Message Phone: 907 451-5425 Work Phone: 907 451-5425 Fax: \_\_\_\_\_

Location of material site Designated material site ADL # 419570 ADOT/PF MS# 65-9-005-2 Other

Legal description: See attached site drawing

Meridian Umiat Township 3S, Range 14E, Section 29 & 30 1/4 1/4

Municipality \_\_\_\_\_ Approximate size of the material site in acres \_\_\_\_\_

Applicant is at least 18 years old:  Yes  No

Quantity of material desired (cubic yards): 200,000

Length of time requested for removal: 5 years

When is the extraction operation proposed to begin? Summer 2026 End? Fall 2031

For what purpose will the material be used? Maintenance and construction of public roads

Are there any existing permits, leases or authorizations covering any part of the application site:  Yes  No.

If yes, state name and last known address of  lessee  permittee  authorized user:

Name \_\_\_\_\_ Message phone \_\_\_\_\_ Work phone \_\_\_\_\_

Address \_\_\_\_\_ City \_\_\_\_\_ State \_\_\_\_\_ Zip \_\_\_\_\_

Describe the proposed method of excavation, including the type of equipment to be used:

ADL# \_\_\_\_\_

Material Sale Application Form 102-143 (Rev 08/22)

Page 1 of 2

Describe the type of material to be extracted (e.g., coarse, un-sized angular rocks; well-sorted and sized gravel; sand and gravel mixed with some shale; class of rip rap; ballast).

Material (Sand and Gravel) will be excavated by dozer/scraper or excavator depending on the specific project.

How many cubic yards do you propose to extract per month? \_\_\_\_\_ per year? \_\_\_\_\_ as needed

Is material site area located within or immediately adjacent to a waterbody?  Yes  No.

**Note:** If extraction will occur on state submerged land, shoreland, or tideland you **must** fill out and sign a "Material Sales Supplemental Questionnaire for State Submerged Land, Shoreland, or Tideland Activities." The completed supplemental questionnaire will become part of your application.

Is your mining operation contemplating the use of explosives or blasting?  Yes  No.

**Note:** If extraction will involve use of explosives, you **must** fill out and sign a "Material Sales Supplemental Questionnaire for use of Explosives." The completed supplemental questionnaire will become part of your application.

If permits are required by other agencies, have they been applied for?  Yes  No.

## APPLICANT ENVIRONMENTAL RISK QUESTIONNAIRE

The purpose of this questionnaire is to help clarify the types of activities you propose to undertake. The questions are meant to help identify the level of environmental risk that may be associated with the proposed activity. The Division of Mining, Land and Water's evaluation of environmental risk for the proposed activity does not imply that the parcel or the proposed activity is an environmental risk from the presence or use of hazardous substances.

Through this analysis, you may become aware of environmental risks that you did not know about. If so, you may want to consult with an environmental engineer or an attorney.

Dept. Of Transportation and Public Facilities

Applicant's Name 2301 Perger Rd	Doing Business As Fairbanks	AK	99709
Address (907) 451-5425	City kahlil.wilson@alaska.gov	State Kahlil Wilson	Zip Contact Person
Message Phone	Work Phone	Email	

Describe the proposed activity:

Continued Development of an exisiting material site using standard construction equipment

In the course of your proposed activity will you generate, use, store, transport, dispose of, or otherwise come in contact with toxic and/or hazardous materials, and/or hydrocarbons?  Yes  No. If yes, please list the substances and the associated quantities. Use a separate sheet of paper, if necessary.

Approximately 25 gallons of diesel and no more than 10 gallons of lubrication fluids are required to run construction equipment for excavation and hauling.

If the proposed activities involve any storage tanks, either above or below ground, address the following questions for each tank. Please use a separate sheet of paper, if necessary, and, where appropriate, include maps or plats:

- a. Where will the tank be located?
- b. What will be stored in the tank?
- c. What will be the tank's size in gallons? \_\_\_\_\_
- d. What will the tank be used for? (Commercial or residential purposes?)
- e. Will the tank be tested for leaks? \_\_\_\_\_
- f. Will the tank be equipped with leak detection devices?  Yes  No. If yes, describe: \_\_\_\_\_

Do you know or have any reason to suspect that the site may have been previously contaminated?  Yes  No. If yes, please explain:

I certify that due diligence has been exercised and proper inquiries made in completing this questionnaire, and that the foregoing is true and correct to the best of my knowledge.

