# STATE OF ALASKA DEPARTMENT OF NATURAL RESOURCES SOUTHCENTRAL REGIONAL LAND OFFICE

# Regional Manager's Decision

ADL 234641
Matanuska Electric Association, Inc.
Public Utility Easement

## **REQUESTED ACTION**

On September 6, 2024, the Department of Natural Resources (DNR), Division of Mining, Land, and Water (DMLW), received an application for an easement from Matanuska Electric Association (MEA; the applicant) for a proposed overhead single-phase primary utility line on State-owned, DMLW-managed uplands near Trapper Creek, Alaska. The purpose of the proposed easement is to install an overhead 14.4 kV single-phase primary (residential) electric line that will extend from an existing power pole. The applicant has requested a public utility easement approximately 294 feet long, 30 feet wide, and 0.2025 acres in size.

## RECOMMENDED ACTION

An easement be created with the following parameters:

Width: 30 feetLength: 294 feetAcreage: 0.2025Term: Indefinite

• Grantee: Matanuska Electric Association

• Type of easement: Public Utility

#### SCOPE OF DECISION

The scope of this decision is to determine if it is in the State's interest to create an easement for the proposed use. The scope of administrative review for this authorization is limited to (1) reasonably foreseeable, significant effects of the uses to be authorized; (2) applicable statutes and regulations; (3) facts pertaining to the land or resources; and (4) issues that are material to the determination that issuing the authorization is in the interest of the State of Alaska. All other aspects of the applicant's project are outside the scope of this decision.

#### STATUTORY AUTHORITY

This easement application is being adjudicated pursuant to AS 38.05.850 and the Alaska Land Act as amended.

#### ADMINISTRATIVE RECORD

The administrative record for the proposed action consists of the Constitution of the State of Alaska, the Alaska Land Act as amended, applicable statutes and regulations referenced herein, the 2011 Susitna Matanuska Area Plan (SMAP) and other classification references described herein, and the casefile for the application serialized by DNR as ADL 234641.

## **LOCATION INFORMATION**

## **Geographic Location**

The applicant has requested that DMLW authorize an easement near Trapper Creek, Alaska.

## **Meridian Township Range Section**

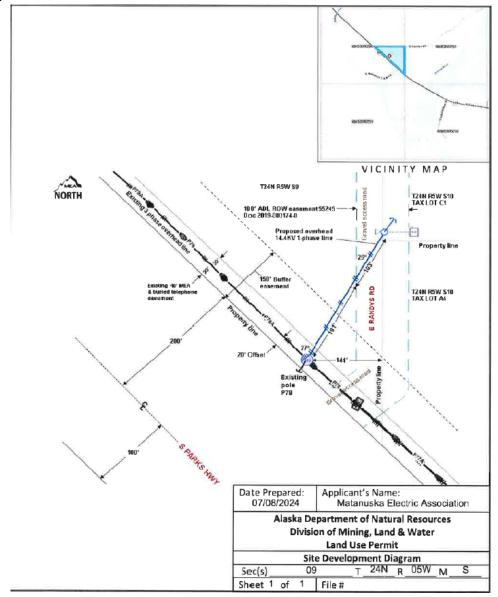

The applicant has applied to use State-owned, DMLW-managed uplands lands within Section 9, Township 24 North, Range 5 West, Seward Meridian, Alaska.

## **Other Land Information**

Municipality: Matanuska Susitna Borough

Regional Corporation: Cook Inlet Regional Corporation (CIRI)

FIGURE 1 – A map provided by the applicant that depicts the area and proposed utility line easement.

#### TITLE

The State of Alaska holds title to applicable portions of lands within Section 9 of Township 24 North, Range 5 West, Seward Meridian, Alaska, per Patent Number 1226350 recorded at Talkeetna Recording District. The associated DNR land acquisition casefile is GS 172.

Any State-owned, DMLW-managed lands, or State-selected lands that may be managed by DMLW in the future that are crossed by the authorization considered herein at the time of this decision, which are omitted from this list, and are subsequently identified, are included in this decision. Navigable and public water determinations are subject to change pursuant to future findings.

## THIRD PARTY INTERESTS

The applicant has requested an easement that may impact the following interests. Third party interest notification has been sent to all interest holders noted below.

• ADL 230227 – Private Easement, Fiber Optic, GCI Communication Corp.

#### PLANNING & CLASSIFICATION

The proposed easement area is located within the 2011 Susitna Matanuska Area Plan (SMAP), Map 3-9, Unit P-15. Unit P-15 is designated as Habitat (Ha) and Water Resources (Wr) which converts to classifications of Wildlife Habitat Land and Water Resources Land by the Land Designation – Conversion to Classification Table (Table 4.2, pg. 4-5).

The management intent of Unit P-15, listed within the Resource Allocation Table – Petersville Road Region (pg. 3-47), notes to manage the area to protect habitat and hydrological functions. Additionally, it states the lands are intended to remain in state ownership and should be maintained in an undisturbed, natural state. A 150-foot scenic buffer on each side of the right-of-way for the Parks Highway is to be maintained in natural vegetation.

