

STATE OF ALASKA
DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES
TED STEVENS ANCHORAGE INTERNATIONAL AIRPORT

Addendum No. 2

Issue Date: January 16, 2026

**REQUEST FOR PROPOSAL ELECTRONIC/STATIC DISPLAY ADVERTISING CONCESSION
ADA-32628**

RESPONSE TO QUESTIONS AND COMMENTS DUE BY DECEMBER 19, 2025

The following is provided by the State of Alaska, Department of Transportation & Public Facilities, Ted Stevens Anchorage International Airport in response to questions received relating to the Electronic/Static Display Advertising Concession ADA-32628 Request for Proposal (RFP) document.

No statement provided in these questions/comments shall be deemed a modification in any way of the RFP. The only addition to, or modification of any part of the RFP must be included in an amendment.

QUESTION #1: Criterion 1.H states: “Based on locations in Exhibit B of the SCA, please describe what displays are proposed for each location.” Comments during the airport tour may have created confusion as to whether all locations in Exhibit B will be considered for scoring. For example, it was suggested that the only wall wrap that will be scored is behind Bag Claim 1-3. Please confirm whether all the locations indicated in Exhibit B will be considered in scoring. If not, please explain the scoring method for these locations.

STATE RESPONSE: Exhibit B has now been replaced by “Amended Exhibit B (December 2025)”. All advertising locations identified in Amended Exhibit B (December 2025) are approved locations and will be considered in the evaluation and scoring of proposals. While Amended Exhibit B (December 2025) reflects existing advertising media, proposers are not restricted to existing formats and may propose alternative display concepts in those defined areas as reflected by color key on the amended exhibit.

QUESTION #2: Criterion 3.G states: “Provide an estimate of gross revenues the proposer projects will be achieved if only the locations in Exhibit B are made available for the proposer’s advertising strategy.” Please clarify whether Criterion 3.G will be evaluated primarily based on the dollar amount (for example, higher projections receive higher scores), or whether other factors will also be considered, such as the reasonableness of assumptions, and internal consistency between the estimate and the proposer’s planned displays.

STATE RESPONSE: Specific Evaluation Criterion No. 3 has been consolidated with Specific Evaluation Criterion No. 1, resulting in Criterion 3.G being amended to Criterion 1.Q. Criterion 1.Q will not be evaluated based solely on the projected gross revenue dollar amount, and higher projections will not automatically receive higher scores. The State will evaluate this criterion based on the reasonableness of the proposer’s assumptions, the internal consistency between the projected revenues and the proposed advertising strategy and display mix limited to Amended Exhibit B (December 2025), and the proposer’s demonstrated understanding of the airport environment and market conditions. Please note that updates have been made to the evaluation criterion and proposal scoring methodology. Proposers should refer to Amendment No. 3 for complete details.

QUESTION #3: Criterion 3.I states: “I. Outside the Box Proposals: If the proposer plans to incorporate “outside-the-box” strategies into its advertising program, describe all proposed locations not included on Exhibit B and the advertising strategy behind these locations.” Comments during the tour may have created uncertainty regarding how and whether Criterion 3.I will be scored. Please confirm whether Criterion 3.I will be scored.

STATE RESPONSE: Specific Evaluation Criterion No. 3 has been consolidated with Specific Evaluation Criterion No. 1, resulting in Criterion 3.I being amended to Criterion 1.S. Yes. Criterion 1.S has been amended to clarify that only proposed locations identified in Amended Exhibit B (December 2025) will be evaluated and scored. Please note that updates have been made to the evaluation criterion and proposal scoring methodology. Proposers should refer to Amendment No. 3 for complete details.

