SECTION 1. INTRODUCTION & INSTRUCTIONS

SEC. 1.01 PURPOSE OF THE ITB

The Department of Fish and Game, Division of Commercial Fisheries, is soliciting bids from qualified offerors for the removal and installation of new flooring on the ADF&G Research Vessel Medeia.

SEC. 1.02 BUDGET

Approval or continuation of a contract resulting from this ITB is contingent upon legislative appropriation.

SEC. 1.03 DEADLINE FOR RECEIPT OF BIDS

Bids must be received no later than 2:00 PM Alaska Time on **December 30, 2024**, at which time they will be publicly opened. Late bids or amendments will be considered non-responsive and will not be opened or accepted for evaluation.

SEC. 1.04 PRIOR EXPERIENCE

No specific minimums have been set for this ITB.

SEC. 1.05 REQUIRED REVIEW

Bidders shall carefully review this ITB for defects and questionable or objectionable material. Comments concerning defects and questionable or objectionable material in the ITB should be made in writing and received by the procurement officer at least ten days before the deadline for receipt of bids. This will allow time for an amendment to be issued if one is required. It will also help prevent the opening of a defective bid, upon which award cannot be made, and the resultant exposure of bidders' prices.

SEC. 1.06 QUESTIONS PRIOR TO DEADLINE FOR RECEIPT OF BIDS

All questions must be in writing and directed to the procurement officer. The interested party must confirm telephone conversations in writing. Two types of questions generally arise. One may be answered by directing the questioner to a specific section of the ITB. These questions may be answered over the telephone. Other questions may be more complex and may require a written amendment to the ITB. The procurement officer will make that decision.

SEC. 1.07 SITE INSPECTION

Potential bidders are encouraged to visit the work site so that they can see the conditions under which the work described in this ITB will be performed. The bidder's failure to visit the work site will in no way relieve the bidder of the responsibility of performing the work in strict compliance with the true intent and meaning of the terms, conditions, and specifications of this ITB. The site may be inspected by contacting Cedar Stark at *(907) 342-9484*.

This contact person is only empowered to allow potential bidders to view the work site. The contact person cannot and will not answer potential bidder questions regarding the work to be performed under this ITB or the terms, conditions, and specifications of this ITB. Any questions potential bidders have must be directed to the procurement officer as required in Section 1.05.

SEC. 1.08 RETURN INSTRUCTIONS

Electronic bid submission via email is the preferred method of submission. When submitting your bid via email, the entire bid may be emailed to dfg.contracting@alaska.gov and must contain the ITB number in the subject line of the email. The **maximum** size of a single email (including all text and attachments) that can be received by the state is **20mb (megabytes)**. If the email containing the bid exceeds this size, the bid must be sent in multiple emails that are each less than 20 megabytes and each email must comply with the requirements described above.

Please note that email transmission is not instantaneous. Like sending a hard copy bid, if you are emailing your bid, the state recommends sending it enough ahead of time to ensure the email is delivered by the deadline for receipt of bids.

It is the bidder's responsibility to contact the issuing agency at 907-465-6178 to confirm that the entire bid has been received. The state is not responsible for unreadable, corrupt, or missing attachments.

If submitting bids via postal service, Bidders must submit one hard copy of their entire bid, in writing, to the procurement officer in a sealed package. The sealed bid package must be addressed as follows:

SEC. 1.09 ASSISTANCE TO BIDDERS WITH A DISABILITY

The State of Alaska complies with Title II of the Americans with Disabilities Act of 1990. Individuals with disabilities who may need auxiliary aids, services, and/or special modifications to submit a bid should contact the Procurement Officer no later than ten days prior to the closing of the bid to make any necessary arrangements.

SEC. 1.10 AMENDMENTS TO BIDS

Amendments to or withdrawals of bids will only be allowed if acceptable requests are received prior to the deadline that is set for receipt of bids, in accordance with 2 AAC 12.140. No amendments or withdrawals will be

accepted after the deadline unless the delay is due to an error of the contracting agency, in accordance with 2 AAC 12.160.