In the Designations section of Chapter 3 (pg. 3-3 through 3-5), for the designations of Habitat and Water Resources, utilities may be appropriate if properly designed, provided that habitat functions, wetland integrity, and water resource functions can be maintained.

In consideration of the above, the approval of a public utility easement does not conflict with the management intent and goals of the SMAP.

#### **ACCESS**

Functional legal access to the state land discussed herein exists via East Randys Road.

#### PUBLIC NOTICE & AGENCY REVIEW

#### **Public Notice Summary**

Public notice of the application was conducted from May 14, 2025, to June 13, 2025. The notice was posted to the State of Alaska Online Public Notice System and was sent to the Trapper Creek post office and the Trapper Creek Library, for display on their notice boards. The notice was also sent to the following recipients:

- Cook Inlet Regional Corporation
- 3 directly adjacent landowners

## **Public Notice Comment & Response**

No comments were received during the public notice period.

## **Agency Review Summary**

Agency review of the application was conducted from May 14, 2025, to June 13, 2025. The notice was sent to the following recipients:

## **State Agencies**

- DNR DMLW Leasing Section
- DNR DMLW Permitting Section

## **Agency Review Comment & Response**

A total of 3 comments were received during the agency review and are summarized below:

Comment: On May 14, 2025, the DEC, Division of Spill Prevention and Response;

Contaminated Sites Program stated "no comment". **Response:** SCRO acknowledges the response.

Comment: On June 10, 2025, DOT&PF stated "no comment".

**Response:** SCRO acknowledges the response.

**Comment:** On June 11, 2025, ADF&G stated "no objection" to the issuance of the public utility easement, but did provide the following information for the applicant:

Preserving habitat (such as trees, shrubs, or ground cover) while meeting project goals is crucial for safeguarding habitat and sustaining breeding bird populations. During planning, it's advisable to schedule vegetation clearing before or after the breeding season. For more details on nesting seasons, refer to <a href="https://www.fws.gov/alaska-bird-nesting-season">https://www.fws.gov/alaska-bird-nesting-season</a>.

Response: SCRO acknowledges the comment and forwarded it to the applicant.

## **ENVIRONMENTAL CONSIDERATIONS**

Staff evaluate environmental factors directly related to the authorization of use of state lands, specifically whether the approval of the authorization is in the State's interest. The purpose of this consideration is to identify any associated mitigation measures or other requirements necessary to protect the public interest, while informing the overall decision of whether or not to approve the authorization.

Environmental contamination risk associated with this proposed easement is minimal. Staff recommend that fuel, lubricants, and other hazardous materials be restricted to those necessary and be contained within tools and vehicles when equipment is necessary for construction and maintenance activities. Staff further recommend that no fuel or other hazardous materials are authorized to be stored on site. There are no other known environmental considerations or constraints in this location.

## ECONOMIC BENEFIT & DEVELOPMENT OF STATE RESOURCES

DMLW assesses the economic benefits of the proposed authorization and whether it encourages the development of the State's resources. This authorization will provide a direct economic benefit to the state in the form of land use fees. Additionally, the proposed easement facilitates the expansion of the public utility system, which will promote conditions for economic development, thus providing an indirect benefit to the state. There are no known competing projects for use of these lands, therefore issuance of this easement provides for the greatest economic benefit to the State and is consistent with the legislative intent expressed in AS 38.05.850.

## PERFORMANCE GUARANTY

A performance guaranty is intended to incentivize compliance with the terms and conditions of the entry authorization and easement. It also provides a mechanism for the State to ensure that the applicant shares in the financial burden in the event of noncompliance (including fee payment, survey, appraisal, etc.), restoration (interim and final), and any associated costs after termination or expiration of the easement. Staff recommend that the applicant be required to submit a performance guaranty in the amount of \$6,615.00 to ensure completion of entry authorization requirements. These funds will also serve as a survey deposit (per AS 38.05.860) and may be reduced one time during the term of the entry authorization by an amount equal to payments made by the applicant to a licensed surveyor under contract for completion of an as-built survey in accordance with survey instructions issued by the DMLW Survey Section, as described herein.

This performance guaranty shall remain in place during the term of the entry authorization and will be subject to release upon the acceptance of a DMLW-approved as-built survey and the fulfillment of all terms, conditions and stipulations of this decision and the entry authorization. The performance guaranty may also be adjusted to reflect updates and changes in the associated project, and the applicant may be required to provide an additional performance guaranty if DMLW determines there is additional risk to the State. The performance guaranty may be utilized by DMLW to cover actual costs incurred by the State to pay for necessary corrective actions in the event the applicant does not comply with site utilization and restoration requirements and other stipulations contained in the entry authorization. An additional performance guaranty may be required for an extension of the entry authorization beyond the initial term proposed under this decision.

## **History of Compliance**

DNR Land Administration System records indicate that the applicant is in a state of compliance with the terms of other DMLW-issued authorizations.

