, suspended or otherwise ineligible for participation in the Medicare, Medicaid or any other Federal health care program (as defined in 42 U.S.C. 1320a7b(f)). This Stipulated Penalty shall not be demanded for any time period if [Provider] can demonstrate that it did not discover the person's exclusion or other ineligibility after making a reasonable inquiry (as described in section III.F) as to the status of the person;
 - b. employs or contracts with an Ineligible Person and that person: (i) has responsibility for, or involvement with, [Provider's] business operations related to the Federal health care programs or (ii) is in a position for which the person's salary or the items or services rendered, ordered, or prescribed by the person are paid in whole or in part, directly or indirectly, by the Federal health care programs or otherwise with Federal funds (this Stipulated Penalty shall not be demanded for any time period during which [Provider] can demonstrate that it did not discover the person's exclusion or other ineligibility after making a reasonable inquiry (as described in III.F) as to the status of the person);
 - c. employs or contracts with a person who: (i) has been charged with a criminal offense related to

any Federal health care program, or (ii) is suspended or proposed for exclusion, and that person has responsibility for, or involvement with, [Provider's] business operations related to the Federal health care programs (this Stipulated Penalty shall not be demanded for any time period before 10 days after [Provider] received notice of the relevant matter or after the resolution of the matter).

4. A Stipulated Penalty of \$1,500 (which shall begin to accrue on the date the [Provider] fails to grant access) for each day [Provider] fails to grant access to the information or documentation as required in section V of this CIA.
5. A Stipulated Penalty of \$1,000 (which shall begin to accrue ten (10) days after the date that OIG provides notice to [Provider] of the failure to comply) for each day [Provider] fails to comply fully and adequately with any obligation of this CIA. In its notice to [Provider], the OIG shall state the specific grounds for its determination that the [Provider] has failed to comply fully and adequately with the CIA obligation(s) at issue.

B. Payment of Stipulated Penalties

1. *Demand Letter.* Upon a finding that [Provider] has failed to comply with any of the obligations described in section X.A and determining that Stipulated Penalties are appropriate, OIG shall notify [Provider] by personal service or certified mail of (a) [Provider's] failure to comply; and (b) the OIG's exercise of its contractual right to demand payment of the Stipulated Penalties (this notification is hereinafter referred to as the "Demand Letter").

Within fifteen (15) days of the date of the Demand Letter, [Provider] shall either (a) cure the breach to the OIG's satisfaction and pay the applicable stipulated penalties, or (b) request a hearing before an HHS administrative law judge ("ALJ") to dispute the OIG's determination of noncompliance, pursuant to the agreed-upon provisions set forth below in section X.D. In the event [Provider] elects to request an ALJ hearing, the Stipulated Penalties shall continue to accrue until [Provider] cures, to the OIG's satisfaction, the alleged breach in dispute. Failure to respond to the Demand Letter in one of these two manners within the allowed time period shall be considered a material breach of this CIA and shall be grounds for exclusion under section X.C.

2. *Timely Written Requests for Extensions.* [Provider] may submit a timely written request for an extension of time to perform any act or file any notification or report required by this CIA. Notwithstanding any other provision in this section, if OIG grants the timely written request with respect to an act, notification, or report, Stipulated Penalties for failure to perform the act or file the notification or report shall not begin to accrue until one day after [Provider] fails to meet the revised deadline as agreed to by the OIG-approved extension. Notwithstanding any other provision in this section, if OIG denies such a timely written request, Stipulated Penalties for failure to perform the act or file the notification or report shall not begin to accrue until two (2) business days after

[*Provider*] receives OIG's written denial of such request. A "timely written request" is defined as a request in writing received by OIG at least five (5) business days prior to the date by which any act is due to be performed or any notification or report is due to be filed.

3. *Form of Payment.* Payment of the Stipulated Penalties shall be made by certified or cashier's check, payable to "Secretary of the Department of Health and Human Services," and submitted to OIG at the address set forth in section VI.
4. *Independence from Material Breach Determination.* Except as otherwise noted, these provisions for payment of Stipulated Penalties shall not affect or otherwise set a standard for the OIG's determination that [*Provider*] has materially breached this CIA, which decision shall be made at the OIG's discretion and governed by the provisions in section X.C, below.

C. Exclusion for Material Breach of this CIA

1. *Notice of Material Breach and Intent to Exclude.* The parties agree that a material breach of this CIA by [*Provider*] constitutes an independent basis for [*Provider's*] exclusion from participation in the Federal health care programs (as defined in 42 U.S.C. 1320a7b(f)). Upon a determination by OIG that [*Provider*] has materially breached this CIA and that exclusion should be imposed, the OIG shall notify [*Provider*] by certified mail of (a) [*Provider's*] material breach; and (b) OIG's intent to exercise its contractual right to impose exclusion (this notification is hereinafter referred to as the "Notice of Material Breach and Intent to Exclude").
2. *Opportunity to Cure.* [*Provider*] shall have thirty-five (35) days from the date of the Notice of Material Breach and Intent to Exclude Letter to demonstrate to the OIG's satisfaction that:
 - a. [*Provider*] is in *full* compliance with this CIA;
 - b. the alleged material breach has been cured; or
 - c. the alleged material breach cannot be cured within the 35-day period, but that: (i) [*Provider*] has begun to take action to cure the material breach, (ii) [*Provider*] is pursuing such action with due diligence, and (iii) [*Provider*] has provided to OIG a reasonable timetable for curing the material breach.
3. *Exclusion Letter.* If at the conclusion of the thirty-five (35) day period, [*Provider*] fails to satisfy the requirements of section X.C.2, OIG may exclude [*Provider*] from participation in the Federal health care programs. OIG will notify [*Provider*] in writing of its determination to exclude [*Provider*] (this letter shall be referred to hereinafter as the "Exclusion Letter"). Subject to the Dispute Resolution provisions in section X.D, below, the exclusion shall go into effect thirty (30) days after the date of the Exclusion Letter. The exclusion shall have national effect and will also apply to all other federal procurement and non-procurement programs. If [*Provider*] is excluded under the provisions of this CIA, [*Provider*] may seek reinstatement pursuant to the provisions at 42 C.F.R. §§ 1001.3001–.3004.

4. *Material Breach.* A material breach of this CIA means:
 - a. a failure by [Provider] to report a material deficiency, take corrective action and pay the appropriate refunds, as provided in section III.D;
 - b. repeated or flagrant violations of the obligations under this CIA, including, but not limited to, the obligations addressed in section X.A of this CIA;
 - c. a failure to respond to a Demand Letter concerning the payment of Stipulated Penalties in accordance with section X.B above; or
 - d. a failure to retain and use an Independent Review Organization for review purposes in accordance with section III.D.

D. Dispute Resolution

1. *Review Rights.* Upon the OIG's delivery to [Provider] of its Demand Letter or of its Exclusion Letter, and as an agreed-upon contractual remedy for the resolution of disputes arising under the obligation of this CIA, [Provider] shall be afforded certain review rights comparable to the ones that are provided in 42 U.S.C. §§ 1320a7(f) and 42 C.F.R. § 1005 as if they applied to the Stipulated Penalties or exclusion sought pursuant to this CIA. Specifically, the OIG's determination to demand payment of Stipulated Penalties or to seek exclusion shall be subject to review by an ALJ and, in the event of an appeal, the Departmental Appeals Board ("DAB"), in a manner consistent with the provisions in 42 C.F.R. §§ 1005.2–.21. Notwithstanding the language in 42 C.F.R. § 1005.2(c), the request for a hearing involving stipulated penalties shall be made within fifteen (15) days of the date of the Demand Letter and the request for a hearing involving exclusion shall be made within thirty (30) days of the date of the Exclusion Letter.
2. *Stipulated Penalties Review.* Notwithstanding any provision of Title 42 of the United States Code or Chapter 42 of the Code of Federal Regulations, the only issues in a proceeding for stipulated penalties under this CIA shall be (a) whether [Provider] was in full and timely compliance with the obligations of this CIA for which the OIG demands payment; and (b) the period of noncompliance. [Provider] shall have the burden of proving its full and timely compliance and the steps taken to cure the noncompliance, if any. If the ALJ finds for the OIG with regard to a finding of a breach of this CIA and orders [Provider] to pay Stipulated Penalties, such Stipulated Penalties shall become due and payable twenty (20) days after the ALJ issues such a decision notwithstanding that [Provider] may request review of the ALJ decision by the DAB.
3. *Exclusion Review.* Notwithstanding any provision of Title 42 of the United States Code or Chapter 42 of the Code of Federal Regulations, the only issues in a proceeding for exclusion based on a material breach of this CIA shall be (a) whether [Provider] was in material breach of this CIA; (b) whether such breach was continuing on the date of the Exclusion Letter; and (c) the alleged material breach cannot be cured within the 35-day period, but

that (i) [Provider] has begun to take action to cure the material breach, (ii) [Provider] is pursuing such action with due diligence, and (iii) [Provider] has provided to OIG a reasonable timetable for curing the material breach.

For purposes of the exclusion herein, exclusion shall take effect only after an ALJ decision that is favorable to the OIG. [Provider's] election of its contractual right to appeal to the DAB shall not abrogate the OIG's authority to exclude [Provider] upon the issuance of the ALJ's decision. If the ALJ sustains the determination of the OIG and determines that exclusion is authorized, such exclusion shall take effect twenty (20) days after the ALJ issues such a decision, notwithstanding that [Provider] may request review of the ALJ decision by the DAB.

4. *Finality of Decision.* The review by an ALJ or DAB provided for above shall not be considered to be an appeal right arising under any statutes or regulations. Consequently, the parties to this CIA agree that the DAB's decision (or the ALJ's decision if not appealed) shall be considered final for all purposes under this CIA and [Provider] agrees to waive any right it may have to appeal the decision administratively, judicially or otherwise seek review by any court or other adjudicative forum.

XI. Effective and Binding Agreement

Consistent with the provisions in the Settlement Agreement pursuant to which this CIA is entered, and into which this CIA is incorporated, [Provider] and OIG agree as follows:

- a. This CIA shall be binding on the successors, assigns and transferees of [Provider];
- b. This CIA shall become final and binding on the date the final signature is obtained on the CIA;
- c. Any modifications to this CIA shall be made with the prior written consent of the parties to this CIA; and
- d. The undersigned [Provider] signatories represent and warrant that they are authorized to execute this CIA. The undersigned OIG signatory represents that he is signing this CIA in his official capacity and that he is authorized to execute this CIA.

Appendix B — Sample Statement of Management's Assertions

[Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Appendix C — Sample Engagement Letter

The following is a sample engagement letter that may be used for this kind of engagement.

[CPA Firm Letterhead]

[Client's Name and Address]

To the appropriate representative of the Company:

You have requested that we perform an agreed-upon procedures in connection with management's compliance with the terms of the Corporate Integrity Agreement (CIA) with the Office of Inspector General (OIG) of the U.S. Department of Health and Human Services (HHS) dated *[date of CIA]* for the period ending *[date]*. We are pleased to confirm our acceptance and understanding of this engagement by means of this letter.

Nature of the Engagement

The intended purpose of the engagement is to assist management and the OIG in evaluating the Company's compliance with the requirements specified in the CIA. We expect to issue an agreed-upon procedures report that will be restricted to the use of the Compliance Committee and management of the Company and the OIG. The engagement is performed pursuant to the terms specified in the CIA.

Our Responsibilities

We will perform those procedures enumerated in the attachment to this letter. Our responsibility is to carry out these procedures and report our findings in accordance with attestation standards established by the American Institute of Certified Public Accountants (AICPA) and to comply with the AICPA's Code of Professional Conduct, including ethical principles of integrity, objectivity, professional competence and due care.

We are not engaged to and will not perform an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on the Company's compliance with the CIA. Accordingly, we will not express such an opinion or conclusion. We have no responsibility to determine the differences between the procedures to be performed and the procedures that we would have determined to be necessary had we been engaged to perform an examination or review engagement. Accordingly, if we perform additional procedures, other matters may come to our attention that we would report to you.¹

¹ The independent accountant may wish to include an understanding with the engaging party about any limitation or other arrangements regarding liability of the practitioner or the engaging party in the engagement letter. For example, the following might be included in the letter:

Our maximum liability relating to services rendered under this letter (regardless of form of action, whether in contract, negligence or otherwise) shall be limited to the charges paid to us for the portion of the services or work products giving rise to liability. We will not be liable for consequential or punitive damages (including lost profits or savings) even if aware of their possible existence.

You will indemnify us against any damage or expense that may result from any third-party claim relating to our services or any use by you of any work product, and you will reimburse us for all expenses (including counsel fees) as incurred by us in connection with any such claim, except to the extent such claim (i) is finally determined to have resulted from our gross negligence or willful misconduct or (ii) is covered by any of the preceding indemnities.

[Footnote revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Your Responsibilities

The engagement to be performed is conducted on the basis that you agree and acknowledge that the procedures enumerated in this letter are appropriate for the purpose of assisting management and the OIG in evaluating the Company's compliance with the requirements specified in the CIA.

Management is responsible for the Company's compliance with all applicable laws, regulations, and contracts and agreements, including the CIA. Management also is responsible for the design, implementation, and monitoring of the policies and procedures upon which compliance is based.

You agree to provide us, at the conclusion of the engagement, with a letter that confirms certain representations made during the agreed-upon procedures engagement.

Our Report

We will issue a written report upon completion of the engagement. Our report will be in procedures and findings format and will be addressed to management of the Company.

Other Relevant Information

Working papers that are prepared in connection with this engagement are the property of the independent accountant. The working papers are prepared for the purpose of providing the principal support for the independent accountant's report.

If we are not able to complete all of the specified procedures, we will so advise you. At that time, we will discuss with you the form of communication, if any, that you desire for our findings. We will ask you to confirm your request in writing at that time. If you request that we delay issuance of our report until corrective action is taken that will result in compliance with all aspects of the CIA, we will do so only at your written request. Our working papers will be retained in accordance with our firm's working paper retention policy.

The distribution of the independent accountant's report will be restricted to the governing board and management of the Company and the OIG.

Our fees will be billed as work progresses and are based on the amount of time required at various levels of responsibility plus actual out-of-pocket expenses. Invoices are payable upon presentation. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees.

We agree that to the extent required by law, we will allow the Comptroller General of the United States, HHS, and their duly authorized representatives to have access to this engagement letter and our documents and records to the extent necessary to verify the nature and amount of costs of the services provided to the Company, until the expiration of four years after we have concluded providing services to the Company that are performed pursuant to this Engagement Letter. In the event the Comptroller General, HHS, or their duly authorized representatives request such records, we agree to notify the Company of such request as soon as practicable.

In the event we are requested or authorized by the Company or are required by government regulation, subpoena, or other legal process to produce our documents or our personnel as witnesses with respect to our engagements for the Company, the Company will, so long as we are not a party to the proceeding in which the information is sought, reimburse us for our professional time and expenses, as well as the fees and expenses of our counsel, incurred in responding to such requests.

If this letter correctly expresses your understanding of this engagement, please sign the enclosed copy where indicated and return it to us. We appreciate the opportunity to serve you.

Sincerely, _____

Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Appendix D — Sample Procedures

Procedure

Findings

Governance

1. We read the Company's corporate minutes and organization chart and ascertained that, within [number] days of the date of the Corporate Integrity Agreement (CIA), the Company —
 - a. Established a Compliance Committee, which is to meet meets at least monthly and requires a quorum to meet.
 - b. Appointed to its Compliance Committee members who include, at a minimum, those individuals specified in the CIA.
 - c. Delegated to the Compliance Committee the authority to implement and monitor the CIA, as evidenced by the organization chart or the Compliance Committee's charter.
 - d. Appointed a compliance officer who reports directly to the individual specified in the CIA.
2. We interviewed the compliance officer and were informed that, in his or her opinion, the Compliance Officer —
 - a. Has sufficient staff and resources to carry out his or her responsibilities.
 - b. Actively participates in compliance training.
 - c. Has the authority to conduct full and complete internal investigations without restriction.
 - d. Periodically revises the compliance program to meet changing circumstances and risks.
3. We read the OIG notification letter as specified in the CIA and noted that the appropriate official signed the letter, that it was addressed to the OIG, that it covered items (a) through (d) in Step 1, and that it was dated within [number of] days of the execution of the CIA.

Billing Practices, Policies, and Procedures

The practitioner might be engaged to provide consulting services in connection with the evaluation of the company's billing practices, policies, and procedures. If so, generally no agreed-upon procedures would be performed relating to this area. Alternatively, if the procedures relating to the Company's billing practices, policies, and procedures are performed by others such as the Company's internal audit staff, the practitioner performs Steps 4 through 9.

4. We read the compliance work plan and noted the following:
 - a. The work plan's stated objectives include the determination that billings are accurate and complete, for services rendered that have been deemed by medical specialists as being necessary, and are submitted in accordance with federal program guidelines.
 - b. The work plan sampling methodology sets confidence levels consistent with those defined in the CIA.
 - c. The work plan identifies risk areas, as defined in the CIA (if applicable), and specifies testing procedures by risk area.
 - d. The work plan specifies that samples are taken in risk areas (if applicable) identified by the CIA.
 - e. The work plan includes testing procedures, which the practitioner should modify as required by the CIA, for the following risks areas (if applicable) identified in the CIA:

Procedure	Findings

- (1) Clinical documentation, as follows:
- (i) No documentation of service

(ii) Insufficient documentation of service

(iii) Improper diagnosis or treatment plan giving rise to the provision of a medically unnecessary service or treatment

(iv) Service or treatment does not conform medically with the documented diagnosis or treatment plan

(v) Services incorrectly coded
- (2) Billing and coding, as follows:
- (i) Noncovered or unallowable service

(ii) Duplicate payment

(iii) DRG window error

(iv) Unbundling

(v) Utilization

(vi) Medicare credit balances

[*Note to Practitioner:* Modify the preceding list as required by the CIA.]

5. We selected [*quantity*] probe samples performed by the independent review organization for the following risk areas [*list risk areas tested*]. For the probe samples selected, we noted that the —
- a. Sample patient billing files were randomly selected.

b. Sample size reflected confidence levels specified in the CIA.

c. Sample plan describes how missing items (if any) would be treated.

d. Patient billing files tested were pulled per the listing of random numbers and all patient billing files were accounted for in the working papers.

e. Work plans for the specific sample described the risk areas (if applicable) being tested and the testing approach/procedures.

f. Working papers noted the completion of each work plan step.

g. Working papers contained a summary of findings for the sample.
6. We reperformed the work plan steps [*list of specific steps performed*] for the sample patient billing files. The reperformance of work plan steps related to the medical review of the sample patient billing files was performed by the following individuals [*note the professional qualifications of individuals without listing names*]. Any exceptions between our findings and the Company's are summarized in the Attachment to this report.
7. We read the summary findings of all internal compliance reviews that the Company's Internal Audit department indicated it had performed for the Company and noted that all material billing deficiencies [*specify material threshold as defined by the Company*] noted therein were discussed in written communications addressed to the appropriate payor (for example, Medicare Part B carrier) and were dated within 60 days from the time the deficiency occurred.¹
8. We inquired of [*individual*] as to whether the Company took remedial steps within [*number of*] days (or such additional time as agreed to by the payor) to correct all material billing deficiencies noted in Step 7. We were informed that such remedial steps had been taken.

¹ The CIA provides its own legal definition of a "material deficiency." Determination of whether a billing or other act meets this definition is normally beyond the auditor's professional competence and may have to await final determination by a court of law. Accordingly, to avoid confusion, a working definition different from that provided in the CIA (e.g., a specified dollar threshold) may be necessary.

Procedure**Findings**

9. By reading applicable correspondence, we noted that any material billing deficiencies noted in Step 7 were communicated to the OIG, including specific findings relative to the deficiency, the Company's actions taken to correct the deficiency, and any further steps the Company plans to take to prevent any similar deficiencies from recurring.

Corporate Integrity Policy

10. We read the Company's Corporate Integrity Policy and noted the following.

- a. The policy was developed and implemented within [number of] days of execution of the CIA.
- b. The policy addressed the Company's commitment to preparation and submission of accurate billings consistent with the standards set forth in federal health care program statutes, regulations, procedures, and guidelines or as otherwise communicated by HCFA, its agents, or any other agency engaged in the administration of the applicable federal health care program.
- c. The policy addressed the specific issues that gave rise to the settlement, as well as other risk areas identified by the OIG in published Fraud Alerts issued through [agency].
- d. Correspondence addressed to the OIG covered the development and implementation of the policy.
- e. Documentation indicating that the policy was distributed to all employees, physicians, and independent contractors involved in submitting or preparing requests for reimbursement.
- f. The prominent display of a copy of the policy on the Company's premises.

11. We selected a sample of ten employees (involved in submitting and preparing requests for reimbursement) and examined written confirmation in the employee's personnel file indicating receipt of a copy of the Corporate Integrity Policy.

Information and Education Program

12. We read the Company's Information and Education Program and noted the following.

- a. The Information and Education Program agenda was dated within [number of] days of execution of the CIA.
- b. Correspondence covering the development and implementation of the Information and Education Program was addressed to the OIG.
- c. The Information and Education Program requires that each officer, employee, agent, and contractor charged with administering federal health care programs (including, but not limited to billers, coders, nurses, physicians, medical records, hospital administration and other individuals directly involved in billing federal health care programs) receive at least [number of] hours of training.

13. We selected a sample of ten employees involved in billing, coding and/or charge capture and examined sign-in logs of the training classes and noted that each had signed indicating that they had received at least [number of] hours of training as specified in the Information and Education Program. We also reviewed tests and surveys completed by each of the ten trained employees noting evidence that they were completed.

14. We inquired as to the training of individuals not present during the regularly scheduled training programs and were informed that each such individual is trained either individually or in a separate make-up session. We inquired as to the names of individuals not initially present and selected one such individual and examined that individual's post-training test and survey for completion.

Procedure

15. We read the course agenda and noted that the training provided to employees involved in billing, coding, and/or charge capture consisted of instructions on submitting accurate bills, the personal obligations of each individual to ensure billings are accurate, the nature of company-imposed disciplinary actions on individuals who violate company policies and/or laws and regulations applicable to federal health care program rules, legal sanctions against the company for submission of false or fraudulent information, and how to report potential abuses or fraud. We also noted that the training material addressed the following issues which gave rise to the settlement [*practitioner list*].
16. We inquired of the Corporate Compliance Officer as to the qualifications and experience of the trainers and were informed that, in the Corporate Compliance Officer's opinion, they were consistent with the topics presented.
17. We noted that the Company's draft Annual Report to the OIG dated [date] addresses certification of training.

Confidential Disclosure Program

18. We read documentation of the Company's Confidential Disclosure Program and noted that it —
 - a. Includes the printed effective date that was within [number of] days of execution of the CIA.
 - b. Consists of a confidential disclosure program enabling any employee to disclose any practices or billing procedures relating to federal health care programs.
 - c. Provides a toll-free telephone line maintained by the Company, which Company representatives have indicated is maintained twenty-four hours a day, seven days a week, for the purpose of making any disclosures regarding compliance with the Company's Compliance Program, the obligations in the CIA, and Company's overall compliance with federal and state standards.
 - d. Includes policies requiring the review of any disclosures to permit a determination of the appropriateness of the billing practice alleged to be involved and any corrective action to be taken to ensure that proper follow-up is conducted.
19. We made five test calls to the toll free telephone line (hotline) and noted the following.
 - a. Each call was captured in the hotline logs and reported with all other incoming calls.
 - b. Anonymity is not discouraged.
20. We noted that the Company included in its draft Annual Report addressed to OIG dated [date] a detailed summary of the communications (including the number of disclosures by employees and the dates of such disclosures) concerning billing practices reported as, and found to be, inappropriate under the Confidential Disclosure Program, and the results of any internal review and the follow-up on such disclosures.
21. We observed the display of the Company's Confidential Disclosure Program, including notice of the availability of its hotline, on the Company's premises.

Excluded Individuals or Entities

22. We read the Company's written policy relating to dealing with excluded or convicted persons or entities and noted that the policy —
 - a. Prohibits the hiring of or contracting with an individual or entity that is listed by a federal agency as convicted of abuse or excluded, suspended, or otherwise ineligible for participation in federal health care programs.
 - b. Includes a process to make an inquiry into the status of any potential employee or independent contractor.
 - c. Provides for a semi-annual review of the status of all existing employees and contractors to verify whether any individual had been suspended or excluded or charged with a criminal offense relating to the provision of federal health care services.

Findings

Procedure**Findings**

23. We selected a sample of ten employees hired over the course of the test period as defined in the CIA and examined support in the employee's personnel file documenting inquiries made into the status of the employee, including documentation of comparison to the *[source specified in the CIA]*.
24. We performed the following procedures related to the Company's semi-annual review of employee status.
- Read documentation of the semi-annual review as evidence that a review was performed.
 - Selected and reviewed the lesser of ten or all exceptions and determined that such employees were removed from responsibility for or involvement with Provider business operations related to the Federal health care programs.
 - Examined a notification letter addressed to the OIG and dated within 30 days of the employee's removal from employment.
 - Inquired of *[officer]* as to whether he or she was aware of any individuals employed in contravention of the prohibitions in the CIA. If so, we further noted that *[indicate specific procedures]* to confirm that such situation was cured within 30 days by *[indicate how situation was cured]*.

Annual Report

25. We read the Company's draft Annual Report dated *[date]* and determined that it included the following items, to be modified as appropriate, by the practitioner:
- Compliance Program Charter and organization chart
 - Amendments to policies
 - Detailed descriptions of reviews and audits
 - Summary of hotline communications
 - Summary of annual review of employees
 - Cross-referencing to items noted in the CIA

Record Retention

26. We read the Company's record retention policy and noted that it was consistent with the requirements as outlined in the CIA.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix E — Sample Report

Independent Accountant's Report

To [Sample Health Care Provider] and Office of Inspector General of the U.S. Department of Health and Human Services

We have performed the procedures enumerated in Attachment B to Sample Health Care Provider's (Company) compliance with the Corporate Integrity Agreement (CIA) with the Office of Inspector General (OIG) dated [date of CIA] for the [period] ending [date], which is included as Attachment A to this report. Management of the Company is responsible for the Company's compliance with the CIA.

Management of the Company has agreed to and acknowledged that the procedures performed are appropriate to assist management and the OIG in evaluating the entity's compliance with the requirements specified in the CIA. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures performed and the findings are included in the attached.

We were engaged by management of the Company to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. We were not engaged to and did not perform an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on the Company's compliance with the CIA. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of the Company and to meet our other ethical responsibilities in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

This report is intended solely for the information and use of the Compliance Committee and management of the Company and the OIG, and is not intended to be, and should not be used by anyone other than the specified parties.

[Additional paragraphs may be added to describe other matters.]

[Include as Attachments the CIA and the summary that enumerates procedures and findings.]

AUD Section 25

Statement of Position 01-3 Performing Agreed-Upon Procedures Engagements That Address Internal Control Over Derivative Transactions as Required by the New York State Insurance Law

June 15, 2001

NOTE

This AICPA Statement of Position (SOP) has been developed by the AICPA Reporting on Internal Control Over Derivative Transactions at Insurance Entities Task Force of the AICPA Auditing Standards Board (ASB) to provide guidance regarding the application of Statements on Standards for Attestation Engagements (SSAEs) to agreed-upon procedures engagements performed to comply with the requirements of Section 1410 (b)(5) of the New York State Insurance Law, as amended (the law), which addresses the assessment of internal control over derivative transactions as defined in Section 1401(a) of the law, and Section 178.5 of Regulation No. 163.

An attestation SOP is recognized as an interpretive publication as defined in AT-C section 105, *Concepts Common to All Attestation Engagements*. Interpretive publications are recommendations on the application of SSAEs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSAEs. The members of the ASB have found this SOP to be consistent with existing SSAEs.

Although interpretive publications are not attestation standards, AT-C section 105 requires the practitioner to consider applicable interpretive publications in planning and performing the attestation engagement because interpretive publications are relevant to the proper application of the attestation standards in specific circumstances.

Introduction and Background

.01 In 1999 and 2000, the New York State Insurance Department (the department) issued regulations to implement the New York Derivative Law (the law) which amends Article 14 of the State of New York Insurance Law, effective July 1, 1999. The law establishes certain requirements for domestic life insurers, domestic property and casualty insurers, domestic reciprocal insurers, domestic mortgage guaranty insurers, domestic cooperative property and

casualty insurance corporations, and domestic financial guaranty insurers. Foreign insurers engaging in derivative transactions and derivative instruments are subject to and required to comply with all of the provisions of the law. However, a foreign insurer may enter into other derivative transactions provided the insurer meets certain conditions of its domestic state law. In this document, an insurer covered by the law is referred to as an *insurance company*.

.02 The requirements of the law include the following:

- Approval by the board of directors, or a similar body, of derivative transactions
- Submission of a derivative use plan (the DUP) to the Department
- Assessment by an independent certified public accountant (CPA) of the insurance company's internal control over derivative transactions

.03 In addition to the law, the Department also established Regulation No. 163, "Derivative Transactions" (11 NYCRR 178) (the Regulation), which provides guidance in implementing the law. Section 178.5 of Regulation No. 163 states the following.

As set forth in section 1410 (b)(5) of the Insurance Law, an insurer engaging in derivative transactions shall be required to include, as part of the evaluation of accounting procedures and internal controls required to be filed pursuant to section 307 of the Insurance Law, a statement describing the assessment by the independent certified public accountant of the internal controls relative to derivative transactions. The purpose of this part of the evaluation is to assess the adequacy of the internal controls relative to the derivative transactions being conducted by the insurer. Such an assessment shall be made whether or not the derivative transactions are material in relation to the insurer's financial statements. The independent certified public accountant shall issue a report regarding internal controls relative to derivative transactions, whether or not deficiencies in internal controls would lead to a "reportable condition," as that term is used in auditing standards adhered to by certified public accountants. An assessment in the form of an "agreed upon procedures engagement" or an "attestation engagement," as those terms are used in auditing standards adhered to by certified public accountants, may be used to meet this requirement. If an "agreed upon procedures engagement" is performed, the procedures used shall be those that management and the independent certified public accountant determine are appropriate to meet the purpose of the assessment as set forth above.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.[04–05] [Paragraphs deleted, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.06 An agreed-upon procedures engagement or an examination engagement may be used to satisfy the requirements of the law. However, this Statement of Position (SOP) only describes an agreed-upon procedures engagement. It does not address an examination-level attestation engagement. For guidance on performing an examination level attestation engagement, see AT-C section 205, *Examination Engagements*. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Applicability

.07 This SOP was developed to provide practitioners with guidance on performing agreed-upon procedures engagements that address an insurance company's internal control over derivative transactions to meet the requirements of the law. The engagement described in this SOP is designed only to satisfy the requirements of the law. The procedures, as set forth in this SOP, are not necessarily appropriate for use in any other engagement. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.08 Although the Department has indicated that an agreed-upon procedures engagement pursuant to this SOP can be used to satisfy the requirements for an assessment of internal control over derivative transactions, the Department has not agreed to the sufficiency or appropriateness of the procedures included in this SOP for their purposes.

The Law

Definition of a Derivative

.09 Article 14 of the law defines a derivative instrument as including caps, collars, floors, forwards, futures, options, swaps, swaptions, and warrants.

.10 The following definitions are included in the law and are applicable when performing the agreed-upon procedures engagement described in this SOP.

Cap — An agreement obligating the seller to make payments to the buyer with each payment based on the amount by which a reference price or level or the performance or value of one or more underlying interests exceeds a predetermined number, sometimes called the strike rate or strike price.

Collar — An agreement to receive payments as the buyer of an option, cap, or floor and to make payments as the seller of a different option, cap, or floor.

Floor — An agreement obligating the seller to make payments to the buyer in which each payment is based on the amount by which a predetermined number, sometimes called the floor rate or price, exceeds a reference price, level, performance, or value of one or more underlying interests.

Forward — An agreement (other than a future) to make or take delivery in the future of one or more underlying interests, or effect a cash settlement, based on the actual or expected price, level, performance, or value of such underlying interests, but shall not mean or include spot transactions effected within customary settlement periods, when-issued purchases, or other similar cash market transactions.

Future — An agreement traded on a futures exchange, to make or take delivery of, or effect a cash settlement based on the actual or expected price, level, performance, or value of one or more underlying interests.

Option — An agreement giving the buyer the right to buy or receive (a *calloption*), sell or deliver (a *putoption*), enter into, extend or terminate, or effect a cash settlement based on the actual or expected price, spread, level, performance, or value of one or more underlying interests.

Swap — An agreement to exchange or to net payments at one or more times based on the actual or expected price, yield, level, performance, or value of one or more underlying interests.

Swaption — An option to purchase or sell a swap at a given price and time or at a series of prices and times. A swaption does not mean a swap with an embedded option.

Warrant — An instrument that gives the holder the right to purchase or sell the underlying interest at a given price and time or at a series of prices and times outlined in the warrant agreement.

.11 Article 14 of the law permits an insurance company to enter into *replication transactions* provided that certain conditions set forth in the law are met. A replication transaction is defined in the law as follows.

A derivative transaction or combination of derivative transactions effected either separately or in conjunction with cash market investments included in the insurer's investment portfolio in order to replicate the investment characteristic of another authorized transaction, investment or instrument and/or operate as a substitute for cash market transactions. A derivative transaction entered into by the insurer as a hedging transaction or income generation transaction authorized pursuant to this section [of the law] shall not be considered a replication transaction.

Derivative Use Plan

.12 An insurance company entering into derivative transactions must file a DUP with the Department. The DUP generally should include the following items:¹

- A certified copy of the authorization by the insurer's board of directors, or other similar body, to file the DUP, which should include authorization of derivative transactions and an assurance that individuals responsible for derivative transactions, processes, and controls have the necessary experience and knowledge
- A section on management oversight standards including a discussion of the following:
 - Limits on identified risks
 - Controls over the nature and amount of identified risks
 - Processes for identifying such risks
 - Processes for documenting, monitoring, and reporting risk exposure
 - Internal audit and review processes that ensure integrity of the overall risk management process
 - Quarterly reporting to the board of directors
 - The establishment of risk tolerance levels
 - Management's measurement and monitoring against those levels

¹ Reference should be made to the law and the Regulation for specific details and exact requirements.

- A section on internal control and reporting including a discussion of the following:
 - The existence of controls over the valuation and effectiveness of derivative instruments
 - Credit risk management
 - The adequacy of professional personnel
 - Technical expertise and systems
 - Management reporting
 - The review and legal enforceability of derivative contracts between parties
- A section on documentation and reporting requirements which shall for each derivative transaction document the following:
 - The purpose of the transaction
 - The assets or liabilities to which the transaction relates
 - The specific derivative instrument used
 - For over-the-counter (OTC) transactions, the name of the counterparty and counterparty exposure amount
 - For exchange traded transactions, the name of the exchange and the name of the firm handling the trade
- Written guidelines to be followed in engaging in derivative transactions. The guidelines should include or address the following:
 - The type, maturity, and diversification of derivative instruments
 - The limitation on counterparty exposures, including limitations based on credit ratings
 - The limitations on the use of derivatives
 - Asset and liability management practices with respect to derivative transactions
 - The liquidity needs and the insurance company's capital and surplus as it relates to the DUP
 - The policy objectives of management specific enough to outline permissible derivative strategies
 - The relationship of the strategies to the insurer's operations
 - How the strategies relate to the insurer's risk
 - A requirement that management establish and execute management oversight standards as required by the law
 - A requirement that management establish and execute internal control and reporting standards as required by the law
 - A requirement that management establish and execute documentation and reporting standards as required by the law
- Guidelines for the insurer's determination of acceptable levels of basis risk, credit risk, foreign currency risk, interest rate risk, market risk, operational risk, and option risk

- A requirement that the board of directors and senior management comply with risk oversight functions and adhere to laws, rules, regulations, prescribed practices, or ethical standards

Related Professional Standards

AT-C Section 215, *Agreed-Upon Procedures Engagements*

.13 Agreed-upon procedures engagements performed to meet the requirements of the law are to be performed in accordance with AT-C section 215, *Agreed-Upon Procedures Engagements*. As described in paragraph .02 of AT-C section 215, an agreed-upon procedures engagement is an attestation engagement in which a practitioner performs specific procedures on subject matter and reports the findings without providing an opinion or conclusion. Not all of the provisions of AT-C section 215 are discussed herein. Rather, this SOP includes guidance to assist practitioners in the application of selected aspects of AT-C section 215. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.14] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.15 As previously stated, Regulation No. 163 states that an agreed-upon procedures engagement may be used to meet the requirement for an independent CPA's assessment of internal control over derivative transactions. When performing an agreed-upon procedures engagement under this SOP, practitioners should not eliminate any of the procedures presented in appendix B, "Agreed-Upon Procedures for Testing Internal Control Over Derivative Transactions" (paragraph .42), of this SOP or reduce the extent of the tests. The Department or the insurance company may request that additional procedures be performed and the practitioner may agree to perform such procedures. In those circumstances, it would be expected that the additional procedures would be performed in the context of a separate agreed-upon procedures engagement.

[.16] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

AU-C Section 501, *Audit Evidence — Specific Considerations for Selected Items*

.17 AU-C section 501, *Audit Evidence — Specific Considerations for Selected Items*, addresses specific considerations by the auditor in obtaining sufficient appropriate audit evidence, in accordance with AU-C section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, AU-C section 500, *Audit Evidence*, and other relevant AU-C sections in AICPA *Professional Standards*, regarding the valuation of investments in securities and derivative instruments. A practitioner performing the agreed-upon procedures engagement described in this SOP may find it helpful to consider the guidance in paragraphs .01–.10 of AU-C section 501 and the related Audit Guide *Special Considerations in Auditing Financial Instruments*. Paragraph .32 of AT-C section 105 and paragraphs .19–.20 of AT-C section 215 are applicable when a practitioner uses the work of an external specialist. Paragraph .10 of AT-C section 105 defines the term *practitioner's specialist* as an individual or organization possessing expertise in a field other than accounting or attestation whose work in that field is used by the

practitioner to assist the practitioner in obtaining evidence for the service being provided. A practitioner's specialist may be either a practitioner's internal specialist (who is a partner or staff, including temporary staff, of the practitioner's firm or a network firm) or a practitioner's external specialist. *Partner* and *firm* refer to their governmental equivalents when relevant. A specialist in securities and derivative instruments may be helpful to a practitioner performing the agreed-upon procedures described in this SOP. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.18 The procedures in this SOP are not designed to meet the requirements of generally accepted auditing standards for an audit of the financial statements of an entity that engages in derivative transactions. In addition, performing the audit procedures described in AU-C section 501 would not meet the requirements of this SOP. [Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.19 In an audit of financial statements, the auditor may determine that he or she will not perform procedures related to derivative transactions because they are not material to the financial statements. There is no requirement to perform the procedures described in this SOP when performing an audit of financial statements. In contrast, the law requires that an assessment of internal control be performed whether or not the derivative transactions are material to the insurer's financial statements. Accordingly, a decision not to perform procedures related to derivative transactions in an audit of financial statements, because of immateriality, would not alleviate the requirement to perform the agreed-upon procedures engagement described herein.

Procedures to Be Performed

.20 The agreed-upon procedures to be performed are directed toward tests of controls over derivative transactions that occurred during the period covered by the practitioner's report. Any projection of the practitioner's findings to the future is subject to the risk that because of change, the controls may no longer be in existence, suitably designed, or operating effectively. Also, the potential effectiveness of controls over derivative transactions is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected.

.21 The procedures to be performed in the agreed-upon procedures engagement described in this SOP are presented in appendix B (paragraph .42). The procedures have been designed so that the findings resulting from the application of the procedures can be recorded in a tabular format. The three options available to the practitioner for expressing the findings for each procedure are *No Exception*, *Exception*, or *N/A* (not applicable). If a procedure is not applicable to a particular insurance company, the procedure should be marked *N/A* rather than deleted from the report. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.22 Section 1 of appendix B (paragraph .42) of this SOP is applicable to all insurance companies that enter into derivative transactions. Therefore, the procedures in section 1 are to be performed in all engagements performed in accordance with this SOP. Sections 2–10 of appendix B (paragraph .42) of this SOP each address a specific type of derivative. The procedures in those sections are to be performed only if the insurance company entered into derivative transactions of the type covered by the section. Sections that address types of

derivatives not used by the insurance company should not be attached to the agreed-upon procedures report.

.23 If any portion of a procedure results in an exception, the findings for that entire procedure should be recorded as an exception and described in the section "Description of Exceptions If Any," at the end of each section. The practitioner should provide a brief factual explanation for each exception avoiding vague or ambiguous language and described at a level of specificity sufficient for a user to understand the nature, timing, and extent of the procedures and findings resulting in the exception. If management informs the practitioner that the condition giving rise to the exception was corrected by the date of the practitioner's report, the practitioner's explanation of the exception may include that information; for example, "Management has advised us that the condition resulting in the exception was corrected on Month X, 20XX. We have performed no procedures with respect to management's assertion." [Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.24 A practitioner may perform significant portions of the agreed-upon procedures engagement before the end of the period covered by the report. If, during that time, the practitioner identifies conditions that result in an exception in one or more agreed-upon procedures, he or she should report the exception in the findings section of the agreed-upon procedures report, even if management corrects the condition prior to the end of the period.

.25 The law requires the insurance company to provide the Department with a statement describing the independent CPA's assessment of the insurance company's internal control over derivative transactions. It also requires the insurance company to include a description of any remedial actions taken or proposed to be taken to correct any deficiencies identified by the independent CPA.

.26 Paragraph .40 of AT-C section 215 states the following.

Although the practitioner need not perform procedures beyond the procedures agreed to and acknowledged by the engaging party to be appropriate for the intended purpose of the engagement, if in connection with the application of the procedures, and through the completion of the engagement, matters come to the practitioner's attention by other means that significantly contradict the subject matter referred to in the practitioner's report, the practitioner should discuss the matter with the engaging party and take appropriate action, including determining whether the practitioner's report should be revised to disclose the matter.

[Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.27 The phrase "through the completion of the engagement" in paragraph .40 of AT-C section 215 indicates that this requirement would apply to conditions or events occurring subsequent to the period covered by the practitioner's report but prior to the date of the practitioner's report. This would include matters that would have resulted in the reporting of an exception by the practitioner if that matter existed during the period covered by the report. For example, if during the course of applying agreed-upon procedures regarding an entity's internal control, the practitioner becomes aware of a material weakness in internal control over derivative transactions by means other than performance of the agreed-upon procedures, the practitioner would be required to determine whether the matter would be included in the practitioner's report. [Revised, April 2017, to reflect conforming changes necessary due to the

issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Agreeing on the Terms of the Engagement

.28 In accordance with paragraph .14 of AT-C section 215, the practitioner should agree upon the terms of the engagement with the engaging party. It is in the interests of both the engaging party and the practitioner to document the agreed-upon terms of the engagement before commencement of the engagement to help avoid misunderstandings. For the purposes of this SOP, the responsible party is management of the insurance company. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. To meet the requirements in paragraph .14 of AT-C section 215, the agreed-upon terms of the engagement should include the following:

- A statement that the intended purpose of the engagement is to meet the requirements of Section 1410(b)(5) of the law, which addresses the assessment of internal control over derivative transaction
- A statement that management is responsible for maintaining effective internal control over derivative transactions.
- A statement identifying the procedures to be performed as those set forth in this SOP and that the engaging party agrees to and acknowledges that the procedures to be performed are appropriate for the intended purpose of the engagement
- The responsibilities of the practitioner
- A statement indicating that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants (AICPA)
- A statement that the engaging party agrees to provide, at the conclusion of the engagement, a representation letter
- Reference to the expected form and content of the practitioner's agreed-upon procedures report, including any use restrictions, if applicable
- Disclaimers to be included in the practitioner's report, if applicable
- A statement describing assistance to be provided to the practitioner, if applicable
- A statement describing any arrangements to involve a practitioner's external specialist
- Specified thresholds for reporting exceptions, if applicable

[Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.29 The following are other matters that are relevant to the engagement described in this SOP that may be included in the engagement letter or other written agreement:

- A statement describing the responsible party's² responsibility to comply with the law and the responsible party's responsibility for the design and operation of effective internal control over derivative transactions
- A statement describing the responsible party's responsibility for providing accurate and complete information to the practitioner
- A statement indicating that the practitioner has no responsibility for the completeness or accuracy of the information provided to the practitioner
- The circumstances under which the practitioner may decline to issue a report.

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

[.30] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Requesting Written Representations

[.31] [Paragraph renumbered and deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.32 In accordance with paragraph .27 of AT-C section 215, the practitioner should request from management written representations in the form of a letter addressed to the practitioner. The representations should include the following:

- a. A statement that management of the insurance company is responsible for maintaining effective internal control over derivative transactions.
- b. If applicable, a statement that the engaging party has obtained from all necessary parties agreement to the procedures and acknowledgment that the procedures are appropriate for their purposes.
- c. A statement that it has provided the practitioner with all relevant information and access, as applicable, as agreed upon in the terms of the engagement.
- d. A statement that all known matters contradicting the subject matter and any communication from regulatory agencies or others affecting the subject matter have been disclosed to the practitioner, including communications received between the end of the period addressed by the subject matter and the date of the practitioner's report.
- e. A statement that it is not aware of any material misstatements in the subject matter.
- f. A statement that it has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter.

² In this Statement of Position, the responsible party is usually management of the insurance company. [Footnote added, April 2017, to reflect conforming changes due to the issuance of SSAE No. 18.]

- g.* Any additional matters that the practitioner determines are appropriate.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.33 In addition to the representations required by paragraph .27 of AT-C section 215, a practitioner may request other representations from management depending on the specific nature of the engagement. For the engagement addressed in this SOP, they generally include the following representations from management:

- A statement acknowledging responsibility for establishing and maintaining effective internal control over derivative transactions
- A statement that management is not aware of any errors or fraud that might indicate a weakness in the internal control over derivative transactions
- A statement that management has disclosed to the practitioner all significant deficiencies in the design or operation of the internal control over derivative transactions
- A statement that management has responded fully to all inquiries made by the practitioner during the engagement

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.34 When management refuses to provide one or more of the written representations requested by the practitioner, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should do the following:

- a.* Discuss the matter with management
- b.* Reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general
- c.* If any of the matters are not resolved to the practitioner's satisfaction, take appropriate action, including determining the possible effect on the practitioner's agreed-upon procedures report

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.35 An illustrative representation letter is presented in appendix C, "Illustrative Management Representation Letter" (paragraph .43), of this SOP. For additional information regarding management's representations in an agreed-upon procedures engagement, see paragraphs .27–.30, .A35 and .A45 of AT-C section 215. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Restriction on the Performance of Procedures

.36 As previously stated, a practitioner should not agree to do either of the following.

