MATERIAL SITE DESIGNATION APPLICATION
AS 38.05.550

ADL # (assigned by DNR) _____

Applicant's Name: AK DOT&PF Doing business as: _____

Mailing address: 2301 Peger Rd. Email address: _____

City/State/Zip: Fairbanks, AK 99709

Message Phone: [REDACTED] Work Phone: [REDACTED] Fax: _____

What kind of designation are you applying for? New site Expansion of existing site Site amendment

Material site location: Designated material site ADL # (if existing) 224966 ADOT/PF MS# 35-4-045-2

Legal description: _____

Meridian Fairbanks Township 21S, Range 10W, Section 8 & 9 _____ 1/4 _____ 1/4

Municipality _____ Approximate size of the material site in acres 79

What is the current condition of the proposed site? Undeveloped, Adjacent to the DOT East Fork Maint. Station

State the desired development date for the proposed site? Summer 2026

Describe the proposed method of excavation, including the type of equipment to be used:

Material will be excavated by dozer/scrapper or excavator depending on the specific project.

Describe the type of material, (e.g., coarse, un-sized angular rocks; well-sorted and sized gravel; sand and gravel mixed with some shale; class or rip rap; ballast):

Sand and Gravel

Describe all known geotechnical exploration conducted at this site (attach any known reports, or compilations of data showing the material type and quantity located at this site):

see attached

ADL # _____
(Rev 08/22)

If permits are required by other agencies, have they been applied for? Yes No. If yes, what permits have been applied for? _____

A diagram of the proposed site location is required, have you provided a diagram showing the proposed site, including the extraction area, stockpile sites, overburden disposal areas, stream diversions, etc.? Yes, see attached No.

To your knowledge, is the general shoreline in the vicinity of the proposed site undergoing any of the following?
 Erosion; accretion; neither.

Do you anticipate any mining activity to take place within any state-owned tidelands, state-owned shorelands, or other state-owned submerged lands? Yes No.

If yes, please complete and attach the "Material Sales Supplemental Questionnaire for State Submerged Land, Shoreland, or Tideland Activities" to your application materials.

Do you anticipate development of this material source to require blasting or the use of explosives? Yes No.

If yes, please complete and attach the "Material Sales Supplemental Questionnaire for Use of Explosives" to your application materials.

By signing below the applicant affirming the information provided in this application, and all attachments, are correct and complete to the best of their knowledge.

APPLICANT ENVIRONMENTAL RISK QUESTIONNAIRE

The purpose of this questionnaire is to help clarify the types of activities you propose to undertake. The questions are meant to help identify the level of environmental risk that may be associated with the proposed activity. The Division of Mining, Land and Water's evaluation of environmental risk for the proposed activity does not imply that the parcel or the proposed activity is an environmental risk from the presence or use of hazardous substances.

Through this analysis, you may become aware of environmental risks that you did not know about. If so, you may want to consult with an environmental engineer or an attorney.

Dept. Of Transportation and Public Facilities

Applicant's Name		Doing Business As	
2301 Perger Rd		Fairbanks	AK 99709
Address		City	State Zip
[REDACTED]		[REDACTED]	Kahlil Wilson
Message Phone	Work Phone	Email	Contact Person

Describe the proposed activity:

Continued Development of an existing material site using standard construction equipment

In the course of your proposed activity will you generate, use, store, transport, dispose of, or otherwise come in contact with toxic and/or hazardous materials, and/or hydrocarbons? Yes No. If yes, please list the substances and the associated quantities. Use a separate sheet of paper, if necessary.

Approximately 25 gallons of diesel and no more than 10 gallons of lubrication fluids are required to run construction equipment for excavation and hauling.

ADL # _____

If the proposed activities involve any storage tanks, either above or below ground, address the following questions for each tank. Please use a separate sheet of paper, if necessary, and, where appropriate, include maps or plats:

- a. Where will the tank be located?