**MATERIAL SITE RECLAMATION PLAN OR  
LETTER OF INTENT/ANNUAL RECLAMATION STATEMENT  
AS 27.19.030 – 27.19.050**

In accordance with Alaska Statute 27.19, reclamation is required of all mining operations, including sand and gravel extraction. Completion of this form will meet the law's requirements for a **reclamation plan** (see below for filing requirements; due date: at least 45 days before mining is proposed to begin; requires approval by the Division of Mining, Land and Water). Completion of this form will also serve as a **letter of intent** for operations exempt from the plan requirement (due date: before mining begins). No approval is required for a letter of intent, but a miner who files a letter of intent must, before December 31, file an **annual reclamation statement** (Section 8 of this form).

Check applicable box:

A. RECLAMATION PLAN (REQUIRED if the operation will disturb five or more acres this year, OR 50,000 cubic yards, OR if the operation has a cumulative disturbed area of five or more acres)

B. RECLAMATION PLAN-VOLUNTARY (for an operation below the limits shown in Box A but wanting to qualify for the statewide bonding pool)

C. LETTER OF INTENT (less than five acres to be disturbed AND less than 50,000 cubic yards AND less than five acres unclaimed area) NOTE: A miner who files a letter of intent is also required to file an annual reclamation statement at the end of the year.

THIS RECLAMATION PLAN/LETTER OF INTENT IS FOR CALENDAR YEAR \_\_\_\_\_  
(If you checked either box a or b above and propose a multi-year plan, state all years covered.)

1. **MINER INFORMATION** (If there is more than one miner, attach a list of the names, addresses, and telephone numbers of all other owners, operators, or leaseholders of the mining operation)

Dept. of Transportation and Public Facilities

Name of miner who will serve as agent for notice purposes  
2301 Peger Rd

Address (notify the department of any later change of address)

Fairbanks AK 99709 907 451-5425

City State Zip code Telephone

Dept. of Natural Resources - MLW

Name of landowner (if other than miner) or public land management agency

MMS# 419570

Federal or state casenumber (if any) assigned to the site

**2. LEGAL DESCRIPTION OF PROPOSED MINING SITE**

Section 29 & 30	3S	14E	Umiat
-----------------	----	-----	-------

Legal Subdivision/Section/Quarter-Section	Township	Range	Meridian
---	----------	-------	----------

**3. DESCRIPTION OF THE MINING OPERATION** (if you checked box a or b on p. 1 of this form and are proposing a multi-year reclamation plan, attach separate sheets as needed showing acreage to be mined, volume to be mined, and existing acreage of mined area for each year covered by the plan)

- a. 5> Total acreage to be mined or disturbed during the year.
- b. As Needed Estimated total volume to be mined or disturbed, including overburden.
- c. Riprap & Gravel Type of material (sand, gravel, peat, etc.).
- d. >20 Existing acreage of mined area (disturbed area that has not yet been reclaimed, but counting only acreage disturbed after October 15, 1991).

**4. DESCRIPTION OF THE RECLAMATION OPERATION**

- a. The total acreage that will be reclaimed during the year (or each year, if for a multi-year reclamation plan) is:  
See Attached
- b. Provide a list of equipment (type and quantity) to be used during the reclamation operation.
- c. A time schedule of reclamation measures shall be included as part of the plan.