- a. Eliminate any of the procedures presented in appendix B (paragraph .42) of this SOP, unless a section is not applicable because the insurance company did not enter into derivative transactions addressed by the section.
- b. Reduce the extent of the tests in an applicable section.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.37 When circumstances impose restrictions on the performance of the agreed-upon procedures presented in appendix B (paragraph .42) of this SOP, the practitioner should discuss with the engaging party whether those restrictions are appropriate and, if the restrictions are appropriate, describe the restrictions in the practitioner's report. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Alert That Restricts the Use of the Practitioner's Agreed-Upon Procedures Report

.38 Although the practitioner is not precluded from issuing a general-use agreed upon procedures report, because the engagement is performed to comply with the requirements of Section 1410 (b)(5) of the New York State Insurance Law, as amended and, as such, the procedures performed may not be well understood by others, the practitioner may consider it appropriate to include an alert, in a separate paragraph, that restricts the use of the report. In addition to insurance company's management and Board of Directors, the New York State Insurance Department may be named as a specified party. [Paragraph added, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Dating the Report

.39 In accordance with paragraph .34*w* of AT-C section 215, the practitioner's report should be dated no earlier than the date on which the practitioner completed the procedures and determined the findings, including that (a) the attestation documentation has been reviewed, and (b) if applicable, the written presentation of the subject matter has been prepared. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Effective Date

.40 This SOP is effective upon issuance and is applicable only to agreed-upon procedures engagements that address internal control over derivative transactions required by the law. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.41

Appendix A — Illustrative Agreed-Upon Procedures Report

The following is an illustrative agreed-upon procedures report based on the guidance in AT-C section 215, *Agreed-Upon Procedures Engagements*.

Independent Accountant's Report on Applying Agreed-Upon Procedures

To the Management of ABC Insurance Company:

We have performed the applicable procedures enumerated in the American Institute of Certified Public Accountants' Statement of Position (SOP), 01-3, *Performing Agreed-Upon Procedures Engagements That Address Internal Control Over Derivative Transactions as Required by the New York State Insurance Law*, to ABC Insurance Company's compliance with the requirements of Section 1410 (b)(5) of the New York State Insurance Law, as amended (the law), which addresses the assessment of internal control over derivative transactions as defined in Section 1401(a) of the law, and Section 178.5 of Regulation No. 163 during the year ended December 31, 20XX. Management of ABC Insurance Company is responsible for maintaining effective internal control over derivative transactions.

Management of ABC Insurance Company has agreed to and acknowledged that the procedures performed are appropriate to assist users in evaluating ABC Insurance Company's compliance with the requirements of the law. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures performed and the findings are included in the attached appendix.

We were engaged by management of ABC Insurance Company to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on the internal control over derivative transactions of ABC Insurance Company for the year ended December 31, 20XX. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of ABC Insurance Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

This report is intended solely for the information and use of the New York State Insurance Department and the management and Board of Directors of ABC Insurance Company and is not intended to be and should not be used by anyone other than these specified parties.

[Additional paragraphs may be added to describe other matters.]

[Signature]

[City and state where the practitioner's report is issued]

[Date]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Appendix B — Agreed-Upon Procedures for Testing Internal Control Over Derivative Transactions

The following table lists the types of derivative transactions permitted by the New York Derivative Law (the law). We inquired of management of the insurance company as to whether the insurance company used the type of derivative addressed by each section, and marked the column entitled "Is the Section Applicable?" either *Yes* or *No* based on management's response to the inquiry. For each type of derivative with a *Yes* response, we performed the procedures in the applicable section and attached the section to the report. For each type of derivative with a *No* response, we did not perform procedures nor did we attach the applicable section to the report. We compared the types of derivative reported by the insurance company in its "Schedule of Derivative Transactions" included in the Annual Statement with the types of derivatives listed in the following table and found that the types of derivatives included in the schedule were marked *Yes* in the table.

Paragraph .A21 of AT-C section 215, *Agreed-Upon Procedures Engagements*, states that mere reading of specified information about the subject matter does not constitute a procedure sufficient to permit a practitioner to report on the results of applying procedures. For purposes of this SOP, the action of "read" as used in the following procedures is the equivalent of "inspect" and is acceptable.

Attachments to the Report

Section 1 — All Derivative Types

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
The following procedures were performed to test controls applicable to all derivative transactions. The procedures were applied to the internal control over derivative transactions in existence during the year ended December 31, 20XX			
Documentation of Controls, Policies, and Procedures			
1. Read the insurance company's derivative use plan (DUP), amendments thereto, and its documentation of controls, policies, and procedures that describe internal control over derivative transactions and found that the DUP and the documentation of controls, policies, and procedures include a description of controls that address the following:			
a. Systems or processes for the periodic valuation of derivative transactions including mechanisms for compensating for any lack of independence in valuing derivative positions (Valuation)	_____	_____	_____
b. Systems or processes for determining whether a derivative instrument used for hedging or replication has been effective (Effectiveness)	_____	_____	_____
c. Credit risk management systems or processes for over-the-counter (OTC) derivative transactions that measure credit risk exposure using the counterparty exposure amount and policies for the establishment of collateral arrangements with counterparties (Credit Risk Management)	_____	_____	_____
d. Management assessment of the adequacy and technical expertise of personnel associated with derivative transactions and systems to implement and control investment practices involving derivatives (Professional Competence)	_____	_____	_____
e. Systems or processes for regular reports to management, segregation of duties, and internal review procedures (Reporting)	_____	_____	_____
f. Procedures for conducting initial and ongoing legal reviews of derivative transactions including assessments of contract enforceability (Legal Reviews)	_____	_____	_____
Nontransaction-Specific Procedures			
2. Read the minutes of meetings of the board of directors and found an indication that the board of directors of the insurance company approved the DUP and any amendments thereto.	_____	_____	_____
3. Inquired of management as to whether the DUP and any amendments thereto were approved by the New York State Insurance Department and was advised that the DUP and any amendments thereto were approved.	_____	_____	_____
4. Read the minutes of meetings of the board of directors and found an indication that the board of directors of the insurance company approved the commitment of financial resources determined by management to be sufficient to accomplish the objectives of the insurance company's DUP.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
<i>This procedure does not provide an assessment of or assurance about the adequacy of the resources determined by management to be sufficient to accomplish the objectives of the DUP.</i>			
<i>In performing the following procedures, the practitioner frequently will find that management has designated and will have in place limits, controls, or procedures that are more restrictive than those approved for use in the DUP</i>			
5. For the year ended December 31, 20XX, inquired of management and was advised that —			
a. There was monitoring of derivative transactions by a control staff, such as internal audit or other internal review group, that is independent of derivatives trading activities.	_____	_____	_____
b. There were procedures in place for derivative personnel to obtain, prior to exceeding limits prescribed by management, at least oral approval from members of senior management who are independent of derivatives trading activities.	_____	_____	_____
c. There were procedures in place for senior management to address excesses related to management-established limits and divergences from management-approved derivative strategies, and that such management has authority to grant exceptions to derivatives limits.	_____	_____	_____
d. There were procedures in place requiring that management be informed when limits prescribed in the DUP were exceeded and for management to approve corrective action(s) in such circumstances.	_____	_____	_____
e. There were procedures in place for the accurate transmittal of derivatives positions to the risk measurement systems when management had implemented risk management systems.	_____	_____	_____
f. There were procedures in place for the performance of appropriate reconciliations to ensure data integrity across the full range of derivatives, including any new or existing derivatives that may be monitored apart from the main processing networks.	_____	_____	_____
g. There were procedures in place for risk managers and senior management to define constraints on derivative activities to ensure compliance with the DUP and to justify excesses with respect to specified management limits.	_____	_____	_____
h. There were procedures in place for senior management, an independent group, or an individual that management designated to perform at least an annual assessment of the identified controls and financial results of the derivative activities to determine that controls were effectively implemented and that the insurance company's business objectives and strategies were achieved.	_____	_____	_____
i. There were procedures in place for a review of limits in the context of changes in strategy, risk tolerance of the insurance company, and market conditions.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
Reporting to the Board of Directors or Committee Thereof			
The law contains provisions regarding management oversight of derivative and replication transactions.			
6. Read the minutes of the board of directors meetings or committees thereof and found an indication that the board of directors or committee thereof received, at least quarterly, a report regarding derivative and replication transactions.	_____	_____	_____
7. Read one quarterly report referred to in procedure 6 and found that the report contained —			
a. A list, or appropriate summaries, of the following:			
(1) Derivative transactions during the period	_____	_____	_____
(2) Derivative transactions outstanding at the end of the period	_____	_____	_____
(3) Unrealized gains or losses on open derivative positions	_____	_____	_____
(4) Derivative transactions closed during the period	_____	_____	_____
b. A summary of the performance of the derivatives in comparison to the objective of the derivative transactions	_____	_____	_____
c. An evaluation of the risks and benefits of the derivative transactions	_____	_____	_____
d. A summary of the amount, type, and performance of replication transactions	_____	_____	_____
8. If the report referred to in the preceding procedure was received, reviewed, and approved by a committee of the board of directors, read the minutes of the board of directors meeting and found an indication that a report of such committee was reviewed at the next board of directors meeting.	_____	_____	_____
9. Read the board of directors minutes and found an indication that the board of directors received a report during the year describing the level of knowledge and experience of individuals conducting, monitoring, controlling, and auditing derivative and replication transactions.	_____	_____	_____
Derivative and Replication Limitations			
The law contains limits on hedging and replication transactions. An insurance company may enter into hedging or replication transactions if, as a result of and after giving effect to the transaction, the derivative investments and replication investments do not exceed certain specified percentages of admitted assets. The following procedures were performed using one analysis per quarter prepared by the insurance company to monitor compliance with the limitations.			

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
10. Obtained and read the insurance company's analysis used to test limitations on investments in derivatives and replication transactions and found that the amounts shown in the analysis indicated that —			
a. The aggregate statement value of options, swaptions, caps, floors, and warrants purchased was not in excess of seven and one-half percent of the insurance company's admitted assets, per the last annual statement.	_____	_____	_____
b. The aggregate statement value of options, swaptions, caps, and floors written was not in excess of three percent of admitted assets.	_____	_____	_____
c. The aggregate potential exposure of collars, swaps, forwards, and futures entered into and options, swaptions, caps, and floors written was not in excess of six and one-half percent of admitted assets.	_____	_____	_____
d. The aggregate statement value of all assets being replicated did not exceed ten percent of the insurance company's admitted assets.	_____	_____	_____
e. The extent of derivative transactions did not exceed the insurance company's internal limitations or that any excess had been specifically authorized by management.	_____	_____	_____
11. Inquired of the preparer of the analysis read in procedure 10 and was advised that the analysis excluded transactions entered into to hedge the currency risk of investments denominated in a currency other than United States dollars.	_____	_____	_____
12. Obtained and read the insurance company's analysis used to test limitations on counterparty exposure, as defined in section 178.3 (e) of the Regulation, and found that the report indicated that —			
a. The counterparty exposure under one or more derivative transactions for any single counterparty, other than a "qualified counterparty," was not in excess of one percent of the insurance company's admitted assets.	_____	_____	_____
b. The counterparty exposure under one or more derivative transactions for all counterparties, other than qualified counterparties, was not in excess of three percent of the insurance company's admitted assets.	_____	_____	_____
13. If the insurance company required collateral arrangements with the counterparties, obtained and read the insurance company's analysis used to monitor the adequacy of the collateral held in accordance with the terms of the arrangement and found that the amount of the collateral held as shown on the analysis was equal to or in excess of the amount to be held.	_____	_____	_____

Description of Exceptions if Any

<u>Procedure Number</u>	<u>Description of Exception</u>
_____	_____
_____	_____
_____	_____

Section 2 — Cap Contracts

	Findings		
	No Exception	Exception	N/A
Procedures			
Performed the following procedures on selected cap contracts to test internal control over cap transactions. Selected five percent of each type of cap transaction (that is, purchases [premium disbursements], sales [premium receipts], and closeouts [closings and settlements of the position]), with the selections distributed throughout the year. If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to enter into cap contracts.	_____	_____	_____
2. For each cap selected for testing, read management's documentation describing the intended use of the cap and performed the following procedures, as applicable.	_____	_____	_____
For caps used as a hedge —			
3. Determined that the documentation described the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the cap was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the cap as a hedge	_____	_____	_____
b. The terms of the cap, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
c. The assets or liabilities (or portion thereof) that the cap hedged	_____	_____	_____
d. Evidence that the cap continued to be an effective hedge	_____	_____	_____
e. Evidence that the cap was consistent with the insurance company's parameters, as specified in the DUP or applicable company policies and procedures, for entering into hedge transactions; for example, the notional amount or underlying	_____	_____	_____
If the cap was an exact offset to an outstanding cap —			
5. Read documentation indicating that the cap offset an outstanding cap previously purchased or sold by the insurance company and that the cap was an exact offset of the market risk of the cap being offset.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
For caps used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the cap was expected to be effective in replicating the investment characteristics of the replicated investment	_____	_____	_____
d. The approach for assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The terms of the cap, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
For all selected caps including those that are a part of a replication transaction —			
8. Obtained a list of individuals, approved by the board of directors or a committee thereof, who had the authority to authorize cap transactions. Compared the name of the individual who authorized the cap transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transaction tested; for example, a transaction in which the notional amount or strike price exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____
10. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties, approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the cap transaction with names on the list and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____
11. Determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure consistent with the classification in the listing obtained in procedure 10.	_____	_____	_____

(continued)

<i>Procedures</i>	<i>Findings</i>		
	<i>No Exception</i>	<i>Exception</i>	<i>N/A</i>
12. Obtained a list of individuals authorized by the board of directors or a committee thereof to trade cap contracts. Compared the name of the individual who executed the purchase, sale, or closeout of the cap with the names on the list and found the name of the individual on the list.	_____	_____	_____
13. Obtained a list of individuals authorized to approve payments relating to caps. Compared the name of the individual who approved any payment relating to the cap with the names on the list and found the name of the individual on the list.	_____	_____	_____
14. Compared the name of the individual who approved any payment relating to the cap with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
15. Compared the name of the individual who received cash or other consideration in connection with the cap with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
16. Obtained the deal ticket and confirmation for the purchase, sale, or closeout of the cap and found that the purchase, sale, or closeout was confirmed by the counterparty.	_____	_____	_____
17. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade caps and found that the name was not on the list.	_____	_____	_____
18. Compared the terms of the cap contract, as stated on the deal ticket and confirmation, with the terms of the cap contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
19. Obtained documentation for one reporting period (for example, monthly or quarterly), indicating that the insurance company determined that its accounting records for caps tested in procedure 18, agreed with or reconciled to the related control account; for example, the subsidiary ledger to the general ledger.	_____	_____	_____
20. Obtained the accounting record documenting modifications, if any, to the cap agreement. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____
21. Compared the terms of the cap agreement recorded in the insurance company's accounting records with the terms shown in the executed copy of the cap agreement and found them to be in agreement.	_____	_____	_____
22. Obtained documentation for one reporting period (for example, monthly or quarterly), indicating that the insurance company physically inventoried the cap agreements.	_____	_____	_____
23. Using the list of authorized traders obtained in procedure 12, compared the name of the individual who had custody or access to the cap agreement with the names of individuals authorized to execute purchases, sales, or closeouts of cap contracts and found that the name of the individual was not on the list.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
24. Compared information regarding the cap, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
25. If the cap should have been included in the monitoring analysis separately tested in procedure 10 within section 1, "All Derivative Types," compared information regarding the cap, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
26. Read accounting documentation indicating that the insurance company monitored periodic cash settlements related to the cap tested, meaning, the insurance company had controls in place to determine that periodic cash settlements, if any, were received.	_____	_____	_____
Effectiveness of Caps Used As Hedges and in Replication Transactions			
27. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the cap as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
28. If the cap was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
29. Read documentation indicating that the legal department reviewed the cap agreement to assess contract compliance with the DUP and enforceability.	_____	_____	_____
30. Read documentation indicating that the legal department updated its assessment of agreement enforceability at least annually.	_____	_____	_____
Valuation			
31. Obtained the insurance company's policies and procedures for valuing caps and found that the insurance company determined the fair value of the cap in accordance with the policy described in the insurance company's procedures for the valuation of caps.	_____	_____	_____
32. Read documentation supporting the fair value of the cap and found that the fair value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized person.	_____	_____	_____

Description of Exceptions if Any

<u>Procedure Number</u>	<u>Description of Exception</u>

Section 3 — Collar Contracts

	Findings		
	No Exception	Exception	N/A
Procedures			
Performed the following procedures on selected collar contracts to test internal control over collar transactions. Selected five percent of each type of collar transaction (that is, executions [entering into a collar transaction in which the net position at inception may result in either no cash outlay, cash received, or cash disbursed] and closeouts [closings and settlements of the position]), with the selections distributed throughout the year. If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to enter into collar contracts.	_____	_____	_____
2. For each collar selected for testing, read management's documentation describing the intended use of the collar and performed the following procedures, as applicable.	_____	_____	_____
For collars used as a hedge —			
3. Determined that the documentation described the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the collar was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the collar as a hedge	_____	_____	_____
b. The terms of the collar, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
c. The assets or liabilities (or portion thereof) that the collar hedged	_____	_____	_____
d. Evidence that the collar continued to be an effective hedge	_____	_____	_____
e. Evidence that the contract was consistent with the insurance company's parameters, as specified in the DUP or applicable company policies and procedures, for entering into hedge transactions; for example, the notional amount or underlying	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
If the collar was an exact offset of an outstanding collar —			
5. Read documentation indicating that the collar offset an outstanding collar previously purchased or sold by the insurance company and that the collar was an exact offset of the market risk of the collar being offset.	_____	_____	_____
For collars used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the collar was expected to be effective in replicating the investment characteristics of the replicated investment	_____	_____	_____
d. The approach in assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The terms of the collar, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
For all selected collars including those that are a part of a replication transaction —			
8. Obtained a list of individuals, approved by the board of directors or a committee thereof, who had the authority to authorize collar transactions. Compared the name of the individual who authorized the collar transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transaction tested; for example, a transaction in which the notional amount or strike price exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____
10. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the collar transaction with names on the list and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
11. Determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure consistent with the classification in the listing obtained in procedure 10.	_____	_____	_____
12. Obtained a list of individuals authorized by the board of directors or a committee thereof to trade collar contracts. Compared the name of the individual who executed the execution or closeout of the collar contract with the names on the list and found the name of the individual on the list.	_____	_____	_____
13. Obtained a list of individuals authorized to approve payments relating to collars. Compared the name of the individual who approved any payment relating to the collar with the names on the list and found the name of the individual on the list.	_____	_____	_____
14. Compared the name of the individual who approved any payment relating to the collar with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
15. Compared the name of the individual who received cash or other consideration in connection with the collar with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
16. Obtained the deal ticket and confirmation for the execution or closeout of the collar and found that the execution or closeout was confirmed by the counterparty.	_____	_____	_____
17. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade collars and found that the name was not on the list.	_____	_____	_____
18. Compared the terms of the collar contract, as stated on the deal ticket and confirmation, with the terms of the collar contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
19. Obtained documentation for one reporting period (for example, monthly or quarterly) indicating that the insurance company determined that its accounting records for collars, tested in procedure 18, agreed with or reconciled to the related control account; for example, the subsidiary ledger to the general ledger.	_____	_____	_____
20. Obtained the accounting record documenting modifications, if any, to the collar agreement. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____
21. Compared the terms of the collar agreement recorded in the insurance company's accounting records with the terms shown in the executed copy of the collar agreement and found them to be in agreement.	_____	_____	_____
22. Obtained documentation for one reporting period (for example, monthly or quarterly), indicating that the insurance company physically inventoried the collar agreement.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
23. Using the list of authorized traders obtained in procedure 12, compared the name of the individual who had custody or access to the collar contracts with the names of individuals authorized to enter into trades, executions, or closeouts of collar contracts and found that the name of the individual was not on the list.	_____	_____	_____
24. Compared information regarding the collar, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
25. If the collar should have been included in the monitoring analysis separately tested in procedure 10 within section 1, "All Derivative Types," compared information regarding the collar, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
26. Read accounting documentation indicating that the insurance company monitored periodic cash settlements related to the collar tested, meaning, the insurance company had controls in place to determine that periodic cash settlements, if any, were received.	_____	_____	_____
Effectiveness of Collars Used As Hedges and in Replication Transactions			
27. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the collar as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
28. If the collar was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
29. Read documentation indicating that the legal department reviewed the collar agreement to assess contract compliance with the DUP and enforceability.	_____	_____	_____
30. Read documentation indicating that the legal department updated its assessment of agreement enforceability at least annually.	_____	_____	_____
Valuation			
31. Obtained the insurance company's policies and procedures for valuing collars and found that the insurance company determined the fair value of the collar in accordance with the policy described in the insurance company's procedures for the valuation of collars.	_____	_____	_____
32. Read documentation supporting the fair value of the collar and found that the fair value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized individual.	_____	_____	_____

Description of Exceptions if Any

<u>Procedure Number</u>	<u>Description of Exception</u>

Section 4 — Floor Contracts

	Findings		
	No Exception	Exception	N/A
Procedures			
Performed the following procedures on selected floor contracts to test internal control over floor transactions. Selected five percent of each type of floor transaction (that is, purchases [premium disbursements], sales [premium receipts], and closeouts [closings and settlements of the position]), with the selections distributed throughout the year. If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to enter into floor contracts.	_____	_____	_____
2. For each floor selected for testing, read management's documentation describing the intended use of the floor and performed the following procedures, as applicable.	_____	_____	_____
For floors used as a hedge —			
3. Determined that the documentation described the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the floor was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the floor as a hedge	_____	_____	_____
b. The terms of the floor, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
c. The assets or liabilities (or portion thereof) that the floor hedged	_____	_____	_____
d. Evidence that the floor continued to be an effective hedge	_____	_____	_____
e. Evidence that the floor was consistent with the insurance company's parameters, as specified in the DUP or applicable company policies and procedures for entering into hedge transactions; for example, the notional amount or underlying	_____	_____	_____
If the floor was an exact offset of an outstanding floor —			
5. Read documentation indicating that the floor offset an outstanding floor previously purchased or sold by the insurance company and that the floor was an exact offset of the market risk of the floor being offset.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
For floors used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the floor was expected to be effective in replicating the investment characteristics of the replicated investment	_____	_____	_____
d. The approach in assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The terms of the floor, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
For all selected floors including those that are a part of a replication transaction —			
8. Obtained a list of individuals approved by the board of directors or a committee thereof who had the authority to authorize floor transactions. Compared the name of the individual who authorized the floor transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transaction tested; for example, a transaction in which the notional amount or strike price exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____
10. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties, approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the floor transaction with names on the list and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____
11. Determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure consistent with the classification in the listing obtained in procedure 10.	_____	_____	_____

(continued)

<i>Procedures</i>	<i>Findings</i>		
	<i>No Exception</i>	<i>Exception</i>	<i>N/A</i>
12. Obtained a list of individuals authorized by the board of directors or a committee thereof to trade floor contracts. Compared the name of the individual who executed the purchase, sale, or closeout of the floor with the names on the list and found the name of the individual on the list.	_____	_____	_____
13. Obtained a list of individuals authorized to approve payments relating to floors. Compared the name of the individual who approved any payment relating to the floor with the names on the list and found the name of the individual on the list.	_____	_____	_____
14. Compared the name of the individual who approved any payment relating to the floor with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
15. Compared the name of the individual who received cash or other consideration in connection with the floor with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
16. Obtained the deal ticket and confirmation for the purchase, sale, or closeout of the floor and found that the purchase, sale, or closeout was confirmed by the counterparty.	_____	_____	_____
17. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade floors and found that the name was not on the list.	_____	_____	_____
18. Compared the terms of the floor contract, as stated on the deal ticket and confirmation, with the terms of the floor contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
19. Obtained documentation for one reporting period (for example, monthly or quarterly), that the insurance company determined that its accounting records for floors, tested in procedure 18, agreed with or reconciled to the related control account; for example, the subsidiary ledger to the general ledger.	_____	_____	_____
20. Obtained the accounting record documenting modifications, if any, to the floor agreement. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____
21. Compared the terms of the floor agreement recorded in the insurance company's accounting records with the terms shown in the executed copy of the floor agreement and found them to be in agreement.	_____	_____	_____
22. Obtained documentation for one reporting period (for example, monthly or quarterly), indicating that the insurance company physically inventoried the floor agreements.	_____	_____	_____
23. Using the list of authorized traders obtained in procedure 12, compared the name of the individual who had custody or access to the floor agreement with the names of individuals authorized to execute purchases, sales, or closeouts of floor contracts and found that the name was not on the list.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
24. Compared information regarding the floor, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
25. If the floor should have been included in the monitoring analysis separately tested in procedure 10 within section 1, "All Derivative Types," compared information regarding the floor, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
26. Read accounting documentation indicating that the insurance company monitored periodic cash settlements related to the floor tested, meaning, the insurance company had controls in place to determine that periodic cash settlements, if any, were received.	_____	_____	_____
Effectiveness of Floors Used As Hedges and in Replication Transactions			
27. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the floor as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
28. If the floor was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
29. Read documentation indicating that the legal department reviewed the floor agreement to assess contract compliance with the DUP and enforceability.	_____	_____	_____
30. Read documentation indicating that the legal department updated its assessment of agreement enforceability at least annually.	_____	_____	_____
Valuation			
31. Obtained the insurance company's policies and procedures for valuing floors and found that the insurance company determined the fair value of the floor in accordance with the policy described in the insurance company's procedures for the valuation of floors.	_____	_____	_____
32. Read documentation supporting the fair value of the floor and found that the fair value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized individual.	_____	_____	_____

Section 5 — Forward Contracts

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
Performed the following procedures on selected forward contracts to test internal control over forward transactions. Selected five percent of each type of forward transaction, with the selections distributed throughout the year. These are, (1) forward contracts entered into to make delivery, (2) forward contracts entered into to take delivery, (3) forward contracts settled by making delivery, (4) forward contracts settled by taking delivery, (5) forward contracts settled by cash. If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all of the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to enter into forward contracts.	_____	_____	_____
2. For each forward selected for testing, read management's documentation describing the intended use of the forward and performed the following procedures, as applicable.	_____	_____	_____
For forward contracts used as a hedge —			
3. Determined that the documentation describes the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the forward was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the forward as a hedge	_____	_____	_____
b. The terms of the forward, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
c. The assets or liabilities (or portion thereof) that the forward hedged	_____	_____	_____
d. The specific forward contract used in the hedge	_____	_____	_____
e. Evidence that the forward continued to be an effective hedge	_____	_____	_____
f. Evidence that the forward was consistent with the insurance company's parameters, as specified in the DUP or applicable company policies and procedures, for entering into hedge transactions; for example, the notional amount or underlying	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
If the forward was an exact offset of an outstanding forward —			
5. Read documentation indicating that the forward offset an outstanding forward previously purchased or sold by the insurance company and that the forward was an exact offset of the market risk of the forward being offset.	_____	_____	_____
For forwards used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the forward was expected to be effective in replicating the investment characteristic of the replicated investment	_____	_____	_____
d. The approach for assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The terms of the forward contract, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
For all selected forwards, including those that are a part of the replication transaction —			
8. Obtained a list of individuals, approved by the board of directors or a committee thereof who had the authority to authorize forward transactions. Compared the name of the individual who authorized the forward transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transaction tested; for example, a transaction in which the notional amount exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____
10. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties, approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the forward transaction with names on the list and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
11. Determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure consistent with the classification in the listing obtained in procedure 10.	_____	_____	_____
12. Obtained a list of individuals authorized by the board of directors or committee thereof to trade forward contracts. Compared the name of the individual who executed the purchase or sale of the forward with the names on the list and found the name of the individual on the list.	_____	_____	_____
13. Obtained a list of individuals authorized to approve settlements or payments related to forward contracts. For the purchase and any transaction subsequent to purchase, compared the name of the individual who approved any payment or settlement of funds in connection with the forward contract with the names on the list and found the name of the individual on the list.	_____	_____	_____
14. Compared the name of the individual who approved any settlement or payment relating to the forward with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
15. Compared the name of the individual who received cash or other consideration in connection with the forward with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
16. Obtained the deal ticket and confirmation for the purchase or sale of the forward contract and found that the purchase or sale was confirmed by the counterparty.	_____	_____	_____
17. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade forwards and found that the name was not on the list.	_____	_____	_____
18. Compared the terms of the forward contract, as stated on the deal ticket and confirmation, with the terms of the forward contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
19. Obtained documentation for one reporting period, (for example, monthly or quarterly), that the insurance company determined that its accounting records for forwards, tested in procedure 18, agreed with or reconciled to the related control account, (for example, the subsidiary ledger to the general ledger).	_____	_____	_____
20. Obtained the accounting record documenting modifications, if any, to the forward contract. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____
21. For one reporting period, (for example, monthly or quarterly), obtained the insurance company's documentation of the existence of the forward contract and found that the insurance company either (a) obtained a statement from the custodian confirming the existence of the forward contract, (b) physically inventoried the forward contract, or (c) obtained a statement from the counterparty acknowledging the existence of the forward contract.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
22. Using the list of authorized traders obtained in procedure 12, compared the name of the individual who had custody or access to the forward with the names of individuals authorized to execute purchases and sales of forwards and found that the name was not on the list.	_____	_____	_____
23. Compared information regarding the forward, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
24. If the forward should have been included in the monitoring analysis s>separately tested in step 10 within section 1, "All Derivative Types," compared information regarding the forward, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
Effectiveness of Forward Contracts Used As Hedges and in Replication Transactions			
25. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the forward as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
26. If the forward was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
27. Read documentation indicating that the legal department reviewed the forward contract to assess contract compliance with the DUP and enforceability.	_____	_____	_____
28. Read documentation indicating that the legal department updated its assessment of contract enforceability at least annually.	_____	_____	_____
Valuation			
29. Obtained the insurance company's policies and procedures for valuing forwards and found that the insurance company determined the fair value of the forward in accordance with the policy described in the insurance company's procedures for valuation of forwards.	_____	_____	_____
30. Read documentation supporting the fair value of the forward contract and found that the fair value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized individual.	_____	_____	_____

Section 6 — Futures Contracts

	Findings		
	No Exception	Exception	N/A
Procedures			
Performed the following procedures on selected futures contracts to test internal control over futures transactions. Selected five percent of each type of futures transaction, with the selections distributed throughout the year. These are purchases, sales, and cash settlements (closeouts of a position). If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all of the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to trade futures.	_____	_____	_____
2. For each futures transaction selected for testing, read management's documentation describing the intended use of the futures and performed the following procedures, as applicable.	_____	_____	_____
For futures used as a hedge —			
3. Determined that the documentation describes the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the futures position was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the futures as a hedge	_____	_____	_____
b. The terms of the futures transaction and the name of the exchange and firm(s) handling the trade	_____	_____	_____
c. The assets or liabilities (or portion thereof) that the futures transaction hedged	_____	_____	_____
d. Evidence that the futures contract continued to be an effective hedge	_____	_____	_____
e. Evidence that the futures position was consistent with the insurance company's parameters, as specified in the DUP or applicable company policies and procedures for futures transactions; for example, the notional amount or underlying	_____	_____	_____
For futures transactions that were an exact offset of an outstanding futures transaction —			
5. Read documentation indicating that the futures transaction offset an outstanding futures position previously purchased or sold by the insurer and that the futures transaction was an exact offset of the market risk of the futures position being offset.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
For futures used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the futures position was expected to be effective in replicating the investment characteristics of the replicated investment	_____	_____	_____
d. The approach in assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The terms of the futures transaction and the name of the exchange and the firm(s) handling the trade	_____	_____	_____
c. The specific futures contract used in the replication	_____	_____	_____
For all selected futures including those that are a part of the replication transaction —			
8. Obtained a list of individuals, approved by the board of directors or a committee thereof, who had the authority to authorize futures trades. Compared the name of the individual who authorized the futures transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transaction tested; for example, a transaction in which the notional amount exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____
10. Obtained a list of individuals authorized by the board of directors or committee thereof to trade futures contracts. Compared the name of the individual who executed the purchase or sale of the futures contract with the names on the list and found the name of the individual on the list.	_____	_____	_____
11. Obtained a list of individuals authorized to approve settlements or disbursements related to futures transactions. For purchases and transactions subsequent to purchase or sale of the futures contract, compared the name of the individual who approved any settlement of funds relating to the futures with the names on the list and found the name of the individual on the list.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
12. Compared the name of the individual who approved any payment relating to the futures with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
13. Compared the name of the individual who received cash or other consideration in connection with the futures with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
14. Obtained the deal ticket and confirmation for the purchase, expiration, or sale of the futures contracts and found that the purchase, sale, or expiration of the futures contract was confirmed by the deal ticket and confirmation.	_____	_____	_____
15. Compared the terms of the futures transaction, as stated on the deal ticket and confirmation, with the terms of the transaction recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
16. Obtained documentation for one reporting period, (for example, monthly or quarterly), that the insurance company determined that its accounting records for futures, tested in procedure 15, agreed with or reconciled to the related control account, (for example, the subsidiary ledger to the general ledger).	_____	_____	_____
17. For one reporting period, (for example, monthly or quarterly), obtained the insurance company's documentation of the existence of the futures contracts and found that the insurance company obtained statements from the futures counterparty(ies) or broker(s) confirming the futures transactions and positions.	_____	_____	_____
18. Compared information regarding the futures contract, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
19. If the futures position should have been included in the monitoring analysis separately tested in procedure 10 within section 1, "All Derivative Types," compared information regarding the futures contract, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
Effectiveness of Futures Used As Hedges and in Replication Transactions			
20. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the futures position as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
21. If the futures position was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the company policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____

Section 7 — Option Contracts

<u>Procedures</u>	<u>Findings</u>		
	<u>No</u>		
	<u>Exception</u>	<u>Exception</u>	<u>N/A</u>
Performed the following procedures on selected option contracts to test internal control over option transactions. Selected five percent of each type of option transaction (that is, purchases, sales, expirations, and exercises), with the selections distributed throughout the year. If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all of the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to trade or enter into option contracts.	_____	_____	_____
2. For each option selected for testing, read management's documentation describing the intended use of the option and performed the following procedures, as applicable.	_____	_____	_____
For options used as a hedge —			
3. Determined that the documentation described the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the option was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the option as a hedge	_____	_____	_____
b. For over-the-counter (OTC) options, the terms of the option, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
c. For exchange-traded options, the term of the option, the name of the exchange, and the name of the firm(s) handling the trade	_____	_____	_____
d. The assets or liabilities (or portion thereof) that the option hedged	_____	_____	_____
e. For OTC and exchange-traded options, the specific option used in the hedge	_____	_____	_____
f. Evidence that the option continued to be an effective hedge	_____	_____	_____
g. Evidence that the option was consistent with the insurance company's parameters, as specified in the DUP or applicable company policies and procedures, for entering into hedge transactions; for example, the notional amount, or underlying	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
If the option transaction was (a) for income generation and was for the sale of a call option on securities or (b) an exact offset to an outstanding option —			
5. Read the documentation supporting the transaction which indicated that the insurance company was holding or could immediately acquire through the exercise of options, warrants, or conversion rights already owned, the underlying securities during the entire period the option was outstanding.	_____	_____	_____
6. Read documentation indicating that the option offset an outstanding option previously purchased or sold by the insurance company and that the option was an exact offset to the market risk of the option being offset.	_____	_____	_____
For options used in a replication transaction —			
7. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the option was expected to be effective in replicating the investment characteristics of the replicated investment	_____	_____	_____
d. The approach in assessing the effectiveness of the replication transaction	_____	_____	_____
8. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The specific option used in the replication	_____	_____	_____
c. For OTC options, the terms of the option, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
d. For exchange-traded options, the name of the exchange and the firm(s) handling the trade	_____	_____	_____
For all selected options, including those that are a part of a replication transaction —			
9. Obtained a list of individuals, approved by the board of directors or a committee thereof, who had the authority to authorize option transactions. Compared the name of the individual who authorized the option transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
10. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transaction tested; for example, a transaction in which the notional amount exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
11. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties, approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the option transaction with names on the list and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____
12. For OTC options, determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure consistent with the classification in the listing obtained in procedure 11.	_____	_____	_____
13. Obtained a list of individuals authorized by the board of directors or committee thereof to trade option contracts. Compared the name of the individual who executed the purchase, sale, or exercise of the option with the names on the list and found the name of the individual on the list.	_____	_____	_____
14. Obtained a list of individuals authorized to approve payments relating to options contracts. Compared the name of the individual who approved any payment relating to the option with the names on the list and found the name of the individual on the list.	_____	_____	_____
15. Compared the name of the individual who approved any payment relating to the option with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
16. Compared the name of the individual who received cash or other consideration in connection with the option with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
17. Obtained the deal ticket and confirmation for the purchase, sale, or exercise of the option and found that the purchase, sale, or exercise of the option was confirmed by the counterparty or firm handling the transaction.	_____	_____	_____
18. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade options and found that the name was not on the list.	_____	_____	_____
19. Compared the terms of the option contract, as stated on the deal ticket and confirmation, with the terms of the option contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
20. Obtained documentation for one reporting period, (for example, monthly or quarterly), indicating that the insurance company determined whether its accounting records for options, tested in procedure 19, agreed with or reconciled to the related control account, (for example, the subsidiary ledger to the general ledger).	_____	_____	_____

<i>Procedures</i>	<i>Findings</i>		
	<i>No Exception</i>	<i>Exception</i>	<i>N/A</i>
21. Obtained the accounting record documenting modifications, if any, to the option transaction. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____
22. Obtained documentation for one reporting period, (for example, monthly or quarterly), indicating that the insurance company obtained a statement from the counterparty confirming the existence of the option position.	_____	_____	_____
23. Using the list of authorized traders obtained in procedure 13, compared the name of the individual who had custody of or access to the option documentation with the names of individuals authorized to purchase, sell, or exercise the option and found that the name was not on the list.	_____	_____	_____
24. Compared information regarding the option, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
25. If the option should have been included in the monitoring analysis separately tested in procedure 10 within section 1, "All Derivative Types," compared information regarding the option, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
Effectiveness of Options Used As Hedges and in Replication Transactions			
26. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the option as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
27. If the option was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
28. Read documentation indicating that the legal department reviewed the option agreement to assess contract compliance with the DUP and enforceability.	_____	_____	_____
29. Read documentation indicating that the legal department updated its assessment of legal enforceability of the OTC option agreement at least annually.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No</u> <u>Exception</u>	<u>Exception</u>	<u>N/A</u>
Valuation			
30. Obtained the insurance company's policies and procedures for valuing options and found that the insurance company determined the fair value of OTC options and the market price of exchange-traded options, in accordance with the policy described in the insurance company's procedures for the valuation of options.	_____	_____	_____
31. Read documentation supporting the fair value for OTC options and the market price of exchange-traded options and found that the fair value or market value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized individual.	_____	_____	_____

Section 8 — Swap Contracts

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
Performed the following procedures on selected swap contracts to test internal control over swap transactions. Selected five percent of each type of swap transaction (that is, executions [purchases] and closeouts [sales]), with the selections distributed throughout the year. If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in fewer than four items, selected four or fewer items that represented all the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to enter into swap agreements.	_____	_____	_____
2. For each swap agreement selected for testing, read management's documentation describing the intended use of the swap agreement and performed the following procedures, as applicable.	_____	_____	_____
For swaps used as a hedge —			
3. Determined that the documentation describes the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the swap was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the swap as a hedge	_____	_____	_____
b. The terms of the swap, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
c. The assets or liabilities (or portion thereof) that the swap hedged	_____	_____	_____
d. Evidence that the swap continued to be an effective hedge	_____	_____	_____
e. Evidence that the swap was consistent with the insurance company's parameters, as specified in the DUP or applicable policies and procedures, for entering into swap agreements; for example, the notional amount or underlying	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
For swaps that were an exact offset of an outstanding swap —			
5. Read documentation that indicated that the swap offset a swap previously purchased or sold, and that the swap was an exact offset to the market risk of the swap being offset.	_____	_____	_____
For swaps used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the swap was expected to be effective in replicating the investment characteristic of the replicated investment	_____	_____	_____
d. The approach in assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The terms of the swap, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
For all selected swaps including those that are a part of a replication transaction —			
8. Obtained a list of individuals, approved by the board of directors or a committee thereof who had the authority to authorize swap transactions. Compared the name of the individual who authorized the swap transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transactions tested; for example, a transaction in which the notional amount exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____
10. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties, approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the swap agreement with names on the list and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
11. Determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure consistent with the classification in the listing obtained in procedure 10.	_____	_____	_____
12. Obtained a list of individuals authorized by the board of directors or committee thereof to trade swap contracts. Compared the name of the individual who executed the swap with the names on the list and found the name of the individual on the list.	_____	_____	_____
13. Obtained a list of individuals authorized to approve settlements or disbursements related to swaps. For purchases and any interim settlements or closeouts of the swap subsequent to purchase, compared the name of the individual who approved any settlement of funds relating to the swap with the names on the list and found the name of the individual on the list.	_____	_____	_____
14. Compared the name of the individual who approved any payment relating to the swap with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
15. Compared the name of the individual who received cash or other consideration in connection with the swap with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
16. Obtained the deal ticket and confirmation for the purchase, execution, or closeout of the swap and found that the purchase, execution, or closeout of the swap was confirmed by the counterparty.	_____	_____	_____
17. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade swaps and found that the name was not on the list.	_____	_____	_____
18. Compared the terms of the swap contract, as stated on the deal ticket and confirmation, with the terms of the swap contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
19. Obtained documentation for one reporting period (for example, monthly, or quarterly), that the insurance company determined whether its accounting records for swaps, tested in procedure 18, agreed with or reconciled to the related control account, (for example, the subsidiary ledger to the general ledger).	_____	_____	_____
20. Obtained the accounting record documenting modifications, if any, to the swap agreement. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____
21. Compared the terms of the swap agreement recorded in the insurance company's accounting records with the terms shown in the executed copy of the swap agreement and found them to be in agreement.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
22. Using the list of authorized traders obtained in procedure 12, compared the name of the individual who had custody or access to the swap agreement with the names of individuals authorized to execute swap agreements and found that the name was not on the list.	_____	_____	_____
23. Compared information regarding the swap, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
24. If the swap should have been included in the monitoring analysis separately tested in procedure 10 within section 1, "All Derivative Types," compared information regarding the swap, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
25. Read accounting documentation indicating that the insurance company monitored periodic cash settlements related to swap transactions, meaning, the insurance company had controls in place to determine that periodic cash settlements, if any, were received.	_____	_____	_____
Effectiveness of Swaps Used As Hedges and in Replication Transactions			
26. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the swap as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
27. If the swap was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
28. Read documentation indicating that the legal department reviewed the swap agreement to assess contract compliance with the DUP and enforceability.	_____	_____	_____
29. Read documentation indicating that the legal department updated its assessment of the enforceability of the swap agreement at least annually.	_____	_____	_____
Valuation			
30. Obtained the insurance company's policies and procedures for valuing swaps and found that the insurance company determined the fair value of the swap in accordance with the policy described in the insurance company's procedures for valuation of swaps.	_____	_____	_____
31. Read documentation supporting the fair value of the swap and found that the fair value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized individual.	_____	_____	_____
Description of Exceptions if Any

Section 9 — Swapion Contracts

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
Performed the following procedures on selected swapion contracts to test internal control over swapion transactions. Selected five percent of each type of swapion transaction with the selections distributed throughout the year. These are executions (purchases) and closeouts (sales). If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to buy or sell swapions.	_____	_____	_____
2. For each swapion contract selected for testing, read management's documentation describing the intended use of the swapion and performed the following procedures, as applicable.	_____	_____	_____
For swapions used as a hedge —			
3. Determined that the documentation describes the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the swapion was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the swapion as a hedge	_____	_____	_____
b. The terms of the swapion, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
c. The assets or liabilities (or portion thereof) that the swapion hedged	_____	_____	_____
d. Evidence that the swapion continued to be an effective hedge	_____	_____	_____
e. Evidence that the swapion was consistent with the insurance company's parameters, as specified in the DUP or applicable policies and procedures, for entering into swapion agreements; for example, the notional amount or underlying	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
For swaptions that were an exact offset of an outstanding swaption —			
5. Read documentation indicating that the swaption offset an outstanding swaption and that the swaption was an exact offset of the market risk of the swaption being offset.	_____	_____	_____
For swaptions used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the swaption was expected to be effective in replicating the investment characteristic of the replicated investment	_____	_____	_____
d. The approach in assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The terms of the swaption, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
For all selected swaptions including those that are a part of a replication transaction —			
8. Obtained a list of individuals, approved by the board of directors or a committee thereof, who had the authority to authorize swaptions. Compared the name of the individual who authorized the swaption transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transactions tested; for example, a transaction in which the notional amount exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support and found evidence of approval of the transaction tested.	_____	_____	_____
10. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties, approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the swaption transaction with names on the list and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
11. Determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure consistent with the classification in the listing obtained in procedure 10.	_____	_____	_____
12. Obtained a list of individuals authorized by the board of directors or committee thereof to trade swaption contracts. Compared the name of the individual who executed the swaption with the names on the list and found the name of the individual on the list.	_____	_____	_____
13. Obtained a list of individuals authorized to approve settlements or disbursements related to swaption agreements. Compared the name of the individual who approved settlements and disbursements relating to the swaption with the names on the list and found the name on the list.	_____	_____	_____
14. Compared the name of the individual who approved any payment relating to the swaption with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
15. Compared the name of the individual who received cash or other consideration in connection with the swaption with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
16. Obtained the deal ticket and confirmation for the purchase, sale, modification, or closeout of the swaption and found that the purchase, sale, modification, or closeout was confirmed by the counterparty.	_____	_____	_____
17. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade swaptions and found that the name was not on the list.	_____	_____	_____
18. Compared the terms of the swaption contract, as stated on the deal ticket and confirmation, with the terms of the swaption contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
19. Obtained documentation for one reporting period (for example, monthly or quarterly), that the insurance company determined whether its accounting records for swaptions, tested in procedure 18, agreed with or reconciled to the related control account, (for example, the subsidiary ledger to the general ledger).	_____	_____	_____
20. Obtained the accounting record documenting modifications, if any, to the swaption agreement. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____
21. Compared the terms of the swaption agreement recorded in the insurance company's accounting records with the terms shown in the executed copy of the swaption agreement and found them to be in agreement.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
22. Using the list of authorized traders obtained in procedure 12, compared the name of the individual who had custody or access to the swaption agreement with the names of individuals authorized to execute swaption agreements and found that the name was not on the list.	_____	_____	_____
23. Compared information regarding the swaption, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
24. If the swaption should have been included in the monitoring analysis separately tested in procedure 10 within section 1, "All Derivative Types," compared information regarding the swaption, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
Effectiveness of Swaptions Used As Hedges and in Replication Transactions			
25. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the swaption as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
26. If the swaption was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
27. Read documentation indicating that the legal department reviewed the swaption agreement to assess contract compliance with the DUP and enforceability.	_____	_____	_____
28. Read documentation indicating that the legal department updated its assessment of the enforceability of the swaption agreement at least annually.	_____	_____	_____
Valuation			
29. Obtained the insurance company's policies and procedures for valuing swaptions and found that the insurance company determined the fair value of the swaption in accordance with the policy described in the insurance company's procedures for valuation of swaptions.	_____	_____	_____
30. Read documentation supporting the fair value of the swaption and found that the fair value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized individual.	_____	_____	_____

