ADF&G No: _____

Alaska Aquatic Farm Program Joint Agency Application – Part II

You are encouraged to submit a completed application as early in the filing period as possible. The current application form must be used and properly completed before state agencies can process your project. **An incomplete application will not be processed.** A checklist is included to assist you in meeting this requirement. The best way to facilitate the review of your application is to schedule a pre-application meeting with ADNR and ADF&G to discuss your project. The original application including attachments and all required fees must be delivered and present in the Alaska Department of Natural Resources office no later than April 30th.

The project location is in: ☒ Southeast Alaska ☐ Southcentral Alaska
☐ Kodiak ☐ Alaska Peninsula ☐ Other

This project is: ☐ First Time Application ☒ Renewal Application

A. APPLICANT INFORMATION

Name

TOM CARRUTH

Business Name (If Applicable)

ALASKA SHELLFISH

Mailing Address (PO Box or Street Address)

BOX 8641

City

State Zip

KTN AK 99901

Email Address

[REDACTED]

Home/Office Phone

Cell Phone

[REDACTED]

Contact Name

TOM CARRUTH

Contact Phone Number

[REDACTED]

Business Partner Name (If applicable)

Business Partner Email Address (If applicable)

Business Partner Phone (If applicable)

B. PROJECT DESCRIPTION

In the space provided below, please provide a general description of your proposed aquatic farm site and operations. This should be a narrative of your proposal that includes where your project will be located, overall size including any hardening area, all species you intend to culture, type of farm gear, equipment, support facilities, and associated housing to be used including size, number, and construction materials. Your narrative should match the rest of the application information you provide. If additional space is necessary, **please attach a separate document labeled "PROJECT DESCRIPTION". Example information for project narrative can be found in Attachment I.**

PROJECT DESCRIPTION

DATE SUBMITTED: 03/02/2026

Company Name

ALASKA SHELLFISH

Site Location [Include water body, distance from nearest community, any landmarks, general region of Alaska, and whether on state tidal and/or submerged lands or private. Provide enough information to understand where it is located.]

Those tide submerged lands Located within an unnamed cove south of Point Sykes In Rivillagigado channel Approximately 25 miles southeast of Ketchikan Alaska.

Site Dimensions, Acres for Each Parcel

Intertidal growing area for ~~Geoduck~~ and Pacific oysters is 400 feet by 300 feet

Geoduck

Northeast corner 55 11.136 N 131 5.279 W

Southeast corner 55 11.080 N 131 5.261 W

Southwest corner 55 11.050 N ~~55 11.050 N~~ 131 5.326 W

Northwest corner 55 11.113 N 131 5.356 W

Total Acres of All Parcels

2.75 acres

Species You Intend to Farm [Include scientific and common species name]

Geoduck panopea ~~abrupta~~ generosa

Pacific oysters Magallana gigas

Cockles Clinocardium nuttallii

Little Neck clams Protothaca staminea

Culture Method *[Describe operation activities to be done onsite such as outplanting of seedstock, husbandry techniques to be used (culling, sorting, washing, etc.), maintenance and monitoring activities, management of fouling organisms and incidental species, predator control measures, and schedule of activities such as timing of outplanting seeded lines or adding seedstock into trays, etc. Describe what methods you plan to use based on the definition in "Culture" means to use or the use of methods to manipulate the biology and the physical habitat of a desired species to optimize survival, density, growth rates, uniformity of size, and use of the available habitat, and to efficiently produce a product suitable for a commercial market.]*

Year round Farming operations for the development of oysters in Vexar mesh oyster bags The bags will be flipped by tides or by at plus. Natural tide and ocean current will create tumbling for the oysters. The bags will be removed and cleaned, And the oysters will be removed and tumbled on board a boat during heavy summer growth months.

Little neck and cockle clam seed will be placed under predator mesh until larger size.

Geoduck clam Will be placed in vexar predator tubes or mesh for grow out.