QUESTION #4: Criterion 1.A states: “All existing advertising fixtures identified as concession locations in this RFP shall be replaced with new fixtures, unless the State grants prior written approval for the use of used or refurbished fixtures.” Further, Article IX.3.A of the SCA states: “...the Concessionaire shall: a. Remove all existing advertising displays from the locations shown on Exhibit B and replace them with new displays. The use of any previously used or refurbished displays shall be prohibited unless prior written approval is obtained from the State.” Please

confirm this criterion will be scored on the assumption that all displays and fixtures must be replaced with new displays and fixtures. If not, please clarify the alternative assumptions that should be used.

STATE RESPONSE: The State will issue an Amendment to the Request for Proposal that includes Amended Exhibit B (December 2025). Amended Exhibit B (December 2025) identifies eleven (11) existing digital displays and six (6) existing static displays that will be required to be replaced with new equipment at the Inception of the new Agreement.

QUESTION #5: Criterion 2.A states: “The proposer will submit a minimum infrastructure investment as a lump sum amount. This amount relates only to the display locations indicated in Exhibit B and shall include costs of construction, displays, equipment, and fixtures...” Please clarify whether the lump sum amount should include the cost of construction for all display locations in Exhibit B, or whether proposers may assume that some locations will be able to reuse existing equipment and will not require new construction. If the latter, please clarify the assumptions proposers should use regarding which displays may remain and which must be replaced so that all proposers are bidding on a comparable basis.

STATE RESPONSE: Specific Evaluation Criterion No. 2, *Infrastructure Investment*, has been removed from the RFP Terms of Request, Section VII, Proposal Evaluation, and shall not be assigned a weighted score or considered in the evaluation of proposals for concession award. Please note that updates have been made to the evaluation criterion and proposal scoring methodology. Proposers should refer to Amendment No. 3 for complete details.

QUESTION #6: Please clarify whether the capital budget should assume the new concessionaire will remove all existing displays and include the associated costs. If not, please clarify the assumptions proposers should use regarding removal so that all capital budgets are comparable.

STATE RESPONSE: No. Proposers should not assume removal of all existing displays. Capital budgets should be based only on the locations identified in Amended Exhibit B (December 2025), and on the assumption that the successful proposer will assume ownership (through State approved Transition Plan) of the existing equipment from the incumbent concessionaire at contract Inception. Costs associated with replacement of existing displays should be included only for those locations specifically identified in Amended Exhibit B (December 2025), to ensure consistent and comparable capital budgets across proposers.

QUESTION #7: The proposal evaluation formula awards 15% to Infrastructure Investment. Will evaluators be instructed to award points based solely on the dollar amount proposed? Or will other factors also be considered, such as the feasibility of the proposed infrastructure, its revenue potential, and its aesthetic impact?

STATE RESPONSE: The Infrastructure Investment criterion has been removed from the proposal evaluation scoring criteria. Accordingly, no points will be awarded or deducted based on the amount or nature of proposed infrastructure investment.

QUESTION #8: The proposal evaluation criteria allocate 10 points to Annual Minimum Guarantee. Because this criterion is a numeric commitment, please confirm the method the State will use to convert proposed Annual Minimum Guarantee amounts into points. Many procurements use a proportional method in which the highest Annual Minimum Guarantee receives the full 10 points and other proposals receive points proportionally (for example, Proposed Annual Minimum Guarantee divided by the highest Annual Minimum Guarantee, multiplied by 10 points). Will the State use a proportional formula of this type? If not, please describe the method the State will use to award the 10 points.

STATE RESPONSE: The Annual Minimum Guarantee (MAG) will be evaluated using a proportional scoring methodology. The proposal offering the highest acceptable Annual Minimum Guarantee will receive the full points allocated to this criterion. All other proposals will receive proportionally fewer points based on the ratio of their proposed Annual Minimum Guarantee to the highest proposed Annual Minimum Guarantee, multiplied by the maximum points available for this criterion. This approach is intended to ensure a fair, transparent, and comparable evaluation of all financial proposals. Please note that updates have been made to the evaluation criterion and proposal scoring methodology. Proposers should refer to Amendment No. 3 for complete details.

