MATERIAL SALE APPLICATION

AS 38.05.550-565; AS 38.05.810(a)

ADL # _____

Applicant's Name: DOT & PF Doing business as: _____

Mailing address: 2301 Peger Road Email address: kahlil.wilson@alaska.gov

City/State/Zip: Fairbanks, AK 99709

Message Phone: 907 451-5425 Work Phone: 907 451-5425 Fax: _____

Location of material site Designated material site ADL # 418801 ADOT/PF MS# 65-9-036-2 Other

Legal description: See attached site drawing

Meridian Fairbanks Township _____, Range _____, Section _____ 1/4 _____ 1/4

Municipality _____ Approximate size of the material site in acres ~120

Applicant is at least 18 years old: Yes No

Quantity of material desired (cubic yards): 300,000

Length of time requested for removal: 5 years

When is the extraction operation proposed to begin? Summer 2026 End? Fall 2031

For what purpose will the material be used? Maintenance and construction of public roads

Are there any existing permits, leases or authorizations covering any part of the application site: Yes No.

If yes, state name and last known address of lessee permittee authorized user:

Name	Message phone	Work phone
Address	City	State Zip

Describe the proposed method of excavation, including the type of equipment to be used:

ADL # _____

Describe the type of material to be extracted (e.g., coarse, un-sized angular rocks; well-sorted and sized gravel; sand and gravel mixed with some shale; class of rip rap; ballast).

Material (Sand and Gravel) will be excavated by dozer/scrapper or excavator depending on the specific project.

How many cubic yards do you propose to extract per month? _____ per year? as needed

Is material site area located within or immediately adjacent to a waterbody? Yes No.

Note: If extraction will occur on state submerged land, shoreland, or tideland you **must** fill out and sign a "Material Sales Supplemental Questionnaire for State Submerged Land, Shoreland, or Tideland Activities." The completed supplemental questionnaire will become part of your application.

Is your mining operation contemplating the use of explosives or blasting? Yes No.

Note: If extraction will involve use of explosives, you **must** fill out and sign a "Material Sales Supplemental Questionnaire for use of Explosives." The completed supplemental questionnaire will become part of your application.

If permits are required by other agencies, have they been applied for? Yes No.

Applicant's Signature

2/12/2026

Date

NOTICE: If the proposed material sale is intended to be used for commercial purposes, please include a copy of your business license authorizing you to do business in the State of Alaska. This application will not be considered complete unless accompanied by a sketch map sufficiently detailed to enable the Division of Mining, Land and Water to locate the application site. If the Division of Mining, Land and Water considers it necessary, the applicant may be required to submit a more detailed map or survey plat.

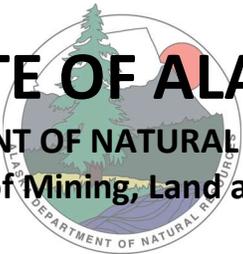

In submitting this form, the applicant certifies that he or she has not changed the original text of the form or any attached documents provided by the Division.

NOTICE: AS 38.05.035(a) authorizes the director to decide what information is needed to process an application for the sale or use of state land and resources. This information is made a part of the state public land records and becomes public information under AS 40.25.110 and 40.25.120, unless the information qualifies for confidentiality under AS 38.05.035(a)(8) and confidentiality is requested, or qualifies for confidentiality AS 43.05.230, AS 45.48, or other state or federal laws. Public information is open to inspection by you or any member of the public. A person who is the subject of the personal information may challenge its accuracy or completeness under AS 40.25.310, by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210. In submitting this form, the applicant agrees with the Department to use "electronic" means to conduct "transactions" (as those terms are used in the Uniform Electronic Transactions Act, AS 09.80.010 – AS 09.80.195) that relate to this form and that the Department need not retain the original paper form of this record: the Department may retain this record as an electronic record and destroy the original.

APPLICANT ENVIRONMENTAL RISK QUESTIONNAIRE

The purpose of this questionnaire is to help clarify the types of activities you propose to undertake. The questions are meant to help identify the level of environmental risk that may be associated with the proposed activity. The Division of Mining, Land and Water's evaluation of environmental risk for the proposed activity does not imply that the parcel or the proposed activity is an environmental risk from the presence or use of hazardous substances.

