Figure 5. Cross-section through typical trail on side slope

Attachment 2

Attachment 2: Hardrock Narrative

1.) Describe access to property, drill/trench sites, including length and type of access routes. Describe access reclamation measures to be conducted and timeline.

Most areas have well-established access routes, which allow us to limit disturbance to selected drill sites. In areas that do require improved access, we will typically employ a John Deere 650 dozer equipped with an 8-foot blade. Trails, as designed, will involve 1,400 square-feet of surface disturbance per 100-foot leg. All trails will be constructed with crowns and water bars to minimize erosion. After drilling is complete and the drill pad is decommissioned, mineral soil is regraded to mimic the pre-construction geometry, topsoil is placed on top of mineral soil and vegetation is distributed on top of topsoil to foster natural revegetation. Reclamation is conducted concurrently with exploration activities during the thawed months and conducted after thaw during frozen months. Access is maintained to SWPPP standards and stabilized after use to SWPPP standards.

2.) Describe exploration method, scope of work proposed, equipment, when and where activities will occur, personnel housing location and camp description.

Up to **1,000 drill holes** and **100 trenches** are planned over the **10-year APMA authorization period**. Access maps for the claims proposed for exploration will be included in each **annual work plan**.

Refer to **Attachment 1, Tables 1, 3, and 5** for APMA 9156 claims **not scheduled for work in 2025**, but that may be subject to exploration activities during **2026–2035**.

Refer to **Attachment 1, Tables 2 and 4** for APMA 9156 claims **scheduled for work in 2025**.

A track-mounted, diamond drill rig or reverse circulation drill rig may be used to drill 4- to 6-inch boreholes. All holes will be abandoned by backfilling completely with bentonite and cement, except where commissioned as piezometers or thermistors, in which case, a small diameter standpipe and/or steel surface casing will be above grade upon completion.

Diamond drill rigs and reverse-circulation drill rigs use drilling fluid consisting of water and non-toxic additives (i.e., bentonite). The water used for the drilling will be supplied by wells. Drilling fluid will be recirculated to reduce overall water consumption, when possible.

Trenching may be conducted using a thumbed excavator. Trenches, as designed, will involve 2,400 to 3,800 square-feet of surface disturbance per 100-foot leg, dependent on slope and soil conditions. Adequate warnings will be posted near all open trenches to alert other land users of the potential hazard.

3.) Describe site preparation activities and pre-reclamation measures.

Vegetation and overburden will be segregated and stockpiled for reclamation.

4.) Describe pad construction and dimensions.

A typical drill pad, as designed, will be approximately 4,350 square-feet in area. Bulldozers and/or excavators will remove and stockpile vegetation and topsoil to the downslope side of the pad to act as a sediment catchment, the mineral soil to graded to level and a sump is dug near the proposed

drill collar. Berms are constructed near pad edges that have sufficient drop-off height to induce a vehicle roll-over.

5.) Describe drill core management, to include transportation of core, storage, and removal or disposal from the exploration project.

Drill Core is transported from the drill site to the Fort Knox core processing facility in pickup trucks, where it is logged and sampled with samples picked up by a commercial geologic materials handling vendor for analysis; any core retained is stored adjacent to the core processing facility in wooden boxes on pallets

6.) Describe drill waste and drill water management, drill fluids and disposal methods. Attach msds/sds for all substances.

Drill water sourced from the freshwater impoundment pond or the RO#2 treatment plant is mixed with either starch based or clay based fluid viscosity increasing additives and pumped downhole. Return fluids are channeled into purpose built sumps to allow ground rock to settle; when possible downhole fluids are drawn from this sump. Drill pads are constructed to have vegetation stockpiles at the downslope side to act as turbidity producing sediment catchments for any fluids draining off the pad.

7.) Describe fuel handling at exploration drill sites (pads and trenches) and off site (camp or base operations).

Fuel is transported to drill sites by support light duty vehicles equipped with 110 gal bed tanks from the Fort Knox or Gil mine fuel systems and in 5 gal safety cans. The safety cans are stored on the drill site in commercial fuel containments marked with no smoking signs and fire extinguishers placed within 10 ft. Storage sites are located greater than 100 ft from water bodies.

8.) Discuss spill prevention and response plan.

