

Anarraaq-Aktigirug

Plan of Operations Approval

No. F20259339POOA

DEPARTMENT OF NATURAL RESOURCES
Division of Mining, Land and Water

Month XX, 2025

The Alaska Department of Natural Resources, Division of Mining, Land and Water (DNR), in accordance with and subject to Alaska Statutes 38.05 (Alaska Land Act) and the 11 AAC 86.800 (Plan of Operations), approves the Plan of Operations (POO) dated August 2025 for the Anarraaq and Aktigiruaq Exploration Program (AAEP) submitted by:

Teck American Incorporated
501 N Riverpoint Blvd., Suite 300
Spokane, Washington 99202

Throughout this document, unless otherwise specifically indicated, reference to Teck American Incorporated, or “the Permittee” is considered a reference to Teck American Incorporated a subsidiary of Teck Resources Limited.

Throughout this document, unless otherwise specifically indicated, reference to the State, Department, DNR or Division are considered a reference to the State of Alaska Department of Natural Resources – Division of Mining, Land & Water.

Throughout this document, the Plan of Operations is considered to consist of:

- *Plan of Operations, Anarraaq and Aktigiruaq Exploration Program; Phase 1 – Exploration Access Road and Surface Pad Construction (April 2022)*
- *Anarraaq and Aktigiruaq Exploration Program Construction Rock Handling Plan (Amended February 2022)*
- *Plan of Operations Modification Anarraaq and Aktigiruaq Exploration Access Road and Surface Pad Construction, Facilities Construction, Underground Decline Development (August 2025)*

Reference to any of the plan(s), or its appendices, throughout this document are considered to be a reference to the Plan of Operations. Likewise, any and all stipulations associated with the approval of any of these individual plans are considered to be a requirement of the Plan of Operations Approval.

Effective dates of this plan approval are **Month XX, 2025** through **Month XX, 2030** unless sooner revoked; however, the permittees obligations under the terms and conditions of this plan approval shall continue, unless sooner terminated in accordance with the provisions of this plan approval, until completion of all requirements under and pursuant to the Plan of Operations.

This plan approval is for activities upon DNR managed lands encompassed by Teck American Incorporated Mining Claims (ADL’s 725339-725341, 725343-725346, 725350-725355, 725358, 725359, 725378, 725379, 725390-725392, 725401, 725402, 725404, 725405, 725412, 725413, 725415-725417, 725425, and 725426).

This plan approval does not constitute certification of any property right or land status claimed by the applicant.

The Plan of Operations was found to be complete and is approved with the following conditions:

General Stipulations

Financial Assurance. This Plan of Operations Approval requires the Permittee to submit a bond in a form and substance approved by DNR. Modifications to this Plan of Operations Approval may, at DNR's discretion, require bond review and update. The total financial assurance amount of \$52,527,000 has been approved for AAEP. This amount shall be adjusted annually to account for inflation based on the Anchorage CPI. The annually adjusted amount shall be submitted by one year from the effective date of this approval, and each year thereafter for the term of this approval.

Terms of this Plan Approval. The Terms and Conditions contained within the Plan of Operations, amendments, and approvals, are hereby included as stipulations of this Plan Approval. If there is a difference between the Plan of Operations as submitted and the terms contained within this Plan Approval, the terms contained within this Plan Approval take precedence. Changes to the documents incorporated herein must be approved by DNR if they affect this plan approval. If DNR approves the changes, they become terms of this Plan of Operations Approval.

Authorized Officer. The Authorized Officer (AO) for DNR is the Director of the Division of Mining, Land and Water or their designee. The designated AO is the Mining Section Chief within the Division of Mining, Land and Water, currently Steve Buckley. The AO may be contacted at 550 West 7th Avenue, Suite 900b, Anchorage, Alaska 99501-3577, Attention: Steve Buckley, telephone (907) 269-8621, and fax (907) 269-8930 or at stephen.buckley@alaska.gov. The Permittee will be notified of changes to the AO as needed.