SEC. 1.11 AMENDMENTS TO THE ITB

If an amendment is issued before the deadline for receipt of bids, the amendment will be posted on the State of Alaska Online Public Notice (OPN) website. The link to the posting of the amendment will be provided to all who were notified of the ITB and to those who have registered with the procurement officer after receiving the ITB from the OPN.

SEC. 1.12 ITB SCHEDULE

The ITB schedule below represents the State of Alaska’s best estimate of the schedule that will be followed. If a component of this schedule, such as the deadline for receipt of bids, is delayed, the rest of the schedule may be shifted accordingly. All times are Alaska Standard Time (AST).

SEC. 1.14 ALTERNATE BIDS

Bidders may only submit one bid for evaluation. In accordance with 2 AAC 12.830 alternate bids (bids that offer something different than what is asked for) will be rejected.

SEC. 1.15 SUPPORTING INFORMATION

Provided a bid meets the requirements for a definite, firm, unqualified, and unconditional offer, the state reserves the right to request supplemental information from the bidder, after the bids have been opened, to ensure that the products or services offered completely meet the ITB requirements. The requirement for such supplemental information will be at the reasonable discretion of the state and may include the requirement that a bidder will provide a sample product(s) so that the state can make a first-hand examination and determination.

A bidder's failure to provide this supplemental information or the product sample(s), within the time set by the state, may cause the state to consider the offer non-responsive and reject the bid.

SEC. 1.16 FIRM, UNQUALIFIED, AND UNCONDITIONAL OFFER

To be responsive a bid must constitute a definite, firm, unqualified and unconditional offer to meet all the material terms of the ITB. Material terms are those that could affect the price, quantity, quality, or delivery. Also included as material terms are those which are clearly identified in the ITB, and which must be complied with at risk of bid rejection for non-responsiveness.

SECTION 2. SCOPE OF WORK AND CONTRACT INFORMATION

SEC. 2.01 SCOPE OF WORK

Scope of Work: Removal of Asbestos Flooring and Replacement with Commercial Grade Epoxy Flooring on the R/V Medeia

Project Overview:

This scope of work outlines the tasks and specifications for the safe removal of asbestos-containing flooring and its replacement with new commercial-grade epoxy flake flooring aboard the R/V Medeia. The work will be performed on three decks: the wheelhouse deck, the main deck, and the accommodation deck. Total area of all flooring is estimated to be 850 square feet. All work must adhere to safety regulations for asbestos abatement, environmental protection standards, and manufacturer specifications for flooring installation. All finished work must be compliant with USCG 46 CFR Chapter I Subchapter C.

1. Project Scope and Areas of Work:

- **Decks to be addressed:**
 - **Wheelhouse Deck**
 - **Main Deck**
 - **Accommodation Deck**
- **Existing Flooring:**

The existing flooring consists of asbestos-containing material (ACM) that must be carefully removed to prevent airborne asbestos fibers. The new flooring will be commercial-grade epoxy that matches the existing epoxy flooring found in the vessel's bathrooms in terms of thickness, texture, and color.
- **Flooring Specifications:**
 - **New Flooring Type:** Commercial-grade epoxy flake flooring.
 - **Thickness:** The new flooring should match the thickness of the existing epoxy flooring in the bathrooms, which is approximately 3mm (± 0.5mm).
 - **Color:** The new flooring will match, as best as possible, the color of the bathroom epoxy flooring. (Provide a sample or color reference for accurate matching before installation.)
 - **Texture:** The new flooring will match the non-slip texture of the existing bathroom epoxy flooring for safety and functional consistency across all decks.

2. Asbestos Abatement and Removal:

- **Asbestos Removal Plan:**

A licensed asbestos abatement contractor will conduct the removal in compliance with local and federal regulations (OSHA, EPA). The process will include:

- **Area Containment:** All work areas will be sealed with plastic sheeting and equipped with negative air pressure systems to prevent the spread of asbestos fibers.
- **Removal Process:** Asbestos-containing flooring will be carefully removed using wet methods to minimize dust generation. The materials will be disposed of according to local environmental regulations. *2 of the 4 staterooms have carpet glued to the flooring. The carpet shall be removed in addition to the flooring underneath.*
- **Post-Abatement Air Quality Testing:** Airborne asbestos fiber concentrations will be tested using air monitoring techniques to ensure the area is safe for subsequent work.