Culture Gear and Equipment (Type, Size, Number, Configuration, Material, and Anchoring System) *[If more than one parcel, indicate what parcel specific gear will be located on. If more than one species, indicate gear to be used for each. Gear includes any structure that holds or protects the organism like trays, tiers of lantern nets, Vexar bags, OysterGro system, grow-out submerged longlines, predator netting, longlines, buoys, depth control systems, etc. Include approximate installation schedule, or if and what gear will remain installed year-round etc.]*

Year round oyster gear will include up to 120 to 140 ground lines 200 feet long installed on bottom and attached at both ends Two 30 inch metal earth anchors. Approximately 100 Vexar mesh oyster bags approximately 30 inches by 30 inches attached with Long Line Canyon tied to a long line snap here and snap to the ground line. This will be the area zero tide and plus tide zone of the site.

Little neck and Cockle will be placed under four by 20 foot Vexar predator and left for grow in minus tide areas below zero tide.

Vexar tubes and Vexar Predator will be placed in the minus tide areas of the site for geoduck planting.

Seed Acquisition Plan (Commercially produced and/or wildstock) [Commercially produced juveniles or seed stock must be obtained from an approved seed source. Do you intend to collect wildstock juveniles or natural set organisms for direct culture on your proposed site? Yes/No. If yes, describe collection methods (applicable for indigenous species: i.e. mussels, scallops, abalone, natural set aquatic plants, etc. This does not refer to broodstock collection on behalf of hatcheries for propagation. If increasing number of acquisitions per year, indicate projected amounts per year. Aquatic plant species can be combined into total feet of line per year.)

For Geoduck We will collect wild broodstock from the wild and work with Alutiq Pride in Seward to receive juvenile geoduck for plant out on the site.

For Pacific oysters we will work with commercial hatcheries to receive spat to plant out at the site.

For little neck clams and cockles we will work Alutiq Pride for seed source.

Harvest Equipment and Method [Describe harvest equipment and methods to be used, activities to be done onsite, and schedule of harvest of aquatic farm product. If more than one species, include harvest information for each species or group of species like macroalgae if the harvest information is the same.]

pacific oysters harvest by hand

littleneck and cockles harvest by hand,rake

geoduck harvest by mechanical dig,hand

Support Facilities (Type, Size, Number, Configuration, Material, and Anchoring) [Support facilities include caretaker facility, storage rafts, work rafts, processing rafts, etc.]

none

Access to and from Site [Include nearest community, transportation type used and how many times traversing back and forth]

25 miles south east of Ketchikan, access to site is by boat
probably travel back and forth once or twice a month in spring, summer months
probably zero in harsh winter months

Storage Location of Equipment and Gear When Not in Use [Include whether on private lands and nearest community]

at my house, private uplands in Ketchikan

C. PROJECT OPERATION PLAN

1. How will support facilities, culture gear and anchoring systems be maintained?

- a. How often, in days per month, do you intend to monitor your site for things such as adequate anchoring, disease, exotic species settlement, fouling, gear drift, snow load, wind damage, vandalism, etc.?

Growing season 4 or 5 days (days/month) Off months 0 (days/month)

- b. How will you keep the gear and shellfish free of fouling organisms (hot-dip, air dry, pressure washing, etc.)?
pressure wash, air dry

- c. How will you manage reduction of competing species over the course of operations (relocate sea stars, grow-out cages, or other possible protection from competing species)?
grow out bags for oysters protect against predators; geoduck bury in sand

- d. If you intend to use predator netting, how long will you keep netting over your product?
12-16 (months)

- e. If using predator netting, how will you minimize impacts on non-target species, including seabirds, seals, sealions, walrus and whales?
mesh is quarter inch, so pretty minimal impacts, probably zero

2. Projected Harvest Rotation Consistent with Life History

- a. How often do you intend to harvest your product by species?
hopefully oysters will be annually, geoduck 5-7 yr growout then annually

- b. Do you plan on utilizing density manipulation by culling or redistribution?
oysters will be sorted into grow out bags as they get larger, so yes, but no for geoduck

- c. What techniques will be used to optimize growth or condition of product?
 monitoring the species location in the tide zone and adjust for optimal growth
 oysters will be sorted as they grow allowing for growth
 geoduck grow best in soft sand; the site is soft sand

3. Acquisition of hatchery or wild seed

- a. Will you use a certified or approved shellfish seed source(s)? Yes ☒ No ☐
- b. Will you use an Alaska kelp hatchery? Yes ☒ No ☒ N/A
- c. How do you intend to collect wild seed? (Applicable for indigenous species: i.e. clams, natural set kelp, invertebrates, etc.)
 diving no wild seed collection

