7. Hospital Management Support for Patient Safety

The actions of hospital management show that patient safety is a top priority. (Item F1)

Hospital management provides adequate resources to improve patient safety. (Item F2)

Hospital management seems interested in patient safety only after an adverse event happens. (Item F3*)

8. Response To Error

When staff make errors, this unit focuses on learning rather than blaming individuals. (Item A10)

In this unit, staff feel like their mistakes are held against them. (Item A6*)

When an event is reported in this unit, it feels like the person is being written up, not the problem. (Item A7*)

In this unit, there is a lack of support for staff involved in patient safety errors. (Item A13*)

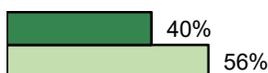

9. Handoffs and Information Exchange

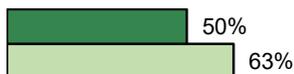

During shift changes, there is adequate time to exchange all key patient care information. (Item F6)

When transferring patients from one unit to another, important information is often left out. (Item F4*)

During shift changes, important patient care information is often left out. (Item F5*)