- **Waste Disposal:**

All asbestos-containing materials will be transported and disposed of by a licensed asbestos disposal facility.

3. Surface Preparation and Corrosion Treatment:

- **Inspection of Steel Substrate:**

Once the asbestos flooring is removed, the steel surfaces beneath the flooring will be inspected for corrosion. Any areas with corrosion will need to be addressed before the new epoxy flooring is applied.

- **Corrosion Removal and Surface Treatment:**

- **Rust Removal:** It is estimated that approximately 30 percent of the steel plate subflooring has some corrosion that will need to be addressed. All rusted areas will be mechanically cleaned to remove corrosion. Methods may include sandblasting, needle gunning, grinding, or wire brushing, depending on the extent of corrosion. It is assumed that all steel subfloor is structurally sound. If it is found that there are areas of steel plate subflooring that need to be replaced with new steel, that work will be addressed with a change order as approved by the Owner Representative.
- **Surface Preparation:** After rust removal, the steel substrate will be cleaned to remove debris, oils, and other contaminants. This may include the use of solvents or degreasers.
- **Corrosion Treatment:** Any remaining exposed metal will be treated with an anti-corrosion primer or rust converter that is compatible with the epoxy flooring system. This primer will be applied per the manufacturer's recommendations for optimal adhesion and protection.

- **Surface Profile:**

The steel surface must have the appropriate roughness profile for the epoxy system to bond

properly. If necessary, a mechanical surface profiling method (e.g., shot blasting) will be used to achieve the required surface profile.

4. Epoxy Flooring Installation:

- **Epoxy Flooring System:**

The selected epoxy flooring system must meet the following criteria:

- **Manufacturer Specifications:** The system must comply with the manufacturer’s recommended installation guidelines.
 - **Priming:** A suitable primer will be applied over the prepared surface to ensure optimal bonding of the epoxy coating.
 - **Base Coat:** A base coat of high-performance epoxy will be applied as the foundation layer. A second base coat may be used if deemed necessary for proper thickness.
 - **Top Coat:** A durable top coat will be applied to ensure the flooring’s longevity and resistance to wear and tear, including slip resistance that matches the texture of the existing bathroom epoxy flooring.
 - **Curing:** The epoxy will be allowed to cure according to manufacturer recommendations before being subjected to foot traffic or other activity.
- **Seam Treatment:**
All seams and joints where the new flooring meets walls or other structures will be sealed with an integral cove or compatible epoxy sealant to prevent water infiltration and ensure durability.

5. Stateroom Carpet Installation:

- **Areas to Carpet:**

The four staterooms, which do not include the v-birth area, will require carpet installation on top of the new epoxy flooring with the following specifications:

- **Manufacturer Specifications:** The carpet must be flame and stain resistant and must be installed using the manufacturer’s recommended installation guidelines.
- **Carpet Selection:** Samples and color options will be provided to the Owner Representative who will approve final selection of carpet.
- **Area:** Total stateroom area requiring carpet is approximately 115 square feet.

6. Quality Control and Inspection:

- **Final Inspection:**

Once the epoxy flooring has been installed and cured, a final inspection will be conducted to ensure it meets the following criteria:

- Correct thickness (3mm ± 0.5mm).
 - Consistency in texture and color with the existing bathroom flooring.
 - Proper adhesion to the substrate without visible seams or defects.
 - Slip resistance requirements met.
 - No evidence of bubbling, cracking, or delamination.
- **Testing:**
Random samples may be tested for adhesion, thickness, and texture compliance with the specifications outlined above.