Drill sites are held to MSHA spill regulations; Fort Knox adheres to reporting any spill to the Security and Environmental departments. Materials used to clean up the spill and excavated earth/rock are disposed of under direction of the Environmental department according to the Fort Knox haz mat plan.

9.) Describe water use including estimate of daily water use.

The amount of water used in drilling varies, depending on rock conditions a maximum of 26,000 gallons per drilling day can be used.

10.) Describe how the operation will avoid and/or mitigate potential impacts to fish, wildlife and cultural resources: describe closure, plugging methodology, surface reclamation and abandonment.

All holes will be abandoned by backfilling completely with bentonite and cement, except where commissioned as piezometers or thermistors, in which case, a small diameter standpipe and/or steel surface casing will be above grade upon completion. All trails will be constructed with crowns and water bars to minimize erosion. Vegetation and overburden will be segregated and stockpiled

for reclamation. After drilling is complete and the drill pad is decommissioned, mineral soil is regraded to mimic the pre-construction geometry, topsoil is placed on top of mineral soil and vegetation is distributed on top of topsoil to foster natural revegetation. Adequate warnings will be posted near all open trenches to alert other land users of the potential hazard. Drill sites have signage directing personnel to the required PPE and that it is an active work site requiring a site orientation briefing prior to admittance. Trash is stored offsite to remove wildlife enticements. Drill sites undergo wetland delineation, wildlife clearing and cultural clearing prior to construction.

1a.	On the cover page, please remove Bartly Kleven from the Name line of the operator and property owner.	Updated.	Yes	No	
1b	Also please provide the Business /corporation # and the registered agent for Fairbanks Gold Mining Inc.	Updated.			
2	The property list provided includes 657 state mining claims, and mental health trust leases. The map that was provided in the application only indicated work on a small percentage of the claims provided. This also includes the areas of Mental Health trust leases. Please refine the claims list to the foreseeable claim block size and areas of exploration activities. Include maps that illustrate the region requested.	Refer to the updated claims lists in Attachment 1, Tables 1–5. The tables are organized by claims scheduled for work in 2025 and claims planned for work during 2026–2035. All listed claims are proposed to be covered under APMA 9156.			
3	In box 16, page 3. It appears that an error was made in the text box. Please clarify what is supposed to be placed in the box.	Updated language to describe where staging of equipment and structures happens.

4	In box 32 you state that there will be 10 trenches and ~75 drill holes which is what is being applied for through the 10yrs of the authorization. In Attachment 2 you detail the work and locations for 2025. Annual proposed activities contradict what is described in box 32. Please correct the discrepancy.	Updated to “up to 100” trenches and “up to 1,000” drill holes. This is intended to be applied through the 10 yrs of the authorization.			
5a	With the map attached only showing drill holes in 2025 and no locations for trenching. Please provide the ADL locations of areas that 75 drill holes will be located.	Refer to the updated map in Attachment 1, Figure 1. This figure shows all claims proposed to be permitted under APMA 9156 and clearly identifies the claims scheduled for work in 2025, including the planned access routes for those claims.

APMA 9156 Reclamation Statement

MEMORANDUM

To: Environmental
From: Exploration
Date: December 10, 2024
Re: Reclamation Statement - APMA 9156

INTRODUCTION:

Fairbanks Gold Mining, Inc (FGMI) did not reclaim Exploration drilling pads from 2024, permitted under APMA 9156. Drillholes have been plugged and capped. Exploration activities occurred within F002N003E sec. 3, 4, 8-10, 15-18, and 20-21, within the Livengood Quadrangle. This document outlines surface improvements related to Exploration activities only; no improvements due to development or mining is contained herein.

PROJECT SCOPE

Drill pads were prepared and occupied in 2024 within the Livengood A-1 Quadrangle, in Township 2N, Range 3E, sections 3, 4, 8-10, 15-18, and 21 (Figure 1). In total, 17 drill pads were constructed. Access to drill areas have been stabilized with SWPPP BMP's established to control surface runoff. 13 drillholes were occupied, plugged and capped in 2024.

Table 1 details of disturbance created in 2024. **Table 2**, lists all mining claims and leases subject to Exploration surface improvements during 2024. **Figure 1** is a location Map of 2024 Exploration surface improvements. **Photos 1 & 2** show examples of exploration drill pads during drilling.

