Questions and Answers

Question 1.

Based on the current quantity of dust palliative required and the limit on the bid price XXXXXX will not be able to bid. We see one of two changes that will make it possible for us to contend.

1. Keep the application rate and raise the limit to about \$160,000
2. Reduce the coverage to one gallon per 40 square feet. An application rate of 1/40 should be sufficient to fulfill the cost/efficacy equation. Totes are 275 gallons so, 6875 gallons should be about right.

Answer 1.

1. \$125,500.00 is the maximum budgeted for this project.
2. The product can go 1 gallon per 20 feet or 1 gallon per 30 feet, but not 1 gallon per 40 feet.
