

**STATE OF ALASKA ITB NUMBER 2027-1100-0044
AMENDMENT NUMBER ONE**

Department of Fish and Game
Division of Administrative Services

THIS IS NOT AN ORDER

DATE AMENDMENT ISSUED: 8/3/2026

ITB TITLE: 2026 Test Fishery Harvest and Purchase of Bristol Bay Red King Crab

ITB OPENING DATE AND TIME: August 3, 2026 (2:00 PM AKST)

The following question was submitted and below is the Department's response:

Question 1: If the harvester starts fishing on or after 10/15/26, and has available IFQ, can he then bring in both ADFG contracted crab and IFQ in the same landing(s)? From reviewing the documents, it looks like that is permitted, but I just want to check to be sure.

Answer 1: Yes. A vessel that starts on or after Oct 15 can land any combination of ADFG cost recovery/IFQ/CDQ. The contract requires a vessel to prioritize harvesting the full amount of cost recovery crab before IFQ/CDQ.