Section 10 — Warrant Contracts

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
Performed the following procedures on selected warrant contracts to test internal control over warrant transactions. Selected five percent of each type of warrant transaction (that is, purchases, sales, expirations, and exercises), with the selections distributed throughout the year. If five percent of a given type of transaction exceeded 40, the number of items selected for that type of transaction was limited to 40. If five percent of a type of transaction resulted in less than four items, selected four or fewer items that represented all of the transactions of that type.			
Reporting			
1. Read the insurance company's derivative use plan (DUP) and any amendments thereto and found that the DUP permits the insurance company to trade or enter into warrant contracts.	_____	_____	_____
2. For each warrant selected for testing, read management's documentation describing the intended use of the warrant and performed the following procedures, as applicable.	_____	_____	_____
For warrants used as a hedge —			
3. Determined that the documentation described the following:			
a. The risk hedged	_____	_____	_____
b. How the hedge was consistent with the overall risk management strategy	_____	_____	_____
c. How the warrant was expected to be effective in offsetting the exposure	_____	_____	_____
d. The approach in assessing the effectiveness of the hedge	_____	_____	_____
4. Determined that the following items were documented:			
a. The purpose(s) of the warrant as a hedge	_____	_____	_____
b. For exchange-traded warrants, the term of the warrant, the name of the exchange, and the name of the firm(s) handling the trade	_____	_____	_____
c. For over-the-counter (OTC) warrants, the terms of the warrant, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
d. The assets or liabilities (or portion thereof) that the warrant hedged	_____	_____	_____
e. Evidence that the warrant continued to be an effective hedge	_____	_____	_____
f. Evidence that the warrant was consistent with the insurance company's parameters, as specified in the DUP or applicable company policies and procedures for entering into hedge transactions; for example, the notional amount or underlying	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
If the warrant transaction was an exact offset of an outstanding warrant —			
5. Read documentation indicating that the warrant transaction offset an outstanding warrant previously purchased or sold by the insurance company and that the warrant was an exact offset of the market risk of the warrant being offset	_____	_____	_____
For warrants used in a replication transaction —			
6. Determined that the documentation described the following:			
a. The investment type and characteristics replicated	_____	_____	_____
b. How the replication was consistent with the overall management investment strategy	_____	_____	_____
c. How the warrant was expected to be effective in replicating the investment characteristics of the replicated investment	_____	_____	_____
d. The approach in assessing the effectiveness of the replication transaction	_____	_____	_____
7. Determined that the following items were documented:			
a. The instruments used in the replication and the investment type and characteristics replicated	_____	_____	_____
b. The specific warrant used in the replication	_____	_____	_____
c. For exchange-traded warrants, the name of the exchange and the firm(s) handling the trade	_____	_____	_____
d. For OTC warrants, the terms of the warrant, the name of the counterparty, and the counterparty exposure amount	_____	_____	_____
For all selected warrants including those that are part of a replication transaction —			
8. Obtained a list of individuals, approved by the board of directors or a committee thereof who had the authority to authorize warrant transactions. Compared the name of the individual who authorized the warrant transaction with the names on the list and found the name of the individual on the list.	_____	_____	_____
9. Based on the details of the transaction identified in procedure 2 and company policy, compared the terms of the transaction with the insurance company's policy regarding the requirement for the board of directors or a committee thereof to authorize the specific transaction tested; for example, a transaction in which the notional amount exceeded a limit requiring additional approval. If the board of directors or a committee thereof was required to approve the transaction, read minutes of the board of directors or a committee thereof or other appropriate support, and found evidence of approval of the transaction tested.	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
10. Obtained a list of <i>qualified</i> and <i>nonqualified</i> counterparties, approved by the board of directors or a committee thereof. Compared the name of the counterparty involved in the warrant transaction with names on the list, and found the name of the counterparty on the respective qualified or nonqualified list.	_____	_____	_____
11. For OTC warrants, determined that the counterparty was listed as qualified or nonqualified in the analysis used for monitoring the insurance company's limitations on counterparty exposure, consistent with the classification in the listing obtained in procedure 10.	_____	_____	_____
12. Obtained a list of individuals authorized by the board of directors or committee thereof to trade warrant contracts. Compared the name of the individual who executed the purchase, sale, or exercise of the warrant with the names on the list and found the name of the individual on the list.	_____	_____	_____
13. Obtained a list of individuals authorized to approve payments related to warrant contracts. Compared the name of the individual who approved any payment relating to the warrant with the names on the list, and found the name of the individual on the list.	_____	_____	_____
14. Compared the name of the individual who approved any payment relating to the warrant with the name of the individual who approved entering into the contract and found that the names were different.	_____	_____	_____
15. Compared the name of the individual who received cash or other consideration in connection with the warrant with the name of the individual who entered into the contract and found that the names of the individuals were different.	_____	_____	_____
16. Obtained the deal ticket and confirmation for the purchase, sale, or exercise of an exchange-traded warrant and found that the purchase, sale, or exercise was confirmed by the firm handling the transaction.	_____	_____	_____
17. Compared the name of the individual who received the deal ticket and confirmation with the names on a list of individuals authorized to trade warrants and found that the name was not on the list.	_____	_____	_____
18. Compared the terms of the warrant contract, as stated on the deal ticket and confirmation, with the terms of the warrant contract recorded in the insurance company's accounting records and found them to be in agreement.	_____	_____	_____
19. Obtained documentation for one reporting period, (for example, monthly or quarterly), that the insurance company determined whether its accounting records for warrants, tested in procedure 18, agreed with or reconciled to the related control account, (for example, the subsidiary ledger to the general ledger).	_____	_____	_____
20. Obtained the accounting record documenting modifications, if any, to the warrant transaction. Compared the name of the individual who approved the modification with a list of individuals authorized to approve modifications and found the name of the individual who approved the modification on the list.	_____	_____	_____

(continued)

<u>Procedures</u>	<u>Findings</u>		
	<u>No Exception</u>	<u>Exception</u>	<u>N/A</u>
21. For one reporting period, (for example, monthly or quarterly), obtained the insurance company's documentation of the existence of the warrant contract and found that the insurance company either (a) obtained statements from the custodian confirming the existence of the warrant contracts or (b) physically inventoried the warrant contracts.	_____	_____	_____
22. Using the list of authorized traders obtained in procedure 12, compared the name of the individual who had custody of or access to the warrant contracts with the names of individuals authorized to execute purchases, sales, or exercises of warrants and found that the name was not on the list.	_____	_____	_____
23. Compared information regarding the warrant, such as type of derivative, notional amount, and fair value, with the comparable information included in the report to the board of directors or appropriate committee thereof and found them to be in agreement.	_____	_____	_____
24. If the warrant position should have been included in the monitoring analysis separately tested in procedure 10 of section 1, "All Derivative Types," compared information regarding the warrant, such as type of derivative, notional amount, and fair value, with the comparable information in the monitoring analysis and found them to be in agreement.	_____	_____	_____
Effectiveness of Warrants Used As Hedges and in Replication Transactions			
25. Read the insurance company's documentation of effectiveness and found that the insurance company evaluated the effectiveness of the warrant as a hedge or replication in accordance with the policies regarding effectiveness.	_____	_____	_____
26. If the warrant was no longer effective as a hedge or replication, compared the action taken by the insurance company with the action required by the accounting policies and procedures and found that the action taken was consistent with the accounting policy.	_____	_____	_____
Legal Review			
27. Read documentation indicating that the legal department reviewed a nonexchange traded warrant agreement to assess contract compliance with the DUP and enforceability.	_____	_____	_____
28. Read documentation indicating that the legal department updated its assessment of enforceability of the nonexchange traded warrant agreement at least annually.	_____	_____	_____
Valuation			
29. Obtained the insurance company's policies and procedures for valuing warrants and found that the insurance company determined the fair value of the warrant in accordance with the policy described in the insurance company's procedures for the valuation of warrants	_____	_____	_____

<u>Procedures</u>	<u>Findings</u>		
	<u>No</u>		
	<u>Exception</u>	<u>Exception</u>	<u>N/A</u>
30. Read documentation supporting the fair value of warrants and found that the fair value was either (a) obtained from an independent source, (b) checked against an independent source, or (c) calculated internally by an authorized individual.

Appendix C — Illustrative Management Representation Letter

[Responsible Party's Letterhead]

[Date]

[CPA Firm's Name and Address]

In connection with your engagement to apply the agreed-upon procedures enumerated in the American Institute of Certified Public Accountants' Statement of Position 01-03, *Performing Agreed-Upon Procedures Engagements that Address Internal Control Over Derivative Transactions as Required by the New York State Insurance Law*, which were agreed to and acknowledged by management of ABC Insurance Company to meet the intended purpose of compliance with the requirements of Section 1410 (b)(5) of the New York State Insurance Law, as amended (the law), which addresses the assessment of internal control over derivative transactions as defined in Section 1401 (a) of the law and Section 178.5 of Regulation No. 163 during the year ended December 31, 20XX.

We confirm that, to the best of our knowledge and belief, as of [date of the practitioner's agreed-upon procedures report]:

1. ABC Insurance Company complied with the requirements of Section 1410 (b)(5) of the New York State Insurance Law, as amended (the law), during the year ended December 31, 20XX.
2. All known matters contradicting the Company's compliance with the requirements of the law or our assertion about the Company's compliance with the law and any communication from regulatory agencies or others affecting the Company's compliance with the requirements of the law or our assertion about the Company's compliance with the requirements of the law have been disclosed to you, including communications received between the end of the period addressed in our written assertion and the date of your report.
3. We are responsible for the Company's compliance with the law.
4. We have provided you with all relevant information and access to all records relevant to the Company's internal control over derivative transactions and the agreed-upon procedures.
5. We have disclosed to you all known significant deficiencies and material weaknesses in the design or operation of the Company's internal control over derivative transactions that would adversely affect the Company's ability to function in accordance with the Company's DUP and any communication from regulatory agencies or others affecting the design or operation of the Company's internal control over derivative transactions, including communications received between the December 31, 20XX and the date of your agreed-upon procedures report.
6. During the year ended December 31, 20XX, the internal control over derivative transactions was functioning in accordance with the policies and procedures set forth in the Company's derivative use plan (DUP) and related accounting policies and procedures.
7. There have been no errors or fraud that would indicate a weakness in the internal control over derivative transactions.

8. We are responsible for, establishing and maintaining effective internal control over derivative transactions in accordance with the law.
9. We have responded fully to all inquiries made to us by you during the engagement.

To the best of our knowledge and belief, no events have occurred subsequent to *[the date as of which the procedures were applied]* that would require adjustment to or modification of the findings of the agreed-upon procedures.

AUD Section 30***Statement of Position 02-1 Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code*****May 23, 2002****NOTE**

This AICPA Statement of Position (SOP) has been developed by the AICPA New Jersey Annual Claims Prompt Payment Reports Task Force of the AICPA Auditing Standards Board (ASB) to provide guidance regarding the application of Statements on Standards for Attestation Engagements (SSAEs) to agreed-upon procedures engagements performed to comply with the requirements of New Jersey Administrative Code, Title 11, Chapter 22, Subchapter 1 (NJAC 11:22-1 or the Code), which establishes Department of Banking and Insurance (department) standards for the payment of claims relating to health benefits plans and dental plans and contains requirements for carriers to file certain reports with the department relating to the timeliness of claims payments and the reasons for denial and late payment of claims in a format prescribed by the department. The department has approved the use of the agreed-upon procedures outlined in this SOP to comply with the reporting requirements of the Code.

This SOP is recognized as an interpretive publication as defined in AT-C section 105, *Concepts Common to All Attestation Engagements*. Interpretive publications are recommendations on the application of SSAEs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSAEs. The members of the ASB have found this SOP to be consistent with existing SSAEs.

Although interpretive publications are not attestation standards, AT-C section 105 requires the practitioner to consider applicable interpretive publications in planning and performing the attestation engagement because interpretive publications are relevant to the proper application of the attestation standards in specific circumstances.

Introduction and Background

.01 New Jersey Administrative Code, Title 11, Chapter 22, Subchapter 1 (NJAC 11:22-1 or the Code), establishes Department of Banking and Insurance (department) standards for the payment of claims relating to health benefits plans and dental plans and contains requirements for carriers to file certain reports with the department relating to the timeliness of claims payments and the reasons for denial and late payment of claims in a format prescribed by the department.

.02 NJAC 11:22-1 applies to any insurance company, health service corporation, medical service corporation, hospital service corporation, health maintenance organization, dental service corporation, and dental plan organization that issues health benefits plans or dental plans in the state of New Jersey and to any agent, employee, or other representative of such entity that processes claims for such entity.

.03 Among other things, the Code requires carriers to report:

- Quarterly to the department on the timeliness of claims payments in the format set forth in Appendix A (claims payment exhibit report) of NJAC 11:22-1, and
- Quarterly and annually on late payments of claims and the reasons for any denials (claims prompt payment report) in the format set forth in Appendix B of NJAC 11:22-1.

.04 Furthermore, the Code requires that the annual claims prompt payment report, which is due to be filed with the department on or before March 31, pursuant to NJAC 11:22-1.9(a), be accompanied by the report of a private auditing firm, which may be a Certified Public Accountant (CPA) or a firm of CPAs. However, for calendar year 2001, the report of the private auditing firm may be filed with the department on or before July 1, 2002. The department has specified, in Bulletin No. 02-07, that the work shall be conducted, and the report shall be prepared, in accordance with agreed-upon procedures acceptable to the department.

Applicability

.05 This Statement of Position (SOP) was developed to provide practitioners with guidance on performing agreed-upon procedures engagements that address annual claims prompt payment reports as required by the New Jersey Administrative Code. The engagement described in this SOP is designed only to satisfy the requirements of the Code. The procedures, as set forth in this SOP, are not necessarily appropriate for use in any other engagement. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

The Code

Definitions

.06 The following definitions are reprinted from the Code and are applicable when performing the agreed-upon procedures engagement described in this SOP.

Agent — Any entity, including a subsidiary of a carrier, or an organized delivery system as defined by N.J.S.A. 17:48H-1, with which a carrier has contracted to perform claims processing or claims payment services.

Carrier — An insurance company, health service corporation, hospital service corporation, medical service corporation or health maintenance organization authorized to issue health benefits plans in this State and a dental service corporation or dental plan organization authorized to issue dental plans in this State.

Claim — A request by a covered person, a participating health care provider, or a nonparticipating health care provider who has received an assignment of benefits from the covered person, for payment relating to health care services or supplies or dental services or supplies covered under a health benefits plan or dental plan issued by a carrier.

Clean claim —

1. The claim is for a service or supply covered by the health benefits plan or dental plan;
2. The claim is submitted with all the information requested by the carrier on the claim form or in other instructions distributed to the provider or covered person;
3. The person to whom the service or supply was provided was covered by the carrier's health benefits or dental plan on the date of service;
4. The carrier does not reasonably believe that the claim has been submitted fraudulently; and
5. The claim does not require special treatment. For the purposes of this subchapter, special treatment means that unusual claim processing is required to determine whether a service or supply is covered, such as claims involving experimental treatments or newly approved medications. The circumstances requiring special treatment should be documented in the claim file.

Covered person — A person on whose behalf a carrier offering the plan is obligated to pay benefits or provide services pursuant to the health benefits or dental plan.

Covered service or supply — A service or supply provided to a covered person under a health benefits or dental plan for which the carrier is obligated to pay benefits or provides services or supplies.

Dental plan — A benefits plan which pays dental expense benefits or provides dental services and supplies and is delivered or issued for delivery in this State by or through any carrier in this State.

Department — The Department of Banking and Insurance.

Health benefits plan — A benefits plan that pays hospital and medical expense benefits or provides hospital and medical services, and is delivered or issued for delivery in this State by or through a carrier. Health benefits plan includes, but is not limited to, Medicare supplement coverage and risk contracts to the extent not otherwise prohibited by Federal law. For the purposes of this chapter, health benefits plan shall not include the following plans, policies or contracts: accident only, credit, disability, long-term care, CHAMPUS supplement coverage, coverage arising out of a workers' compensation or similar law, automobile medical payment insurance, personal injury protection insurance issued pursuant to P.L. 1972, c.70 (N.J.S.A. 39:6A-1 et seq.) or hospital confinement indemnity coverage.

Health care provider or provider — An individual or entity which, acting within the scope of its license or certification, provides a covered

service or supply as defined by the health benefits or dental plan. Health care provider includes, but is not limited to, a physician, dentist and other health care professional licensed pursuant to Title 45 of the Revised Statutes and a hospital and other health care facilities licensed pursuant to Title 26 of the Revised Statutes.

Reporting Requirements

.07 The Code requires a carrier and its agent to remit payment of clean claims pursuant to specified time frames. The Code further requires that if a carrier or its agent denies or disputes a claim, in full or in part, the carrier or its agent must, within a specified time frame, notify both the covered person when he or she will have increased responsibility for payment, and the provider, of the basis for its decision to deny or dispute the claim.

.08 The Code requires a carrier to report to the department quarterly on the timeliness of claims payments in the format prescribed in NJAC 11:22-1, Appendix A, "New Jersey Claims Payment Exhibit." This quarterly report is not required to be subjected to an agreed-upon procedures engagement, nor is an annual claims payment exhibit report required to be filed with the department.

.09 The Code also requires a carrier to report to the department on a quarterly and annual basis on the late payment of claims and the reasons for denial of claims in the format prescribed in NJAC 11:22-1, Appendix B, "Quarterly (Annual) Claims Prompt Payment Report." The Code requires that the annual claims prompt payment report be accompanied by a report of a private auditing firm, which may be a CPA or a firm of CPAs.

.10 The department has indicated, in Bulletin No. 02-07, that an agreed-upon procedures engagement pursuant to this SOP may be used to satisfy the requirement that an annual claims prompt payment report be accompanied by the report of a private auditing firm. Furthermore, in Bulletin No. 02-12, issued in May 2002, the department has indicated that it agrees to the sufficiency of the procedures included in this SOP for its purposes.

Related Professional Standards

AT-C Section 215, *Agreed-Upon Procedures Engagements*

.11 Agreed-upon procedures engagements performed to meet the requirements of the Code are to be performed in accordance with AT-C section 215, *Agreed-Upon Procedures Engagements*. As described in paragraph .02 of AT-C section 215, an agreed-upon procedures engagement is an attestation engagement in which a practitioner performs specific procedures on subject matter and reports the findings without providing an opinion or conclusion. Not all of the provisions of AT-C section 215 are discussed herein. Rather, this SOP includes guidance to assist practitioners in the application of selected aspects of AT-C section 215. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.12] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.13 As previously stated, Bulletin No. 02-07 from the department states that an agreed-upon procedures engagement may be used to meet the requirement for an independent private auditing firm to report on the annual claims

prompt payment reports as required by the New Jersey Administrative Code. Furthermore, the department has approved the use of the agreed-upon procedures outlined in this SOP to comply with the reporting requirements of the Code. Accordingly, practitioners should not eliminate any of the procedures presented in appendix B (paragraph .31), "Agreed-Upon Procedures That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code," of this SOP or reduce the extent of the tests. The department or the carrier may request that additional procedures be performed and the practitioner may agree to perform such procedures. In those circumstances, it would be expected that the additional procedures would be performed in the context of a separate agreed-upon procedures engagement.

Procedures to Be Performed

.14 The agreed-upon procedures to be performed are applied to the carrier's annual claims prompt payment report, which reports on the late payment of claims and reasons for denial of claims in the format prescribed in NJAC 11:22-1, Appendix B.

.15 The procedures to be performed in the agreed-upon procedures engagement described in this SOP are presented in appendix B (paragraph .31) of this SOP. The procedures have been designed so that the findings resulting from the application of the procedures can be recorded in a tabular format. The three options available to the practitioner for expressing the findings for each procedure are *No Exception*, *Exception*, or *N/A* (not applicable). If a procedure is not applicable to a particular carrier, the procedure should be marked N/A rather than deleted from the report. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.16 If any portion of a procedure results in an exception, the findings for that entire procedure should be recorded as an exception and described in the section "Description of Exceptions If Any." The practitioner should provide a brief factual explanation for each exception that will enable the user of the practitioner's agreed-upon procedures report to understand the nature of the findings resulting in the exception. If management informs the practitioner that the condition giving rise to the exception was corrected by the date of the practitioner's report, the practitioner's explanation of the exception may include that information; for example, "Management has advised us that the condition resulting in the exception was corrected on Month X, 20XX. We have performed no procedures with respect to management's assertion." [Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.17 A practitioner may perform significant portions of the agreed-upon procedures engagement before the end of the period covered by the report. If, during that time, the practitioner identifies conditions that result in an exception in one or more agreed-upon procedures, he or she should report the exception in the findings section of the agreed-upon procedures report, even if management corrects the condition prior to the end of the period.

[.18] [Paragraph deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.19 Paragraph .40 of AT-C section 215 indicates that a practitioner need not perform procedures agreed to and acknowledged by the carrier to be appropriate for the intended purpose of the engagement. However, if in connection with the application, and through the completion of the agreed-upon procedures engagement, matters related to the information in the carrier's annual claims prompt payment report come to the practitioner's attention by other

means that significantly contradict, such information the practitioner should include such information in the practitioner's report. The phrase, "through the completion of the agreed-upon procedures engagement" indicates that this requirement would apply to conditions or events occurring prior to the date of the practitioner's report. This would include matters that would have resulted in the reporting of an exception by the practitioner if that matter existed during the period covered by the report. However, the practitioner has no responsibility to perform any procedure to detect such conditions or events. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Agreeing on the Terms of the Engagement

.20 In accordance with paragraph .14 of AT-C section 215, the practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. In accordance with paragraph .15 of AT-C section 215, the agreed-upon terms of the engagement should include the following:

- A statement confirming that an agreed-upon procedures engagement is to be performed to meet the requirements of NJAC 11:22-1, which addresses compliance with the requirements of New Jersey Administrative Code, Title 11, Chapter 22, Subchapter 1 (NJAC 11:22-1).
- A statement identifying the engaging party and the department as the intended users of the agreed-upon procedures report. The department has indicated that it agrees to the sufficiency of the procedures.
- Whether the practitioner's agreed-upon procedures report is expected to be restricted to the use of specified parties.
- A statement that management is responsible for maintaining effective internal control over derivative transactions.
- A statement identifying the procedures to be performed as those set forth in SOP 02-1, *Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code*
- A statement that the engaging party agrees to and acknowledges that the procedures in the SOP are appropriate for the intended purpose of the engagement and referring to Bulletin No. 02-12, which acknowledges the department's responsibility for the sufficiency of the procedures in SOP 02-1.
- A statement indicating that the practitioner is responsible for performing the agreed-upon procedures and providing the engaging party with a report in accordance with the attestation standards.
- A statement indicating that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants (AICPA).
- A statement acknowledging that the practitioner makes no representation regarding the sufficiency of the procedures in SOP 02-1 either for the purpose for which the report has been requested or for any other purpose.

- A statement indicating that the practitioner was not engaged to and did not conduct an examination or review, the objective of which would be the expression of an opinion or conclusion, respectively, on the carrier's compliance with the requirements of NJAC 11:22-1, the practitioner will not express such an opinion or conclusion, and if the practitioner performed additional procedures, other matters might come to the practitioner's attention that would be reported to the engaging party.
- A statement that the engaging party agrees to provide, at the conclusion of the engagement, a representation letter.
- Reference to the expected form and content of the practitioner's agreed-upon procedures report, including any use restrictions, if applicable.
- Disclaimers expected to be included in the practitioner's report, if applicable.
- Assistance to be provided to the practitioner, if applicable.
- Involvement of a practitioner's external specialist, if applicable.
- Specified thresholds for reporting exceptions, if applicable.

[Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.21 The following are other matters that may be included in the agreed-upon terms of the engagement:

- A statement indicating that the practitioner has no responsibility for the completeness or accuracy of the information provided to the practitioner
- A statement describing the engaging party's responsibility to comply with the requirements of NJAC 11:22-1 and the engaging party's responsibility for the information in the carrier's annual claims prompt payment report
- A statement describing the engaging party's responsibility for providing accurate and complete information to the practitioner
- The circumstances under which the practitioner may decline to issue a report

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Written Representations

[.22] [Paragraph renumbered and deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.23 In accordance with paragraph .27 of AT-C section 215, the practitioner should request from the engaging party¹ written representations in the form of a letter addressed to the practitioner. The representations should

- a. include a statement that the responsible party is responsible for the subject matter.

¹ In this Statement of Position, the engaging party and the responsible party are the same and such party is usually management of the carrier. [Footnote added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

- b. if applicable, include a statement that the engaging party has obtained from all necessary parties agreement to the procedures and acknowledgment that the procedures performed are appropriate for their purposes.
- c. include a statement that the engaging party has provided the practitioner with all relevant information and access, as applicable, as agreed upon in the terms of the engagement.
- d. state that all known matters contradicting the subject matter and any communication from regulatory agencies or others affecting the subject matter or assertion have been disclosed to the practitioner, including communications received between the end of the period addressed by the subject matter and the date of the practitioner's report.
- e. state that the engaging party is not aware of any material misstatements in the subject matter.
- f. state that the engaging party has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter.
- g. include any additional representations that the practitioner agrees are appropriate.

The letter generally is signed by the appropriate members of management including the highest-ranking officer responsible for the carrier's compliance with the requirements of NJAC 11:22-1. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.24 In addition to the representations required by paragraph .27 of AT-C section 215, a practitioner may request other representations from management depending on the specific nature of the engagement. For the engagement addressed in this SOP, they ordinarily include the following representations from management:

- A statement that there have been no errors or fraud that might indicate that the carrier is not in compliance with the requirements of NJAC 11:22-1
- A statement that management has responded fully to all inquiries made by the practitioner during the engagement

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.25 If management does not provide one or more of the written representations requested by the practitioner, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should

- a. discuss the matter with the engaging or responsible party, as appropriate;²

² See footnote 1. [Footnote added, June 2020.]

- b. reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general; and
- c. if any of the matters are not resolved to the practitioner's satisfaction, take appropriate action, including determining the possible effect on the practitioner's agreed-upon procedures report.

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.26 An illustrative representation letter is presented in appendix C (paragraph .32), "Illustrative Management Representation Letter," of this SOP. For additional information regarding management's written representations in an agreed-upon procedures engagement, see paragraphs .27–.30, .A35, and .A43–.A45 of AT-C section 215. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Restriction on the Performance of Procedures

.27 As previously stated, a practitioner should not agree to eliminate any of the procedures presented in appendix B (paragraph .31) of this SOP. When circumstances impose restrictions on the performance of the agreed-upon procedures, the practitioner should discuss with the engaging party whether those restrictions are appropriate and, if the restrictions are appropriate, describe the restrictions in the practitioner's report. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Dating the Report

.28 The practitioner's report should be dated no earlier than the date on which the practitioner completed the procedures and determined the findings, including that

- i. the attestation documentation has been reviewed, and
- ii. if applicable, the written presentation of the subject matter has been prepared.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Effective Date

.29 This SOP is effective upon issuance and is applicable only to agreed-upon procedures engagements that report on annual claims prompt payment reports as required by the NJAC. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix A — Illustrative Agreed-Upon Procedures Report

The following is an illustrative agreed-upon procedures report based on the requirements and guidance in AT-C section 215, *Agreed-Upon Procedures Engagements*.

Independent Accountant's Report on Applying Agreed-Upon Procedures

To the Management of ABC Carrier:

We have performed the applicable procedures enumerated in the American Institute of Certified Public Accountants' Statement of Position (SOP) 02-1, *Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code*, to ABC Carrier's compliance with the reporting requirements of New Jersey Administrative Code, Title 11, Chapter 22, Subchapter 1 (NJAC 11:22-1.9) for Appendix B 20XX Annual Report (Exhibit I) for the year ended December 31, 20XX. Management of ABC Carrier is responsible for compliance with the requirements of NJAC 11:22-1.

Management of ABC Carrier has agreed to and acknowledged that the procedures performed are appropriate to assist users in evaluating ABC Carrier's compliance with the reporting requirements of NJAC 11:22-1 for the year ended December 31, 20XX. This report may not be suitable for any other purpose. The procedures may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures performed and the findings are included in the attached Appendix.

We were engaged by ABC Carrier to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on ABC Carrier's compliance with the requirements of NJAC 11:22-1 for the year ended December 31, 20XX. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of ABC Carrier and to meet our other ethical responsibilities, in accordance with relevant ethical requirements related to our agreed-upon procedures engagement.

This report is intended solely for the information and use of the management of ABC Carrier and the State of New Jersey Department of Banking and Insurance, and is not intended to be and should not be used by anyone other than these specified parties.

[Signature of the practitioner's firm]

[City and state where the practitioner's report is issued]

[Date of the practitioner's report]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Appendix B — Agreed-Upon Procedures That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code

<i>Procedures</i>	<i>Findings</i>		
	<i>No Exception</i>	<i>Exception</i>	<i>N/A</i>
The following procedures were applied to the ABC Carrier's 20XX Appendix B annual claims prompt payment report. We obtained supporting documentation used by management to prepare the Annual New Jersey Prompt Payment Report, and for each of the five categories (physician, dental, other health care professional, hospital, or other health care facilities), where applicable, compared the number of claims and the amount of claims for each quarter and the annual period from the supporting documentation used by management to prepare the Annual New Jersey Prompt Payment Report to the following columns of the report: • Total claims • Denied ineligible • Denied document • Denied coding/enrollment • Denied for amount • Time limit special • Time limit other • Denied referred fraud • Interest paid • Interest amount paid • Total paid We selected 10 percent of the claims from ABC Carrier's supporting documentation used by management to prepare the Annual New Jersey Prompt Payment Report, with the selections distributed throughout the year. If 10 percent of the claims exceeded 50, then the number of items selected was limited to 50. If 10 percent of the claims resulted in less than 10 claims, then the number of items selected was 10, and for each item selected we: 1. Compared the following information to ABC Carrier's claim payment system: • Paid amount • Claim finalization or payment date • Claim received date • Denial code			

<i>Procedures</i>	<i>Findings</i>		
	<i>No Exception</i>	<i>Exception</i>	<i>N/A</i>
- Claim category (physician, dental, other health care professional, hospital, or other health care facilities) 2. Compared the following information to the original claim information submissions: - Date received - Amount billed - Category (physician, dental, other health care professional, hospital, or other health care facilities) 3. Noted whether, per ABC Carrier's member records, original claim information submission, or both, the claim related to a policy issued in the state of New Jersey 4. If a selected claim was denied, compared denial reason indicated in ABC Carrier's claims system records to supporting documentation used by management to prepare the Annual New Jersey Prompt Payment Report 5. If a selected claim is a "clean claim," as defined in NJAC 11:22-1.2, and as determined by ABC Carrier, recalculated the amount of interest paid on the selected claim in accordance with the requirements of NJAC 11:22-1.5 We selected 10 claims from ABC Carrier's primary claims system, with the selections distributed throughout the year, and for each item selected, traced the selected claims covered under New Jersey contracts to the supporting documentation used by management to prepare the Annual New Jersey Prompt Payment Report. We proved the arithmetic accuracy of ABC Carrier's 20XX Appendix B annual claims prompt payment report. Description of Exceptions if Any			

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix C — Illustrative Management Representation Letter

[ABC Carrier's Letterhead]

[Date]

[CPA Firm's Name and Address]

In connection with your engagement to apply the agreed-upon procedures enumerated in the American Institute of Certified Public Accountants' Statement of Position (SOP) 02-1, *Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code*, which addresses compliance with the requirements of New Jersey Administrative Code, Title 11, Chapter 22, Subchapter 1 (NJAC 11:22-1.9), for Appendix B 20XX Annual Report (Exhibit I) for the period from January 1, 20XX through December 31, 20XX, we confirm, to the best of our knowledge and belief, the following representations made to you during your engagement:

1. We are responsible for ABC Carrier's compliance with the requirements of NJAC 11:22-1, for the information in ABC Carrier's annual claims prompt payment report, for the year ended December 31, 20XX.
2. We have provided you with all relevant information and access to all records relevant to ABC Carrier's compliance with the requirements of NJAC 11:22-1 and ABC Carrier's annual claims prompt payment reports, as agreed-upon in the terms of the engagement.
3. All known matters contradicting ABC Carrier's compliance with the requirements of NJAC 11:22-1 and any communication from regulatory agencies or others affecting ABC Carrier's compliance with the requirements of NJAC 11:22-1, ABC Carrier's annual claims prompt payment reports, have been disclosed to you, including communications received between December 31, 20XX and the date of your report.
4. We are not aware of any material misstatements with respect to ABC Carrier's compliance with the requirements of NJAC 11:22-1.
5. We have disclosed to you all known events subsequent to December 31, 20XX that would have a material effect on ABC Carrier's compliance with the requirements of NJAC 11:22-1.
6. We have disclosed to you *[matters as the practitioner deems appropriate, for example,*
 - *any communications from regulatory agencies relating to the carrier's annual claims prompt payment report.*
 - *all known matters contradicting the information in the carrier's annual claims prompt payment report.]*
7. During the year ended December 31, 20XX, there have been no errors or fraud that would indicate that ABC Carrier is not in compliance with the requirements of NJAC 11:22-1.

8. We have responded fully to all inquiries made to us by you during the engagement.

AUD Section 35***Statement of Position 04-1 Auditing the Statement of Social Insurance***

November 22, 2004

NOTICE TO READERS

This AICPA Statement of Position (SOP) is currently undergoing significant revision by a task force of the Auditing Standards Board to

- reflect the provisions of Statement of Federal Financial Accounting Standards (SFFAS) 36, *Reporting Comprehensive Long-Term Fiscal Projections for the U.S. Government*, which requires that a financial projection be presented as required supplemental information in the consolidated financial report of the U.S. Government for years 2010, 2011, and 2012, after which time the financial projection becomes a basic financial statement;
- reflect the requirements and guidance in AT section 301, *Financial Forecasts and Projections*; and
- expand the scope of the SOP to include the projection required by SFFAS 36 and perhaps other long-term projections.

As part of this revision, the task force is also reflecting the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 122-126. The revisions to this SOP will be reflected in a subsequent update of AICPA *Technical Practice Aids*.

NOTE

This AICPA Statement of Position (SOP) has been developed by the AICPA Social Insurance Task Force to provide guidance regarding the audits of statements of social insurance prepared in accordance with the standards of the Federal Accounting Standards Advisory Board (FASAB). Audits of federal government agencies are also governed by *Government Auditing Standards* (the Yellow Book) and applicable Office of Management and Budget (OMB) guidance.

This SOP is recognized as an interpretive publication as defined in AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. Interpretive publications are recommendations on the

(continued)

application of generally accepted auditing standards (GAAS) in specific circumstances, including engagements for entities in specialized industries.

An interpretive publication is issued under the authority of the AICPA Auditing Standards Board (ASB) after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with GAAS. The members of the ASB have found this SOP to be consistent with existing GAAS.

Although interpretive publications are not auditing standards, AU-C section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit because interpretive publications are relevant to the proper application of GAAS in specific circumstances. If the auditor does not apply the auditing guidance in an applicable interpretive publication, the auditor should document how the requirements of GAAS were complied with in the circumstances addressed by such auditing guidance.

Introduction

.01 The Federal Accounting Standards Advisory Board (FASAB) establishes accounting standards for reporting information about the following social insurance programs:

- a. Old-Age Survivors and Disability Insurance (OASDI or Social Security)
- b. Medicare ([Hospital Insurance [HI] and Medicare Supplementary Medical Insurance [SMI])
- c. Railroad Retirement benefits
- d. Black Lung benefits
- e. Unemployment Insurance

.02 FASAB standards require the financial statements of the federal agencies responsible for the Social Security, Medicare, Railroad Retirement, and Black Lung programs and the financial statements of the federal government-wide entity to present a statement of social insurance as a basic financial statement. FASAB standards require these agencies and the government-wide entity to report:

- a. The estimated present value of the income to be received from or on behalf of the following groups during a projection¹ period sufficient to illustrate the long-term sustainability of the social insurance programs:
 - (1) Current participants who have not yet attained retirement age
 - (2) Current participants who have attained retirement age

¹ The AICPA Guide *Prospective Financial Information* (guide) defines the term *projection* and differentiates it from the term *forecast*. In this Statement of Position (SOP), the term *projection* is used in its generic sense, as it is used in standards issued by the Financial Accounting Standards Advisory Board (FASAB) and the federal agencies that administer social insurance programs. The use of the term *projection* in this SOP is not intended to suggest that information presented in the statement of social insurance is a projection as defined in the guide or that the provisions of the guide would apply to the audit of the statement of social insurance.

- (3) Individuals expected to become participants
- b. The estimated present value of the benefit payments to be made during that same period to or on behalf of the groups listed in item *a*
- c. The estimated net present value of the cash flows during the projection period (the income described in item *a* over the expenditures described in item *b*, or the expenditures described in item *b* over the income described in item *a*)
- d. In notes to the statement of social insurance:
 - (1) The accumulated excess of all past cash receipts, including interest on investments, over all past cash disbursements within the social insurance program represented by the fund balance at the valuation date
 - (2) An explanation of how the net present value referred to in item *c* is calculated for the closed group² (Paragraph 27(3)(i) of Statement of Federal Financial Accounting Standards [SFFAS] No. 17, *Accounting for Social Insurance*, identifies the information to be included in this explanation.)
 - (3) Comparative financial information for items *a*, *b*, *c*, and *d*(1) for the current year and for each of the four preceding years
 - (4) The significant assumptions used in preparing the estimates

.03 The income, expenditures, and net present value of cash flows recognized in the statement of social insurance differ from traditional concepts of income and expenditures for retirement and health benefit programs. Financial reporting for social insurance programs includes estimates of income and expenditures not only for current program participants but also for individuals expected to become participants in social insurance programs in the future. In paragraphs 26–28 of the basis for conclusions section of SFFAS No. 25, *Reclassification of Stewardship Responsibilities and Eliminating the Current Services Assessment*, FASAB acknowledges this difference and explains why the recognition of such amounts is essential to the fair presentation of federal financial statements:

26. The Board believes that the SOSI [statement of social insurance] should be treated as a basic financial statement because it is essential to fair presentation and is important to achieve the objectives of federal financial reporting. The related stewardship objectives include helping users to assess the impact on the country of the Government's activities, determine whether the Government's financial position improved or deteriorated over the period, and predict whether future budgetary resources will likely be sufficient to sustain public services and meet obligations as they come due. In that regard, the multi-trillion dollar obligations associated with Social Insurance over the next 75 years could significantly exceed the largest liabilities currently recognized in the U.S. Government Balance Sheet.

27. The Board acknowledges that there is great uncertainty inherent in long term projections, but believes that if the uncertainty is suitably disclosed—as is required by SFFAS 17—it need not preclude designating the information as

² The *closed group* is defined as those persons who, as of a valuation date, are participants in a social insurance program as beneficiaries, covered workers, or payers of earmarked taxes or premiums.

a basic financial statement, essential for fair presentation in conformity with GAAP...

28. Even within the context of historical financial reporting, the Board notes that accrual-basis "historical" financial statements include many measurements that involve assumptions about the future. The distinction between reporting on the financial effects of events that have occurred and the effects of future events depends, obviously, upon the definition of the event. The information required by SFFAS 17 reports on the financial effects of existing law and demographic conditions and assumptions, just as the pension obligation at a point in time is based on existing conditions. In that sense, Social Insurance information can be viewed as reflecting events that have occurred and, therefore, as "historical."

Applicability

.04 This Statement of Position (SOP) provides guidance to auditors in auditing the statement of social insurance for the following social insurance programs:

- a. Old-Age Survivors and Disability Insurance (OASDI or Social Security)
- b. Medicare (Hospital Insurance [HI] and Medicare Supplementary Medical Insurance [SMI])
- c. Railroad Retirement benefits
- d. Black Lung benefits

As permitted by AU section 543, *Part of Audit Performed by Other Independent Auditors*, a principal auditor may fulfill the requirements of this SOP by using work that other independent auditors have performed in conformity with the provisions of this SOP. For example, for the OASDI program, the auditor of the federal government-wide financial statements may use the work and report of the auditor of the Social Security Administration's statement of social insurance.

Management's Responsibilities

.05 The agency's management (management) is responsible for preparing the statement of social insurance and the estimates underlying it in conformity with generally accepted accounting principles. In doing so, management must determine its best estimate³ of the economic and demographic conditions that will exist in the future. Because estimates in the statement of social insurance are based on subjective as well as objective factors, management must use judgment to estimate amounts included in the statement of social insurance. Management's judgment ordinarily is based on its knowledge and experience about past and current events and its assumptions about conditions it expects to exist. Management is responsible for the accuracy and completeness of the statement of social insurance.

³ Paragraph 25 of FASAB Statement of Federal Financial Accounting Standards (SFFAS) No. 17, *Accounting for Social Insurance*, states, in part, "The projections and estimates used should be based on the entity's best estimates of demographic and economic assumptions, taking each factor individually and incorporating future changes mandated by current law." Certain agencies prepare social insurance information using assumptions prepared by a board of trustees. Auditors should consider such assumptions to represent the agency's "best estimates" if the trustees have characterized them as such, and agency management has determined them to be reasonable. With respect to these assumptions, the auditor should perform audit procedures that are consistent with the guidance in paragraphs .09–.35 of this SOP.

Preparing Social Insurance Estimates

.06 Management is responsible for preparing the estimates underlying the statement of social insurance. That process ordinarily consists of:

- a. Identifying the relevant factors that may affect the estimates
- b. Developing assumptions that represent management's best estimate of circumstances and events with respect to the relevant factors
- c. Accumulating relevant, sufficient, and reliable data on which to base the estimates
- d. Determining the estimated amounts based on assumptions and other relevant factors
- e. Determining that the estimates are presented in conformity with generally accepted accounting principles and that disclosure is adequate

Conceptual Model

Figure 1: Elements of the Process of Developing Social Insurance Estimates

.07 Figure 1, "Elements of the Process of Developing Social Insurance Estimates," is a conceptual model depicting the elements of the process that results in the statement of social insurance. It is not intended to depict the⁴ actual

⁴ Office of Management and Budget (OMB) Circular No. A-123, *Management Accountability and Control*, section II, "Establishing Management Controls," states, in part, "...documentation for transactions, management controls, and other significant events must be clear and readily available for examination."

process used by an organization to develop the statement of social insurance. With the assistance of internal and external specialists, management considers, identifies, and documents factors, assumptions, and data that serve as input to a model for developing estimates. The factors, data, assumptions, and models used to develop the statement of social insurance are closely interrelated and may not be separable. Following are definitions of the terms used in figure 1:

- a. *Factors.* The elements or variables that affect income or expenditures for a program and for which data must be gathered and assumptions must be generated, for example, legal, economic, and demographic factors. An example of a factor is the number of individuals reaching age 65 in a specific year.
- b. *Assumptions.* Expectations about what will happen in the future. An example of an assumption is that there will be a 1 percent increase in the number of women working outside the home in each of the next five years. An assumption is expressed as a value or direction assigned to a factor.
- c. *Data.* Organized factual information used for analysis or to make decisions. An example is census data and classifications of that data, such as the population classified by sex or age. Data may be developed within the entity that prepares the statement of social insurance or it may come from sources outside the entity.
- d. *Models.* Methods or formulas for mathematically expressing how the assumptions and data relate to each other. For example, a model might indicate that a 1 percent decline in the birth rate in a given year will result in a 0.2 percent decrease in social insurance income and benefit payments 10 years later. A model is a set of coded instructions, rules, or procedures used to perform a desired sequence of events or to obtain a result. Typically, models are developed by using various computer applications.
- e. *Estimates.* The amounts or valuations that result after processing the factors, data, and assumptions in a model. These estimates will be used in preparing the statement of social insurance.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Designing and Implementing Internal Control Related to Estimates

.08 Controls that are designed and implemented in a manner consistent with Standards for Internal Control in the Federal Government issued by the Government Accountability Office help ensure the accuracy and completeness of the statement of social insurance. An entity's internal control may reduce the likelihood of material misstatements of financial statement assertions involving estimates. Among the aspects of internal control that are relevant to the process of developing estimates are the following:

- a. Management communication of the need for proper estimates
- b. Accumulation of relevant, sufficient, and reliable data on which to base accounting estimates
- c. Preparation of the estimates by qualified personnel
- d. Adequate review and approval of the estimates by appropriate levels of authority, for example:
 - (1) Review of the sources of the relevant factors

- (2) Review of the process used to develop assumptions
 - (3) Review of the reasonableness of the assumptions and resulting estimates
 - (4) Consideration of the need to use the work of specialists
 - (5) Consideration of changes in previously established methods for developing estimates
- e. Comparison of prior estimates with actual subsequent results to assess the reliability of the process and models used to develop the estimates
 - f. Appropriate general and application controls related to computer-based models used in the calculation of estimates included in the statement of social insurance

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

The Auditor's Responsibility

.09 Paragraph .10 of AU section 342, *Auditing Accounting Estimates*, states that the auditor should obtain an understanding of how management developed the estimate. Based on that understanding, the auditor should use one or a combination of the following approaches to evaluate the reasonableness of an estimate:

- a. Review and test the process used by management to develop the estimate.
- b. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.
- c. Review subsequent events or transactions occurring prior to the date of the auditor's report.

In auditing the statement of social insurance, if controls over the estimation process are effective, the most practicable and efficient approach may be to review and test the process used by management. However, if the auditor finds that controls over the estimation process are ineffective, the auditor should consider whether it is practicable to:

- Develop an independent expectation of the estimate, or portions of the estimate, to corroborate management's estimate
- or
- Obtain sufficient appropriate audit evidence from outside the audited agency's process that would support the assertions in the statement of social insurance.

If it is not practicable to mitigate the effects of the ineffective controls through substantive procedures such as these, the auditor's report on the statement of social insurance should be modified. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.10 The auditor's objective when auditing the statement of social insurance is to obtain sufficient appropriate audit evidence to provide reasonable assurance that:

- a. The estimates presented in the statement of social insurance are reasonable in the circumstances.

- b. The statement of social insurance is presented fairly, in all material respects, in conformity with generally accepted accounting principles, including adequate disclosure.

Paragraphs .11–.43 of this SOP describe how the auditor achieves this objective. As discussed in footnote 9 of paragraph .19, if the auditor does not possess the level of competence in actuarial science to qualify as an actuary, it is necessary for the auditor to obtain the services of an independent actuary⁵ to assist the auditor in planning and performing auditing procedures. Generally, the auditor will need the assistance of an independent actuary in performing various procedures during all phases of the audit and related to all elements of the estimates. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Obtaining an Understanding of the Entity and Its Environment, Including Its Internal Control

.11 AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. [Paragraph added, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.12 The procedures the auditor performs to obtain the required understanding are known as *risk assessment procedures*. In an audit of the statement of social insurance, the auditor's risk assessment procedures should include

- a. obtaining knowledge about the agency and its environment including the following matters:
 - (1) The agency's program and its operations including relevant laws and regulations governing the program that have a direct and material effect on the statement of social insurance (paragraphs .13–.14)
 - (2) The agency's process for developing, evaluating, and incorporating estimates in the statement of social insurance (paragraph .15)
 - (3) The work performed by the agency's actuary (paragraphs .16–.20)
 - (4) The work performed and findings reported by any external review groups that have been commissioned by the agency,

⁵ The actuary can either be under contract with the audit firm or employed by the audit firm. In either case, the actuary performing services for the audit firm would need to meet the independence standards of generally accepted governmental auditing standards (GAGAS), which are applicable to audits of statements of social insurance. For example, for actuaries under contract with the audit firm, the auditor should determine whether the actuary's firm is independent of the agency being audited and then assess the actuary's ability to impartially perform the work and report results. In conducting this assessment, the auditor should provide the actuary with the GAGAS independence requirements and obtain representations from the actuary regarding his or her independence from the audited entity. For actuaries employed by the audit firm, the independence requirements are the same as those for auditors. Paragraphs 3.06–.18 of chapter 3, "General Standards," *Government Auditing Standards: 2003 Revision* (GAO-03-673G) describe applicable independence requirements.

an appropriate advisory board, or the trustees⁶ (paragraph .21).

