- iii. Should potholes, ruts, or similar surface features develop, they shall be back filled and compacted with approved runway surface material.

- ii. The roadway surface will be kept free of rocks three (3) inches or more in diameter.
- iii. All brush or trees must be maintained cut to ground level for a minimum distance of eight (8) feet from the edge of the traveled roadway surface.
- iv. Equipment will not be driven outside the limits above for clearing purposes without proper coordination with the Department Representative for permitting purposes.

- d. **BRIDGE MAINTENANCE:** After spring breakup, the Contractor shall perform a thorough inspection of any bridges and associated apparatuses including approaches and decking. The

Contractor will perform minor maintenance on any Department bridges that are on roadways covered by the terms of this contract. This maintenance will involve washed-out approaches, replacing deck planks or guardrail sections. The Contractor will request from the Department representative any materials necessary to repair or replace these items. The Department will provide these materials unless the damage is due to negligence on part of the Contractor. In the event these items are damaged by the Contractor negligence, the Contractor will replace these items at no additional cost to the Department.

B. NOTAMS:

The Contractor shall advise the Department Representative of any hazardous conditions on the airport and will issue a NOTAM describing the condition. However, due to the remote nature of the Airport, lack of continual monitoring and unreliable communication facilities, it is often difficult to assure that NOTAMS are published for all conditions. Therefore, the Department will assure that a notice is continually published within the "Supplement Alaska" which advises pilots to use caution when operating into the Airport due to the frequent lack of surveillance for airport hazards.