The following measures must be considered in preparing and implementing the reclamation plan. Please mark those measures appropriate to your reclamation activity:

- Topsoil that is not promptly redistributed to an area being reclaimed will be separated and stockpiled for future use. This material will be protected from erosion and contamination by acidic or toxic materials and preserved in a condition suitable for later use.
- The area will be backfilled, graded and recontoured using strippings, overburden, and topsoil to a condition that allows for the reestablishment of renewable resources on the site within a reasonable period of time. It will be stabilized to a condition that will allow sufficient moisture to be retained for natural revegetation.
- Stockpiled topsoil will be spread over the reclaimed area to promote natural plant growth that can reasonably be expected to revegetate the area within five years.
- Stream channel diversions will be relocated to a stable location in the flood plain.
- Exploration trenches or pits will be backfilled. Brush piles, vegetation, topsoil, and other organics will be spread on the backfilled surface to inhibit erosion and promote natural revegetation.
- All buildings and structures constructed, used, or improved on land owned by the State of Alaska will be removed, dismantled, or otherwise properly disposed of at the completion of the mining operation.
- Any roads, airstrips or other facilities constructed to provide access to the mining operation shall be reclaimed (unless otherwise authorized) and included in the reclamation plan.
- Peat and topsoil mine operations shall ensure a minimum of two inches of suitable growing medium is left or replaced on the site upon completion of the reclamation activity.
- If extraction occurs within a flood plain, the reclamation activity shall reestablish a stable bed and bank profile such that river currents will not be altered and erosion and deposition patterns will not change.

NOTE: If you propose to use reclamation measures other than those shown above, or if the private landowner or public land manager of the site requires you to use stricter reclamation measures than those shown above, attach a list of those measures to this plan.

## 5. ALTERNATE POST-MINING LAND USE

The mining site is public land. The land management agency's land use plan (if any) for post-mining land use is:

---

The mining site is public land. As allowed by AS 27.19.030(b), I propose to reclaim it to the following post-mining land use:

---

The mining site is private property. The private landowner plans to use it for the following post-mining land use:

---

## 6. ATTACHMENTS

- If the mining operation has additional owners, operators, or leaseholders not shown on p. 1 of this form, attach a list of their names, addresses, and telephone numbers.
- Attach a USGS map at a scale no smaller than 1:63,360 (inch to the mile) showing the general vicinity of the mining operation and the specific property to be mined. Option: If you checked Box C on the first page of this form and the mining site is adjacent to an airport or public highway, state the name of the airport or the name and milepost of the public highway.
- Attach a diagram of the mined area (this term includes the extraction site, stockpile sites, overburden disposal sites, stream diversions, settling ponds, etc.) and the mining operation as a whole (this term includes the roads you plan to build, your power lines, support facilities, etc.). Show and state the number of acres to be mined during the year. (If you checked Box A or B on the first page of this form and your plan covers more than one year, show each year's work.) Show the location corners or property boundaries of the site in relation to the reclamation work and any other areas affected by the operation.
- Attach a list of the equipment (type and quantity) to be used during the reclamation activity.
- A time schedule of events must be attached that includes dates and activities related to this reclamation plan.
- If the site is private land not owned by the miner, attach a signed, notarized statement from the landowner indicating the landowner's consent to the operation. The landowner may also use the consent statement to notify the department that the landowner plans a post-mining land use incompatible with natural revegetation and therefore believes that reclamation to the standard of AS 27.19.020 is not feasible.
- For those miners that are required to file an annual reclamation statement, attach photographs and/or videotapes dated and described as to location of the reclamation activity that was completed.
- If you propose to use reclamation measures other than those listed on this form, or if the private landowner or public land manager of the site requires you to use stricter reclamation measures, attach a list of those measures.

7. RECLAMATION BONDING (REQUIRED ONLY IF YOU CHECKED BOX A or B ON THE FIRST PAGE OF THIS FORM)

The total acreage of my mining operation that is subject to the bonding requirement for the current year is

\_\_\_\_\_ acres (add acreages stated in Section 3(a) and 3(d) of this form).

The per-acre bond amount is \$750/acre or a total bond amount of \$\_\_\_\_\_

Please check the appropriate bonding method that you will apply toward this reclamation plan:

- Participation in the statewide bonding pool.
- Posting a corporate surety bond.
- Posting a personal bond accompanied by a letter of credit, certificate of deposit, or a deposit of cash or gold.
- Posting a bond or financial guarantee with another government agency that has jurisdiction over the mining operation, as allowed by a cooperative management agreement between that agency and the Division of Mining, Land and Water.
- Posting a general performance bond with a state agency that meets the requirements of 11 AAC 97.400(4).

