

**STATE OF ALASKA ITB NUMBER 2024-1100-0342-C  
AMENDMENT NUMBER ONE**

Department of Fish and Game  
Division of Administrative Services

**THIS IS NOT AN ORDER**

**DATE AMENDMENT ISSUED: 9/16/2024**

**ITB TITLE: Custom Oligonucleotide Synthesis Service**

**ITB OPENING DATE AND TIME: October 3, 2024, 2:00 PM AKST**

The following question has been submitted and ADF&G's response is below:

**Q1:** *Could you please help me understand what product the sequences need to be quoted as? In reference to "#4: A normalized oligo pool in tubes, or bottles", we have two product offerings that could fit the sequences provided.*

**A1:** Regarding your question about item #4 and the sequences for it. You should pick your product that offers all the scales requested in Attachment 1: Table 2: Item 4, and then apply that pricing (\$/nucleotide or % FMV, and any addition charges required for you to assign a price) to the scale, concentration, and volume requested in Attachment 1: Table 1: item 4 and Attachment 2: worksheet: "4. Normalized Oligo Pool".
