

STATE OF ALASKA ITB NUMBER 2524H040
AMENDMENT NUMBER One (1)

AMENDMENT ISSUING OFFICE:

Department of Transportation & Public Facilities
Statewide Contracting & Procurement
P.O. Box 112500
(3132 Channel Drive, Room 350)
Juneau, Alaska 99811-2500

THIS IS NOT AN ORDER

DATE AMENDMENT ISSUED: April 5, 2024

ITB TITLE: Bulk Sodium Chloride

OPENING DATE: April 12, 2024 at 2:00PM. Alaska Time

This is a mandatory return Amendment. *Your bid may be considered non-responsive if this signed amendment is not received [in addition to your bid] by the date and time bids are due.*

Vendor Signature: _____

Date: _____

Printed Name: _____

Offerors Name: _____

The purpose of Amendment #1 is to:

- Provide answers to questions received
- Provide a Revised Attachment #4 DOT/PF Maintenance Station Locations

Questions and answers

Question #1:

Will the stations at Klawock and Kodiak require a tipper truck to offload the bulk salt in containers?

Answer # 1:

Please see ITB Section 2.20 Delivery.

To avoid contamination of the product at delivery, The State requires delivery to all locations under the resulting contract to be made with end dump, dump trucks only. Deliveries made with side or belly dump trucks will be rejected. The return shipment of refused product will be solely at the Contractor's expense with no additional cost to the State.

Question #2:

Will ADOT set minimum experience requirements for a potential bidder due to the complexity and significant risk involved in failing to meet all the requirements of this ITB?

Answer # 2:

Please see ITB Section 1.03 Prior Experience.

No specific minimums have been set for this ITB.

Question #3:

Sec 2.02 (C.) Contract Prices

It is understood that there are no state guarantees regarding minimum or maximum quantities for potential additional orders after September 30th. Does ADOT have a guideline or require the bidder to specify a quantity that would be available for orders beyond September 30th, or is there an unlimited quantity requirement?

Answer #3:

Please see ITB Section 2.32 As-Needed Quantities.
Any orders for As-Needed quantities would be weather driven.

Question #4 A-B:

Sec 2.08 Subcontractors

- A. Would a bidder that meets the minimum qualification requirements for financing and supply, whose primary objective is to exploit the Application of Preferences (Sec 4.02) for up to a 20% advantage and lacks the necessary experience or means to fulfill the requirements of the 1TB, be permitted to subcontract either all or a substantial portion of the work outlined in this contract?
- B. Alternatively, if complete subcontracting is not permitted, what percentage of subcontracted work would be deemed acceptable?

Answer #4 A-B:

Please see ITB Section 1.03 Prior Experience and ITB Section 5.21 Qualified Bidders

Question #5:

Can a bidder who has no previous experience, and whose primary intent appears to be to leverage the Application of Preferences (Sec 4.02) for up to a 20% preference, employ a subcontractor who either failed to perform or encountered performance issues in the preceding year to fulfill this contract's obligations?

Answer #5:

That is a business decision to be made by a bidder.

Question #6:

Sec 2.14 Contamination

Is ADOT willing to permit a bidder to store salt at unpaved stockpile sites?

Answer #6:

That is a business decision made by the selected contractor.
Please see ITB Section 2.14 Product Free of Contamination.

Question #7:

If the state does not require stockpiling on paved surfaces, have you contemplated elevating the purity standard to 98% Dry and/or prohibiting stockpiling on a sand bed?

- If contractors can utilize a sand bed as a substitute for a clean paved storage area, the sand bedding could be misrepresented as salt. A purity standard of 98% Dry would deter this behavior. Allowing sand to be marketed as salt, with a purity standard of only 95%, opens the door for any bidder to employ the practice of stockpiling on a sand bed, regardless of whether a paved surface is obligatory.

Answer #7:

No, that requirement would be unduly restrictive to competition based on the ASTM D632 Specification.
Please see ITB Section 2.11 Product and Packaging Specifications.

Question #8:

Is ADOT planning to conduct a thorough Contractors Site Inspection per Sec 5.07, ensuring that a bidder's stockpile area adheres to standards to prevent the introduction of contaminants to the product?

Answer #8:

Please see ITB Section 5.07 Contractor Site Inspection.
The State at its discretion may conduct site visits.

Question #9:

Sec 2.21 Proof of Delivery or Weight Tickets

Is the applicable scaling requirement expected to be within ADOT standards?

