Questions submitted by potential offerors and answers from the state:

Question 1: Did you say that one of the buildings will need to be moved to access underneath?

Answer: One of the buildings may need to be moved depending on your approach to sampling. We can also sample around the building. This will most likely will happen on the second round of sampling based on the results.

Question 2: There's some geophysical data reporting mentioned in the RFP, is that just a leftover and part of the scope?

Answer: One of the final deliverables we are seeking for is a spreadsheet with GPS information on all the samples taken and all the boreholes. We would like to get a spreadsheet with all your take of borings and the information on soils. That's what that geophysical information is, a GPS coordinates essentially in the information for each coordinate.