- b. What will be stored in the tank?

- c. What will be the tank's size in gallons? _____
- d. What will the tank be used for? (Commercial or residential purposes?)

- e. Will the tank be tested for leaks? _____
- f. Will the tank be equipped with leak detection devices? Yes No. If yes, describe:

Do you know or have any reason to suspect that the site may have been previously contaminated? Yes No.
If yes, please explain:

I certify that due diligence has been exercised and proper inquiries made in completing this questionnaire, and that the foregoing is true and correct to the best of my knowledge.

Applicant Signature:  Date: 4/4/2024

**MATERIAL SITE RECLAMATION PLAN OR
 LETTER OF INTENT/ANNUAL RECLAMATION STATEMENT
 AS 27.19.030 – 27.19.050**

In accordance with Alaska Statute 27.19, reclamation is required of all mining operations, including sand and gravel extraction. Completion of this form will meet the law's requirements for a **reclamation plan** (see below for filing requirements; due date: at least 45 days before mining is proposed to begin; requires approval by the Division of Mining, Land and Water). Completion of this form will also serve as a **letter of intent** for operations exempt from the plan requirement (due date: before mining begins). No approval is required for a letter of intent, but a miner who files a letter of intent must, before December 31, file an **annual reclamation statement** (Section 8 of this form).

Check applicable box:

- A. RECLAMATION PLAN (REQUIRED if the operation will disturb five or more acres this year, OR 50,000 cubic yards, OR if the operation has a cumulative disturbed area of five or more acres)
- B. RECLAMATION PLAN-VOLUNTARY (for an operation below the limits shown in Box A but wanting to qualify for the statewide bonding pool)

- C. LETTER OF INTENT (less than five acres to be disturbed AND less than 50,000 cubic yards AND less than five acres unreclaimed area) NOTE: A miner who files a letter of intent is also required to file an annual reclamation statement at the end of the year.

THIS RECLAMATION PLAN/LETTER OF INTENT IS FOR CALENDAR YEAR _____
 (If you checked either box a or b above and propose a multi-year plan, state all years covered.)

1. **MINER INFORMATION** (If there is more than one miner, attach a list of the names, addresses, and telephone numbers of all other owners, operators, or leaseholders of the mining operation)

Dept. of Transportation and Public Facilities _____

Name of miner who will serve as agent for notice purposes
 2301 Peger Rd _____

Address (notify the department of any later change of address)
 Fairbanks AK 99709 [REDACTED]
 City State Zip code Telephone

Dept. of Natural Resources - MLW _____

Name of landowner (if other than miner) or public land management agency
 MMS# 224966 _____

Federal or state casefile number (if any) assigned to the site _____

2. LEGAL DESCRIPTION OF PROPOSED MINING SITE

Section 8 & 9	21S	10W	Fairbanks
Legal Subdivision/Section/Quarter-Section	Township	Range	Meridian

3. **DESCRIPTION OF THE MINING OPERATION** (if you checked box a or b on p. 1 of this form and are proposing a multi-year reclamation plan, attach separate sheets as needed showing acreage to be mined, volume to be mined, and existing acreage of mined area for each year covered by the plan)

- a. 5> Total acreage to be mined or disturbed during the year.
- b. As Needed Estimated total volume to be mined or disturbed, including overburden.
- c. Riprap & Gravel Type of material (sand, gravel, peat, etc.).
- d. >20 Existing acreage of mined area (disturbed area that has not yet been reclaimed, but counting only acreage disturbed after October 15, 1991).

4. **DESCRIPTION OF THE RECLAMATION OPERATION**

- a. The total acreage that will be reclaimed during the year (or each year, if for a multi-year reclamation plan) is:
See Attached
- b. Provide a list of equipment (type and quantity) to be used during the reclamation operation.
- c. A time schedule of reclamation measures shall be included as part of the plan.