- b. considering materiality (paragraphs .22–.23).
- c. obtaining an understanding of the agency's internal control as it relates to the preparation of the statement of social insurance (paragraphs .24–.27).
- d. assessing the risk of material misstatement of the financial statements (paragraphs .28–.29).⁷
- e. performing further audit procedures (paragraphs .30–.35).

[Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Obtaining Knowledge About the Agency's Program and Its Operations

.13 Relevant knowledge about the program and its operations includes the following:

- a. The nature of the program's activities
- b. The source of its funding
- c. Who the beneficiaries are

[Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.14 An important aspect of the program and its operations are the laws and regulations governing the program that may have a direct and material effect on amounts reported as social insurance income and expenditures. To obtain the laws and regulations governing the operation of the social insurance program, the auditor may request them from agency management. Through inquiry of management, the auditor may obtain information about

- a. the laws and regulations that significantly affect the determination of amounts included in the statement of social insurance and
- b. how management has given effect to changes in laws and to new regulations published in final form in determining future social insurance income and expenditures.

[Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Obtaining Knowledge About the Agency's Process for Developing, Evaluating, and Incorporating Estimates in the Statement of Social Insurance

.15 The auditor should obtain knowledge about the agency's process for developing, evaluating, and incorporating estimates in the statement of social

⁶ Certain social insurance programs are overseen by a board of trustees. For example, the Social Security Act establishes a board of trustees to oversee the financial operations of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund. The board is composed of six members, four of whom serve automatically by virtue of their positions in the federal government: the Secretary of the Treasury (the managing trustee), the Secretary of Labor, the Secretary of Health and Human Services, and the Commissioner of Social Security. The other two members are appointed by the President and confirmed by the Senate to serve as public representatives.

⁷ The auditor generally would conclude that inherent risk is high for assertions about estimates in the statement of social insurance because of the complexity of such estimates and the need for significant judgment in preparing them. Other factors that may affect inherent risk in auditing the statement of social insurance include the political climate surrounding social insurance programs, budget limitations, and economic conditions.

insurance. Procedures the auditor may perform to obtain that knowledge include the following:

- a. Making inquiries of management; individuals responsible for initiating, processing, or recording estimates; and internal and external specialists with expertise in relevant subject matter, such as actuarial science, economics, and law.
- b. Reading entity or nonentity documents and records used to prepare the statement of social insurance, as well as the agency's documentation of the process for preparing the statement of social insurance.
- c. Observing entity activities and operations used to prepare the statement of social insurance, such as transferring data from a tabulation report to a computerized application.

[Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Obtaining Knowledge About the Work Performed by the Agency's Actuary

.16 Information presented in the statement of social insurance ordinarily is determined on the basis of an actuarial valuation of the program performed or reviewed by the agency's actuary, using data received from sources inside and outside the agency, and actuarial techniques. Paragraph .12 of AU section 336, *Using the Work of a Specialist*, states the following:

The auditor should (a) obtain an understanding of the methods and assumptions used by the specialist, (b) make appropriate tests of data provided to the specialist, taking into account the auditor's assessment of control risk, and (c) evaluate whether the specialist's findings support the related assertions in the financial statements.

[Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.17 The auditor's qualifications do not encompass actuarial science or the complexities of probability and longevity associated with social insurance income and expenditures. The auditor may have a general awareness and understanding of actuarial concepts and practices; however, he or she does not purport to act in the capacity of an actuary. The auditor, therefore, should follow the guidance in AU section 336 to obtain assurance regarding the work of an actuary on such matters as program income and benefit payments. [Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.18 An audit of the statement of social insurance requires cooperation and coordination between the auditor and the actuary. The auditor uses the work of the actuary as an audit procedure to obtain sufficient appropriate audit evidence; the auditor does not merely rely on the report of an actuary. Although the appropriateness and reasonableness of the methods and assumptions used, as well as their application, are within the expertise of the actuary, the auditor does not divide responsibility with the actuary for his or her opinion on the financial statements taken as a whole. Thus, the auditor should satisfy himself or herself as to the professional qualifications and reputation of the actuary as well as the actuary's objectivity, and should obtain an understanding of the actuary's methods and assumptions, test data provided to the actuary, and consider whether the actuary's findings support the related representations in the financial statements. [Paragraph renumbered and revised, June 2009, to

reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.19 If the actuary who has prepared or reviewed the actuarial valuation of the social insurance program was engaged by the agency administering that program, it is necessary for the auditor to obtain the services of an independent actuary⁸ to assist the auditor in performing auditing procedures that assess the agency actuary's methods, assumptions, and estimates, and aid the auditor in determining whether the agency actuary's findings are not unreasonable in the circumstances.⁹ *Government Auditing Standards*, which are applicable to audits of statements of social insurance, provide independence requirements and examples of personal, external, and organizational impairments to independence. [Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.20 The auditor should document (a) the specific audit procedures that were performed with the assistance of an independent actuary, and the related findings and conclusions, (b) the relationship between the procedures performed with the assistance of an independent actuary and the auditor's assessments of audit risk and materiality, and (c) all other significant matters related to the objectives and scope of the independent actuary's work, including any limitations on the independent actuary's procedures. [Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Obtaining Knowledge About the Work Performed by External Review Groups

.21 In some cases, the agency responsible for the preparation of the statement of social insurance or the program's trustees may commission the services of an external review group comprising technical experts in relevant fields to review the factors, assumptions, data, estimates, and models used to prepare the statement of social insurance. In many instances, individuals assigned to perform these reviews are recognized authorities in their respective fields of study. Because of the nature of these external review groups and the qualifications of the individuals typically assigned to them, information about the work performed by the external review group, how its findings are communicated to the agency, and how the agency has responded to these findings are relevant to an audit of the statement of social insurance.¹⁰ See paragraph A-18c of the appendix of this SOP, entitled "Illustrative Controls and Audit Procedures," for examples of inquiries the auditor may make of management to obtain knowledge about the work performed by external review groups. [Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

⁸ See footnote 5.

⁹ Although paragraph .11 of AU section 336, *Using the Work of a Specialist*, does not preclude the auditor from using the work of a specialist who is related to the client, because of the significance of the estimates of income and expenditures to the statement of social insurance, and the complexity and subjectivity involved in developing such estimates, auditing estimates in the statement of social insurance requires the use of an outside actuary, that is, an actuary who is not employed or managed by the agency. If the auditor has the requisite knowledge and experience in actuarial science, the auditor may serve as the actuary. If the auditor does not possess the level of competence in actuarial science to qualify as an actuary, the auditor should use the work of an independent outside actuary.

¹⁰ Although reviews by external review groups may not be conducted annually, in auditing the statement of social insurance the auditor should obtain and review the most recent report of such external review groups.

Considering Materiality

.22 The auditor's determination of materiality is a matter of professional judgment and is influenced by the auditor's perception of the needs of users of financial statements. Materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations. Auditors should design audit procedures to obtain reasonable assurance of detecting misstatements that, either individually or when aggregated with other misstatements, could be material to the financial statements taken as a whole. Auditors should exercise due professional care when setting the materiality base, carefully assessing the information gained from risk assessment procedures and the needs of users of the financial statements. [Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.23 For certain federal agencies, amounts reported in the statement of social insurance may vary significantly from the amounts reported in the other basic financial statements, or may differ significantly on a qualitative basis. In such cases, it may not be appropriate to establish a single materiality threshold for the entire set of financial statements. Instead, the auditor should consider using a separate materiality level when planning and performing the audit of the statement of social insurance and related disclosures. [Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Obtaining an Understanding of the Agency's Internal Control

.24 AU section 314 defines internal control as a process—effected by those charged with governance, an entity's board of directors, management, and other personnel—designed to provide reasonable assurance regarding the achievement of the entity's objectives with regard to (a) reliability of financial reporting, (b) effectiveness and efficiency of operations, and (c) compliance with applicable laws and regulations. [Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.25 In auditing the statement of social insurance, the auditor should obtain a sufficient understanding of the agency's internal control by performing risk assessment procedures to evaluate the design of the agency's controls relevant to an audit of the statement of social insurance and to determine whether those controls have been implemented. The auditor should use this knowledge to

- a. identify types of potential misstatements.
- b. consider factors that affect the risks of material misstatement.
- c. design tests of controls, when applicable, and substantive procedures.

[Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

[.26] [Paragraph renumbered and deleted, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.27 Internal control consists of the following five interrelated components:

- a. *Control* environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

- b. Entity's *risk assessment* is the entity's identification and analysis of relevant risks to achievement of its objectives, forming a basis for determining how the risks should be managed.
- c. *Information and communication systems* support the identification, capture, and exchange of information in a form and time frame that enable people to carry out their responsibilities.
- d. *Control activities* are the policies and procedures that help ensure that management directives are carried out.
- e. *Monitoring* is a process that assesses the quality of internal control performance over time.

Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with generally accepted accounting principles. [Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Assessing the Risks of Material Misstatement

.28 Using the information gained from the auditor's risk assessment procedures, the auditor should identify and assess the risks of material misstatement for assertions in the statement of social insurance. [Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.29 The risk of material misstatement of estimates ordinarily varies with the complexity and subjectivity of the process, the availability and reliability of the relevant data, the number and significance of assumptions that are made, and the degree of uncertainty associated with the assumptions. [Paragraph added, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Performing Further Audit Procedures

.30 The auditor should design further audit procedures, including tests of the operating effectiveness of controls, where relevant or necessary, and substantive procedures, whose nature, timing, and extent are responsive to the assessed risks of material misstatement at both the financial statement and the relevant assertion level. [Paragraph added, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

[.31] [Paragraph renumbered and deleted, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.32 AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, states that the auditor should perform tests of controls when the auditor's risk assessment includes an expectation of the operating effectiveness of controls or when substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level. However, when auditing the statement of social insurance, the complexity and subjectivity of the estimates, the volume of data involved, and the importance of controls ordinarily would make performing only substantive tests an ineffective strategy.¹¹ [Paragraph renumbered and

¹¹ OMB Bulletin No. 01-02 states that "For those internal controls that have been properly designed and placed in operation, the auditor shall perform sufficient tests to support a low assessed level of control risk."

revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

[.33] [Paragraph renumbered and deleted, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

[.34] [Paragraph renumbered and deleted, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.35 As indicated in paragraph .09 of this SOP, in evaluating the reasonableness of the estimates in the statement of social insurance, the auditor primarily reviews and tests the process used by management. The appendix of this SOP contains examples of

- a. procedures the auditor performs to obtain knowledge about the agency's process for developing, evaluating, and incorporating estimates in the statement of social insurance.
- b. controls that are relevant to an agency's preparation of the statement of social insurance. (The auditor should obtain an understanding of the design of such controls and determine whether they have been placed in operation.)
- c. procedures the auditor performs to test controls, assess control risk, and test assertions in the statement of social insurance.

[Paragraph added, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Testing the Work of the Agency's Actuary

.36 When auditing estimates and considering the related factors, assumptions, data, and models, the auditor should obtain the services of an actuary in accordance with AU section 336.¹² [Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.37 With respect to the actuarial present value of amounts reported in the statement of social insurance, the auditor, in following the guidance in AU section 336, should

- a. read the agency actuary's actuarial report.
- b. evaluate the professional qualifications, competence, and objectivity of the agency's actuary. Examples of factors that should be considered are the actuary's membership in a recognized professional organization and the opinion of other actuaries, whom the auditor knows to be qualified, regarding the actuary's professional qualifications.
- c. obtain an understanding of the actuary's objectives, scope of work, methods, and assumptions, and their consistency of application. The Actuarial Standards Board establishes Actuarial Standards of Practice (ASOPs) that identify what the actuary should consider, document, and disclose when performing an actuarial assignment. The auditor may consult the ASOPs in obtaining an understanding of the methods and assumptions used in the valuation of the social insurance program.¹³ Management, not the actuary, is responsible for the assumptions made and methods used.

¹² See footnote 9.

¹³ Relevant standards include Actuarial Standards of Practice No. 21, *The Actuary's Responsibility to the Auditor*, No. 23, *Data Quality*, and No. 32, *Social Insurance*.

- d. test the reliability and completeness of the data provided by the agency and used by the actuary in the actuarial valuation. (See paragraphs A-11–A-14 in the appendix to this SOP.) For example, laws or regulations governing program operations can affect the determination of the data or methods to be used in the actuarial calculations. In testing the reliability and completeness of the data, the auditor may inquire as to whether the actuarial valuation considers all pertinent provisions of laws and regulations governing program operations, including any changes in laws or regulations affecting the actuarial calculations since the date of the latest statement of social insurance. In the event that data provided to the actuary are significantly incomplete, the auditor may inquire of the actuary about the treatment of the incomplete data and determine whether the method used by the actuary to give effect to the missing data in his or her valuation is reasonable in the circumstances.
- e. assess the nature and significance of any reservations concerning assumptions or data that the actuary has stated in his or her report.

[Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Testing the Fund Balance

.38 Paragraph 27(3)(h) of SFFAS No. 17 requires the agency to report "the accumulated excess of all past cash receipts, including interest on investments, over all past cash disbursements within the social insurance program represented by the fund balance at the valuation date." As noted in paragraph 26 of SFFAS No. 17, the valuation date for the statement of social insurance may differ from the valuation date for the other financial statements. Accordingly, the auditor should conduct appropriate testing of the accumulated cash receipts over the accumulated cash disbursements, as of the social insurance valuation date. The nature and extent of testing is a matter of professional judgment. Examples of procedures the auditor may perform are confirmation testing or roll-forward testing. [Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Obtaining Management's Representations

.39 AU section 333, *Management Representations*, requires the auditor to obtain a representation letter from management confirming representations given to the auditor during the engagement, for example, a representation regarding the completeness of the information provided to the auditor. In an audit of the statement of social insurance, the representation letter should include, as applicable, the following representations:

- a. The actuarial assumptions and methods used to measure amounts in the statement of social insurance for financial accounting and disclosure purposes represent management's best estimates regarding future events based on demographic and economic assumptions, and future changes mandated by law.
- b. There were no material omissions from the data provided to the agency's actuary for the purpose of determining the actuarial present value of the estimated future income to be received, and estimated future expenditures to be paid during a projection period sufficient to illustrate the long-term sustainability of the

[*name of the social insurance program*] as of [*dates of statements of social insurance presented*].

- c. Management is responsible for the assumptions and methods used in the preparation of the statement of social insurance. Management of the agency agrees with the actuarial methods and assumptions used by the agency's actuary and has no knowledge or belief that would make such methods or assumptions inappropriate in the circumstances. Management did not give any instructions, nor cause any instructions to be given to the agency's actuary with respect to values or amounts derived, and is not aware of any matters that have affected the objectivity of the agency's actuary. Management believes that the actuarial assumptions and methods used to measure amounts in the statement of social insurance for financial accounting purposes are appropriate in the circumstances.
- d. The statement of social insurance covers a projection period sufficient to illustrate long-term sustainability of the social insurance program.
- e. Management has provided the auditor with all the reports developed by external review groups appointed by the agency or the program's trustees related to estimates in the statement of social insurance.
- f. The following matters relating to the statement of social insurance have been disclosed properly in the notes to the financial statements:
 - (1) The accumulated excess of all past cash receipts, including interest on investments, over all past cash disbursements within the social insurance program represented by the fund balance at the valuation date
 - (2) An explanation of how the net present value is calculated for the closed group¹⁴ (Paragraph 27(3)(i) of SFFAS No. 17 identifies the information to be included in this explanation.)
 - (3) Comparative financial information for the items in paragraphs .02a, .02b, .02c, and .02d(1) of this SOP, for the current year and for each of the four preceding years
 - (4) Significant assumptions used in preparing the estimates
- g. There have been no changes in [*or, Changes in the following have been properly recorded or disclosed in the financial statements*]:
 - (1) The actuarial methods or assumptions used to calculate amounts recorded or disclosed in the financial statements between the valuation dates (that is, January 1, 20X8, and January 1, 20X7) or changes in the method of collecting data.
 - (2) The actuarial methods or assumptions used to calculate amounts recorded or disclosed in the financial statements between the valuation date and the financial reporting date (that is, January 1, 20X8, and September 30, 20X8) or changes in the method of collecting data.

¹⁴ The *closed group* is defined as those persons who, as of a valuation date, are participants in a social insurance program as beneficiaries, covered workers, or payers of earmarked taxes or premiums.

- h. There have been no changes in [or, Changes in the following have been properly recorded or disclosed in the financial statements]:
 - (1) Laws and regulations affecting social insurance program income and benefits between the valuation dates (January 1, 20X8, and January 1, 20X7).
 - (2) Laws and regulations affecting social insurance program income and benefits between the valuation date and the financial reporting date (that is, January 1, 20X8, and September 30, 20X8).
- i. Accounting estimates applicable to the financial information of the agency included in the statement of social insurance are based on management's best estimate, after considering past and current events and assumptions about future events.

[Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Reporting

.40 Because FASAB has defined the statement of social insurance as a basic financial statement, the auditor should report on it as a part of his or her report on the other basic financial statements. In addition to following the requirements of AU section 508, *Reports on Audited Financial Statements*, the auditor's report on a federal agency's financial statements that present a statement of social insurance should include the following elements:

- a. An opinion as to whether the statement of social insurance presents fairly, in all material respects, the financial condition¹⁵ of the agency's social insurance program(s) as of the valuation date in conformity with generally accepted accounting principles.
- b. An explanatory paragraph following the opinion paragraph, describing that (i) the statement of social insurance presents the actuarial present value of the agency's estimated future income to be received from or on behalf of the participants and estimated future expenditures to be paid to or on behalf of participants during a projection period sufficient to illustrate long-term sustainability of the social insurance program; (ii) in preparing the statement of social insurance, management considers and selects assumptions and data that it believes provide a reasonable basis for the

¹⁵ In Statement of Federal Financial Accounting Concepts No. 1, *Objectives of Federal Financial Reporting*, the FASAB articulates a concept of *financial condition*, as distinct from *financial position*. Financial condition is broader and more forward-looking than financial position. Presenting information on financial condition is consistent with FASAB's financial reporting objective of stewardship. In illustrating how the stewardship objective aligns with the needs of users of federal financial statements, FASAB observes that,

All users need information on earmarked revenues recorded in trust funds. They want to know, for example, whether the Social Security Trust funds are likely, in the foreseeable future, to need infusions of new taxes to pay benefits. Citizens need to know the implications of investing trust fund revenues in government securities.

In reporting the actuarial present value of the estimated future income to be received, estimated future expenditures to be paid, and excess of income over expenditures during a projection period sufficient to illustrate the long-term sustainability of an agency's social insurance programs, and in disclosing in the notes to the financial statements comparative financial information for the five most recent years, the statement of social insurance presents the financial condition of the programs. Thus, in reporting on the statement of social insurance, the auditor refers to the financial condition of the agency's social insurance programs.

assertions in the statement; and (iii) because of the large number of factors that affect the statement of social insurance and the fact that future events and circumstances cannot be known with certainty, there will be differences between the estimates in the statement of social insurance and the actual results, and those differences may be material.

- c. Reference to any standards or regulations in addition to generally accepted auditing standards, such as *Government Auditing Standards*, that apply to audits of federal financial statements and any additional elements of the auditor's report that those standards or regulations require.

[Paragraph renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.41 The following is an illustrative auditor's report for a statement of social insurance.

Independent Auditor's Report¹⁶

We have audited the accompanying consolidated balance sheets of XYZ Social Insurance Agency, as of September 30, 20X8 and 20X7, the related consolidated statements of net cost, of changes in net position and of financing; the combined statements of budgetary resources for the years then ended; and statements of social insurance as of January 1, 20X8, 20X7, 20X6, 20X5, and 20X4.¹⁷ These financial statements are the responsibility of XYZ Social Insurance Agency's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 01-02, *Audit Requirements for Federal Financial Statements*. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to previously present fairly, in all material respects, the financial position of XYZ Social Insurance Agency as of September 30, 20X8 and 20X7; its net cost of operations; changes in net position, budgetary resources, and financing for the year then ended; and the financial condition of its social insurance programs as of January 1, 20X8, 20X7, 20X6, 20X5, and 20X4, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note X to the financial statements, the statements of social insurance present the actuarial present value of the Agency's estimated future

¹⁶ Paragraphs .65–.74 of AU section 508, *Reports on Audited Financial Statements*, provide guidance on reporting on comparative financial statements, including guidance on reporting when there has been a change in auditors.

¹⁷ The auditor's report on the statement of social insurance covers a period of five years (see paragraph 27(3)(j) of SFFAS No. 17); whereas, the auditor's report on the other financial statements covers a period of two years. In the first year's audit of the statement of social insurance, the auditor would only express an opinion on one year; in year two, the auditor would express an opinion on two years, and so on, until all five years were covered.

income to be received from or on behalf of the participants and estimated future expenditures to be paid to or on behalf of participants during a projection period sufficient to illustrate long-term sustainability of the social insurance program. In preparing the statements of social insurance, management considers and selects assumptions and data that it believes provide a reasonable basis for the assertions in the statements. However, because of the large number of factors that affect the statement of social insurance and the fact that future events and circumstances cannot be known with certainty, there will be differences between the estimates in the statement of social insurance and the actual results, and those differences may be material.

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis (MD&A) and the Required Supplementary Information (RSI) be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the MD&A and RSI in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the MD&A and RSI because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

In accordance with *Government Auditing Standards*, we have also issued a report dated [report date] on our consideration of the agency's internal control and a report dated [report date] on its compliance with laws and regulations. Those reports are an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

[Signature]

[Date]

[Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

.42 The statement of social insurance does not articulate with the other basic financial statements. For that reason, the portion of the auditor's report that addresses the statement of social insurance ordinarily will not affect the auditor's report on the balance sheet or the statements of net costs, changes in net position, financing, or budgetary resources. The following illustrates a report in which the auditor disclaims an opinion on the statement of social insurance but expresses an unqualified opinion on the other financial statements.

Independent Auditor's Report

We have audited the accompanying consolidated balance sheets of XYZ Social Insurance Agency, as of September 30, 20X8 and 20X7, the related consolidated statements of net cost, of changes in net position and of financing, and the combined statements of budgetary resources for the years then ended, and we were engaged to audit the statements of social insurance as of January 1, 20X8, 20X7, 20X6, 20X5, and 20X4. These financial statements are the responsibility of XYZ Social Insurance Agency's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as explained in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget Bulletin No. 01-02, *Audit Requirements for Federal Financial Statements*. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

[Insert paragraph describing limitation on scope of the audits of the statements of social insurance.]

Because of the matter discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the statements of social insurance as of January 1, 20X8, 20X7, 20X6, 20X5, and 20X4.

In our opinion, the financial statements referred to previously present fairly, in all material respects, the financial position of XYZ Social Insurance Agency as of September 30, 20X8 and 20X7, its net cost of operations, changes in net position, budgetary resources, and financing for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[Omit explanatory paragraph required by paragraph .40(b) of this SOP.]

[Modify the paragraph reporting on Management's Discussion and Analysis and Required Supplementary Information for the effects of the scope limitations regarding the statement of social insurance on that information, considering the guidance in AU section 550, Other Information in Documents Containing Audited Financial Statements, AU section 551, Supplementary Information in Relation to the Financial Statements as a Whole, and AU section 552, Reporting on Condensed Financial Statements and Selected Financial Data.]

[Reference to reports on internal control and compliance with laws and regulations in accordance with the Government Auditing Standards is the same as in the illustration in paragraph .41 of this SOP.]

[Signature]

[Date]

[Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

.43 If the agency that operates a social insurance program issues financial statements that purport to present financial position, net cost of operations, changes in net position, budgetary resources, and financing for the years then ended, but omits the related statements of social insurance, the auditor ordinarily will conclude that the omission requires qualification of the auditor's opinion in the following manner.

Independent Auditor's Report

We have audited the accompanying consolidated balance sheets of XYZ Social Insurance Agency, as of September 30, 20X8 and 20X7, the related consolidated statements of net cost, of changes in net position and of financing, and the

combined statements of budgetary resources for the years then ended. These financial statements are the responsibility of XYZ Social Insurance Agency's management. Our responsibility is to express an opinion on these financial statements based on our audits.

[Same second paragraph as the standard report]

The agency declined to present statements of social insurance as of January 1, 20X8, 20X7, 20X6, 20X5, and 20X4. Presentation of such statements describing the financial condition of its social insurance programs is required by accounting principles generally accepted in the United States of America.

In our opinion, except that the omission of the statements of social insurance results in an incomplete presentation as explained in the preceding paragraph, the financial statements referred to previously present fairly, in all material respects, the financial position of XYZ Social Insurance Agency as of September 30, 20X8 and 20X7; its net cost of operations; and changes in net position, budgetary resources, and financing for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[Omit explanatory paragraph required by paragraph .40(b) of this SOP.]

[Modify, in accordance with the guidance in paragraph .09 of AU section 558, Required Supplementary Information, the paragraph regarding Management's Discussion and Analysis and the Required Supplementary Information (RSI) for the omission of the RSI.]

[Reference to reports on internal control and compliance with laws and regulations in accordance with Government Auditing Standards is the same as in the illustration in paragraph .41 of this SOP.]

[Signature]

[Date]

[Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

Effective Date and Transition

.44 This SOP is effective for audits of statements of social insurance for periods beginning after September 30, 2005. SFFAS No. 17 (subparagraph 27(3)(a-h)) requires disclosure of the information for the current year and for each of the four preceding years. Comparative information in the statement of social insurance that has not been audited should be marked as unaudited. Earlier implementation of the provisions of this SOP is permitted. [Paragraph renumbered, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Appendix—Illustrative Controls and Audit Procedures

A-1. This appendix contains examples of:

- a. Procedures the auditor performs to obtain knowledge about the agency's process for developing, evaluating, and incorporating estimates in the statement of social insurance
- b. Controls that are relevant to the agency's preparation of the statement of social insurance (The auditor should obtain an understanding of the design of such controls and determine whether they have been implemented.)
- c. Procedures the auditor performs to tests controls and assertions in the statement of social insurance

A-2. The appendix is divided into the following five sections:

- a. Factors (paragraphs A-3–A-5)
- b. Assumptions (paragraphs A-6–A-10)
- c. Data (paragraphs A-11–A-14)
- d. Models (paragraphs A-15–A-17)
- e. Estimates (paragraphs A-18–A-20)

Each of these sections includes examples of the items described in paragraph A-1. The procedures and controls included in this appendix are illustrative and do not represent a complete list of procedures and controls.

Factors

A-3. In evaluating the reasonableness of an accounting estimate, the auditor ordinarily concentrates on key factors that are significant to the estimate, sensitive to variation, deviations from historical patterns, and subjective and susceptible to misstatement and bias. The following are examples of procedures the auditor performs to obtain knowledge about how the agency generates, evaluates, selects, and reviews factors to be included in estimates in the statement of social insurance:

- a. Identifying the individuals involved in generating, evaluating, selecting, and reviewing factors to be included in estimates in the statement of social insurance
- b. Determining how factors affecting social insurance estimates are generated, evaluated, selected, and reviewed, and how that process is documented¹
- c. Reading documentation of the process for generating, evaluating, selecting, and reviewing estimates to be included in the statement of social insurance

¹ Office of Management and Budget (OMB) Circular No. A-123, *Management and Accountability Control*, and No. A-127, *Financial Management Systems*, outline documentation requirements for manual and automated financial related transactions and systems.

- A-4.** The auditor should obtain a sufficient understanding of the entity's internal control by performing risk assessment procedures to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented. The following are examples of controls related to factors:
- a.* Management's process for monitoring the environment to determine the effect that change in the environment (for example, legal, political, health, immigration) might have on the factors considered
 - b.* Procedures to prevent or detect and correct the inadvertent omission of factors that should be considered in developing the estimate (an example of such a control would be comparing factors considered and selected in the current period with those of prior periods)
 - c.* Hiring procedures to ensure that individuals responsible for generating, evaluating, selecting, and reviewing factors have the appropriate education and experience
- A-5.** The following are examples of procedures the auditor performs to test controls and financial statement assertions related to factors:
- a.* Reviewing documentation of the factors considered in developing the estimate
 - b.* Evaluating whether the factors that have been considered are relevant and sufficient for the purpose of preparing the statement of social insurance
 - c.* Considering whether there are additional key factors that management has not addressed

Assumptions

- A-6.** In evaluating the reasonableness of an accounting estimate, the auditor ordinarily concentrates on assumptions that are significant to the accounting estimate, sensitive to variation, deviations from historical patterns, and subjective and susceptible to misstatement and bias.
- A-7.** The following are examples of matters the auditor inquires about in discussions with management and other knowledgeable personnel to determine how the agency generates, evaluates, selects, and reviews assumptions to be included in estimates in the statement of social insurance:
- a.* The source of the assumptions for significant estimates²

² For some agencies, the assumptions are established by an external board of trustees and provided to the agency. For example, for the Social Security program, the Social Security Act establishes a board of trustees to oversee the financial operations of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund. The board is composed of six members, four of whom serve automatically by virtue of their positions in the federal government. They are the Secretary of the Treasury (the managing trustee), the Secretary of Labor, the Secretary of Health and Human Services, and the Commissioner of Social Security. The other two members are appointed by the President and confirmed by the Senate to serve as public representatives. In such circumstances, the auditor's procedures generally would focus on testing the work performed by the agency's actuary in reviewing the assumptions developed by the board of trustees. The agency's actuary reports on whether (a) the techniques and methodology used to evaluate the financial and actuarial status of the program is based upon sound principles of actuarial practice and are generally accepted within the actuarial profession; and (b) the assumptions used and the resulting actuarial estimates are, individually and in the aggregate, reasonable for the purpose of evaluating the financial and actuarial status of the trust funds, taking into consideration the past experience and future expectations for the population, the economy, and the program.

- b.* How the assumptions underlying the estimates are documented
- c.* The process for determining the best estimate (for example, intermediate) assumptions (possible outcomes)
- d.* How management considers and determines the effect that variation in the underlying assumptions will have on the estimates

A-8. The following are examples of controls related to assumptions:

- a.* The agency's documentation of the process used to generate, evaluate, select, and review assumptions
- b.* How management monitors the environment for possible changes that might affect the assumptions used to develop estimates, for example, the need to consider alternative assumptions
- c.* Comparing assumptions made in the current period with those of prior periods and reconciling differences
- d.* Hiring procedures to ensure that personnel have the appropriate education and experience to meet job description requirements

A-9. The following are examples of procedures the auditor performs to test controls and financial statement assertions related to assumptions:

- a.* Identifying the assumptions used and evaluating the reasonableness of those assumptions
- b.* Determining whether data and other related information support the assumptions
- c.* Evaluating whether interrelated assumptions are consistent with each other
- d.* Comparing assumptions made by the entity to the range of assumptions made by entities in other industries, for example, insurance companies, financial institutions, or other government agencies, and evaluating the implications of significant differences
- e.* Considering whether there are alternative assumptions about the factors
- f.* Evaluating whether the assumptions selected are consistent with supporting data, relevant historical data, and industry data
- g.* Reviewing available documentation of the assumptions used in developing the estimates
- h.* Evaluating whether facts and informed judgment about past and future events or circumstances support the underlying assumptions
- i.* Evaluating whether any of the significant assumptions are so subjective that no reasonably objective basis could exist to support the use of the assumption
- j.* Inquiring of program managers regarding the reasonableness of assumptions that are related to the manager's realm of responsibility

- k.* Evaluating whether the assumptions appear to be complete, that is, whether assumptions have been developed for each key factor
 - l.* Considering whether the assumptions appear to be relatively objective, that is, are not unduly optimistic or pessimistic
 - m.* Evaluating whether the assumptions are consistent with the laws and regulations governing the program
 - n.* Evaluating whether the assumptions, individually and in the aggregate, make sense in the context of the statement of social insurance taken as a whole
 - o.* Evaluating whether significant assumptions are appropriately disclosed in the statement of social insurance
- A-10.** Assumptions that have no material effect on the statement of social insurance may not have to be individually evaluated; however, the aggregate effect of individually insignificant assumptions should be considered in making an overall evaluation of whether the assumptions underlying the reported amounts are reasonable.

Data

- A-11.** The following are examples of matters the auditor inquires about in discussions with management and other knowledgeable personnel, and reads about in agency documentation to determine how the agency generates, evaluates, selects, and reviews data to be included in estimates in the statement of social insurance:
- a.* The source of the data for significant estimates and whether the data are developed internally or by outside parties
 - b.* How data are collected, maintained, processed, and updated
 - c.* How the data underlying the estimates are documented
- A-12.** The following are examples of controls related to data:
- a.* Controls over the accuracy and completeness of internally prepared data, for example, review of the data for reasonableness and consistency with other data, and general and application controls over the data such as edit checks and batch totals
 - b.* Controls that prevent or detect and correct errors in the collection, maintenance, processing, and updating of the data, for example, manual controls to ensure that data are accurately entered and uploaded to a computerized system
 - c.* Controls over the reliability of external sources of data, for example, confirming and verifying data by tracing and agreeing it to census information in reports prepared by the United States Census Bureau
 - d.* Procedures to identify and document authorized users of the system and to restrict access to the system, for example, the use of unique user passwords and periodic changes to those passwords

- e.* Preparation and review of a risk assessment on a regular basis or when a significant change occurs in either the internal or external physical environment
- f.* Preventive maintenance agreements or procedures for key system hardware components
- g.* On a regular basis, backing up software and data that are stored offsite
- h.* Restricting access to utility programs that can read, add, change, or delete data or programs to authorized individuals
- i.* Establishing procedures to ensure that original source documents are retained or are reproducible by the agency for an adequate amount of time to facilitate the retrieval or reconstruction of data

A-13. The following are examples of procedures the auditor performs to test controls and financial statement assertions related to data:

- a.* Evaluating whether the data used to develop the estimates are relevant, reliable, and sufficient for the purpose
- b.* Identifying the source of the data, that is, whether the data were developed by the agency or by an outside entity
- c.* Reviewing documentation of the data used to develop estimates
- d.* Determining whether data used to develop estimates are consistent with supporting data, historical data, and other related information. An example would be determining whether a positive or negative correlation exists between sets of data if such a correlation would be expected to exist
- e.* Evaluating the accuracy and completeness of internally prepared data
- f.* Tracing and agreeing internally prepared data to system output reports generated by the agency

A-14. In determining the extent of the procedures to be performed on data obtained from an external source, a factor to consider is whether the data are widely disseminated and used, or whether the data were developed for limited use. An example of data that are widely disseminated and used is a report prepared by the U.S. Census Bureau. For such data, the auditor may trace and agree the information to reports prepared by the U.S. Census Bureau. If management has made adjustments to data obtained from a widely disseminated and used external source, the auditor should evaluate:

- a.* Management's reason for adjusting the data
- b.* The accuracy and completeness of the adjustments to the externally obtained data
- c.* Management's documentation supporting the adjustment

For data meant for limited use, all other factors being equal, the auditor should confirm or otherwise verify data obtained from other federal agencies and other external sources that were used in the actuarial valuation. If management has made adjustments to data developed for limited use, the auditor should evaluate:

- a.* Management's reason for adjusting the data

- b.* The accuracy and completeness of the adjustments to the externally obtained data
- c.* Management's documentation supporting the adjustment

Models

A-15. The following are examples of procedures the auditor performs to obtain knowledge about how the agency generates, evaluates, selects, and reviews models used to develop estimates included in the statement of social insurance:

- a.* Inquiring of management and other knowledgeable personnel about how they design or select the model used for the development of estimates and how they document that model
- b.* Inquiring of management and other knowledgeable personnel about how they determine the effect that variations in the underlying assumptions have on the estimates

A-16. The following are examples of controls related to models:

- a.* General and application controls related to the model, such as controls over input to the model and processing of that input
- b.* Controls that prevent or detect and correct errors in the development and processing of the model
- c.* Controls that prevent or detect and correct unauthorized access or changes to the model, for example, an access control table that is a component of the system and prohibits unauthorized users from accessing and changing the model. An example of a detective control is an audit log that tracks any changes made to the model
- d.* Controls designed to ensure that the information contained in the statement of social insurance and related disclosures conforms to generally accepted accounting principles
- e.* Designating responsibility for significant information resources within the agency (for example, data and programs) and establishing and maintaining security over such resources
- f.* Comparing existing system security features to documented system security requirements
- g.* Assigning responsibility to individuals in a manner that ensures that no single individual has the authority to read, add, change, or delete information without an independent review of that activity
- h.* Subjecting hardware and software acquisitions and implementations to extensive testing prior to acceptance in production

A-17. The following are examples of procedures the auditor performs to test controls and financial statement assertions related to models:

- a.* Reviewing documentation that describes the instructions, rules, or procedures used in the model to calculate estimates
- b.* Reperforming calculations used in the model to translate the assumptions, data, and factors into the estimate

- c. Reviewing management's documentation of its sensitivity analysis and considering whether the results are consistent with the auditor's expectations
- d. If available, comparing the results of the model with the results of models used by other organizations for reasonableness

Estimates

A-18. The following are examples of matters the auditor inquires about in discussions with management and other knowledgeable personnel to determine how the agency generates, evaluates, selects, and reviews estimates to be included in the statement of social insurance:

- a. How management obtains the expertise to develop and evaluate estimates in the statement of social insurance, including hiring procedures, professional development activities, and procedures for engaging outside specialists
- b. Who has final authority for reviewing and approving estimates
- c. The work performed by external review groups, their findings, and how those findings are used by the agency, for example:
 - (1) The scope and timing of the work performed by external review groups
 - (2) The composition of external review groups and the qualifications of the members
 - (3) Whether the external review groups are independent of the agency
 - (4) Whether the external review groups issued formal reports including findings or recommendations

A-19. The following are examples of controls related to estimates:

- a. Procedures related to the review and implementation of recommendations developed by external review groups
- b. General and application controls related to estimates, such as evidence of supervisory and management review of estimates and supporting documentation
- c. Controls intended to ensure that the information contained in the statement of social insurance and related notes conforms to Federal Accounting Standards Advisory Board (FASAB) guidance
- d. Controls related to the supervision of individuals who develop estimates, and the review of those estimates and supporting documentation
- e. Controls to regularly verify that personnel developing estimates are qualified to perform those tasks based on their education, training, and experience, as required

A-20. The following are examples of procedures the auditor performs to test controls and financial statement assertions related to estimates:

- a. Developing a trend analysis in which one period is compared to the next period

- b. Determining whether the information in the statement of social insurance, including related disclosure, is supported by sufficient, competent evidential matter
- c. Comparing the estimated future expenditures predicted by the actuarial model to actual expenditures for the previous fiscal year
- d. Evaluating the reasonableness of the time period covered by the statement of social insurance. FASAB standards require that the statement of social insurance cover a projection period sufficient to illustrate long-term sustainability of the social insurance program

AUD Section 40***Statement of Position 07-2 Attestation Engagements That Address Specified Compliance Control Objectives and Related Controls at Entities That Provide Services to Investment Companies, Investment Advisers, or Other Service Providers*****October 15, 2007****NOTE**

This AICPA Statement of Position (SOP) has been developed by the AICPA Chief Compliance Officers Task Force of the AICPA Auditing Standards Board (ASB) to provide guidance regarding the application of Statements on Standards for Attestation Engagements (SSAEs) primarily to examination engagements in which a practitioner reports on the suitability of the design and operating effectiveness of a service provider's controls in achieving specified compliance control objectives. Examples of the service providers addressed by this SOP are investment advisers, custodians, transfer agents, administrators, and principal underwriters that provide services to investment companies (including business development companies), investment advisers, or other service providers (user organizations). A practitioner's report on the suitability of the design and operating effectiveness of a service provider's controls in achieving specified compliance control objectives is used primarily by user organizations because aspects of a user organization's compliance or internal control over compliance with laws, regulations, and rules may be affected by or include controls at service providers.

An attestation SOP is recognized as an interpretive publication as defined in AT-C section 105, *Concepts Common to All Attestation Engagements*. Interpretive publications are recommendations on the application of SSAEs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSAEs. The members of the ASB have found this SOP to be consistent with existing SSAEs.

Although interpretive publications are not attestation standards, AT-C section 105 requires the practitioner to consider applicable interpretive publications in planning and performing the attestation engagement because interpretive publications are relevant to the proper application of the attestation standards in specific circumstances.

Introduction and Background

.01 In December 2003, the Securities and Exchange Commission (SEC) adopted Rule 38a-1 under the Investment Company Act of 1940 and Rule 206(4)-7 under the Investment Advisers Act of 1940. The rules were adopted to protect investors by ensuring that (a) each investment company registered with the SEC under the Investment Company Act of 1940, and each business development company¹ (collectively, funds) has an internal program to enhance compliance with federal securities laws² and (b) each investment adviser registered with the SEC has an internal program to enhance compliance with the Investment Advisers Act of 1940, including SEC rules issued thereunder.

.02 Many operations of funds and, in some instances, operations of investment advisers are carried out by entities that provide services to the funds or investment advisers. In this Statement of Position (SOP), such entities are termed *service providers*. Service providers have their own compliance policies and procedures that may affect or be part of a fund's or investment adviser's compliance or internal control over compliance with federal securities laws, individual statutes or provisions thereof, or corresponding SEC rules (*federal securities laws or elements thereof*).³ Rule 38a-1 requires each fund to adopt and implement written policies and procedures reasonably designed to prevent violation of federal securities laws by the fund or any of the following service providers named in the rule: investment advisers, principal underwriters, administrators, and transfer agents. Accordingly, a fund's compliance policies and procedures provide for oversight of the compliance procedures performed by the named service providers. Further, Rule 206(4)-7 requires an investment adviser to adopt and implement written policies and procedures reasonably designed to prevent violation by the investment adviser and its supervised persons of the Investment Advisers Act of 1940 and SEC rules issued thereunder. In this SOP, the term *service providers* refers to the service providers named in Rule 38a-1 as well as other service providers, such as custodians. The term *user organization* generally refers to a fund or investment adviser that uses the services of a service provider. In some instances, a single entity may be a service provider *and* a user organization. For example, Administrator A, in its capacity as a service provider to a fund, may be responsible for monitoring whether the fund's registration statement filed with the SEC complies with SEC disclosure requirements, but may subcontract that function to Administrator B that specializes in that area. In this situation, Administrator A is also a user organization because it uses the services of Administrator B. In this SOP, Administrator B is referred to as a *subservice provider*. In applying the guidance in this SOP, a subservice provider is considered a service provider.

.03 Among other provisions, the rules mentioned in paragraph .01 require funds and investment advisers to

¹ A business development company is a closed-end investment company that, among other requirements, has elected to be subject to the provisions of certain sections of the Investment Company Act of 1940.

² Rule 38a-1 defines *federal securities laws* to include the Securities Act of 1933, the Securities Exchange Act of 1934, the Sarbanes-Oxley Act of 2002, the Investment Company Act of 1940, the Investment Advisers Act of 1940, Title V of the Gramm-Leach-Bliley Act, any rules adopted by the Securities and Exchange Commission (SEC) under any of these statutes, the Bank Secrecy Act as it applies to funds, and any rules adopted thereunder by the SEC or the Department of the Treasury.

³ In this Statement of Position (SOP), *federal securities laws or elements thereof* is defined as federal securities laws (see footnote 2), individual statutes or provisions thereof, or corresponding SEC rules.

- adopt and implement written policies and procedures⁴ reasonably designed to prevent violation of, in the case of funds, federal securities laws and, in the case of investment advisers, the Investment Advisers Act of 1940, including SEC rules issued thereunder.
- review those policies and procedures at least annually for their adequacy and the effectiveness of their implementation.⁵
- designate a chief compliance officer (CCO) to be responsible for administering the policies and procedures (for funds, the CCO must report directly to the fund's board of directors).

.04 SEC Release Nos. IC-26299 and IA-2204 adopting the rules note that it may be impractical for a fund or its CCO to directly review all of its named service providers' policies and procedures, particularly if one or more of the service providers are not affiliated with the fund. In these circumstances, the SEC considers the fund to have satisfied the requirements of Rule 38a-1 if the fund's board of directors, in evaluating whether to approve the service provider's compliance program, uses a "third-party report" on the service provider's policies and procedures.⁶ In the United States fund industry, in connection with the audit of a fund's financial statements, a number of service providers are accustomed to engaging an independent auditor to report on the suitability of the design and operating effectiveness of controls at the service provider that may be relevant to the fund's internal control over financial reporting. These engagements are performed under AT-C section 320, *Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*, and reports issued thereunder are used by the funds' independent auditor when auditing the fund's financial statements. Similarly, since the adoption of the rules in December 2003, service providers have received requests from funds and investment advisers for information and assurance regarding the suitability of the design and operating effectiveness of the service provider's controls in achieving compliance control objectives. Also, in some circumstances, subservice providers (service providers that provide services to other service providers, for example, a service organization that reports fund share balances and transactions of retirement plan participants, in aggregate, to a fund's transfer agent and maintains records thereof) have received similar requests from service providers. Such information assists funds and investment advisers in fulfilling their responsibilities to perform an annual review of specified compliance activities and assists service providers and subservice providers in their consideration of their own controls. [Revised, August

⁴ Rule 38a-1 and Rule 206(4)-7 use the term *policies and procedures* to refer to the principles and activities an entity adopts and implements to prevent violation of federal securities laws or elements thereof. In this SOP, the term *controls* is used to refer to the policies and procedures an entity adopts and implements to achieve specified compliance control objectives.

⁵ The annual review requirement is imposed upon the fund or investment adviser. Specifically, the rules do not require the fund or adviser to engage an independent accountant to attest to management's annual review or to perform a separate evaluation of any aspect of the fund's or investment adviser's compliance policies and procedures. Further, the rules do not require that the annual review employ a specific framework or methodology for evaluating the effectiveness of a fund's or investment adviser's compliance policies and procedures. Lastly, there is no requirement that annual or other compliance reports prepared by chief compliance officers of funds or investment advisers be filed with the SEC; however, the SEC may request such reports in connection with their inspection and examination programs of funds and investment advisers or in other circumstances.

⁶ The SEC release states that the third party report must describe the service provider's compliance program as it relates to the types of services provided to the fund, discuss the types of compliance risks material to the fund, and assess the adequacy of the service provider's compliance controls. Information produced as a result of an engagement covered by this SOP may be used by the fund, in part, to meet these provisions. The report must be provided to the fund no less frequently than annually.

2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.05 Specific information about the rules is provided in "Compliance Programs of Investment Companies and Investment Advisers," which can be accessed at the United States SEC website at www.sec.gov/rules/final/ia-2204.htm. The following is a table that briefly summarizes significant provisions of the rules. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

SEC Rule and (Section Number)	Rule 38a-1 (§17 CFR 270.38a-1)	Rule 206(4)-7 (§17 CFR 275.206(4)-7) and Amendments to Rule 204-2 (§17 CFR 275.204-2)
Applicable entity	Investment companies and business development companies (funds) must:	Investment advisers must:
Nature of the policies and procedures to be adopted and implemented	Adopt and implement written policies and procedures reasonably designed to prevent violation of federal securities laws by the fund, including policies and procedures that provide for oversight of compliance by each investment adviser, principal underwriter, administrator, and transfer agent (named service providers) of the fund.	Adopt and implement written policies and procedures reasonably designed to prevent violation, by the investment adviser and persons supervised by the investment adviser, of the Investment Advisers Act of 1940 and the SEC rules issued thereunder.
Board approval of policies and procedures	Obtain approval by the fund's board of directors of the fund's policies and procedures and those of each of the named service providers.	
Annual review of policies and procedures	Review, no less frequently than annually, (1) the adequacy of the policies and procedures of the fund and each of the named service providers and (2) the effectiveness of their implementation.	Review, no less frequently than annually, (1) the adequacy of the policies and procedures established pursuant to the rule and (2) the effectiveness of their implementation.