QUESTION #9: The proposal evaluation criteria allocate 10% to Percentage Fees, and the Commitment Form requests separate percentage fees for static displays and high-tech displays. Because this criterion is a numeric commitment, please confirm the method the State will use to convert proposed percentage fees into points. To ensure proposers are pricing to the same standard, will the State calculate points using a numerical method such as the following:

1. Calculate each proposer's Combined Percentage Fee as the average of the Static and High-Tech percentage fees.

2. Award the full points available for this criterion to the proposer with the highest Combined Percentage Fee.
3. Award all other proposers' points proportionally (for example, their Combined Percentage Fee divided by the highest Combined Percentage Fee, multiplied by the points available).

If the State intends to use a different method, please provide a description so proposers understand how points will be awarded.

STATE RESPONSE: The State has amended the RFP and SCA to reflect a single percentage fee with a minimum of forty-three percent (43%). The percentage fee will be evaluated using a proportional scoring methodology. The proposal offering the highest acceptable percentage fee will receive the full points allocated to this criterion. All other proposals will receive proportionally fewer points based on the ratio of their proposed percentage fee to the highest proposed percentage fee, multiplied by the maximum points available for this criterion. This methodology is intended to ensure a fair, transparent, and comparable evaluation of all financial proposals. Please note that updates have been made to the evaluation criterion and proposal scoring methodology. Proposers should refer to Amendment No. 3 for complete details.

QUESTION #10: Criterion 6.C, Financial Ability, requests certified or limited review financial statements from the proposing entity. Will the State accept alternative financial information that demonstrates financial fitness to be able to adequately perform the contract?

STATE RESPONSE: Yes. The State will consider alternative financial documentation that clearly demonstrates the proposer's financial ability and fitness to perform the obligations of the contract. If the alternative documentation does not provide sufficient information for the State to make this determination, the State may, in its sole discretion, request additional financial information or clarification.

QUESTION #11: PDF page 51 of the RFP appears to reflect historical revenue from a broader location set than Exhibit B. Please confirm the location set assumed on page 51 and confirm the location set on which the Minimum Annual Guarantee is intended to be based and enforced. If the awardee scope is limited to Exhibit B location only (with no additional locations), please clarify how the Minimum Annual Guarantee will be addressed so proposers are bidding on a comparable basis.

STATE RESPONSE: Yes. The historical revenue information presented on PDF page 51 reflects revenues generated under the incumbent advertising concession, which included locations beyond those identified in Amended Exhibit B (December 2025). The Minimum Annual Guarantee (MAG) applies to and is enforced against the entire advertising concession as awarded under this solicitation. Proposers should base the MAG on the full scope of the advertising concession contemplated by the RFP including all locations identified in Amended Exhibit B (December 2025) and Exhibit B1.

QUESTION #12: Certified Activity Reports & Historical Performance (Article XI(G) – Reporting Requirements): Under the current agreement (ADA-90780) all reports provided to the state are public records. For planning and due-diligence purposes, please provide copies of the last six Certified Activity Reports (CARs) for the prior concession. Please share the results of any audits performed by the state and any additional supporting documents provided by the concessionaire.

STATE RESPONSE: The State contacted the submitter of this question to clarify Agreement ADA-90780 was cited in error and that the request pertains to Agreements ADA-31788 and ADA-31935. Attached are the Certified Activity Reports (CARs) for the period of May through October 2025 for Agreements ADA-31788 and ADA-31935. At this time, the State has no audit reports or related audit documentation for the prior concession.

QUESTION #13: Assigned Areas, Locations & Passenger Exposure (Article V and Exhibit B – Assigned Areas): Are any of the Assigned Areas identified in Exhibit B currently anticipated to be impacted by renovations, reconfigurations, or construction projects during the Base Term?