The following measures must be considered in preparing and implementing the reclamation plan. Please mark those measures appropriate to your reclamation activity:

- Topsoil that is not promptly redistributed to an area being reclaimed will be separated and stockpiled for future use. This material will be protected from erosion and contamination by acidic or toxic materials and preserved in a condition suitable for later use.
- The area will be backfilled, graded and recontoured using strippings, overburden, and topsoil to a condition that allows for the reestablishment of renewable resources on the site within a reasonable period of time. It will be stabilized to a condition that will allow sufficient moisture to be retained for natural revegetation.
- Stockpiled topsoil will be spread over the reclaimed area to promote natural plant growth that can reasonably be expected to revegetate the area within five years.
- Stream channel diversions will be relocated to a stable location in the flood plain.
- Exploration trenches or pits will be backfilled. Brush piles, vegetation, topsoil, and other organics will be spread on the backfilled surface to inhibit erosion and promote natural revegetation.
- All buildings and structures constructed, used, or improved on land owned by the State of Alaska will be removed, dismantled, or otherwise properly disposed of at the completion of the mining operation.
- Any roads, airstrips or other facilities constructed to provide access to the mining operation shall be reclaimed (unless otherwise authorized) and included in the reclamation plan.
- Peat and topsoil mine operations shall ensure a minimum of two inches of suitable growing medium is left or replaced on the site upon completion of the reclamation activity.
- If extraction occurs within a flood plain, the reclamation activity shall reestablish a stable bed and bank profile such that river currents will not be altered and erosion and deposition patterns will not change.

NOTE: If you propose to use reclamation measures other than those shown above, or if the private landowner or public land manager of the site requires you to use stricter reclamation measures than those shown above, attach a list of those measures to this plan.

5. ALTERNATE POST-MINING LAND USE

- The mining site is public land. The land management agency's land use plan (if any) for post-mining land use is:

- The mining site is public land. As allowed by AS 27.19.030(b), I propose to reclaim it to the following post-mining land use:

- The mining site is private property. The private landowner plans to use it for the following post-mining land use:

6. ATTACHMENTS

- If the mining operation has additional owners, operators, or leaseholders not shown on p. 1 of this form, attach a list of their names, addresses, and telephone numbers.
- Attach a USGS map at a scale no smaller than 1:63,360 (inch to the mile) showing the general vicinity of the mining operation and the specific property to be mined. Option: If you checked Box C on the first page of this form and the mining site is adjacent to an airport or public highway, state the name of the airport or the name and milepost of the public highway.
- Attach a diagram of the mined area (this term includes the extraction site, stockpile sites, overburden disposal sites, stream diversions, settling ponds, etc.) and the mining operation as a whole (this term includes the roads you plan to build, your power lines, support facilities, etc.). Show and state the number of acres to be mined during the year. (If you checked Box A or B on the first page of this form and your plan covers more than one year, show each year's work.) Show the location corners or property boundaries of the site in relation to the reclamation work and any other areas affected by the operation.
- Attach a list of the equipment (type and quantity) to be used during the reclamation activity.
- A time schedule of events must be attached that includes dates and activities related to this reclamation plan.
- If the site is private land not owned by the miner, attach a signed, notarized statement from the landowner indicating the landowner's consent to the operation. The landowner may also use the consent statement to notify the department that the landowner plans a post-mining land use incompatible with natural revegetation and therefore believes that reclamation to the standard of AS 27.19.020 is not feasible.
- For those miners that are required to file an annual reclamation statement, attach photographs and/or videotapes dated and described as to location of the reclamation activity that was completed.
- If you propose to use reclamation measures other than those listed on this form, or if the private landowner or public land manager of the site requires you to use stricter reclamation measures, attach a list of those measures.

7. **RECLAMATION BONDING** (REQUIRED **ONLY** IF YOU CHECKED BOX A or B ON THE FIRST PAGE OF THIS FORM)

The total acreage of my mining operation that is subject to the bonding requirement for the current year is _____ acres (add acreages stated in Section 3(a) and 3(d) of this form).