RECLAMATION STATEMENT:

All access to project areas was via new surface improvements from the Fort Knox-Gil Haul Road and existing dirt roads along The Fort Knox-Gil Haul Road (**Figure 1**). Upon completion, all drillholes were completely backfilled with bentonite slurry and capped with cement. Trails and stormwater BMPs were maintained with a JD 1050 dozer, a JD 750 dozer, a Caterpillar D-8 dozer, or a Komatsu 200 excavator.

In total 4 acres have been disturbed.

Table 1. Reclaimed surface area of Exploration improvements.

SITE TYPE	AREA IMPOVED in 2024 (Acre)	AREA RECLAIMED in 2024 (Acre)	AREA OPEN (Acre)
2023 Leftover Dist.	0	0	6
2024 Drill Pads	4	0	4
Total	4	0	10

2024 ANNUAL RECLAMATION STATEMENT**(33)**

- ☐ Placer Mining
☐ Suction Dredging
☒ Hardrock Exploration

APMA # 9156

Complete and return this statement by December 31, 2024. If you did not operate, fill in your name, check bottom box, sign, and return form.

In accordance with AS 27.19 (Reclamation Act):

I, Fairbanks Gold Mining, Inc. hereby file an annual reclamation statement for the 2024 mining operation described in subject Application for Permits to Mine in Alaska. (Submission of this statement does not constitute reclamation approval.)

Volume of material disturbed in 2024: N/A cubic yards (Includes stripping and processed material.)

Sluice days last season: N/A Cubic yards of material processed daily: N/A Annually: N/A

Total acreage disturbed in 2024: State 10, Federal N/A, Private N/A. (Includes stripped areas, mining cuts, overburden and tailing stockpiles and disposal areas, temporary stream diversions, stream bypasses, and settling ponds.) Federal operators should include area of camp and access roads.

Length N/A feet and Width N/A feet of stream diversion.

Stream diversion: ☐ Temporary ☐ Permanent ☒ No Diversion (check one).

Total Area reclaimed in 2024: 0 acres.

Total un-reclaimed acres: 10 (This should match "total acreage currently disturbed" on the 2025 Reclamation Plan Form.)

For areas reclaimed, the following reclamation measures were used (check only measures that were used).

You must include photographs or videotapes of the completed reclamation work:

- ☐ Spread and contoured tailings
☐ Spread topsoil, vegetation, overburden muck or fines on the surface of contoured tailings
☐ Reestablished flood plain with stream channel in stable position
☐ Ponds are reclaimed
☐ Backfilled and reclaimed temporary stream diversions
☐ Camp removed, cleaned up and left free of debris
☒ Hardrock Exploration: Complete and submit an electronic Annual Reclamation Report

Other Reclamation Measures Taken:

☐ Did not operate in 2024 and therefore did not conduct reclamation.

Relationship to Claim(s)

2025 RECLAMATION PLAN FORM (HARDROCK EXPLORATION)

☒ A. RECLAMATION PLAN (REQUIRED if the operation will disturb five or more acres this year, OR 50,000 cubic yards, OR if the operation has a cumulative disturbed area of five or more acres).	☐ B. RECLAMATION PLAN VOLUNTARY (For an operation below limits shown in Box A but wanting to qualify for the statewide bonding pool. (Operations on BLM Lands and others not filing Letter of Intent)).	☐ C. LETTER OF INTENT (34) (Less than five acres to be disturbed AND less than 50,000 cubic yards AND less than five acres unreclaimed area).
--	--	---

In accordance with Alaska Statute 27.19, reclamation is required of all mining operations. Reclamation bonding is required of operations with disturbance of 5 acres or greater. Completion of this application will meet the requirements for a "Reclamation Plan" for operations 5 acres and larger in size and for a "Letter of Intent To Do Reclamation" for operations under 5 acres. If you do not intend to use the reclamation methods presented below, you must provide additional information concerning your plans for reclamation under separate attachments.

Total acreage currently disturbed: 10 acres. This should match: "Total Unreclaimed Acres" on your 2024 Annual Reclamation Statement for Small Mines, or line #7 on your 2025 Bond Pool Renewal Form. Disturbed ground includes all unreclaimed mining and exploration activity (excluding camps and roads) since October 1991. Federal operators must include areas of camps and roads.

New acres to be disturbed in 2025 4 acres. Total acreage (currently disturbed plus new acres): 14 acres.