## **INSURANCE**

Staff recommend that the applicant be required to submit proof of insurance in an amount the insurance company determines necessary to protect both the State and the applicant from risks associated with the planned activities under the Entry Authorization for ADL 234641. The applicant will be responsible for maintaining the necessary insurance during the term of the Entry Authorization. The insurance may be adjusted to reflect updates and changes in the associated project and the applicant may be required to furnish additional insurance if DMLW determines there is additional risk to the State. A certificate of insurance listing the State of Alaska, Department of Natural Resources as an additional insured on the policy, or other insurance acceptable to the State, must be submitted to DMLW prior to entry on state land and must be maintained throughout the term of the Entry Authorization.

#### **SURVEY**

A DMLW-approved as-built survey is required to determine the proper location and acreage of installed improvements and the associated easement on State-owned, DMLW-managed lands. The applicant will be required to request survey instructions prior to issuance of the entry authorization. The survey must be produced in accordance with survey instructions provided by the DMLW Survey Section and stamped by a Professional Land Surveyor registered in the State of Alaska. A final easement will not be issued until the as-built survey has been approved by DMLW.

#### **FEES**

- The applicant shall pay an annual interim land use fee of \$120 per acre rounded up to the nearest acre, with a \$240 minimum, totaling \$240.00, per 11 AAC 05.070 (d)(2)(I) for the term of this EA. This fee is charged concurrently with any other land use fees that may be described herein
- The applicant shall pay a one-time fee of \$0.56 per linear foot for a public easement for a utility per 11 AAC 05.070(d)(2)(C) and Director's Fee Order No. 3. The total charge for this fee will be determined following DMLW's approval of an as-built survey document.

These fees may be adjusted if regulation(s) or department fee schedule pertaining to the fee(s) change during the term of the entry authorization and/or easement. All fees shall accrue from the effective date of the decision.

Additionally, the applicant shall pay applicable document recording fees prior to DMLW's execution and recordation of the easement document.

## **ENTRY AUTHORIZATION**

An entry authorization shall be issued for a term ending 5 years from the effective date of this decision for the purpose of constructing, surveying, operating, and maintaining the infrastructure considered herein prior to DMLW's issuance of a public utility easement. The entry authorization may be revoked if the applicant has not submitted DMLW with a draft as-built survey one year prior to the expiration of the entry authorization. An extension of the entry authorization may be granted at the written request of the applicant if granting the extension is deemed appropriate by DMLW and may be subject to applicable fees. If an extension is required, the applicant should contact DMLW at least 30 days prior to the expiration of the entry authorization and certify there have been no changes to the approved development plan.

No authorization shall be granted until the following deliverables have been provided to DMLW:

- Land use fees.
- Evidence of having made a request for survey instructions to the DMLW Survey Section.
- Certificate of Insurance.
- A performance guaranty.

#### RECOMMENDATION

Based upon the information provided by the applicant, as well as review of relevant planning documents, statutes, and regulations related to this application, it is the recommendation of staff to issue an easement as described above, on the condition that all stipulations are followed as described in the attached authorization.

Savannah Lilyhorn	9/9/2025	
Savannah Lilyhorn, Natural Resource Specialist	Date	
DMLW Southcentral Regional Land Office		

#### REGIONAL MANAGER'S DECISION

When adjudicating an easement authorization pursuant to AS 38.05.850, DMLW seeks to responsibly develop Alaska's resources by making them available for maximum use and benefit consistent with public interest. In consideration of all events and criteria listed above, I hereby determine that the authorizations to be granted by this decision are consistent with DMLW's mission, that this project is consistent with the overall classification and management intent for this land, and that issuance of an authorization as described above is in the interest of the State of Alaska. The Department assumes no responsibility for maintenance or liability for injury or damages attributable to this authorization.

This decision may be rescinded by written notification if, after 60 days from the effective date of this decision, the applicant has not completed all requirements outlined in this decision for issuance of the authorization. Additional time may be allotted to complete these requirements; however, this will not extend the total term of the authorizations issued under this decision. This decision goes into effect and becomes a final administrative order and decision of the department on the first business day after the twentieth calendar day after signature.

Brent Reynolds
Brent Reynolds, Natural Resource, Manager 2
DMLW Southcentral Regional Land Office

## **ATTACHMENTS**

- Entry authorization, unsigned
- Draft easement document

## **APPEAL**

An eligible person affected by this decision may appeal to the DNR Commissioner per AS 44.37.011 and 11 AAC 02. Any appeal must be received within twenty (20) calendar days after issuance of this decision under 11 AAC 02.040. An eligible person must first appeal a decision to the Commissioner before seeking relief in superior court. The Alaska Court System establishes its own rules for timely appealing final administrative orders and decisions of the department.

Appeals may be mailed or hand-delivered to the DNR Commissioner's Office, 550 W. 7th Avenue, Suite 1400, Anchorage, Alaska, 99501; or faxed to (907)-269-8918; or sent by electronic mail to dnr.appeals@alaska.gov. Appeals must be accompanied by the fee established in 11 AAC 05.160(d)(1)(F), which has been set at \$200.00 under the provisions of 11 AAC 05.160 (a)-(b). A of 11 AAC 02 is available on the department's website copy https://dnr.alaska.gov/mlw/pdf/DNR-11-AAC-02.pdf.