STATE RESPONSE: Potential terminal improvements, such as the TSA checkpoint and Concourse B bump outs, have been identified in our short to mid-term planning projections, but no construction projects are currently planned or scheduled. Should any future project impact advertising locations or inventory, the airport will inform and coordinate with the concessionaire throughout the process. For Master Plan Update please visit: [Ted Stevens Anchorage International Airport Master Plan Update](#)

QUESTION #14: Assigned Areas, Locations & Passenger Exposure (Article V – Assigned Areas / Airport Operations): Can the State provide any estimated passenger counts, impression data, or relative exposure metrics by terminal or zone to assist proposer in understanding overall passenger flow and exposure across the Airport? Is there a heat-map showing high traffic areas?

STATE RESPONSE: CY2023 Deplanements - South Terminal: 2,733,657; North Terminal: 16,030; Total: 2,749,687. CY2024 Deplanements – South Terminal: 2,727,115; North Terminal: 11,798; Total: 2,738,913. CY2025 Deplanements – South Terminal, 2,664,884; North Terminal: 16,394; Total: 2,681,278.

The Airport does not have “heat maps”, but high traffic areas would likely consist of areas in which passengers must congregate and have static dwell time, such as TSA Screening, baggage claim, or other waiting queue areas.

QUESTION #15: Assigned Areas, Locations & Passenger Exposure (Article V – Assigned Areas / Airport Operations): Can the State provide any available traveler demographic information for Ted Stevens Anchorage International Airport (e.g., business versus leisure travel mix, resident versus visitor mix, seasonal trends, or other aggregated characteristics) to assist proposers in planning advertising programs?

STATE RESPONSE: Passenger demographic information for Ted Stevens Anchorage International Airport is informed by seasonal Wi-Fi–based passenger surveys conducted in Summer 2024 and Winter 2024–25. Collectively, the surveys indicate that ANC serves a diverse passenger base with notable seasonal variation in trip purpose, residency, and traveler profiles. During the summer travel period, most surveyed visitors were out-of-state travelers, primarily traveling for vacation and leisure purposes, with a meaningful share of international visitors. Summer passengers tend to have larger travel parties, longer trip planning horizons, and higher participation in leisure activities, with an average age in the mid-40s and above-average household incomes. In contrast, the winter travel period reflects a higher proportion of Alaska residents and business-related travel, shorter booking timelines, and slightly smaller party sizes, while still maintaining a strong presence of out-of-state and international visitors. Across both seasons, passengers originate predominantly from Western U.S. states, followed by the South, Midwest, and East, with international visitors most commonly arriving from Canada, Europe, and Asia. Overall, ANC passengers represent a balanced mix of leisure, business, resident, and visitor travelers with relatively high-income levels and broad geographic diversity, providing a varied and seasonally dynamic audience for airport advertising opportunities.

QUESTION #16: Permits, Infrastructure & Refurbishment (Article XII – Construction, Remodeling, and Refurbishment): Can the State provide a summary of any Airport Building Permit requests submitted by the incumbent within the last three (3) years, including any modifications, denials, or withdrawn applications?

STATE RESPONSE: See attached Building Permit Summary 2023-2025 which summarizes the issued building permits for the last three (3) years. There were no denied or withdrawn applications.

QUESTION #17: Permits, Infrastructure & Refurbishment (Article XII(E) – Refurbishment Plan): Can the State provide a copy of the incumbent’s current refurbishment or replacement plan?

STATE RESPONSE: The refurbishment requirements are addressed in ADA-31788 Supplement No. 1 and ADA-31935 Supplement No. 1.

QUESTION #18: Permits, Infrastructure & Refurbishment (Article XII – Construction and Installation): Have any as-built surveys been submitted to the State by the incumbent within the last three (3) years, and if so, can those be made available for review?

STATE RESPONSE: No. As-built surveys have not been required for the incumbent’s permitted installations within the last three (3) years.