Acreage disturbed by land status: 14 State (general) N/A State (Mental Health) N/A Private N/A Federal

Total acreage to be reclaimed in 2025 14 acres; Total volume of material to be disturbed in 2025: N/A cubic yards.

Include strippings and overburden to be removed. Cubic yards = Length (yards) x Width (yards) x Depth (yards).

☒ Reclamation will be conducted concurrently with activity. ☐ Reclamation will be conducted at the end of the season.

THE FOLLOWING RECLAMATION MEASURES SHALL BE USED:

(These measures are required by law. Those that do not apply may be crossed out; but, an explanation must be given.)

- Topsoil, vegetation, and overburden muck, not promptly redistributed to an area being reclaimed, will be individually separated and stockpiled for future use. This material will be protected from erosion and from contamination by acidic or toxic materials and will not be buried by tailings.
- The area reclaimed will be reshaped to blend with the surrounding area using tailings, strippings, and overburden and be stabilized.
- Stockpiled topsoil, overburden muck, will be spread over the contoured exploration sites to promote natural plant growth such that the area can reasonably be expected to revegetate within five years. Stockpiled vegetation will be spread over topsoils.
- Exploration trenches will be backfilled. Brush piles, stumps, topsoil, and other organics will be spread on the backfilled surface to inhibit erosion and promote natural revegetation. All exploration trenches will be reclaimed by the end of the exploration season in which they are constructed, unless specifically approved by the DMLW (Mining operations are required by law to be reclaimed as contemporaneously as practicable with the mining operation to leave the site in stable condition).
- Shallow auger holes (limited to depth of overburden) will be backfilled with drill cuttings or other locally available material in such a manner that closes the hole to minimize the risk to humans, livestock and wildlife.
- All drill hole casings will be removed or cut off at, or below, ground level. All drill holes will be plugged by the end of the exploration season with bentonite holeplug or equivalent slurry, for a minimum of 10 feet within the top 20 feet of the drill hole. The remainder of the hole will be backfilled to the surface with drill cuttings. If water is encountered in any drill hole, a minimum of 7 feet of bentonite holeplug or equivalent slurry will be placed immediately above the static water level in the drill hole. (NOTE: The operator understands that complete filling of the drill holes, from bottom to top, with bentonite holeplug or equivalent slurry is also permitted and is considered to be the preferred method of hole closure, unless communicated otherwise by DMLW.)
- If artesian conditions are encountered, the operator will take all measures practicable to prevent the offsite discharge of those waters subject to 11 AAC 97.240 and will contact the DMLW for approval of hole plugging measures.
- At closure, all shafts, adits, tunnels, and air vents to underground workings will be stabilized and properly sealed to ensure protection of the public, wildlife and the environment.
- On state lands, all buildings and structures constructed, used, or improved will be removed, dismantled, or otherwise properly disposed of unless the surface owner or manager authorizes that the buildings and structures may stay.
- On state lands, all scrap iron, equipment, tools, piping, hardware, chemicals, fuels, waste, and general construction debris will be removed or properly disposed of.
- Reclamation measures taken will be consistent with any alternative post mining land use approved by the Commissioner, subject to the provisions of 11 AAC 97.300(h) and the conditions (if any) of an approved reclamation plan.

IMPORTANT: 1. Alternative reclamation measures may be approved if the reclamation measures presented above are not applicable to your site. Please explain in separate correspondence. Submit a sketch and describe additional reclamation measures you propose to conduct at your operation. Reclamation measures must comply with AS 27.19.

BONDING: In accordance with AS 27.19, bonding is required for all operations having a mined area of $\geq$ five acres on State Land. This area must be bonded for \$750.00 per acre, unless the miner can demonstrate that a third party contractor can do the needed reclamation for less. The Statewide Bonding Pool may be joined by completing a bond pool application form and meeting certain requirements. No reclamation plan approval goes into effect until the bonding pool deposit and annual nonrefundable fees are paid. Use bond form to calculate area of disturbance for bonding.

BLM requires that a reclamation plan be consistent with §43 CFR 3809.420, Performance Standards for the Surface Management regulations for Federal Operations. Refer to 43 CFR 3809 or the BLM minerals website available at <https://www.blm.gov/programs/energy-and-minerals/mining-and-minerals> for more information on what is needed for a reclamation plan on Federal lands, as they may be different than those identified above.

