STATE OF ALASKA ITB NUMBER 2527H098
AMENDMENT NUMBER FOUR (4)

AMENDMENT ISSUING OFFICE:

Department of Transportation & Public Facilities
Statewide Contracting & Procurement
P.O. Box 112500
(3132 Channel Drive, Room 350)
Juneau, Alaska 99811-2500

THIS IS NOT AN ORDER **DATE AMENDMENT ISSUED: October 27, 2026**

RFP TITLE: ATLAS Replacement Project -Federally Funded

DUE DATE: October 30, 2026 at 2:00 PM. (Alaska Time)

This is not a mandatory return Amendment.

The purpose of this Amendment #4 is to:

- **Provide answers to questions received**

Questions and Answers

Question #1:

Through Amendment #1 the State provided the answer to part of this question. And advised that the remainder of the answer to this question would be provided through a later amendment.

Question in its entirety: underlined portion of the question was answered with Amendment #1. Bold portion of the question is answered with this Amendment #4.

Please provide the available ATLAS data model, database or export formats, approximate record and attachment volumes, and the parties responsible for extraction, cleansing, deduplication, and remediation. Please also clarify whether pre-2019 seatime records embedded in current employee histories are within the required migration scope.

Answer #1

The State is working with the current ATLAS contractor to determine what information about the data model and export formats can be released, and in what form. Details on the data model, export formats, and approximate record and attachment volumes will be provided to the awarded contractor.

Responsibilities:

- **Extraction:** The State, working with the current ATLAS vendor as needed, will extract the in-scope data from ATLAS and give it to the awarded vendor.
- **Cleansing, deduplication, remediation, and loading:** The awarded vendor is responsible for these. The awarded vendor knows its own data model and is best placed to decide how the legacy data

maps to its solution, what counts as a duplicate, and how records should be fixed. The State will provide subject matter expertise and support to answer questions and validate results.

Proposers should include the cost and timeline for cleansing, deduplication, remediation, and loading in their proposals.