QUESTION #19: Permits, Infrastructure & Refurbishment (Article XII(B)(6) – Gross Revenue Definition): Can amortized infrastructure costs be deducted from Gross Revenue for purposes of calculating percentage rent, or are such costs excluded from allowable deductions?

STATE RESPONSE: No. Amortized infrastructure or refurbishment costs are not allowable deductions from Gross Revenue and may not be deducted for purposes of calculating percentage rent.

QUESTION #20: Infrastructure Investment & Evaluation Criteria (Article XII – Infrastructure Investment / Evaluation Criteria): Can the State clarify how infrastructure investment will be evaluated for scoring purposes, particularly whether consideration will be given to proposed annual reinvestment and ongoing capital refresh over term of the Agreement, as compared to the initial upfront investment amount at contract commencement?

STATE RESPONSE: The Infrastructure Investment criterion has been removed from the proposal evaluation scoring criteria. Accordingly, no points will be awarded or deducted based on the amount or nature of proposed infrastructure investment. Please note that updates have been made to the evaluation criterion and proposal scoring methodology. Proposers should refer to Amendment No. 3 for complete details.

QUESTION #21: Infrastructure Investment & Evaluation Criteria: As discussed at the Pre-Bid meeting, with so many unknowns prior to the transition process, it's impossible for a new operator to confidently project an up front investment amount. Would the state consider amending the transition plan to waive the required commitment to an up-front equipment replacement amount? Given that the transition will require the new concessionaire and the incumbent to agree to commercial terms for the transition of ownership of each installation, and that plan will further be subject to approval by the state, it's impossible for a new concessionaire to predict an initial investment amount. In this case a commitment to an annual investment amount would still be required, but it would begin after the transition to a new concessionaire is complete.

STATE RESPONSE: The Infrastructure Investment criterion has been removed from the proposal evaluation scoring criteria. Accordingly, no points will be awarded or deducted based on the amount or nature of proposed infrastructure investment. Please note that updates have been made to the evaluation criterion and proposal scoring methodology. Proposers should refer to Amendment No. 3 for complete details.

QUESTION #22: Technology Classification & Advertising Program Evolution (Article I(O) – High Tech Displays): Can the State clarify which installed display technologies currently qualify as “High-Tech Displays” for purposes of revenue classification under Article VI?

STATE RESPONSE: For purposes of revenue classification under Article VI, the display technologies currently installed and in operation at the Airport that qualify as “High-Tech Displays,” as defined in Article I(O), are digital display technologies.

QUESTION #23: Technology Classification & Advertising Program Evolution (Articles I and IV – Interactive Technology): Does the State anticipate approving interactive, data-driven, or sensor based display technologies as part of the Advertising program, assuming all security, ADA, and operational requirements are met?

STATE RESPONSE: Yes. The State is open to considering innovative display technologies that enhance the overall Advertising Program and improve the traveling public's customer experience.

QUESTION #24: Advertising, Content, Pricing & Commission Structures (Article IV(H)(1)-(2) – Pricing): Can the State provide any historical pricing information or analysis regarding current advertising rates, rate structures, or pricing practices under the incumbent concession?

STATE RESPONSE: The State does not have access to, nor does it approve, contracts between the incumbent concessionaire and individual advertisers. Accordingly, the State is unable to provide historical pricing information, rate structures, or analyses of the incumbent concessionaire’s advertising rates or pricing practices.

QUESTION #25: Advertising, Content, Pricing & Commission Structures (Article IX(D)(2) – Scenic and PSA Content): Can the State clarify the definition of “Scenic” and “Public Service Announcement (PSA)” content, and how such content is prioritized or scheduled relative to paid advertising?

STATE RESPONSE: Scenic content refers to visual or multimedia material that features landscapes, natural settings, cityscapes, or place-based imagery intended to evoke a sense of place, atmosphere, or experience rather than promote a specific product, service, or brand. Scenic content is generally informational or experiential in nature, is not revenue-generating on its own, and is often used to enhance the passenger experience, reinforce local identity, or provide visual continuity within an advertising program.