Submits to the State of Alaska, Department of Natural Resources, a renewal of reclamation bonding in accordance with AS 27.19 for mining activity on claim's: Refer to Table 2, Attachment 1.

located in T. _____, R. _____, Sections _____, _____ M.

The amount of the refund or amount owed is calculated as follows:

1. Only whole number of acres bonded in 2024: 13.0 acres rounded up to next integer: 13 acres
 2. Total whole number of acres disturbed in 2024? 10.0 acres rounded up to next integer: 10 acres

This includes unreclaimed acreage from previous years, October 1991 to present, for state or private lands, and 1981 to present for federal claims. On federal claims include area of camp and access roads.

Bonding credits carried forward from 2024 to 2025:

If you claim any acres in 3 or 4 complete the Bond Pool release form.

3. Number of acres bonded in 2024 but not disturbed: 3 acres x \$ 112.50 = \$ _____
 (1 minus 2 above)

4. Number of acres reclaimed in 2024 and approved by BLM/ DNR.

0 acres x \$ 112.50 = \$ _____

Federal miners must submit a **Financial Guarantee Amount Reduction Letter** from BLM. All miners requesting a reduction of acreage must fill out the application for **Bond Release Form**, and include evidence of their reclamation with Photo/Video documentation unless otherwise specified by DNR.

5. Dollar total of lines 3 + 4: \$337.50

Bonding obligations for 2025:

6. Acreage disturbed but not bonded in 2024 (2 minus 1 above): _____ acres x \$ 150.00 = \$ _____

7. Number of all 2024 unreclaimed acres (2 minus 4 above): 10 acres x \$ 37.50 = \$375.00

(line 7 should match "total acreage currently disturbed" on your 2024 Reclamation Plan.

8. New acres to be disturbed in 2025: 4 acres x \$ 150.00 = \$600.00

9. Dollar total of lines 6 + 7 + 8: \$975.00

10. Total acreage bonded in 2025 (7 + 8): 14 acres

If line 5 is larger than line 9 enter the difference here \$ _____. This amount will be refunded.

If line 9 is larger than line 5, the difference is due DNR \$ 637.50. Make check payable to: DEPARTMENT OF NATURAL RESOURCES.

Clear Form

APPLICATION FOR RELEASE OF RECLAMATION BOND OR REFUND OF BOND POOL DEPOSIT

APMA NUMBER: 9156Name of Applicant: Fairbanks Gold Mining, Inc.

This form may be used to request release of a reclamation bond or a refund of the refundable portion of the bond pool deposit. **If the bond is for operations on federal claims, reclamation approval is required by the federal land manager before DNR will make the bond deposit refund.** If DNR has not inspected reclamation on the mineral property(s), photographs of the completed reclamation work may be required before the bond is released.

List the mineral property(s) that are subject to a release of a reclamation bond reduction, or refund of the refundable portion of the bond pool deposit. Please provide the casefile type (e.g.; ADL/AKFF/USMS) and number, or if Native Land, provide the legal description (MTRS). Refer to Table 2, Attachment 1

Check all that apply: ☐ Reclamation Completed ☒ No Acreage Disturbance ☐ Successor of Interest
Note: _____

In accordance with the above referenced Annual Placer Mining Application (APMA) and approved reclamation plan, the number of acres bonded was 13. I request a release of the bonding obligation and a refund of the refundable bond pool deposit for 3 acres that have been reclaimed, were never disturbed, or a successor of interest has assumed all liability. I understand bond monies are refundable only to those individuals or businesses originally submitting such, unless proper documentation is enclosed indicating refunds should be issued otherwise.

I hereby swear or affirm, under oath, that I have examined Alaska Statute 27.19 (Reclamation Act), 11 AAC 97 (Reclamation Regulations) and my approved reclamation plan and believe myself to have completed the reclamation to the required standards and in accordance with my approved reclamation plan. Photographs of the completed reclamation work are attached: ☒ Yes ☐ No

I understand if the commissioner determines reclamation was not done in accordance with the approved plan of operations and this sworn statement, I remain liable under AS 27.19 to complete the reclamation.

I certify under penalty of perjury the foregoing is true and accurate.

(Signature of Applicant) (Date) 1/14/2025