Through this analysis, you may become aware of environmental risks that you did not know about. If so, you may want to consult with an environmental engineer or an attorney.

Dept. Of Transportation and Public Facilities

Applicant's Name		Doing Business As

Address		City	State Zip
(907) 451-5425	()	kahlil.wilson@alaska.gov	Kahlil Wilson
Message Phone	Work Phone	Email	Contact Person

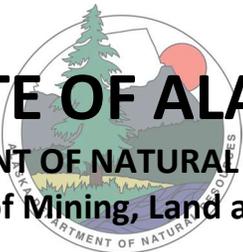

Describe the proposed activity:

Continued Development of an existing material site using standard construction equipment

In the course of your proposed activity will you generate, use, store, transport, dispose of, or otherwise come in contact with toxic and/or hazardous materials, and/or hydrocarbons? Yes No. If yes, please list the substances and the associated quantities. Use a separate sheet of paper, if necessary.

Approximately 25 gallons of diesel and no more than 10 gallons of lubrication fluids are required to run construction equipment for excavation and hauling.

MATERIAL SITE RECLAMATION PLAN OR LETTER OF INTENT/ANNUAL RECLAMATION STATEMENT AS 27.19.030 – 27.19.050

In accordance with Alaska Statute 27.19, reclamation is required of all mining operations, including sand and gravel extraction. Completion of this form will meet the law's requirements for a **reclamation plan** (see below for filing requirements; due date: at least 45 days before mining is proposed to begin; requires approval by the Division of Mining, Land and Water). Completion of this form will also serve as a **letter of intent** for operations exempt from the plan requirement (due date: before mining begins). No approval is required for a letter of intent, but a miner who files a letter of intent must, before December 31, file an **annual reclamation statement** (Section 8 of this form).

Check applicable box:

- | | |
|---|--|
| <input checked="" type="checkbox"/> A. RECLAMATION PLAN (REQUIRED if the operation will disturb five or more acres this year, OR 50,000 cubic yards, OR if the operation has a cumulative disturbed area of five or more acres) | <input type="checkbox"/> C. LETTER OF INTENT (less than five acres to be disturbed AND less than 50,000 cubic yards AND less than five acres unreclaimed area) NOTE: A miner who files a letter of intent is also required to file an annual reclamation statement at the end of the year. |
| <input type="checkbox"/> B. RECLAMATION PLAN-VOLUNTARY (for an operation below the limits shown in Box A but wanting to qualify for the statewide bonding pool) | |

THIS RECLAMATION PLAN/LETTER OF INTENT IS FOR CALENDAR YEAR _____
 (If you checked either box a or b above and propose a multi-year plan, state all years covered.)

1. **MINER INFORMATION** (If there is more than one miner, attach a list of the names, addresses, and telephone numbers of all other owners, operators, or leaseholders of the mining operation)

Dept. of Transportation and Public Facilities _____

Name of miner who will serve as agent for notice purposes
 2301 Peger Rd _____

Address (notify the department of any later change of address)
 Fairbanks AK 99709 907 451-5425
 City State Zip code Telephone

Dept. of Natural Resources - MLW _____

Name of landowner (if other than miner) or public land management agency
 MMS# 418801 _____

Federal or state casefile number (if any) assigned to the site _____

2. LEGAL DESCRIPTION OF PROPOSED MINING SITE

See attached M&R

Legal Subdivision/Section/Quarter-Section	Township	Range	Meridian
---	----------	-------	----------

3. DESCRIPTION OF THE MINING OPERATION (if you checked box a or b on p. 1 of this form and are proposing a multi-year reclamation plan, attach separate sheets as needed showing acreage to be mined, volume to be mined, and existing acreage of mined area for each year covered by the plan)

- a. 5> Total acreage to be mined or disturbed during the year.
- b. As Needed Estimated total volume to be mined or disturbed, including overburden.
- c. Riprap & Gravel Type of material (sand, gravel, peat, etc.).
- d. >20 Existing acreage of mined area (disturbed area that has not yet been reclaimed, but counting only acreage disturbed after October 15, 1991).

4. DESCRIPTION OF THE RECLAMATION OPERATION

- a. The total acreage that will be reclaimed during the year (or each year, if for a multi-year reclamation plan) is:
See Attached
- b. Provide a list of equipment (type and quantity) to be used during the reclamation operation.
- c. A time schedule of reclamation measures shall be included as part of the plan.

