Amendment #1: AAC-26-013, Plumbing Subcontractor

SUBJECT: Manufacturer Requirements

On behalf of the Alaska Aerospace Corporation (AAC), this Amendment is issued for RFP AAC-26-013, Plumbing Subcontractor, originally posted on July 21, 2026. The purpose of this Amendment is to clarify the manufacturer requirements for materials, equipment, and supplies identified in the solicitation documents.

Any manufacturer, brand name, model number, or product identified in the drawings or specifications is provided as a basis of design and is not intended to restrict competition or require the use of a specific manufacturer. Contractors may propose equivalent products from other manufacturers, provided the proposed products meet or exceed the applicable performance, quality, dimensional, compatibility, and installation requirements contained in the RFP, drawings, and specifications.

Any proposed substitutions or equivalent products are subject to AAC review and approval. The Contractor is responsible for providing sufficient product data and supporting documentation to demonstrate that the proposed product satisfies all applicable solicitation requirements.

Except as specifically modified by this Amendment, all other terms and conditions of RFP AAC-26-013 remain unchanged.

Respectfully,

**Duffy Goodner, PMP**