Alaska Historic Preservation Act. The Alaska Historic Preservation Act (AS 41.35) prohibits the appropriation, excavation, removal, injury, or destruction of any State-owned historic, prehistoric (paleontological) or archeological site without a permit from the Commissioner of DNR. Activities described in the Plan of Operations are subject to the following stipulations:

- a. If cultural or paleontological resources are inadvertently discovered as a result of or during the activities authorized by this Plan of Operations Approval, all activities which would disturb such resources shall be stopped and measures taken to protect the site. The U.S. Army Corps of Engineers archeologist (907-753-2690) and the State Historic Preservation Officer (907-269-8721) shall be contacted immediately so that compliance with state and federal laws may begin.
- b. If burials or human remains are discovered as a result of or during the activities authorized by this Plan of Operations Approval, all activities which would disturb such remains shall be stopped and measures taken to protect the site. In addition to the U.S. Corps of Engineers Archeologist and the State Historic Preservation Officer, the State Troopers shall be contacted immediately so that compliance with state and federal laws may begin.

Forestry Resources. All timber on state land within the permitted area that will be disturbed due to project operations shall be:

1. used for exploration activities in or on the permitted area; or
2. shall be chipped and mulched for use as a soil amendment for enhancing interim reclamation, or increasing the resources to reclaim the mined area at closure; or
3. after consultation with the DNR Division of Forestry and where determined by the Permittee to be of suitable size and located in affected areas that are easily accessible, felled, limbed, bucked into log lengths, and decked in areas easily accessible to the public for collection of firewood free of charge; or
4. the Division of Mining, Land & Water, in consultation with DNR Division of Forestry, may approve alternate methods of vegetation clearing.

Reporting. The results of monitoring, required by all state and federal authorizations (unless otherwise indicated by the AO), obtained during a reporting period shall be summarized and submitted to the AO or designee quarterly, no later than 60 days after the last day of the quarter, in an electronic format acceptable to DNR. Any other monitoring required by state or federal authorizations shall be provided upon request of the AO or designee.

An annual report will be due by March 1 and shall summarize activities (surface disturbance, reclamation, and exploration activities) conducted during the previous calendar year and include fourth quarter monitoring data. The annual report shall also address the adequacy of the financial responsibility, including, but not limited to, inflation, significant changes in reclamation activity costs, concurrent reclamation, expansion or other changes to the operation of the facility. Electronic copies should also be sent to DNR (Adam Daniels at adam.daniels@alaska.gov and dnr.water.reports@alaska.gov, and William Groom at william.groom@alaska.gov), Alaska Department of Fish & Game (Audra Brase at audra.brase@alaska.gov), and Alaska Department of Environmental Conservation (DEC) (Tim Pilon at tim.pilon@alaska.gov). Amendments to this distribution list will be provided to the Permittee as needed.

Maps. The Permittee shall submit to DNR an annual set of maps illustrating the current development of all facilities within the Plan of Operations. The plan maps shall show cleared and grubbed areas; growth medium stockpiles; roads; waste rock dump development; material site development; and facility construction. Maps shall be appropriately scaled to review the development of individual facilities.

Environmental Audit. Unless waived by the department, a periodic third-party environmental audit shall be completed during the final year of the permit term or sooner if final closure starts during the permit term. However, the field inspection portion of the audit shall be conducted during the snow free season the year before permit expiration. The audit

will include all aspects of this Plan of Operations Approval. The environmental audit is required to verify the Permittee's compliance with applicable environmental laws associated with this permit. The third-party contractor should be mutually agreed on by the State and the Permittee, but in the event that agreement cannot be reached, the State retains the final contractor selection decision. Costs for the third-party contractor shall be borne by the Permittee. The intent of the audit is to evaluate whether both Permittee management and agency permit administration provide reasonable assurances that the facility and environmental controls are functioning as intended. The environmental audit shall include an evaluation of the adequacy of the approved financial assurance.