The following measures must be considered in preparing and implementing the reclamation plan. Please mark those measures appropriate to your reclamation activity:

- Topsoil that is not promptly redistributed to an area being reclaimed will be separated and stockpiled for future use. This material will be protected from erosion and contamination by acidic or toxic materials and preserved in a condition suitable for later use.
- The area will be backfilled, graded and recontoured using strippings, overburden, and topsoil to a condition that allows for the reestablishment of renewable resources on the site within a reasonable period of time. It will be stabilized to a condition that will allow sufficient moisture to be retained for natural revegetation.
- Stockpiled topsoil will be spread over the reclaimed area to promote natural plant growth that can reasonably be expected to revegetate the area within five years.
- Stream channel diversions will be relocated to a stable location in the flood plain.
- Exploration trenches or pits will be backfilled. Brush piles, vegetation, topsoil, and other organics will be spread on the backfilled surface to inhibit erosion and promote natural revegetation.
- All buildings and structures constructed, used, or improved on land owned by the State of Alaska will be removed, dismantled, or otherwise properly disposed of at the completion of the mining operation.
- Any roads, airstrips or other facilities constructed to provide access to the mining operation shall be reclaimed (unless otherwise authorized) and included in the reclamation plan.
- Peat and topsoil mine operations shall ensure a minimum of two inches of suitable growing medium is left or replaced on the site upon completion of the reclamation activity.
- If extraction occurs within a flood plain, the reclamation activity shall reestablish a stable bed and bank profile such that river currents will not be altered and erosion and deposition patterns will not change.

NOTE: If you propose to use reclamation measures other than those shown above, or if the private landowner or public land manager of the site requires you to use stricter reclamation measures than those shown above, attach a list of those measures to this plan.

5. ALTERNATE POST-MINING LAND USE

- The mining site is public land. The land management agency's land use plan (if any) for post-mining land use is:

The mining site is public land. As allowed by AS 27.19.030(b), I propose to reclaim it to the following post-mining land use:

-
- The mining site is private property. The private landowner plans to use it for the following post-mining land use:
-

6. ATTACHMENTS

- If the mining operation has additional owners, operators, or leaseholders not shown on p. 1 of this form, attach a list of their names, addresses, and telephone numbers.
- Attach a USGS map at a scale no smaller than 1:63,360 (inch to the mile) showing the general vicinity of the mining operation and the specific property to be mined. Option: If you checked Box C on the first page of this form and the mining site is adjacent to an airport or public highway, state the name of the airport or the name and milepost of the public highway.
- Attach a diagram of the mined area (this term includes the extraction site, stockpile sites, overburden disposal sites, stream diversions, settling ponds, etc.) and the mining operation as a whole (this term includes the roads you plan to build, your power lines, support facilities, etc.). Show and state the number of acres to be mined during the year. (If you checked Box A or B on the first page of this form and your plan covers more than one year, show each year's work.) Show the location corners or property boundaries of the site in relation to the reclamation work and any other areas affected by the operation.
- Attach a list of the equipment (type and quantity) to be used during the reclamation activity.
- A time schedule of events must be attached that includes dates and activities related to this reclamation plan.
- If the site is private land not owned by the miner, attach a signed, notarized statement from the landowner indicating the landowner's consent to the operation. The landowner may also use the consent statement to notify the department that the landowner plans a post-mining land use incompatible with natural revegetation and therefore believes that reclamation to the standard of AS 27.19.020 is not feasible.
- For those miners that are required to file an annual reclamation statement, attach photographs and/or videotapes dated and described as to location of the reclamation activity that was completed.
- If you propose to use reclamation measures other than those listed on this form, or if the private landowner or public land manager of the site requires you to use stricter reclamation measures, attach a list of those measures.

7. **RECLAMATION BONDING** (REQUIRED ONLY IF YOU CHECKED BOX A or B ON THE FIRST PAGE OF THIS FORM)

The total acreage of my mining operation that is subject to the bonding requirement for the current year is _____ acres (add acreages stated in Section 3(a) and 3(d) of this form).