The per-acre bond amount is \$750/acre or a total bond amount of \$_____

Please check the appropriate bonding method that you will apply toward this reclamation plan:

- Participation in the statewide bonding pool.
- Posting a corporate surety bond.
- Posting a personal bond accompanied by a letter of credit, certificate of deposit, or a deposit of cash or gold.
- Posting a bond or financial guarantee with another government agency that has jurisdiction over the mining operation, as allowed by a cooperative management agreement between that agency and the Division of Mining, Land and Water.
- Posting a general performance bond with a state agency that meets the requirements of 11 AAC 97.400(4).

The above reclamation plan/letter of intent and all attachments are correct and complete to the best of my knowledge.

Signature of Miner

4/4/2024

Date

AS 27.19.030 and AS 27.19.050 require a miner either to file a reclamation plan for approval or to file a letter of intent followed by an annual reclamation statement. AS 38.05.035(a) authorizes the director to decide what information is needed to process an application for the sale or use of state land and resources. This information is made a part of the state public land records and becomes public information under AS 40.25.110 and 40.25.120 (unless the information qualifies for confidentiality under AS 38.05.035(a)(8) and confidentiality is requested, AS 43.05.230, or AS 45.48). Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 44.99.310, by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210. In submitting this form, the applicant agrees with the Department to use "electronic" means to conduct "transactions" (as those terms are used in the Uniform Electronic Transactions Act, AS 09.80.010 – AS 09.80.195) that relate to this form and that the Department need not retain the original paper form of this record: the department may retain this record as an electronic record and destroy the original. In submitting this form, the applicant certifies that he or she has not changed the original text of the form or any attached documents provided by the Division.

8. **ANNUAL RECLAMATION STATEMENT—REQUIRED** IF YOU FILED A LETTER OF INTENT (CHECKED BOX C ON THE FIRST PAGE) FOR THIS OPERATION. DUE DATE: DECEMBER 31, _____. YOU MUST FILE EVEN IF THE MINING DESCRIBED IN YOUR LETTER OF INTENT DID NOT TAKE PLACE.

This _____ annual reclamation statement is for:
(year)

- a. _____ Total acreage mined.
- b. _____ Total volume mined or disturbed, including overburden.
- c. _____ Total acreage reclaimed.
- d. _____ Cumulative total of unreclaimed acreage.
- e. Reclamation measures that were used (check appropriate measures from Section 4, DESCRIPTION OF THE RECLAMATION OPERATION, and attach list of additional or stricter measures if applicable).

The above annual reclamation statement and all attachments are correct and complete to the best of my knowledge.

Signature of Miner

Mining and Reclamation Guidelines
Material Site 35-4-045-2
Parks Highway MP 181

These guidelines are subject to the Alaska Department of Natural Resources (DNR) Material Sale Contract, ADL 224966, and stipulations contained therein. For each new use or project, the user or contractor shall submit a Project Mining and Reclamation Plan to DNR for approval, subject to DOT&PF review, prior to any mining activities.

Legal Description

T21S, R10W, FM

Section 8: That portion of the E $\frac{1}{2}$ SE $\frac{1}{4}$ lying north of Antimony Creek, excluding the Antimony Creek M&O Station ILMA, ADL 230500;

Section 9: That portion of the SW $\frac{1}{4}$ lying north of Antimony Creek and west of the Parks Highway, excluding the Antimony Creek M&O Station ILMA, ADL 230500.

This material site contains approximately 68.7 acres.

General Information

This undeveloped borrow site is located west of the Parks Highway near MP 181. It is located adjacent to a proposed new M&O station. Material consists of alluvial sand and gravel with silt, cobbles and boulders. DOT&PF has not conducted site exploration. Nearby site information is available at the DOT&PF Materials office, 2301 Peger Road, Fairbanks, Alaska 99709.