Temporary Closure. The Permittee shall notify the AO in writing at least thirty (30) days prior to any planned Temporary Closure of ninety (90) days or longer. The Permittee shall notify the AO of any unanticipated Temporary Closure expected to last ninety (90) days or more within ten (10) days of the first day of the Temporary Closure. The notice shall state the nature and reason for the Temporary Closure, the anticipated duration of the Temporary Closure, what actions will be taken to maintain compliance with project permits and plan approvals, and any event which would reasonably be anticipated to result in the resumption of exploration or the permanent cessation of exploration. Operations must resume for not less than ninety (90) consecutive days in order to terminate the running of the Temporary Closure. If a Temporary Closure extends beyond three (3) years, the Department may deem mining operations to be permanently abandoned or ceased, and whereupon final reclamation must commence unless otherwise agreed by the Department.

The Permittee shall ensure that the project area and facilities are maintained in a safe condition during a Temporary Closure and the Permittee shall not allow the project area or facilities to be degraded / eroded or facilities to fall into a state of disrepair during or as a result of the Temporary Closure. Action shall be taken to prevent or mitigate any impacts to ground or surface waters from project facilities. All collection, treatment, maintenance, and monitoring activities required under project permits or plan approvals shall be performed under any Temporary Closure.

Abandonment or Cessation of Operations. Not later than thirty (30) days after the permanent cessation or abandonment of exploration operations, the Permittee shall notify the AO of the cessation of exploration operations and provide a schedule for the final reclamation of the site.

Permanent Closure. For purposes of determining monitoring requirements and bond release, closure of a facility is achieved when the applicable surface and ground water quality standards have been met, and the site has been reclaimed in accordance with the reclamation plan.

Erosion Standard. Erosion features which form in areas that have been recontoured and covered with topsoil must be stabilized if they affect the long-term stability of the reclaimed area or may result in additional erosion or sedimentation. Actions to stabilize erosion features shall be conducted in a manner that minimizes disturbance to adjacent areas. Subsequent inspections shall be completed to verify that rills and gullies do not persist. If chronic or long-term erosion

features are identified, then remediation of the site drainage that is contributing to the formation of the rills and gullies shall be completed.

Invasive Weed Control. The Permittee shall inspect revegetated areas to identify invasive plant species and eradicate these species to the extent practicable. If invasive plant species are identified, the Permittee shall notify the AO.

Fuel and Hazardous Substances. Secondary containment shall be provided for fuel or hazardous substances.

- a. **Container marking.** All independent fuel and hazardous substance containers shall be marked with the contents and the Permittee's name using paint or a permanent label.
- b. **Fuel or hazardous substance transfers.** Except for hand operated equipment, secondary containment or a surface liner must be placed under all container or vehicle fuel tank inlet and outlet points, hose connections, and hose ends during fuel or hazardous substance transfers, where feasible and prudent. Appropriate spill response equipment must be on hand during any transfer or handling of fuel or hazardous substances to respond to a spill of up to five gallons. Transfer operations shall be attended by trained personnel at all times.

Vehicle refueling shall not occur below the ordinary high waterline of any waterbody. This restriction does not apply to water-borne vessels provided no more than 30 gallons of fuel are transferred at any given time.

- c. **Storing containers within 100 feet of waterbodies.** Containers with a total capacity of 55 gallons or more, which contain fuel or hazardous substances shall not be stored within 100 feet of a waterbody. (Note – This stipulation [Subsection “c” of Fuel and Hazardous Substances] does not apply to the tailings storage facility during mine operations.)
- d. **Exceptions.** The AO may under unique or special circumstances grant exceptions to this stipulation on a case-by-case basis. Requests for exceptions should be made to the Authorized Officer.
- e. **Definitions.**
 - 1) **"Containers"** means any item which is used to hold fuel or hazardous substances. This includes tanks, drums, double-walled tanks, portable testing facilities, fuel tanks on small equipment such as light plants and generators, flow test holding tanks, slop oil tanks, bladders, and bags. Manifolded tanks or any tanks in a series must be considered as a single container. Vehicles, including mobile seismic tanks, are not intended to be included under this definition.
 - 2) **"Hazardous substance"** is defined under AS 46.03.826(5) as (A) an element or compound which, when it enters into the atmosphere, or in or upon the water, or

surface or subsurface land of the state, presents and imminent and substantial danger to the public health or welfare, including but not limited to fish, animals, vegetation, or any part of the natural habitat in which they are found; (B) oil; or (C) a substance defined as a hazardous substance under 42 U.S.C. 9601(14).

