QUESTIONS SUBMITTED BY OFFERORS AND ANSWER FROM THE STATE

Question 1: *Will an area's toilets be pumped at the same time? And if so, will more than 72 hour notice be given if it is possible? For example will all the expected single pumping toilets in the Kenai area be pumped at once at the end of the season, or sporadically as they fill up.*

Answer 1: Area toilets will not be pumped at the same time. Yes, there will be more than a 72-hour notice. Pumping will be needed at the beginning or end of season and a possibility of a sporadic pumping if necessary.

Question 2: *Will most toilets be pumped at a certain time of the year, and if yes what month?*

Answer 2: Most pumping shall be done June-September.

Question 3: *Is any freshwater required to be added to the vaults after pumping is completed?*

Answer 3: No.

Question 4: *How is backflushing being defined for pumping vault toilets?*

Answer 4: Backflushing is only necessary if there is a build up for minimal residue in the vault.