SEC Rule and (Section Number)	Rule 38a-1 (§17 CFR 270.38a-1)	Rule 206(4)-7 (§17 CFR 275.206(4)-7) and Amendments to Rule 204-2 (§17 CFR 275.204-2)
Applicable entity	Investment companies and business development companies (funds) must:	Investment advisers must:
Individual responsible for administering policies and procedures	Designate an individual to be the fund's chief compliance officer (CCO), responsible for administering the policies and procedures adopted under paragraph(a)(1) of the rule. The designation and compensation of the CCO must be approved by the fund's board of directors, and the CCO may be removed only by action and approval of the fund's board of directors.	Designate an individual (who is a supervised person) to be the adviser's CCO, responsible for administering the policies and procedures that are adopted under paragraph(a) of the rule.
Report to the board of directors	The CCO must provide a written report to the fund's board of directors, no less frequently than annually, that addresses at a minimum: • The operation of the fund's policies and procedures and those of each of the named service providers, any material changes made to those policies and procedures since the last report, and any material changes to the policies and procedures recommended as a result of the annual review.	

(continued)

SEC Rule and (Section Number)	Rule 38a-1 (§17 CFR 270.38a-1)	Rule 206(4)-7 (§17 CFR 275.206(4)-7) and Amendments to Rule 204-2 (§17 CFR 275.204-2)
Applicable entity	Investment companies and business development companies (funds) must:	Investment advisers must:
	Each <i>material compliance matter</i>⁷ that occurred since the date of the last report. After the initial report, subsequent CCO reports are expected to cover the period since the date of the last report.	

Objective of the Examination Engagement

.06 Because federal securities laws encompass a significantly comprehensive set of obligations and responsibilities, the compliance control objectives presented by management of the service provider ordinarily would not include all conceivable compliance control objectives related to federal securities laws or elements thereof. Also, although Rule 38a-1 requires a fund's CCO to include in the fund's annual compliance report information concerning any material compliance matter(s) that occurred during the relevant period, the objective of the examination engagement described in paragraphs .01–.35 of this SOP is not to identify and report any material compliance matter(s) that may have existed at the service provider during the period covered by the practitioner's report. Rather, the objective of the examination engagement described in paragraphs .01–.35 of this SOP is for the practitioner to report on the suitability of the design (at the end of a specified period) and the operating effectiveness (during the specified period) of the service provider's controls in achieving the compliance control objectives specified by management of the service provider. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.07 AT-C section 205, *Examination Engagements*, allows a practitioner to report on either management's assertion or on the subject matter to which it

⁷ SEC Rule 38a-1 defines a *material compliance matter* as any compliance matter about which the fund's board of directors would reasonably need to know to oversee fund compliance and that involves, without limitation, (a) a violation of federal securities laws (as defined in Rule 38a-1) by the fund, its investment adviser, principal underwriter, administrator, or transfer agent (or officers, directors, employees, or agents thereof); (b) a violation of the policies and procedures of the fund, its investment adviser, principal underwriter, administrator, or transfer agent; or (c) a weakness in the design or implementation of the policies and procedures of the fund, its investment adviser, principal underwriter, administrator, or transfer agent.

relates.⁸ Paragraph .62 of AT-C section 205 indicates that when the practitioner reports on an assertion, the assertion should either be (a) bound with or accompany the practitioner's report or (b) clearly stated in the practitioner's report. In view of the intended use of the information produced in connection with examination engagements covered by this SOP, practitioners are strongly encouraged to report on management's assertion rather than on the subject matter to ensure that management's assertion will be available to users of the report. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Subject Matter of the Examination Engagement

.08 The examination engagement described in paragraphs .01–.35 of this SOP should be performed in accordance with AT-C section 205 of the attestation standards. The attestation standards enable a practitioner to design an engagement and report on subject matter (or an assertion thereon) other than financial statements. The subject matter of the engagement described in paragraphs .01–.35 of this SOP is the suitability of the design and operating effectiveness of a service provider's controls directed at achieving specified compliance control objectives. Use of the practitioner's examination report is restricted to the CCOs, management, boards of directors, and independent auditors of the service provider and of the entities that use the services of the service provider because these users would be expected to have the requisite knowledge and familiarity with the service provider's organization to understand the context of the examination report. [Revised, June 2009, to reflect conforming changes due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Management's Responsibilities

.09 In an examination engagement in which the practitioner reports on the suitability of the design and operating effectiveness of controls to achieve specified compliance control objectives, management of the service provider is responsible for

- a. specifying compliance control objectives and related controls that are relevant to the services provided to user organizations and their internal control over compliance with federal securities laws or elements thereof.
- b. preparing and providing the practitioner with a written description of the specified compliance control objectives and related controls referred to in paragraph .09a (see appendix A-4 [paragraph .43] of this SOP, "Illustrative Service Provider's Description of Specified Compliance Control Objectives and Related Controls"). If applicable, the written description should include the applicable information described in paragraphs .16–.17 of this SOP concerning compliance control objectives and related controls of sub-service providers.

⁸ Paragraph .79 of AT-C section 205, *Examination Engagements*, states that if the practitioner has concluded that conditions exist that individually or in combination, result in one or more material misstatements (or deviations) based on the criteria, the practitioner should modify the opinion and express a qualified or adverse opinion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement. [Footnote revised, April 2017, to reflect changes necessary due to the issuance of SSAE No. 18.]

- c. preparing and providing the practitioner with a written assertion regarding the suitability of the design and operating effectiveness of the controls in achieving the specified compliance control objectives⁹ (see appendix A-3 [paragraph .42] of this SOP for an illustrative management assertion). The criteria management use in evaluating the suitability of the design and operating effectiveness of the controls included in management's description and in making its assertion are the specified compliance control objectives.
- d. identifying and presenting a list of user control considerations if the application of controls by user organizations is necessary to achieve the specified compliance control objectives. In certain circumstances, a service provided by a service provider may be designed with the assumption that certain controls will be implemented by user organizations. For example, the service may be designed with the assumption that user organizations will have controls in place for authorizing transactions before they are sent to the service provider for processing. If such user controls are required to achieve the stated compliance control objectives, the service provider should describe them either in its written description or in a separate list accompanying the description.
- e. preparing and providing the practitioner with a representation letter that should include the items listed in paragraph .26a–i of this SOP.

[Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Criteria

.10 Paragraph .25 of AT-C section 105, *Concepts Common to All Attestation Engagements*, includes as one of the preconditions for an attestation engagement that "The criteria to be applied in the preparation and evaluation of the subject matter are suitable and will be available to the intended users." AT-C section 105 states that suitable criteria exhibit all of the following attributes: relevance, objectivity, measurability, and completeness. In the examination engagement covered by this SOP, the criteria to be used to evaluate the suitability of the design and operating effectiveness of the controls are the specified compliance control objectives. Practitioners should not perform an engagement covered by this SOP if the criteria are not measurable; that is, so subjective or vague that reasonably consistent measurements, qualitative or quantitative, of the subject matter cannot ordinarily be obtained (paragraph .A42 of AT-C section 105). For example, the following compliance control objective ordinarily would be too subjective for evaluation:

Advertising and sales literature is frequently and properly reviewed.

The following revision of this control objective improves its objectivity and measurability:

At the end of each quarter, advertising and sales literature is reviewed by the service provider's compliance officer for conformity with the service provider's written policies.

⁹ Paragraph .10 of AT-C section 205 states that a practitioner should obtain a written assertion about the measurement or evaluation of the subject matter against the criteria. [Footnote revised, April 2017, to reflect changes necessary due to the issuance of SSAE No. 18.]

Furthermore, although this SOP does not require all service providers to present identical compliance control objectives for similar business activities or services (for example, transfer agency and fund administration) included in the scope of the attestation engagement, compliance control objectives or elements thereof that pertain to those business activities or services and are relevant to user organizations should not be omitted if management of the service provider or the practitioner becomes aware of deficiencies in the suitability of the design or operating effectiveness of controls that would prevent the achievement of such objectives. See also related guidance in paragraphs .12*b* and .21–.22 of this SOP. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Reference to Laws, Regulations, and Rules

.11 The written description of specified compliance control objectives and related controls prepared by management of the service provider should not include general or broad references¹⁰ to federal securities laws or elements thereof that might imply that the specified compliance control objectives completely address or directly correspond to such laws or elements thereof. Such references may mislead user organizations and others because most laws, regulations, and rules contain numerous and detailed provisions, all of which may not be addressed by the compliance control objectives and related controls. Management of the service provider may, however, include a citation from such federal securities laws or elements thereof within the specified compliance control objective, in the written description, if the citation is sufficiently specific. An example is a citation containing the specific section or subsection of the law, regulation, or rule corresponding to the specified compliance control objective as in "For money market mutual funds, investments are monitored on a weekly basis for compliance with the portfolio maturity and quality provisions of SEC Rule 2a-7c.2 and 2a-7c.3, respectively."

Practitioner's Responsibilities

.12 For the practitioner to express an opinion on the suitability of the design¹¹ and operating effectiveness of a service provider's controls in achieving specified compliance control objectives, the practitioner should

- a.* obtain an understanding of the nature of the services provided by the service provider to user organizations and determine whether the specified compliance control objectives included in management's description are relevant to the services provided. Methods for obtaining an understanding of the services provided include
 - reading representative contracts between the service provider and user organizations, marketing or other material provided to user organizations, reports developed by internal auditors, and correspondence to and from regulatory authorities; and

¹⁰ For example, the written description should not include a table that aligns the specified compliance control objectives with generally or broadly described federal securities laws or elements thereof. Such a presentation could cause readers to incorrectly conclude that the specified control objectives address all provisions of the federal securities laws or elements thereof referenced in the table.

¹¹ A control is suitably designed if individually, or in combination with other controls, it is likely to prevent or detect errors that could result in the nonachievement of specified compliance control objectives when the described controls are complied with satisfactorily.

- making inquiries of management and other service provider personnel.
- b. obtain a written description prepared by management of the service provider of the specified compliance control objectives and related controls that are relevant to the services provided to user organizations and their internal control over compliance with federal securities laws or elements thereof (see appendix A-4 [paragraph .43] of this SOP, "Illustrative Service Provider's Description of Specified Compliance Control Objectives and Related Controls"). If the practitioner concludes that the description is materially misstated or misleading in the circumstances, the practitioner should inform the service provider's management and request that the description be amended. If management refuses to amend the description in a manner that addresses the practitioner's concerns, the practitioner should consider withdrawing from the engagement.
- c. consider the linkage between the controls and the specified compliance control objectives and the ability of the controls to prevent or detect errors related to the specified compliance control objectives.
- d. obtain sufficient appropriate evidence regarding the suitability of the design and operating effectiveness of the controls in achieving the specified compliance control objectives. Procedures to obtain evidence regarding the suitability of the design and implementation of relevant controls may include inquiry of appropriate service provider personnel, observation of the application of specific controls, inspection of documents and reports, and tracing transactions relevant to the subject matter of the engagement through the service provider's applicable information and communication systems. Inquiry alone is not sufficient to evaluate the design of a control relevant to an examination engagement and to determine whether it has been implemented. In testing the operating effectiveness of controls, the practitioner should obtain evidence about how the controls were applied at relevant times during the period under examination, the consistency with which they were applied, and by whom or what means they were applied. Tests of the operating effectiveness of controls ordinarily include the same types of procedures used to evaluate the design and implementation of controls, and may also include reperformance of the application of the control by the practitioner. Because inquiry alone is not sufficient, the practitioner should use a combination of procedures to obtain sufficient appropriate evidence regarding the operating effectiveness of controls.
- e. obtain a written assertion prepared by management of the service provider regarding the suitability of the design and operating effectiveness of the service provider's controls in achieving the specified compliance control objectives (see appendix A-3 [paragraph .42] of this SOP for an illustrative management assertion). As noted in paragraph .07 of this SOP, to ensure that management's assertion will be available to users of the report, practitioners are strongly encouraged to report on management's written assertion rather than on the subject matter, except when a deficiency or deficiencies in controls exist that, individually or in combination,

result in the nonachievement of one or more specified compliance control objectives.

- f. obtain a representation letter from management that includes the items in paragraph .26a–i of this SOP.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.13 Ordinarily, for the examination engagement described in this SOP, the relevant aspects of a service provider's internal control over compliance pertaining to its control environment, risk assessment, and monitoring would not be presented in the form of compliance control objectives; however, management of the service provider is not precluded from doing so. The practitioner should perform tests of the relevant aspects of the service provider's control environment, risk assessment, and monitoring that relate to the services provided and should assess their effectiveness in establishing, enhancing, or mitigating the effectiveness of specific controls. If there are weaknesses in relevant aspects of the control environment, risk assessment, and monitoring the practitioner should consider an appropriate response. For example, modifying the practitioner's procedures to obtain more persuasive evidence about the operating effectiveness of the controls and whether the specified compliance control objectives have been achieved. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Matters Addressed by the Compliance Control Objectives

.14 As noted in paragraph .06, because federal securities laws encompass a significantly comprehensive set of obligations and responsibilities, management's description ordinarily would not include all conceivable compliance control objectives related to federal securities laws or elements thereof.

.15 Unless the compliance control objectives have been designated by an outside party, such as a regulatory authority or a user group, management of the service provider is responsible for specifying the compliance control objectives and related controls that are the subject of the engagement. In establishing the compliance control objectives and related controls, management of the service provider should consider

- a. the nature of the services provided to user organizations.
- b. the service provider's contractual obligations to user organizations.
- c. the information and assurance needs of user organizations, including the relevancy of the compliance control objectives and related controls to the services provided to user organizations and their internal control over compliance with federal securities laws or elements thereof.¹²

Further, when circumstances permit, discussions between management of the service provider and user organizations are advisable in determining the compliance control objectives intended to address the needs of user organizations.

¹² See SEC Release Nos. IC-26299 and IA-2204 adopting Rules 38a-1 and 206(4)-7, respectively (Section II.A., *Adoption and Implementation of Policies and Procedures*).

.16 Service providers may have contractual or other arrangements with one or more subservice providers or other parties that perform administrative, computer operations, transaction processing, recordkeeping, or other activities on their behalf. In these circumstances, management of the service provider determines whether the subservice provider's relevant control objectives and related controls are to be included or excluded from its written description of specified compliance control objectives and related controls. Although the inclusive method provides more information to user organizations, it may not be appropriate or feasible in many or all instances. In determining which approach to use, management of the service provider should consider (a) the nature and extent of information about the subservice provider from which user organizations would derive benefit, (b) the degree of responsibility management would assume by including information about the subservice organization in its description and accompanying written assertion, and (c) the practical difficulties entailed in implementing the inclusive method. Whether the subservice provider's relevant control objectives and related controls are included or excluded from the written description, the description should include a brief statement of the functions and nature of the services performed by the subservice provider. Ordinarily, disclosure of the identity of the subservice provider is not required. If, however, management of the service provider determines that the identity of the subservice provider would be relevant to user organizations, the name of the subservice provider may be included in the written description provided that there are no prohibitions against doing so, by contract or otherwise, and any necessary approvals have been obtained by the service provider. Also, when included, the written description should clearly differentiate between controls of the service provider and controls of the subservice provider.

.17 If the subservice provider's relevant compliance control objectives and related controls are excluded, management of the service provider should state in the written description that the subservice provider's compliance control objectives and related controls are omitted from the description and, unless achievement of the compliance control objectives depends on controls at the subservice provider, that the compliance control objectives included in the written description include only those objectives that the service provider's controls are intended to achieve. Reporting guidance for situations in which the service provider excludes the subservice provider's compliance control objectives and related controls from the service provider's written description is presented in paragraph .33 of this SOP.

.18 As noted in paragraph .13, ordinarily in the examination engagement described in this SOP, the relevant aspects of a service provider's internal control pertaining to its control environment, risk assessment, and monitoring would not be presented in the form of compliance control objectives; however, management of the service provider is not precluded from presenting those aspects in the form of compliance control objectives.

Evaluating Deficiencies in Controls

.19 Criteria are defined in AT-C section 105 as the benchmarks used to measure or evaluate the subject matter. In this SOP, the criteria used by the practitioner to evaluate the suitability of the design and operating effectiveness of the controls included in management's description are the specified compliance control objectives. The practitioner should evaluate the results of the procedures the practitioner performed to obtain sufficient appropriate evidence about the suitability of the design and operating effectiveness of the controls and determine the significance of any identified deficiencies in controls, individually and in combination, to the achievement of the specified compliance

control objectives. A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if it operates as designed, the control objective would not be met. A deficiency in operation exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or qualifications to perform the control effectively. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.20 The following are examples of factors that are relevant in evaluating the significance of identified deficiencies in controls:

- The existence of other effective controls that have been tested and evaluated and limit the severity of the deficiency
- The significance of the control(s) to achieving the compliance control objective
- The existence of multiple deficiencies in controls that, in combination, may be significant to the achievement of a compliance control objective, even if the deficiencies are individually insignificant to the achievement of the compliance control objective

The practitioner may conclude that the specified compliance control objective has been achieved even if a deficiency or deficiencies in controls have been identified. However, if, after performing the practitioner's procedures, the practitioner concludes that the specified compliance control objective was not achieved, the practitioner should modify the practitioner's report. See paragraph .31 of this SOP for related reporting guidance. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

User Organizations Affected by a Service Provider's Noncompliance With Federal Securities Laws or Elements Thereof

.21 In the course of performing procedures at a service provider, a practitioner may become aware of a matter or matters constituting noncompliance with federal securities laws or elements thereof (including material compliance matters) that occurred during the period covered by the practitioner's report and relate to business activities or services included in the scope of the attestation engagement. Unless the instance(s) of noncompliance are clearly inconsequential, the practitioner should obtain an understanding of

- the nature of the noncompliance matter(s),
- the cause(s) of such,
- the period during which the noncompliance matter(s) existed or occurred, and
- the nature of any remediation activities taken to subsequently achieve compliance or the status of any remediation activities the service provider plans to take to achieve compliance.

.22 Further, the practitioner should determine whether information about the noncompliance matter(s) has been communicated to affected user organizations. If management of the service provider has not communicated this information and is unwilling to do so, and the practitioner believes the nature of the noncompliance matter(s) could be significant to user organizations, the

practitioner should inform management and those charged with governance of the service provider of the circumstances. If management and those charged with governance of the service provider do not respond in an appropriate manner, the practitioner should consider withdrawing from the engagement. The practitioner generally is not required to confirm with the user organizations that the service provider has communicated such information. If the user organizations have been notified in writing, the practitioner may request a copy from the service provider of the written communication. In all cases, judgment should be used by the practitioner in considering the effect, if any, of all information obtained about the noncompliance matter(s) on (a) the written assertion provided by management of the service provider regarding the suitability of the design and operating effectiveness of controls in achieving the specified compliance control objectives; and (b) the practitioner's procedures and report. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Management Assertion

.23 An assertion is defined in AT-C section 105 as any declaration or set of declarations about whether the subject matter is in accordance with (or based on) the criteria. For the examination engagement described in this SOP, the practitioner should obtain a written assertion from management of the service provider regarding the suitability of the design and operating effectiveness of the service provider's controls in achieving the specified compliance control objectives. Appendix A-3 (paragraph .42) of this SOP contains an illustrative management assertion. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.24 Management's assertion regarding the suitability of the design and operating effectiveness of the controls should specify the "as of" date and period covered by management's assertion. The determination of an appropriate period is at the discretion of management; however, to be useful to user organizations, the assertion and related practitioner's report ordinarily covers a minimum reporting period of six months. The following are examples of factors that are relevant in establishing the reporting period:

- The anticipated needs of users of the report
- The degree and frequency of changes in the service provider's controls related to the specified compliance control objectives
- The period needed to provide sufficient and appropriate evidence regarding the operating effectiveness of the controls

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Written Representations

[.25] [Paragraph deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.26 The practitioner should request from the responsible party¹³ written representations in the form of a letter addressed to the practitioner. In accordance with paragraph .50 of AT-C section 205, the representations should

¹³ In this SOP, the responsible party is usually management of the service provider. [Footnote added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

- a. include the responsible party's assertion about the subject matter based on the criteria.
- b. state that all relevant matters are reflected in the measurement or evaluation of the subject matter or assertion.
- c. state that management has disclosed to the practitioner all known matters contradicting the assertion and any communication from regulatory agencies or others related to the service provider's compliance, or internal control over compliance, with federal securities laws or elements thereof during the period covered by the practitioner's report (or assertion about these matters) that may affect one or more user organizations, including communications received between the end of the period addressed in the written assertion and the date of the practitioner's report.
- d. acknowledge responsibility for
 - i. the subject matter of the examination engagement and its written assertion about the subject matter; namely, the suitability of the design and operating effectiveness of the controls in achieving the specified compliance control objectives.
 - ii. selecting the criteria used and determining the appropriateness of such criteria for its purposes, including selecting and presenting compliance control objectives that are relevant to the services provided to user organizations and their internal control over compliance with federal securities laws or elements thereof (practitioners may wish to include in the representation letter the definition of the term federal securities laws or elements thereof found in footnotes 2 and 3 of this SOP).
 - iii. its description of specified compliance control objectives and related controls.
 - iv. establishing and maintaining compliance and effective internal control over compliance with federal securities laws or elements thereof as they relate to the scope of the examination engagement, including establishing and maintaining controls that are suitably designed and operating effectively to achieve the specified compliance control objectives.
- e. state that any known events subsequent to the period of the subject matter being reported on that would have a material effect on the subject matter or assertion have been disclosed to the practitioner.
- f. state that management has provided the practitioner with all relevant information and access.
- g. if applicable, state that management believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the subject matter.
- h. if applicable, state that significant assumptions used in making any material estimates are reasonable
- i. state that management has disclosed to the practitioner
 - i. all deficiencies in internal control relevant to the engagement of which the responsible party is aware in the design or operation of the service provider's internal control

- over compliance with federal securities laws or elements thereof, related to the scope of the attestation engagement, that existed during the period covered by the practitioner's report, including those for which management believes the cost of corrective action may exceed the benefits.
- ii. its knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter.
- j. address other matters as the practitioner deems appropriate, such as statements that
- i. management has disclosed to the practitioner any significant changes in the service provider's controls related to the scope of the attestation engagement made since the service provider's last examination.
 - ii. management has disclosed to the practitioner any instances of which it is aware of the service provider's noncompliance with federal securities laws or elements thereof, related to the scope of the attestation engagement, that existed during the period covered by the practitioner's report and that may affect one or more user organizations.
 - iii. management has disclosed to the practitioner all instances of which it is aware when the service provider's controls have not operated with sufficient effectiveness during the period covered by the practitioner's report to achieve the specified compliance control objectives.
 - iv. management has responded fully to all inquiries made by the practitioner during the engagement.

[Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Engaging Party Is the Responsible Party

.27 When the engaging party is the responsible party and one or more of the requested written representations is not provided, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, paragraph .55 of AT-C section 205 states that the practitioner should

- a. discuss the matter with the appropriate party;
- b. reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general; and
- c. if any of the matters are not resolved to the practitioner's satisfaction, take appropriate action.

Paragraph .A64 of AT-C section 205 states that in the situation discussed in paragraph .55 of AT-C section 205, the refusal to furnish such evidence in the form of written representations constitutes a limitation on the scope of an examination sufficient to preclude an unmodified opinion and may be sufficient to cause the practitioner to withdraw from the engagement. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature. Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Engaging Party Is Not the Responsible Party

.28 When the engaging party is not management, and management refuses to provide the representations in paragraph .50 of AT-C section 205 in writing, paragraph .51 of AT-C section 205 states that the practitioner should make inquiries of management about, and seek oral responses to, the matters in paragraph .50. If the practitioner receives satisfactory oral responses to the practitioner's inquiries sufficient to enable the practitioner to conclude that the practitioner has sufficient appropriate evidence to form an opinion about the subject matter, the practitioner's report should contain a separate paragraph that restricts the use of the report to the engaging party. If one or more of the requested representations are provided neither in writing nor orally from management, a scope limitation exists, and the practitioner should determine the effect on the report or the practitioner should withdraw from the engagement. [Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.29 Paragraph .52 of AT-C section 205 indicates that when the engaging party is not management, the practitioner should request the written representations in paragraph .52 of AT-C section 205 from the engaging party in the form of a letter addressed to the practitioner. The representations requested from the engaging party are in addition to the representations requested from management. [Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Reporting

.30 Appendix A-1 (paragraph .40) of this SOP contains an illustrative practitioner's examination report on an assertion by management of a service provider regarding specified compliance control objectives and related controls. The illustrative report includes the required elements of a practitioner's unmodified report listed in paragraphs .63–.64 of AT-C section 205. The exhibit, "Illustrative Practitioner's Examination Reports," of AT-C section 205 presents additional illustrative examination reports. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.31 Paragraph .19 of this SOP notes that criteria are the standards or benchmarks against which a practitioner evaluates the subject matter, and in this SOP, the criteria for evaluating the suitability of the design and operating effectiveness of the controls are the specified compliance control objectives. If, after performing the procedures described in paragraphs .12–.13 and .19–.22 of this SOP, the practitioner concludes that the controls were not suitably designed or operating with sufficient effectiveness to provide reasonable assurance that the specified compliance control objectives were achieved, the practitioner should modify the practitioner's report and include a separate paragraph that provides a description of the matter(s) giving rise to the modification. The matter or matters pertaining to the suitability of the design or operating effectiveness of controls and giving rise to a qualified or adverse opinion in a report on the examination engagement described in this SOP should be referred to as a deficiency or deficiencies. Further, paragraph .79 of AT-C section 205 states, in part, that "...if the practitioner has concluded that conditions exist that, individually or in combination, result in one or more material misstatements based on the criteria, the practitioner should modify the opinion and express a qualified or adverse opinion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement." Appendix B (paragraph .44) of this SOP contains an illustrative practitioner's examination report

containing a qualified opinion on a service provider's controls in achieving the specified compliance control objectives. In that illustrative report, the practitioner reports on the subject matter rather than on the assertion. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.32 Paragraph .68 of AT-C section 205 states that the practitioner should modify the opinion when either of the following circumstances exist and, in the practitioner's professional judgment, the effect of the matter is or may be material:

- a. The practitioner is unable to obtain sufficient appropriate evidence to conclude that the subject matter is in accordance with (or based on) the criteria, in all material respects.
- b. The practitioner concludes, based on evidence obtained, that the subject matter is not in accordance with (or based on) the criteria, in all material respects.

Paragraphs .69–.84 and .A103–.A113 of AT-C section 205 further address this topic. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.33 If a subservice provider's compliance control objectives and related controls are excluded from the service provider's written description of specified compliance control objectives and related controls (see paragraph .17 of this SOP), the scope paragraph of the practitioner's report should be modified to

- refer to the disclosure in the written description regarding the service provider's use of a subservice provider and the functions and nature of the services performed by the subservice provider.
- state that the subservice provider's compliance control objectives and related controls are omitted from the written description and that the practitioner's examination did not extend to controls of the subservice provider.

Appendix A-2 (paragraph .41) of this SOP contains an illustrative practitioner's examination report on a service provider's specified compliance control objectives and related controls when the service provider uses a subservice provider and the subservice provider's control objectives and related controls are excluded from the description. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.34 As noted in paragraph .17, situations may arise in which the service provider specifies compliance control objectives whose achievement depends on controls at a subservice provider. In those circumstances, if the service provider has excluded the subservice provider's controls from the written description, the practitioner should modify the scope and opinion paragraphs of the practitioner's report to include the phrase "and subservice providers applied the controls contemplated in the design of the service provider's controls." [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.35 A practitioner may perform significant portions of the engagement before the end of the period covered by the report. If during that time the practitioner identifies compliance control objectives that have not been achieved, the practitioner should include a description of the condition in the practitioner's report, even if management corrects the condition prior to the end of the period. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Agreed-Upon Procedures

.36 A practitioner may also perform agreed-upon procedures related to compliance control objectives and related controls. Such engagements are performed in accordance with AT-C section 215, *Agreed-Upon Procedures Engagements*. In these engagements, the practitioner performs specific procedures on subject matter and reports the findings without providing an opinion or conclusion. Because they best understand their own needs, the engaging party is required to agree to the procedures and acknowledge that the procedures performed are appropriate for the intended purpose of the engagement prior to issuance of the practitioner's agreed-upon procedures report. In an agreed-upon procedures engagement, the practitioner does not perform an examination or review engagement on the subject matter and does not provide an opinion or conclusion about the subject matter. The practitioner's report on agreed-upon procedures is in the form of procedures and findings. An illustrative agreed-upon procedures report is presented in appendix E (paragraph .47) of this SOP. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18; Paragraph revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.37 In accordance with paragraph .14 of AT-C section 215, a practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. Paragraph .15 of AT-C section 215 further address agreeing on the terms of an agreed-upon procedures engagement. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18; Paragraph revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.38] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Effective Date

.39 This SOP is effective upon issuance. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix A-1 — Illustrative Practitioner's Examination Report on a Service Provider's Assertion Regarding Specified Compliance Control Objectives and Related Controls

Note: The compliance control objectives and related controls referenced in the following illustrative practitioner's report are examples only and should not be viewed as representative of or a complete description of the compliance control objectives or related controls a service provider might be expected to (1) establish and implement to meet any contractual responsibilities to funds or any other clients, (2) monitor for investment compliance, or (3) include in its description of specified compliance control objectives and related controls in an examination engagement covered by this Statement of Position (SOP). Additionally, there may be other areas of responsibility (beyond investment compliance) that a service provider might assume on behalf of funds or any other clients that might result in the inclusion and presentation of different or additional compliance control objectives and related controls for engagements covered by this SOP.

Report of Independent Accountants

To the Management of XYZ Service Provider:

[Introductory paragraph]

We have examined the assertion made by the management of XYZ Service Provider pertaining to controls over investment compliance that XYZ Service Provider performs for user organizations. Management's assertion is included in the accompanying document titled, "Management's Assertion Regarding XYZ Service Provider's Specified Compliance Control Objectives and Related Controls" and states that:

- The controls described in the accompanying document titled, "XYZ Service Provider's Description of Specified Compliance Control Objectives and Related Controls" (management's description), were suitably designed as of December 31, 20X1 to provide reasonable assurance that the compliance control objectives established by management and described therein would be achieved, if those controls were complied with satisfactorily *[and user organizations applied the controls contemplated in the design of XYZ Service Provider's controls]*;¹ and
- The controls described in management's description were operating with sufficient effectiveness to provide reasonable assurance that the specified compliance control objectives described therein were achieved during the period from January 1, 20X1 to December 31, 20X1.

Management of XYZ Service Provider is responsible for its assertion. Our responsibility is to express an opinion on management's assertion based on our examination.

[Scope paragraph]

¹ Refer to user controls only in situations in which the application of controls by the user organizations is necessary to achieve specified control objectives. Otherwise omit this reference.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We were not engaged to perform and did not perform an examination of XYZ Service Provider's or user organizations' compliance or internal control over compliance with Federal Securities Laws, as that term is defined by Securities and Exchange Commission (SEC) Rule 38a-1 under the Investment Company Act of 1940 ("Federal Securities Laws"). We also were not engaged to perform and did not perform an examination of XYZ Service Provider's compliance with its contractual obligations to its clients during the period from January 1, 20X1 to December 31, 20X1.

Our examination was limited to examining, for the purposes described above, management's assertion about the specified compliance control objectives and related controls included in management's description and did not consider any other compliance control objectives or controls that may be relevant to XYZ Service Provider's or user organizations' compliance or internal control over compliance with Federal Securities Laws. Further, the relative effectiveness and significance of specific controls at XYZ Service Provider, and their effect on user organizations' compliance or internal control over compliance with Federal Securities Laws are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of such controls or such other factors at individual user organizations.

The compliance control objectives and related controls set forth in management's description have been provided to enable user organizations, when performing their annual compliance reviews as required by SEC Rule 38a-1 under the Investment Company Act of 1940, to consider such information along with information about their own compliance or internal control over compliance with Federal Securities Laws, and any other relevant information.

[Inherent limitations paragraph]

Management's description is as of December 31, 20X1. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the system or controls in existence. The potential effectiveness of controls in achieving the specified compliance control objectives established by XYZ Service Provider is subject to inherent limitations and, accordingly, lack of compliance with controls and instances of errors or fraud may occur and not be detected. Furthermore, the projection of any evaluations, based on our findings, to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with such controls may deteriorate, or changes made to the system or controls, or the failure to make needed changes to the system or controls, may alter the validity of such evaluations.

[Opinion paragraph]

In our opinion, management's assertion that

- the controls described in the accompanying document titled, "XYZ Service Provider's Description of Specified Compliance Control

Objectives and Related Controls" (management's description), were suitably designed as of December 31, 20X1 to provide reasonable assurance that the compliance control objectives established by management and described therein would be achieved, if those controls were complied with satisfactorily [*and user organizations applied the controls contemplated in the design of XYZ Service Provider's controls*];² and

- the controls described in management's description were operating with sufficient effectiveness to provide reasonable assurance that the specified compliance control objectives described therein were achieved during the period from January 1, 20X1 to December 31, 20X1

is fairly stated, in all material respects.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

² Refer to user controls only in situations in which the application of controls by the user organizations is necessary to achieve specified control objectives. Otherwise omit this reference.

Appendix A-2 — Illustrative Practitioner's Examination Report on a Service Provider's Assertion Regarding Specified Compliance Control Objectives and Related Controls When the Service Provider Uses a Subservice Provider and the Subservice Provider's Control Objectives and Related Controls are Excluded From the Description and the Scope of the Practitioner's Engagement

Note: The compliance control objectives and related controls referenced in the following illustrative practitioner's report are examples only and should not be viewed as representative of or a complete description of the compliance control objectives or related controls a service provider might be expected to (1) establish and implement to meet any contractual responsibilities to funds or any other clients (2) monitor for investment compliance, or (3) include in its description of specified compliance control objectives and related controls in an examination engagement covered by this Statement of Position (SOP). Additionally, there may be other areas of responsibility (beyond investment compliance) that a service provider might assume on behalf of funds or any other clients that might result in the inclusion and presentation of different or additional compliance control objectives and related controls for engagements covered by this SOP.

Report of Independent Accountants

To the Management of XYZ Service Provider:

[Introductory paragraph]

We have examined the assertion made by the management of XYZ Service Provider pertaining to controls over investment compliance that XYZ Service Provider performs for user organizations. Management's assertion is included in the accompanying document titled, "Management's Assertion Regarding XYZ Service Provider's Specified Compliance Control Objectives and Related Controls" and states that:

- The controls described in the accompanying document, "XYZ Service Provider's Description of Specified Compliance Control Objectives and Related Controls" (management's description), were suitably designed as of December 31, 20X1 to provide reasonable assurance that the compliance control objectives established by management and described therein would be achieved, if those controls were complied with satisfactorily *[and user organizations applied the controls contemplated in the design of XYZ Service Provider's controls]*.¹
- The controls described in management's description were operating with sufficient effectiveness to provide reasonable assurance

¹ Refer to user controls only in situations in which the application of controls by the user organizations is necessary to achieve the specified control objectives. Otherwise omit this reference. Also, if the application of controls by the subservice provider is necessary to achieve the specified compliance control objectives, and the subservice provider's controls are excluded from the description, the practitioner's report should be modified to include the phrase, "and the subservice provider applied the controls contemplated in the design of XYZ Service Provider's controls."

that the specified compliance control objectives described therein were achieved during the period from January 1, 20X1 to December 31, 20X1.

As stated in management's description, XYZ Service Provider uses a computer processing service provider for all of its computerized application processing. Management's description includes only those compliance control objectives and related controls of XYZ Service Provider, and does not include compliance control objectives and related controls of the computer processing service provider. Our examination did not extend to controls of the computer processing service provider.

Management of XYZ Service Provider is responsible for its assertion. Our responsibility is to express an opinion on management's assertion based on our examination.

[Scope paragraph]

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedure to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We were not engaged to perform and did not perform an examination of XYZ Service Provider's or user organizations' compliance or internal control over compliance with Federal Securities Laws, as that term is defined by Securities and Exchange Commission (SEC) Rule 38a-1 under the Investment Company Act of 1940 ("Federal Securities Laws"). We also were not engaged to perform and did not perform an examination of XYZ Service Provider's compliance with its contractual obligations to its clients during the period from January 1, 20X1 to December 31, 20X1.

Our examination was limited to examining, for the purposes described above, management's assertion about the specified compliance control objectives and related controls included in management's description and did not consider any other compliance control objectives or controls that may be relevant to XYZ Service Provider's or user organizations' compliance or internal control over compliance with Federal Securities Laws. Further, the relative effectiveness and significance of specific controls at XYZ Service Provider, and their effect on user organizations' compliance or internal control over compliance with Federal Securities Laws are dependent on their interaction with the controls and other factors present at individual user organizations and at subservice providers. We have performed no procedures to evaluate the effectiveness of such controls or such other factors at individual user organizations or at subservice providers.

The compliance control objectives and related controls set forth in management's description have been provided to enable user organizations, when performing their annual compliance reviews as required by SEC Rule 38a-1 under the Investment Company Act of 1940, to consider such information along with information about their own compliance or internal control over compliance with Federal Securities Laws, and any other relevant information.

[Inherent limitations paragraph]

Management's description is as of December 31, 20X1. Any projection of such information to the future is subject to the risk that, because of change, the

description may no longer portray the system or controls in existence. The potential effectiveness of controls in achieving the specified compliance control objectives established by XYZ Service Provider is subject to inherent limitations and, accordingly, lack of compliance with controls and instances of errors or fraud may occur and not be detected. Furthermore, the projection of any evaluations, based on our findings, to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with such controls may deteriorate, or changes made to the system or controls, or the failure to make needed changes to the system or controls, may alter the validity of such evaluations.

[Opinion paragraph]

In our opinion, management's assertion that:

- the controls described in the accompanying document, "XYZ Service Provider's Description of Specified Compliance Control Objectives and Related Controls" (management's description), were suitably designed as of December 31, 20X1 to provide reasonable assurance that the compliance control objectives established by management and described therein would be achieved, if those controls were complied with satisfactorily *[and user organizations applied the controls contemplated in the design of XYZ Service Provider's controls]*.²
- the controls described in management's description were operating with sufficient effectiveness to provide reasonable assurance that the specified compliance control objectives described therein were achieved during the period from January 1, 20X1 to December 31, 20X1

is fairly stated, in all material respects.

[Restricted use paragraph]

This report is intended solely for the information and use of chief compliance officers, management, boards of directors, and the independent auditors of XYZ Service Provider and of the entities that use the services of XYZ Service Provider, and is not intended to be and should not be used by anyone other than these specified parties.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

² Refer to user controls only in situations in which the application of controls by the user organizations is necessary to achieve the specified control objectives. Otherwise omit this reference. Also, if the application of controls by the subservice provider is necessary to achieve the specified compliance control objectives, and the subservice provider's controls are excluded from the description, the practitioner's report should be modified to include the phrase, "and the subservice provider applied the controls contemplated in the design of XYZ Service Provider's controls."

Appendix A-3 — Illustrative Management Assertion Regarding a Service Provider’s Specified Compliance Control Objectives and Related Controls

Management's Assertion Regarding XYZ Service Provider's Specified Compliance Control Objectives and Related Controls

XYZ Service Provider provides certain investment compliance services to funds (user organizations). XYZ Service Provider's description of specified compliance control objectives and related controls is presented in the accompanying document, "XYZ Service Provider's Description of Specified Compliance Control Objectives and Related Controls" (management's description). We, as members of management of XYZ Service Provider, are responsible for the description as well as for the suitability of the design and operating effectiveness of those controls.

Management's description is provided to enable user organizations, when performing their annual compliance review as required by Securities and Exchange Commission (SEC) Rule 38a-1 under the Investment Company Act of 1940, to consider such information, along with information about their own compliance and internal control over compliance with Federal Securities Laws, as that term is defined in Rule 38a-1, and any other relevant information. We have evaluated the suitability of the design and operating effectiveness of these controls in achieving the compliance control objectives included in management's description during the period from January 1, 20X1 through December 31, 20X1. The criteria against which the controls were evaluated are the specified compliance control objectives included in management's description. Based on our evaluation, we assert that:

- The controls included in management's description were suitably designed as of December 31, 20X1 to provide reasonable assurance that the compliance control objectives described therein would be achieved, if those controls were complied with satisfactorily *[and user organizations applied the controls contemplated in the design of XYZ Service Provider's controls]*.¹
- The controls set forth in management's description were operating with sufficient effectiveness to provide reasonable assurance that the specified compliance control objectives, included in management's description, were achieved during the period from January 1, 20X1 to December 31, 20X1.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

¹ Refer to user controls only in situations in which the application of controls by the user organizations is necessary to achieve the specified control objectives. Otherwise omit the reference. Also, if the application of controls by a subservice provider is necessary to achieve the specified compliance control objectives, and the subservice provider's controls are excluded from the description, the practitioner's report should be modified to include the phrase, "and the subservice provider applied the controls contemplated in the design of XYZ Service Provider's controls."

Appendix A-4 — Illustrative Service Provider's Description of Specified Compliance Control Objectives and Related Controls

XYZ Service Provider's Description of Specified Compliance Control Objectives and Related Controls

Note: The following is an illustration of a description of investment compliance control objectives and related controls for an investment adviser (XYZ Service Provider) performing investment compliance-related services for funds.¹ This illustration is presented solely to provide an example of control objectives and related controls pertaining to investment-compliance related services and should not be viewed as representative of or a complete set of compliance control objectives or related controls that a service provider might be expected to (1) perform in these circumstances or similar circumstances, (2) establish and implement to meet any contractual responsibilities to funds or any other clients, or (3) include in its written description of specified compliance control objectives and related controls in an examination engagement covered by this Statement of Position (SOP). Additionally, there may be other areas of responsibility (beyond investment compliance) that a service provider might assume on behalf of funds or any other clients that might result in the inclusion and presentation of different or additional compliance control objectives and related controls for engagements covered by this SOP.

Monitoring Compliance with Fund Investment Guidelines and Restrictions

[XYZ Service Provider uses a computer processing service provider for all of its computerized application processing.² The accompanying description includes only those compliance control objectives and related controls of XYZ Service Provider, and does not include compliance control objectives and related controls of the computer processing service provider.]

Control Objective 1: Controls provide reasonable assurance that securities trades for the fund and the fund's securities holdings comply with investment guidelines and restrictions included in the fund's investment advisory agreement, prospectus, and statement of additional information.

Controls:

1. Before any securities trading commences for a fund (a) XYZ Service Provider's trading desk representative enters information (coding) in the fund's securities trading order entry and compliance (STOEC) module to reflect all investment guidelines and restrictions included in the documents identified in Control Objective 1, and (b) a supervisor in XYZ Service Provider's fund services department compares, for completeness and accuracy, the

¹ In this illustration, the investment adviser performs investment compliance-related services in addition to investment advisory services for funds. In other situations, investment compliance-related services may be performed, in whole or in part, by one or more other service providers or subservice providers.

² If the service provider uses a subservice provider, management's description should include a brief statement of the functions and nature of the services performed by the subservice provider. In addition, the description should indicate whether the subservice provider's compliance control objectives and related controls are included in or excluded from the description. See paragraphs .16–.17 of the Statement of Position for additional information about the information to be included in this disclosure.

information (coding) entered in the fund's STOEC module to the corresponding information included in the source documents referred to in Control Objective 1. Any discrepancies that appear to be the result of data entry errors (for example, entering the number 50% when the prospectus states 5%) are corrected upon identification by XYZ Service Provider. Any other discrepancies related to differences in interpretation or uncertainty about the meaning of information in the source documents, are communicated to the fund's treasurer or chief compliance officer for research, clarification, and resolution. Any subsequent changes to the original information (coding) entered by XYZ Service Provider must be approved by the fund's treasurer or chief compliance officer.

2. On a daily basis, a report of all deletions, modifications, and additions made to investment guidelines and restrictions in the fund's STOEC module is reviewed by a supervisor in XYZ Service Provider's fund services department. The supervisor compares each change made to a written authorization to effect the change submitted by the fund's treasurer or chief compliance officer.
3. Annually, a supervisor in XYZ Service Provider's fund services department compares, for completeness and accuracy, the current information (coding) in each fund's STOEC module to the corresponding source documents referred to in the Control Objective.
4. For all securities trades for which the functionality of a fund's STOEC module identifies an apparent or possible noncompliant securities trade order, the order is 'pending' until the fund's treasurer or chief compliance officer reviews the circumstances of the requested trade and determines whether it is permissible. If permissible, the 'pending' trade is released for processing upon written approval by either the fund's treasurer or chief compliance officer. If not permissible, the trade is cancelled. On the basis prescribed in the fund's compliance policies and procedures (daily, weekly, monthly, or quarterly), members of the compliance staff of XYZ Service Provider review reports generated by the STOEC module to ascertain that no violations of the fund's investment guidelines and restrictions have occurred. Any violations are researched, and XYZ Service Provider's compliance staff ascertains that corrective actions were approved by the fund's treasurer or chief compliance officer, and effected.

Control Objective 2: Controls provide reasonable assurance that the dollar-weighted average portfolio maturities (WAPM) of money market funds do not exceed 90 days, as required by Securities and Exchange Commission (SEC) Rule 2a-7.

Controls:

1. For each new security purchased, a trade department analyst at XYZ Service Provider compares the terms entered in the trade system to the corresponding information in the documentation of the security purchase, including the date used for the WAPM calculation (for example, interest-rate reset date or maturity date).
2. On a quarterly basis, XYZ Service Provider's compliance staff verifies that the computation logic in its securities accounting system

(SAS), which affects the calculation of the funds' WAPM, is consistent with applicable provisions of SEC Rule 2a-7 and regulatory guidance issued.

3. On a daily basis, using reports and information produced by the SAS, XYZ Service Provider's compliance staff determines whether any of the funds' WAPM exceeds 75 days. If so, the compliance staff alerts the portfolio manager so that this information can be taken into account by the portfolio manager when making prospective investment management decisions for the fund. If a fund's WAPM exceeds 80 days, the compliance staff also alerts the fund's treasurer.
4. On a daily basis, using reports and information produced by the SAS, XYZ Service Provider's compliance staff identifies changes of 3 days or more in any fund's WAPM from the fund's prior day WAPM, and researches the fund's investing activities sufficiently to identify the reason for the change and whether there is a reasonable basis for the change. The results of the research are documented and provided to a compliance department manager for his or her written review and approval.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix B — Illustrative Practitioner's Examination Report Containing a Qualified Opinion on the Suitability of the Design and Operating Effectiveness of a Service Provider's Controls in Achieving Specified Compliance Control Objectives

Paragraph .79 of AT-C section 205 states, "If the practitioner has concluded that conditions exist that, individually or in combination, result in one or more material misstatements, based on the criteria, the practitioner should modify the opinion and express a qualified or adverse opinion directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement." The following illustrative practitioner's report relates to an examination engagement in which the practitioner identified a control deficiency in the operating effectiveness of the service provider's controls; accordingly, the practitioner reports on the subject matter, rather than on the assertion. Also, in a separate paragraph, the practitioner describes the matters giving rise to the modification. In this engagement, the practitioner has concluded that the deficiency in controls is not sufficiently pervasive to warrant an adverse opinion.

Report of Independent Accountants

To the Management of ABC Service Provider:

[Introductory paragraph]

We have examined whether the controls described in the accompanying document, "ABC Service Provider's Description of Specified Compliance Control Objectives and Related Controls" (management's description), were:

- suitably designed, as of December 31, 20X1, to provide reasonable assurance that the specified compliance control objectives established by management of ABC Service Provider and described therein would be achieved, if those controls were complied with satisfactorily; *[and user organizations applied the controls contemplated in the design of ABC Service Provider's controls];*¹ and
- operating with sufficient effectiveness to provide reasonable assurance that the specified compliance control objectives described therein were achieved during the period from January 1, 20X1 to December 31, 20X1. (Collectively referred to as the subject matter and criteria.)