- 3) **"Secondary containment"** means an impermeable diked area or portable impermeable containment structure capable of containing 110 percent of the volume of the largest container. Double-walled tanks do not qualify as secondary containment unless valves and piping are contained within the outer double wall.
 - 4) **"Surface liner"** means any safe, non-permeable container (e.g., drips pans, fold-a-tanks, etc.) designed to catch and hold fluids for the purpose of preventing spills. Surface liners should be of adequate size and volume based on worst-case spill risk.
- f. **Notification of Discharge.** The Permittee shall immediately notify DEC and the AO of any unauthorized discharge of any amount of oil to water, a discharge of any amount of hazardous substances (other than oil), and any discharge of oil greater than 55 gallons on land. All fires and explosions must also be reported immediately.
- If a discharge, including a cumulative discharge, of oil is greater than 10 gallons but less than 55 gallons, or a discharge of oil greater than 55 gallons is made to an impermeable secondary containment area, the Permittee shall report the discharge within 48 hours. Any discharge of oil greater than one gallon up to 10 gallons, including a cumulative discharge, solely to land, must be reported in writing on a monthly basis.
- Notification of discharge must be made to DEC online at ReportSpills.alaska.gov or by phone at 1-800-478-9300.
- Notification of discharge must be made to the appropriate DNR Office, preferably by e-mail: Anchorage email dnr.scro.spill@alaska.gov, (907) 269-8503; Fairbanks email dnr.nro.spill@alaska.gov, (907) 451-2739; Juneau email dnr.sero.spill@alaska.gov, (907) 465-3400. The Permittee shall supply the AO with all incident reports submitted to DEC.
- g. **Remediation.** Should any unlawful discharge, leakage, spillage, emission, or pollution of any type occur due to the Permittee's, or its employees', agents', contractors', subcontractors', licensees', or invitees' act or omission, the Permittee, at its expense, shall be obligated to clean the area to the reasonable satisfaction of the State of Alaska.

Inspection and Entry. The Permittee shall allow authorized representatives of DNR to enter into and upon the area and facilities covered under this plan approval at all reasonable times without notice for the purpose of inspecting the area and activities covered under this plan approval. Said inspections shall be subject to the safety and security procedures adopted by the Permittee.

At any time upon DNR's written request, the Permittee shall promptly make any and all records, documents, or other information required to be kept or maintained by law, regulation,

ordinance or this Plan of Operations Approval available to DNR for inspection and copying, as reasonably required by DNR, to determine the Permittee's compliance with local, state and federal laws applicable to the operations authorized under this plan approval.

Violations. This authorization is revocable immediately upon violation of any of its terms, conditions, stipulations, nonpayment of fees, or upon failure to comply with any other applicable laws, statutes and regulations (federal and State).

Assignment. This plan approval may be transferred or assigned with prior written approval from DNR. DNR will only disapprove a transfer with good cause and will evaluate whether the proposed assignee (1) is qualified to hold interests in state mining rights under AS 38.05.190 and to acquire all other permits and authorizations necessary to conduct operations under the plan; (2) is on notice of default or subject to an enforcement action by any state agency on any lease, reclamation bond, or other permit within the state. Any assignee must commit in writing to be bound by this plan approval to the same extent as the Permittee and must provide to DNR all proofs of insurance, bonds, or undertakings required by this plan approval. Transfer of this plan approval may, at DNR's discretion, require bond review and update.

Other Authorizations. The issuance of this authorization does not alleviate the necessity of the Permittee to obtain authorizations required by other agencies for this activity.

Valid Existing Rights. This authorization is subject to all valid existing rights in and to the land under this authorization. The State of Alaska makes no representations or warranties whatsoever, either expressed or implied, as to the existence, number, or nature of such valid existing rights.