A Public Service Announcement (PSA) is any State authorized message, notice, or communication promoting public safety, emergency information, governmental programs, recruitment for State agencies, airport operation information, tourism and economic development initiatives, or other non-commercial messaging deemed to be in the public interest by the State. PSAs shall not promote any private individual, commercial enterprise, or for-profit activity, and shall be provided display priority at no cost to the State.

Paid advertising receives scheduling priority. Scenic content and PSA content may be displayed only on a limited and discretionary basis and shall not displace or reduce the delivery of paid advertising commitments. Such content may be used to supplement paid advertising, including to fill unsold inventory, provide transitional content between paid advertisements, or during off-peak periods.

QUESTION #26: Advertising, Content, Pricing & Commission Structures (Article IV – Advertising Program): Can the State clarify the rationale for applying different commission or percentage fee structures to static versus electronic advertising formats, and whether those differences are intended to reflect operational costs, revenue potential, or policy considerations? Given the greatly increased business risk and up front cost of purchasing and installing High Tech displays, would the state consider modifying the RFP to include lowering the revenue-sharing rate for

High Tech displays to 40%, in order to avoid incentivizing a concessionaire to prioritize static displays where the cost-share percentage is lower?

STATE RESPONSE: The State has reviewed the questions and feedback regarding commission and percentage fee structures for static and electronic advertising formats. Based on this review, the State has determined that it will issue an Amendment to the Request for Proposal and the Sample Concession Agreement to establish a single minimum percentage fee of 43% applicable to all advertising formats. The forthcoming Amendment will supersede the existing differentiated percentage fee provisions. All other terms, conditions, and requirements of the RFP remain unchanged unless expressly modified by the Amendment.

QUESTION #27: Advertising, Content, Pricing & Commission Structures (Article IV(F)(7) – Filler Content): Approximately what percentage of total advertising inventory has historically been allocated to PSA or filler content at ANC?

STATE RESPONSE: The State does not track or maintain historical data regarding the percentage of total advertising inventory allocated to PSA or filler content at ANC. Allocation of such content has historically been managed at the concessionaire’s discretion and may vary based on inventory availability, sales levels, and operational considerations.

QUESTION #28: Advertising, Content, Pricing & Commission Structures (Articles I and IX – PSA Priority): How frequently does the State anticipate exercising priority placement of PSAs, and are there peak periods when PSA usage is typically higher?

STATE RESPONSE: The State does not anticipate routinely exercising priority placement of PSAs. Paid advertising receives scheduling priority. PSA and scenic content may be displayed on a limited and discretionary basis and shall not displace or reduce paid advertising commitments. When utilized, such content is typically scheduled to supplement paid advertising, including to fill unsold inventory, provide transitional content between paid advertisements, or during off-peak periods. No recurring peak periods for PSA usage are anticipated. Examples of a State of Alaska requested PSAs: Example 1: The Alaska Department of Transportation & Public Facilities hosted the 2025 National Association of State Aviation Officials (NASAO) 34th Annual Convention in Anchorage September 21-24, 2025. The State may potentially reach out to the Advertising Concessionaire to add digital “Welcome” signage to digital displays to welcome NASAO guests leading up to the conference dates. Digital signage to be displayed would be provided by the Airport. Example 2: When a new destination is added to ANC’s route list, such as Calgary for Summer 2025, ANC may ask the Advertising Concessionaire to play visit

Calgary/tourism digital media to promote the new partnership with a new city/route. In turn, Calgary airport, would play visit Anchorage/tourism media. The media played would be provided by the Airport.

QUESTION #29: Utilities, Rent & Financial Flows (Article V & Article XVIII – Utilities and State Services): Can the State clarify whether the concessionaire is responsible for payment of electricity for advertising displays, and if so, whether historical utility charges are available for reference?