Management of ABC Service Provider is responsible for the suitability of the design and operating effectiveness of these controls in achieving the specified compliance control objectives. Our responsibility is to express an opinion whether the subject matter is in accordance with the criteria, based on our examination.

[Scope paragraph]

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those

¹ Refer to user controls only in situations in which the application of controls by the user organizations is necessary to achieve the specified control objectives. Otherwise omit this reference.

standards require that we plan and perform the examination to obtain reasonable assurance about whether the subject matter is in accordance with the criteria, in all material respects. An examination involves performing procedures to obtain evidence about the subject matter. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the subject matter, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We were not engaged to perform and did not perform an examination of ABC Service Provider's or user organizations' compliance or internal control over compliance with Federal Securities Laws, as that term is defined by Securities and Exchange Commission (SEC) Rule 38a-1, under the Investment Company Act of 1940 ("Federal Securities Laws"). We also were not engaged to perform and did not perform an examination of ABC Service Provider's compliance with its contractual obligations to its clients during the period from January 1, 20X1 to December 31, 20X1.

Our examination was limited to examining, for the purposes described above, the suitability of the design and operating effectiveness of the controls in achieving the specified compliance control objectives included in management's description and did not consider any other compliance control objectives or controls that may be relevant to ABC Service Provider's or user organizations' compliance or internal control over compliance with Federal Securities Laws. Further, the relative effectiveness and significance of specific controls at ABC Service Provider, and their effect on user organizations' compliance or internal control over compliance with Federal Securities Laws are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of such controls or such other factors at individual user organizations.

The compliance control objectives and related controls set forth in management's description have been provided to enable user organizations, when performing their annual compliance reviews as required by SEC Rule 38a-1 under the Investment Company Act of 1940, to consider such information along with information about their own compliance or internal control over compliance with Federal Securities Laws, and any other relevant information.

[Inherent limitations paragraph]

Management's description is as of December 31, 20X1. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the system or controls in existence. The potential effectiveness of controls in achieving the specified compliance control objectives established by ABC Service Provider is subject to inherent limitations and, accordingly, lack of compliance with controls and instances of errors or fraud may occur and not be detected. Furthermore, the projection of any evaluations, based on our findings, to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with such controls may deteriorate, or changes made to the system or controls, or the failure to make needed changes to the system or controls, may alter the validity of such evaluations.

[Explanatory paragraph]

Management of ABC Service Provider has included in its description a control requiring that the manager of the advertising and sales department review and approve performance data used in ABC Service Provider's advertising and sales literature prior to its release to the public. Our tests of operating effectiveness noted that the manager of the advertising and sales department did

not review and approve the aforementioned performance data prior to its release to the public. The manager's failure to perform this control is a deficiency in the operating effectiveness of the service provider's controls that resulted in the nonachievement of the compliance control objective included in management's description: "Performance data used in advertising and sales literature are accurate and approved before release to the public."

[Opinion paragraph]

In our opinion, in all material respects, ABC Service Provider's controls were suitably designed at December 31, 20X1 to provide reasonable assurance that the specified compliance control objectives as described in management's description, would be achieved, if those controls were complied with satisfactorily *[and user organizations applied the controls contemplated in the design of ABC Service Provider's controls]*.² Also, in our opinion, except for the deficiency described in the preceding paragraph, ABC Service Provider's controls were operating with sufficient effectiveness to provide reasonable assurance that the specified compliance control objectives were achieved during the period from January 1, 20X1 through December 31, 20X1, in all material respects.³

[Restricted use paragraph]

This report is intended solely for the information and use of chief compliance officers, management, boards of directors, and the independent auditors of ABC Service Provider and of the entities that use the services of ABC Service Provider, and is not intended to be and should not be used by anyone other than these specified parties.

[Practitioner's signature]

[Practitioner's city and state]

[Date of practitioner's report]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

² Refer to user controls only in situations in which the application of controls by the user organizations is necessary to achieve the specified control objectives. Otherwise omit this reference.

³ In instances in which a control is not suitably designed, the phrase "except for the deficiency described in the preceding paragraph" would be inserted in the first sentence of the opinion paragraph, which relates to the suitability of the design of controls.

Appendix C — Additional Illustrative Compliance Control Objectives

Note: The following are additional illustrative compliance control objectives pertaining to various services service providers might provide. These illustrative compliance control objectives are only examples and should not be viewed as representative of or a complete set or description of compliance control objectives that a service provider might be expected to (1) establish and implement to meet any contractual responsibilities to funds or any other clients, (2) monitor for achievement, or (3) include in its description of specified compliance control objectives and related controls in an attestation engagement covered by this Statement of Position (SOP). Additionally, there may be other areas of responsibility (beyond those listed below) that a service provider might assume on behalf of funds or any other clients that might result in the inclusion and presentation of different or additional compliance control objectives and related controls for engagements covered by this SOP.

Fund Advertising and Sales Literature

Controls provide reasonable assurance that:

1. Advertising and sales literature is reviewed for compliance with the service provider's established policies and is timely submitted to the National Association of Securities Dealers (NASD) for approval
2. Comments from the NASD on advertising and sales literature are reviewed and timely reflected in advertising and sales literature as required
3. Performance data used in advertising and sales literature are accurate and approved before release
4. Expiring advertisement and sales literature is identified and updated or disposed of before the expiration date
5. Regulatory changes are monitored and reflected in current and future advertising and sales literature

Valuation of Client Assets or Investments

Controls provide reasonable assurance that:

1. Securities price information is received from authorized sources in accordance with client instructions and is entered completely and accurately into the portfolio accounting system
2. Foreign exchange rates are received from authorized sources in accordance with client instructions and are entered completely and accurately into the portfolio accounting system
3. Securities that do not have readily determinable market values (for example, those valued at fair value in good faith), including international equity securities whose values are determined by adjusting the closing price on the foreign securities exchange, are valued according to consistently applied policies and procedures established by the service provider's client
4. For registered money-market-fund securities valued at amortized cost, valuation is monitored for compliance with the "mark-to-market" provision of Securities and Exchange Commission (SEC)

Rule 2a-7 and deviations in excess of established thresholds are reported in accordance with client instructions

Privacy

Controls provide reasonable assurance that:

1. The use of and access to nonpublic client information is restricted to authorized personnel
2. Customers of the fund are provided with a notice of privacy policies at the time they become a customer and in the event of a change to the privacy policy
3. Access to and use of material nonpublic information is restricted to authorized personnel
4. At least annually, employees are provided with written policies related to material nonpublic information and instruction about those policies
5. Customer information is disclosed only to authorized third parties

Transfer Agency

Controls provide reasonable assurance that:

1. As required by policies and procedures, the identity of any person seeking to open an account with the fund is verified by examining specified documents and other information and maintaining records of the information used to verify the person's identity
2. Cash equivalents under \$10,000 are monitored and tracked for a rolling 12-month period; Internal Revenue Service (IRS) Form 8300 is filed, and the shareholder is notified as required by the IRS
3. Certificate redemption requests are processed in a timely manner and archived in a secure manner for subsequent inquiry
4. Missing, lost, stolen, or counterfeit certificate notifications are processed in a timely manner, and Form X-17F-1A is filed with the Securities Information Center within the required number of business days
5. Transfer agent employees are fingerprinted and the related records are maintained for the required time period
6. Shareholder financial-related transactions are priced using the appropriate net asset value per share
7. Dividends are processed completely and accurately; dividend distributions are reconciled between the fund's general ledger and the shareholder accounting system; and any exceptions are researched and resolved by the next reporting period
8. Signature guarantees pertaining to shareholder transactions are reviewed upon presentment; rejected signature guarantees are communicated to the compliance department for tracking

Investment Compliance

Controls provide reasonable assurance that on a weekly basis:

1. Securities holdings are monitored for compliance with prospectus guidelines
2. Securities holdings are monitored to ensure that the portfolio meets a 15 percent liquidity standard

3. Securities of money market funds are monitored for compliance with the portfolio maturity and credit quality provisions of SEC Rules 2a-7c.2 and 2a-7c.3, respectively

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix D — Matters Identified in Securities and Exchange Commission Release Nos. IC-26299 and IA-2204 Adopting Rules 38a-1 and 206(4)-7 Pertaining to Compliance Policies and Procedures of Funds and Investment Advisers

As described in paragraph .15 of this Statement of Position (SOP), when management of the service provider establishes the compliance control objectives and related controls that are the subject of the engagement, it should consider, among other things, the compliance matters identified in Securities and Exchange Commission (SEC) Release Nos. IC-26299 and IA-2204 adopting Rule 38a-1 under the Investment Company Act of 1940 and Rule 206(4)-7 under the Investment Advisers Act of 1940, respectively. The SEC Release indicates that the SEC expects the policies and procedures of funds and their advisers to, at a minimum, address the following specified areas if those areas are relevant to the services the entity provides:

- Portfolio management processes, including allocation of investment opportunities among clients, and consistency of portfolios with clients' investment objectives, disclosures by the adviser, and applicable regulatory restrictions
- Trading practices, including procedures by which the adviser satisfies its best execution obligation, uses client brokerage to obtain research and other services (soft dollar arrangements), and allocates aggregated trades among clients
- Proprietary trading of the adviser and personal trading activities of supervised persons
- Accuracy of disclosures made to investors, clients, and regulators, including account statements and advertisements
- Safeguarding of client assets from conversion or inappropriate use by advisory personnel
- Accurate creation of required records and their maintenance in a manner that secures them from unauthorized alteration or use and protects them from untimely destruction
- Marketing advisory services, including the use of solicitors
- Processes to value client holdings and assess fees based on those valuations
- Safeguards for the privacy protection of client records and information
- Business continuity plans

Additional matters that the SEC expects funds (or their service providers) to address are listed in paragraph .02. This SOP does not require that a service provider's compliance control objectives address all of the relevant areas identified in the SEC Release; however, the areas listed in this paragraph and in paragraph .02 comprise matters that, if relevant in the circumstances, should be considered by management of the service provider in determining

compliance control objectives to be included in the scope of the attestation engagement.

The following is a summary of the additional areas, identified in the SEC Release, for which a fund or its service providers would be expected to have policies and procedures.

Pricing of portfolio securities and fund shares. The Investment Company Act of 1940 requires funds to sell and redeem their shares at prices based on their current net asset value, to pay redemption proceeds promptly, and, when market quotations are readily available, to calculate net asset values using the market value of the portfolio securities. If a market quotation is not readily available, the fund should use the fair value of the security, as determined in good faith by the fund's board. Further, Rule 38a-1 requires funds to adopt policies and procedures requiring the fund to monitor for circumstances that may necessitate the use of fair value prices, establish criteria for determining when market quotations are no longer reliable for a particular portfolio security, provide a methodology or methodologies by which the fund determines the current fair value of the portfolio security, and regularly review the appropriateness and accuracy of the method used in valuing securities and make any necessary adjustments.

Processing of fund shares. Pursuant to SEC rules, an investor submitting a purchase order or redemption request must receive the price next calculated after receipt of the purchase order or redemption request. A fund must have procedures in place that segregate investor orders received before the fund prices its shares (which will receive that day's price) from those that were received after the fund prices its shares (which will receive the following day's price). Rule 38a-1 requires funds to approve and periodically review the policies and procedures of transfer agents. Funds should also take affirmative steps to protect themselves and their shareholders against late trading by obtaining assurances that those policies and procedures are effectively administered.

Identification of affiliated persons. To prevent self-dealing and overreaching by persons in a position to take advantage of the fund, the Investment Company Act of 1940 prohibits funds from entering into certain transactions with affiliated persons. Funds should have policies and procedures in place to identify these persons and to prevent unlawful transactions with them.

Protection of nonpublic information. The federal securities laws prohibit insider trading, and section 204A of the Investment Advisers Act of 1940 requires investment advisers (including advisers to funds) to establish, maintain, and enforce policies and procedures designed to prevent the adviser or any of its associated persons from misusing material, nonpublic information. Fund advisers should incorporate their section 204A policies into the policies required by Rule 38a-1. A fund's compliance policies and procedures should also address other potential misuses of nonpublic information, including the disclosure to third parties of material information about the fund's portfolio, its trading strategies or pending transactions, and the purchase or sale of fund shares by advisory personnel based on material, nonpublic information about the fund's portfolio.

Compliance with fund governance requirements. Fund boards are responsible for, among other things, approving the fund's advisory contracts, underwriting agreements, and distribution plans. The Investment Company Act of 1940 requires that fund boards be elected by fund shareholders and that a certain percentage of the board be "independent directors." To rely on many of the SEC's exemptive rules, independent directors must constitute a majority of the board, must be selected and nominated by other independent directors, and, if they hire legal counsel, must hire independent legal counsel. A fund's policies and procedures should be designed to guard against, among other things, an improperly constituted board, the failure of the board to properly consider matters

entrusted to it, and the failure of the board to request and consider information required by the Investment Company Act of 1940 from the fund adviser and other service providers.

Market timing. Under Rule 38a-1, a fund must have procedures reasonably designed to ensure compliance with its disclosed policies regarding market timing. Market timing is the excessive short-term trading of mutual fund shares that may be harmful to the fund. These procedures should provide for monitoring of shareholder trades or flows of money in and out of the funds in order to detect market timing activity, and for consistent enforcement of the fund's policies regarding market timing. If the fund permits any waivers of those policies, the procedures should be reasonably designed to prevent waivers that would harm the fund or its shareholders or subordinate the interests of the fund or its shareholders to those of the adviser or any other affiliated person or associated person of the adviser. Fund boards are strongly urged by the SEC to require fund advisers, or other persons authorized to waive market timing policies, to report to the board at least quarterly all waivers granted so that the board can determine whether the waivers were proper. Many funds' prospectuses already disclose market timing policies, and failure to adhere to those disclosed policies violates the antifraud provisions of the federal securities laws. Moreover, a fund adviser who waives or disregards those policies for the benefit of itself or a third party has breached its fiduciary responsibilities to the fund.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix E — Illustrative Practitioner's Agreed-Upon Procedures Report

The following is an illustrative agreed-upon procedures report for procedures performed at a service provider.

Independent Accountant's Report on Applying Agreed-Upon Procedures

To the Management of XYZ Service Provider:

We have performed the procedures enumerated in Attachment X which address XYZ Service Provider's internal control over compliance during the year ended December 31, 20X1. Management of XYZ Service Provider is responsible for maintaining effective internal control over compliance with federal securities laws, regulations, and related SEC rules.

XYZ Service Provider's management has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of assisting users in determining whether the entity maintained effective internal control over compliance with federal securities laws, regulations, and related SEC rules. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures performed and the findings are included in Attachment X.

We were engaged by XYZ Service Provider's management to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on internal control over compliance by XYZ Service Provider for the year ended December 31, 20X1. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of XYZ Service Provider and to meet our other ethical responsibilities, in accordance with relevant ethical requirements related to our agreed-upon procedures engagement.

[Additional paragraphs may be added to describe other matters.]

This report is intended solely for the information and use of XYZ Service Provider and is not intended to be and should not be used by anyone other than this specified party.^[1]

AUD Section 45

Statement of Position 12-1 — Reporting Pursuant to the 2010 Edition of the Global Investment Performance Standards

October 2012

NOTE

This Statement of Position (SOP) has been developed by the AICPA's Investment Performance Standards Task Force to provide guidance regarding the application of Statements on Standards for Attestation Engagements (SSAEs) to engagements to report pursuant to Global Investment Performance Standards.

This SOP is an interpretive publication as defined in AT-C section 105, *Concepts Common to All Attest Engagements*. Interpretive publications are recommendations on the application of SSAEs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the AICPA Auditing Standards Board (ASB) after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSAEs. The members of the ASB have found this SOP to be consistent with existing SSAEs.

Although interpretive publications are not attestation standards, AT-C section 105 requires the practitioner to consider applicable interpretive publications in planning and performing the attestation engagement because interpretive publications are relevant to the proper application of the attestation standards in specific circumstances. If a practitioner does not apply the attestation guidance included in this SOP, the practitioner should be prepared to explain how he or she complied with the SSAE provisions addressed by this SOP.

Introduction and Background

.01 To promote fair representation, full disclosure, and greater comparability of investment performance, the CFA Institute developed the Global Investment Performance Standards (GIPS® standards).¹ Although compliance with the GIPS standards is voluntary, an investment management firm's claim of compliance with the GIPS standards gives current and potential clients more confidence in the integrity of the performance presentations and the general practices of a compliant firm.

¹ For information on the appropriate use of the Global Investment Performance Standards registered trademark, see the CFA Institute website at www.cfainstitute.org.

.02 All references to the GIPS standards in this Statement of Position (SOP) refer to the 2010 edition of the GIPS standards. The GIPS standards specify that they include any updates, guidance statements, interpretations, questions and answers, and clarifications published by the CFA Institute and the GIPS Executive Committee, all of which are available at www.gipsstandards.org, as well as in the *GIPS Handbook*.

.03 The GIPS standards recommend that investment management firms obtain independent third-party verification. *Verification* is a process in which an independent third party, referred to as a verifier, assesses whether (a) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis, and (b) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification is intended to provide a firm and its existing and prospective clients with greater confidence in the firm's claim of compliance with the GIPS standards. Verification does not provide absolute assurance that a firm is in compliance with the GIPS standards.

.04 In addition to verification, a firm may choose to have a verifier perform a specifically focused performance examination of any of the firm's composites and their associated compliant presentations. A *compliant presentation* is defined as a presentation for a composite that contains all the information required by the GIPS standards and that may also include additional or supplemental information. The GIPS standards permit a report on the performance examination of a composite and its associated compliant presentation to be issued only if a verification report has also been issued.

.05 A verifier may or may not be a CPA. A CPA in public practice hired to perform a verification or performance examination is referred to in this SOP as a practitioner. [Revised, January 2015, to reflect conforming changes necessary due to the issuance of the revised AICPA Code of Professional Conduct, effective December 15, 2014.]

Scope

.06 This SOP provides guidance to practitioners for engagements to examine and report on aspects of a firm's claim of compliance with the GIPS standards (a verification). It also provides guidance on engagements to examine and report on any of the firm's composites and their associated compliant presentations (a performance examination). Practitioners are required to perform such engagements pursuant to AT-C section 205, *Examination Engagements*. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.07 Although a verification consists of examining aspects of a firm's compliance with the GIPS standards and the design of certain policies and procedures, a verification is not a compliance attestation engagement, as governed by AT-C section 315, *Compliance Attestation*, or an internal controls attestation engagement as governed by AT-C section 320, *Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.08 This SOP supersedes SOP 06-1, *Reporting Pursuant to the Global Investment Performance Standards*. This SOP also supersedes paragraphs 11.37.42 of chapter 11, "Independent Auditor's Reports and Client Representations," of the AICPA Audit and Accounting Guide *Investment Companies* (as of May 1, 2012).

Overview of the GIPS Standards

Compliance With the GIPS Standards

.09 The GIPS standards establish both requirements and recommendations for firms to follow when calculating and presenting investment performance. Adherence to the recommendations of the GIPS standards is encouraged. The GIPS standards use the term *must* to indicate requirements and the term *should* to indicate recommendations. The attestation standards established by the AICPA use the terms *must*, *is required*, or *should* to indicate requirements and *may* to indicate recommendations. To avoid confusion, this SOP uses the terms *is required* or *must* to indicate requirements of AT-C sections 105 and 205 and of the GIPS standards. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.10 The GIPS standards require an entity to define itself as a firm. For a firm to claim compliance with the GIPS standards, the firm must meet all the requirements of the GIPS standards on a firmwide basis. Firms are prohibited from claiming compliance "except for ..." or making any other statements that may indicate partial compliance with the GIPS standards.

.11 The GIPS standards provide *suitable criteria*, as defined in AT-C section 105, for verifications and performance examinations. The criteria are available to *users* as they are posted to www.gipsstandards.org. The GIPS standards require verifiers to use the criteria set forth therein. Consequently, practitioners who perform a verification or performance examination pursuant to the GIPS standards are required to understand the GIPS standards, including interpretative guidance. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.12 Practitioners are required to be independent of the firm, in accordance with the AICPA Code of Professional Conduct and the *GIPS Guidance Statement on Verifier Independence*.

Verification

.13 A verification tests whether the

- a. firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis.
- b. firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards.

The GIPS standards specify procedures that practitioners are required to perform for a verification, as well as recommendations and guidance (see chapter IV of the GIPS standards, the *GIPS Guidance Statement on Verification*, and the *GIPS Guidance Statement on Verifier Independence*).

.14 According to the GIPS standards, when a firm has obtained a verification report, the firm may state that it is verified. This statement may or may not be accompanied by a presentation of performance history for a specific composite. A verification, however, does not imply that the verifiers have examined the accuracy of the performance results of any specific composite presentation that may accompany the verification report (see paragraph .43).

Performance Examination

.15 In addition to a verification, a firm may choose to have a verifier conduct a performance examination. The GIPS standards specify procedures that

practitioners are required to perform for a performance examination and also include recommendations and guidance (see the *GIPS Guidance Statement on Performance Examinations*). A verification is required to be performed prior to, or concurrent with, any performance examination. A firm is not permitted to state that a particular composite and its associated compliant presentation have been independently examined with respect to the GIPS standards unless the firm has also obtained a firmwide verification report covering the periods of the performance examination. Firms cannot state that a particular composite and its associated compliant presentation have been GIPS verified or make any claim to that effect.

Verification and Performance Examination Engagements

Engagement Objectives

.16 Practitioners are required to conduct verifications and performance examinations in accordance with attestation standards established by the AICPA. In addition, the GIPS standards specify that these engagements must be conducted in accordance with the procedures required in the GIPS standards. This SOP is not intended to provide all the required and recommended procedures set forth in the GIPS standards or all the applicable attestation standards established by the AICPA.

.17 For a verification, the practitioner's objective is to express an opinion on whether, in all material respects, the

- a. firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis.
- b. firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards.

.18 For a performance examination of a specific composite, the practitioner's objective is to express an opinion on whether, in all material respects, the firm has

- a. constructed the composite and calculated the composite performance in compliance with the GIPS standards.
- b. prepared and presented the composite presentation in compliance with the GIPS standards.

A firm that has met the requirements of the GIPS standards with regard to a specific composite presentation is considered to have prepared and presented that composite presentation in compliance with the GIPS standards.

Requesting a Written Assertion

.19 Paragraph .10 of AT-C section 205 requires the practitioner to request from the responsible party a written assertion about the measurement or evaluation of the subject matter against the criteria. When the engaging party is the responsible party and refuses to provide a written assertion, paragraph .82 of AT-C section 205 requires the practitioner to withdraw from the engagement when withdrawal is possible under applicable law or regulation. When the engaging party is not the responsible party, and the responsible party refuses to provide a written assertion, the practitioner need not withdraw from the engagement. In that case, paragraph .84 of AT-C section 205 requires the practitioner to disclose that refusal in the practitioner's report and restrict the

use of the report to the engaging party. [Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Planning the Engagement

.20 Paragraph .11 of AT-C section 205 requires the practitioner to establish an overall strategy that sets the scope, timing, and direction of the engagement and guides the development of the engagement plan. To develop such a strategy, practitioners need to have sufficient knowledge to enable them to adequately understand the events, transactions, and practices that, in their judgment, have a significant effect on the subject matter or assertion. Such knowledge includes a sufficient understanding of the investment management industry and the GIPS standards, AICPA interpretive guidance, and applicable laws and regulations regarding the calculation and presentation of investment performance. The GIPS standards also address qualifications for verifiers. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Agreeing on the Terms of the Engagement

.21 The practitioner is required to agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement is required to be specified in sufficient detail in an engagement letter or other suitable form of written agreement and is required to include the following:

- a. The objective and scope of the engagement
- b. The responsibilities of the practitioner
- c. A statement that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants
- d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different
- e. A statement about the inherent limitations of an examination
- f. Identification of the criteria for the measurement, evaluation, or disclosure of the subject matter
- g. An acknowledgement that the engaging party agrees to provide the practitioner with a representation letter at the conclusion of the engagement

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.22 See appendix A, "Example Engagement Letter—Verification and Performance Examination," of this SOP for an example engagement letter. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.23 The terms of the engagement may include a statement that if the engaging party intends to use the practitioner's report(s) or refer to the practitioner in connection with any sales or advertising literature, the engaging party will provide a draft of such literature to the practitioner for the practitioner's review and comment prior to issuance. See appendix A of this SOP for an example of an engagement letter. [Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Obtaining Sufficient Appropriate Evidence

.24 [Paragraph renumbered and deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.25 [Paragraph renumbered and deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.26 To obtain reasonable assurance, the practitioner is required to obtain sufficient appropriate evidence to reduce attestation risk² to an acceptably low level and thereby enable the practitioner to draw reasonable conclusions on which to base the practitioner's opinion. Paragraphs .A49.A52 of AT-C section 205 discuss the attributes of sufficient appropriate evidence. [Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.27 As noted previously, the GIPS standards specify procedures that practitioners are required to perform for a verification and performance examination of one or more specific composites and their associated compliant presentations, as well as recommendations and guidance (see chapter IV of the GIPS standards, the *GIPS Guidance Statement on Verification*, the *GIPS Guidance Statement on Performance Examinations*, and the *GIPS Guidance Statement on Verifier Independence*). A practitioner may perform other procedures in addition to those specified in the GIPS standards. Regardless of the scope of the engagement, the practitioner is required to obtain sufficient evidence to provide a reasonable basis for the opinion expressed in the report. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.28 The GIPS standards permit the use of a sampling methodology when performing verification or performance examination procedures. The practitioner may find it helpful to consider the guidance in the AICPA Audit Guide *Audit Sampling* when performing procedures that involve the use of sampling. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.29 The GIPS standards specify that a verifier must understand the firm's policies and procedures for establishing and maintaining compliance with all the applicable requirements and adopted recommendations of the GIPS standards, evaluate whether all applicable policies are properly included and adequately documented, and then test the firm's compliance with the established policies and procedures. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.30 When a performance examination of one or more composites and their associated presentations is conducted subsequent to, not concurrent with, a verification, the practitioner is required to update the practitioner's understanding of the firm's policies and procedures and inquire about any other changes that may affect the planning and conduct of the performance examination. In addition, the practitioner is required to follow the preperformance examination procedures required by the GIPS standards. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.31 The GIPS standards require that firms initially claiming compliance with the GIPS standards report, at a minimum, 5 years of investment performance for each composite presented (or performance since inception of the

² See paragraph .10 of AT-C section 105, *Concepts Common to All Attestation Engagements*, for the definition of *attestation risk*. [Footnote added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

composite or firm if the period since inception is less than 5 years). After the initial presentation of GIPS-compliant performance, the firm must add an additional year of performance until the firm presents a 10-year GIPS-compliant performance record. Thereafter, at a minimum, a 10-year GIPS-compliant performance record must be presented. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.32 The initial minimum period for which verifications can be performed is one year of the firm's presented performance or from firm inception date to period-end if less than one year. Subsequent verifications may cover any additional time periods, with annual updates being common and quarterly updates also performed. After the initial verification or performance examination is complete, it is industry practice to append subsequent verification or performance examination periods to the initial period. For example, if an initial performance examination was completed on a firm from January 1, 2006, to December 31, 2010, the following year's performance examination period would cover from January 1, 2006, to December 31, 2011. Documentation for each annual engagement is required to indicate the procedures performed supporting the consideration of prior period opinions. Such procedures may include inquiries and evaluation of the implication of the findings of current year's procedures for prior periods. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.33 During a verification or performance examination, the practitioner is required to consider information about subsequent events and subsequently discovered facts that come to his or her attention. Such subsequent events and subsequently discovered facts include circumstances and events that affect prior period-compliant presentations. Errors in prior period-compliant presentations would be assessed in accordance with the firm's error correction policies. If a correction is required by the firm's error correction policy, and the firm does not correct the error, the practitioner is required to consider the implications for the performance examination and, if applicable, the related verification. If the firm corrects, or has corrected, a prior period-compliant presentation, the practitioner would perform appropriate testing of material revisions to previously reported information, including disclosures, regarding the changes and would consider the implications on the practitioner's ability to issue his or her report (see paragraph .38). [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Representation Letter

.34 Paragraph .50 of AT-C section 205 requires the practitioner to request from the responsible party³ written representations in the form of a letter addressed to the practitioner. The representations should

- a. include the responsible party's assertion about the subject matter based on the criteria.
- b. state that all relevant matters are reflected in the measurement or evaluation of the subject matter or assertion.
- c. state that all known matters contradicting the subject matter or assertion and any communication from regulatory agencies or

³ In this Statement of Position, the responsible party is usually management of the service provider. [Footnote added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

others affecting the subject matter or assertion have been disclosed to the practitioner, including communications received between the end of the period addressed in the written assertion and the date of the practitioner's report.

- d. acknowledge responsibility for
 - i. the subject matter and the assertion;
 - ii. selecting the criteria, when applicable; and
 - iii. determining that such criteria are appropriate for the responsible party's purposes.
- e. state that any known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter or assertion have been disclosed to the practitioner.
- f. state that it has provided the practitioner with all relevant information and access.
- g. if applicable, state that the responsible party believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the subject matter.
- h. if applicable, state that significant assumptions used in making any material estimates are reasonable.
- i. state that the responsible party has disclosed to the practitioner
 - i. all deficiencies in internal control relevant to the engagement of which the responsible party is aware;
 - ii. its knowledge of any actual, suspected, or alleged fraud or noncompliance with laws or regulations affecting the subject matter; and
 - iii. other matters as the practitioner deems appropriate.

As noted in paragraph .34, the GIPS standards include a listing of required representations, as well as a listing of other representations that are typically included, for both verifications and performance examinations. [Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.35 The GIPS standards also specify that the verifier must obtain a representation letter from the firm before issuing an opinion on a verification or performance examination. The representations for a verification and performance examination(s) can be included in one letter. Appropriate parties to sign the representation letter are responsible persons with an appropriate level of authority (for example, chief executive officer, chief financial officer, chief compliance officer, or chief investment officer). [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.36 The GIPS standards include a listing of required representations, as well as a listing of other representations that are typically included, for both verifications and performance examinations. The GIPS standards require that the representation letter include, among other representations, confirmation that policies and procedures used in establishing and maintaining compliance with the GIPS standards are as described in the firm's policies and procedures documents and have been consistently applied throughout the period(s). The representation letter must also include confirmation that the firm complies with the GIPS standards for the period(s) and any other relevant representations made to the practitioner during the engagement. Because the practitioner is concerned with events occurring up to the date of the practitioner's report, the written representations are dated as of the date of the practitioner's report.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.37 Appendix B, "Example Representation Letter," of this SOP contains an example representation letter that includes required and recommended management representations. Management's refusal to furnish all appropriate written representations constitutes noncompliance with the GIPS standards that would preclude the practitioner from rendering an opinion (see paragraph .38). [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Reporting

.38 The GIPS standards do not permit the issuance of a report with a qualified or an adverse opinion or a disclaimer of opinion for either a verification or performance examination. After conducting the procedures for a verification or performance examination, the practitioner may conclude that

- a. the records of the firm cannot support a verification or performance examination, or
- b. the firm is not in compliance with the GIPS standards, including situations in which the composite presentation does not comply with the GIPS standards.

In such situations, the GIPS standards specify that the practitioner must issue a statement to the firm clarifying why it was not possible to issue a verification or performance examination report. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.39 When a performance examination report cannot be issued, the GIPS standards require the practitioner and firm to consider the impact of the practitioner's inability to provide the performance examination report on the investment management firm's claim of compliance with the GIPS standards. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.40 AT-C section 105 permits the practitioner to report either on the assertion or directly on the subject matter to which the assertion relates. According to AT-C section 205, if the practitioner is reporting on management's assertion, the assertion should be bound with or accompany the practitioner's report, or the assertion should be clearly stated in the report. The illustrative reports in appendix C, "Illustrative Attest Report: Verification (Reporting Directly on the Subject Matter)," and appendix D, "Illustrative Attest Reports: Verification and Performance Examination (Reporting Directly on the Subject Matter)," of this SOP present examples of reporting directly on the subject matter because that is industry practice. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.41 Paragraph .63 of AT-C section 205 requires, in part, that the practitioner's report include (a) an identification or description of the subject matter or assertion being reported on, including the point in time or period of time to which the measurement or evaluation of the subject matter or assertion relates, and (b) a description of the nature of an examination engagement. Accordingly, for engagements covered by this SOP, the practitioner is required to clearly indicate in the report whether a verification, performance examination, or both have been performed. The GIPS standards also require that the report state the period(s) covered. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.42 Appendix C of this SOP presents an illustrative report for a verification. Appendix D of this SOP presents illustrative reports for a verification and performance examination. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.43 The GIPS standards require that the verification report include a statement indicating that verification does not ensure the accuracy of any specific composite presentation (see the verification report in appendix C of this SOP). This disclaimer of opinion is an acknowledgement of the fact that the practitioner cannot control whether the verification report may accompany a composite presentation distributed by the firm, even though no performance examination was conducted. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.44 The GIPS standards specify that the compliant presentation for the specified composite(s) that is (are) the subject of a performance examination report must be included in, or attached to, the performance examination report. The practitioner may request that the firm's composite presentation for an examined composite disclose that publically available benchmark returns have not been examined by the practitioner to avoid the implication that the practitioner is providing assurance on the development of the benchmark. The practitioner also should add a paragraph to a performance examination report disclaiming an opinion on composite presentations included or attached for any periods that were not examined by the practitioner or stating that the report does not relate to any composite presentations other than those identified in the report. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.45 When a firm has changed verifiers, and prior periods presented were subject to verification or performance examination by another verifier, the firm may request that the practitioner refer to all verified or examined periods in the practitioner's report. A practitioner may decide to refer to the report(s) of a predecessor verifier. The successor practitioner would consider the appropriateness of referring to reports on verifications or performance examinations conducted by other verifiers in the specific circumstances. If the successor practitioner decides to refer to the report(s) of the predecessor verifier, the report would be modified appropriately. Appendix E, "Illustrative Attest Report: Successor Practitioner Report—Verification and Performance Examination," of this SOP contains an example of a successor practitioner's report referring to the predecessor verifier's performance examination report. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Other Information

.46 If prior to or after the release of the practitioner's performance examination report on a composite compliant presentation or presentations, the practitioner is willing to permit the inclusion of the practitioner's performance examination report in a document containing the composite compliant presentation or presentations and other information, the practitioner should read the other information to identify material inconsistencies, if any, with the composite compliant presentation or presentations, management's assertion, or with the report. If upon reading the other information, in the practitioner's professional judgment

- a. a material inconsistency between that other information and the composite compliant presentation or presentations, management's assertion, or the report exists, or

- b. a material misstatement of fact exists in the other information, the composite compliant presentation or presentations, management's assertion, or the report,

the practitioner should discuss the matter with the firm and take further action as appropriate. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

.47 Further actions that may be appropriate if the practitioner identifies a material inconsistency or becomes aware of a material misstatement of fact include, for example, the following:

- Requesting the firm to consult with a qualified third party, such as the firm's legal counsel
- Obtaining legal advice about the consequences of different courses of action
- If required or permissible, communicating with third parties (for example, a regulator)
- Describing the material inconsistency in the practitioner's report
- Withdrawing from the engagement

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Effective Date

.48 This SOP is effective upon issuance. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix A—Example Engagement Letter—Verification and Performance Examination

The following is an illustration of an example engagement letter that may be used for this kind of engagement.

[Practitioner Letterhead]

[Client's Name and Address]

Dear _____:

This will confirm our understanding of the arrangements for our examination of whether (1) Investment Firm (the Firm) has complied with all the composite construction requirements of the Global Investment Performance Standards (GIPS® standards) on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0, and (2) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0; this is referred to as a verification under the GIPS standards. [When also conducting a performance examination, add: We have also been engaged to conduct an examination (referred to as a performance examination under the GIPS standards) of [specify composites] and their associated compliant presentations for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards.]

Our examination will be conducted in accordance with the attestation standards established by the American Institute of Certified Public Accountants and criteria set forth in the GIPS standards. Our responsibility is to express an opinion on the items described above (the subject matter) based on our examination.

Our examination will involve performing procedures to obtain evidence about the subject matter. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the subject matter, whether due to fraud or error.

The Firm's management is responsible for

- selecting the GIPS standards as the criteria against which we will evaluate its compliance and for determining that the GIPS standards are appropriate criteria for its purposes.
- compliance with all applicable laws, regulations, contracts, and agreements, including the GIPS standards.
- the design, implementation, and monitoring of the policies and procedures upon which compliance is based.
- making available to us all records and related information relevant to your examination.
- providing a signed representation letter at the completion of our examination.¹

¹ The independent practitioner may wish to include in the engagement letter an understanding with the Firm about any limitation or other arrangements regarding liability of the practitioner or Firm.

- providing a written assertion about whether
 - the Firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0
 - the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0
 - the Firm has constructed the XYZ Composite and calculated the XYZ Composite performance for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards; and
 - the Firm has prepared and presented the [refer to accompanying composite compliant presentation] of the Firm's XYZ Composite for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards.

If conditions not now anticipated preclude us from performing our examination procedures and issuing a report, as contemplated by the preceding paragraph, we will advise you promptly and take such action as we deem appropriate.

Working papers that are prepared in connection with this engagement are our property. The working papers are prepared for the purpose of providing principal support for our report(s).

As you are aware, there are inherent limitations in the examination process, including, for example, selective testing and the possibility that collusion or forgery may preclude the detection of material errors, fraud, and illegal acts.

Our fees will be billed as work progresses and are based on the amount of time required at various levels of responsibility plus actual out-of-pocket expenses. Invoices are payable upon presentation. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees. The quoted fees assume that you will provide an accumulation of data for the period to be tested and that the records provided to us are clear, concise, and accurate.

In the event we are requested or authorized by management or required by government regulation, subpoena, or other legal process to produce our documents or personnel as witnesses with respect to our engagement, the Firm will reimburse us for our professional time and expenses, as well as any fees and expenses of our counsel, incurred in responding to such requests.

If the Firm intends to use our report in whole or part or refer to [*name of practitioner*] in connection with any sales or advertising literature, a draft of such literature will be provided to us for review and comment prior to issuance.

Either party may terminate this agreement at will.

If these arrangements are acceptable, please sign one copy of this letter and return it to us. We appreciate the opportunity to serve you.

Very truly yours,

[*Name of Practitioner*]

Accepted and agreed to:

[Client Representative's Signature]

[Title]

[Date]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Appendix B—Example Representation Letter

The following illustrative representation letter includes the representations required by paragraph .50 of AT-C section 205, Examination Engagements, additional representations required by the Global Investment Performance Standards (GIPS® standards), and optional representations ordinarily included in representation letters for the engagement described in this SOP.

[Date]

[Name of Practitioner]

We are providing this letter in connection with your examination of whether (1) Investment Firm (the Firm) has complied with all the composite construction requirements of the Global Investment Performance Standards (GIPS® standards) on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0, and (2) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0. *[When also conducting a performance examination, add: (3) constructed the [specify composite(s)] and calculated the [specify composite(s)] performance for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards; and (4) prepared and presented the compliant presentation(s) for [specify composite(s)] for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards.]*

We confirm, to the best of our knowledge and belief, the following representations made to you during your examination(s):

1. We are responsible for (a) compliance with all the composite construction requirements of the GIPS standards on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0, and (b) the design of the Firm's policies and procedures to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0. We further confirm that we are responsible for the selection of the GIPS standards as the criteria against which you are evaluating our compliance and for determining that the GIPS standards are appropriate criteria for our purposes.
2. We assert to you that (a) we have complied with all the composite construction requirements of the GIPS standards on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0; (b) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0; and (c) the Firm's policies and procedures are as described in the firm's GIPS policies and procedures documents and have been consistently applied for the periods from January 1, 20X1, to December 31, 20Y0.
3. We assert that we are in compliance with the GIPS standards on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0, and we have disclosed all known matters contradicting the assertion and any communications from the CFA Institute or regulatory agencies concerning (a) noncompliance with the GIPS standards or our assertion with regard thereto or (b) noncompliance with any other criteria relevant to investment performance, including communications received from January 1, 20Y1 through the date of this letter.

4. We have *[no knowledge of]* *[disclosed to you all information that we are aware of regarding]* (a) actual, suspected or alleged fraud or noncompliance with laws and regulations involving management or employees who have significant roles in the Firm's policies and procedures relating to compliance with the GIPS standards or (b) actual, suspected or alleged fraud or noncompliance with laws and regulations involving others that could have a material effect on the Firm's compliance with the GIPS standards.
5. We have provided you with all relevant information and access.
6. There are no violations or possible violations of laws or regulations, including the Investment Advisers Act of 1940 *(if applicable)*, whose effects should be considered for disclosure in your report or in the composite compliant presentations.
7. We acknowledge responsibility for maintaining sufficient books and records, as required by the GIPS standards and/or applicable regulatory requirements, and we have maintained such records to comply with those requirements.
8. We have disclosed to you any known events that occurred subsequent to the period being reported on and through the date of this letter that would have a material effect on the outcome of the examination.
9. We have disclosed to you all deficiencies in internal control over the Firm's compliance with the GIPS standards of which we are aware.

When also conducting a performance examination, add:

10. We assert that we have constructed *[specify composite(s)]* and calculated the composite performance for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards; and that *[refer to accompanying composite compliant presentation(s)]* of *[specify composite(s)]* for the periods from January 1, 20X1, to December 31, 20Y0, is prepared and presented in compliance with the GIPS standards.

Appendix C—Illustrative Attest Report: Verification (Reporting Directly on the Subject Matter)

Independent Accountant's Verification Report

Investment Firm
10 Main Street
Anytown, USA

We have examined Investment Firm's (the Firm's) (1) compliance with all the composite construction requirements of the Global Investment Performance Standards (GIPS® standards) on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0, and (2) design of policies and procedures used to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0. The Firm's management is responsible for compliance with the GIPS standards and the design of its policies and procedures used to calculate and present performance in compliance with the GIPS standards. Our responsibility is to express an opinion on the Firm's (1) compliance with the composite construction requirements of the GIPS standards and (2) design of policies and procedures used to calculate and present performance in compliance with the GIPS standards, based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether (1) the Firm complied, in all material respects, with the composite construction requirements of the GIPS standards, and (2) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards, in all material respects. An examination involves performing procedures to obtain evidence about (1) the Firm's compliance with the GIPS standards and (2) the design of its policies and procedures used to calculate and present performance in compliance with the GIPS standards. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks (1) of material noncompliance with the specified requirements, and (2) that the design of the policies and procedures is not suitable for calculating and presenting performance in compliance with the GIPS standards, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Our examination does not provide a legal determination on the Firm's compliance with the specified requirements.

In our opinion, in all material respects

- the Firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0; and
- the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0.

We have not been engaged to examine and did not examine any presentations of the Firm's composites for any period, including any presentations that may

accompany this report, and accordingly, we express no opinion on any such performance.

Appendix D—Illustrative Attest Reports: Verification and Performance Examination (Reporting Directly on the Subject Matter)

Example 1—Verification and Performance Examination Report Independent Accountant's Verification and Performance Examination Report

Investment Firm
10 Main Street
Anytown, USA

We have examined Investment Firm's (the Firm's) (1) compliance with all the composite construction requirements of the Global Investment Performance Standards (GIPS® standards) on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0, and (2) design of policies and procedures used to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0. We have also examined the accompanying [*refer to accompanying composite compliant presentation*] of the Firm's XYZ Composite for the periods from January 1, 20X1, to December 31, 20Y0. The Firm's management is responsible for compliance with the GIPS standards, the design of its policies and procedures used to calculate and present performance in compliance with the GIPS standards, and the [*refer to accompanying composite compliant presentation*]. Our responsibility is to express an opinion on the Firm's (1) compliance with the composite construction requirements of the GIPS standards, (2) design of policies and procedures used to calculate and present performance in compliance with the GIPS standards, and (3) [*refer to accompanying composite compliant presentation*], based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether (1) the Firm complied, in all material respects, with the composite construction requirements of the GIPS standards, (2) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards, in all material respects, and (3) the accompanying [*refer to accompanying composite performance presentation*] of the Firm's [XYZ Composite] for the periods from January 1, 20X1 to December 31, 20Y0 is in compliance with the GIPS standards, in all material respects. An examination involves performing procedures to obtain evidence about (1) the Firm's compliance with the composite construction requirements of the GIPS standards, (2) the design of its policies and procedures used to calculate and present performance in compliance with the GIPS standards, and (3) the accompanying [*refer to accompanying composite compliant presentation*]; and performing the procedures for a verification and a performance examination required by the GIPS standards. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks (1) of material noncompliance with the composite construction requirements of the GIPS standards, (2) that the design of the policies and procedures is not suitable for calculating and presenting performance in compliance with the GIPS standards, and (3) of material misstatement of the accompanying [*refer to accompanying composite compliant presentation*], whether due to fraud

or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Our examination does not provide a legal determination on the Firm's compliance with the specified requirements.

In our opinion, in all material respects,

- the Firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0; and
- the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0.

Also, in our opinion, in all material respects, the Firm has

- constructed the XYZ Composite and calculated the XYZ Composite performance for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards; and
- prepared and presented the *[refer to accompanying composite compliant presentation]* of the Firm's XYZ Composite for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards.

This report does not contain an opinion on accuracy of any composite presentation of the Firm other than the *[refer to accompanying composite compliant presentation]* of the Firm's XYZ Composite for the periods from January 1, 20X1, to December 31, 20Y0.

Investment Firm (the Firm) claims compliance with the Global Investment Performance Standards (GIPS® standards) and has prepared and presented this report in compliance with the GIPS standards. The Firm has been independently verified for the periods from January 1, 20X1, to December 31, 20Y0. The verification report is available upon request. Verification assesses whether

(1) the Firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis, and (2) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Notes:

1. The Firm is a balanced portfolio investment manager that invests solely in U.S. securities. The Firm is defined as an independent investment management firm that is not affiliated with any parent organization. Firm policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
2. The composite includes all institutional balanced portfolios that invest in large-cap U.S. equities and investment-grade bonds with the goal of providing long-term capital growth and steady income from a well-diversified strategy. Although the strategy allows for equity exposure ranging between 50 percent and 70 percent, the typical allocation is between 55 percent and 65 percent. The account minimum for the composite is \$5 million.
3. The custom benchmark is 60 percent YYY U.S. Equity Index and 40 percent ZZZ U.S. Aggregate Bond Index. The benchmark is rebalanced monthly.
4. Valuations are computed and performance reported in U.S. dollars.
5. Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Composite and benchmark returns are presented net of nonreclaimable withholding taxes. Net-of-fees returns are calculated by deducting the highest fee of 0.083 percent from the monthly gross composite return. The management fee schedule is as follows: 1 percent on the first \$25 million and 0.60 percent thereafter.
6. This composite was created in February 20X1. A complete list of composite descriptions is available upon request.
7. Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year.
8. The 3-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 20X1 to 20X9 because monthly composite and benchmark returns were not available and is not required for periods prior to 20Y0.

Example 2—Performance Examination Report With a Reference to a Separate Verification Report

Independent Accountant's Performance Examination Report

Investment Firm
10 Main Street
Anytown, USA

We have examined the accompanying¹ [*refer to accompanying composite compliant presentations*] of Investment Firm's (the Firm's) ABC and XYZ

¹ See example 1A for an illustrative composite-compliant presentation that would accompany the report.

