Ref: Glennallen Regional Landfill  
Extension of Solid Waste Permit #SW2A009-30

Dear Ms. Powers:

We are seeking an amendment to Solid Waste Permit #SW2A009-30 to include the Cell 2 Expansion. We intended the expansion to be included in the permit when issued. Please include it in the existing permit.

The ADNR lease agreement has all of the Class II areafill (which includes cell 1, cell 2 and cell 3) and the old Class III garbage trenches as the designated solid waste area in the lease. ADEC requires an expansion request to move from one portion of the landfill to the next, whereas the ADNR lease designation was for the garbage footprint of the original 40-acres, less the 100-foot set-back, of the current 77.5-acres lease. By the lease stipulations, we are required to submit updated site plans to ADNR and have sent that information today.

Please grant the extension into Cell 2 of the areafill.

Respectfully submitted,

*Sharon R Daniel*