STATE RESPONSE: Article VI, Section A of the Sample Concession Agreement provides that basic utility expenses, including electricity and heating/cooling, are included in the Concession and Rent Fees. Accordingly, standard electrical usage associated with advertising displays is included in these fees. Article VI, Section J.4 further addresses circumstances involving extraordinary use of lighting, power, or cleaning services. If the State determines that a concessionaire's use exceeds the scope of normal services, the State will provide written notice identifying the extraordinary utility expenses. The concessionaire will have ten (10) days from the date of such notice to dispute the charges, in accordance with the Agreement. Based on the foregoing, historical utility charges specific to individual advertising displays are not separately tracked or available for reference.

QUESTION #30: Utilities, Rent & Financial Flows (Article V – Support Space): Does the incumbent concessionaire currently lease office or support space within the Airport, and if so, where is that space located and what rent is being paid?

STATE RESPONSE: Yes. The incumbent concessionaire currently leases Concession Support Space identified as Room SA1657, consisting of approximately 77 square feet, and is leased at a Concession Support Space rate of \$25.00 per square foot per year, paid monthly, for an annual rent of \$1,925.00. Concession Support Space must be negotiated and agreed upon by the State and the incumbent, or it may be applied for at a later date, as Room SA1657 is not guaranteed to be available.

QUESTION #31: Transition, Ownership & Asset Disposition (Article IV(I) – Transition and Mitigation): If the successful proposer does not continue existing advertising contracts, is the incumbent required to mitigate damages associated with unsold or terminated advertising commitments?

STATE RESPONSE: Yes. Any existing advertising contracts are between the incumbent concessionaire and its advertisers and remain the responsibility of the incumbent concessionaire. The State does not have access to, does not approve, and is not a party to such agreements. Accordingly, the State has no authority to require the successful proposer to assume or continue existing advertising contracts, and any mitigation of damages associated with unsold or terminated advertising commitments is the responsibility of the incumbent concessionaire.

QUESTION #32: Transition, Ownership & Asset Disposition (Article IV(D)(3) – Replacement of Advertising): At the end of the incumbent contract term, are all advertising contracts expected to expire, or are there any sold advertisements that extend beyond the contract end date? Can the state share any information it has regarding current advertising contracts and termination dates?

STATE RESPONSE: The State does not review, approve, or maintain advertising contracts between the concessionaire and its advertisers. Accordingly, the State does not have visibility into, nor can it represent, the terms, duration, or termination dates of any existing advertising contracts, including whether any such contracts extend beyond the incumbent concessionaire's contract term.

QUESTION #33: Transition, Ownership & Asset Disposition (Article XII – Infrastructure Condition): Based on the State's assessment, what if any existing equipment or signage will require refurbishment or replacement at the start of the new contract term?

STATE RESPONSE: The State will issue an Amendment to the Request for Proposal that includes Amended Exhibit B (December 2025). Amended Exhibit B (December 2025) identifies eleven (11) existing digital displays and six (6) existing static displays that will be required to be replaced with new equipment at the Inception of the new Agreement term.

QUESTION #34: Transition, Ownership & Asset Disposition (Article XII(F) – Ownership of Improvements): Does the State take ownership of all advertising equipment and signage at the end of the incumbent contract, and if not, which assets remain the property of the incumbent?

STATE RESPONSE: Generally, infrastructure/improvements of equipment and hardware vest in the State at termination unless the State directs removal; the State can also allow sale from the incumbent to the successor at unamortized value for specified items.

QUESTION #35: Transition, Ownership & Asset Disposition (Article XXIV(B) – Unamortized Improvements): Which existing fixtures will the State take title to versus require sale or removal, and what is the unamortized balance, if any, associated with each asset? For fully amortized equipment, will the State require replacement at the start of the new contract?