Answer #9:

Please see ITB Section 5.03 Compliance.

Question #10:

Q: Can you clarify the standards regarding taring frequency of empty equipment, and other normal ADOT scaling provisions?

Answer #10:

Please see ITB Section 2.21 Proof of Delivery or Weight Tickets.

For each delivery, the weight ticket must clearly identify the destination, the truck and driver, the gross weight, tare weight and net weight of each vehicle utilized in the delivery.

Question #11:

Will the state enforce the following:

- Ensure the trucks used for delivery comply with ADOT's legal weight regulations?
- The bidder provides only Electronic certified scale tickets?
- The requirement to cover loads outside of Anchorage?
- Reject deliveries of contaminated material that is not within specifications?
- Reject deliveries of non-solar salt where solar salt is required?
- The 48-hour delivery notice requirement to prevent incurring unnecessary costs related to overtime pay or extra labor at the delivery sites?
- The use of faulty or unacceptable delivery equipment?

Answer #11:

Yes. That is the State's intent.

Question #12:

5.21 Qualified Bidders

Would a bidder that meets the minimum qualification requirements for financing and supply, but whose primary objective is to exploit the Application of Preferences (Sec 4.02) for up to a 20% advantage by brokering all of the physical work be considered qualified under Sec. 5.21?

Answer #12:

Please see the following ITB Sections:

- ITB Section 2.08 Subcontractors;
- ITB Section 4.02 Application of Preferences;
- ITB Section 4.08 Employment Program Preference; and
- ITB Section 5.21 Qualified Bidders

Question #13 A-E:

Given the significant risks involved in salt supply and transportation, Alaska's rigorous safety requirements for deicing salt, the short ice-free shipping season, and the considerable cost and complexity of addressing a bidder's failure to deliver, has ADOT taken into account the following considerations?

- A. Requiring redundancy for supply and transportation? (**Sec 2.11** Product and Packaging)
- B. More clarity and a more proportional penalty for non-performance in the terms of this contract in addition to **Sec 2.25** Late Delivery penalties, especially in the case of delivering unacceptable product to ADOT brining stations that require pure solar produced salt for their most effective and efficient use.
- C. Enhancing the currently weak Force Majeure clause (**Sec 5.14**): Storms, road closures, and labor shortages, are typically recognized as Force Majeure events. Salt supply and transportation challenges are fundamental contract requirements, the risk of which are to be assumed in the bidder's offer and are not typically deemed force majeure excuses for non-performance.
- D. Strengthening of the bidder qualification requirements in **Sec 5.21** Qualified Bidder and/or **Sec 1.03** requiring similar Prior Experience.
- E. Adding to **Sec 1.17** Supporting Information, a requirement for a comprehensive operating plan enabling ADOT to thoroughly evaluate the feasibility and dependability of the bidder's supply and delivery strategy.

Answer # 13 A-E:

Yes, however no modifications to the ITB will be made in response to Question #12 A-E at this time.

Question #14

Can you please confirm the addresses for the below FOB points?

Lot 1(B): Central Region:

FOB Point

Kasilof – ?

Lot 1(D): Northern Region:

FOB Point

Birch Lake – ?

5 Mile Edgerton Pit – ?

Cantwell (new location) – ?

MP 184 Richardson – ?

Answer # 14

Please see the Revised Attachment #4 DOT/PF Maintenance Station Locations issued with this Amendment #1. Modifications in red.

Lot 1(B): Central Region:

FOB Point

Kasilof: MP 110 Sterling Highway, Kasilof, AK 99610

Lot 1(D): Northern Region:

FOB Point

Birch Lake: Richardson Hwy MP 207

McCarthy: 5 Mile Edgerton Pit – Edgerton Highway, McCarthy AK

Cantwell (new location): – MP 181.5 Parks Highway, Cantwell, AK

Delta MP 184 Richardson Highway, Delta Junction, AK

Question #15

can you tell me if the 3132 Channel Drive address is where the bids will be publicly opened so that myself or a designee may attend? And if so which room number?

Answer # 15

Department of Transportation & Public Facilities
3132 Channel Drive, Room 350
Juneau, Alaska 99801

End of questions and answers.

Modifications to ITB Sections

Attachment #4 DOT/PF Maintenance Station Locations has been modified for this Amendment #1:

The Attachment #4 DOT/PF Maintenance Station Locations has been modified and provided with this Amendment #1.

Bids received after the Due Date and Time will be considered Non-responsive.

End of Modifications to ITB Sections