Composites for the periods from January 1, 20X1, to December 31, 20Y0. The Firm's management is responsible for these compliant presentations. Our responsibility is to express an opinion on the *[refer to accompanying composite compliant presentations]* based on our examination.

We previously conducted an examination (also referred to as a verification) of the Firm's (1) compliance with all the composite construction requirements of the Global Investment Performance Standards (GIPS® standards) on a firmwide basis for the periods from January 1, 20X1, to December 31, 20Y0, and (2) design of policies and procedures used to calculate and present performance in compliance with the GIPS standards as of December 31, 20Y0; our report dated August 7, 20Y1, with respect thereto is attached.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the *[refer to accompanying composite compliant presentations]* is in accordance with the GIPS standards, in all material respects. An examination involves performing procedures to obtain evidence about the *[refer to accompanying composite compliant presentations]*. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the *[refer to accompanying composite compliant presentations]* whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

In our opinion, in all material respects, the Firm has

- constructed the Firm's ABC and XYZ Composites and calculated the composite performance for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards; and
- prepared and presented the *[refer to accompanying composite compliant presentations]* of the Firm's ABC and XYZ Composites for the periods from January 1, 20X1, to December 31, 20Y0, in compliance with the GIPS standards.

This report does not attest to the accuracy of any composite presentation of the Firm other than the Firm's ABC and XYZ Composites.

Appendix E—Illustrative Attest Report: Successor Practitioner Report—Verification and Performance Examination

Reporting Directly on the Subject Matter (Verification and Performance Examination Report) in Successor Practitioner's Report When the Predecessor Verifier's Report Is Not Presented

Independent Accountant's Verification and Performance Examination Report

Investment Firm
10 Main Street
Anytown, USA

We have examined Investment Firm's (the Firm's) compliance with the composite construction requirements of the Global Investment Performance Standards (GIPS® standards) on a firmwide basis for the period from January 1, 2011, to December 31, 2011, and (2) design of policies and procedures used to calculate and present performance in compliance with the GIPS standards as of December 31, 2011. We have also examined the accompanying [*refer to accompanying composite compliant presentation*] of the Firm's XYZ Composite for the period from January 1, 2011, to December 31, 2011. The Firm's management is responsible for compliance with the GIPS standards, the design of its policies and procedures used to calculate and present performance in compliance with the GIPS standards, and the [*refer to accompanying composite compliant presentation*]. Our responsibility is to express an opinion on the Firm's (1) compliance with the specified requirements, (2) design of policies and procedures used to calculate and present performance in compliance with the GIPS standards, and (3) [*refer to accompanying composite compliant presentation*] based on our examination. [*Refer to accompanying composite compliant presentation*] of the Firm's XYZ Composite for the periods from January 1, 2002, to December 31, 2010, was examined by other independent verifiers, whose report is dated August 27, 2011.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether (1) the Firm complied, in all material respects, with the GIPS standards, (2) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards, in all material respects, and (3) the accompanying [*refer to accompanying composite performance presentation*] of the Firm's [XYZ Composite] for the periods from January 1, 2011 to December 31, 2011 is in compliance with the GIPS standards, in all material respects. An examination involves performing procedures to obtain evidence about (1) the Firm's compliance with the GIPS standards, (2) the design of its policies and procedures used to calculate and present performance in compliance with the GIPS standards, and (3) the accompanying [*refer to accompanying composite compliant presentation*]; and performing the procedures for a verification and a performance examination required by the GIPS standards. The nature, timing, and extent of the procedures selected depend on

our judgment, including an assessment of the risks of (1) material noncompliance with the GIPS standards, (2) that the design of the policies and procedures is not suitable for calculating and presenting performance in compliance with the GIPS standards, and (3) of material misstatement of the accompanying [*refer to accompanying composite compliant presentation*], whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

In our opinion, in all material respects

- the Firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis for the period from January 1, 2011, to December 31, 2011; and
- the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards as of December 31, 2011.

Also, in our opinion, in all material respects, the Firm has

- constructed the Firm's XYZ Composite and calculated the composite performance for the period from January 1, 2011, to December 31, 2011, in compliance with the GIPS standards; and
- prepared and presented the [*refer to accompanying composite compliant presentation*] of the Firm's XYZ Composite for the period from January 1, 2011, to December 31, 2011, in compliance with the GIPS standards.¹

We have not been engaged to examine and did not examine the Firm's XYZ Composite for any period prior to January 1, 2011, as shown in the accompanying [*refer to the accompanying composite compliant presentation*], and accordingly, we express no opinion on any such performance.

This report does not attest to the accuracy of any composite presentation of the Firm other than the Firm's XYZ Composite.

AUD Section 46

Statement of Position 20-1 — Reporting Pursuant to the 2020 Global Investment Performance Standards

January 2020

NOTE

This Statement of Position (SOP) is an interpretative publication, and it represents the recommendations of the AICPA's Investment Performance Standards Task Force regarding the application of Statements on Standards for Attestation Engagements (SSAEs) to engagements to report pursuant to the Global Investment Performance Standards. The Auditing Standards Board (ASB) has found the recommendations in this SOP to be consistent with existing standards covered by the "Compliance With Standards Rule" (ET sec. 1.310.001) of the AICPA Code of Professional Conduct.

Interpretative publications are not as authoritative as a pronouncement of the ASB; however, if a practitioner does not apply the attestation guidance included in this SOP, the practitioner should be prepared to explain how he or she complied with the SSAE provisions addressed by this SOP.

Introduction and Background

.01 To promote fair representation, full disclosure, and greater comparability of investment performance, CFA Institute developed the Global Investment Performance Standards (GIPS').¹ Although compliance with the GIPS standards is voluntary, an investment management firm's or asset owner's claim of compliance with the GIPS standards may give current and potential clients, beneficiaries, and oversight boards more confidence in the integrity of the performance presentations and the general practices of a compliant firm or asset owner.

.02 All references to the GIPS standards in this Statement of Position (SOP) refer to the 2020 edition of the GIPS standards. As of the publication date of this SOP, there are three chapters of the 2020 edition of the GIPS standards: the GIPS Standards for Firms, the GIPS Standards for Asset Owners, and the GIPS Standards for Verifiers. The GIPS standards specify that they include any guidance statements, interpretations, and questions and answers published by CFA Institute and the GIPS standards governing bodies.

.03 The GIPS standards require an entity to define itself as a *firm* or *asset owner* and to comply with the applicable chapter of the GIPS standards.

¹ For information on the appropriate use of the Global Investment Performance Standards registered trademark, see the CFA Institute website at www.cfainstitute.org.

- The GIPS standards define a *firm* as an investment firm, subsidiary, or division held out to the public as a distinct business entity.
- The GIPS standards define an *asset owner* as an entity that manages investments, directly and/or through the use of external managers, on behalf of participants, beneficiaries, or the organization itself. Asset owners include, but are not limited to, public and private pension funds, endowments, foundations, family offices, provident funds, insurers and reinsurers, sovereign wealth funds, and fiduciaries. The GIPS Standards for Asset Owners apply to asset owners that do not compete for business by marketing investment performance to prospective clients. Firms and asset owners that compete for business by marketing investment performance to prospective clients must follow the GIPS Standards for Firms.

.04 The GIPS standards recommend that investment firms and asset owners obtain independent third-party verification. The GIPS standards define *verification* as a process in which an independent third party, referred to as a *verifier*, assesses whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been (a) designed in compliance with the GIPS standards and (b) implemented on a firm-wide basis. Verification is intended to provide a firm and its existing and prospective clients and pooled fund investors with greater confidence in the firm's claim of compliance with the GIPS standards. Verification does not provide assurance on the firm's claim of compliance with the GIPS standards in its entirety. The GIPS standards do not include verification or performance examination guidance specific to asset owners and require verifiers to interpret references to firms as also referring to asset owners. All references to firms in this SOP also refer to asset owners, unless otherwise specified.

.05 In addition to verification, a firm may choose to have a verifier perform a specifically focused performance examination of any of the firm's composites or pooled funds and their associated GIPS reports. A GIPS Composite Report is defined as a presentation for a composite that contains all the information required by the GIPS standards and may also include recommended information or supplemental information. A GIPS Pooled Fund Report is defined as a presentation for a pooled fund that contains all the information required by the GIPS standards and may also include recommended information or supplemental information. The term *GIPS reports* refers to both GIPS Composite Reports and GIPS Pooled Fund Reports and, for purposes of this SOP, also refers to GIPS Asset Owner Reports. The GIPS standards permit a report on the performance examination of a composite or a pooled fund and its associated GIPS report to be issued only if a verification report has also been issued.

.06 A verifier may or may not be a CPA. A CPA in public practice hired to perform a verification or performance examination is referred to in this SOP as a *practitioner*. Practitioners are required to perform such engagements pursuant to AT-C section 205, *Examination Engagements*. Only CPAs in public practice can issue a practitioner's report in accordance with AT-C section 205.

Scope

.07 This SOP provides guidance to practitioners for engagements to examine and report on aspects of a firm's claim of compliance with the 2020 edition of the GIPS standards (a verification). It also provides guidance on engagements

to examine and report on any of the firm's composites or pooled funds and their associated GIPS reports (a performance examination).

.08 Although a verification consists of examining aspects of a firm's compliance with the GIPS standards and the design and implementation of certain policies and procedures, CFA Institute requires a statement that verification does not provide assurance on the operating effectiveness of the firm's controls or policies and procedures for complying with the GIPS standards. Accordingly, a verification is not a compliance attestation engagement, as governed by AT-C section 315, *Compliance Attestation*, or an internal controls attestation engagement as governed by AT-C section 320, *Reporting on an Examination of Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting*.

Transition From the 2010 Reporting Guidance to 2020 Reporting Guidance

.09 Firms complying with the 2010 edition of the GIPS standards must transition to the reporting requirements of the 2020 edition of the GIPS standards when reporting performance in GIPS reports for periods ending on or after December 31, 2020. Early adoption of the 2020 edition of the GIPS standards is permitted. Practitioners conducting verification or performance examination engagements for firms complying with the 2020 edition of the GIPS standards are required by the GIPS standards to conduct the engagement in accordance with the 2020 edition of the GIPS standards. When conducting engagements for firms reporting under the 2010 edition of the GIPS standards, practitioners are required to conduct their verification and performance examination engagements in accordance with the 2010 edition of the GIPS standards and SOP 12-1, *Reporting Pursuant to the 2010 Edition of the Global Investment Performance Standards* (AUD sec. 45). Prior editions of the GIPS standards may be found online at www.gipsstandards.org or www.cfainstitute.org.

Overview of the GIPS Standards

Compliance With the GIPS Standards

.10 The GIPS standards establish both requirements and recommendations for firms to follow when calculating and presenting investment performance. Adherence to the recommendations of the GIPS standards is encouraged. The GIPS standards use the term *must* to indicate requirements and the term *should* to indicate recommendations. The attestation standards established by the AICPA use the terms *must*, *is required*, or *should* to indicate requirements and *may* to indicate recommendations. To avoid confusion, this SOP uses the terms *is required* or *must* to indicate requirements of AT-C sections 105, *Concepts Common to All Attestation Engagements*, and 205 and of the GIPS standards.

.11 For a firm to claim compliance with the GIPS standards, the firm must meet all the requirements of the GIPS standards on a firm-wide basis. Firms are prohibited from claiming compliance "except for ..." or making any other statements that may indicate partial compliance with the GIPS standards.

.12 The GIPS standards require that, when initially claiming compliance with the GIPS standards,

- firms (excluding asset owners) report, at a minimum, 5 years of investment performance for each composite or pooled fund

presented (or performance since inception of the composite or pooled fund if the period since inception is less than 5 years).

- asset owners report, at a minimum, 1 year of investment performance for each total fund or composite presented (or performance since inception of the total fund or composite if the period since inception is less than 1 year).

After the initial presentation of GIPS-compliant performance, the firm or asset owner must add an additional year of performance until a 10-year GIPS-compliant performance record is presented. Thereafter, at a minimum, a 10-year GIPS-compliant performance record must be presented.

.13 Firms are permitted to retroactively construct the initial five-year historical period (or longer) prior to the firm's initial compliance with the GIPS standards using policies and procedures implemented at the time of initial compliance. In such instances, practitioners performing verifications may opine on the implementation of policies and procedures during historical periods because verifications test that the policies and procedures were implemented "for" that period versus "during" that period.

.14 The GIPS standards provide *suitable criteria*, as defined in AT-C section 105, for verifications and performance examinations. The criteria are available to users as they are posted to www.cfainstitute.org. The GIPS standards require verifiers to use the criteria set forth therein. Consequently, practitioners who perform a verification or performance examination pursuant to the GIPS standards are required to understand the GIPS standards, including interpretative guidance.

.15 Practitioners are required to be independent of the firm, in accordance with the AICPA Code of Professional Conduct and the GIPS Standards *Guidance Statement on Verifier Independence*.

Verification

.16 A *verification* tests whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been

- a. designed in compliance with the GIPS standards, and
- b. implemented on a firm-wide basis.

The GIPS standards specify procedures that practitioners are required to perform for a verification.

.17 According to the GIPS standards, when a firm has obtained a verification report, the firm may state that it is verified. This statement may or may not be accompanied by a presentation of performance history for a specific composite. A verification, however, does not imply that the verifiers have examined the accuracy of the performance results of any specific GIPS report that may accompany the verification report (see paragraph .44).

Performance Examination

.18 In addition to a verification, a firm may choose to have a verifier conduct a performance examination. The GIPS standards specify procedures that verifiers are required to perform for a performance examination. A verification is required to be performed prior to, or concurrent with, any performance examination. A firm is not permitted to state that a particular composite or pooled fund and its associated GIPS report have been independently examined with

respect to the GIPS standards unless the firm has also obtained a firm-wide verification report covering the periods of the performance examination. Firms cannot state that a particular composite or pooled fund and its associated GIPS report have been verified or make any claim to that effect.

Verification and Performance Examination Engagements

Engagement Objectives

.19 Practitioners are required to conduct verifications and performance examinations in accordance with attestation standards established by the AICPA. In addition, the GIPS standards specify that these engagements must be conducted in accordance with required verification or performance examination procedures. This SOP is not intended to provide all the required procedures set forth in the GIPS standards or cover all the requirements in the applicable attestation standards established by the AICPA.

.20 For a verification, the practitioner's objective is to express an opinion on whether, in all material respects, the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been

- a. designed in compliance with the GIPS standards, and
- b. implemented on a firm-wide basis.

.21 For a performance examination of a specific composite, the practitioner's objective is to express an opinion on whether, in all material respects, the firm has

- a. constructed the composite and calculated the composite performance in compliance with the GIPS standards, and
- b. prepared and presented the GIPS Composite Report in compliance with the GIPS standards.

.22 For a performance examination of a specific pooled fund, the practitioner's objective is to express an opinion on whether, in all material respects, the firm has

- a. calculated the pooled fund performance in compliance with the GIPS standards, and
- b. prepared and presented the GIPS Pooled Fund Report in compliance with the GIPS standards.

.23 For a performance examination of a specific asset owner total fund or composite, the practitioner's objective is to express an opinion on whether, in all material respects, the asset owner has

- a. constructed the [*total fund or composite*] and calculated the [*total fund or composite*] performance in compliance with the GIPS standards, and
- b. prepared and presented the GIPS Asset Owner Report in compliance with the GIPS standards.

Agreeing on the Terms of the Engagement

.24 The practitioner is required by both AT-C section 205 and the GIPS standards to agree upon the terms of the engagement with the engaging party.

The agreed-upon terms of the engagement are required to be specified in sufficient detail in an engagement letter or other suitable form of written agreement that is required to include the following:

- a. The objective and scope of the engagement, including the period being verified or examined
- b. The responsibilities of the practitioner
- c. A statement that the engagement will be conducted in accordance with attestation standards established by the AICPA and criteria set forth in the GIPS standards
- d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different
- e. A statement about the inherent limitations of a verification or performance examination
- f. A statement that the GIPS standards are the criteria for the engagement
- g. For a verification engagement, a statement that the verification does not provide assurance on the operating effectiveness of the firm's controls or policies and procedures for complying with the GIPS standards
- h. An acknowledgment that the engaging party agrees to provide the practitioner with a representation letter at the conclusion of the engagement

.25 The terms of the engagement may include a statement that if the engaging party intends to use the practitioner's reports or refer to the practitioner in connection with any sales or advertising literature, the engaging party will provide a draft of such literature to the practitioner for the practitioner's review and comment prior to issuance. See exhibit A, "Example Engagement Letter: Verification and Performance Examination," of this SOP for an example engagement letter.

Requesting a Written Assertion

.26 Paragraph .10 of AT-C section 205 requires the practitioner to request from the responsible party a written assertion about the measurement or evaluation of the subject matter against the criteria. When the engaging party is the responsible party and refuses to provide a written assertion, paragraph .82 of AT-C section 205 requires the practitioner to withdraw from the engagement when withdrawal is possible under applicable law or regulation. When the engaging party is not the responsible party, and the responsible party refuses to provide a written assertion, the practitioner need not withdraw from the engagement. In that case, paragraph .84 of AT-C section 205 requires the practitioner to disclose that refusal in the practitioner's report and restrict the use of the report to the engaging party.

Planning the Engagement

.27 Paragraphs .11–.13 of AT-C section 205 requires the practitioner to establish an overall strategy that sets the scope, timing, and direction of the engagement and guides the development of the engagement plan. To develop such a strategy, practitioners need to have sufficient knowledge to enable them to adequately understand the events, transactions, and practices that, in their judgment, have a significant effect on the subject matter or assertion. Such knowledge includes a sufficient understanding of the investment management

industry and the GIPS standards, AICPA interpretive guidance, and applicable laws and regulations regarding the calculation and presentation of investment performance. The GIPS standards also address qualifications for verifiers.

Obtaining Sufficient Appropriate Evidence

.28 To obtain reasonable assurance, the practitioner is required to obtain sufficient appropriate evidence to reduce attestation risk to an acceptably low level and thereby enable the practitioner to draw reasonable conclusions on which to base the practitioner's opinion. Paragraphs .A49–.A52 of AT-C section 205 discuss the attributes of sufficient appropriate evidence.

.29 As noted previously, the GIPS standards specify procedures that practitioners are required to perform for a verification and performance examination of one or more specific composites or pooled funds and their associated GIPS reports. A practitioner may perform other procedures in addition to those specified in the GIPS standards. Regardless of the scope of the engagement, the practitioner is required to obtain sufficient appropriate evidence to provide a reasonable basis for the opinion expressed in the report.

.30 The GIPS standards permit the use of a sampling methodology when performing verification or performance examination procedures. The practitioner may find it helpful to consider the guidance in AICPA Audit Guide *Audit Sampling* when performing procedures that involve the use of sampling.

.31 The GIPS standards specify that a verifier must

- understand the firm's policies and procedures for establishing and maintaining compliance with all the applicable requirements and adopted recommendations of the GIPS standards,
- evaluate whether all applicable policies are properly included and adequately documented,
- determine that the firm's policies and procedures are suitably designed to enable the firm to comply with the GIPS standards, and
- test the firm's compliance with the established policies and procedures.

.32 When a performance examination of one or more composites or pooled funds and their associated GIPS reports is conducted subsequent to, not concurrent with, a verification, the practitioner is required to update the practitioner's understanding of the firm's policies and procedures and inquire about any other changes that may affect the planning and conduct of the performance examination. In addition, the practitioner is required to follow the performance examination procedures required by the GIPS standards.

.33 The period for which a firm can claim compliance with the GIPS standards can be different from the period for which verifications or performance examinations are conducted. The initial minimum period for which a verification can be performed is one year of the firm's presented performance, or from firm inception date to period-end if less than one year. Subsequent verifications may cover any additional time periods, with annual updates being common, and quarterly updates also performed. After the initial verification or performance examination is complete, it is industry practice to append subsequent verification or performance examination periods to the initial period. For example, if an initial verification was completed on a firm from January 1, 2016 to December 31, 2020, the following year's verification period would cover from January 1, 2016 to December 31, 2021. Documentation for each annual engagement is required to indicate the procedures performed supporting the consideration of

prior-period opinions. Such procedures may include inquiries and evaluation of the implication of the findings of current year's procedures for prior periods.

.34 During a verification or performance examination, the practitioner is required to inquire whether the firm is aware of any events subsequent to the period covered by the examination engagement, and to consider information about subsequent events and subsequently discovered facts that come to his or her attention.² Such subsequent events and subsequently discovered facts include circumstances and events that affect prior-period GIPS reports. Errors in prior-period GIPS reports would be assessed in accordance with the firm's error correction policies. If correction of a GIPS report is required by the firm's error correction policy, and the firm does not correct the error, the practitioner is required to consider the implications for the verification and, if applicable, the related performance examination. If the firm corrects or has corrected a GIPS report, the practitioner would perform appropriate testing of material revisions to previously reported information, including disclosures regarding the changes, and would consider the implications on the practitioner's ability to issue his or her report (see paragraph .39).

Representation Letter

.35 The GIPS standards specify that the verifier must obtain a representation letter from the firm before issuing an opinion on a verification or performance examination. The representations for verification and performance examinations can be included in one letter.

.36 Appropriate parties to sign the representation letter are responsible persons with an appropriate level of authority (for example, CEO, CFO, CIO, chief compliance officer, or head of performance). Because the practitioner is concerned with events occurring up to the date of the practitioner's report, the written representations are dated as of the date of the practitioner's report. Management's refusal to furnish all appropriate written representations constitutes noncompliance with the GIPS standards that would preclude the practitioner from rendering an opinion (see paragraph .39).

.37 Paragraph .50 of AT-C section 205 includes a listing of required representations, as do the GIPS standards for both verifications and performance examinations. The GIPS standards require that the representation letter for a verification include, among other representations, confirmation of the firm's assertion that policies and procedures used in establishing and maintaining compliance with the GIPS standards are (a) as described in the firm's policies and procedures, (b) have been designed in compliance with the GIPS standards, and (c) have been implemented on a firm-wide basis for all periods being verified. The representation letter must also include confirmation of the firm's assertion that the firm complies with the GIPS standards for all periods being verified, and any other relevant representations made to the practitioner during the engagement.

.38 Exhibit B, "Example Representation Letter," of this SOP contains an example representation letter that includes required and recommended management representations.

Reporting

.39 The GIPS standards do not permit the issuance of a report with a qualified or an adverse opinion or a disclaimer of opinion for either a verification or

² Paragraphs .48–.49 of AT-C section 205, *Examination Engagements*.

performance examination. After conducting the procedures for a verification or performance examination, the practitioner may conclude that the firm is not in compliance with the GIPS standards, including situations in which the firm's records cannot support a verification or performance examination. In such situations, the GIPS standards specify that the practitioner must inform the firm why it was not possible to issue a verification or performance examination report.

.40 When a performance examination report cannot be issued, the GIPS standards require the practitioner and firm to consider the effect of the practitioner's inability to provide the performance examination report on the firm's claim of compliance with the GIPS standards. The practitioner's inability to provide the performance examination report may also affect the practitioner's ability to issue a verification report.

.41 AT-C section 105 permits the practitioner to report either on the assertion or directly on the subject matter to which the assertion relates. According to AT-C section 205, if the practitioner is reporting on management's assertion, the assertion should be bound with or accompany the practitioner's report, or the assertion should be clearly stated in the report. Reporting directly on the subject matter is industry practice.

.42 AT-C section 205 requires, in part, that the practitioner's report include (a) an identification or description of the subject matter or assertion being reported on, including the point in time or period of time to which the measurement or evaluation of the subject matter or assertion relates, and (b) a description of the nature of an examination engagement. Accordingly, for engagements covered by this SOP, the practitioner is required to clearly indicate in the report whether a verification, performance examination, or both, have been performed. The GIPS standards also require that the report include the periods covered by the verification or performance examination.

.43 Exhibit C, "Illustrative Attest Report: Verification (Reporting Directly on the Subject Matter)," of this SOP presents an illustrative report for a verification. Exhibit D, "Illustrative Attest Reports: Verification and Performance Examination (Reporting Directly on the Subject Matter)," of this SOP presents illustrative reports for a verification and performance examination.

.44 The GIPS standards require that the verification report include a statement indicating that the verification does not provide assurance on any specific performance report (see the verification report in exhibit C of this SOP). This disclaimer is an acknowledgment of the fact that the practitioner cannot control whether the verification report may accompany a GIPS report or other composite or pooled fund presentations distributed by the firm.

.45 The GIPS standards specify that the GIPS report for the specified composites or pooled funds that are the subject of a performance examination report must be included in or attached to the performance examination report. The practitioner may request that the firm's GIPS report for an examined composite or pooled fund disclose that publicly available benchmark returns have not been examined by the practitioner to avoid the implication that the practitioner is providing assurance on the development of the benchmark. The practitioner also should add a paragraph to a performance examination report disclaiming an opinion on GIPS reports or other composite or pooled fund presentations included or attached for any periods that were not examined by the practitioner and stating that the report does not relate to any GIPS reports or composite or pooled fund presentations other than those identified in the report.

.46 If supplemental information is included in the GIPS report for the specified composites or pooled funds that are the subject of a performance

examination report, the GIPS standards also require that the performance examination report include a statement indicating whether or not the performance examination covers the supplemental information.

.47 The GIPS standards require the inclusion of the following statement in a verification or performance examination report: "GIPS' is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein."

.48 When a firm has changed verifiers, and prior periods presented were subject to verification or performance examination by another verifier, the firm may request that the practitioner refer to all verified or examined periods in the practitioner's report. A practitioner may decide to refer to the reports of a predecessor verifier. The successor practitioner would consider the appropriateness of referring to reports on verifications or performance examinations conducted by other verifiers in the specific circumstances. If the successor practitioner decides to refer to the reports of the predecessor verifier, the report would be modified appropriately. Exhibit E, "Illustrative Attest Report: Successor Practitioner Report — Verification and Performance Examination," of this SOP contains an example of a successor practitioner's report referring to the predecessor verifier's verification and performance examination report.

Other Information

.49 If prior to or after the release of the practitioner's performance examination report the practitioner is willing to permit the inclusion of the practitioner's performance examination report in a document containing other information, the practitioner should read the other information to identify material inconsistencies, if any, with the GIPS reports. If upon reading the other information, in the practitioner's professional judgment

- a. a material inconsistency between that other information and the GIPS report exists, or
- b. a material misstatement of fact exists in the other information,

the practitioner should discuss the matter with the firm and take further action as appropriate.³

.50 Further actions that may be appropriate if the practitioner identifies a material inconsistency or becomes aware of a material misstatement of fact include, for example, the following:

- Requesting the firm to consult with a qualified third party, such as the firm's legal counsel
- Obtaining legal advice about the consequences of different courses of action
- If required or permissible, communicating with third parties (for example, a regulator)
- Withdrawing from the engagement

Effective Date

.51 This SOP is effective upon issuance for engagements reporting on a firm's compliance with the 2020 edition of the GIPS standards.

³ See paragraphs .57 and .A67–.A68 of AT-C section 205.

Appendix

The illustrative verification and performance examination reports in this appendix apply to firms claiming compliance with the 2020 edition of the GIPS standards. The reports are inclusive of a firm's prior compliance with, and prior-year verification and performance examinations performed under, previous editions of the GIPS standards.

Exhibit A — Example Engagement Letter: Verification and Performance Examination

The following is an illustration of an example engagement letter that may be used for this kind of engagement.

[*Practitioner Letterhead*]

[*Client's Name and Address*]

Dear _____:

This will confirm our understanding of the arrangements for our examination of whether the policies and procedures of the Investment Firm (the Firm) related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been (1) designed in compliance with the Global Investment Performance Standards (GIPS[®]) for the periods from January 1, 20X1 to December 31, 20Y0, and (2) implemented on a firm-wide basis for the period from January 1, 20X1 to December 31, 20Y0; this is referred to as a *verification* under the GIPS standards. [*When also conducting a performance examination, add: We have also been engaged to conduct an examination (referred to as a performance examination under the GIPS standards) of [specify composites or pooled funds] and their associated GIPS reports [if relevant, add: and the Firm's presentation of supplemental information included in the GIPS reports (Supplemental Information)] for the periods from January 1, 20X1 to December 31, 20Y0, in compliance with the GIPS standards.*]

Our examination will be conducted in accordance with the attestation standards established by the AICPA and criteria set forth in the GIPS standards. Our responsibility is to express an opinion on the items described above (the subject matter) based on our examination.

Our examination will involve performing procedures to obtain evidence about the subject matter. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of the subject matter, whether due to fraud or error. A verification does not provide assurance on the operating effectiveness of the firm's controls or policies and procedures for complying with the GIPS standards.

The Firm's management is responsible for the following:

- Selecting the GIPS standards as the criteria against which we will evaluate its compliance and for determining that the GIPS standards are appropriate criteria for its purposes.
- Compliance with all applicable laws, regulations, contracts, and agreements, including the GIPS standards.
- The design, implementation, and monitoring of the policies and procedures upon which compliance is based.
- Making available to us all records and related information relevant to our examination.
- Providing a signed representation letter at the completion of our examination.
- Providing a written assertion about whether

- the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been (1) designed in compliance with the GIPS standards for the periods from January 1, 20X1 to December 31, 20Y0, and (2) implemented on a firm-wide basis for the periods from January 1, 20X1 to December 31, 20Y0;
- *[if examining a composite and its associated GIPS Composite Report]* the Firm has constructed the Example Composite and calculated the Example Composite performance and has prepared and presented the *[refer to accompanying GIPS report]* of the Firm's Example Composite, for the periods from January 1, 20X1 to December 31, 20Y0, in compliance with the GIPS standards;
- *[if examining a pooled fund and its associated GIPS Pooled Fund Report]* the Firm has calculated the Sample Fund performance and has prepared and presented the *[refer to accompanying GIPS report]* of the Firm's Sample Fund, for the periods from January 1, 20X1 to December 31, 20Y0, in compliance with the GIPS standards; and
- *[if applicable]* the Firm's presentation of Supplemental Information is fairly stated in accordance with the measurement and disclosure criteria as set forth in the GIPS reports.

If conditions not now anticipated preclude us from performing our examination procedures and issuing a report, as contemplated by the preceding paragraph, we will advise you promptly and take such action as we deem appropriate.

Working papers that are prepared in connection with this engagement are our property. The working papers are prepared for the purpose of providing principal support for our reports.

As you are aware, there are inherent limitations in the examination process, including, for example, selective testing and the possibility that collusion or forgery may preclude the detection of material errors, fraud, and illegal acts.

Our fees will be billed as work progresses and are based on the amount of time required at various levels of responsibility plus actual out-of-pocket expenses. Invoices are payable upon presentation. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees. The quoted fees assume that you will provide an accumulation of data for the period to be tested and that the records provided to us are clear, concise, and accurate.

In the event we are requested or authorized by management or required by government regulation, subpoena, or other legal process to produce our documents or personnel as witnesses with respect to our engagement, the Firm will reimburse us for our professional time and expenses, as well as any fees and expenses of our counsel, incurred in responding to such requests.

If the Firm intends to use our report in whole or part or refer to *[name of practitioner]* in connection with any sales or advertising literature, a draft of such literature will be provided to us for review and comment prior to issuance.

Either party may terminate this agreement at will with 30 days' notice by delivery of a written termination notice.

If these arrangements are acceptable, please sign one copy of this letter and return it to us. We appreciate the opportunity to serve you.

Very truly yours,

[Name of Practitioner]

Accepted and agreed to:

[Title]

[Date]

Exhibit B — Example Representation Letter

The following illustrative representation letter includes the representations required by paragraph .50 of AT-C section 205, *Examination Engagements*, additional representations required by the Global Investment Performance Standards (GIPS'), and optional representations ordinarily included in representation letters for the engagement described in this SOP.

[Date]

[Name of Practitioner]

We are providing this letter in connection with your examination of whether, for the periods from January 1, 20X1 to December 31, 20Y0, the policies and procedures of the Investment Firm (the Firm) for complying with the GIPS standards related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been (1) designed in compliance with the GIPS standards, and (2) implemented on a firm-wide basis. [When also conducting a performance examination, add: (3) constructed the Example Composite and calculated the Example Composite and Sample Fund performance for the periods from January 1, 20X1 to December 31, 20Y0, in compliance with the GIPS standards, and (4) prepared and presented the GIPS reports for Example Composite and Sample Fund for the periods from January 1, 20X1 to December 31, 20Y0, in compliance with the GIPS standards.]

We confirm, to the best of our knowledge and belief, the following representations made to you during your examinations:

1. We are responsible for whether the policies and procedures for complying with the GIPS standards related to composite and pooled fund maintenance and the calculation and presentation of performance for the periods from January 1, 20X1 to December 31, 20Y0, and to distribution of performance beginning from [insert date], when the firm first claimed compliance with the GIPS standards, to December 31, 20Y0, have been designed in compliance with the GIPS standards and implemented on a firm-wide basis. We further confirm that we are responsible for the selection of the GIPS standards as the criteria against which you are evaluating our compliance and for determining that the GIPS standards are appropriate criteria for our purposes.
2. We assert to you that (a) the policies and procedures for complying with the GIPS standards related to composite and pooled fund maintenance and the calculation and presentation of performance for the periods from January 1, 20X1 to December 31, 20Y0, and to distribution of performance beginning from [insert date], when the firm first claimed compliance with the GIPS standards, to December 31, 20Y0, have been designed in compliance with the GIPS standards and implemented on a firm-wide basis, and (b) the Firm's policies and procedures are as described in the firm's GIPS standards policies and procedures and have been consistently applied for the periods from January 1, 20X1 to December 31, 20Y0.
3. We assert that we are in compliance with the GIPS standards on a firm-wide basis for the periods from January 1, 20X1 to December 31, 20Y0, and we have disclosed all known matters contradicting the assertion and any communications from CFA Institute or regulatory agencies concerning (a) noncompliance with the GIPS standards or our assertion with regard thereto or (b) noncompliance with any other criteria relevant to investment

performance, including communications received from January 1, 20Y1 through the date of this letter.

4. We have *[no knowledge of]* *[disclosed to you all information that we are aware of regarding]* (a) actual, suspected, or alleged fraud or noncompliance with laws and regulations involving management or employees who have significant roles in the Firm's policies and procedures relating to compliance with the GIPS standards or (b) actual, suspected, or alleged fraud or noncompliance with laws and regulations involving others that could have a material effect on the Firm's compliance with the GIPS standards.
5. We have provided you with all relevant information and access.
6. There are no violations or possible violations of laws or regulations, *[if applicable: including the Investment Advisers Act of 1940,]* whose effects should be considered for disclosure in your report or in the GIPS reports.
7. We acknowledge responsibility for maintaining sufficient books and records, as required by the GIPS standards or applicable regulatory requirements, and we have maintained such records to comply with those requirements.
8. We have disclosed to you any known events that occurred subsequent to the period being reported on and through the date of this letter that would have a material effect on the outcome of the examination.
9. We have disclosed to you all deficiencies in internal control over the Firm's compliance with the GIPS standards of which we are aware.

[When also conducting a performance examination, add:]

10. We assert that we have constructed Example Composite and calculated the Example Composite and Sample Fund performance for the periods from January 1, 20X1 to December 31, 20Y0, in compliance with the GIPS standards, and that *[refer to accompanying GIPS reports]* of Example Composite and Sample Fund for the periods from January 1, 20X1 to December 31, 20Y0, is prepared and presented in compliance with the GIPS standards.
11. *[If applicable]* We assert that the Firm's presentation of Supplemental Information is fairly stated in accordance with the measurement and disclosure criteria as set forth in the GIPS reports.

[Name of CEO and Title]

[Name of CFO and Title]

Exhibit C — Illustrative Attest Report: Verification (Reporting Directly on the Subject Matter)

Independent Accountant's Verification Report

Investment Firm
10 Main Street
Anytown, USA

We have examined whether Investment Firm (the Firm) has, for the periods from January 1, 20X1 to December 31, 20Y0, (1) designed policies and procedures for complying with the Global Investment Performance Standards (GIPS') related to composite and pooled fund maintenance and the calculation, presentation, and distribution of performance (the applicable policies and procedures) in compliance with the GIPS standards, and (2) implemented the applicable policies and procedures on a firm-wide basis.

The Firm's management is responsible for its claim of compliance with the GIPS standards and the design of its policies and procedures used for its compliance with the GIPS standards. Our responsibility is to express an opinion on the Firm's design and implementation of the applicable policies and procedures based on our examination. We are also responsible for being independent of the Firm.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, in all material respects, the Firm (1) designed the applicable policies and procedures in compliance with the GIPS standards, and (2) implemented the applicable policies and procedures on a firm-wide basis. An examination involves performing procedures to obtain evidence about the Firm's design and implementation of the applicable policies and procedures. Our examination was also conducted in accordance with the required verification procedures of the GIPS standards, which also include testing performed on a sample basis. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks (1) of material noncompliance with the requirements of the GIPS standards, whether due to fraud or error, and (2) that the design of the applicable policies and procedures is not suitable for compliance with the GIPS standards. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

In our opinion, for the periods from January 1, 20X1 to December 31, 20Y0, the Firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been, in all material respects

- designed in compliance with the GIPS standards, and
- implemented on a firm-wide basis.

We have not been engaged to examine and did not examine any performance reports of the Firm's composites or pooled funds for any period, including any performance reports that may accompany this report and, accordingly, we express no opinion on any such performance. Our examination does not provide assurance on the operating effectiveness of the Firm's controls or policies and procedures for complying with the GIPS standards. GIPS' is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this

organization, nor does it warrant the accuracy or quality of the content contained herein.

[Date of Practitioner's Report]

Exhibit D — Illustrative Attest Reports: Verification and Performance Examination (Reporting Directly on the Subject Matter)

Example 1: Verification and Performance Examination Report on a Composite¹

Independent Accountant's Verification and Performance Examination Report

Investment Firm
10 Main Street
Anytown, USA

We have examined whether Investment Firm (the Firm) has, for the periods from January 1, 20X1 to December 31, 20Y0, (1) designed policies and procedures for complying with the Global Investment Performance Standards (GIPS') related to composite and pooled fund maintenance and the calculation, presentation, and distribution of performance (the applicable policies and procedures) in compliance with the GIPS standards, and (2) implemented the applicable policies and procedures on a firm-wide basis. We have also examined the accompanying [refer to accompanying GIPS report] of the Firm's Example Composite for the periods from January 1, 20X1 to December 31, 20Y0.

The Firm's management is responsible for its claim of compliance with the GIPS standards, the design of its policies and procedures used for its compliance with the GIPS standards, and for the [refer to accompanying GIPS report]. Our responsibility is to express an opinion, based on our examination, on the Firm's design and implementation of the applicable policies and procedures; the construction² of the Example Composite; the calculation of Example Composite performance; and the preparation and presentation of the [refer to accompanying GIPS report]. We are also responsible for being independent of the Firm.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, in all material respects, the Firm (1) designed the applicable policies and procedures in compliance with the GIPS standards, (2) implemented those policies and procedures on a firm-wide basis, (3) constructed³ the Example Composite and calculated the Example Composite performance in compliance with the GIPS standards, and (4) prepared and presented the [refer to accompanying GIPS report] in compliance with the GIPS standards. An examination involves performing procedures to obtain evidence about the Firm's design and implementation of the applicable policies and procedures; the construction⁴ of the Example Composite and calculation of the Example Composite performance; and the preparation and presentation of the [refer to accompanying GIPS report]. Our examination was also conducted in accordance with the required verification and performance examination procedures of the GIPS standards, which also include testing performed on a sample basis. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks

¹ For a performance examination of a pooled fund, the pooled fund would be specified instead of the composite.

² For a performance examination of a pooled fund, the words "construction of the [pooled fund]" would be omitted because the practitioner does not opine on the construction of a pooled fund.

³ See footnote 2.

⁴ See footnote 2.

(1) of material noncompliance with the requirements of the GIPS standards, (2) that the design of the applicable policies and procedures is not suitable for compliance with the GIPS standards, and (3) of material misstatement of the accompanying [*refer to accompanying GIPS report*], whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

In our opinion, for the periods from January 1, 20X1 to December 31, 20Y0, the Firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been, in all material respects

- designed in compliance with the GIPS standards, and
- implemented on a firm-wide basis.

Also, in our opinion, for the periods from January 1, 20X1 to December 31, 20Y0, the Firm has, in all material respects

- constructed⁵ the Example Composite and calculated the Example Composite's performance in compliance with the GIPS standards, and
- prepared and presented the [*refer to accompanying GIPS report*] of the Firm's Example Composite in compliance with the GIPS standards.

This report does not attest to the accuracy of any performance presentation of the Firm other than the Firm's Example Composite. Our examination does not provide assurance on the operating effectiveness of the Firm's controls or policies and procedures for complying with the GIPS standards. GIPS[®] is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

2014	14.50	13.37	13.03	11.30	9.59	45	2.8	445	1,032
2015	6.52	5.47	5.67	12.51	10.68	48	3.1	520	1,056
2016	8.22	7.15	7.09	12.95	11.15	49	2.8	505	1,185
2017	33.78	32.48	30.18	12.29	10.53	44	2.9	475	1,269
2018	-0.84	-1.83	-0.65	13.26	11.91	47	3.1	493	1,091
2019	33.08	31.78	29.76	12.81	11.71	51	3.5	549	1,252
2020	7.51	6.44	6.30	13.74	12.37	54	2.5	575	1,414
(a) Returns are for the period February 1, 2011 to December 31, 2011. (b) Spinning Top Investments acquired the composite through an acquisition of ABC Capital in May 2014. Firm assets prior to 2014 are not presented because the composite was not part of the firm. Disclosures 1. Spinning Top Investments claims compliance with the Global Investment Performance Standards (GIPS[®]) and has prepared and presented this report in compliance with the GIPS standards. Spinning Top Investments has been independently verified for the periods January 1, 2011 to December 31, 2020. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. 2. Spinning Top Investments is an equity investment manager that invests solely in U.S.-based securities. Spinning Top Investments is defined as an independent investment management firm that is not affiliated with any parent organization. Spinning Top Investments acquired ABC Capital in May 2014. 3. The Large Cap Growth Composite includes all institutional portfolios that invest in large-cap U.S. stocks that are considered to have growth in earnings prospects that are superior to that of the average company within the Example Large Cap Growth Index. Key material risks include the risks that stock prices will decline and that the composite will underperform its benchmark. The account minimum for the composite is \$5 million. Prior to July 2016, the account minimum was \$2 million. Prior to March 2020, the name of the composite was the Growth Composite. 4. Performance prior to May 2014 occurred while the investment management team was affiliated with another firm. The investment management team has managed the composite since its inception, and the investment process has not changed. The historical performance has been linked to performance earned at Spinning Top Investments. 5. The benchmark is the Example Large Cap Growth Index, a market-capitalization-weighted equity index of all U.S. stocks with a market cap greater than \$10 billion and a growth tilt. 6. Returns presented are time-weighted returns. Valuations are computed, and performance is reported in U.S. dollars. 7. Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Composite and benchmark returns are presented gross of nonreclaimable withholding taxes. Net-of-fees returns are calculated by deducting a model management fee of 0.083%, 1/12 of the highest management fee of 1.00%, from the monthly gross composite return. The management fee schedule for separate accounts is as follows: 1.00% on the first \$25 million; 0.60% thereafter. The management fee schedule and total expense ratio for the Large Cap Collective Fund, which is included in the composite, are 0.65% on all assets and 0.93%, respectively. 8. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. 9. A list of composite descriptions and a list of broad distribution pooled funds are available upon request. 10. The composite was created in November 2011, and the inception date is February 1, 2011. 11. As of January 1, 2014, internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Prior to 2014, internal dispersion was calculated using asset-weighted standard deviation.									

Example 2: Performance Examination Report With a Reference to a Separate Verification Report**Independent Accountant's Performance Examination Report**

Investment Firm

10 Main Street

Anytown, USA

We have examined the accompanying⁶ [*refer to accompanying GIPS reports*] of Investment Firm's (the Firm's) Example Composite and Sample Fund for the periods from January 1, 20X1 to December 31, 20Y0. The Firm's management is responsible for its claim of compliance with the Global Investment Performance Standards (GIPS') and for the [*refer to accompanying GIPS reports*]. Our responsibility is to express an opinion, based on our examination, on the Firm's (1) construction of the Example Composite and calculation of Example Composite and Sample Fund performance, and (2) preparation and presentation of the [*refer to accompanying GIPS reports*]. We are also responsible for being independent of the Firm. We previously conducted an examination (also referred to as a *verification*) of whether, for the period from January 1, 20X1 to December 31, 20Y0, the policies and procedures of the Firm for complying with the GIPS standards related to composite and pooled fund maintenance and the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards, and implemented on a firm-wide basis; our report dated August 7, 20Y1, with respect thereto is attached.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, in all material respects, the Firm (1) constructed the Example Composite and calculated the performance of the Example Composite and Sample Fund in compliance with the GIPS standards, and (2) prepared and presented the [*refer to accompanying GIPS reports*] in compliance with the GIPS standards. An examination involves performing procedures to obtain evidence about (1) the Firm's construction of the Example Composite and calculation of the performance of the Example Composite and Sample Fund and (2) preparation and presentation of the [*refer to accompanying GIPS reports*]. Our examination was also conducted in accordance with the required performance examination procedures of the GIPS standards, which also include testing performed on a sample basis. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks (1) of material noncompliance with the requirements of the GIPS standards, and (2) of material misstatement of the accompanying [*refer to accompanying GIPS reports*], whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

In our opinion, for the periods from January 1, 20X1 to December 31, 20Y0, the Firm has, in all material respects

- constructed the Firm's Example Composite and calculated the Example Composite and Sample Fund performance in compliance with the GIPS standards, and
- prepared and presented the [*refer to accompanying GIPS reports*] in compliance with the GIPS standards.

⁶ See example 1A, "Illustrative GIPS Composite Report for Example 1" for an illustrative GIPS Composite Report that would accompany the report.

This report does not attest to the accuracy of any performance presentation of the Firm other than the Firm's Example Composite and Sample Fund. Our examination does not provide assurance on the operating effectiveness of the Firm's controls or policies and procedures for complying with the GIPS standards. Example 3: Verification and Performance Examination Report on an Asset Owner Total Fund⁷

Independent Accountant's Verification and Performance Examination Report

Asset Owner

10 Main Street

Anytown, USA

We have examined whether Asset Owner (the Asset Owner) has, for the periods from January 1, 2011 to December 31, 2020, (1) designed policies and procedures for complying with the Global Investment Performance Standards (GIPS⁷) related to the total fund and composite maintenance and the calculation, presentation, and distribution of performance (the applicable policies and procedures) in compliance with the GIPS standards, and (2) implemented the applicable policies and procedures on an asset-owner-wide basis. We have also examined the accompanying GIPS Asset Owner Report of the Asset Owner's Total Fund (Total Fund GIPS Asset Owner Report) for the period from January 1, 2012 to December 31, 2020, including the Supplemental Information and accompanying notes from January 1, 2020 to December 31, 2020. The Asset Owner is responsible for (1) its claim of compliance with the GIPS standards, (2) the design of the applicable policies and procedures, and (3) the Total Fund GIPS Asset Owner Report. Our responsibility is to express an opinion, based on our examination, on (1) the Asset Owner's design and implementation of the applicable policies and procedures; (2) calculation of Asset Owner Total Fund performance; and (3) preparation and presentation of the Total Fund GIPS Asset Owner Report. We are also responsible for being independent of the Asset Owner.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, in all material respects, the Asset Owner (1) designed the applicable policies and procedures in compliance with the GIPS standards, (2) implemented the applicable policies and procedures on an asset-owner-wide basis, (3) calculated the Total Fund performance in compliance with the GIPS standards, and (4) prepared and presented the Total Fund GIPS Asset Owner Report in compliance with the GIPS standards. An examination involves performing procedures to obtain evidence about (1) the Asset Owner's design and implementation of the applicable policies and procedures for complying with the GIPS standards, (2) the calculation

⁷ For a performance examination of a composite, the composite would be specified instead of the Total Fund.

of the Total Fund performance, and (3) the preparation and presentation of the Total Fund GIPS Asset Owner Report. Our examination was also conducted in accordance with the required verification and performance examination procedures of the GIPS standards, which also include testing performed on a sample basis. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks (1) of material noncompliance with the requirements of the GIPS standards, (2) that the design of the applicable policies and procedures is not suitable for compliance with the GIPS standards, and (3) of material misstatement of the accompanying Total Fund GIPS Asset Owner Report, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

In our opinion, for the periods from January 1, 2011 to December 31, 2020, the Asset Owner's policies and procedures related to total fund and composite maintenance, as well as the calculation, presentation, and distribution of performance, have been, in all material respects

- designed in compliance with the GIPS standards, and
- implemented on an asset-owner-wide basis.