The per-acre bond amount is \$750/acre or a total bond amount of \$_____

Please check the appropriate bonding method that you will apply toward this reclamation plan:

- Participation in the statewide bonding pool.
- Posting a corporate surety bond.
- Posting a personal bond accompanied by a letter of credit, certificate of deposit, or a deposit of cash or gold.
- Posting a bond or financial guarantee with another government agency that has jurisdiction over the mining operation, as allowed by a cooperative management agreement between that agency and the Division of Mining, Land and Water.
- Posting a general performance bond with a state agency that meets the requirements of 11 AAC 97.400(4).

The above reclamation plan/letter of intent and all attachments are correct and complete to the best of my knowledge.

Signature of Miner

2/12/2026

Date

AS 27.19.030 and AS 27.19.050 require a miner either to file a reclamation plan for approval or to file a letter of intent followed by an annual reclamation statement. AS 38.05.035(a) authorizes the director to decide what information is needed to process an application for the sale or use of state land and resources. This information is made a part of the state public land records and becomes public information under AS 40.25.110 and 40.25.120 (unless the information qualifies for confidentiality under AS 38.05.035(a)(8) and confidentiality is requested, AS 43.05.230, or AS 45.48). Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 44.99.310, by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210. In submitting this form, the applicant agrees with the Department to use "electronic" means to conduct "transactions" (as those terms are used in the Uniform Electronic Transactions Act, AS 09.80.010 – AS 09.80.195) that relate to this form and that the Department need not retain the original paper form of this record: the department may retain this record as an electronic record and destroy the original. In submitting this form, the applicant certifies that he or she has not changed the original text of the form or any attached documents provided by the Division.

8. **ANNUAL RECLAMATION STATEMENT—REQUIRED** IF YOU FILED A LETTER OF INTENT (CHECKED BOX C ON THE FIRST PAGE) FOR THIS OPERATION. DUE DATE: DECEMBER 31, _____. YOU MUST FILE EVEN IF THE MINING DESCRIBED IN YOUR LETTER OF INTENT DID NOT TAKE PLACE.

This _____ annual reclamation statement is for:
(year)

- a. _____ Total acreage mined.
- b. _____ Total volume mined or disturbed, including overburden.
- c. _____ Total acreage reclaimed.
- d. _____ Cumulative total of unreclaimed acreage.
- e. Reclamation measures that were used (check appropriate measures from Section 4, DESCRIPTION OF THE RECLAMATION OPERATION, and attach list of additional or stricter measures if applicable).

The above annual reclamation statement and all attachments are correct and complete to the best of my knowledge.

Mining and Reclamation Guidelines
MS 65-9-036-2 Coldfoot Sand Pit
Dalton Highway MP 177.9

These guidelines are subject to the State of Alaska Department of Natural Resources (DNR) Material Sale Contract ADL _____ and stipulations contained therein. A copy of the contract is available at ADOT Northern Region Materials Section office at 2301 Peger Road, Fairbanks, AK, 99709, Phone: (907) 451-2245.

Location

Access is at Mile 177.9 on the west side of the Dalton Highway, about 3 miles north of Coldfoot. The legal description is Fairbanks Meridian, T29N, R12W, SEC 35, SE $\frac{1}{4}$ of SW $\frac{1}{4}$, and T28N, R12W, SEC 3, E $\frac{1}{2}$ of NW $\frac{1}{4}$.

Description

This site is an alluvial terrace deposit of sandy gravel with silt and cobbles. Silt overburden in stripped areas (where explored) is 1 to 2 feet thick. Other areas may have more overburden. Groundwater lies several feet below the pit floor. Pit drainage has been internal with little ponding except at breakup. Permafrost is present, mainly in undeveloped areas. Site-specific information including drilling and laboratory test data are available at ADOT Northern Region Materials Section office.

The pit floor has over 10 acres for stockpiling and processing activities. ADOT M&O has several stockpiles currently at the site. The pit is separated from Texas Slough on the west and an intermittent drainage channel on the east by 50 foot buffer zones that consist of berms up to 35 feet high.

ADOT shares this site with Alyeska Pipeline Service Company (APSC). Alyeska refers to this site as OMS 98-3.1. ADOT works in the southern portion of the site and ASPC works the northern portion. The access road passes through the APSC work area.

Proposed Use

This site produces sand and gravel. The best use of the material is for crushed products.

Scheduling

The contractor is responsible for ascertaining there are no competing production interests during their desired production window.