4. Describe how operation of the aquatic farm will improve the productivity of species intended for culture not covered by the previous questions (examples: predator exclusion, reduction of competing species, density manipulation by culling/redistribution, importing natural or hatchery seed, program harvest to optimize growth/condition and habitat improvement)?
 importing hatchery seed, predator exclusion netting

D. PROJECT LOCATION

1. Coordinates

Please provide latitude and longitude coordinates for each corner of each parcel at the proposed farm site. Identify each parcel to be used. For example, Parcel 1 - growing area, Parcel 2 - hardening area, etc. Latitude and longitude coordinates must be in **NAD83 datum using degrees and decimal minutes format to the nearest .001 minute** (Example: **Longitude -133° 17.345**), obtained using a Global Positioning System (GPS). If you are applying for more than three parcels or your proposed parcels have other than four corners, please provide those coordinates in your project description or on a separate sheet.

Parcel 1: (e.g. Grow-out Area)	NE Corner	No. 1: Latitude	55 11.136 N	Longitude	131 5.279 W
	SE Corner	No. 2: Latitude	55 11.080 N	Longitude	131 5.261 W
	SW Corner	No. 3: Latitude	55 11.050 N	Longitude	131 5.326 W
	NW Corner	No. 4: Latitude	55 11.113 N	Longitude	131 5.356 W
Parcel 2: (e.g. Hardening Area)	NE Corner	No. 1: Latitude		Longitude	
	SE Corner	No. 2: Latitude		Longitude	
	SW Corner	No. 3: Latitude		Longitude	
	NW Corner	No. 4: Latitude		Longitude	
Parcel 3: (e.g. Support Facility Area)	NE Corner	No. 1: Latitude		Longitude	
	SE Corner	No. 2: Latitude		Longitude	
	SW Corner	No. 3: Latitude		Longitude	
	NW Corner	No. 4: Latitude		Longitude	

2. Site Size

Please use the following formula to compute area. For more complex parcel shapes, you may wish to use the Measure Area tool in Alaska Mapper found at [http://www.alaskamapper.org](#). If you are applying for more than three parcels or your parcels are not rectangular, you may provide this information in the project description or on a separate sheet.

1. To compute the total area (sq. ft), multiply the width (ft) by the length (ft) of Parcel 1. The outside length and width of the Parcel **must include your anchors and anchoring system plus any scope.**
2. Divide the area (sq. ft) of Parcel 1 by 43,560, to convert the area from sq. ft to acres.
3. Repeat for each separate Parcel of your proposed farm site.
4. Add the acreage of each Parcel to get the total tideland acreage for your proposed farm site.
5. Write the Total Acreage on the line where indicated.
6. Note that the number of acres must correspond to your farm site maps and drawings.

Parcel 1:	300	feet (x)	400	feet =	120,000	square feet (÷) 43,560 =	2.75
	(Width of Parcel 1)		(Length of Parcel 1)		(Area)		(Acres)
Parcel 2:		feet (x)		feet =		square feet (÷) 43,560 =	
	(Width of Parcel 2)		(Length of Parcel 2)		(Area)		(Acres)
Parcel 3:		feet (x)		feet =		square feet (÷) 43,560 =	
	(Width of Parcel 3)		(Length of Parcel 3)		(Area)		(Acres)
How many total acres of state-owned tidelands are you applying for (add all parcel acres):							2.75
							(Total Acreage)

If you are also applying for state owned uplands for support facilities, how many total upland acres? _____
(Total Upland Acreage)

3. Maps and Diagrams

Provide copies of maps and diagrams including general and detailed location maps, site plan map (an overview), cross-sectional diagram and detailed drawings. If the project has multiple parcels, you must provide maps of each parcel. Copies of the maps and drawings should be no larger than 8½" x 11" (standard letter size). Examples are provided at the end of the application.