Also, in our opinion, for the periods from January 1, 2012 to December 31, 2020, the Asset Owner has, in all material respects

- calculated the Total Fund's performance in compliance with the GIPS standards, and
- prepared and presented the accompanying Total Fund GIPS Asset Owner Report in compliance with the GIPS standards.

Additionally, in our opinion, the Supplemental Information for the periods from January 1, 2020 to December 31, 2020, included in the Total Fund GIPS Asset Owner Report has been calculated and presented, in all material respects, in compliance with the methods described in the Supplemental Information accompanying notes.

This report does not attest to the accuracy of any performance presentation of the Asset Owner other than the Total Fund GIPS Asset Owner Report. Our examination does not provide assurance on the operating effectiveness of the Asset Owner's controls or policies and procedures for complying with the GIPS standards. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Exhibit E — Illustrative Attest Report: Successor Practitioner Report — Verification and Performance Examination

Reporting Directly on the Subject Matter (Verification and Performance Examination Report) in Successor Practitioner's Report When the Predecessor Verifier's Report Is Not Presented

Independent Accountant's Verification and Performance Examination Report

Investment Firm
10 Main Street
Anytown, USA

We have examined whether Investment Firm (the Firm) has, for the periods from January 1, 2015 to December 31, 2020, (1) designed policies and procedures for complying with the Global Investment Performance Standards (GIPS') related to composite and pooled fund maintenance and the calculation, presentation, and distribution of performance (the applicable policies and procedures) in compliance with the GIPS standards, and (2) implemented the applicable policies and procedures on a firm-wide basis. We have also examined the accompanying *[refer to accompanying GIPS report]* of the Firm's Example Composite for the periods from January 1, 2020 to December 31, 2020. The Firm's management is responsible for its claim of compliance with the GIPS standards, the design of its policies and procedures, and for the *[refer to accompanying GIPS report]*. Our responsibility is to express an opinion, based on our examination, on the Firm's design and implementation of the applicable policies and procedures, construction of the Example Composite and calculation of Example Composite performance, and preparation and presentation of the *[refer to accompanying GIPS report]*. We are also responsible for being independent of the Firm. A verification covering the periods from January 1, 1999 to December 31, 2014, and a performance examination of the Firm's *[refer to accompanying GIPS report]* for the periods from January 1, 2010 to December 31, 2014, were performed by another independent verifier, whose report, dated August 27, 2015, expressed an unqualified opinion thereon.

Our examination was conducted in accordance with attestation standards established by the AICPA. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether, in all material respects, the Firm (1) designed the applicable policies and procedures in compliance with the GIPS standards, (2) implemented the applicable policies and procedures on a firm-wide basis, (3) constructed Example Composite and calculated Example Composite performance in compliance with the GIPS standards, and (4) prepared and presented the *[refer to accompanying GIPS report]* in compliance with the GIPS standards. An examination involves performing procedures to obtain evidence about (1) the design and implementation of the applicable policies and procedures; the construction of Example Composite and calculation of Example Composite performance; and the *[refer to accompanying GIPS report]*. Our examination was also conducted in accordance with the required verification and performance examination procedures of the GIPS standards, which also include testing performed on a sample basis. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks (1) of material noncompliance with the requirements of the GIPS standards, (2) that the design of the applicable policies and procedures is not suitable for compliance with the GIPS standards, and (3) of material misstatement of the accompanying *[refer to accompanying GIPS report]*, whether

due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

In our opinion, for the periods from January 1, 2015 to December 31, 2020, the Firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been, in all material respects

- designed in compliance with the GIPS standards, and
- implemented on a firm-wide basis.

Also, in our opinion, for the periods from January 1, 2020 to December 31, 2020, the Firm has, in all material respects

- constructed the Firm's Example Composite and calculated the Example Composite's performance in compliance with the GIPS standards, and
- prepared and presented the [*refer to accompanying GIPS report*] of the Firm's Example Composite in compliance with the GIPS standards.

We have not been engaged to examine and did not examine the Firm's Example Composite for any periods prior to January 1, 2020, as shown in the accompanying [*refer to the accompanying GIPS report*], and accordingly, we express no opinion on any such performance.

This report does not attest to the accuracy of any performance presentation of the Firm other than the Firm's Example Composite. Our examination does not provide assurance on the operating effectiveness of the Firm's controls or policies and procedures for complying with the GIPS standards. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

AUD Section 55***Statement of Position 13-2 — Performing Agreed-Upon Procedures Engagements That Address the Completeness, Mapping, Consistency, or Structure of XBRL-Formatted Information*****September 2013****NOTE**

This AICPA Statement of Position (SOP) has been developed by the AICPA XBRL Assurance Task Force of the AICPA Assurance Services Executive Committee to provide guidance regarding the application of Statements on Standards for Attestation Engagements (SSAEs) to engagements in which a practitioner performs and reports on agreed-upon procedures related to the completeness of the XBRL data, mapping of the source information consistency of the XBRL data with the source information or structure of the XBRL data. In this SOP, the source information consists of the financial statements (including notes) and required schedules to be formatted in XBRL. The terms *completeness*, *mapping*, *consistency*, and *structure* as used in this SOP are defined in paragraph .07 of this SOP. This SOP supersedes SOP 09-1, *Performing Agreed-Upon Procedures Engagements That Address the Completeness, Accuracy, or Consistency of XBRL-Tagged Data*.

This SOP is recognized as an interpretive publication as defined in AT-C section 105, *Concepts Common to All Attestation Engagements*. Interpretive publications are recommendations on the application of SSAEs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the Auditing Standards Board (ASB) after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSAEs. The members of the ASB have found this SOP to be consistent with existing SSAEs.

Although interpretive publications are not attestation standards, AT-C section 105 requires the practitioner to consider applicable interpretive publications in planning and performing the attestation engagement because interpretive publications are relevant to the proper application of the attestation standards in specific circumstances.

Introduction and Background

.01 This Statement of Position (SOP) provides practitioners with guidance on performing agreed-upon procedures engagements for issuers submitting XBRL data embedded as part of the Interactive Data File within an HTML document using Inline XBRL and exhibits to the SEC containing eXtensible Business Reporting Language (XBRL) data.^{1, [2]} However, this SOP also may be considered for performing agreed-upon procedures engagements for other applications of XBRL. This SOP supersedes SOP 09-1, *Performing Agreed-Upon Procedures Engagements That Address the Completeness, Accuracy, or Consistency of XBRL-Tagged Data*. [Revised, June 2020, to reflect updates in the XBRL technology.]

SEC Rules

.02 The SEC issued a release, "Interactive Data to Improve Financial Reporting," adopting final rules (SEC rules) that require issuers to submit their financial statements and the related notes and required schedules in interactive data format using XBRL, as an exhibit to their financial statements submitted to the SEC via the Electronic Data-Gathering, Analysis, and Retrieval (EDGAR) system. The SEC issued a release, "Inline XBRL Filing of Tagged Data," adopting amendments to the SEC rules that required the use of the Inline XBRL format. These amendments require issuers to submit their financial statements and the related notes and required schedules and embed a part of the Interactive Data File within an HTML document using Inline XBRL and submit the contextual information about the XBRL tags embedded in the filing as an exhibit to their financial statements submitted to the SEC. [Revised, June 2020, to reflect revised SEC requirements.]

.03 In order for XBRL to be a useful tool for investors and other users of business information, the data contained in XBRL data needs to be accurate and reliable. Preparers of XBRL-formatted information are responsible for providing complete and accurate information in their XBRL data on which investors and other users of business information may rely. For issuers, the SEC rules emphasize the SEC's expectation that preparers of XBRL-formatted information take the initiative to develop practices to promote tagging processes that result in complete and accurate XBRL data. [Revised, June 2020, to reflect updates to XBRL technology.]

.04 The SEC rules^[3] state that, "an auditor will not be required to apply AS 2710 (*Other Information in Documents Containing Audited Financial Statements*), AS 4101 (*Responsibilities Regarding Filings Under Federal Securities Statutes*), or AS 4105 (*Reviews of Interim Financial Information*) (prior to December 31, 2016, AU Sections 550, 711, and 722, respectively) to the interactive data provided as an exhibit in a company's reports or registration statements, or to the viewable interactive data." Although the SEC rules do not require auditor involvement with the XBRL data, issuers may voluntarily obtain third-party services to assist them in assessing the quality of their XBRL data. [Revised, June 2020, to reflect revised PCAOB standards.]

¹ Information formatted in interactive data is referred to herein as "XBRL data." [Footnote revised, June 2020, to reflect updates to XBRL technology.]

^[2] [Footnote deleted, June 2020, to reflect updates to XBRL technology.]

^[3] [Footnote deleted, June 2020, to reflect updates to XBRL technology.]

XBRL Terminology

.05 In this SOP, the term *XBRL-formatted information* (commonly referred to as *tagged information*) means information that has been represented using XBRL and included in one or more electronic files. XBRL is a global standard that provides unique electronically readable codes (tags) representing each item in the financial statements or other business reports.

.06 Taxonomies are dictionaries that contain the terms used in financial statements and other business reports and their corresponding XBRL tags. Taxonomies specify the elements to be used for individual items of information, such as the element for the line item "cash and cash equivalents," and for a group of items, such as narrative disclosures. Taxonomies also identify relationships among terms, (for example, the term *cash and cash equivalents* is related to the term *current assets*). Business rules may be expressed within a taxonomy, such as "gross assets less accumulated depreciation should equal the net assets." Reporting companies may add to the dictionaries of terms, relationships, and business rules (that is, they may extend the taxonomy).

Agreed-Upon Procedures Engagements

.07 Given that management of an entity is responsible for the accuracy and reliability of the XBRL data, including identification of and compliance with the SEC's requirements, management (or other parties, such as the audit committee) may decide to engage a practitioner to provide attestation services to assist it in assessing the quality of its XBRL data, which may include assessing the completeness of the XBRL data (completeness), the mapping of the source information (mapping), the consistency of the XBRL data with the source information (consistency), or the structure of the XBRL data (structure) as defined here:

Completeness of the XBRL data. All required information is formatted at the required level of detail, as defined by the SEC's requirements. Only permitted information is included in the XBRL data.

Mapping of the source information. The elements selected are consistent with the meaning of the corresponding business reporting concepts in the source information in accordance with the SEC's requirements.

Consistency of the XBRL data with the source information. All formatted information in the XBRL data is consistent with the source information and formatted in accordance with the SEC's requirements.

Structure of the XBRL data. XBRL data are structured in accordance with the SEC's requirements.

[Revised, June 2020, to reflect updates to XBRL technology.]

.08 The engagement is performed under AT-C section 215, *Agreed-Upon Procedures Engagements*. Not all of the provisions of AT-C section 215 are discussed in this SOP. Rather, this SOP includes guidance to assist practitioners in applying certain aspects of AT-C section 215 to the subject matter of XBRL data. [Revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect updates to XBRL technology.]

.09 Because the engaging party (typically management of the entity) best understands its own needs, the engaging party is required to agree to the procedures and acknowledge that the procedures performed are appropriate for the intended purpose of the engagement prior to issuance of the practitioner's agreed-upon procedures report. The practitioner performs the procedures and reports his or her findings. The engaging party and intended users assess for themselves the procedures and findings reported by the practitioner and draw their own conclusions from the work performed by the practitioner. [Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.10] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.11] [Paragraph deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Preconditions for Engagement Performance

.12 A practitioner may perform an agreed-upon procedures engagement described in this SOP provided that

- a. the practitioner is independent, unless the practitioner is required by law or regulation to accept the engagement and report on the subject matter or assertion.⁴
- b. the responsible party is a party other than the practitioner and takes responsibility for the XBRL data.
- c. the engagement exhibits all of the following characteristics:
 - i. The subject matter is appropriate. (Application guidance regarding appropriate subject matter is provided in paragraphs .A36–.A41 of AT-C section 105.)
 - ii. The criteria to be applied in the preparation and evaluation of the subject matter are suitable and will be available to the intended users. (Application guidance regarding suitable and available criteria is provided in paragraphs .A42–.A52 of AT-C section 105.)
 - iii. The practitioner expects to be able to obtain the evidence related to the completeness, mapping, consistency, or structure of the XBRL data needed to arrive at the practitioner's findings, including
 - (1) access to all information of which the responsible party is aware that is relevant to the measurement, evaluation, or disclosure of the subject matter;
 - (2) access to additional information that the practitioner may request from the responsible party for the purpose of the engagement; and
 - (3) unrestricted access to persons within the appropriate party(ies) from whom the practitioner determines it necessary to obtain evidence.

⁴ In these circumstances, the practitioner's report should specifically state that the practitioner is not independent. [Footnote added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

- iv. The practitioner's findings, in the form appropriate to the engagement, is to be contained in a written practitioner's report.
- d. the practitioner determines that the procedures can be performed and reported on in accordance with AT-C section 215.
- e. the engaging party agrees, or will be able to agree, to the procedures and acknowledges that the procedures are appropriate for the intended purpose of the engagement.
- f. the procedures to be applied with respect to the completeness, mapping, consistency, or structure of the XBRL data are expected to result in reasonably consistent findings.
- g. when applicable, the practitioner agrees to apply a threshold for reporting exceptions established by the engaging party. (See the discussion in paragraph .31 of this SOP.)

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19 and to reflect updates to XBRL technology.]

.13 The practitioner should establish an understanding with the engaging party regarding the nature of the engagement, including the following:

- a. The intended purpose of the engagement and the intended users of the agreed-upon procedures report
- b. Whether the practitioner's agreed-upon procedures report is expected to be restricted to the use of specified parties
- c. Whether the engagement to be performed is pursuant to any law, regulation, or contract
- d. Whether parties in addition to the engaging party will be requested to agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes

[Paragraph added, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.14 The practitioner is precluded from accepting an agreed-upon procedures engagement if the practitioner believes the intended purpose of the engagement is not clear or the engaging party will not have a basis for agreeing and acknowledging that the procedures are appropriate for the intended purpose of the engagement. [Paragraph added, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.15 There are audit committee preapproval requirements applicable to acceptance of agreed-upon procedures engagements. Such requirements have been established by the SEC, PCAOB, and other regulatory bodies. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.16] [Paragraph renumbered and deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]^[5]

[.17] [Paragraph renumbered and deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

^[5] [Footnote deleted, June 2020, to reflect conforming changes due to the issuance of SSAE No. 19.]

[.18] [Paragraph renumbered and deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Subject Matter

.19 XBRL data subject to agreed-upon procedures engagements are typically as of a specified date and for a specified period (for example, for SEC purposes the XBRL data may be for comparative financial statements in a specific Form 10-K annual report or Form 10-Q quarterly report). It is common for the agreed-upon procedures to be performed on draft, rather than final XBRL data. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect updates to XBRL technology. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.20 Management may engage a third party to assist in the preparation of the XBRL data. In such instances, management remains responsible for the XBRL data and for any representations made by such third party. For example, a service organization may make representations that the XBRL data complies with specified SEC EDGAR Filer Manual (EFM) guidelines. Management is responsible for all representations, including any that are made by third parties. [Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19 and to reflect updates to XBRL technology.]

.21 Criteria are the benchmarks used to measure or evaluate the subject matter. Paragraph .25b(ii) of AT-C section 105 requires that the criteria to be applied in the preparation and evaluation of the subject matter be suitable. Suitable criteria are relevant, objective, measurable, and complete. The agreed-upon procedures to be performed are dependent on the relevant criteria against which the XBRL data are to be evaluated. Examples of criteria include those in the exhibit in *Principles and Criteria for XBRL-Formatted Information*, the SEC rules, and sections of the EFM⁶ that are agreed upon by the specified parties. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19 and to reflect updates to XBRL technology.]

.22 Appendix D, "Illustrative Procedures and Findings," of this SOP presents certain illustrative procedures aligned with the criteria that a practitioner might perform and findings that might be reported as part of an agreed-upon procedures engagement related to the completeness, mapping, consistency, or structure of XBRL-formatted information. The principles and criteria are not designed for measuring compliance with all of the applicable SEC rules and regulations (that is, the EFM includes additional requirements that are not included in this SOP; for example, certain requirements that are checked in an automated manner and those using the SEC's EDGAR XBRL validation process are excluded as well as some SEC requirements related to structure of the XBRL data and format of the information). Therefore, the procedures herein are illustrative and do not represent a complete set of procedures that might be performed in an agreed-upon procedures engagement relating to XBRL-formatted information. [Paragraph renumbered, April 2017, to reflect conforming changes

⁶ Certain sections of the SEC's EDGAR Filer Manual (EFM) may not be objective enough to be considered suitable criteria. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19 and to reflect updates to XBRL technology.]

Agreeing on the Terms of the Engagement

.23 In accordance with paragraph .14 of AT-C section 215, the practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. The agreement should include the following:

- a.* The nature of the engagement established pursuant to paragraph .13 of this SOP.
- b.* Identification of the subject matter and the responsible party.
- c.* The responsibilities of the practitioner.
- d.* A statement that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants.
- e.* A statement that the responsible party is responsible for the subject matter.
- f.* A statement that the engaging party agrees to provide the practitioner, prior to the completion of the engagement, with a written agreement and acknowledgment that the procedures performed are appropriate for the intended purpose of the engagement.
- g.* A statement that the engaging party agrees to provide, at the conclusion of the engagement, a representation letter.
- h.* If known at the onset of the engagement, an identification of any other parties, in addition to the engaging party, that will be requested to agree to the procedures and acknowledge that the procedures performed are appropriate for their purposes. If the request is expected to be made by the engaging party, a statement that the engaging party agrees to provide, at the conclusion of the engagement, a written representation that the engaging party has obtained from all necessary other parties agreement to the procedures and acknowledgment that the procedures performed are appropriate for their purposes.
- i.* If the engaging party is not the responsible party, a statement that written representations may be requested from the responsible party.
- j.* Reference to the expected form and content of the practitioner's agreed-upon procedures report, including any use restrictions, if applicable.
- k.* Disclaimers expected to be included in the practitioner's report, if applicable.
- l.* Assistance to be provided to the practitioner, if applicable.
- m.* Involvement of a practitioner's external specialist, if applicable.
- n.* Specified thresholds for reporting exceptions, if applicable.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.24 Other matters that the practitioner may wish to include in the written terms of the engagement addressed by this SOP are statements

- identifying any timing sensitivities in the performance of the procedures or delivery of the report.
- acknowledging management's responsibility for
 - compliance with the SEC's requirements including those related to the completeness, mapping, consistency, and structure of the entity's XBRL data and its assertions thereon.
 - providing accurate and complete information to the practitioner.
- indicating that the practitioner has no responsibility for the completeness or accuracy of the information provided to the practitioner.
- the circumstances under which the practitioner may decline to issue a report.

An illustrative engagement letter is presented in appendix B, "Illustrative Engagement Letter," of this SOP.

[Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect updates to XBRL technology. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Nature, Timing, and Extent of Procedures

Responsibilities of Management

.25 Management is responsible for both the completeness and accuracy of the source information and compliance with the SEC's requirements, including those related to the completeness, mapping, consistency, and structure of its XBRL-formatted information. That responsibility encompasses

- a. identifying the applicable XBRL-formatted information filing requirements of the SEC.
- b. establishing and maintaining controls relating to the preparation and submission of the entity's XBRL-formatted information to the SEC.
- c. evaluating the completeness, mapping, consistency, and structure of the entity's XBRL-formatted information.
- d. providing XBRL-formatted information in a form and manner that satisfies the SEC's requirements.

[Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Responsibilities of the Practitioner

.26 In accordance with paragraph .32a of AT-C section 105, the engagement partner should be satisfied that the engagement team, and any practitioner's external specialists, collectively, have the appropriate competence, including knowledge of the subject matter, and capabilities to

- comply with professional standards and applicable legal and regulatory requirements and
- enable the issuance of a practitioner's report that is appropriate in the circumstances.

That knowledge would include an understanding of XBRL and a familiarity with the applicable XBRL taxonomies used, knowledge of the SEC rules and requirements (including permitted taxonomies, such as the permitted version of the U.S. GAAP or IFRS Taxonomies), as well as knowledge of the source information and supporting records.⁷ [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect updates to XBRL technology. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Procedures to Be Performed

.27 The practitioner should perform procedures agreed-to and acknowledged by the engaging party to meet the intended purpose of the engagement as established with the engaging party. However, mere reading about specified information about the XBRL-formatted information does not constitute a procedure sufficient to permit a practitioner to report on the results of applying agreed-upon procedures. In some circumstances the procedures evolve or are modified during the course of the engagement. Paragraph .17 of AT-C section 215 states that the practitioner should not perform procedures that are open to varying interpretations or use vague or ambiguous language. Examples of appropriate procedures are included in appendix D of this SOP. Examples of inappropriate procedures include the following:

- Merely reading a description of the services performed by a third party involved in the preparation of XBRL-formatted information (for example, by a service provider)
- Evaluating the competence or objectivity of another party involved in preparing or in providing assistance in the preparation of the XBRL-formatted information
- Obtaining an understanding about XBRL-related requirements⁸

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

⁷ Practitioners performing engagements for audit clients may have specific knowledge of the underlying source information and supporting records and may possess a level of expertise that would significantly lessen the range of judgment needed in performing procedures related to the XBRL-formatted information. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

⁸ Although the practitioner may need to obtain an understanding of XBRL-related requirements, obtaining such an understanding is not in itself an agreed-upon procedure (see paragraph .28 of this SOP). [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

Involvement of a Specialist⁹

.28 Generally, the use of a specialist would not be necessary. However, if specialized matters were included in the engagement that required expertise beyond that possessed by the practitioner (such as compliance with certain highly technical aspects of the EFM), the practitioner and the engaging party should explicitly agree to the involvement of a practitioner's external specialist if assisting the practitioner in the performance of the agreed-upon procedures engagement. This agreement may be reached when agreeing upon the terms of the engagement or as part of obtaining the engaging party's agreement to the procedures and acknowledgment that the procedures performed are appropriate for the intended purpose of the engagement. The practitioner's report should describe the nature of the assistance provided by the practitioner's external specialist. [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.29 A practitioner may apply procedures to the report or work product of a practitioner's external specialist that does not constitute assistance by the external specialist to the practitioner in an agreed-upon procedures engagement. For example, the practitioner may reference information contained in a report of a practitioner's external specialist in describing a procedure. However, it is inappropriate for the practitioner to merely read the external specialist's report solely to describe or repeat the findings or to take responsibility for all or a portion of any procedures performed by a practitioner's external specialist or the external specialist's work product. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Reporting Considerations

.30 A practitioner's report on agreed-upon procedures should be in the form of procedures and findings. The practitioner should not provide negative assurance in his or her report about the completeness, mapping, consistency, or structure of the XBRL data. For example, the practitioner should not include a statement that "nothing came to our attention that caused us to believe that the assertion is not fairly stated in accordance with the criteria." [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect updates to XBRL technology. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.31 The practitioner should report all findings from the application of the agreed-upon procedures. If the engaging party has established a threshold for reporting exceptions, the practitioner should describe such threshold in the practitioner's report. [Paragraph renumbered and revised, April 2017, to reflect

⁹ A practitioner's specialist is an individual or organization possessing expertise in a field other than accounting or attestation, whose work in that field is used by the practitioner to assist the practitioner in the performance of the agreed-upon procedures engagement. A practitioner's specialist may be either a practitioner's internal specialist (who is a partner or staff, including temporary staff, of the practitioner's firm or a network firm) who does not participate in the engagement or a practitioner's external specialist. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.32 The practitioner's report on agreed-upon procedures should include all of the following:

- a. A title that includes the word *independent* to clearly indicate that it is the report of an independent accountant.
- b. An appropriate addressee as required by the circumstances of the engagement.
- c. Identification of the engaging party.
- d. An identification of the subject matter to which the procedures have been applied.
- e. Identification of the responsible party, including a statement that the responsible party is responsible for the subject matter. When the engaging party is not the responsible party and identification of the responsible party and its responsibility for the subject matter is based solely on representations received from the engaging party, the practitioner's agreed-upon procedures report should include a statement to that effect.
- f. A statement that the engaging party acknowledged that the procedures performed are appropriate to meet the intended purpose of the engagement.
- g. An identification of the intended purpose of the engagement in sufficient detail to enable the user to understand the nature of the work performed.
- h. A statement that the practitioner's report may not be suitable for any other purpose.
- i. A statement that the procedures performed may not address all the items of interest to a user of the report and may not meet the needs of all users of the report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.
- j. A statement that an agreed-upon procedures engagement involves the practitioner performing specific procedures that the engaging party has agreed to and acknowledged to be appropriate for the intended purpose of the engagement and reporting on findings based on the procedures performed.
- k. A description of the procedures performed detailing the nature and extent, and if applicable, the timing of each procedure.
- l. A description of the findings from each procedure performed, including sufficient details on exceptions found.
- m. If applicable, a description of any specified threshold established by the engaging party for reporting exceptions. (Refer to the discussion in paragraph .31 of this SOP.)
- n. A statement that
 - i. the agreed-upon procedures engagement was conducted in accordance with the attestation standards established by the AICPA.
 - ii. the practitioner was not engaged to and did not conduct an examination or review, the objective of which would be

- the expression of an opinion or conclusion, respectively, on the subject matter.
- iii. the practitioner does not express such an opinion or conclusion.
 - iv. had the practitioner had performed additional procedures, other matters might have come to the practitioner's attention that would have been reported.
- a. A statement that the practitioner is required to be independent of the responsible party and to meet the practitioner's other ethical responsibilities, in accordance with the relevant ethical requirements relating to the agreed-upon procedures engagement.
 - p. If applicable, a description of the nature of the assistance provided by a practitioner's external specialist.
 - q. When applicable, reservations or restrictions concerning procedures or findings.
 - r. The manual or printed signature of the practitioner's firm.
 - s. The city and state where the practitioner's report is issued.
 - t. The date of the report.

An illustrative report is presented in appendix E, "Illustrative Agreed-Upon Procedures Report," of this SOP.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.33 The practitioner should consider whether to include an alert, in a separate paragraph, that restricts the use of the practitioner's agreed-upon procedures report, taking into account the understanding with the engaging party regarding the nature of the engagement. [Paragraph added, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.34 If the practitioner determines to include an alert, in a separate paragraph, that restricts the use of the practitioner's report, such alert should

- a. state that the practitioner's report is intended solely for the information and use of the specified parties.
- b. identify the specified parties for whom use is intended.
- c. state that the report is not intended to be, and should not be, used by anyone other than the specified parties.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph added, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.35 The report should be dated no earlier than the date on which the practitioner completed the procedures and determined the findings, including that

- a. the attestation documentation has been reviewed, and
- b. if applicable, the written presentation of the subject matter has been prepared.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.36] [Paragraph renumbered and deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Explanatory Language in the Practitioner's Agreed-Upon Procedures Report

.37 The practitioner may include explanatory language in the practitioner's agreed-upon procedures report related to matters such as the following:

- Disclosure of stipulated facts, assumptions, or interpretations (including the source thereof) used in the application of agreed-upon procedures
- Description of the condition of records, controls, or data to which the procedures were applied
- Explanation that the practitioner has no responsibility to update his or her report
- Explanation that the sample may not be representative of the population
- Explanation that the procedures performed do not address all of the SEC's requirements for XBRL submissions
- Explanation that the XBRL data and source information may be updated prior to filing with the SEC. Accordingly, the findings in the report may not correspond to the final XBRL data submitted.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Revised, June 2020, to reflect updates to XBRL technology. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Adding Other Specified Parties After the Release of the Practitioner's Report

.38 When the practitioner issues a report that includes an alert restricting the use of the practitioner's report to certain specified parties, and the engaging party subsequently requests the practitioner to add an additional specified party, the practitioner should determine whether to add the additional specified party. As part of this determination, the practitioner should consider whether

- a. the additional specified party has acknowledged or will be requested to acknowledge that the procedures performed are appropriate for their purposes. If the practitioner determines that the acknowledgment is necessary, the practitioner should either obtain such acknowledgment directly from the additional specified party or obtain a representation from the engaging party that the additional specified party has agreed to the procedures and acknowledged that the procedures performed are appropriate for their purposes, and
- b. the report will be reissued to identify the additional specified party.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.39 If the practitioner provides a written acknowledgment to the engaging party and the additional party that such party has been added as a specified party, the practitioner should state in the acknowledgment that no procedures were performed subsequent to the original date of the practitioner's agreed-upon procedures report. [Paragraph added, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.40] [Paragraph renumbered and deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Written Representations

.41 In accordance with paragraph .27 of AT-C section 215, the practitioner should request from the engaging party written representations in the form of a letter addressed to the practitioner. The representations should include

- a. a statement that the responsible party is responsible for the subject matter.
- b. if applicable, a statement that the engaging party has obtained from all necessary parties agreement to the procedures and acknowledgment that the procedures are appropriate for their purposes.
- c. a statement that it has provided the practitioner with all relevant information and access, as applicable, as agreed upon in the terms of the engagement.
- d. a statement that all known matters contradicting the subject matter and any communication from regulatory agencies or others affecting the subject matter have been disclosed to the practitioner, including communications received between the end of the period addressed by the subject matter and the date of the practitioner's report.
- e. a statement that it is not aware of any material misstatements in the subject matter.
- f. a statement that it has disclosed to the practitioner all known events subsequent to the period (or point in time) of the subject matter being reported on that would have a material effect on the subject matter.
- g. any additional representations that the practitioner deems are appropriate.

An illustrative representation letter is presented in appendix C, "Illustrative Representation Letter," of this SOP.

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

.42 When the engaging party is not the responsible party, in addition to requesting representations from the engaging party, paragraph .28 of AT-C section 215 requires the practitioner to consider requesting the relevant written representations pursuant to paragraph .27 of AT-C section 215 from the responsible party in the form of a letter addressed to the practitioner. [Paragraph added, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Requested Written Representations Not Provided or Not Reliable

.43 When one or more of the written representations that the practitioner has requested pursuant to paragraphs .27–.28 of AT-C section 215 are not provided, or the practitioner concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of those providing the written representations, or the practitioner concludes that the written representations are otherwise not reliable, the practitioner should do the following:

- a. Discuss the matter with the engaging or responsible party, as appropriate
- b. Reevaluate the integrity of those from whom the representations were requested or received and evaluate the effect that this may have on the reliability of representations and evidence in general
- c. If any of the matters are not resolved to the practitioner's satisfaction, take appropriate action, including determining the possible effect on the practitioner's agreed-upon procedures report

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Knowledge of Matters Outside Agreed-Upon Procedures

.44 Although the practitioner need not perform procedures beyond the procedures agreed to and acknowledged by the engaging party to be appropriate for the intended purpose of the engagement, if, in connection with the application of the procedures, and through the completion of the engagement, matters come to the practitioner's attention by other means that significantly contradict the subject matter referred to in the practitioner's report, the practitioner should discuss the matter with the engaging party and take appropriate action, including determining whether the practitioner's report should be revised to disclose the matter (for example, if during the course of performing agreed-upon procedures that address XBRL-formatted financial statements and the related notes and required schedules submitted in Inline XBRL format and as an exhibit to the SEC, the practitioner becomes aware by means other than performing the agreed upon procedures that a calculation linkbase has been omitted, the practitioner should discuss the matter with the engaging party and determine whether to include this matter in the practitioner's report). [Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19 and to reflect revised SEC requirements.]

Effective Date

.45 This SOP is effective for any XBRL agreed-upon procedures engagements accepted subsequent to the issuance of this SOP. [Paragraph renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

[.46]

[Appendix A — Illustrative Management Assertions]

[Paragraph renumbered and deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

Appendix B — Illustrative Engagement Letter

This appendix presents an illustrative engagement letter^[1] for the agreed-upon procedures engagement described in this SOP (engagement described in this SOP addresses the completeness, mapping, consistency, or structure of an entity's XBRL-formatted financial statements and the related notes and required schedules submitted in Inline XBRL format and as an exhibit to the SEC). It is intended to be illustrative only.

In this illustrative engagement letter, management and the audit committee of XYZ Company are the engaging and responsible party. The procedures are known at the onset of the engagement and the engaging party acknowledges that the procedures to be performed are appropriate for the intended purpose of the engagement in the engagement letter.

[CPA Firm Letterhead]

[Client's Name and Address]

To Management and the Audit Committee of XYZ Company:

This will confirm our understanding of the arrangements for our performance of certain agreed-upon procedures related to *[identify subject matter and criteria]* (for example, the completeness of the XBRL data, mapping of the source information to the XBRL data, consistency of the XBRL data) with the source information and the structure of the XBRL data related to the *[identify source information and period]* (for example, the Company's [Quarterly or Annual] Report on Form [10-K or 10-Q] for the period ended *[identify date]* to be submitted to the Securities Exchange Commission [SEC]) in accordance with the *Principles and Criteria for XBRL-Formatted Information*).

You agree to the procedures enumerated in the attachment to this letter and acknowledge that the procedures to be performed are appropriate for the intended purpose of the engagement. Our responsibility is to carry out these procedures and report our findings. We will conduct our engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants.²

Management is responsible for both the completeness and accuracy of the source information and compliance with the SEC's requirements including those related to the completeness of the XBRL data, mapping of the source information to the XBRL data, consistency of the XBRL data with the source information, structure of the XBRL data, and for the information provided to us. Management also is responsible for the design, implementation, effectiveness, and monitoring of controls over the preparation and submission of XYZ Company's XBRL data. It is understood that we make no representation regarding the completeness or accuracy of the source information provided to us during this engagement.

^[1] [Footnote renumbered and deleted, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

² Although not required, the practitioner may include a statement such as the following to clarify the practitioner's responsibility for the appropriateness of the procedures:

It is understood that we make no representation regarding the appropriateness of the procedures described in the attachment for the purpose for which this report has been requested or for any other purpose.

[Footnote added, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

You agree to provide, at the conclusion of our engagement, written confirmation concerning representations made to us in connection with the agreed-upon procedures engagement.

Our engagement to perform agreed-upon procedures is substantially less in scope than an examination or review, the objective of which is the expression of an opinion or conclusion, respectively, on management's assertion regarding the XBRL data. Accordingly, the report will not express an opinion or any other form of assurance thereon and if additional procedures were to be performed, other matters might have come to our attention.

At the completion of the agreed-upon procedures, we expect to issue a report that will state the procedures performed and the findings from those procedures. If, however, we are not able to complete all of the specified procedures, we will so advise you. Our report will include an alert that restricts its use to the audit committee and management of the Company.

[Discuss other practitioner-specific matters, such as billing arrangements.]

If this letter correctly expresses your understanding of this engagement, please sign the enclosed copy where indicated and return it to us.

Sincerely,

[Firm Name or Firm Representative's Signature]

Accepted and agreed to by XYZ Company

[Client Representative's Signature (such as Name of Chief Financial Officer)]

[Title]

[Date]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19 and to reflect revised SEC requirements and updates to XBRL technology.]

Appendix C — Illustrative Representation Letter

This appendix includes an illustrative representation letter for the agreed-upon procedures engagement described in this SOP (agreed-upon procedures that address the completeness, mapping, consistency, or structure of an entity's XBRL-formatted financial statements and the related notes and required schedules submitted in Inline XBRL format and as an exhibit to the SEC). This representation letter is illustrative only and is not intended to be applicable to all engagements. In addition, it may not include items that are relevant to a specific engagement.

[Date]

To [CPA Firm]:

We are providing this letter in connection with the performance of certain agreed-upon procedures related to [identify subject matter and criteria (for example, the completeness of the XBRL data, mapping of the source information to the XBRL data, consistency of the XBRL data)] with the source information and structure of the XBRL data related to the [identify source document and period (for example, the Company's [Quarterly or Annual] Report on Form [10-K or 10-Q] for the period ended [identify date] to be submitted to the Securities Exchange Commission [SEC])]. We confirm that we are responsible for the XBRL data relating to our financial statements and the related notes and required schedules^[1] and for compliance with the SEC's requirements including those related to the completeness, mapping, consistency, and structure of XYZ Company's XBRL data and its assertions thereon, and for the completeness and accuracy of information provided to you, including the source information. We also confirm that we are responsible for selecting the criteria specified in the procedures and for determining that such criteria and procedures are sufficient for our purposes.

We confirm, to the best of our knowledge and belief, as of [identify date of agreed-upon procedures report], the following representations made to you during your agreed-upon procedures engagement.

1. The XBRL data related to the [identify source information and period (for example, the Company's [Quarterly or Annual] Report) on Form [10-K or 10-Q] for the period ended [identify date] to be submitted to the Securities Exchange Commission (SEC)] (XBRL data) are in compliance with the SEC's requirements including, but not limited, to the following:
 - a. **Completeness of the XBRL data.** All required information is formatted at the required levels of detail, as defined by the SEC's requirements. Only permitted information is included in the XBRL data.
 - b. **Mapping of the source information.** The elements selected are consistent with the meaning of the corresponding business reporting concepts in the source information in accordance with the SEC's requirements.

^[1] [Footnote deleted, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19.]

- [Name of Chief Financial Officer and Title]

² If this representation letter is obtained subsequent to the issuance of the underlying financial statements, a representation such as the following may be appropriate: "We are not aware of any communication from any regulatory agencies regarding the financial statements or previously submitted XBRL exhibits, and no material modifications exist that need to be made to the financial statements." [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

[Paragraph renumbered and revised, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Paragraph renumbered and revised, June 2020, to reflect conforming changes necessary due to the issuance of SSAE No. 19 and to reflect revised SEC requirements and updates to XBRL technology.]

Appendix D — Illustrative Procedures and Findings

This appendix presents a table that includes illustrative procedures that a practitioner might perform and findings that a practitioner might report as part of the agreed-upon procedures engagement described in this SOP (agreed-upon procedures that address the completeness, mapping, consistency, or structure of XBRL-formatted financial statements (including notes) and required schedules submitted in Inline XBRL format and as an exhibit to the SEC). These procedures are illustrative only and do not represent a complete set of procedures that might be performed in any specific engagement. In addition, they do not necessarily address every attribute associated with a particular management assertion.

The following items provide additional information about the procedures, the reporting of findings, and sources of information about SEC requirements regarding XBRL-formatted information.

1. Certain agreed-upon procedures may appear in the following table under one assertion, but may be relevant to more than one assertion; however, each procedure would only need to be performed once.
2. As indicated in paragraph .31 of this SOP, the practitioner should report and describe all differences, exceptions, and other findings noted during the application of the agreed-upon procedures as part of his or her findings, unless they are below any specified threshold established by the engaging party for reporting exceptions described in the practitioner's report.
3. In planning for the execution of such an agreed-upon procedures engagement, the practitioner may find it useful to perform additional activities to assist in gaining an understanding of the entity's formatting approach. Examples of such activities may include
 - inquiring of management to gain an understanding of its overall formatting and validation process,¹ including software applications or third-party providers used, and relevant experience and knowledge of those involved with the XBRL reporting process.
 - requesting management to provide a list of known differences between its XBRL data and the SEC requirements.
4. Certain of these procedures may be performed using XBRL software (for example, analysis, querying, validation).² Accordingly, as part of tailoring the procedures to a specific agreed-upon procedures engagement, management might agree to or specify the

¹ Various software applications or third party providers used may produce different reports or present information in a different manner, which may affect the timing, nature, and performance of procedures. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18.]

² The XBRL US Center for Data Quality has developed validation rules which are aimed to help reduce common input errors by filers. These rules are incorporated into the US GAAP Taxonomy and can be run by various software applications. When the rules identify a potential error, they provide detailed information on the potential error with guidance on how to correct it. [Footnote added, June 2020, to reflect updates to XBRL technology.]

use of a particular XBRL software product and version for performing such procedures.

5. The SEC provides requirements for the proper formatting of the XBRL data and maintains electronic systems to receive, validate, and process the XBRL data. Filers are responsible for compliance with these requirements and are encouraged to make a test submission of the XBRL data prior to submission to the SEC to reduce the likelihood of the exhibit not being accepted by the SEC systems.³
6. This table provides some references to relevant guidance in the SEC's EDGAR Filer Manual (EFM) Version 53.⁴ The most current document is available on the SEC's website at <http://xbml.sec.gov> and is updated frequently.

Illustrative Procedures and Findings for an Agreed-Upon Procedures Engagement that Addresses the Completeness, Mapping, Consistency, or Structure of XBRL-Formatted Information

	Principles and Criteria ^[5]		Procedure		Finding
Completeness of the XBRL Data — All required information is formatted at the required levels of detail as defined by the SEC's requirements. Only permitted information⁶ is included in the XBRL data.					
A	All information that is required to be formatted as defined by the SEC's requirements is formatted at the appropriate levels of detail in the XBRL data	C1	Inspect the XBRL data ⁷ to ascertain whether each of the following items in the source information is included in the XBRL data and is formatted at the level of detail noted in the following list:	C1	All such items in the [identify source information] that were required to be formatted as defined by the SEC's requirements were included in the XBRL data and formatted at the level of detail indicated [except as follows: <i>list facts</i>].

(continued)

³ The SEC's validation system checks only a subset of the requirements and should not be considered a method to measure compliance with all of the requirements. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

⁴ Future updates to the EFM could result in changes to the requirements, which could affect the procedures that the client might request be performed. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

^[5] [Footnote renumbered and deleted, June 2020, to reflect updates to XBRL technology.]

⁶ In a case in which an entity elects to format permitted information in addition to the required information, preparers should consider the level of detail to format such information so that it is not misleading to the user of the XBRL files. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

⁷ Inspection of the XBRL data may take different forms (for example, different XBRL analysis software may be used to view, manipulate or export the data into various forms for analysis). Alternatively, a mapping worksheet that is prepared by the entity prior to finalizing the XBRL data for submission may be used; in this case additional procedures would be necessary to ascertain whether the selected elements in the mapping worksheet are the same as those included in the final XBRL data. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

	Principles and Criteria		Procedure		Finding
A (1)	All information (including parenthetical information) on the face of the financial statements in the source information ⁸ is formatted in the XBRL data, including facts that represent zero or do not have amounts.		● Each amount on the face of the financial statements (including "0" and amounts represented by numbers or words and including amounts in parentheses and amounts in superscript⁹ footnotes) ● Each line item on the face of the financial statements that represents no value (for example, commitments and contingencies¹⁰ for which there is only disclosure and no value) ● Each heading in the financial statements is formatted as an abstract element		
A (2)	All required document and entity information (DEI) is formatted in the XBRL data.		● Each required document and entity information concept is formatted		

⁸ Source information for purposes of submission to the SEC is the electronic or paper-based financial statements, including the notes; required schedules under Regulation S-X; and document and entity information (DEI) (which includes document type, document period end date, registrant name, central index key (CIK), fiscal year end date, public float, fiscal year, fiscal period, filer category, and reporting status as well as an indication of whether an amendment flag exists [if so, include a description of the reason for the amendment], whether the filer is not required to file reports, and whether the filer is a well-known seasoned issuer). [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

⁹ Text that is included at the bottom of the page or table that is preceded by a superscript number or symbol which represents a footnote. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

¹⁰ Business reporting concepts that have no value for all periods, such as commitments and contingencies, must have the nil attribute set to "true." [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

	Principles and Criteria		Procedure		Finding
A (3)	Each complete note and required schedule under Regulation S-X are formatted separately using a text block element.		- Each note to the financial statements is formatted using a text block element - Each schedule required by Regulation S-X is formatted using a text block element		
A (4)	Each significant accounting policy (whether included in the accounting policies note or elsewhere within the notes to the financial statements) is formatted separately using a text block ¹¹ element.		Each significant accounting policy, identified by management (whether included in the accounting policies note or other notes to the financial statements), is formatted using a text block element		
A (5)	Each table within each note is formatted separately using a text block element.		Each table within each note is formatted using a text block element		

(continued)

¹¹ The U.S. GAAP Taxonomy has adopted a convention for distinguishing among text block elements intended for use in tagging accounting policies, tables, and disclosures. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

	Principles and Criteria		Procedure		Finding
A (6)	Each amount ¹² disclosed in the notes and required schedules under Regulation S-X (including amounts written as words) is formatted separately.		● Each amount¹³ in the notes that is represented in numbers or words (including "0" and amounts in parentheses and amounts in superscript footnotes) ● Each amount in the schedules (including "0" and amounts in parentheses and amounts in superscript footnotes) that is represented in numbers or words ● Amounts which appear more than once and represent the same accounting concept for the same entity (dimensionality is consistent) are tagged consistent with the SEC requirements for tagging of duplicate facts.		
A (7)	Each amount included in the superscript footnotes is formatted separately.		<i>Preceding bullets address this criterion.</i>		

¹² Not all amounts are required to be formatted (for example, there is no need to format the "2" in "2 percent milk") (See SEC Compliance and Disclosure Interpretation 146.16 located on the SEC's website for additional examples). [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

¹³ Optional information may be formatted to provide more context to individual amounts. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

	Principles and Criteria		Procedure		Finding
A (8)	Text that is shown on the face of the financial statements at the bottom of the page preceded by a superscript is formatted using XBRL footnote links. ¹⁴		Text immediately following each superscript footnote number on the face of the financial statements is formatted using a footnote link		
B	The XBRL data contain only facts or presentation or calculation relationships that are included in the source information and other required or permitted information (such as DEI ¹⁵ required by the SEC) and contain only unused elements and linkbase information that are used intermittently unless otherwise prohibited. ¹⁶	C2	Compare the tagged facts in the XBRL data to the source information and identify any tagged facts that are not included in the source information other than other required (for example, DEI) or permitted information (for example, definitions for extension elements).	C2	All tagged facts that were included in the XBRL data were in the source information or otherwise permitted [except as follows: <i>describe elements and relationships</i>].
Mapping of the source information — The elements¹⁷ selected are consistent with the meaning of the corresponding business reporting concepts in the source information in accordance with the SEC's requirements.					

(continued)

¹⁴ The EFM requires this only for the face of the financial statements. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]

¹⁵ DEI includes information that may be outside of the financial statements such as the number of outstanding shares of a company's stock that is in the hands of public investors, as opposed to company officers, directors, or controlling-interest investors (public float) and CIK. [Footnote renumbered, April 2017, to reflect conforming changes necessary due to the issuance of SSAE No. 18. Footnote subsequently renumbered, June 2020, to reflect updates to XBRL technology.]