Mining Guidelines

Mining will occur in existing disturbed areas until these areas are exhausted, prior to mining in undisturbed areas. The following guidelines are to be followed:

1. Conduct mining activities to put materials to their best use.
2. All mining activities will be in accordance with the Construction General Permit (CGP) and an approved Storm Water Pollution Prevention Plan (SWPPP).
3. The contractor shall survey and mark material site and buffer boundaries in the area to be mined prior to breaking ground.
4. A 50-foot-wide buffer zone along the edge of working limits will be maintained and extended as working limits move south. No overburden or cleared debris will be pushed down slopes into drainages, especially into Texas Slough.
5. At the end of each use, the pit floor will be graded level or gently sloping to match the floor of previously worked areas. The floor may be mined to 4 feet above the water table so long as final grades are level across the site.
6. Material from the berm separating the pit from Texas Slough may be mined to reduce the berm height, provided that usable materials and overburden piles are managed (segregated), final slopes are left in a safe, reclaimed condition, and buffers are maintained.
7. Slopes along the material site boundaries, or where future development is not anticipated to occur will be graded to 3H:1V.
8. Activity will be kept within ADOT work limits except for hauling which passed through APSC work areas.
9. Ripping may be required for frozen ground.

Once disturbed areas are exhausted, pit expansion may proceed according to these additional guidelines.

1. Future mining will target a shallow, alluvial deposit south of the intermittent drainage channel. This area has not been explored or defined so quantity and type of material are unknown. Mining would extend from the current limits southward, maintaining lateral buffers. The pit floor elevation will be maintained to 4 feet above the water table.
2. When mining limits daylight at the intermittent drainage channel south of the current pit, drainage will be established across the pit floor and a culvert will be placed where vehicle traffic will cross or otherwise rerouted around the pit. Drainage modifications will require approval of Project Engineer.
3. Surface vegetation and organic soil will be stockpiled for later use in reclamation. Preferable location for overburden storage is in the buffer along the eastern edge of future mining area limits (see sketch).

4. Inorganic overburden will be pushed off and stored in berms separate from the organic material.
5. Overburden will not be stockpiled where it will need to be moved during future stripping or mining.

Reclamation Objectives and Guidelines

The reclamation plan has several objectives:

1. To blend newly reclaimed areas with previous reclamation.
2. To not preclude future development of minable areas.
3. To leave the excavated portion of the pit in a safe manner that would not endanger humans or wildlife.
4. To prevent erosion and sediment transport to surrounding areas.
5. To reestablish native vegetation.

Reclamation activities will follow these general guidelines:

1. They will be in accordance with the CGP and an approved SWPPP.
2. Slopes will be graded to match existing reclaimed slopes, approximately to 3H:1V.
3. Available inorganic overburden may be spread over regraded slopes.
4. Available vegetation and organic soils may then be spread over overburden.

Project Mining and Reclamation Plan

Prior to use of the site for any project, the contractor shall submit a detailed Project Mining and Reclamation Plan, in accordance with A.S. 27.19 and 11 AAC 97 for approval by both the DNR and ADOT. The detailed mining and reclamation plan submitted by the contractor will follow the guidelines in this plan.

The Project Mining and Reclamation Plan, by sketch maps and narrative, describes the contractor's proposed method of operation. After approval, the Plan will be followed by the contractor and Project Engineer.

In general any data that can be shown graphically should be shown in that manner unless it can be better described in the accompanying narrative. Section and profile drawings should be used as appropriate.

Project Mining and Reclamation Plans should contain the following, as appropriate:

1) SKETCH MAPS

Sketch maps shall have a scale sufficient for clarity. Items to be shown on sketch maps shall include, as appropriate:

- a) Site boundaries (including monuments);

- b) Existing access route;
- c) Proposed working limits and buffer zones to be marked on the ground;
- d) Development stages;
- e) Approximate contours before and after excavation;
- f) Vegetation lines, screens and dimensions;
- g) Material stockpiling areas;
- h) Overburden and reject stockpiling areas;
- i) Other planned features, such as processing plants, weigh scales, etc.;
- j) Final slope ratios and site drainage measures;
- k) Scale of drawing, north arrow, and specific dimensions as appropriate.