---

The above reclamation plan/letter of intent and all attachments are correct and complete to the best of my knowledge.

Signature of Miner

2/4/2026

Date

AS 27.19.030 and AS 27.19.050 require a miner either to file a reclamation plan for approval or to file a letter of intent followed by an annual reclamation statement. AS 38.05.035(a) authorizes the director to decide what information is needed to process an application for the sale or use of state land and resources. This information is made a part of the state public land records and becomes public information under AS 40.25.110 and 40.25.120 (unless the information qualifies for confidentiality under AS 38.05.035(a)(8) and confidentiality is requested, AS 43.05.230, or AS 45.48). Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 44.99.310, by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210. In submitting this form, the applicant agrees with the Department to use "electronic" means to conduct "transactions" (as those terms are used in the Uniform Electronic Transactions Act, AS 09.80.010 – AS 09.80.195) that relate to this form and that the Department need not retain the original paper form of this record: the department may retain this record as an electronic record and destroy the original. In submitting this form, the applicant certifies that he or she has not changed the original text of the form or any attached documents provided by the Division.

8. **ANNUAL RECLAMATION STATEMENT—REQUIRED IF YOU FILED A LETTER OF INTENT (CHECKED BOX C ON THE FIRST PAGE) FOR THIS OPERATION. DUE DATE: DECEMBER 31, \_\_\_\_\_.** YOU MUST FILE EVEN IF THE MINING DESCRIBED IN YOUR LETTER OF INTENT DID NOT TAKE PLACE.

This \_\_\_\_\_ annual reclamation statement is for:  
(year)

- a. \_\_\_\_\_ Total acreage mined.
- b. \_\_\_\_\_ Total volume mined or disturbed, including overburden.
- c. \_\_\_\_\_ Total acreage reclaimed.
- d. \_\_\_\_\_ Cumulative total of unreclaimed acreage.
- e. Reclamation measures that were used (check appropriate measures from Section 4, DESCRIPTION OF THE RECLAMATION OPERATION, and attach list of additional or stricter measures if applicable).

---

The above annual reclamation statement and all attachments are correct and complete to the best of my knowledge.

---

Signature of Miner

**State of Alaska  
Department of Transportation & Public Facilities**

**Mining and Reclamation Guidelines  
Material Site 65-9-005-2  
Dalton Highway MP 334.5**

These guidelines are subject to the Alaska Department of Natural Resources (DNR) Material Sale Contract, ADL 419959, and stipulations contained therein. For each project, the user or contractor shall submit a Project Mining and Reclamation Plan to DNR for approval, subject to DOT&PF review, prior to any mining activities.

### **Legal Description**

This DNR site is within Section 29/30, T3S, R14E, Umiat Meridian (USGS Quad Map Sagavanirktok A-4). It is on the floodplain of the Sagavanirktok River, adjacent to the Happy Valley airstrip. Access to the mining site is via the Happy Valley airstrip access road, on the east side of the Dalton Highway at milepost 334.5. The site is approximately 78 acres.

### **General Information**

This site (M.S. 65-9-005-2; Alyeska MS 124-2) had previously been permitted by material extraction in 1992 (FG92-III-0035), although a shift in the river channel made the extraction site inaccessible until recently.

The work area to be mined is vegetated uplands between the Dalton Highway ROW and a previously excavated area now used for stockpiling and processing.

Geological investigations at other sites along the Sagavanirktok River show alluvial gravels are generally 20 to 25 feet thick. No investigation has been performed within the area to be excavated.

Material removed from the site will be hauled to an existing pad off the south end of the airstrip to be crushed and stockpiled for future road maintenance use.

Target material consists of sand and gravel with silt and cobbles. Groundwater may be present where not excluded by frozen ground. Additional site information is available at the DOT&PF Materials office.

### **Development Plan**

Mining will be conducted on a project basis and based on project needs. Dewatering may be required. Any new pit may fill with water, creating a pond once mining is complete.