A list of mapping resources is provided below:

[Alaska Mapper](#)

[Alaska Ocean Observing System Mariculture Map](#)

[NOAA Nautical Charts](#)

[ShoreZone Mapping System](#)

[Catalog of Anadromous Streams](#)

*Be sure to include a legend box on all maps and diagrams you provide with your application with the following information:

FORMATTING

Figure No. and Title
Applicant Name (Business Name)
Waterbody
Area/Region
Today's Date

LEGEND BOX EXAMPLE

Figure 1 Detailed Location Map
Alaska's Best Oysters
Jerryton Bay
East of Prince of Wales Island, Southeast AK
March 30, 2012

- a. **General Location Map** - This map is a larger scaled map showing larger surrounding area with less detail (See Attachment 2, Figure 1). Use a USGS Topographic quadrangle map (scale: 1" = one mile (1:63,360)) and label it "Figure 1" and show the following information:
- ☒ USGS Map Name (e.g. Craig B-4) _____
 - ☐ General location of the farm site
 - ☐ Distance (in nautical miles), and direction (arrow) of the site from the nearest community
 - ☐ A directional arrow identifying North
 - ☐ Scale
 - ☐ Legend box (example on previous page)
- b. **Detailed Location Map** - This map is a smaller scaled map showing more detail (See Attachment 2, Figure 2). Use a National Oceanic and Atmospheric Administration (NOAA) navigational chart and label it "Figure 2" and show the following information:
- ☐ NOAA Chart No. _____
 - ☐ Boundaries of each farm area parcel and clearly label all corners (NE, SE, SW, and NW)
 - ☐ Directional arrow identifying North
 - ☐ Scale on map
 - ☐ Legend box (example on previous page)
- If uplands area is proposed:
- ☐ Location and type of use (e.g. housing, storage shed, etc.)
- c. **Site Plan Map** - Draw an overhead view of the farm area parcel(s) and surrounding area (See Attachment 2, Figures 3 and 4). Label it "Figure 3" and show the following information:
- ☐ All in-water structures and anchoring systems (All anchoring systems and anchor scope have to be inside the farm parcel boundary)
 - ☐ All equipment and support facilities with dimensions (in feet)
 - ☐ Areas of eelgrass beds (intertidal zone)
 - ☐ Areas of kelp beds (subtidal zone)
 - ☐ Fuel and chemical storage
 - ☐ Nearby anadromous streams (fish)
 - ☐ Distance between all facilities, gear or equipment on the proposed farm site
 - ☐ Legend box (example on previous page)
- d. **Cross-Sectional Diagram(s)** - Provide Cross-Sectional Diagram(s) of all support facilities, equipment, and gear showing their placement and anchoring systems (See Attachment 2, Figure 5). Note that more than one diagram may be required. Label it "Figure 5" (and so on) and show the following information:
- ☐ Distance from bottom of gear to ocean bottom at mean lower low tide
- If suspended or on-bottom culture:
- ☐ water depth at low tide
 - ☐ major on-bottom physical features (sand, mud, silt, clay, bedrock, cobble, shells, rockweed, algae/seaweed) and contours
 - ☐ Dimensions of the anchoring configuration and poundage
 - ☐ Scale
 - ☐ Legend box (example on previous page)
- e. **Detailed Drawing(s)** - Provide Detailed Drawing(s) of all support facilities, equipment, and gear (See Attachment 2, Figure 5). Note that more than one diagram may be required. Label and show the following information:
- ☐ Draw and label the dimensions (length/width/height) of all proposed gear and equipment
 - ☐ Legend box (example on previous page)