2) NARRATIVE

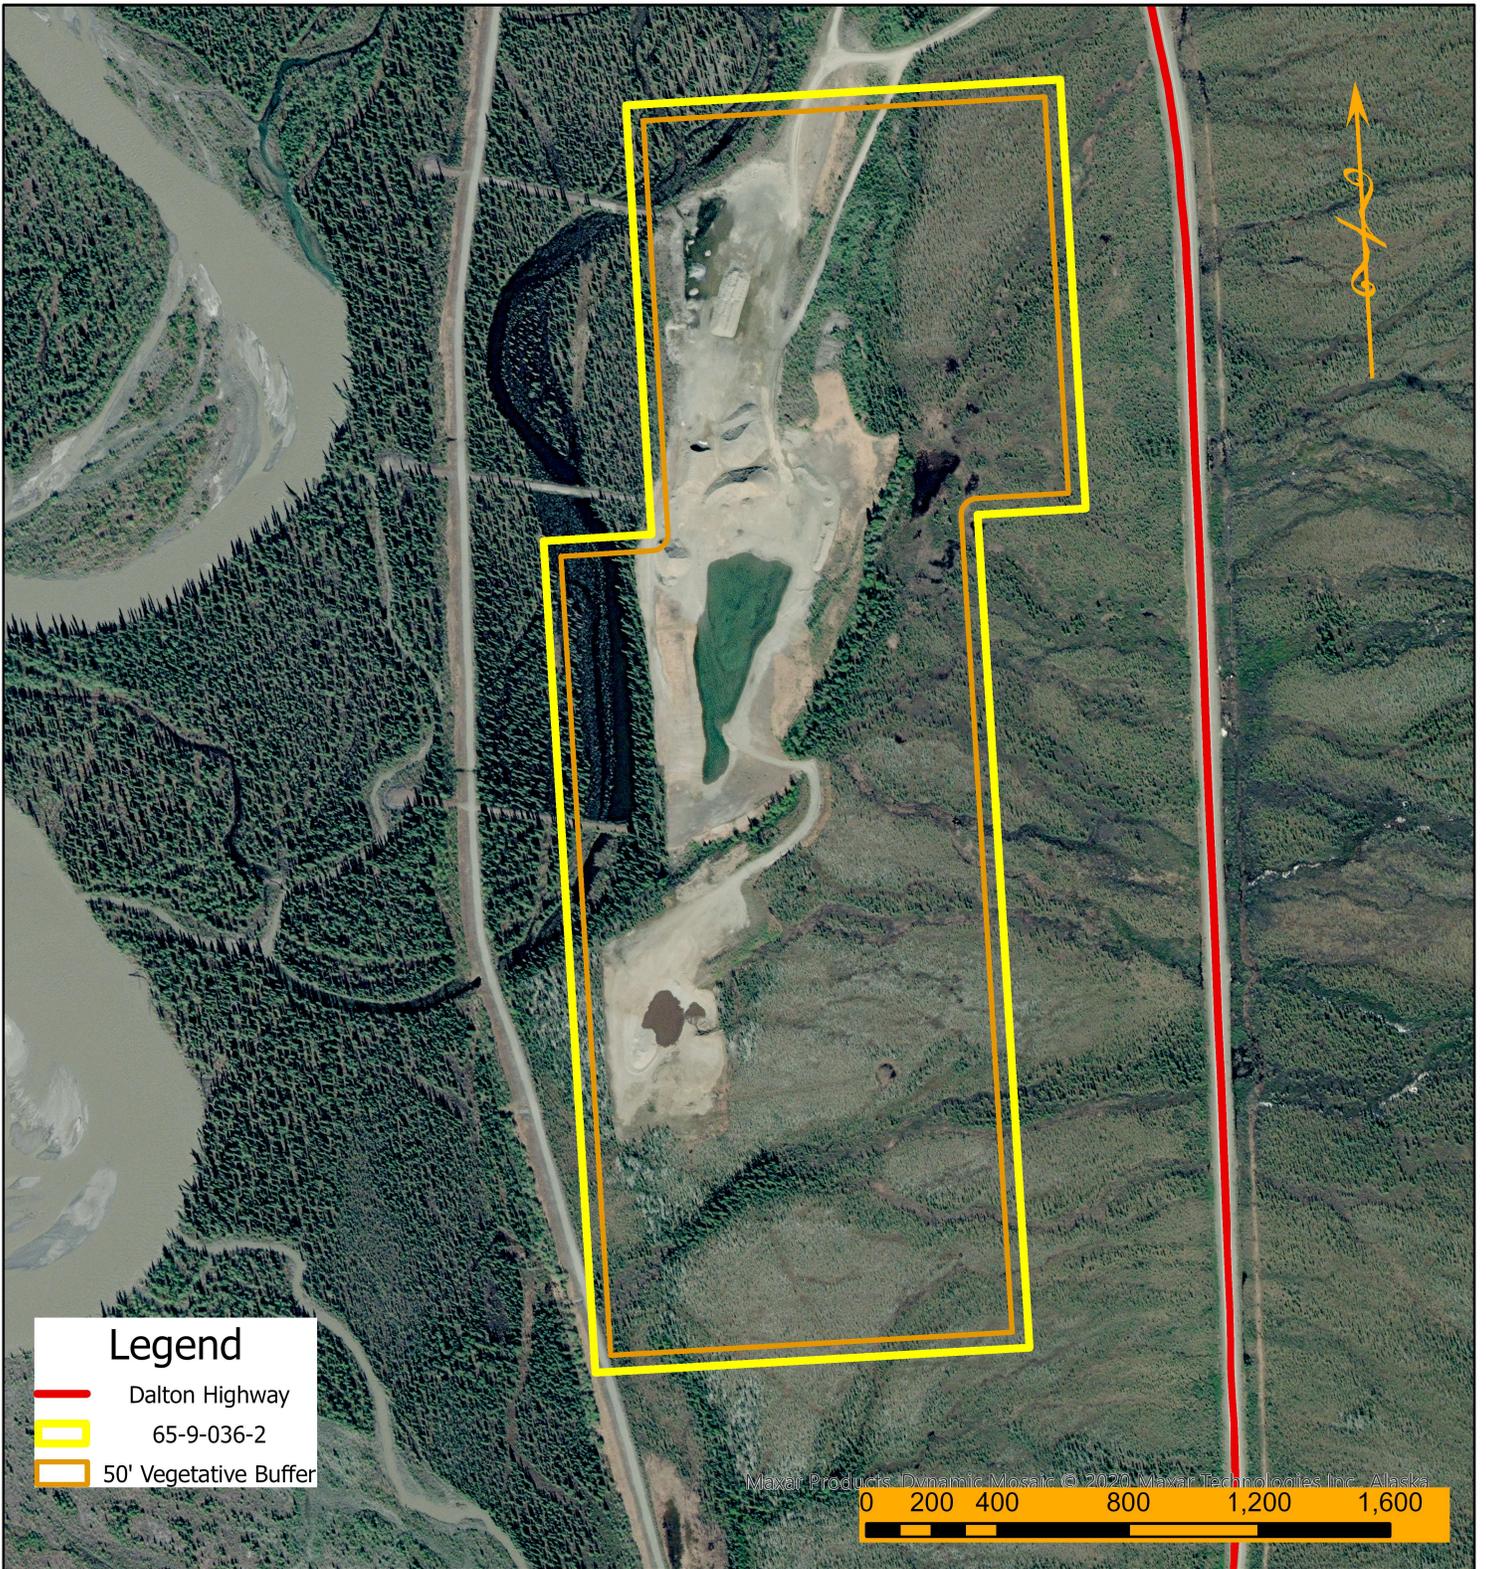

The narrative shall include:

- a) Methods of operation;
- b) Length and times of operation (day, month, year, and working hours);
- c) Air and water pollution control measures;
- d) Reclamation measures.

3) SUPPLEMENTS AND AMENDMENTS

Supplements and amendments to an approved mining and reclamation plan may be initiated by the contractor or the Resident Engineer when conditions warrant. Supplements and amendments must be mutually agreed upon and proper approval obtained prior to commencement of work of a changed nature.

- a) Minor changes are those that affect the handling of the details of the operation, but remain in compliance with the development guidelines. These changes may be authorized by the Resident Engineer.
- b) Major changes are those which cause the final outcome of the site to be significantly different from the approved mining and reclamation plan or are not in compliance with the development guidelines. Major changes must be approved in writing by the Project Engineer.