7. Health, Safety, and Environmental Considerations:

- **Asbestos Safety:**
All work must comply with local and federal safety regulations regarding asbestos handling, including the use of personal protective equipment (PPE) such as respirators, disposable clothing, gloves, and eye protection.
- **Waste Management:**
All asbestos waste, as well as any hazardous waste resulting from the removal of old flooring and corrosion treatment, will be handled, stored, and disposed of in compliance with applicable environmental regulations.
- **Ventilation:**
Adequate ventilation will be maintained during the asbestos removal and floor installation phases. Negative air pressure systems will be used during asbestos abatement to ensure containment of asbestos fibers.

8. Project Timeline

All work is to be completed within 21 calendar days once the work begins. The vessel will be available for the start of the work starting Feb. 3rd and work must be completed by March 10th. **Scope of Work: Removal of Asbestos Flooring and Replacement with Commercial Grade Epoxy Flooring on the R/V Medeia**

9. Warranty and Maintenance:

- **Warranty:**
The new epoxy flooring installation will be covered by a 3-year warranty, which includes protection against defects in materials and workmanship.
- **Maintenance:**
Maintenance guidelines for the new epoxy flooring will be provided, including recommendations for routine cleaning and periodic inspections to ensure continued performance.

SEC. 2.02 CONTRACT TERM

The length of the contract will be from the date of award, approximately January 2025, through March 31, 2025, or until work is complete.

A late payment is subject to 1.5% interest per month on the unpaid balance. Interest will not be paid if there is a dispute or if there is an agreement that establishes a lower interest rate or precludes the charging of interest.

SEC. 2.05 ELECTRONIC PAYMENTS

The State of Alaska prefers vendors receive payment via Electronic Funds Transfer (EFT). Bidders may review information concerning the EFT process and access the [Electronic Payment Agreement Form for Vendors](https://doa.alaska.gov/dof/vendor.html) at the following link: <https://doa.alaska.gov/dof/vendor.html>. Method of payment is not a factor in the State's determination for award.

Any single contract payments of \$1 million or higher must be accepted by the contractor via Electronic Funds Transfer (EFT).

SEC. 2.06 PROMPT PAYMENT FOR STATE PURCHASES

The state is eligible to receive a **5%** discount for all invoices paid within **15** business days from the date of receipt of the commodities or services and/or a correct invoice, whichever is later. The discount shall be taken on the full invoice amount. The state shall consider payment being made as either the date a printed warrant is issued or the date an electronic funds transfer (EFT) is initiated.

SEC. 2.07 CONTRACT ADMINISTRATION

The administration of this contract is the responsibility of the procurement officer or person appointed by the Department of Fish and Game , Division of Administrative Services.

SEC. 2.08 CONTRACT PRICE ADJUSTMENTS

This is a fixed price contract.

By signature on their bid, the bidder certifies that all services provided under this contract by the contractor and all subcontractors shall be performed in the United States.

If the bidder cannot certify that all work will be performed in the United States, the bidder must contact the procurement officer in writing to request a waiver at least 10 days prior to the deadline for receipt of bids.

The request must include a detailed description of the portion of work that will be performed outside the United States, where, by whom, and the reason the waiver is necessary.

Failure to comply with these requirements may cause the state to reject the bid as non-responsive or cancel the contract.

SEC. 2.10 THIRD-PARTY FINANCING AGREEMENTS NOT ALLOWED

Because of the additional administrative and accounting time required of the state when third party financing agreements are permitted, they will not be allowed under this contract.

SEC. 2.11 SUBCONTRACTORS

Subcontractors may be used to perform work under this contract. If a bidder intends to use subcontractors, the bidder must identify in the bids the names of the subcontractors and the portions of the work the subcontractors will perform.

Subcontractor experience shall be considered in determining whether the bidder meets the requirements set forth in **SEC. 2.01 PRIOR EXPERIENCE**.

If a bid with subcontractors is selected, the bidder must provide the following information concerning each prospective subcontractor within five working days from the date of the state's request:

- complete name of the subcontractor;

- complete address of the subcontractor;
- type of work the subcontractor will be performing;
- percentage of work the subcontractor will be providing;
- evidence that the subcontractor holds a valid Alaska business license; and
- a written statement signed by each proposed subcontractor that clearly verifies that the subcontractor is committed to render the services required by the contract.