E. SITE SUITABILITY – PHYSICAL AND BIOLOGICAL CHARACTERISTICS

1. Is the proposed location protected from severe storms, strong currents, winter ice, etc. and if not, is the farm designed for extremes?
Yes ☒ No ☐ Additional Information _____
 2. Does your site have suitable water exchange for species of culture? Yes ☐ No ☐
 3. Are water temperatures suitable for proposed species of culture? Yes ☐ No ☐
(Note: temperatures > 60° and < 31° F may pose problems such as Vibrio bacteria contamination or icing.)
 4. Is there any significant freshwater influence near the farm? Yes ☐ No ☒
(Note: freshwater may impact shellfish growth and/or survival or carry fecal coliform or other pollutants)
 5. Is the salinity concentration at your proposed farm site appropriate for species of culture? Yes ☐ No ☐
 6. Have you monitored the phytoplankton (microalgae) abundance and types during the main grow-out season?
Yes ☐ No ☒ If yes, findings: _____
(Note: shellfish depend on phytoplankton for food, but harmful phytoplankton can prevent harvest/sales.)
 7. Have you monitored suspended sediments or turbidity (e.g. water clarity/transparency using a secchi disc) at your proposed farm site? Yes ☐ No ☒ If yes, findings: _____
(Note: This is used as rough check for microalgae densities, run-off, and glacial silt (milky- grey color).)
 8. For on-bottom culture, are the bottom characteristics suitable for the proposed species? Yes ☒ No ☐
Substrate and vegetation? sand
 9. For on-bottom culture, how will bottom characteristics be made suitable if not already?
currently suitable, no changes necessary
 10. For suspended culture, is the water depth sufficient to prevent gear from grounding and impacting the benthos under floating structures? Depth of Gear (in ft): N/A Water depth at low tide (in ft): N/A
 11. Is your proposed site more than 300 ft from an anadromous fish stream? Yes ☒ No ☒
 12. Are you aware of any eelgrass or kelp beds on or near your proposed farm site? Yes ☐ No ☒ If yes, describe:
 13. For farming using on-bottom culture methods, is there insignificant wild stock of the species to be cultured on the proposed farm site? (Reference 5 AAC 41.235) Yes ☐ No ☒ Additional information
 14. Are there existing uses near your proposed farm site such as boat traffic, existing fisheries or a sensitive area as listed in section C of Part 1, etc. that may be impacted by the farm operation? Yes ☐ No ☒ If yes, describe how your farm can be sited to mitigate conflicting uses?
intertidal site
-

F. KNOWN EXISTING USES

Please check the boxes below, to indicate existing human and/or wildlife uses observed or known to exist at or within one mile of the proposed farm site. Indicate the locations of these existing uses on the Site Plan Map if specific locations are known (refer to page 8, Section 3c).

- | | |
|--|--|
| ☐ mining | ☐ other aquatic farm projects |
| ☐ timber harvest or transfer | ☒ commercial fishing |
| ☐ residential use | ☒ sport fishing |
| ☐ harbor development | ☐ salmon hatcheries |
| ☐ sheltered boat anchorage | ☐ hunting |
| ☐ seaplane landing | ☐ seafood processing plant |
| ☐ commercial lodges | ☐ upland access route(s) areas, bear trails, etc. |
| ☐ sightseeing | ☐ wildlife use, (e.g. shorebirds, sea mammal haul-outs) |
| ☐ recreation | ☐ subsistence; list species and frequency |
| ☐ tourism | |
| ☐ historical/cultural/archaeological site | |

☐ navigational channels: _____

☐ other; list _____

G. SUPPORT FACILITIES

1. Personnel/Caretaker Housing (additional annual fees apply)

Are you proposing any personnel/caretaker housing? Yes ☐ No ☒

If yes, the proposed size will be: _____ (Width) _____ (Length) _____ (Height)

Please attach diagrams/drawings with labels clearly showing the Personnel/Caretaker housing.

Note: you may stay a maximum of 14 consecutive days at your site on state-owned uplands or tidelands without applying for personnel/caretaker housing.

2. Enclosed Processing Facility

Are you proposing any enclosed processing facility? Yes ☐ No ☒

If yes, the proposed size will be: _____ (Width) _____ (Length) _____ (Height)

Please be sure the processing facilities are included in the maps and diagrams described in the Maps and Diagrams section above.

3. Upland Property

Do you currently own or lease upland property adjacent to, or near, the proposed farm site that you plan to use in conjunction with your proposal? Yes ☐ No ☒ If yes, attach a copy of ownership deed or lease.

If you are the adjacent upland owner, are you applying for a preference right under 11 AAC 63.040(f)?

Yes ☐ No ☒

H. CITY AND BOROUGH CONTACTS

1. City/Borough Authorization

If you are applying within a city or borough, please contact the appropriate authority as additional authorizations may be required from them. Please provide the name, address, and telephone number of the person(s) you contacted and list any required authorizations.