STATE RESPONSE: Pursuant to Article XXIV(B)(4), all fully amortized equipment and hardware will be transferred to the successful proposer on an “as-is, where-is” basis, with no warranties or assurances as to condition or functionality. The State will not require the replacement of fully amortized equipment at the commencement of the new contract, except for those items expressly identified for replacement at Agreement Inception in Amended Exhibit B (December 2025).

QUESTION #36: Transition, Ownership & Asset Disposition (Article XXVII – Transition Plan): Is the Transition Plan included in the proposed Sample Concession Agreement substantially the same as the transition provisions in the incumbent agreement, or are there material differences the proposers should account for?

STATE RESPONSE: The Transition Plan provisions in the proposed Sample Concession Agreement are substantially consistent with those in the incumbent agreement and do not introduce material differences that proposers must separately account for. The provisions maintain the same fundamental framework regarding coordination between outgoing and incoming concessionaires, State approval of a written transition plan, execution requirements, and State authority to resolve disputes. While the article numbering and formatting differ among agreements, these differences are administrative in nature and do not materially alter the transition obligations or risk allocation.

QUESTION #37: Is the airport looking for any specific improvements or capabilities that the current vendor has not been able to deliver?

STATE RESPONSE: No. This solicitation is not the result of deficiencies in the incumbent’s performance. Rather, it reflects the Airport’s desire to update and modernize its agreement and internal processes to better align with current advertising technologies and industry practices, and to improve administrative efficiency and flexibility.

FOLLOW-UP QUESTION (#37): What causes the process to be delayed?

STATE RESPONSE: Delays typically occur when new advertising areas must be added to the Agreement. Under the current structure, this requires a formal supplement for each additional area, which involves multiple review and approval steps.

FOLLOW-UP QUESTION (#37): Why not assign the entire Airport to the concessionaire and approve each advertisement individually?

STATE RESPONSE: The Airport must retain appropriate control over Airport property. Assigning the entire Airport footprint without defined parameters would reduce necessary oversight and increase administrative burden. The Airport's Leasing Department is not structured to approve individual advertisements on an ongoing basis.

FOLLOW-UP STATEMENT (#37): Quarterly submissions would limit the concessionaire's flexibility to respond quickly to advertiser requests.

STATE RESPONSE: Quarterly submissions are intended to identify and pre-approve potential future advertising areas in Exhibit B-1. Once memorialized by supplement, the concessionaire may respond quickly to advertiser requests without additional amendments. Proposals will be evaluated solely on Amended Exhibit B (December 2025); Exhibit B-1 will be negotiated and executed with the selected concessionaire.

QUESTION #38: What technology is the airport looking for?

STATE RESPONSE: The Airport seeks modern, innovative advertising technology that supports a strong sense of place and reflects Alaska's unique identity. Proposers are encouraged to present creative solutions that integrate current technology with authentic Alaska-themed content, providing a refreshed and engaging experience for a diverse traveler audience.

QUESTION #39: Is ANC looking for particular metrics to be elevated?

STATE RESPONSE: No specific metrics are currently tracked or targeted. The primary objective is to enhance the overall customer experience by incorporating modern technology in a balanced way that appeals to all passenger demographics while also reinforcing a strong sense of place.

QUESTION #40: Have ads been denied?

STATE RESPONSE: Yes. Advertisements may be denied if they are deemed inappropriate for a family-friendly airport environment, including but not limited to content that is graphic, political, controversial, or related to weapons, alcohol, or drugs. Decisions to deny advertisements are made at an elevated review level and may include legal review to ensure consistency with Airport policies and applicable regulations.

QUESTION #41: How many areas does the airport own now?

STATE RESPONSE: The State currently owns digital displays in four areas within the airport. These locations are not identified as approved advertising locations in Amended Exhibit B (December 2025). All State-owned screens are in the process of being removed, with the exception of three screens located in the Aurora Hallway leading to the car rental area, which will remain in place.