A bidder's failure to provide this information, within the time set, may cause the state to consider their bid non-responsive and reject it.

Note that if the subcontractor will not be performing work within Alaska, they will not be required to hold an Alaska business license.

SEC. 2.12 JOINT VENTURES

Joint ventures are acceptable. If submitting a bid as a joint venture, the bidder must submit a copy of the joint venture agreement which identifies the principals involved and their rights and responsibilities regarding performance and payment.

The state will not accept remanufactured, used, or reconditioned equipment. It is the contractor's responsibility to ensure that each piece of equipment delivered to the state complies with this requirement. A contractor's failure to comply with this requirement will cause the state to seek remedies under breach of contract.

If, for any reason, the lowest contractor is not available to perform the needed service, the state will contact the next lowest priced contractor for that location. This process will continue until a contractor who can perform the service is located. The location of the contractor initially contacted will be determined by the starting location of the call-out. For example, if there was a need to transport a person from Anchorage to Fairbanks and then guard the person for two days in Fairbanks, the agency would contact Anchorage contractors, even though a substantial portion of the actual service would be performed in Fairbanks.

A copy of the Notice of Intent will be sent to each company or person who responded to the ITB. Bidders identified as the apparent low responsive bidders are instructed not to proceed until a Purchase Order, Contract Award, Lease, or some other form of written notice is given by the procurement officer. A company or person who proceeds prior to receiving a Purchase Order, Contract Award, Lease, or some other form of written notice from the procurement officer does so without a contract and at their own risk.

If the specifications describing an item conflict with a brand name or model number describing the item, the specifications govern. Reference to brand name or number does not preclude an offer of a comparable or better product, if full specifications and descriptive literature are provided for the product. Failure to provide such specifications and descriptive literature may be cause for rejection of the offer.

SEC. 5.07 BRAND SPECIFIC

Certain items may be designated brand specific. When an item is designated no substitutions for the brand and model specified will be allowed.

The procurement officer may reject any bid that does not comply with all the material and substantial terms, conditions, and performance requirements of the ITB.

Bidders may not qualify the bid nor restrict the rights of the state. If a bidder does so, the procurement officer may determine the bid to be a non-responsive counteroffer and the bid may be rejected.

- are merely a matter of form or format,
- do not change the relative standing or otherwise prejudice other bidders,

AS 40.25.110 requires public records to be open to reasonable inspection. All other bid information will be held in confidence during the evaluation process and prior to the time a Notice of Intent to Award is issued. Thereafter, bids will become public information.

The Office of Procurement and Property Management (OPPM), or their designee recognizes that some information a bidder submits might be confidential under the United States or the State of Alaska Constitution, a federal statute or regulation, or a State of Alaska statute: i.e., might be confidential business information (CBI). *See, e.g.*, article 1, section 1 of the Alaska Constitution; AS 45.50.910 – 45.50.945 (the Alaska Uniform Trade Secrets Act); *DNR v. Article 1. Indemnification

The contractor shall indemnify, hold harmless, and defend the contracting agency from and against any claim of, or liability for error, omission or negligent act of the contractor under this agreement. The contractor shall not be required to indemnify the contracting agency for a claim of, or liability for, the independent negligence of the contracting agency. If there is a claim of, or liability for, the joint negligent error or omission of the contractor and the independent negligence of the contracting agency, the indemnification and hold harmless obligation shall be apportioned on a comparative fault basis. "Contractor" and "contracting agency", as used within this and the following article, include the employees, agents and other contractors who are directly responsible, respectively, to each. The term "independent negligence" is negligence other than in the contracting agency's selection, administration, monitoring, or controlling of the contractor and in approving or accepting the contractor's work.

2.1 Workers' Compensation Insurance: The Contractor shall provide and maintain, for all employees engaged in work under this contract, coverage as required by AS 23.30.045, and; where applicable, any other statutory obligations including but not limited to Federal U.S.L. & H. and Jones Act requirements.
