## **AmeriCorps State and National Performance Measure Requirements**

All applications must include at least one aligned performance measure (output paired with outcome) that corresponds to the proposed primary intervention. This may be a National Performance Measure or an applicant-determined measure depending on the program's theory of change. Applications may also include National Performance Measure outputs without associated outcome(s) provided that the output measures a significant program activity. These output-only measures do not fulfill the requirement for an aligned performance measure but may be selected in addition to the aligned measure(s).

All performance measures must reflect significant program activities whose outputs and outcomes are consistent with the applicant's core theory of change. Applicants are not expected to have performance measures for every program activity. AmeriCorps does not require applicants to use National Performance Measures but expects them to do so if National Performance Measures reflect key outputs and/or outcomes of the theory of change. Applicants may not create applicant determined outputs or outcomes that duplicate existing National Performance Measures.

All performance measures, including output-only measures, must be associated with one or more interventions (service activities). Applicants are expected to use the system-defined intervention categories if they appropriately represent the applicant's program activities. Applicants may not create user-defined intervention labels that duplicate existing intervention categories.