CITY/BOROUGH	PHONE	CONTACTED?
☐ City of Cordova	907-424-6220	Yes ☐ No ☐
☐ City of Klawock	907-755-2261	Yes ☐ No ☐
☐ City and Borough of Wrangel	907-874-2381	Yes ☐ No ☐
☐ City of Craig – Planning & Zoning	907-826-3275	Yes ☐ No ☐
☐ City and Borough of Juneau – Permit Center	907-586-5252	Yes ☐ No ☐
☐ City and Borough of Sitka – Planning & Community Development	907-747-1814	Yes ☐ No ☐
☐ City of Thorne Bay	907-828-3380	Yes ☐ No ☐
☐ City and Borough of Yakutat – Planning & Zoning Commission	907-784-3323	Yes ☐ No ☐
☐ Kenai Peninsula Borough – Land Management Division	907-714-2205	Yes ☐ No ☐
☐ Kodiak Island Borough – Community Development	907-486-9363	Yes ☐ No ☐
☐ Lake and Peninsula Borough – Community Development	907-246-3421	Yes ☐ No ☐
☐ Aleutians East Borough – Permitting	907-383-2699	Yes ☐ No ☐
☐ Ketchikan Gateway Borough – Planning & Community Development	907-228-6610	Yes ☒ No ☐
☐ Haines Borough	907-766-6401	Yes ☐ No ☐

Type of Authorization required by City or Borough: _____

I. WATER QUALITY INFORMATION – Department of Environmental Conservation

1. Do you plan to use a boat on your farm site? Yes ☒ No ☐ If yes, indicate the type of marine sanitation device. MSD LectraSan

2. If you plan to have personnel housing or caretaker facilities:
Will wastewater be discharged from these facilities? Yes ☐ No ☒ If yes, what are the daily maximum and average discharge volumes? Maximum _____ Average _____

3. Were there any sources of past pollution at the site, such as a shore-based seafood processor, log transfer facility, industrial facility, oil spill contamination, or town or village? Yes ☐ No ☒ Unknown ☐

If yes, identify:

- a. The type of previous use (e.g. mine, village, seafood processor, oil spill).

- b. The last known date of use. _____

- c. The distance from site previously used to your proposed site. _____

4. Are you aware of any current potential sources of human or industrial pollution in the area? (e.g. sewage outfalls, oil contamination, industrial transfer facilities upland operations, boat harbors, etc.)

Yes ☐ No ☒ If yes, describe:

- a. The type of discharge(s).
- b. The location and distance from your site.
- c. The name of the discharger(s), if known.

5. Are you aware of any other planned development in the general area of your proposed site?

Yes ☐ No ☒ If yes, describe the planned development.

6. ADEC may request that you provide a map for certain projects to show the following information:

- a. areas of wastewater disposal systems, including both sewage and grey water discharge points (grey water means domestic wastewater from laundry, kitchen, etc., which does not contain human waste)
 - b. location of drinking water, including drinking water wells or other drinking water system sources (fresh water and salt water), within 200 feet of any proposed or existing wastewater disposal systems
 - c. location of solid waste storage and disposal sites (Note: you are encouraged to use existing permitted sites for the disposal of solid wastes. If there are not any existing permitted disposal sites in the area and they are necessary in your operation, you must contact the ADEC for authorization)
 - d. areas used for fuel and chemical storage
-

J. APPLICATION SIGNATURE BLOCK

**AQUATIC FARM APPLICATION SIGNATURE AND
PROGRAM CERTIFICATION STATEMENT**

The information contained in this aquatic farm application is true and complete to the best of my knowledge and I certify that the proposed activity complies with and will be conducted in a manner consistent with all State and Federal Agency policies and regulations. I understand that modifications to the proposed activity may require additional review and that I may need to apply for additional authorizations.

This certification statement does not provide authorization necessary to sell my product. I understand I must separately apply for and hold a Growing Area Certification and a Shellfish Harvester or Shellfish Dealer Permit from the Department of Environmental Conservation.

Printed Name TOM CARRUTH
Signature of Applicant [Signature] Date 06/11/26

Printed Name _____
Signature of Applicant _____ Date _____

☐ I have enclosed the application fee required under 11 AAC 05.230(d)(3)(A)

In submitting this form, the applicant certifies that he or she has not changed the original text of the form or any attached documents provided by the Division. This information is made a part of the state public land records and becomes public information under AS 40.25.110 and 40.25.120 (unless the information qualifies for confidentiality under AS 38.05.035(a)(8) and confidentiality is requested, AS 43.05.230, or AS 45.48). Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 44.99.310, by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210. In submitting this form, the applicant agrees with the Department to use "electronic" means to conduct "transactions" (as those terms are used in the Uniform Electronic Transactions Act, AS 09.80.010 - AS 09.80.195) that relate to this form and that the Department need not retain the original paper form of this record: the department may retain this record as an electronic record and destroy the original.