Reclamation will be completed as part of each project. It shall include re-establishing drainage and flattening overburden berms by either re-spreading on disturbed areas, removing for off-site use or placing in depleted ponds.

## **Buffers**

Maintain a 100-foot-wide buffer on the highway right-of-way, the access road (from centerline) and the south perimeter. Manage activities to eliminate disturbance within buffers. Do not alter drainage patterns in a way that would endanger the roads or buffers. Do not locate mining and overburden storage areas, work pads, stockpile locations or other developments within buffers. The exception is to create access to the mining area.

## **Traffic control**

The Happy Valley airstrip is adjacent to the mining site. This remote airstrip is used by a small number of aircraft operated by outfitters/guides. Aviation activity may occur during mining operations. While mining/crushing operations are in progress, traffic control would be enacted at the airstrip to ensure aircraft and equipment safety. A traffic control plan will be developed by the contractor and coordinated with the Department of Transportation Airport Manager.

## **Mining Guidelines**

The Project Mining and Reclamation Plan will adhere to the following guidelines.

1. The contractor or user shall locate the material site boundaries to verify work areas are contained within the site.
2. Locate and clearly mark buffer lines on the ground in work areas. Do not disturb, clear or place any material in buffers.
3. If blasting is considered, all appropriate and applicable regulations shall be followed and parties notified.
4. If possible, stockpile overburden separately from vegetation/organics for reclamation purposes or use off-site. Do not place overburden in future mining areas.
5. Dewatering may be necessary to keep the excavation dry during mining. Previously-mined depleted cells may be utilized for this if permits allow.
6. Flatten or dispose of berms constructed during mining before demobilizing from the site. Disposal off-site or in depleted cells is acceptable.
7. Grade final slopes above the (anticipated final) water table to 3H:1V.
8. The Airport access road shall not be blocked during the project.
9. After each use, remove all equipment and man-made debris from the site. No construction waste may be placed, stored, or abandoned in the site.
10. All mining and stockpiling activities shall be in accordance with applicable Construction General Permits and Storm Water Pollution Prevention Plans.

## **Reclamation Objectives and Guidelines**

Reclamation has several objectives:

1. To restore drainage through the site and stabilize slopes to protect infrastructure.
2. To prevent/minimize erosion and sediment transport.
3. To leave the site in a safe condition that does not endanger people or wildlife.

4. Not to preclude or unduly hinder future development of un-mined areas.

Reclamation activities will follow these general guidelines:

1. Re-establish proper drainage through the site to protect infrastructure.
2. Grade final slopes above the water table to 5H:1V. Grade surface level to match surrounding terrain. Below water depth shall be less than 3 feet within 20 feet of final shoreline.
3. Berms and excess overburden material may be re-spread on disturbed areas, removed for off-site use (with DNR permission) or placed into depleted ponds to create littoral zones.
4. For additional guidance refer to relevant sections of the Alaska Department of Fish and Game Technical Report 93-9, North Slope Gravel Pit Performance Guidelines.

## **Project Mining and Reclamation Plan**

Prior to use of the site for any project, the contractor or user shall submit a Project Mining and Reclamation Plan, in accordance with A.S. 27.19 and 11 AAC 97 to DNR for approval, subject to DOT&PF review. The Plan describes the proposed plan of operation and shall be in compliance with guidelines listed here. Upon approval, the Plan will be followed by the contractor or user and if applicable, the DOT&PF Project Engineer. The plan should include the following:

The sketch map shall include:

1. Site boundaries, buffers, access road, drainage channels, drainage structures
2. Proposed working limits, to be marked on the ground
3. Existing and proposed cells
4. Work pad, stockpile areas, facilities
5. Dewatering and discharge areas
6. Scale of drawing, north arrow, and specific dimensions as appropriate

The narrative shall include:

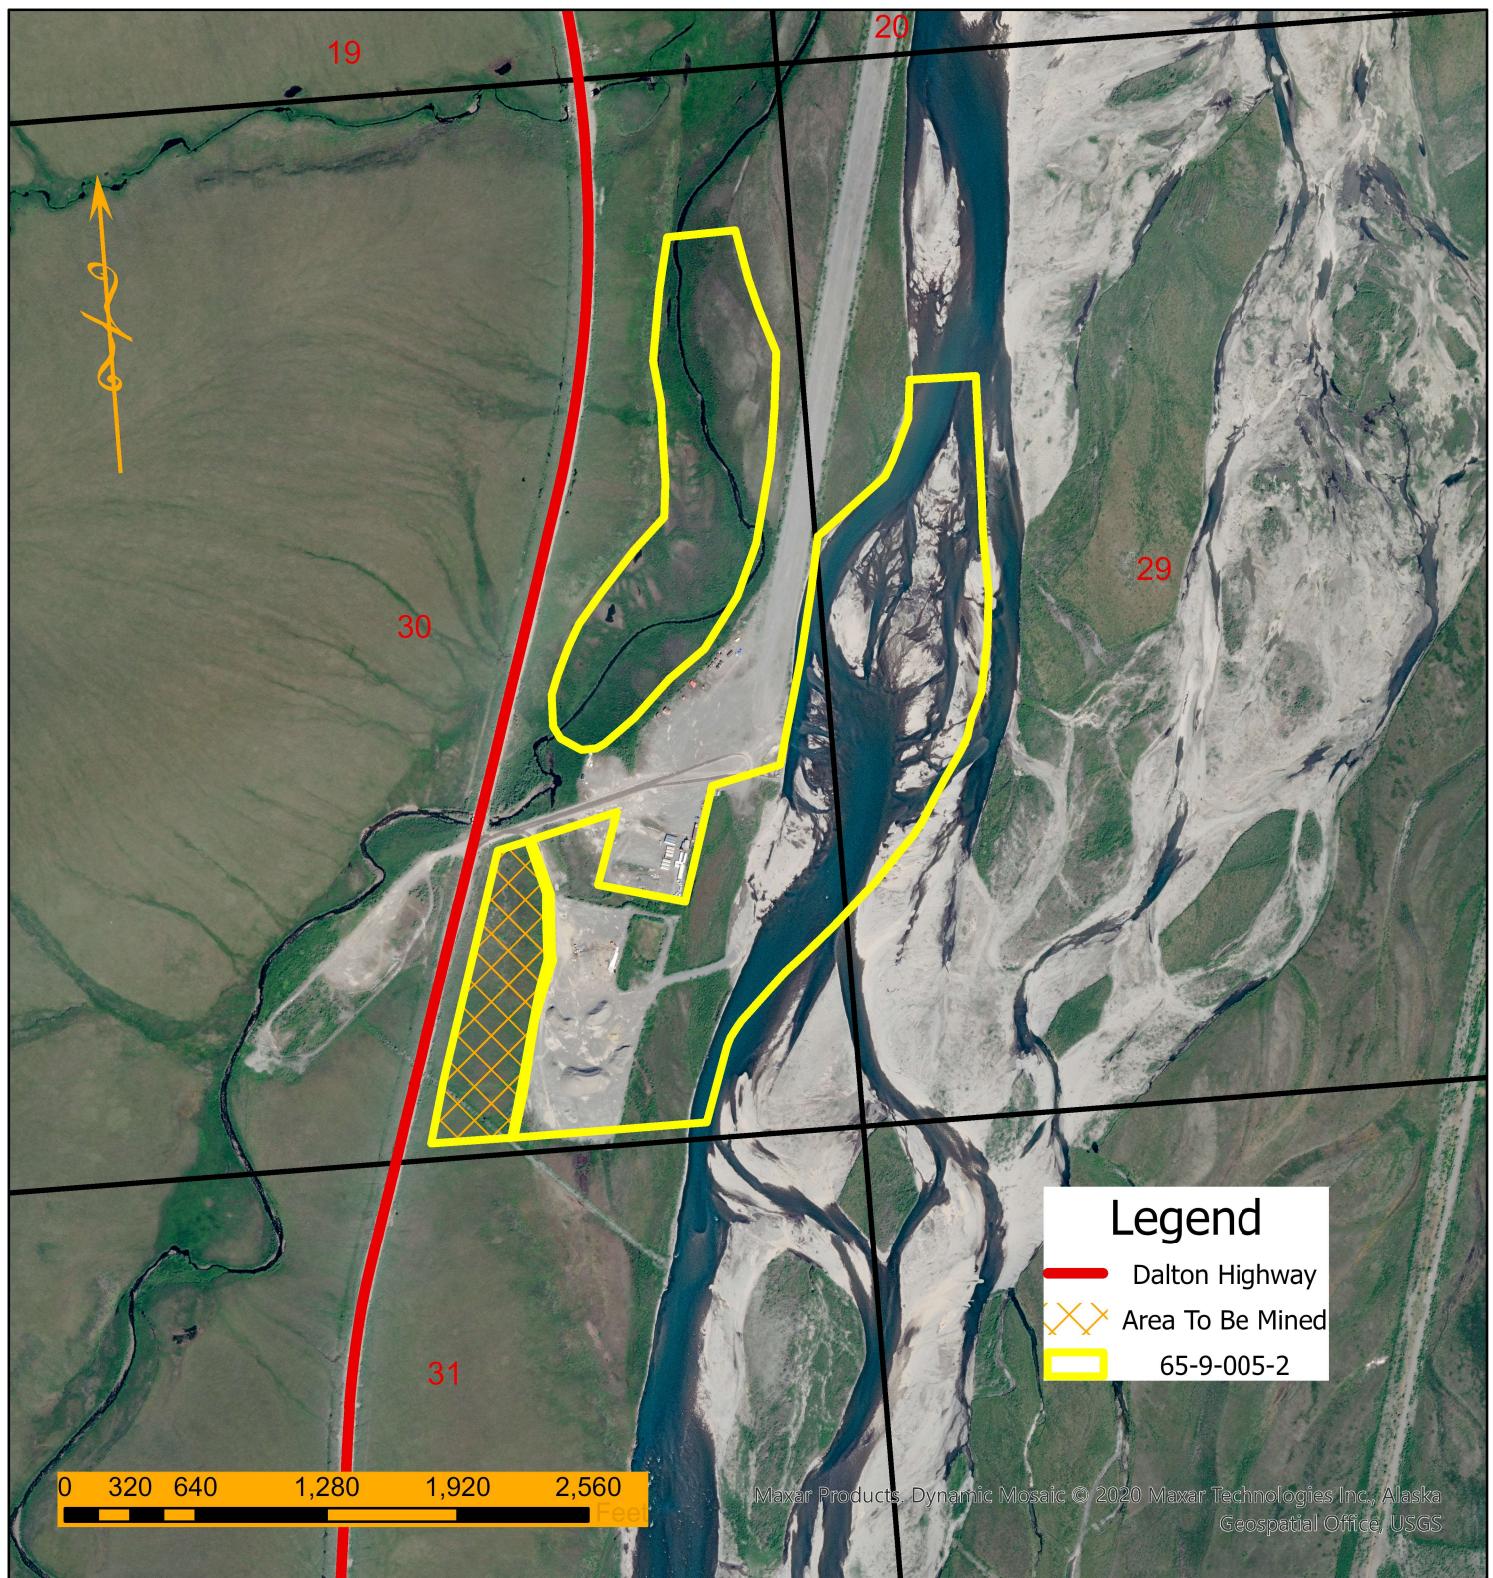

1. Methods of operation
2. Length and times of operation
3. Air and water pollution control measures
4. Reclamation measures

## **Supplements and amendments**

Supplements and amendments to an approved mining and reclamation plan may be initiated by the contractor, user or the DOT&PF Project Engineer, when conditions warrant such action. Supplements and amendments must be mutually agreed upon and proper approval obtained prior to commencement of work of a changed nature.

1. Minor changes are those that affect details of the operation, but remain in compliance with the development guidelines. These changes can be authorized by the DOT&PF Project Engineer.
2. Major changes are those which cause the final outcome of the site to be significantly different from the approved mining and reclamation plan or are not in compliance with the development guidelines. These require approval by DNR and

the DOT&PF Project Engineer.

**M.S. 65-9-005-2**