Reservation of Rights. DNR reserves the right to grant additional authorizations to third parties for compatible uses on the land under this authorization (as per 11 AAC 86.145).

Change of Address. Any change of address must be submitted in writing to the AO.

Modifications. Any request for modification of the plan of operations and any other affected permits or authorizations must be made by written application to DNR. Amendments to the Plan of Operations may, at the discretion of DNR, require bond review and update.

Statutes and Regulations. This plan approval is subject to all applicable state and federal statutes, including state, federal, and any local statutes and ordinances in effect on the effective date of this plan approval, new statutes, regulations, and ordinances enacted or promulgated after said effective date, and changes to existing statutes and regulations made after the effective date, to the extent constitutionally permissible.

Severability. If any clause or provision herein contained shall be adjudicated to be invalid, it shall not affect the validity or effect of any other clause or provision of this plan approval, nor constitute any cause of action in favor of either the Permittee or DNR as against the other.

Save Harmless. The recipient of this Plan of Operations Approval shall indemnify, save harmless, and defend the DNR, its agents and its employees from any and all claims, actions or liabilities for injuries or damages sustained by any person or property arising directly or indirectly from approved activities or the Permittee's performance under this Plan of Operations Approval. However, this provision has no effect, if, and only if, the sole proximate cause of injury is the DNR's negligence.

Project Specific Stipulations

Permit Renewal. At least 120 days before the expiration of the plan approval, the Permittee must submit to the department an updated reclamation plan and cost estimate for approval.

Material Sale. Extraction and use of material under the Plan of Operations is authorized under AS 38.05.565, Sale or Disposal of Materials for Special Purposes. Under AS 38.05.565(a)(3), DNR may negotiate the sale of materials from sources or sites other than those designated under AS 38.05.550(b) to a holder of a permit, land lease, or right-of-way issued by DNR, if the materials to be extracted and removed during the construction, use, or maintenance of the facility authorized by the permit, land lease, or right-of-way are necessary and incidental to the primary purpose of the authorization, and the materials are put to beneficial use in a way that alters the character, usefulness, or availability of the materials.

The Plan of Operations includes the construction, use, and maintenance of gravel pads and access roads crossing and reaching mining claims currently held by the Permittee, which will necessarily require use of material from locations on state land pursuant to and within the Plan of Operations area. Use of this material is necessary and incidental to the Permittee Plan of Operations under 11 AAC 86.150, *Instead of Land Use Permit*. Material may be sold from the material sources identified in the Plan of Operations.

A material sale contract will be issued to the Permittee for 375,000 cy of material to be sold incidental to their approved Plan of Operations. Pursuant to that material sale contract, material will be charged at the representative regional sales price and annual accounting will be required.

Special Conditions

Public Access. Per 11 AAC 86.800(b)(12), to protect public safety and health, the Permittee is authorized to exclude the public from an area up to and including 100 meters from the edge of each pad and access road.

Commencement of permitted activities will be considered an acceptance by Teck American Incorporated of these stipulations.

Date

Appeal Right and Procedure

An eligible person affected by this decision may appeal to the DNR Commissioner per AS 44.37.011 and 11 AAC 02. Any appeal must be received within twenty (20) calendar days after issuance of this decision under 11 AAC 02.040. An eligible person must first appeal a decision to the Commissioner before seeking relief in superior court. The Alaska Court System establishes its own rules for timely appealing final administrative orders and decisions of the department.

Appeals may be mailed or hand-delivered to the DNR Commissioner's Office, 550 W. 7th Avenue, Suite 1400, Anchorage, Alaska, 99501; or faxed to (907)-269-8918; or sent by electronic mail to dnr.appeals@alaska.gov. Appeals must be accompanied by the fee established in 11 AAC 05.160(d)(1)(F), which has been set at \$200 under the provisions of 11 AAC 05.160 (a)-(b). A copy of 11 AAC 02 is available on the department's website at <https://dnr.alaska.gov/mlw/pdf/DNR-11-AAC-02.pdf>.