Mining Guidelines

Buffers: Maintain a 100-foot-wide undisturbed buffer along the Parks Highway right-of-way. Maintain a 50-foot- undisturbed buffer around the rest of the site. Clearly mark buffers on the ground in work areas. Do not disturb or place strippings or overburden in buffers.

Development plan: Plan and construct an access road into the site. Mine the site in 5-acre cells. Once material in the cell is exhausted, move to the next adjacent cell concurrently reclaiming the depleted cell. Leave a work pad/staging area. Conventional mining above the water table (borrow) is anticipated.

The Project Mining and Reclamation Plan will adhere to the following guidelines.

1. The contractor or user shall locate the material site boundaries to verify work areas are within the site.
2. Establish and clearly mark buffer lines on the ground in work areas.

3. Pit perimeter slopes (i.e. adjacent to buffers) shall not exceed 3H:1V. Final reclaimed slopes shall not exceed 3H:1V.
4. Prior to any new site clearing contact the DNR Division of Forestry to get instructions for treatment of any merchantable timber, firewood, brush or slash produced.
5. For any new clearing, stockpile surface vegetation and organic soils adjacent to buffers or use directly for reclamation of depleted areas. Do not place organics or overburden in future mining area, where it would need to be moved again.
6. After each use, grade pit floor level or slope gently to blend with earlier depth limits. Do not allow runoff to exit the site.
7. After each use, remove all equipment and man-made debris or waste from the site. No damaged culverts or any other construction debris may be placed, stored, or abandoned in the site.
8. All mining and stockpiling activities shall be in accordance with applicable Construction General Permits (CGP) and Storm Water Pollution Prevention Plans (SWPPP).

Reclamation Objectives and Guidelines

The reclamation plan has several objectives:

1. To not preclude or hinder future development of un-mined areas.
2. To blend with previous reclamation and surrounding topography.
3. To prevent erosion and sediment transport to surrounding, undisturbed areas.
4. To allow reestablishment of native vegetation and wildlife habitat.
5. To leave the site in a safe condition that does not endanger people or wildlife.

Reclamation activities will include:

1. Grading slopes adjacent to perimeter buffers, or where future development is not anticipated at 3H: 1V or flatter.
2. Spread and compress available overburden and organic material on reclaimed slopes and allow to revegetate naturally.

Project Mining and Reclamation Plan

Prior to use of the site for any project, the contractor or user shall submit a Project Mining and Reclamation Plan, in accordance with A.S. 27.19 and 11 AAC 97 to DNR for approval, subject to DOT&PF review. The Plan describes the proposed plan of operation and shall be in compliance with guidelines listed here. Upon approval, the Plan will be followed by the contractor or user and if applicable, the DOT&PF Project Engineer. The plan should include the following:

Sketch Map

The sketch map shall include:

1. Site boundaries and buffers

2. Proposed working limits, to be marked on the ground
3. Organic debris and overburden stockpile areas
4. Access road, work pad, stockpiles, processing facilities
5. Scale of drawing, north arrow, and specific dimensions as appropriate

Narrative

The narrative shall include:

1. Methods of operation
2. Estimated quantities for removal
3. Estimated areal extents (acreage)
4. Length and times of operation (day, month, year, and working hours)
5. Air and water pollution control measures
6. Reclamation measures

Supplements and amendments

Supplements and amendments to an approved mining and reclamation plan may be initiated by the contractor, user or the DOT&PF Project Engineer, when conditions warrant such action. Supplements and amendments must be mutually agreed upon and proper approval obtained prior to commencement of work of a changed nature.

1. Minor changes are those that affect details of the operation, but remain in compliance with the development guidelines. These changes may be authorized by the DOT&PF Project Engineer.
2. Major changes are those which cause the final outcome of the site to be significantly different from the approved mining and reclamation plan or are not in compliance with the development guidelines. These require approval by DNR and the appropriate regulatory agencies prior to approval by the DOT&PF Project Engineer.
